PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 17th September, 1859.

Mornings - - - -	1549
Evenings - - - -	1557
Total - - -	3106

Since the opening of the Museum Free Daily (May 12, 1858,)—141,780.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 597. FRIDAY, SEPTEMBER 23, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1814. To CHARLES CLAUDE RAYMOND GOUDENOVE and ADOLPHE FERET, both of No. 60, Rue Neuve St. Augustin, Paris, Merchants, for the invention of "An improvement in gas burners."—Partly a communication from Marie Pierre Augustin Coquet, a person residing at Paris, Rue des Trois Cornes, No. 39, Paris.

On their petition, recorded in the Office of the Commissioners on the 6th day of August, 1859.

1886. To WILLIAM LEATHAM, of Leeds, in the county of York, Engineer, for the invention of "An improved double acting superlative screw throttle valve."

On his petition, recorded in the Office of the Commissioners on the 16th day of August, 1859.

1910. To JOHN GREGORY, of Barreiro, in the kingdom of Portugal, Engineer, for the invention of "Improvements in locomotive and other steam engines."

On his petition, recorded in the Office of the Commissioners on the 22nd day of August, 1859.

1970. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the construction of steam generators, applicable also to the construction of condensers, the heating of water generally, and to the warming of buildings."—A communication from abroad, by Joseph Harrison the younger, of the city of Philadelphia, in the state of Pennsylvania, in the United States of America, Engineer.

1972. To GEORGE COLLIER, of No. 23, Elizabeth Street, Eaton Square, in the county of Middlesex, for the invention of "Improvements in chairs and couches."

1974. To JOSHUA FIELD, of Lambeth, in the county of Surrey, Engineer, for the invention of "Improvements in apparatus for superheating steam."

1976. And to HENRY HUTTON, of Palace Road, Lambeth, in the county of Surrey, for the invention of "An improved lubricator."

On their several petitions, recorded in the Office of the Commissioners on the 30th day of August, 1859.

1978. To JAMES COWGILL and JOHN STOCKS, both of Bradford, in the county of York, Mechanics, for the invention of "Improvements in caps for spinning fibrous substances, and in the means or method of manufacturing the same."

1980. To WILHELM ADOLF VON KANIG, of Hardinge Street, Islington, in the county of Middlesex, for the invention of "Improvements in the manufacture of starch and compounds of starch, and in extracting gum dextrine and grape sugar therefrom."

1984. To JAMES MACKENZIE, of Saint Martin's-le-Grand, in the county of Middlesex, and STEPHEN THOMAS WENTWORTH, of the same place, Gas Engineers, for the invention of "Improvements in breech-loading fire arms."

1986. To JAMES SAMUEL, of Great George Street, in the city of Westminster, Civil Engineer, for the invention of "Improvements in railway sleepers."

1987. To HENRY HIGGIN, of Bow, in the county of Middlesex, Engineer, for the invention of "Improvements in machinery for cutting and preparing match splints."

1988. To LOUIS BERGE, of Newgate Street, in the city of London, Manufacturer of Leather Goods, for the invention of "An improved method of

fastening or securing portemonnaies, bags, and other like articles with frames."

1990. And to EDWIN ELLIS, of St. Ann's Well Road, Nottingham, for the invention of "Improvements in finishing silk fabrics made on bobbin net, and warp frames."

On their several petitions, recorded in the Office of the Commissioners on the 31st day of August, 1859.

1992. To JAMES BRINE, of Maidstone, in the county of Kent, Stationer and Printer, for the invention of "Improvements in the mode of preparing, arranging and combining the leaves of books to be used for producing simultaneously one or more fac-simile copies of letters, accounts, or other such similar documents or writings."

1996. And to JAMES BORRINGTON, of Derby, in the county of Derby, Plumber, for the invention of "Improvements in pumps."

On both their petitions, recorded in the Office of the Commissioners on the 1st day of September, 1859.

1998. To PETER WRIGHT, of Dudley, in the county of Worcester, Manufacturer, for the invention of "An improvement or improvements in the manufacture of anvils."

2002. To JOHN KIPPEN WATSON, of Edinburgh, in the county of Mid-Lothian, Gentleman, for the invention of "Improvements in gas meters and exhausters, washers, and purifiers."

2004. To WILLIAM CLOUGH, of Wigan, in the county of Lancaster, Overlooker, for the invention of "Certain improvements in machinery or apparatus for propelling vessels on water."

2006. To WILLIAM ALLEN TURNER, of the city of Manchester, in the county of Lancaster, Starch Manufacturer, and HENRY LOUIS LILLEY, of Stand Lane, in the said county, Manager, for the invention of "Improvements in the manufacture of starch."

2008. To JEAN FRANÇOIS FÉLIX LEROUX, of 29, Boulevart St. Martin, Paris, in the empire of France, Merchant, for the invention of "A new or improved apparatus to be employed for taking money on the counters."

2009. To THOMAS HEDGCOCK, of Ivy Cottage, Great Church Lane, Hammersmith, in the county of Middlesex, Master in the Royal Navy, for the invention of "An improvement in quadrants."

2010. And to JOHN SPURGIN, of Great Cumberland Street, in the county of Middlesex, M.D., for the invention of "Improvements in ordnance and projectiles."

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of September, 1859.

2018. To GEORGE PARSONS, of Martock, in the county of Somerset, Engineer, for the invention of "Improvements in wheels."

2020. And to HENRY SWAN, of 5, Bishopsgate Street Without, for the invention of "Improvements in stereoscopes and stereoscopic pictures."

On both their petitions, recorded in the Office of the Commissioners on the 3rd day of September, 1859.

2022. To FREDERICK COLLIER BAKEWELL, of No. 6, Haverstock Terrace, Hampstead, in the county of Middlesex, for the invention of "Improvements in the manufacture of caustic alkalies."—A communication from abroad from Henry Pemberton, of East Tarentum, U. S., North America.

2026. To WILLIAM LOUIS EARLE, of Alfred Place, Bedford Square, in the county of Middlesex, Gentleman, for the invention of "Improvements in apparatus for promoting the combustion of smoke and gases arising from fuel."

2028. And to ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improvements in sewing machines."—A communication from abroad by Henry Washington Hayden, of Waterbury, in the state of Connecticut, United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 5th day of September, 1859.

2030. To GEORGE LOWRY, of Salford, in the county of Lancaster, Machinist, for the invention of "Improvements in machinery for heckling flax and other fibrous materials."

2034. To ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improved fabric, applicable to the manufacture of hose or flexible pipes."—A communication from abroad by Nehemiah Hunt, of Boston, in the United States of America.

2036. And to EDWARD BLAKE, of 61, Tachbrook Street, Pimlico, in the county of Middlesex, for the invention of "Improvements in apparatus for and in treating china-grass rhea, fibre mudar, and other similar vegetable fibres."

On their several petitions, recorded in the Office of the Commissioners on the 6th day of September, 1859.

2049. To THOMAS HOOMAN, of 490, Oxford Street, Middlesex, for the invention of "An improved stock, cravat, or neck muffler or wrapper."

2051. To JOSEPH NICHOLSON, of Chaple House, Hensingham, Whitehaven, in the county of Cumberland, Agricultural Implement Maker, for the invention of "Improvements in horse rakes."

2053. To JOSEPH THORLEY, of Newgate Street, in the city of London, for the invention of "An improved preparation of food for cattle and horses."

2055. And to THOMAS WEBSTER ALLSOPP, of Castle Donington, in the county of Leicester, Gas Lamp and Chandelier Manufacturer, Bell and Brass Founder, for the invention of "Improvements in portable gas apparatus."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of September, 1859.

2057. To WILLIAM ROSCOE, of Croxteth Hall, West Derby, in the county of Lancaster, Agent, for the invention of "An improved agricultural implement or machine for distributing guano and other manures upon land."

2059. To JOHN GAY NEWTON ALLEYNE, of Butterley Iron Works, Alfreton, in the county of Derby, for the invention of "Improvements in the manufacture of wrought-iron beams."

2061. To Frederick Carpenter, of Porter Street, in the city of Westminster, Machinist, for the invention of "An improved apparatus for cutting tobacco."

2063. And to Sigismund Cornely, of Lime Street, in the city of London, for the invention of "An improvement in the permanent way of railways."—A communication from abroad by Messrs. Lezaire and Pauwels, of Valenciennes, France.

On their several petitions, recorded in the Office of the Commissioners on the 9th day of September, 1859.

2065. To Henry Oliver Robinson, of Westminster, in the county of Middlesex, Civil and Mechanical Engineer, for the invention of "Improvements in machinery or apparatus for the manufacture of sugar."

2067. And to Joseph Pollock, of Leeds, in the county of Yorkshire, Gentleman, for the invention of "Improvements in the manufacture of beds, couches, and invalid or other carriages."

On both their petitions, recorded in the Office of the Commissioners on the 10th day of September, 1859.

2071. To Thomas Gregory Gutch, of Southampton, in the county of Hants, Stationer and Printer, for the invention of "The improvement of copying books, for order books, and letter books, and so forth, as the improvement can be applied."

2075. To Floride Heindryckx, of Brussels, in the kingdom of Belgium, Engineer, for the invention of "Improvements applicable to railways or tramways."

2077. To Frederick Versmann, and Alphons Oppenheim, of Bury Court, St. Mary Axe, in the city of London, Analytical Chemist, for the invention of "Improvements in the treatment of various substances, so as to render the same non-inflammable."

2069. To Fréderic Newton Gisborne, of No. 3, Adelaide Place, in the city of London, Engineer, and Lazarus Simon Magnus, of the same place, Merchant, for the invention of "Improvements in telegraph cables."

2081. To Henry George Collins, of McLean's Buildings, New Street Square, in the city of London, for the invention of "Improvements in producing printing surfaces on stone, metal, and other materials capable of being employed in printing, in the manner of lithographic stones, also in the production of printing plates and surface printing blocks, and in transfer inks."

On their several petitions, recorded in the Office of the Commissioners on the 12th day of September, 1859.

2085. To George Montefiore Levi, of Val Benoit, Liege, in Belgium, Civil Engineer, for the invention of "Improvements in washing and separating ores and substances of different specific gravities, and in apparatus for that purpose."

2087. To John Grainger, of Birmingham, in the county of Warwick, Gun Maker, for the invention of "Improvements in breech-loading fire-arms, and in moulds for making projectiles."

2089. And to William Edward Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improved apparatus for drying paper and other fabrics."—A communication from abroad by Edward L. Perkins, of Roxbury, in the county of Norfolk and state of Massachusetts, United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 13th day of September, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

22nd September, 1859.

719. John Davis, of No. 18, Frith Street, Soho, in the county of Middlesex, Professor of Music, for an invention of "Improvements in musical instruments."—Dated 22nd March, 1859.

724. John Talbot Pitman, of the American and European Patent Offices, No. 67, Gracechurch Street, London, for an invention of "Improvements in springs for rail road cars, and for other purposes."—A communication from abroad by John J. Fields, of Brooklyn, in the state of New York, one of the United States of America.—Dated 22nd March, 1859.

725. Edward Maynard, of the city of Washington, in the district of Columbia and United States of America, for an invention of "Improving breech-loading fire-arms."—Dated 22nd March, 1859.

726. Samuel Newington, of Ridgway, Ticehurst, in the county of Sussex, M.D., for an invention of "Improvements in apparatus for distributing seeds and manure."—Dated 22nd March, 1859.

728. William Pickford Wilkins, of Ipswich, in the county of Suffolk, Engineer, for an invention of "Improvements in the arrangements of valves and in their application to steam engines."—Dated 22nd March, 1859.

731. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in fire-arms and ordnance, and in projectiles and apparatuses to be employed therewith."—A communication from Charles Rochaz, residing at Paris.—Dated 22nd March, 1859.

732. Jacobus Tyssen, of Rotterdam, in the kingdom of Holland, Mariner, for an invention of "An improved apparatus for indicating the speed of ships and other vessels."—Dated 22nd March, 1859.

733. Charles A. Watkins, of the firm of Hamilton and Co., Brush Manufacturers, of Greek Street, Soho Square, for an invention of "Improvements in the manufacture of brushes."—Dated 22nd March, 1859.

735. Samuel Oram, of No. 137, Fleet Street, in the city of London, for an invention of "Improvements in pipes or tubes for generating and superheating steam."—Dated 23rd March, 1859.

738. William Middleship, of Grove Terrace, South Grove, Mile End, in the county of Middlesex, Officer of Her Majesty's Customs, for an invention of "Improvements in propelling vessels."—Dated 23rd March, 1859.

740. Benjamin Browne, of No. 52, King William Street, London Bridge, in the city of London, and county of Middlesex, Civil Engineer, and Patent Agent, for an invention of "A new method of working or operating switches and signals on railways by improved apparatus for that purpose."—A communication from abroad by Victor Armand Prou, of Rue de Sèvres, Paris, in the empire of France.—Dated 23rd March, 1859.

742. George Neal, Gas Chandelier and Fitting Manufacturer, of Great Charles Street, Birmingham, in the county of Warwick, for an invention of "Certain improvements in apparatus or fittings connected with the burning of gas for regulating and economizing its consumption."— Dated 23rd March, 1859.

746. Frederic Tillett, of Banner Street, in the parish of St. Luke's, in the county of Middlesex, Splint Cutter, for an invention of "Improvements in machinery for cutting splints for matches."—Dated 23rd March, 1859.

747. William Garforth and James Garforth, both of Dukinfield, in the county of Chester, Engineers, for an invention of "A certain improvement in metallic pistons."—Dated 24th March, 1859.

748. William Edward Wiley, of 34, Great Hampton Street, Birmingham, in the county of Warwick, Gold Pen and Pencil Case Manufacturer, for an invention of "Improvements in the manufacture of boxes or cases used for holding needles, pens, matches, pencils, and for other like purposes."—Dated 24th March, 1859.

750. Frederick Edward Sharp, of 3, Gloucester Terrace, Blackheath, in the county of Kent, for an invention of "Improvements in machinery for corking bottles."—Dated 24th March, 1859.

752. Charles Sanderson, of Sheffield, in the county of York, Merchant, for an invention of "Improvements in preparing, tempering, and covering or coating thin strips or sheets of steel."—Dated 24th March, 1859.

756. Richard Baker, of Liverpool, in the county of Lancaster, Watchmaker, for an invention of "Improvements in chronometers, watches, and other timekeepers."—Dated 25th March, 1859.

762. William Redgrave, of Tavistock Street, in the county of Middlesex, Tailor, for an invention of "An improved pillow travelling cap."—Dated 26th March, 1859.

763. Elizabeth Steane, of Manor Rise, Brixton, in the county of Surry, Widow, for an invention of "An improved means or apparatus for preventing candles dropping or guttering."—Dated 26th March, 1859.

765. Mark Firth, of the firm of Thomas Firth and Sons, of Sheffield, in the county of York, Steel Manufacturers and Merchants, for an invention of "Improvements in machinery for grinding saws and flat plates of steel."—A communication from E. T. Jones, residing in Montreal.—Dated 26th March, 1859.

766. George Naylor, of No. 7, Durnford Street' East Stonehouse, in the county of Devon, a Lieutenant in the Royal Marines Light Infantry, for an invention of "An apparatus for measuring and indicating the distance passed over or travelled by the same."—Dated 26th March, 1859.

767. John Campbell Evans and Peter Soames, of the Morden Iron Works, East Greenwich, in the county of Kent, Engineers, for an invention of "Improvements in apparatus for superheating steam."—Dated 26th March, 1859.

771. Joseph Buckley, of Horwich, in the county of Lancaster, Calico Printer, Orlando Greenhalgh, of the same place, Manager, and Robert Hutchinson, of the same place, Mechanic, for an invention of "Improvements in machinery or apparatus for printing woven fabrics."—Dated 26th March, 1859.

773. To Charles Frédéric Vasserot, of 45, Essex Street, Strand, London, Patent Agent, for an invention of "An improved diving apparatus."—A communication from Philippe Bigard, residing in Lyons, in the empire of France.—Dated 28th March, 1859.

774. James Buckingham, of Westmoreland House, Walworth Common, in the county of Surrey, Civil Engineer, for an invention of "Improvements in machinery or apparatus employed in drawing fibrous substances."—Dated 28th March, 1859.

779. Charles Lewis Roberts, of Clerkenwell, in the county of Middlesex, for an invention of "Improvements in cigars."—Dated 29th March, 1859.

781. John William Kelly, Civil Engineer, of the town of Ennis, in the county of Clare, Ireland, for an invention of "Improvements in gas burners."—Dated 29th March, 1859.

785. Richard Searle, of Woodford Wells, in the county of Essex, Gentleman, for an invention of "Improvements in apparatus used for transmitting signals by electricity for telegraphic purposes, and in the construction of telegraphic cables."—Dated 29th March, 1859.

786. Isaac Spight, of Glandford Briggs, in the county of Lincoln, Ironfounder and Agricultural Machine Maker, for an invention of "Improvements in horse hoes."—Dated 29th March, 1859.

787. Thomas Taylor, of Vere Street, in the county of Middlesex, Chemist, for an invention of "Improved means of giving increased strength to paper."—Dated 29th March, 1859.

788. Henry Potter Burt, of Charlotte Row, Mansion House, in the city of London, for an invention of "Improvements in apparatus for preparing and preserving timber."—Dated 29th March, 1859.

789. Henry Moss, of 62, Brill Row, Somers Town, in the county of Middlesex, Boot and Shoe Manufacturer, and Thomas West, of 5, Jewin Street, in the city of London, Machinist, for an invention of "A machine for the cutting of leather for every purpose, and cutting cloths, linen, and other fabrics and materials." — Dated 29th March, 1859.

889. James Hadden Young, of 66, Great College Street, Camden Town, London, county of Middlesex, for an invention of "Improvements in setting up (composing) and distributing types."—Dated 9th April, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 21st September*, 1859, *inclusive.*)

19th September.

2235. James Cottrill, of Studley, in the county of Warwick, Needle Maker, for an invention of "Improvements in machinery to supersede hand labour in the operation of filing." — Dated 24th September, 1856.

20th September.

2315. Peter Armand le Comte de Fontainemoreau, of No. 4, South Street, Finsbury, London, and 39, Rue de l'Echiquier, Paris, Patent Agent, for an invention of "Improvements in the construction of roofs of buildings, which improvements are applicable to the construction of arches of bridges."—A communication.— Dated 3rd October, 1856.

21st September.

2239. William Beatson, of Chemical Works, Rotherham, for an invention of "Improvements in puddling iron."—Dated 24th September, 1856.

2251. John James Russell, of Wednesbury, Patent Tube Manufacturer, and Joseph Bennett Howell, of Sheffield, Steel Manufacturer, for an invention of "Improvements in the manufacture of cast steel tubes."—Dated 25th September, 1856.

Erratum in Journal of 16th September.

2072. For "Dabbine" read "Dabbène."

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft Superintendent of Specifications, etc. In one vol.' price 9*s.* 6*d.*, or each Tract separately at the pric, affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).

Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.

The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

LONDON:
Printed by GEORGE E. EYRE and WILLIAM SPOTTISWOODE, Printers to the Queen's most Excellent Majesty.
Published at the Great Seal Patent Office, 25, Southampton Buildings Holborn.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

No. 598. TUESDAY, SEPTEMBER 27, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1207. JOHN MAY MUNRO, of the city and county of Bristol, Agricultural Machine and Implement Manufacturer, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent, for the invention of "Improvements in the manufacture and arrangement of chain harrows."

As set forth in his petition, recorded in the said office on the 14th day of May, 1859.

1224. And ALEXANDRE RÉNÉ LANDRE, POLYDORE GRAS, and ANTOINE LOUIS AUGUSTE BOUCHERIE, all of the city of Marseilles, in the empire of France, Merchants, trading under the firm of Landre, Gras, and Co., have given the like notice in respect of the invention of "Distilling schist or boghead coal and other minerals for lighting."

As set forth in their petition, recorded in the said office on the 17th day of May, 1859.

1231. And EDWARD CHARLESWORTH, of No. 1, De Grey Street, York, and No. 3, King William Street, Strand, in the county of Middlesex, has given the like notice in respect of the invention of "Counteracting the recoil of small fire arms, and lessening the risk of injury arising from bursting of the same."

1238. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in heating."—A communication from abroad by Stanislas Lebobe, of Paris.

As set forth in their respective petitions, both recorded in the said office on the 18th day of May, 1859.

1241. And GEORGE WALKER, of Old Nickols Street, Church Street, Shoreditch, in the county of Middlesex, has given the like notice in respect of the invention of "Certain improvements in swing looking-glasses."

1247. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the roasting or calcining of ores, applicable also to the oxidising of other substances."—A communication from abroad by Professor Jean François Persoz, of Paris, in the empire of France.

As set forth in their respective petitions, both recorded in the said office on the 20th day of May, 1859.

1264. And GEORGE BURNELL, of East Hoathly, in the county of Sussex, Gentleman, has given the like notice in respect of the invention of "An improved preparation or medicine for the cure of ague."

1269. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Editor of the Mechanics' Magazine and Patent Agent, has given the like notice in respect of the invention of "Improvements in axles and in fitting wheels thereto."—A communication from abroad by M. Masson, residing at Paris.

As set forth in their respective petitions, all recorded in the said office on the 23rd day of May, 1859.

1277. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Atmospheric apparatus for the submarine transport of blocks of stone, and for raising sunken vessels."—A communication from abroad by T. Bandier, of Paris, in the empire of France.

1279. And GILBERT DANIEL JONES, of Clerkenwell, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in mills or machinery for grinding, reducing, and pulverizing."

1284. And ANTOINE JOSEPH SAX, trading under the firm of Adolphe Sax, of Paris, France, Musical Instrument Maker, has given the like notice in respect of the invention of "Improvements in wind musical instruments."

As set forth in their respective petitions, all recorded in the said office on the 24th day of May, 1859.

1294. And JOHN MALLETT, of Barnstaple, in the county of Devon, Watch Manufacturer, Silversmith, and Jeweller, has given the like notice in respect of the invention of "An improved regulator for watches, portable clocks, and time pieces."

1296. And JAMES HOWARD, of Bedford, Agricultural Implement Maker, has given the like notice in respect of the invention of "An improved construction of horse-rake."

As set forth in their respective petitions, both recorded in the said office on the 25th day of May, 1859.

1300. And HUGH WILLIAM PATRICK, of No. 4, Mill Hill Terrace, Acton, in the county of Middlesex, has given the like notice in respect of the invention of "A new substance or material to be used in lieu of ivory and other like substances."

As set forth in his petition, recorded in the said office on the 26th day of May, 1859.

1324. And MARCUS DAVIS, of 5, Lyon's Inn, Strand, in the city of Westminster, Caoutchouc Wheel Manufacturer, has given the like notice in respect of the invention of "Improvements in the construction of wheels, axles, and boxes for carriages."

As set forth in his petition, recorded in the said office on the 30th day of May, 1859.

1341. And SAMUEL CARR and GEORGE BUTTERWORTH, of the firm of Carr and Butterworth, of Leeds, in the county of York, Manufacturers, have given the like notice in respect of the invention of "Improvements in the manufacture of felted cloth, and in the machinery or apparatus employed in such manufacture."

As set forth in their petition, recorded in the said office on the 31st day of May, 1859.

1356. And SAMUEL BURY, of Manchester, in the county of Lancaster, Manager, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus for embossing and finishing textile fabrics or other like surfaces."

1357. And SAMUEL BURY, of Manchester, in the county of Lancaster, Manager, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus for embossing and finishing textile fabrics or other like surfaces."

1358. And WILLIAM HENRY PARKES, of Birmingham, in the county of Warwick, Manufacturer, and WILLIAM BAGNALL, of Birmingham aforesaid, Plater, have given the like notice in respect of the invention of "A new or improved ventilator for hats and other head coverings, and also for carriages."

1360. And JEAN BAPTISTE PASCAL, of Paris, in the empire of France, Civil Engineer, has given the like notice in respect of the invention of "Improvements in hot-air engines."

As set forth in their respective petitions, all recorded in the said office on the 2nd day of June, 1859.

1361. And JOHN WILSON, of St. Helen's, in the county of Lancaster, Manufacturing Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture of carbonate of soda."

As set forth in his petition, recorded in the said office on the 3rd day of June, 1859.

1390. And ROBERT BARCLAY, of Bucklersbury, in the city of London, has given the like notice in respect of the invention of "Improvements in the manufacture of paper from which writing or other inks cannot be expunged or extracted without detection."

As set forth in his petition, recorded in the said office on the 7th day of June, 1859.

1406. And THOMAS GREENSHIELDS, of No. 11, Little Titchfield Street, London, has given the like notice in respect of the invention of "Improvements in purifying gas and obtaining ammoniacal and other salts."

As set forth in his petition, recorded in the said office on the 10th day of June, 1859.

1442. And JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "A new siphon meter for liquids."—A communication from abroad by A. Grenet, of No. 10, Rue Mogador, Paris, in the empire of France.

1449. And THOMAS EDWARD TALLENT, of the Southwark Bridge Road, Southwark, county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of leather, and in machinery for that purpose."

As set forth in their respective petitions, both recorded in the said office on the 16th day of June, 1859.

1461. And DAVID DEAS, of Carneil, in the county of Fife, North Britain, Farmer, has given the like notice in respect of the invention of "Improvements in reaping machines."

As set forth in his petition, recorded in the said office on the 17th day of June, 1859.

1467. And JOZÉ LUIS, of the British and Foreign Office for Patents, of No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "A new system of windmill." — A communication from abroad by Bernard Zacharie Lethiers, No. 10, Rue Mogador, Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 18th day of June, 1859.

1511. And Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., has given the like notice in respect of the invention of "Improvements in the manufacture of artificial sand-stone, bricks, tiles, and similar articles."—A communication from abroad by Léon and Edouard Pavin de Lafarge, Merchants, residing at Viviers, département de l'Ardêche, in the empire of France.
As set forth in his petition, recorded in the said office on the 23rd day of June, 1859.

1519. And William Clark, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in sewing machines."—A communication from abroad by Mr. James Snow Goodridge, of No. 29, Boulevart St. Martin, Paris, Merchant.
As set forth in his petition, recorded in the said office on the 24th day of June, 1859.

1549. And William John Thompson Williamson, of 37, Gerrard Street, Soho, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in gas burners."
As set forth in his petition, recorded in the said office on the 29th day of June, 1859.

1594. And William Knapton, of Albion Foundry, Monkbar, in the county of York, and Adam Aitchison, of Knottingley, in the county of York, have given the like notice in respect of the invention of "Improvements in the manufacture of gas."
As set forth in their petition, recorded in the said office on the 5th day of July, 1859.

1602. And Jozé Luis, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "An improved mode of manufacture of wheel tires for railway carriages and engines, by means of the herein described apparatus."—A communication from abroad by Duplay Vidal Lachaise and Co., No. 10, Rue Mogador, Paris, in the empire of France.
As set forth in his petition, recorded in the said office on the 6th day of July, 1859.

1669. And John Bailey, of Manchester, in the county of Lancaster, Manager, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for stretching woven fabrics."
As set forth in his petition, recorded in the said office on the 14th day of July, 1859.

1748. And Alfred Sidebottom, of Crown Street, Camberwell, in the county of Surrey, Consulting Chemist, has given the like notice in respect of the invention of "Improvements in the mode or process of separating animal fibre from mixed fabrics of animal fibre and cotton, or other vegetable fibre."
As set forth in his petition, recorded in the said office on the 28th day of July, 1859.

1807. And Nathaniel Berry, of Paris, in the empire of France, Merchant, has given the like notice in respect of the invention of "An improvement in the manufacture of knitted fabrics."—A communication from William Benjamin, residing in New York.
As set forth in his petition, recorded in the said office on the 5th day of August, 1859.

1870. And William Green, of Kidderminster, William Fawcett, of Wolverley, and Francis Best Fawcett, of Wolverley, all in the county of Worcester, Carpet Manufacturers, have given the like notice in respect of the invention of "Improvements in the manufacture of rugs."
As set forth in their petition, recorded in the said office on the 13th day of August, 1859.

1958. And Emil Rettig, of New Cross, in the county of Kent, Merchant, has given the like notice in respect of the invention of "Improvements in the form and construction of anchors."—Partly a communication from abroad by Ferdinand Martin, of Marseilles, in the French empire, Merchant.
As set forth in his petition, recorded in the said office on the 27th day of August, 1859.

1972. And George Collier, of No. 23, Elizabeth Street, Eaton Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in chairs and couches."

1974. And Joshua Field, of Lambeth, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in apparatus for superheating steam."
As set forth in their respective petitions, both recorded in the said office on the 30th day of August, 1859.

1987. And Henry Higgin, of Bow, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in machinery for cutting and preparing match splints."

1990. And Edwin Ellis, of St. Ann's Well Road, Nottingham, has given the like notice in respect of the invention of "Improvements in finishing silk fabrics made on bobbin net and warp frames."
As set forth in their respective petitions, both recorded in the said office on the 31st day of August, 1859.

2065. And Henry Oliver Robinson, of Westminster, in the county of Middlesex, Civil and Mechanical Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for the manufacture of sugar."
As set forth in his petition, recorded in the said office on the 10th day of September, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patent on which the Stamp Duty of £50 has been Paid.

(*To 24th September*, 1859.)

2265. DAVID LAW, of Glasgow, in the county of Lanark, North Britain, and JOHN INGLIS, of the same place, Ironfounders, for an invention of "Improvements in moulding or shaping metals."—Dated 27th September, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 24th September*, 1859, *inclusive.*)

23rd September.

264. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in apparatus for manufacturing gas and coke."—A communication.—Dated 6th October, 1852.

24th September.

11. THOMAS WOOD GRAY, of Warkworth Terrace, Commercial Road, Limehouse, in the county of Middlesex, for an invention of "Improvements in cocks and valves."—Dated 1st October, 1852.

12. THOMAS WOOD GRAY, of Warkworth Terrace, Commercial Road, Limehouse, in the county of Middlesex, for an invention of "Improvements in steam-engines."—Dated 1st October, 1852.

70. ROBERT LAKIN, of Ardwick, in the county of Lancaster, Machinist, and WILLIAM HENRY RHODES, of Gorton, in the said county of Lancaster, Mechanic, for an invention of "Improvements in machines for spinning and doubling cotton and other fibrous substances."—Dated 1st October, 1852.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 6th September, 1859, and each bearing that date.

No. 25,310. HENRY W. ADAMS, of Brooklyn, N. Y., for an "Improvement in lamps."

"I claim constructing the upper end of the wick tube B, with elevated ends *a*, *a*, so as to enclose the ends of the wick C, and prevent said ends from burning too high when the central part is sufficiently elevated above the central part *b* of the wick tube to be allowed to burn, substantially as and for the purpose herein set forth."

No. 25,311. WM. ADAMSON, of Philadelphia, Pa., for an "Improved apparatus for making decoctions."—Ante-dated 6th April, 1859.

"I claim the conical roller arranged within the caldron A, when the same is used for the purpose of thoroughly intermixing the ingredients to be extracted during the process of boiling, as herein set forth."

No. 25,312. THOS. D. AYLESWORTH, of Ilion, N. Y., for an "Improvement in the cutting apparatus of harvesters."

"I claim a cutting apparatus for harvesting machines, composed substantially of the cutters *c* and guards *b*, when constructed and operating together without any motion, except that of being advanced or drawn over a field, substantially as described."

No. 25,313. H. H. BAKER, of New Market, N. J., for an "Improved tonguing and grooving machine."

"I claim the employment of flanged feed rollers, having a lateral play and acted upon by suitable springs in combination with the fixed intermediate rings or flanges P, P^1, or their equivalents, when arranged and operating, essentially in the manner and for the purpose herein specified."

No. 25,314. E. O. BAXTER, of Foreston, Ill., for an "Improvement in railroad excavators."

"I claim the arrangement and combination of adjustable timbers or arms B, C, plow and excavator, as above described, when the same are employed in the manner herein above shown, for the purpose of loosening and removing the earth, and keeping the ditch free from the wash of the slopes on railroads."

No. 25,315. JEHU BRAINERD and WM. H. BURRIDGE, of Cleveland, O., for an "Improvement in tanning."

"We claim the use of the herein-described compound for tanning, consisting of a solution of the herein-named mineral salts in mixture with a solution of tanning, either with or without the addition of aloes."

No. 25,316. LEOPOLD RICHARD BREISACH, of New York, N. Y., for an "Improvement in making gas from wood."

"I claim the process of manufacturing illuminating gas from wood by distilling the same in two retorts of varying temperatures, as set forth, one of which retorts is charged with charcoal, varying in amount according to the conditions indicated, the whole process being conducted, as herein set forth."

No. 25,317. ARCHIBALD CAMERON, of Charleston, S. C., and DAVID MATTHEW, of Philadelphia, Pa., for an "Improvement in railroad wheels."

"We claim the peculiar construction of car wheels, having elastic curved arms B with chilled cast tread A and cast hub C, forming one combined wheel, substantially as herein-set forth."

No. 25,318. CHAS. W. CLEWLEY, of Providence, R. I., for an "Improvement in machines for making watch rims, &c."

"I claim the combination of the male and female plungers, substantially as described, for the purposes set forth."

No. 25,319. R. W. DAVIS and DANIEL DAVIS, of Yellow Springs, O., for a "Machine for printing the address on newspapers, &c."

"We claim, 1st, the arrangement of wooden blocks (*r*) of suitable size for a single address, with indented letters in their faces, and attached by means of small tacks, or equivalent, to a flexible band or belt in close compact columns, and operated substantially as described. 2. The use of the triangular stationary bed piece (*l*), over which the belt slides by means of belt pulley (*p*), and regulated and adjusted by means of lever (*n*), substantially in the manner and for the purpose set forth."

No. 25,320. JEAN JUSTIN ALBERT DE BRONAC and AUGUSTIN JOSEPH MARTIAL DEHERRYPON, of Paris, France, for an "Improvement in treating metallic ores with spongy iron."

"We claim the treatment of metallic sulphurets or other ores or metallic bodies with spongy iron, for purposes sub-

stantially as herein set forth, by the combination of the several processes herein specified, in the order stated, viz., firstly, pulverizing the ore and the spongy iron separately. Secondly, mixing the two powders in definite proportions. Thirdly, compressing the mixed powders into the form of cakes or small bricks; and, fourthly, treating the thus prepared ores, in suitable furnaces, as herein described."

No. 25,321. R. Densmore, of South Haven, Mich., for an "Improved machine for sawing staves."

"I claim, 1st, surrounding the stationary drum B with a series of saws, all hung in one gate, and having the same movement, in combination with the rotating table C, for the purposes and in the manner represented and specified. 2nd, I claim, in combination with the rotary table and drum B, the sliding carriages, when the same are arranged radially around said drum, and operated automatically, to feed the bolts up against the drum B, for the purposes and in the manner herein specified. 3rd, I claim the rolling spring guides P, in combination with the drum B, for discharging the staves from the machine, after they have been sawed, as set forth."

No. 25,322. Chas. A. Desobry, of Plaquemine, La., for an "Improvement in bagasse furnaces."

"I claim the combination of the upright air chamber D, having a vertical partition wall *a*, and the system of ducts E, E, F, G, and H, and the damper or shutter I, the whole applied in connection with the fire chamber and the flue C, or its equivalent, substantially as herein described."

No. 25,323. Hugh T. Douglas, of Zanesville, O., and John Cooper, of Mount Vernon, O., for an "Improvement in portable evaporating apparatus."

"We claim the combination of the diving flue H, I, the valves E^1, F^1, and *i*, and the damper J, when these several parts are arranged in relation to the evaporating pan, and operating in the manner substantially as set forth."

No. 25,324. M. D. Dubois, of Newburgh, N.Y., for a "Roofing cement."

"I claim a composition formed of the ingredients or substances compounded in the proportions and in the manner as herein specified, for the purpose set forth."

No. 25,325. Lewis Duvall, of Big Spring, Ky., for an "Improvement in boots."

"I claim the within described method of cutting the piece of leather or other suitable material A, and uniting the same with the gore B, so that when it is folded in the lines *b*, b^1, and *f*, f^1, and if the gore is brought in the proper position, said peace A, together with the gore, assumes the required shape of the upper of a boot, substantially as specified."

No. 25,326. Wm. F. Edson, of Philadelphia, Pa., for an "Improved machine for cutting and finishing shoe heels."

"I claim the combination of the movable post F, the former H (or the upper of the shoe) the guide K, and the cutter wheel D, or an emery or burnishing wheel, with the hand lever G, bow guide O, springs N, N, and radius bar J, acting as herein-before substantially set forth, for cutting or shaping, smoothing and burnishing the heels of shoes, either before or after they are fastened to the shoe."

No. 25,327. Benjn. G. Fitzhugh and McClintock Young, jr., of Frederick, Md., for an "Improvement in automatic rakes for reaping machines."

"We claim the locating of an automatic sweep rake, at the rear left hand or outside corner of the platform, when said rake has a rising and falling motion that will admit of its passing over the outside division board or fence, and then drop into or onto the extreme outer end of the platform, and sweep it off the cut grain, substantially as described."

No. 25,328. Thos. G. Gardner, of Mount Pulaski, Ill., for a "Foam collector for steam boilers."

"I claim fitting a boiler with one or more plates, so applied as to present inclined surfaces above the surface of the water, with one or more outlets *b*, *b*, for steam and foam at the highest part of the said plate or plates, and as to provide a receptacle for foam above the said plate or plates, substantially as described, and to operate substantially as herein set forth."

No. 25,329. Edwd. Haeckel, of Cincinnati, O., assignor to Haeckel and Co., of same place, for an "Improved apparatus for mashing."

"I claim the described combination and arrangement of the central shaft C, and satellite shafts N, the whole being armed with beaters Q, and rotated simultaneously, substantially in the manner and for the purpose set forth."

No. 25,330. E. H. Hancock, of Augusta, Geo., for an "Improvement in flood gates."

"I claim the combination of the flood or dam gate C, tilting trough D, and the draining structure A, B, or its equivalent, substantially as and for the purpose herein set forth."

No. 25,331. Jason W. Hardie, of New York, N.Y., for an "Improvement in sewing machines."

I claim, first, the 'method of making a 'knot stitch' herein described, namely, by taking the needle thread at the back of the needle (or at the side opposite to the position of the bobbin), and first doubling it upon itself around, and then looping it over the bobbin thread, substantially as specified. Second, I claim the employment of two hooks *h*, *h*, acting in opposite directions, when they take the thread at the back of the needle (or at the side opposite to the position of the bobbin) for the purpose of forming either the knot stitch or the ordinary shuttle stitch, by simply reversing the motion of the driving shaft, as herein set forth. Third, I claim making the feed eccentric *i*, self-adjusting by means of the loose sleeve *n*, slot *v*, and pin or stop i^4, so that the feeding shall take place during the descent of the needle, whichever way the driving shaft may be turned as herein described."

No. 25,332. Hiram H. Herrick, of East Boston, Mass., for an "Improved carpet sweeper."

"I claim, 1st, providing the end of the box with a groove as from *x* to *x*, when the same is used in connection with the flaring brush on the end of the shaft F, substantially as and for the purpose herein specified. 2nd, dividing the box in two parts, and providing each with a partition dividing the bottom of the box in two parts, through which the brushes protrude, and providing these parts of said bottom with flanges which hold the dirt, the several parts being connected and arranged together, substantially in the manner herein set forth."

No. 25,333. Kelsey Hazen, of Brooklyn, N. Y., for an "Improved amalgamator."

"I claim, compelling the water having the particles of gold in suspension, to flow within a certain small distance of the heated mercury, under conditions, substantially as herein set forth. I also claim, in connection with the above, the employment of a series of vibrating agitations and scrapers P, acting in the space under E, and of an adjustable gate G, for regulating the facility of egress of the least perfectly suspended particles, when combined and arranged, substantially as and for the purposes herein set forth."

No. 25,334. Iris Hobson, of Stout's Grove, Ill., for an "Improvement in mole ploughs."

"I claim the combination of a ditching plow beam, having a horizontal joint forward of the mole and colter, with a rod, arranged over the top of said joint, and with a horizontal adjusting and stop plate, substantially as set forth."

No. 25,335. Lewis G. Hoffman, of Waterford, N. Y., for an "Improved door bolt."

"I claim the combination of a common door bolt, with a barrel containing a wheel, with an arm acting on a slot in the bolt, so that when operated by a key the door may be fastened or unfastened on the outside, the whole being so constructed and arranged, as not to interfere with the ordinary mode of using the bolt on the inside.

No. 25,336. Lorenzo Holtslander, of Oberlin, O., for an "Improvement in marine propellers."

"I claim the device herein described, for changing valve seats, as applied to water propellers, to reverse the motion of vessels or boats. And also, the combination of the small forward pipes (*p*, *p*, *p*, *p*,) with the reservoir (R, *v*,) substantially as described."

No. 25,337. Geo. Hutchison, of Alleghany, Pa., for an "Apparatus for printing the address on newspapers, &c."

"I claim, first, the inclined hopper (*j*), with the slides or guides (*m* and *n*), in combination with the ways (*k*,) and

conveyors (*g*), on the belt (*f*), as herein described and for the purpose set forth. Second, the use of a metallic belt, furnished with the conveyors (*g* and *h*), as herein described and for the purpose set forth. Third, the arrangement of the pulleys (*d* and *e*), the belt (*f*), press roller *p*, and inking roller (4), as herein described and represented. Fourth, the use of the lug (*y*) on the end of the type frame when used in connection with the notch (*o*) in the conveyor (*h*), as herein described, and for the purpose set forth."

No. 25,338. Demase Lamoureux, of New York, N.Y., for an "Improvement in parlor grates."

"I claim, 1st, so constructing the grate that the fuel box and the ash pit are distinct from and independent of the bars, and capable of being removed whilst the bars remain undisturbed, thereby enabling me to effect the removal of the ashes and cinders, with much less trouble than by the ordinary mode, and thereby keep the apartment free from the dust and dirt, which are inseparable from the common method of removal as herein-before more fully described. 2nd, the combination of the crank L, the rod I, and the movable bottom E of the fuel box, constructed and arranged as herein-before described, by which an easy and convenient means of giving a reciprocating horizontal circular motion of the grate bottom is secured, without the necessity of cutting an opening in front for the passage of an arm, by which to vibrate the grate, substantially as described, and for the purpose set forth. 3rd, the arrangement in a parlor grate of the bottom grate upon which the fuel is supported in the manner described, by which it is made capable of being vibrated through the back of the fuel box upon a fixed axis placed entirely back of the space devoted to fuel, the wings of said bottom grate being so extended as to cover or compensate for the necessary vibration which is made into open space back of the fire box as set forth."

No. 25,339. Pierson Leffel and J. H. Mulholland, of Springfield, O., for an "Improved method of centering in watchmakers' lathes."

"We claim, 1st, a vibrating mandrel arranged within a socket or hollow spindle in such manner that its inserted end may fit closely within said socket, and its outer end allowed to vibrate, substantially as described for the purposes set forth. 2nd, in combination with the vibrating mandrel (D), we claim the rocking collar (*f*), spring (*e*), key (*k*), and nut (*j*), all constructed and arranged to operate substantially as described for the purposes set forth."

No. 25,340. Hosea Lindsey, of Ashville, N.C., for an "Improved submerged pump."

"I claim the arrangement of the short reciprocating piston rod E, open pistons F, F, sliding ring valves G, G, cylinder B, B^1, having a conducting pipe D, with the chains H, and brake I, in the manner and for the purpose herein set forth."

No. 25,341. Geo. M. Lonacre, of New Orleans, La., for an "Improvement in steam pans for clarifying sugar."

"I claim in combination with the pans, the relief valve V, and the cheek valve *t*, when arranged and operated as or substantially as and for the purpose herein set forth."

No. 25,342. Justus R. Loomis, of Winsted, Conn., for an "Improvement in lamps."

"I claim the arrangement of the cylindrical corrugated skirting J, perforated tubes G. adjustable radiating wires I, I^1, in the manner as and for the purpose described."

No. 25,343. Edward M. Manigle, of Philadelphia, Pa., for an "Improvement in stoves."

"I claim the arrangement of the series of distinct or uncommunicative hollow open air chambers (*f*, *f*), or their equivalents, in combination with the cross piece of the top plate (B), of a cooking stove substantially in the manner and for the purpose set forth and described, and this I claim whether the said cross piece (A), be either movable or stationary in the said top plate."

No. 25,344. Alvin C. Mason, of Springfield, Vt., for an "Improved machine for wiring the joints of clothes pins."

"I claim, first, the intermittingly rotating pliers E, E, in connection with a clamping device formed of the jaws *l*, recess a^*, and lever R, or their equivalents, and shears L, L, arranged to operate substantially as and for the purpose set forth. Second, in combination with the pliers E, and shears L, and clamping device, the sliding forks g^1, arranged for joint operation, as set forth. Third, the particular manner of opening and closing the pliers E, E, and operating the arbors D, to wit, by means of the sliding cones F, in connection with the springs *f*, and permanent bosses *g*, on the arbors D, whereby the jaws of the pliers are opened and closed, and the arbors D, shifted by a very simple mechanism."

No. 25,345. Thos. J. Mead, of Port Byron, N.Y., for an "Improvement in brakes for railroad cars."

"I claim the combined use of the 'U' shaped yoke, the brake bars, and the short brake blocks, for the purpose of adapting the brake to a simple lever, that acts directly upon it, as herein stated."

No. 25,346. Wm. Mosher and Isaac H. Mosher, of Green, N.Y., for an "Improved machine for bending wagon tire."

"We claim the clutch or clasp, to hold the end of the bar, in combination with the former being made three fourths of the circle, and the arrangement of the lever for operating as specified, and for the purposes as set forth."

No. 25,347. Jacob Parker, of St. Louis, Mo., for an "Improvement in trunks."

"I claim, firstly, forming the lid of the trunk in the shape of a semi-cylinder, as specified, for the purposes set forth. 2nd, the impervious box *g*, or sponge carrier, arranged in the tray, as described. 3rd, the peculiar formation of the division boards *n*, *n*, in such manner, that they will come down onto the rim of a gentleman's hat, placed in the middle box, as herein-before specified."

No. 25,348. Henry Pennie, of Buffalo, N.Y., for an "Improvement in bits for cutting washers."

"First, I claim the arrangement of the cutters D and D, upon the ends of the sliding bars C and C, and at right angles thereto, the said sliding bars passing through a mortise in the shank A, and lying parallel with each other, and one above the other, so that the cutters will work upon the same side of the centre point B, substantially as described. 2d, I claim the recess (*g*), made in the lower end of the shank A, so as to allow the inner cutter to slide close up to the point B, and thereby adapt the instrument to cutting very small washers, as set forth."

No. 23,349. James Powell, of Cincinnati, O., for an "Improved faucet."

"I claim the elastic annular valve seat S, and sliding collar O, in the described combination, with an adjustable plug valve L, of hard material."

No. 25,350. Isaac C. Shuler, of Amsterdam, N.Y., for an "Improvement in construction of sheet metal coffins."

"First, I claim the construction of a sheet metal coffin in two sections, stiffened with frames or straps, and in dividing the coffin into two sections, I do not confine myself to any particular locality on the sides for making the joint, but claim forming the joint on the side of the walls at any convenient point between the flange (*o*), and the rim (*b*), and concealing the same with an adjustable moulding. 2d, I claim the frames (*c*, *d*, *e*, *f*, *g*, *h*, and *i*), for stiffening the coffin, substantially as described, and also the scrolled rim or joint *b*."

No. 25,351. David G. Stafford, of Syracuse, N.Y., for an "Improvement in stoves."

"I claim the combination of a self-regulating valve, applied to the smoke pipe of coal stoves, and operating substantially as set forth, with an air flue, surrounding the fire box, constructed as described, the whole arranged substantially as stated."

No. 25,352. Joseph Tiberi, of St. Louis, Mo., for an "Improvement in grates."

"I claim arranging the adjustable furnace back B, in the furnace place, and in constructing and operating the same, substantially as set forth."

No. 25,353. Wm. S. Todd, of Mechanicsville, Iowa, for an "Improved joiner's clamp."

"I claim the combination of the adjustable lever F, with the frame A, and sliding block C, when the same are arranged and operated in the manner and for the purposes herein set forth."

No. 25,354. Louis Tregre, of the Parish of St. John the Baptist, La., for an "Improvement in construction of cane juice boxes."

"I claim the method of separating the pure from the impure parts of the juice, when the latter has settled to the bottom of the box, so that the pure parts can be drawn off without disturbing the impure, by dividing the one from the other by means of a movable partition valve, or its equivalent, arranged within the box, substantially as described."

No. 25,355. Edwd. A. Tuttle, of Brooklyn, N. Y., for an "Improved hot air register."

"I claim the arrangement and combination with the leaves C of the roller F, having its axis movable and traveling on a shelf G, with or without springs (*b*), as and for the purpose shown and described."

No. 25,356. Stephen D. Tucker, of New York, N. Y., assignor to R. M. Hoe, R. Hoe, and P. S. Hoe, of same place, for a "Mode of operating the fingers of printing presses."

"I claim operating the finger shaft C by means of a grooved disk E, attached thereto, and the rollers *j*, j^1, attached to a plate or proper support, so as to be respectively within and without the path of rotation of the finger shaft, substantially as and for the purpose set forth."

No. 25,357. Lemuel T. Wells, of Cincinnati, O., for an "Improvement in printing presses."

"In the described combination with stationary butments C on the ways, I claim the attachment to the bed of a closed cylinder D, its piston E, F, having a stroke relatively less than that of the bed, and acting to simultaneously condense and rarify the air at alternately opposite ends of the cylinder, as set forth."

No. 25,358. S. H. Wilder, of Grinnell, Iowa, for an "Improved method of opening valves to extinguish fire."

"I claim the arrangement, essentially as above described, of a reservoir or other means of producing pressure, combined with a system of tubes, cross tubes, and valve shafts, with valves or stopcocks, arranged as described, when used as a means of operating upon a cylinder and piston, or a wate r wheel for the purpose of starting and afterwards stopping the wheel or engine, without the intervention of any person than the one who discovers the fire. I also claim the use of gear wheel *i*, rack bar *h*, and blank wheel H, or their equivalents, arranged to move the gate of a water wheel out and in alternately by a repetition of the same motion."

No. 25,359. Wm. C. Allison, of Philadelphia, Pa., assignor to himself and John Murphy, of same place, for an "Apparatus for watering and sweeping railways."

"I claim, firstly, the horizontal perforated pipe T and T^1, and the swing pipes W, in combination with a truck having wheels, adapted to the rails of a passenger railway, the said truck carrying a tank L, and the said swing pipes being arranged and operated by the devices herein described, or their equivalents, substantially in the manner and for the purpose herein set forth. Secondly, the combination of the adjustable revolving brushes 19, with the truck, when the brushes are arranged in respect to the rails, substantially as and for the purpose specified. Thirdly, I claim in combination with the brushes any convenient number of projections 20, revolving simultaneously with the said brushes, and so arranged in respect to the rails, as to clean the grooves or corners of the treads from all obstructions."

No. 25,360. Wm. Barnes, of Troy, N. Y., assignor to Philo B. Stewart, of same place, for an "Improved feed water apparatus for steam boilers."

"I claim, first, in combination with a steam boiler A, and a close chamber B, placed higher than or at the same height as the boiler, and having communication therewith by a steam passage *e*, and a water passage *f*, each provided with a stopcock or valve, substantially as herein described, a close receiver C, located lower than the boiler, and having a steam passage from the boiler and a water prssage into the chamber B, substantially as herein set forth, for use in raising water from a place lower than and introducing it into the bolier while the boiler is charged with steam. And I also claim, in combination with the matter above claimed, making the receiver O in two parts, Y and X, with the steam pipe C, from the boiler A, and the cold water supply pipe *b*, both entering one part, and the hot water supply pipe *a* entering a water pipe *d* to the chamber B, leaving the other part, and with the two parts of the receiver, connected together by a passage *h* substantially as and for the purpose herein set forth."

No. 25,361. Delectus Durfey, of Fort Seneca, O., assignor to himself, L. A. Lyon, and H. P. Tyler, of Clarksfield, O., for an "Improvement in the mode of applying power to machinery."

"I claim the combination of the treadle levers *g*, arms g^2, and spring *c*, with the grooved wheel B, and spring braces *k*, operating as described, and for the purposes set forth."

No. 25,362. N. A. Dyar, of Medford, and J. F. Augustus, of Boston, Mass., assignors to Joseph C. Tucker, of Brookline, N.H., for an "Improved compound illuminating fluid."

"We claim the combination of the herein-before mentioned ingredients, for the purpose set forth, and essentially in the proportions described."

No. 25,363. Geo. Henderson, of Alleghany, Pa., assignor to himself and Geo. Hutchison, of same place, for an "Improvement in printing presses for addressing newspapers, &c."

"I claim, first, the combination and arrangement of the guide table (*g*) and pulley (*h*), the press wheel (*d*), the conveying pulley (*c*) and inking rollers (*k*), with type frame (*j*). and the open hopper, the whole being combined, arranged and constructed in the manner and for the purpose herein specified. Second, the use of the open hopper, when constructed as described and used for the purpose herein set forth. Third, the use of the pins (*o*), or their equivalent, on the type frame (*j*), for the purpose of carrying forward the papers, as herein set forth."

No. 25,364. Chas. E. Jacot, of New York, N.Y., assignor to Saltzman, Jacot, and Co., of same place, for an "Improvement in watches."

"I claim, first, constructing the bridge or plate *c*, with the curve *i*, and index 8, for the purposes, and as specified. Second, I claim constructing the bridge plate *c*, separately from, but screwed to the three quarter plate *b*, for giving access to the centre second and third wheels, without removing said three-quarter plate, as above described and shown. Third, I claim attaching the three-quarter plate *b* to the dial plate *a*, by riveting the columns 1 to the plate *b*, and inserting the screws 2, at the dial plate *a*, for the purposes and as set forth. Fourth, I claim constructing the click spring *e*, as specified, for preventing the ratchet teeth being broken, as above specified."

No. 25,365. John Martino, of Philadelphia, Pa., assignor to D. Stuart and Richd. Peterson, of same place, for an "Improvement in stoves."

"I claim the division plate L, with its damper N, the plate *k*, with its openings, and the casing J, with its wings *t*, *t*, when the several parts are arranged in respect to each other, and to the outer casing and fire-pot, as and for the purpose herein set forth."

No. 25,366. Robt. Poole, of Baltimore, Md., assignor to himself and German H. Hunt, of same place, for an "Improved forcing pump."

"I claim enlarging the areas of the inlet and exit openings, where they connect with the pump cylinders by means of the swells O. P, substantially in the manner and for the purpose set forth."

No. 25,367. Robt. Poole, of Baltimore, Md., assignor to himself and German H. Hunt, of same place, for an "Improvement in pistons of pumps."

"I claim a valve made of flexible material, hung loosely upon the piston rod, and having for its bearings the round edged wings of the nut, by which it is fastened to the piston, substantially in the manner and for the purposes herein described. I also claim, in combination with a flexible valve and winged screw nut, a piston constructed of ribs which present sharp edges to the water, while they are flat at the the end which constitutes the seat of the flexible valve, substantially in the manner and for the purpose herein described."

No. 25,368. John B. Powell, of Philadelphia, Pa., assignor to himself and G. B. Frick, of same place, for an "Improved automatic fan."

"Claim.—The spindle M. with any convenient number of cog wheels of different sizes, in combination with a similar

number of cog-wheels also of different sizes, on the crank spindle S, when the said spindle and its wheels are rendered adjustable, and are applied to and combined with the work of the automatic fan, substantially as and for the purpose herein set forth."

No. 25,369. CHAS. H. RAYMOND, of Southington, Conn., assignor to the Peck Smith Manufacturing Company, of same place, for an "Improvement in folding machines."

"I claim the arrangement of the clamp E and G, with bed piece D, and folder N, when combined with revolving gauge R, so that the width of the crimp or fold may be first gauged, and then that portion of the tin contiguous to the part intended to be folded, be first firmly clamped an held fast, and then the fold or crimp formed thereon, in th manner described, all by one simple movement of folder N and parts in connection, and without marring the tin, all in the manner fully set forth."

No. 25,370. G. W. RICHARDSON and ROBT. GLOVER, of Grayville, Ill., assignors to themselves, J. B. Williams, and W. A. Horrel, of same place, for an "Improvement in harvesting machines."

"We claim the cams *a*, cast in sections of one or more, and secured to the driving wheel by means of the bolt or screw *c*, and flange *b*, in the manner described for the purpose specified."

No. 25,371. IVES SCOVILLE, of Chicago, Ill., as signor to himself and W. H. Scoville, of same place for an "Improvement in machine for breaking stones for turnpike roads, &c."

"I claim the arrangement in the manner set forth, of the funnel-shaped hopper C, constructed substantially as described, with the two vertical cylinders A, A, constructed substantially as described, for the purpose of breaking stone for ballasting railroads, and macadamizing streets, turnpikes, &c."

No. 25,372. DANIEL H. SOLLIDAY, of Philadelphia, Pa., assignor to Edwd. H. Ashcroft, of Boston, Mass., for an "Improvement in gas burners."

"What I claim, is, the application of the conical or chambered burner A, to the main burner B, in manner and for the purpose substantially as herein-before set forth."

No. 25,373. SILAS B. TERRY, of Terryville, Conn., assignor to Silas B. Terry, jr., of same place, for a "Machine for making paper boxes."

"I claim, 1st, the pressure roller L, in connection with the rotating clamp formed of the head D, and disk *f*, arranged substantially as and for the purpose set forth. 2nd, in combination with the pressure roller L, head D, and disk *f*, the ring or band E, provided with the pins or strips *i*, the socket F, provided with the screws or pins *j*, and the guide plate G, arranged for joint operation, as and for the purpose described. 3rd, the arrangement of the pressure lever H, and sliding mandrels B, C, for the purpose specified. 4th, the employment or use of the folding device formed of the plate N, provided with the ledge *u*, and the pivoted bar *v*, when said folding device is used in connection with the pressure roller L, rotating head D, and disk *f*, for the purpose set forth."

No. 25,374. JOSEPH WESLEY, of Providence, R.I., assignor to Joseph B. Wesley, of same place, for an "Improvement in skeleton skirts."

"I claim a new article of manufacture, to wit, a skirt, having its hoops supported by tapes or straps, which are rendered adhesive by the application of caoutchouc or gutta percha, in the manner and for the purpose substantially as herein described."

RE-ISSUES.

WILLIAM S. LAVELY and JAMES M. COOPER, of Pittsburgh, Pa., assignees of Josiah Ells, of Pittsburgh, aforesaid, for an "Improvement in revolving fire-arm."—Patented 1st August, 1854.—Re-issued 6th September, 1859.

"I claim, 1st, the use of a stud in the trigger vibrating laterally, in combination with a beveled edged hammer, for the purpose of raising the hammer to full cock, and firing the piece by simply pulling the trigger, which after the discharge of the piece will regain its position for repeated action, or (as a mere modification of arrangement), the use of a stud in the hammer vibrating laterally, in combination with a bevel-edged trigger, for the purpose above specified. 2nd, the use of a bevel-edged hammer, with or without a notch in its toe and trigger, with vibrating stud, and cam for the trigger spring, constructed and arranged substantially as herein-before described for the purpose of causing the hammer, trigger, and revolving breach to assume their proper relative positions at full cock by simply pulling the trigger and retaining them in that position, and securing the breech from rotation or displacement preparatory to firing. 3rd. The notch or depression in the toe of the hammer at the point of contact of the stud and edge of the hammer, in combination with the laterally vibrating stud, for the purpose of preventing the slipping of the stud, and the more easy retention of the hammer at the point of full cock. 4th, the mode herein-before described of locking the rotating breech at the moment of firing by means of the locking bolt, operated by the trigger, in combination with the hexagonal neck of the rotating breech, which, nevertheless, permits the breech to be freely rotated by hand or otherwise when the trigger is not drawn back. 5th, the use of a double trigger spring or spring and lever, for the purpose herein-before set forth."

HENRY JENKINS, of Cincinnati, Ohio, for an "Improved ornamental connection of the parts of an iron fence.—Patented 30th January, 1852.—Re-issued 6th September, 1859.

"I claim forming the ornament or cast-iron connections for a railing, fence, or other article of iron, cast into a divided iron mould, substantially as and for the purpose specified."

JACOB H. MUMMA, of Harrisburgh, Pa., for an "Improvement in straw cutters."—Patented 26th January, 1858.—Re-issued 6th September, 1859.

"I claim, first, the combined application to straw-cutting machines of a changable feed gear with two edged revolving cutters or blades, when so made as that, by changing them end for end on their arms or supports they shall bring a different cutting edge into action, or when run in either direction shall always feed in the material in one and the same direction, substantially as and for the purpose stated. I also claim the combination of feed rollers acted upon by tappets, and the crushing rollers controlled by gum elastic springs, when arranged in relation to, and acting in connection with, the cutting apparatus, as herein described and represented."

JOHN W. MARSH, of Oxford, Mass., for an "Improvement in sewing machines."—Patented 27th October, 1857.—Re-issued 6th September, 1859.

"I claim, first, the combination of the slide A, provided with its guard E, and its slot or slots C, D, with the foot piece M, with its guide N, and slots arranged and operating substantially as described. Second, I claim the combination with the sewing apparatus, or its equivalent, of a movable knife operated by a connection with the sewing machine so as to trim or cut the work whilst being sewed, substantially in the manner and for the purpose as above set forth and described."

PHILO B. GILBERT, of New York, N. Y., for a "Design for the handles of spoons and forks."

"I claim the ornamental configuration herein represented as applied to the handles of spoons and forks, as set forth."

ELEMER J. NEY, of Lowell, Mass., assignor to the Lowell Manufacturing Company, for a "Design for carpet pattern."

"I claim the design or pattern for carpets, herein set forth."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

List of Specifications, &c. published during the week ending 23rd September, 1859.

No.	Price.	Subject-Matter.
		1848 (*Disclaimer*).
12,143	4*d.*	Railway and other carriages, axle-boxes and journals of wheels, lubricating journals, or other portions of machinery.
		1859.
422	1*s.*	Sewing machines.
432	6*d.*	Brushes.
434	10*d.*	Telegraphic cable, &c.
435	1*s.* 4*d.*	Machinery for heating and welding the edges of plates for the manufacture of cylinders, &c.
436	3*d.*	Black lead pencils and pencil cases.
437	11*d.*	Application of tidal power to manufacturing, agricultural, and other purposes.
438	3*d.*	Silvering glass.
439	2*s.* 5*d.*	Machinery for the manufacture of taps or stopcocks, &c.
440	7*d.*	Apparatus for tanning, dyeing, and obtaining extracts.
441	8*d.*	Gas jet signals.
442	3*d.*	Screw wrenches.
443	3*d.*	Manufacture of cement.
444	3*d.*	Obtaining printing plates from collodion pictures.
445	5*d.*	Metallic paving, flooring, bridges, gratings, girders, &c.
447	4*d.*	Treating ores of lead, &c.
448	3*s.* 6*d.*	Apparatus for working railway breaks.
449	6*d.*	Apparatus for propelling and steering vessels.
450	3*d.*	Venetian and other blinds.
451	3*d.*	Treating cane sugar.
452	3*d.*	Box sextants.
453	3*d.*	Engraving.
454	3*d.*	Gearing for gins or horse mills.
455	3*d.*	Emptying cesspools.
456	7*d.*	Pressure gauges.
457	3*d.*	Manufacture of textile fabrics, &c.
458	9*d.*	Printing telegraph.
459	7*d.*	Apparatus for obtaining fresh water from salt water.
460	3*d.*	Railway signals.
461	8*d.*	Manufacture of steel deck beams, &c.
462	11*d.*	Manufacture of bricks, tiles, &c.
463	10*d.*	Uniting lace to blond for bonnet and cap fronts, &c.
464	3*d.*	Apparatus for manufacturing the strands of wire ropes.
465	3*d.*	Carding engine.
466	3*d.*	Machinery for doubling threads.
467	10*d.*	Apparatus for promoting the combustion of fuel.
468	6*d.*	Spindles and flyers.
469	9*d.*	Machinery for the manufacture of glass.
470	3*d.*	Machinery for spinning, doubling, and throwing silk, &c.
471	7*d.*	Ordnance.
472	3*d.*	Reversing gear for locomotive and other steam engines.
473	3*d*	Meters for fluids and gases.
474	6*d.*	Manufacture of alum, &c.
475	6*d.*	Lubricating axles and bearings.
476	3*d.*	Compounds for cleaning glass.
477	3*s.* 1*d.*	Axle boxes.
478	6*d.*	Locks or clasps for portemonnaies, &c.
479	3*d.*	Floating wheels for driving machinery.
480	5*d.*	Propellers.
481	1*s.* 2*d.*	Treatment and preparation of jute, &c.
482	3*d.*	Manufacture of military sash net, &c.
483	5*d.*	Constructing and fastening cast-iron rails.
484	3*d.*	Book slide.
485	3*d.*	Manufacture of fabrics for umbrellas and parasols.
486	3*d.*	Dyeing.
487	3*d.*	Carding engines.
488	4*d.*	Utilization of alkali waste.
489	9*d.*	Machinery for driving looms for weaving.
490	9*d.*	Joints or couplings for pipes, &c.
491	7*d.*	Gas regulators.
492	3*d.*	Apparatus for the evaporation of saccharine liquids, &c.
493	10*d.*	Carriages, &c.
494	3*d.*	Spinning and twisting machines.
495	3*d.*	Twist lace machines.
496	3*d.*	Manufacture of handles for pots, jugs, &c.
497	1*s.* 4*d.*	Railways.
498	5*d.*	Apparatus for condensing steam.
500	4*d.*	Metallic compound or alloy.
501	4*d.*	Manufacture of cast steel.
502	3*d.*	Machinery for propelling vessels.
504	7*d.*	Watches.
506	3*d.*	Concentrating caustic alkalies, obtaining motive power, &c.
511	4*d.*	Coating iron with copper or alloys of copper.
516	3*d.*	Chromeidoscope.
517	5*d.*	Spinning, twisting, doubling, and drawing machines.
518	3*d.*	Treatment of alcoholic products.
522	5*d.*	Reaping and mowing machines.
526	11*d.*	Machinery for making bolts, rivets, &c.
745	9*d.*	Steam boiler and other furnaces.
910	6*d.*	Blocks for lowering ships' boats, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 24th September, 1859.

Mornings - - - -	1520
Evenings - - - -	1645
Total - - -	3165

Since the opening of the Museum Free Daily (May 12, 1858,)—144,945.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 599. FRIDAY, SEPTEMBER 30, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1478. To LORING DANIEL DEWEY, of the United States of America, now of 4, Southampton Buildings, Chancery Lane, in the county of Middlesex, England, for the invention of "Improvements in spring seats for chairs, sofas, couches, carriages, and other similar articles."—A communication from Charles Robinson, residing at Massachusetts, in the United States of America.

On his petition, recorded in the Office of the Commissioners on the 20th day of June, 1859.

1589. To HENRY CHARLES HOWELLS, of 120, Duane Street, New York, in the state of New York, and JOSEPH CHARLES HOWELLS, of Madison, in the state of Wisconsin, both in the United States of America, for the invention of "Improvements in the mode of registering the number of persons entering or leaving public conveyances or places of public resort, and of determining the value of the entry or fare."

On their petition, recorded in the Office of the Commissioners on the 4th day of July, 1859.

1957. To JAMES PHILP, of Camden Town, in the county of Middlesex, Gentleman, for the invention of "Improvements in the manufacture of soap."—A communication from abroad by Professor Packer, residing at Newark, United States.

On his petition, recorded in the Office of the Commissioners on the 27th day of August, 1859.

1959. To JOSEPH WHITWORTH, of the city of Manchester, in the county of Lancaster, Engineer, for the invention of "Improvements in ordnance, fire-arms, and ammunition."

1964. And to JOHN EDWARDS, of 77, Aldermanbury, in the city of London, for the invention of "Improvements in the manufacture of buttons."

On both their petitions, recorded in the Office of the Commissioners on the 29th day of August, 1859.

1989. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in treating auriferous and argentiferous ores and substances."—A communication from abroad by Dr. Raoul Destrem, residing at Paris.

On his petition, recorded in the Office of the Commissioners on the 31st day of August, 1859.

2014. To WILLIAM SUFFIELD, of Birmingham, in the county of Warwick, Dentist, for the invention of "Improvements in the manufacture of artificial teeth, and in machinery to be employed in the said manufacture."

2016. And to GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for the invention of "Improvements in printing, and in apparatus connected therewith."—A communication from abroad by M. Aloïs Auer, Aulic Councillor and Director of the state Printing Office, Vienna.

On both their petitions, recorded in the Office of the Commissioners on the 3rd day of September, 1859.

2038. To EDWARD ROBERT DANN and EDWARD GOLDSCHMIDT, both of Nottingham, for the invention of "Improvements in the manufacture of bonnet fronts or lappets."

2040. To HENRY JONES, of Birmingham, in the county of Warwick, Gun Manufacturer, for the invention of "Improvements in breech loading fire arms."

2042. To JOHN LOUIS JULLION and GORDON PIRIE, both of Stoneywood Works, Aberdeen, North

Britain, Paper Makers, for the invention of "The manufacture of gelatine, and apparatus to be employed therein."

2044. To ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improved manufacture of metallic strips, or bands applicable to ladies' skirts."—A communication from abroad by William Sparks Thomson, of New York, in the United States of America.

2048. And to WILLIAM ROTHWELL, of Carr House, Midgley, in the parish of Halifax and county of York, Mechanic, and THOMAS WATSON, of the same place, Overlooker, for the invention of "Improvements in screw gill-boxes."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of September, 1859.

2050. To THOMAS OSWALD SMALL, of the borough and county of Newcastle-upon-Tyne, Artist, for the invention of "Improvements in the stereoscope, by means of tinted media, and by the application of the pulley and lever, or spring, in changing the lights."

2052. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in cocks and valves."—A communication from abroad by Jean Baptiste Prudence Gire, of Paris, in the empire of France.

2054. To JAMES TANDY, of Cavendish Grove, Wandsworth Road, in the county of Surrey, for the invention of "Improvements in locomotive and other steam boilers."

2056. And to GEORGE GOWLAND, of Liverpool, in the county of Lancashire, Chronometer and Nautical Instrument Maker, for the invention of "Improvements in nautical and surveying instruments for measureing angles."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of September, 1859.

2060. To SAMUEL WORSSAM, of Chelsea, in the county of Middlesex, Engineer, for the invention of "Improvements in sawing machinery."

2062. To WILLIAM EDWARD GEDGE, of the firm of John Gedge and Son, of No. 4, Wellington Street, South, Strand, London, Patent Agents, for the invention of "Improvements in the manufacture of nails."—A communication from abroad by Bernard-Roelandt and Company, of Fontaine l'Evèque, Belgium, Nail Manufacturers."

2064. And to ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in the process of, and machinery for, manufacturing hat bodies."—A communication from abroad by Andrew Campbell, of New York, in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 9th day of September, 1859.

2066. To ANDREW SMITH, of Mauchline, in the county of Ayr, North Britain, Manufacturer of Scotch Fancy Wood Work, for the invention of "Improvements in strengthening umbrella and walking stick handles, and other articles or details wherein the cross or transverse grain of the wood or other material is subject to strains."

2068. To WILLIAM ROSS, of Glasgow, in the county of Lanark, North Britain, Brassfounder, for the invention of "Improved apparatus connected with the discharge of liquids."

2069. To EDWARD JONES MALLETT, of the city of New York, but now Commercial Agent of the United States, at Florence, in Italy, for the invention of "Improvements in axles."

2070. And to THOMAS JOSEPH PERRY, of Bilston, in the county of Stafford, Engineer and Ironfounder, for the invention of "An improved construction of hot air oven."

On their several petitions, recorded in the Office of the Commissioners on the 10th day of September, 1859.

2076. To JOHN EASON, of Oxford Street, in the county of Middlesex, for the invention of "Improvements in the manufacture of buff or losh and other oiled leathers."

2078. To WILLIAM HENRY MORRISON, of Nottingham, Manufacturer, for the invention of "Improvements in the manufacture of bonnet and cap fronts, and in the means or apparatus employed therein."

2080. To JOSIAH MASON, of Birmingham, for the invention of "An improvement in boxes or cases and cards to contain or hold pens."

2082. And to WILLIAM ELLIOTT, of Birmingham, in the county of Warwick, for the invention of "Improvements in the manufacture of African or Guinea rods."

On their several petitions, recorded in the Office of the Commissioners on the 12th day of September, 1859.

2091. To CHARLES GODFREY GUMPEL, of No. 2, Gordon Cottages, Holland Road Brixton, in the county of Surry, for the invention of "Improvements in the application of motive power to the propelling of vessels."

2093. To JOHN PITT KENNEDY, of Torrington Square, in the county of Middlesex, Lieutenant Colonel and Engineer, for the invention of "Improvements in steam boilers."

2095. To CHARLES BESLAY, of Rue St. Sebastian, Paris, in the empire of France, Gentleman, for the invention of "Improvements in preparing and obtaining printing surfaces with designs sunk as also in relief."

2097. And to JOHN STANTON SLOCUM, of Providence, Rhode Island, United States of America, for the invention of "Improvements in projectiles, suitable for ordnance."—A communication from abroad by Charles Tillinghast James, of Providence, Rhode Island aforesaid.

On their several petitions, recorded in the Office of the Commissioners on the 14th day of September, 1859.

2099. To JOHN ROBINSON, of Sutton, near Hull, Agricultural Implement Maker, for the invention of "An improved agricultural implement."

2101. To JULIEN BRIÈRE, of Brussels, in the kingdom of Belgium, Mechanic, for the invention of "Improvements in railway breaks."

2103. And to HENRY WINTER, of Albion Place, Hackney, in the county of Middlesex, for the invention of "A machine or apparatus for lifting and weighing loaded sacks, and also merchandize."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of September, 1859.

2105. To JOHN WILSON HADWEN, of Kebroyd Mills, in the parish of Halifax, and West Riding of the county of York, Cotton Spinner, for the invention of "An improvement or improvements in apparatus or machinery used for drawing fibrous substances or materials in any of the processes or machines for preparing to be spun, or for spinning the same."

2107. To NATHANIEL HECKFORD, of Forest Gate, in the county of Essex, Gentleman, for the invention of "A method of purifying the Thames and other rivers, and of treating night soil."

2109. To WILLIAM EDWARD NEWTON, of the Office for Patents, No. 56, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in machinery for forming hat bodies."—A communication from abroad by H. A. Burr, of New York.

2111. And to HENRY JACKSON, of Oak Works, Oak Lane, Limehouse, for the invention of "Improvents in fire bars."

On their several petitions, recorded in the Office of the Commissioners on the 16th day of September, 1859.

2113. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "A new brick and tile making machine."—A communication from abroad by Alexis Maigné, of Paris, in the empire of France.

2115. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "Further improvements in brakes for railway carriages."—A communication from abroad by Laurent Rigolier, of Rhône, in the empire of France.

2117. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "A slip bridle for stopping runaway horses."—A communication from abroad by Cesar Bourdenet-Bouchot, of Paris, in the empire of France.

2119. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "An improved disc and lantern signal with double repeaters."—A communication from abroad by Jules Rousseau, of Paris, in the empire of France.

2121. To SAMUEL NEWMAN RODIER, of Prospect Cottage, Strand-on-the-Green, Chiswick, in the county of Middlesex, for the invention of "Improvements in the regulation of gas to burners, which he calls 'Rodier's regulating gas valve.'"

2123. And to ABRAHAM JOHN NORMAN, of Gore Lodge, Turnham Green, in the parish of Chiswick, county of Middlesex, for the invention of "Paving roads and surfaces."

On their several petitions, recorded in the Office of the Commissioners on the 17th day of September, 1859.

2125. To FREDERIC NEWTON GISBORNE, of No. 3, Adelaide Place, London Bridge, in the city of London, Engineer, for the invention of "Paying out submarine telegraphic cables."

2127. To WILLIAM ROBERTSON and JOHN TWEEDDALE, both of Johnstone, in the county of Renfrew, North Britain, Engineers, for the invention of "Improvements in hydrostatic jacks, or lifting apparatus."—A communication from abroad by John Robertson, of Brooklyn, New York, United States.

2129. To JAMES WRIGHT, of 42, Bridge Street, Blackfriars, city of London, Civil Engineer, for the invention of "Improvements in the construction of carriages, coaches, omnibuses, and other such like conveyances."—A communication from abroad by Rene Sauvage, De Saint Marc, of Lyons, in the empire of France.

2131. To PETER FAIRBAIRN, of Leeds, in the county of York, Knight, for the invention of "Improved machinery for finishing the teeth of spur and other gearing."

2133. To RICHARD ARCHIBALD BROOMAN, of 166 Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in elevators or lifts, for hotels, warehouses, and other structures."—A communication from abroad by Otis Tufts, of Boston, United States.

2135. And to LOUIS ENGLER and ERNEST FRÉDÉRIC KRAUSS, Manufacturers, of 29, Boulevart St. Martin, Paris, in the empire of France, for the invention of "A new or improved system of insulators for electric wires."

On their several petitions, recorded in the Office of the Commissioners on the 19th day of September, 1859.

2139. To WILLIAM WEILD, of the city of Manchester, in the county of Lancaster, Machinist, for the invention of "Improvements in fluted rollers, used in machines for preparing, spinning, and doubling cotton, wool, flax, silk, and other fibrous materials, and in the manufacture of such rollers."

2141. To JOHN BEADS, of Pendleton, near Manchester, in the county of Lancaster, Manager, for the invention of "Improvements in machinery or apparatus for spinning cotton, wool, or other fibrous substances, part of which improvements is applicable to other purposes."

2143. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in projectiles."—A communication from abroad by A. B. Stoughton, of Washington, in the United States of America.

2145. And to EDWARD COLLIER, of Myddleton Street, Clerkenwell, in the county of Middlesex, Surgical Instrument Maker, for the invention of "Improvements in ear dilators."

On their several petitions, recorded in the Office of the Commissioners on the 20th day of September, 1859.

2147. To HENRY CORLESS, of West Derby, in the county of Lancaster, Gentleman, for the inven-

tion of "Improvements in apparatus for washing, wringing, and mangling."

2151. And to WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improved mode of and apparatus for condensing the waste steam of marine engines." —A communication from abroad by Messrs. Mazeline and Co., of Paris, in the empire of France.

On both their petitions, recorded in the Office of the Commissioners on the 21st day of September, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given that the petition of

2154. EDWIN BRUCE DIMOCK and JULIUS HALSEY BAKER, of Ware House Point, in the county of Hartford, and state of Connecticut, United States of America, praying for Letters Patent for the invention of "A new and useful improvement in mechanism or apparatus for drying woolen or other cloths,"—a communication by one Charles F. Bennett, of the town, county, and state aforesaid—was deposited and recorded in the Office of the Commissioners on the 21st day of September, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

29th September, 1859.

797. JOHN CARTWRIGHT, of Shrewsbury, in the county of Salop, Agricultural Implement Manufacturer, for an invention of "An improved implement for crushing clods and pulverizing the surface soil, also convertible into a press-wheel roller."—Dated 30th March, 1859.

798. COWPER PHIPPS COLES, of Southsea, in the county of Hants, Captain R.N., for an invention of "An apparatus for defending guns and gunners in ships of war, gun boats, and land batteries."—Dated 30th March, 1859.

801. WILLIAM SMITH, of King Street, Smithfield, in the city of London, and EDMUND SMITH, of Hamburgh, Gas Meter Manufacturers, for an invention of "Improvements in means or apparatus for the purpose of regulating the flow or passage of fluids."—Dated 30th March, 1859.

807. ALEXANDER MORTON, of Morton Place, Kilmarnock, for an invention of "Improvements in sextants or quadrants for nautical purposes, and which are also adapted to the measuring of altitudes or angular distances."—Dated 31st March, 1859.

813. DANIEL KINNEAR CLARK, of 11, Adam Street, Adelphi, in the county of Middlesex, Civil Engineer, for an invention of "Feed water heating apparatus."—Dated 1st April, 1859.

814. FREDERIC PHILIPPE AUGUSTE AUBURTIN, of Paris, in the empire of France, at present residing at No. 32, Gerard Street, Islington, in the county of Middlesex, for an invention of "An improved preparation of food for herbivorous animals."—Dated 1st April, 1859.

822. YVES-MARIE THOMAS, of 2, Rue Sainte-Appoline, Paris (empire of France), and of 45, Essex Street, Strand, London, for an invention of "An improved propeller for ships, vessels, boats, and water-wheels."—Dated 1st April, 1859.

824. ABRAHAM RIPLEY, of 21, Bridge Street, Blackfriars, London, county of Middlesex, Engineer, and JOHN ROBERTS, of Nelson Square, Bermondsey, county of Surrey, Engineer, for an invention of "Improvements in machinery for striking or scraping leather, and tanned or untanned hides."—Dated 2nd April, 1859.

832. MICHAEL COUPLAND, of Haggerstone, in the county of Middlesex, Engineer, for an invention of "Improvements in furnaces." — Dated 2nd April, 1859.

834. THOMAS WILLIAMS, of Aberdaron, in the county of Caernarvon, Engineer, and JOHN HOBSON FULLER, of 70, Hatton Garden, in the county of Middlesex, Tool Manufacturer, for an invention of "Improvements in screw stocks and dies."—Dated 2nd April, 1859.

836. JOSEPH ECCLES, of Blackburn, in the county of Lancaster, Cotton Manufacturer, for an invention of "Improvements in machinery for making bricks, tiles, and other articles formed of plastic materials."—Dated 4th April, 1859.

840. JAMES HENRY BURTON, of Enfield Lock, in the county of Middlesex, for an invention of "Improvement in the manufacture of barrels for small fire-arms."—Dated 4th April, 1859.

843. CHAMPION RUSSELL, of Stubbers, near Romford, in the county of Essex, Esquire, for an invention of "An improvement in the working of marine engines."—Dated 4th April, 1859.

844. MATTHEW AUGUSTUS CROOKER, of New York, United States of America, Engineer, for an invention of "Improvements in paddle wheels for steamers."—Dated 4th April, 1859.

846. EDMUND MOREWOOD, of Enfield, in the county of Middlesex, for an invention of "Improvements in coating metals."—Dated 4th April, 1859.

848. ANDREW SHANKS, Engineer, No. 6, Robert Street, Adelphi, Westminster, for an invention of "Certain improvements in machinery for forging and stamping metals."—Dated 5th April, 1859.

850. EDWARD FAIRBURN, of Kirklees Mills, Mirfield, in the county of York, Card Manufacturer, for an invention of "Improvements in machinery for carding wool and other fibrous substances."—Dated 5th April, 1859.

852. FREDERICK COLLIER BAKEWELL, of No. 6, Haverstock Terrace, Hampstead, in the county of Middlesex, for an invention of "Improvements in open fire places."—A communication from abroad by Calvin Dodge, of Pittsburgh, North America. —Dated 5th April, 1859.

853. GEORGE FREDERIC CHANTRELL, of Liverpool, in the county of Lancaster, Furnace Engineer,

and Edward Dutch, of the same place, Commercial Traveller, for an invention of "Improvements in the apparatus for regulating the quantity of water to be used for the flushing of water closets and other purposes."—Dated 5th April, 1859.

855. John Hetherington, of Manchester, in the county of Lancaster, Machinist, and Thomas Webb and James Craig, of Tutbury, in the county of Derby, Cotton Spinners, for an invention of "Improvements in machinery or apparatus for spinning and doubling cotton and other fibrous materials."—Dated 5th April, 1859.

861. Jean Auguste Hilarion Ballande, of Paris, in the empire of France, Gentleman, for an invention of "An improvement in the preparation of writing paper, and ink to be used thereon."—Dated 6th April, 1859.

862. William Owen, of Rotherham, in the county of York, Engineer, for an invention of "Improvements in the manufacture of railway wheels and tyres, and in the apparatus employed therein."—Partly a communication from Robert Owen, residing at San ge Ronimo, Central America.—Dated 6th April, 1859.

864. John Scoffern, of 4, Barnard's Inn, Bachelor of Medicine, for an invention of "Improvements in lubricating projectiles and cartridges."—Dated 6th April, 1859.

865. David Moseley, of the Chapel Field Works, Ardwick, in the city of Manchester, Manufacturer of India Rubber and Gutta Percha, for an invention of "Improvements in the manufacture of cards for carding cotton and other fibrous materials."—Dated 7th April, 1859.

871. John Garrett, of Arundel Place, Haymarket, in the county of Middlesex, Tinman, for an invention of "Improvements in the construction of goblets, jugs, and other like articles."—Dated 7th April, 1859.

873. John Talbot Pitman, of the American and European Patent Offices, No. 67, Gracechurch Street, London, for an invention of "Improvement in the construction and use of fire works for signals."—A communication from abroad by Martha J. Coston, of the city of Washington, D.C., in the United States of America.—Dated 8th April, 1859.

878. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "An improved articulated joint for water, gas, and steam pipes."—A communication from Victor Doré, a person resident in Paris, France.—Dated 8th April, 1859.

880. Nicolas Alexis Grumel, formerly a Dyer, and at present Ink Manufacturer, in Paris, in the empire of France, for an invention of "Improvements in dyeing cotton, wool, silk, flax, and other fibrous materials or fabrics."—Dated 8th April, 1859.

883. William Henderson, of Alderley Edge, in the county of Chester, Chemist, for an invention of "Improvements in treating certain ores, and obtaining products therefrom."—Dated 8th April, 1859.

885. Elias Robison Handcock, of No. 23, Norfolk Street, Strand, in the county of Middlesex, Esquire, for an invention of "Improvements in steam and other motive-power engines."—Dated 8th April, 1859.

886. Thomas Spencer, of No. 192, Euston Road, Euston Square, London, Analytical and Consulting Chemist, for an invention of "Improvements in the economical treatment of refuse or waste matter containing sulphur."—Dated 9th April, 1859.

891. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in the manufacture or production of the ferro cyanide and cyanide of potassium."—A communication from abroad by Jean Victor Lucas, of Paris, in the French empire, Chemist.—Dated 9th April, 1859.

895. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in steam engines and boilers."—A communication from abroad by Ernest Georges Xavier Boileau, of Paris, in the empire of France.—Dated 9th April, 1859.

934. John Gillett, of Upper Brailes, in the county of Warwickshire, Agricultural Implement Maker, for an invention of "An improved mill used for grinding, crushing, and reducing bones, and other mineral and vegetable substances."—Dated 14th April, 1859.

957. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in the manufacture of alumina."—A communication from abroad by Mr. Le Chatelier, of Paris.—Dated 16th April, 1859.

960. Henry Harrison, of the firm of Joseph Harrison and Sons, of Blackburn, in the county of Lancaster, Machine Makers, for an invention of "Certain improvements in looms for weaving."—Dated 16th April, 1859.

982. William Parsons, of Pontar-Tawe, near Swansea, in the county of Glamorgan, Tin Plate Manufacturer, for an invention of "Improvements in preparing sheet iron and other metal sheets for japanners and other uses."—Dated 18th April, 1859.

987. Isaac Dutton, of Tipton, in the county of Stafford, Whitesmith, and Robert Martin, of Dudley, in the county of Worcester, Coke Merchant, and Thomas Phillips, of Dudley, aforesaid, Coke Merchant, for an invention of "New or improved machinery for preventing accidents in coal or other mines by the drawing of skips or cages over their pullies."—Dated 19th April, 1859.

991. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery for weaving seamless bags or other articles with hemispherical or regular or irregular ends or forms."—A communication from abroad by John Pender, of the United States of America.—Dated 19th April, 1859.

1046. Robert Main, of Birkenhead, in the county of Chester, Carriage Builder, for an invention of

"Improvements in wheels for carriages."—Dated 26th April, 1859.

1051. JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in machinery or apparatus for grinding and polishing knives and other articles of cutlery and tools."—A communication from abroad by James Dodge, of Waterford, Saratoga county, state of New York, United States of America.——Dated 26th April, 1859.

1090. CHARLES HANSON GREVILLE WILLIAMS, of 39, Regent Square, Gray's Inn Road, in the county of Middlesex, for an invention of "Improvements in the manufacture of colouring matters, and in applying the same for dyeing and printing fabrics and materials."—Dated 30th April, 1859.

1109. WILLIAM SELLERS, of Philadelphia, in the state of Pennsylvania, United States of America, Engineer and Machinist, for an invention of "Improved machinery for making screw bolts and nuts."—Dated 3rd May, 1859.

1134. WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improved steam gauge."—A communication from abroad by Anthoine Ernest Dupas, of New Orleans, in the United States of America.—Dated 5th May, 1859.

1135. WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Certain improvements in fish-hooks."—A communication from abroad by Theodore Frederic Weil, of New Orleans, in the United States of America.—Dated 5th May, 1859.

1295. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery applicable to the manufacture of rivets, bullets, and other like articles."—A communication from abroad by Charles Bartholomew Allen, of Philadelphia, United States of America.—Dated 25th May, 1859.

1418. HENRY JOHN NICOLL, of the firm of Messieurs H. J. and D. Nicoll, Merchant Tailors, 114 to 120, Regent Street, in the county of Middlesex, for an invention of "Improvements in trousers."—Dated 11th June, 1859.

1529. JOHN BODEN, of Portswood Road, Southampton, Engineer, and WILLIAM CLARK, of Northern Road, Southampton aforesaid, Boiler, Maker, for an invention of "Improvements in apparatus for super-heating steam."—Dated 25th June, 1859.

1538. GEORGE DAWES, of Milton Iron Works, in the parish of Hoyland, in the county of York, Ironmaster, and CHARLES JOHN CARR, of Hoyland aforesaid, Engineer, for an invention of "Certain improvements in atmospheric and vacuum hammers and stamps, part of which improvements is also applicable to steam and other engines."—Dated 28th June, 1859.

1580. THOMAS JAMES HART, of Birmingham, in the county of Warwick, Gun Barrel Manufacturer, for an invention of "Improvements in breech loading fire arms."—Dated 2nd July, 1859.

1587. JAMES HOLLINGWORTH, of the Clyde Paper Mills, Eastfield, in the county of Lanark, North Britain, Manager, for an invention of "Improvements in machinery or apparatus for the manufacture of paper."—Dated 4th July, 1859.

1627. DAVID MATHEWS, of Eshald Well Brewery, Oulton, near Leeds, in the county of York, Brewer, for an invention of "Improvements in apparatus for refrigerating and heating liquids."—Dated 8th July, 1859.

1639. CHARLES ILIFFE, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "Improvements in the manufacture of buttons."—Dated 9th July, 1859.

1658. ALLAN COOPER, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "Improvements in the manufacture of the grips of swords and sword bayonets."—Dated 13th July, 1859.

1720. SAMUEL ALEXANDER BELL and JOHN BLACK, of Bow Lane, Cheapside, in the city of London, Vesta Light and Fusee Manufacturers, for an invention of "An improved manufacture of fusee."—Dated 22nd July, 1859.

1738. JOSEPH GILLOTT, of Birmingham, in the county of Warwick, Manufacturer, and JOHN MORRISON, of Birmingham aforesaid, Machinist, for an invention of "New or improved machinery for the manufacture of the handles of penholders, which machinery, or a part or parts thereof, may also be employed for manufacturing other cylindrical articles."—Dated 26th July, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 28th September*, 1859, *inclusive.*)

26th September.

2267. FREDERICK RANSOME, of Ipswich, for an invention of "Improvements in the manufacture of artificial stone, and in rendering it and other building materials less liable to decay."—Dated 27th September, 1856.

2293. JOHN DAUGLISH, of Great Malvern, in the county of Worcester, Doctor of Medicine, for an invention of "An improved method of making bread."—Dated 1st October, 1856.

27th September.

2279. ROBERT MORRISON, of the town and county of the town of Newcastle-upon-Tyne, Engineer, for an invention of "Improvements in the construction of apparatus for lifting, lowering, hauling, and removing moveable articles, by the direct action of either water, steam, or gaseous vapour."—Dated 29th September, 1856.

2443. LEON JOSEPH POMME DE MIRIMONDE, Gentleman, of Paris, in the French empire, for an invention of "Certain improvements in reducing the friction of axles and axletrees of carriages on railways."—Dated 18th October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(To 28th September, 1859, inclusive.)

27th September.

56. JOHN FINLAY, of Glasgow, in the county of Lanark, North Britain, Ironmonger, for an invention of "Improvements in grates and fireplaces, or apparatus for the generation of heat."—Dated 1st October, 1852.

77. STEPHEN SOULBY, of Ulverston, in the county of Lancaster, Printer, for an invention of "Improvements in machinery for letterpress printing."—Dated 1st October, 1852.

96. HENRY BRIDSON, of Bolton-le-Moors, in the county of Lancaster, Bleacher, for an invention of "Improvements in machinery to facilitate the rinsing, washing, and cleansing of fabrics, which machinery is also applicable to certain operations in bleaching and dyeing."—Dated 1st October, 1852.

103. CHARLES LUNGLEY, of Poplar, in the county of Middlesex, Ship-builder, for an invention of "Improvements in ship-building."—Dated 1st October, 1852.

142. HENRY BERNOULLI BARLOW, of Manchester, in the county of Lancaster, Patent Agent and Consulting Engineer, for an invention of "Improvements in the manufacture of cylinders for carding cotton and other fibrous substances."—A communication.—Dated 1st October, 1852.

28th September.

6. MOSES POOLE, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture of guns and pistols."—A communication.—Dated 1st October, 1852.

16. MOSES POOLE, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture of telescope and other tubes."—A communication.—Dated 1st October, 1852.

19. MOSES POOLE, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in moulding articles when india rubber combined with other materials are employed."—A communication.—Dated 1st October, 1852.

24. MOSES POOLE, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in the making covers for and in binding books and portfolios, and in making frames for pictures and glasses."—A communication.—Dated 1st October, 1852.

28. MOSES POOLE, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in coating metal and other substances with a material not hitherto used for such purposes."—A communication.—Dated 1st October, 1852.

Notice of Emendation.

1402.—(1859.)—Notice is hereby given, that a petition, declaration, and provisional specification in the name of WILLIAM BUMESS, of 2, Prospect Terrace, Brixton, in the county of Surrey, applying for Letters Patent for his invention of "Improvements in steam-culture machinery, part of which is applicable to steam cartage and other purposes"—(advertized in the London Gazette on the 15th July last), the certificate of the law officer allowing provisional protection thereon, and the records relating thereto, in the Office of the Commissioners for Patents, have been severally amended by the substitution of the name of WILLIAM BURNESS for William Bumess, the same having been written William Bumess in error.

Erratum in Journal of 27th September.

1594. For "Monkbar, in the county of York," read "Monkbar, in the city of York."

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*

The following are in the press:—

Electricity and Magnetism: their Generation and Applications.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 600. TUESDAY, OCTOBER 4, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1210. JOHAN VALDA, of London, in the county of Middlesex, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in stud fastenings, and a system of ornamenting and adapting belts, cravats, ribbons, draperies, and other articles to stud fastenings."

1244. And GEORGE JOHN PARFITT, of the city of Bath, in the county of Somerset, City Surveyor, has given the like notice in respect of the invention of "Improvements in gas burners."

As set forth in their respective petitions, both recorded in the said office on the 20th day of May, 1859.

1253. And JOHN ROBINSON SCARTLIFF, of Wolverhampton, in the county of Stafford, Mechanic, has given the like notice in respect of the invention of "Improvements in the construction of lubricating and other cans, in order to regulate the discharge or flow of the liquids they contain."

As set forth in his petition, recorded in the said office on the 21st day of May, 1859.

1261. And JOHN KNOWLES, of Lower Broughton, near Manchester, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Certain improvements in power looms for weaving."

As set forth in his petition, recorded in the said office on the 23rd day of May, 1859.

1280. And JOSEPH GIBBS, of Brentford, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "A method of treating coal, shale, lignites, and peat, in order to manufacture manure."

1282. And GEORGE HADFIELD, of Carlisle, in the county of Cumberland, Varnish Manufacturer, has given the like notice in respect of the invention of "An improved arrangement of heating and evaporating apparatus."

As set forth in their respective petitions, both recorded in the said office on the 24th day of May, 1859.

1290. And EDWIN MAW, of the Doncaster Iron Works, Yorkshire, has given the like notice in respect of the invention of "Improvements in the construction of metallic bedsteads and other furniture."

As set forth in his petition, recorded in the said office on the 25th day of May, 1859.

1298. And JAMES WEBSTER, of Birmingham, in the county of Warwick, Engineer, has given the like notice in respect of the invention of "An improvement or improvements in pressure and vacuum guages."

1304. And GEORGE FREDERIC CHANTRELL, of Liverpool, in the county of Lancaster, Furnace Engineer, has given the like notice in respect of the invention of "Improvements in the construction of charcoal kilns, and in the manufacture of coolers for charcoal kilns."

1306. And JOHN DRAPER, of 5, Little Tower Street, in the city of London, has given the like notice in respect of the invention of "Improvements in applying indices to account and other books."

As set forth in their respective petitions, all recorded in the said office on the 26th day of May, 1859.

1311. And WILLIAM WEILD, of the city of Manchester, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in looms for weaving pile fabrics."

1314. And LEON FARRENCE, Gentleman, and BERNARD SUBRA, Professor of Mathematics, both of Paris, France, have given the like notice in respect

of the invention of "Improvements in gas lighting by means of direct carburators."

1315. And HILARY NICHOLAS NISSEN, of Mark Lane, in the city of London, Stationer and Printer, has given the like notice in respect of the invention of "An improvement in book indexes."

1316. And GEORGE HADFIELD, of Carlisle, in the county of Cumberland, Varnish Manufacturer, has given the like notice in respect of the invention of "Improvements in the mode of, and apparatus for, forming casks or barrels."

As set forth in their respective petitions, all recorded in the said office on the 27th day of May, 1859.

1328. And JOHN BRUCE, of Tiddington, near Stratford-on-Avon, in the county of Warwick, Agricultural Implement Maker, has given the like notice in respect of the invention of "An improvement in agricultural drills."

1331. And OLIVER MAGGS, of Bourton, in the county of Dorset, has given the like notice in respect of the invention of "Improvements in harrows."

1332. And WILLIAM GREEN, of Victoria Works, Dod Street, Limehouse, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in washing or purifying and treating sugar."

As set forth in their respective petitions, all recorded in the said office on the 30th day of May, 1859.

1344. And GEORGE HENRY SMITH, of the city of Manchester, in the county of Lancaster, has given the like notice in respect of the invention of "Improvements in sewing machines."

1345. And PHILIPPE GAMBARDELLA, of Naples, Engineer, at present temporily residing at the Office for Patents, 123, Chancery Lane, London, has given the like notice in respect of the invention of "Improvements in obtaining motive power, and in machinery or apparatus connected therewith."

1348. And FREDERICK ROBERTS, of Maiden-Newton, and ALEXANDER ROBERTS, of Froome Vanchurch, both in the county of Dorset, have given the like notice in respect of the invention of "Improvements in apparatus employed for ploughing, tilling, or cultivating land when steam power is employed."

As set forth in their respective petitions, all recorded in the said office on the 31st day of May, 1859.

1351. And FRANCIS WALTER SALTONSTALL, of Northumberland Street, Strand, in the county of Middlesex, and ALFRED BUSH, of Hanover Cottage, Park Road, Saint John's Wood, in the county of Middlesex aforesaid, have given the like notice in respect of the invention of "An improved machine or apparatus for dredging and excavating."

As set forth in their petition, recorded in the said office on the 2nd day of June, 1859.

1363. And ROBERT WILLIAM SIEVIER, of Upper Holloway, in the county of Middlesex, but now residing in Hull, in the county of Yorkshire, in the kingdom of Great Britain, has given the like notice in respect of the invention of "Improvements in smelting and purifying of iron and other ores."

1365. And ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, has given the like notice in respect of the invention of "An improvement or improvements in the manufacture of iron and steel."

As set forth in their respective petitions, both recorded in the said office on the 3rd day of June, 1859.

1379. And CHRISTOPHER JAMES, of Mountain Ash, Aberdare, in the county of Glamorgan, Agent, has given the like notice in respect of the invention of "An improvement in the manufacture of railway chairs."

As set forth in his petition, recorded in the said office on the 4th day of June, 1859.

1395. And CHARLES DE BERGUE, of No. 9, Dowgate Hill, in the city of London, Engineer, has given the like notice in respect of the invention of "Improvements in machinery for punching and sheering metal."—Partly a communication from abroad by Michael de Bergue, of Barcelona, in the kingdom of Spain.

As set forth in his petition, recorded in the said office on the 8th day of June, 1859.

1402. And WILLIAM BURNESS, of 2, Prospect Terrace, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in steam-culture-machinery, part of which is applicable to steam-cartage and other purposes."

As set forth in his petition, recorded in the snip office on the 9th day of June, 1859.

1436. And EDME JULES MAUMENÉ, Professor of Chymistry, and VICTOR ROGELET, Merchant, both residing in Reims, a town of France, have given the like notice in respect of the invention of "Using 'suint,' or the portion soluble in water of the greasy substance found on the skin and hair of sheep for the purpose of manufacturing potash and other products."

As set forth in his petition, recorded in the said office on the 15th day of June, 1859.

1509. And CROMWELL FLEETWOOD VARLEY, of No. 4, Fortess Terrace, Kentish Town, and CORNELIUS JOHN VARLEY, No. 7, York Place, Kentish Town, St. Pancras, Middlesex, have given the like notice in respect of the invention of "Improvements in proving electric conductors, and in the apparatus connected therewith."

As set forth in their petition, recorded in the said office on the 23rd day of June, 1859.

1522. And PROSPER FAURE and JULES PERNOD, of Avignon, in the empire of France, have given the like notice in respect of the invention of "An improved process for utilizing the residues of madder, in the manufacture of garancine and other preparations of madder."

As set forth in their petition, recorded in the said office on the 24th day of June, 1859.

1737. And JOHN HINKS and GEORGE WELLS, of Birmingham, in the county of Warwick, Manufacturers and Copartners, have given the like notice

in respect of the invention of "An improvement in, or a substitute for, the hook of the ordinary hook and eye dress fastening."

As set forth in their petition, recorded in the said office on the 26th day of July, 1859.

1757. And Thomas Culpin, of No. 25, Royal Hill, Greenwich, in the county of Kent, Engineer, has given the like notice in respect of the invention of "Improvements in water-closets, water-cisterns, urinals, baths, lavatories, and other sanitary apparatus, and in the mode of supplying water thereto."

As set forth in his petition, recorded in the said office on the 29th day of July, 1859.

1799. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in mills for grinding coffee, corn, and other substances."—A communication from Joseph Poole Pirsson, residing in New York.

As set forth in his petition, recorded in the said office on the 4th day of August, 1859.

1820. And Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., has given the like notice in respect of the invention of "Improvements in machinery or apparatus for manufacturing chenille."—A communication from abroad by Jean Baptiste Mallion, Merchant, residing at Saint Chamond (département de la Loire), in the empire of France.

As set forth in his petition, recorded in the said office on the 6th day of August, 1859.

1886. And William Leatham, of Leeds, in the county of York, Engineer, has given the like notice in respect of the invention of "An improved double-acting superlative screw throttle valve."

As set forth in his petition, recorded in the said office on the 16th day of August, 1859.

1916. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in apparatus for preparing and spinning fibrous materials."—A communication from abroad by Felix Edmond Lemaire, residing at Paris.

As set forth in his petition, recorded in the said office on the 22nd day of August, 1859.

1985. And Augustus Smith, of Brentwood, in the county of Essex, Manufacturer, has given the like notice in respect of the invention of "Improvements in machinery for the preparation of cocoa nut fibre."

As set forth in his petition, recorded in the said office on the 31st day of August, 1859.

1998. And Peter Wright, of Dudley, in the county of Worcester, Manufacturer, has given the like notice in respect of the invention of "An "Improvement or improvements in the manufacture of anvils."

As set forth in his petition, recorded in the said office on the 2nd day of September, 1859.

2059. And John Gay Newton Alleyne, of Butterley Iron Works, Alfreton, in the county of Derby, has given the like notice in respect of the invention of "Improvements in the manufacture of wrought iron beams."

2064. And Alfred Vincent Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improvements in the process of and machinery for manufacturing hat bodies."—A communication from abroad by Andrew Campbell, of New York, in the United States of America.

As set forth in their respective petitions, both recorded in the said office on the 9th day of September, 1859.

2071. And Thomas Gregory Gutch, of Southampton, in the county of Hants, Stationer and Printer, has given the like notice in respect of the invention of "The improvement of copying books, for order books, and letter books, and so forth as the improvement can be applied."

2080. And Josiah Mason, of Birmingham, has given the like notice in respect of the invention of "An improvement in boxes or cases and cards to contain or hold pens."

2081. And Henry George Collins, of McLean's Buildings, New Street Square, in the city of London, has given the like notice in respect of the invention of "Improvements in producing printing surfaces on stone, metal, and other materials capable of being employed in printing, in the manner of lithographic stones, also in the production of printing plates and surface printing blocks, and in transfer inks."

As set forth in their respective petitions, recorded in the said office on the 12th day of September, 1859.

2089. And William Edward Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improved apparatus for drying paper and other fabrics."—A communication from abroad by Edward L. Perkins, of Roxbury, in the county of Norfolk, and state of Massachusetts, United States of America.

As set forth in his petition, recorded in the said office on the 13th day of September, 1859.

2109. And William Edward Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in machinery for forming hat bodies."—A communication from abroad by H. A. Burr, of New York.

2111. And Henry Jackson, of Oak Works, Oak Lane, Limehouse, has given the like notice in respect of the invention of "Improvements in fire bars."

As set forth in their respective petitions, both recorded in the said office on the 16th day of September, 1859.

2131. And Peter Fairbairn, of Leeds, in the county of York, Knight, has given the like notice in respect of the invention of "Improved machinery for finishing the teeth of spur and other gearing."

As set forth in his petition, recorded in the said office on the 19th day of September, 1859.

2154. And Edwin Bruce Dimock and Julius Halsey Baker, of Ware House Point, in the county of Hartford, and state of Connecticut, United States of America, have given the like notice in respect of the invention of "A new and useful improvement in mechanism or apparatus for drying woolen or other cloths."—A communication by one Charles F. Bennett, of the town, county, and state aforesaid.

As set forth in their petition, recorded in the said office on the 21st day of September, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patent Sealed.

List of Letters Patent which passed the Great Seal on the

1st October, 1859.

863. Joseph Rogers, of 9, Queen Square, Bartholomew Close, in the city of London, Rope Maker, and Edward Johnson Tweed, of 22, Castle Street, Falcon Square, also in the city of London, for an invention of "Improvements in coating conducting wires used for electric telegraphic purposes."—Dated 6th April, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 1st October*, 1859, *inclusive.*)

29th September.

2334. Herbert Mackworth, of Clifton, in the county of Gloucester, for an invention of "Improvements in the separation and treatment of mineral substances, and in coking, and in apparatus connected therewith."—Dated 6th October, 1856.

30th September.

2413. George Hazeldine, of Lant Street, Southwark, in the county of Surrey, Coachmaker, for an invention of "Improvements in carriages requiring 'poles' between the horses or draught animals."—Dated 15th October, 1856.

1st October.

2305. Edwin Hardon, of Stockport, in the county of Chester, Manufacturer, and Joseph Henry, of the same place, Mechanic, for an invention of "Improvements in looms for weaving, and in machinery for communicating motion to looms and other machines."—Dated 2nd October, 1856.

2319. George Fergusson Wilson, and Alexander Isaac Austen, both of Belmont, Vauxhall, for an invention of "Improvements in the manufacture of soap."—Dated 3rd October, 1856.

2320. David Ogilvy Boyd, of 78, Welbeck Street, in the county of Middlesex, for an invention of "Improvements in constructing and arranging smoke and air flues"—Dated 3rd October, 1856.

2335. Andrew Dunlop, of Glasgow, in the county of Lanark, North Britain, Grain Merchant, for an invention of "Improvements in dressing or sifting flour or meal."—Dated 6th October, 1856.

2348. George Fergusson Wilson, of Belmont, Vauxhall, for an invention of "An improvement in the manufacture of resin oil."—Dated 7th October, 1856.

2349. William Marriott and David Sugden, of Huddersfield, in the county of York, Agricultural and Manufacturing Chemists, for an invention of "An improvement in purifying coal gas."—Dated 7th October, 1856.

2378. Frederick Albert Gatty, of Accrington, in the county of Lancaster, Manufacturing Chemist, for an invention of "Certain improvements in dyeing."—Dated 10th October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 1st October*, 1859, *inclusive.*)

29th September.

30. Moses Poole, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture of trunks, cartouch and other boxes, knapsacks, pistol-holsters, dressing, writing, and other cases, and sword and other sheaths."—A communication.—Dated 1st October, 1852.

33. Moses Poole, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture of pails, tubs, baths, buckets, measures, drinking and other vessels, basins, pitchers, and jugs, by the application of a material not hitherto used in such manufactures."—A communication.—Dated 1st October, 1852.

37. Moses Poole, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in covering and sheathing surfaces with a material not hitherto used for such purposes."—A communication.—Dated 1st October, 1852.

43. Moses Poole, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in harness, and in horse and carriage furniture."—A communication.—Dated 1st October, 1852.

123. Richard Whytock, of Green Park, Zibberton, in the county of Mid-Lothian, for an invention of "Improvements in the manufacture of fringes, and of pleat for these and other ornamental work."—Dated 1st October, 1852.

30th September.

9. George Green, of the Mile End Road, in the county of Middlesex, for an invention of "Improvements in the manufacture of casks."—Dated 1st October, 1852.

57. John Joseph Macdonnell, of the Temple Mead, in the city of Bristol, Civil Engineer, for an invention of "Certain improvements in the construction of railways."—Dated 1st October, 1852.

156. Joseph Brown, of Leadenhall Street, in the city of London, Upholsterer and Cabinet Maker, for an invention of "Improvements in beds, sofas, chairs, and other articles of furniture, to render them more suitable for travelling and other purposes."—Dated 2nd October, 1852.

160. Joseph Burch, of Crag Hall, near Macclesfield, in the county of Chester, Carpet Manufacturer, for an invention of "Certain improvements in building and propelling ships and vessels."—Dated 2nd October, 1852.

163. Moses Poole, of Serle Street, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture of tables, sofas, bedsteads, stands, chairs, and other articles of furniture, and the frames and bodies of musical instruments."—A communication.—Dated 2nd October, 1852.

172. John Jobson, of Litchurch, in the county of Derby, Ironfounder, for an invention of "Improvements in manufacturing moulds for casting metal."—Dated 2nd October, 1852.

237. Herm Jäger, of Ludgate Hill, in the city of London, Merchant, for an invention of "Improvements in the treatment of cotton and other similar fabrics by the introduction of chemical agents, to supersede the use of dung in the dunging process."—A communication.—Dated 5th October, 1852.

246. George Hallen Cottam, of Charles Street, Hampstead Road, in the county of Middlesex, Engineer, for an invention of "Improvements in chairs, sofas, and bedsteads."—Dated 5th October, 1852.

251. Auguste Edouard Loradoux Bellford, of 16, Castle Street, Holborn, in the city of London, Patent Agent, for an invention of "Improvements in sewing machines."—A communication.—Dated 6th October, 1852.

1st October.

41. Joseph Barrans, of Queen's Road, Peckham, in the county of Surrey, for an invention of "Improvements in steam-engine boilers."—Dated 1st October, 1852.

184. Joseph Needham, of 26, Piccadilly, in the county of Middlesex, Gun Manufacturer, for an invention of "Improvements in breech-loading fire-arms, and in apparatus connected therewith."—Dated 2nd October, 1852.

187. Alexander Miller, of Glasgow, in the county of Lanark, North Britain, Manager, for an invention of "Improvements in the treatment or finish of textile fabrics and materials."—Dated 2nd October, 1852.

214. Thomas Kennedy, of Kilmarnock, in the county of Ayr, North Britain, Gun Manufacturer, for an invention of "Improvements in obtaining and applying motive power, which improvements, or parts thereof, are applicable to timekeepers and clockwork, and for measuring and registering the flow of water and other fluids and aëriform bodies."—Dated 4th October, 1852.

272. Joseph Hill, of Birmingham, in the county of Warwick, Stamper, &c., for an invention of "A machine for stamping metals and forging iron and steel."—Dated 6th October, 1852.

275. Alphonse René le Mire de Normandy, of Judd Street, in the county of Middlesex, for an invention of "Improvements in obtaining fresh water from salt water."—Dated 6th October, 1852.

Erratum in Journal of 30th September.

No. 2109. For "56, Chancery Lane," read "66, Chancery Lane."

FOREIGN PATENTS.

BELGIUM.*

List of Patents Delivered on the 22nd September, 1859.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 596 of this Journal.)

7866. P. E. Ladrange, of Schaerbeek, for "Improvements in apparatus for mincing meat according to Parod's system."—Dated 12th August, 1859.

7921. J. F. Harmegnies, of Dour, for "A system of sewing flat hempen and aloes ropes."—Dated 26th August, 1859.

7938. Vanden Hielakker, of Brussels, for "An apparatus for marking the points at billiard games."—Dated 2nd September, 1859.

7939. Ed. Vienne, of Mons, a Patent of Improvement for "A lift and force beer pump."—Dated 3rd September, 1859.—(Original Patent, 25th April, 1859.)

7940. M. Lebeau, of Dampremy, for "An apparatus for removing glass sheets from the stretching plate."—Dated 5th September, 1859.

7941. V. Fontaine, of Brussels, for "A system of railway sleepers and chairs."—Dated 3rd September, 1859.

7942. J. G. Marshall, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in machines for working up flax, hemp, china grass, &c."—Dated 3rd September, 1859.—(English Patent, 9th March, 1857.)

7943. P. Carmier and E. Masson, represented by H. Biebuyck, of Brussels, for "A system of jointed axles applicable to all carriages."—Dated 3rd August, 1859.—(French Patent, 19th April, 1859.)

7944. R. Destrem, represented by H. Biebuyck, of Brussels, for an imported invention of "Treatment of gold and silver ores."—Dated 3rd September, 1859.—(French Patent, 27th August, 1859.)

7945. L. J. G. Rul, represented by P. Bals, at Brussels, for "An apparatus for preparing malt in distilling or brewing amylaceous, saccharine, and fermenting substances."—Dated 3rd September, 1859.

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

7946. J. F. F. Leroux, represented by O. Daillencourt, of Brussels, for an imported invention of "An apparatus for collecting and taking up money."—Dated 3rd September, 1859.

7947. F. Van Campenhout, of Vilvorde, for "A composition for destroying bugs."—Dated 5th September, 1859.

7948. Ed. Daveluy d'Elhougne, of Bruges, a Patent of Improvement for "A process of colouring playing cards."—Dated 5th September, 1859. —(Original Patent, 31st August, 1859.)

7949. F. Calliouw, of Bruges, for "A system of locks."—Dated 8th September, 1859.

7950. M. Defries, represented by Th. Boutillier, of Schaerbeek, for an imported invention of "Improvements in the means of regulating the pressure of gas in burners."—Dated 6th September, 1859.—(English Patent, 16th May, 1859.)

7951. A. Maigne, represented by Th. Bontillier, of Schaerbeek, for "A rolling mill for the manufacture of bricks and tiles."—Dated 6th September, 1859.

7952. J. Edwards, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in saggars for articles of biscuit, fayence, and porcelain."—Dated 6th September, 1859.—(English Patent, 1st March, 1859.)

7953. J. S. Larue, of Brussels, for "Mastic called 'lithophène.'"—Dated 6th September, 1859.

7954. P. E. G. Lécorney, represented by Lahaye, of Brussels, for an imported invention of "So-called 'flower embroidery.'"—Dated 7th September,1859.—(French Patent, 27th December, 1858.)

7955. Ed. Lannoy and Co., of Brussels, a Patent of Improvement for "Gunpowder for blasting rocks 'without explosion.'"—Dated 7th September, 1859.—(Original Patent, 24th March, 1858.)

7956. E. Schlenker and E. Dams, represented by X. Raclot, of Brussels, for an imported invention of "A rotary forge-hammer."—Dated 7th September, 1859.—(American Patent, 29th March, 1859.)

7957. F. J. Manceaux, represented by A. Anoul, of Ixelles, a Patent of Improvement for "A system of bolts applicable to breech-loading fire-arms."—Dated 7th September, 1859.—(Original Patent, 8th October, 1855.)

7958. J. Van Coutereu, of Brussels, for "Improvements in cylinders for roasting coffee."—Dated 8th September, 1859.

7959. J. Brunfaut, of Brussels, for "Manufacturing starch from the waste of rice."—Dated 8th September, 1859.

7960. R. Sauvage de Saint-Marc, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of carriages with jointed frames."—Dated 8th September, 1859.—(French Patent, 13th April, 1856.)

7961. J. Hartley, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in apparatus for regulating the speed of steam-engines."—Dated 8th September, 1859.—(English Patent, 22nd July, 1859.)

962. A. Auer, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in printing-presses."—Dated 8th September, 1859.—(French Patent, 29th August, 1859.)

7963. M. Lapierre, of Brussels, a Patent of Improvement for "Manufacture of gutta percha."—Dated 8th September, 1859.—(Original Patent, 28th May, 1857.)

7964. J. B. Arnou-Flament, represented by Bikadu-Bois, of Schaerbeek, for "Improvements in the construction of stoves."—Dated 8th September, 1859.

7965. J. S. Parfit, represented by X. Raclot, of Brussels, for "A machine for stamping the heads of bolts, screws, and rivets, whilst hot."—Dated 8th September, 1859.

7966. L. de Hault and H. Braas, of Schaerbeek, for "An economical funnel."—Dated 8th September, 1859.

7967. E. Anthoine, of Brussels, for "A kind of petticoat with puffed rollers."—Dated 8th September, 1859.

7968. J. B. P. Gire, represented by A. Crooy, of Brussels, for "A cock for water, steam, and gas."—Dated 8th September, 1859.—(French Patent, 31st August, 1859.)

7969. R. H. Collyer, represented by A. Crooy, of Brussels, for an invention of "Improvements in preparing substances used in the manufacture of paper."—Dated 8th September, 1859.—(French Patent, 2nd August, 1859.)

7970. D. Macaire, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of casks and safety apparatus for preserving liquids."—Dated 9th September, 1859.—(French Patent, 30th July, 1859.

7971. Mrs. Lefevre, née Roulleaux, represented by H. Biebuyck, of Brussels, for an imported invention of "A mode of fastening hair dresses."—Dated 9th September, 1859.—(French Patent, 22nd August, 1859.)

7972. L. Pirotte and Sister, of Brussels, for "A rocking scale."—Dated 9th September, 1659.

7973. J. Gheers, of Ghent, for "Manufacture of a tissue imitating plaited straw."—Dated 10th September, 1859.

7974. F. X. Mayer, represented by D. Tassin, of Liége, for "An apparatus for closing cartridges for breech-loading fire-arms."—Dated 9th September, 1859.

7975. F. Heindryckx, of Brussels, for "A system of railway-chairs."—Dated 12th September, 1859.

7976. W. H. Ward, represented by F. Anthoine, of Brussels, for an imported invention of "A system of sea-telegraphs or signals worked by day and night."—Dated 12th September, 1859.—(French Patent, 6th September, 1859.)

7977. R. Mushet, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "A metallic alloy."—Dated 12th September, 1859.—(English Patent, 18th March, 1859.)

7978. D. Evans, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in furnaces of locomotives, and in heating the feeding water of steam boilers."—Dated 12th September, 1859.—(English Patent, 23rd June, 1857.)

7979. J. I. Imbs, represented by A. Crooy, of Brussels, for an imported invention of "A kind of wadded tissue and means of manufacturing the same."—Dated 12th September, 1859.—(English Patent, 23rd June, 1857.

7980. W. Ralston, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A system of goffering and finishing tissues and machines relating thereto."—Dated 12th September, 1859.—Original Patent, 8th March, 1859.)

7981. A. Baillot, of Saint Josse-ten-Noode, a Patent of Improvement for "A needle holder applicable to sewing machines."—Dated 13th September, 1859.—(Original Patent, 14th June, 1859.)

7982. A. Fichot, represented by X. Raclot, of Brussels, for "A truss."—Dated 13th September, 1859.

7983. D. Evans, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in tubular boilers, and in their furnaces."—Dated 13th September, 1859.—(English Patent, 20th November, 1858.)

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 13th September, 1859, and each bearing that date.

No. 25,375. Henry Adams, of New York, N.Y., for an "Improvement in saddle trees."

"I claim a tree for side or ladies' saddles, constructed by connecting the bars A, A, by a bridge B, at the point herein specified, and with an open space *a* between the front ends of the bars at their junction with the horns C, D, for the purpose set forth."

No. 25,376. Geo. S. Avery, of Cross River, N.Y., for an "Improvement in rails for railroads."

"I claim an improvement in railroad iron bars or rails by an off-set or bend made in one end of the rails and the lapping on of the other end of the rails, and inserting a key between them at the lap, and riveting or bolting them together, substantially as and for the purposes herein described."

No. 25,377. E. S. Bartlett, of Romulus, N.Y., for an "Improvement in ditching plough."

"I claim the combination of the arms D, D, D, brace H, rods *d*, *d*, and blocks F, F, substantially as and for the purpose herein set forth. I also claim the mode of attaching and adjusting the shares E, E, E, by means of the packing blocks *l*, *l*, *l*, in combination with the bolts *b*, *b*, and arms D, D, substantially in the manner specified."

No. 25,378. Andrew F. Blunk, of Indianapolis, Ind., for an "Improvement in straw cutters."

"I claim a straw cutter constructed as herein shown and specified, that is to say, with angular knives T, arms K, wheel E, feed rollers B, C, and D, slides P, S, springs O, band N, pulleys J, J, and endless belt I, when these several parts are constructed and arranged for operation conjointly as and for the purposes described."

No. 25,379. Elias K. Breckenridge, of West Meriden, Conn., for an "Improvement in window sash fasteners."

"I claim the employment or use of two cams B, B¹, placed on a common arbor *b*, with a spring *c*, applied to them and a lever C, the whole being fitted within a frame A, and arranged to operate substantially as and for the purpose set forth."

No. 25,380. Zerah B. Brown and Melvin C. Godard, of Granby, Conn., for an "Improvement in seed planters."

"We claim the arrangement and combination of the carrier and stamping wheels F, F, cams and marker device I, I, upon the wheel F¹, the reciprocal levers H, H, seed slides or valves D, D, hoppers B, B, drill formers J, J, and covering shares K, K, substantially in the manner as and for the purpose described."

No. 25,381. Jonathan S. Buell, of Buffalo, N.Y., for an "Improvement in sewing machines."

"I claim, first, in combination with the stationary corrugated surface O, O, the corrugated foot piece Q, constructed arranged and operating therewith as herein set forth. Second' I also claim in combination with the needle or its thread, the conical spool X, and guide U, for causing the slack in the thread to form the loop, and holding said loop from turning until seized by the looper as herein set forth and explained."

No. 25,382. Stephen Burrows, of Lima., Wis., for an "Improvement in seed drills."

"I claim, 1st, the employment of a grooved ring B, C, fitted on the axle or shaft of a seed drill in combination with the peculiarly constructed tube D, E, leading from the hopper into the groove of the ring substantially as and for the purposes set forth."

No. 25,383. Wm. Campbell, of Waterloo, Pa., for an "Improved churn."

"I claim the perforated and hinged floats F, as an improvement in the construction of dasher heads for churns."

No. 25,384. Rosanna Carpenter, of Medford, Mass., for an "Improvement in extracts of fruits."

"I claim as a new article of manufacture, is, the above described extract of fruit, prepared in the manner substantially as specified."

No. 25,385. Richardson P. Clark, of Johnstown, N. Y., for an "Improvement in hand mill for grinding apples, &c."

"I claim the herein described improved hand mill for household use, in reducing apples, potatoes, and other fruits and roots, to pomace, the teeth *e*, *l*, of the combined cylinder and adjustable and yielding concave, being formed and arranged in the particular manner herein set forth."

No. 25,386. Barnes Clayton, of Philadelphia, Pa., for "Fastenings for shirt studs."

"I claim the hollow sliding case A, and spring B, in combination with the tie or post E, and the bar D, the same being arranged to operate together, substantially in the manner and for the purpose set forth and described."

No. 25,387. P. S. Clinger, of Conestoga, Centre, Pa., for an "Improvement in wire fences."

"I claim the combination of the pin S, with the ratchet T, in connection with the mortised posts Fig. 2, and the hooked wires H, W, when these several parts are substantially as herein described, for the purpose set forth."

No. 25,388. T. T. Collier, and H. W. S. Collier, of Lavernia, Texas, for an "Improvement in cotton seed planters."

"We claim the arrangement of the distributor E, and the stirrer H, constructed as described, to operate in combination with the packing wheel I, substantially as and for the purpose set forth."

No. 25,389. Henry W. Colvin, of Pendleton county, Ky., for an "Improvement in sight for fire-arms."

"I claim the semi-circular form of the fire-sight with its range piece, or bead and shades, and triangular form of the hind-sight, with its needle, or range and shades, substantially as herein described, and for the purpose set forth."

No. 25,390. Geo. Cook, of Paris, Ill., for an "Improvement in rotary harrows."

"I claim the arrangement of the teeth *d*, placed eccentrically on triangular frames E, which rotate on oblique pivots *c*, substantially as and for the purpose specified."

No. 25,391. Solomon Crowell, jr., of Palmyra, N. Y., for an "Improvement in coffee pots."

"I claim the combination of the perforated diffusing chamber C, having a tight, conical bottom *f*, with the concentric, perforated digester D, whereby the coffee is exposed in a thin layer of nearly uniform thickness, to the water percolating nearly uniformly through all parts, for the purposes herein specified."

No. 25,392. Henry Davis, of Baltimore, Md., for an "Improvement in brakes for railroad cars."

"I claim increasing the frictional action of car brakes upon the peripheries of car wheels, by the introduction of sand, or its equivalent between the frictional surfaces at the time that the brakes are brought into contact with the car wheels, substantially as herein set forth."

No. 25,393. David Decker, of New York, N. Y., for an "Improvement in pianoforte actions."

"1st, I claim attaching the relieving jacks regulating screw F^3 directly to the key, or to some part carried by the key, so that the repeating lever shall govern the action of the relieving jack, by or through the said regulating screw, whether constructed in this precise manner, or in an equivalent, for the purpose as herein described. 2d, I claim the groove, in combination with the tongue-pin, or equivalent, for the purpose of keeping the lifting jack in its proper position, in relation to the repeating lever and for preventing any binding or sticking of said repeating lever and lifting jack. 3rd, I claim so arranging the adjustable piece D, and repeating lever E, both, or either of them, so that their regulating screws D^2 and E^3, both or either of them, shall be at or near the end next toward the front of the key, in front of the hammer rail, for the purpose of being thus conveniently placed for regulating."

No. 25,394. Sylvanus A. Denio, of Boston, Mass., for an "Improved prison lock."

"I claim the lock, or part *b*, with its parts *c*, *e*, *i*, and *k*, arranged with each other as described, to move, hold, and lock the bolt *k* in door *l*, when combined, positioned, and secured with lock *h*, which in turn locks the shaft *c*, all by turning a single knob, all parts being constructed and operated in the peculiar manner described, and for the purposes fully set forth."

No. 25,395. Simeon Dodge, jr., and Benjn. Podter, jr., of Marblehead, Mass., for an "Improvet heel for boots and shoes."

"We claim as a new article of manufacture, is, a heel having a concave seat and a flat tread, with its rises united by cement, as set forth."

No. 25,396. Thos. Dougherty, of Macon, Geo., for an "Improvement in switch stand for railroads."

"I claim the combination of eccentric B with the pin C, through lever D to bar E, for the purpose of locking and unlocking the main pin A to and from notches M, M, M, substantially as and for the purpose set forth."

No. 25,397. Eugene Duchamp, of St. Martinsville, La., for an "Improved faucet."

"I claim the arrangement and combination of the oblique slot G, handle F, stem C, and tube A, so that on turning the handle F the stem C will rise and fall with a spiral or screw movement, thus ensuring ease of operation and tightness of packing, as herein shown and described."

No. 25,398. Eugene Duchamp, of St. Martinsville, La., for an "Improved filter."

"I claim the employment of fine-spun glass, arranged in the manner and for the purposes herein set forth, in combination with the reservoir G, floating valve J, chamber E, and pure-water chamber F, essentially in the manner herein represented and described."

No. 25,399. Eugene Duchamp, of St. Martinsville, La., for an "Improvement in apparatus for heating water."

"I claim the combination and arrangement with the false bottom E and tank A of the perforated casing D, fire-chamber C, draft pipe F, smoke pipe H, as and for the purpose herein shown and described."

No. 25,400. John Fasig, of West Salem, O., for an "Improved mop head."

"I claim the herein-named construction of a mop head, consisting of the piece B, with the slot C, and hole D, in combination with the rod E, notches *a*, *e*, screw and nut G, when these several parts are arranged and operated substantially as set forth."

No. 25,401. Jacob Fassnacht, of New Milltown, Pa., for an "Improvement in harness."

"I claim the device of combining the hip-strap and breech band in one continuous piece A for each half, united at B, B, to form the breeching, as herein set forth and described."

No. 25,402. Wm. R. Fee, of Cincinnati, O., for an "Improvement in hydraulic oil presses."

"I claim, 1, the peculiar construction of the dies D^1 and followers D, having the grooves G and conduits G^1, and also the oil passage *d*, to facilitate the expression of oil, substantially as set forth. 2, I claim the solid truss K when made a part of the press and worked by means of the rack and pinion, substantially as set forth, for the purposes described. 3, I claim the hinged hoop F for charging the press, substantas set forth."

No. 25,403. J. H. Frampton, of Hopewell, O., for an "Improvement in cultivators."

"I claim the adjustable share standards G, G, attached to the parallel adjustable bars D, D, which are secured to the beam A by the bars E, E^1, the whole being combined and arranged substantially as and for the purpose set forth."

No. 25,404. Daniel K. France, of Congress, O., for an "Improved churn dash."

"What I claim is, the metallic strips B attached to the convex surface of the slats by slots and screws, and operating in the manner and for the purpose substantially as set forth."

No. 25,405. C. L. Gilpatrick, of Saco, Me., for an "Improved churn."

"I claim the combination of the crank shaft D and staffs B, B, with the top A^1, when said top is provided with boxes (F), in which play slides, through which the staffs pass, the same being arranged and operating substantially as and for the purpose specified."

No. 25,406. Elias J. Hale, of Foxcroft, Me., for an "Improvement in lamp chimneys."

"I claim contracting the chimney above the frame, and admitting at or near the same point, a current of air, in the manner and for the purpose substantially as herein set forth."

No. 25,407. Robert Hale, of Roxbury, Mass., for an "Improved exhaust pipe for steam engines."

"I claim an exhaust pipe, constructed as described, and having an opening B, and a steam pipe C, in combination with a lip *f*, operating in the manner set forth, for the purpose specified."

No. 25,408. Wm. Hamilton, of St. Catherine, Mo., for an "Improved excavators."

"1, in combination with an excavator frame, constructed as described, having the side timbers braced in front only, I claim four wheels, when arranged in relation to the said frame, substantially as described, so that a common cart may either be backed between the hind wheels, or pushed over said wheels and frame under the excavator, when the same is hoisted to be discharged, as specified. 2, the combination of an excavator with a frame, having the rear ends of each of the side timbers bifurcated, for the reception of a wheel, the same being arranged to turn on a journal or pin, extending transversely through the two forks, as de-

scribed. 3, I claim the peculiar arrangement of hanging the excavator to the frame, by means of arms, the same being so pivoted at their ends, respectively, to the excavator and side timbers, as that they shall be exposed to a tensile strain in the draft line, or thereabout, during the excavating operation of the machine, substantially as shown and described."

No. 25,409. Stephen P. Hart, of Boston, Mass., for an "Improvement in barrel syringes."

"I claim the spring g, as applied to the syringe, operating in the manner substantially as set forth."

No. 25,410. Malachi B. Hassler, of Columbia City, Indiana, for an "Improved churn."

"I claim the arrangement of the hinged curved leaf (g) in combination with the wings (f, f^1), constructed and arranged to operate, substantially as described, for the purposes set forth."

No. 25,411. R. K. Hawley, of Baltimore, Md., for an "Improved construction of segmental circular saws."

"I claim a segmental veneer saw, the blades of which are formed, hung, and champed in the manner described."

No. 25,412. David Hinman, of Berea, O., for an "Improvement in grinding the teeth of mowers and reapers."

"I claim the circular grooves a, a, on the faces e, e, of the grindstone, in connection with the standards F, F^1, G, G^1, and holder H, arranged and operating in the manner specified."

No. 25,413. W. W. Hollman, of Eddyville, Ky., for an "Improved mangle."

"I claim the combination of the levers K, J, K^1, J^1, with one of the rolls and balancing lever H, H^1, substantially as and for the purposes set forth."

No. 25,414. Wm. H. Horstman, of Brooklyn, N.Y., for an "Improved mode of manufacturing telegraph cables."

"I claim constructing the cable by the apparatus, substantially as herein described, consisting of the reservoirs, wrapping apparatus, &c., or their equivalents, as specified. I also claim the final reservoir m, for coating a telegraphic cable, after it has passed all the other apparatus, and before it has entered the water or ground, constructed and applied, substantially as herein specified. I also claim the manufacturing of the cable, substantially in the manner described, at the time it is laid, so as to perfect it, and at once launch it into the place where it is to remain, whereby I avoid all the chances for injury and imperfections arising therefrom, growing out of stowing and handling the cable after it has been made, as heretofore has been done."

No. 25,415. A. H. Inskeep, of Middleburg, O., for an "Improvement in harvesting machines."

"I claim, 1st, the arrangement of the revolving spiral cone-shaped cutter or gatherer, with the base of the cone in front, to gather up and draw the grain back to either stationary or reciprocating cutters, substantially as described, for the purpose specified. 2nd, the combination of the spirally formed gatherer or cutter, arranged as described, with the divider D, guards D^1, D^1, and stationary cutters e, substantially as described, for the purposes specified."

No. 25,416. W. D. Johnson, of Raleigh, N. C., for an "Improvement in cultivators."

"I claim the bars A, A, curved so as to form handles at one end, and having horizontal oblique positions to form the body of the frame, the draft bar C and guide or returning bar D, the front ends of the bars A, A, being connected or secured together by the collar or loop B, in combination with the double scraper E, substantially as described, and for the purpose set forth."

No. 25,417. W. D. Johnson, of Raleigh, N. C., for an "Improvement in seeding machines."

"I claim the arrangement of the two distributing slides E, F, with the projections H, H, on the wheels C, C, and two or more compartments in the hopper B^1, inclined tube G, inclined draught bar B, and adjustable roller standard I, substantially as and for the purpose set forth."

No. 25,418. Morris L. Keen, of Rogers' Ford, Pa., for an "Improvement in boilers for making paper pulp from wood."

"I claim a boiler for boiling under pressure wood and ligneous materials for making paper pulp, constructed with an expansion chamber stirrers and discharge valve or cock, arranged for the purposes and in the manner substantially as herein stated."

No. 25,419. Asa M. Keith, of Koscuisko, Miss., for an "Improvement in cultivators."

"I claim the arrangement of the double scraper, the hoe drum and the hillers, or coverers, in their relation to each other, and to the parts of the frame to which they are attached, as and for the purposes herein set forth."

No. 25,420. John C. Kimball, of New Haven, Conn., for an "Improvement in movable tops for carriages."

"I claim so constructing the standards or supports of a standing top carriage and attaching them by means of screws that the top and standards or supports may be readily removed, when the whole is constructed and connected substantially as herein described, and for the purposes herein set forth. 2, I claim the combination of the standards with the body when the standards are secured by being screwed into the upper ends of the studs, and the whole is constructed, arranged, and made to serve the purpose intended, substantially as herein described."

No. 25,421. Nelson J. Knapp, of Chicago, Ill., for an "Improvement in locomotive lamps."

"I claim the combination of the ellipsoidal and paraboloidal reflectors E, D, and burner C, arranged substantially as and for the purpose set forth."

No. 25,422. Jesse Ladd, of Holderness, N. H., for an "Improved machine for arranging pegs."

"I claim a machine or combination, consisting of the following devices, or their mechanical equivalents, viz., 1st, the grooved cylinder D, furnished with a hopper or other proper means of supplying it with pegs. 2nd, the guiding receiver H. 3rd, one or more advancers L, L, and the operative mechanism thereof. 4th, a device or mechanism for discharging from the guiding receiver H the refuse pegs. 5th, the springs N, N, or devices for preventing the discharge of the pegs from the guiding receiver, when they may be disposed therein with their buts in advance of their points. 6th, the receiving spout M. 7th, the peg carrier O; and 8th, mechanism for advancing the pegs through the said carrier. I also claim, in combination with the said machine, or its hopper and grooved cylinder, an agitator D, or means of shaking or agitating the mass of pegs in the hopper or its conductor. I also claim, in combination with the said machine or its receiving spout M, the serrated bar P, operated as described, or mechanism for insuring the descent of the pegs within the receiving spout, as specified. I also claim, in combination with the said machine, or with the receiving spout and peg carrier thereof, the device or part U made to operate in manner and by means substantially as specified. I also claim, in combination with the said machine, or with the receiving spout M thereof, the door R, and its operative mechanism, whereby the surplus pegs may be discharged from the spout after it may have become sufficiently supplied with pegs. I also claim, in combination with the said machine, or its spout M, the finger O^1, or equivalent, to be operated in manner and means, and for the purpose substantially as described."

No. 25,423. Augustus Lafever, of Battle Creek, Mich., for an "Improved board measurer."

"I claim, 1st, the employment or use of the cone gears E, J, and sliding pinions F, L, in connection with an endless toothed or serrated chain T, fitted within a suitable case, arranged with gearing and indexes, and with or without the arm C, and lever D, substantially as and for the purpose set forth. 2nd, the arrangement of the yielding frames H, K, with the pinion F and cone gear J, respectively attached the levers b^1, c^1, g^1, h^1, and racks a^1, f^1, substantially as and for the purpose specified."

No. 25,424. John S. Lash, of Carlisle, Pa., for an "Improvement in dumping cart."

"I claim the employment or use of the curved or segment rack F attached to the rod E, and provided with the ledge i, the pinion g, and hooks l, l^1, arranged for joint operation, as and for the purpose set forth. I further claim the rod H, provided with the spring r, and connected to the sliding or pressure bar I, provided with the arm p, the above parts being applied to the cart and arranged relatively with each

other, to operate substantially as and for the purpose set forth."

No. 25,425. Wm. Lees, of Germantown, Ohio, for an "Improvement in corn planters."

"I claim the cylinders (d, d^1), in combination with the hoppers (c^1, b), with reference to the feed bar (D), arranged to operate substantially as described."

No. 25,426. Ferdinand C. Lighte, of New York, N. Y., for an "Improvement in piano-fortes."

"I claim, 1st, the crystal reverberator G of glass or other material applied below, or at the back of the sound board, in combination with openings a, a, therein, substantially as and for the purpose herein described. 2nd, the insulators f, f, applied between the iron frame or plate G, and the wrest plank and wooden blocking of the instrument, in such manner that the said frame or plate will bear upon the plank and blocking only at few points, substantially as and for the purpose herein described."

No. 25,427. Geo. Lindsey and Wm. Cameron, of Petersburgh, Va., for an "Improvement in tobacco presses."

"We claim a portable hydraulic jack, or other powerful press, so constructed as to be readily applied to an ordinary or to a series of ordinary screw presses, for the purpose described, and adjustable as to height on the track on which it rests, in combination with the railway track E, at right angles with the track B, when said press is used for increasing the pressure of the screw press, and converting it into a retaining press, substantially as and for the purpose described."

No. 25,428. John H. Lyon, of New York, N. Y., for an "Improved lock and detector."

"I claim combining with a padlock or any lock provided with a shackle, a supplemental shackle, arranged with a lead or soft metal tube, so as to be temporarily secured thereby to the lock case, and admitting of being released only by the severing of said tube, which thereby serves as a detector, substantially as described. I further claim forming the lock case A of two parts a, b, with a division plate p between, whereby the construction of the lock is rendered extremely simple, and the invention enabled to be carried out or produced at a moderate cost."

No. 25,429. Murdick Lytle, of Alleghany, Pa., for an "Improved steering apparatus for barges in rivers."

"I claim the application of a wheel C to the bow of a barge, so that said wheel shall revolve at right angles to the direction of the barge, in combination with an apparatus for operating said wheel by the power of the propelling boat, substantially as and for the purposes specified."

No. 25,430. Jacob Maize, of Wooster, O., for an "Improvement in seeding machines."

"I claim the adjustable cultivators K, provided with the arms K^1, guides M, and the adjustable jointed harrow Q, when arranged in relation to each other as described, and acting conjointly with the seeding apparatus, in the manner and for the purpose set forth."

No. 25,431. W. A. McDonald, of Mott Haven, N. Y., for an "Improved dovetailing machine."

"I claim, 1st, the employment or use of spiral saw cutters G, G^1, and G^{11}, G^{111}, attached to the rotating heads F, connected by gearing E, for the purpose specified. 2nd, in combination with the cutters G, G^1, and G^{11}, and G^{111}, the adjustable platform L. And 3rd, the combination of the cutters G, G^1, G^{11}, G^{111}, platform L, and gauge M, operated by the screw c, for the purpose set forth."

No. 25,432. Edmund Miller and Benjn. Miller, of Rising Sun, Ind., for an "Improvement in cultivators."

"We claim the combined arrangement of the guard H, elevated wing I (curved horizontally in two directions), adjusting shank G, and bracket E, F, operating in connection with a shovel plow, in the manner and for the purpose set forth."

No. 25,433. Henry Miller, of Grafton, Virginia, for an "Improved shingle machine."

"I claim the manner of tilting the bed F, as shown, to wit, by means of the adjustable wheel I, on shaft J, actuated by the ratchet K, also on said shaft the pawl L, on the framing A, spring w, attached to the carriage E. and spring t^1, attached to the framing A, and acting on the bed F, the whole being arranged substantially as and for the purpose set forth. I further claim the arrangement of the bed F, and rods G, H, attached to the framing, as shown, to admit of the vertical adjustment of the bed, for the purpose of graduating the thickness of the shingles."

No. 25,434. Jonathan H. Mitchell, of Germantown, Tenn., for an "Improvement in cotton scrapers."

"I claim, first, the combination and arrangement of the beam (d), chair (c), mould board (a), and share (b), when operating substantially as herein set forth. Second, the adjustable and changeable share (b), when constructed, arranged and operating, substantially as and for the purpose set forth."

No. 25,435. Wm. Morrison, of Carlisle, Pa., for an "Improvement in corn planters."

"I claim a corn planter, constructed substantially as shown and specified, that is to say, with the mold boards m, m^1, adjustable cutters or coverers d, d, hopper B, slides q, q, and clearers N and e, when these several parts are constructed and arranged for joint operation, in the manner and for the purpose described."

No. 25,436. Wm. O'Neill, of Pine Level, Ala., for an "Improvement in ploughs."

"I claim the lapping landsides of the plows, and the bar A attached to the beam, as specified, in combination with the bolts, nuts, and braces described, whereby there may be formed at pleasure, a double, or hillside plow, as set forth."

No. 25,437. Wm. O'Neill, of Pine Level, Ala., for an "Improvement in ploughs."

"I claim the arrangement of the adjustable mould boards M, M^1, attached to the share by bolts a, and constructed as described, with braces Z and T, stock S, shares S^1, and point P, substantially as and for the purposes specified."

No. 25,438. Geo. T. Parkhurst, of Baltimore, Md., for an "Improvement in lamps."

"What I claim, is, the flattened air tubes bent at right or other convenient angles, with a slit or opening at the outer angles, in combination with flat wick tubes, and the combination of the above parts with the cap or dome, made and operating substantially as described."

No. 25,439. Stephen B. Peet, of New York, N.Y., for an "Improvement in carriage springs."

"I claim a compound spring, composed of a combination of an elliptic leaf or leaves, and a volute coil, substantially as herein set forth."

No. 25,440. John G. Perry, of Kingston, R. I., for an "Improved sausage stuffer."

"I claim combining the cylinder c, having a spiral cavity or cavities, with the follower D, substantially as described, for the purposes herein set forth."

No. 25,441. Orris Pier, of Ludlow, Vt., for an "Improvement in horse rakes."

"I claim the arrangement and combination of the jointed adjustable bar I, lever H, bar E, rods G, rake F, strap J, and seat I^1, as and for the purpose herein set forth and described."

No. 25,442. Daniel R. Prindle, of Bethany, N. Y., for an "Improvement in boilers and steamers."

"I claim the so turning or forming the flange of the upper section as that it will contain water to prevent the fire from burning the packing between the flanges, substantially as described."

No. 25,443. S. G. Randall, of New Braintree, Mass., for an "Improvement in seeding machines."

"I claim the arrangement and combination of the series of plate wheels D, D, seed boxes A, and horizontal bar B, substantially as herein shown and described, so that as the bar B is drawn along the plate wheels shall assume an oblique position, as set forth."

No. 25,444. J. A. Safford, of Winchester, Mass., and John W. Chase, of North Weare, N. H., for an "Improvement in skiving machines."

"We claim, firstly, hanging the gauge roll K in vibratory frames I, in combination with the spring *h* and retaining spring-catch N and adjustable stops *k*, *l*, the whole arranged and operating as specified, for the purposes set forth. 2dly, We claim, the overlapping knife L, in combination with the adjustable spring apron M, arranged and operating as specified, for the purpose set forth."

No. 25,445. Francis C. Schaffer, of Brooklyn, N. Y., for an "Improvement in carriage tops."

"I claim the arrangement and combination with the curtains D of the hooks (*l*), guides (*d*), and supporters (*c*), as herein shown and described, so that the curtains D may be kept stretched, and be readily lowered or raised and secured overhead within the carriage at any desired point, as set forth."

No. 25,446. Thaddeus S. Scoville, of Rochester, N. Y., for an "Improved spirit level."

"I claim employing a single transparent cell or cistern of spirits or other fluids in combination with the scale C and rectangular stock A, in such a manner that the surface line of the liquid shall indicate both the horizontal and perpendicular with the intermediate degrees, substantially in the manner and for the purposes herein set forth."

No. 25,447. Hervey Sloan, of Franklin, Ind., for an "Improvement in seeding machines."

"I claim, 1st, the arrangement of shanks I, I^1, drag bars K, K^1, levers J, J^1, bar G, rest H, and support *h*, the same being combined and operating substantially as and for the purpose herein specified. 2d, in connection with the subject of the first claim, the arrangement of rollers B, B, seed boxes C, and (D), slides *a* and *d*, *d*, *d*, when the same are constructed substantially as and for the purpose specified."

No. 25,448. C. A. Smith, of Piermont, N. Y., for an "Improvement in railroad car seats."

"I claim, first, the arrangement of the back and bottom of a car seat, as described, so that when the seat is adjusted to an inclined position both parts move together on the same pivot *a*, on which the back moves independent from the bottom when the seat is reversed, substantially as specified. Second, I do not claim the notched arc and spring catch independent from my other arrangements; but I claim the spring catch *e*, notched arc *f*, bottom A, and back D, when the same are arranged and combined as herein described."

No. 25,449. P. M. Smith and T. T. Collier, of Lavernia, Texas, for an "Improvement in cotton seed planters."

"We claim the arrangement and combination of the wheels B, axle C, crank *a*, pulley H, slide D, agitator F, fender bar S, plow-share G, and scraper *h*, substantially as and for the purpose described."

No. 25,450. James C. R. Steirly, of Brooklyn, N. Y., for an "Improved thimble."

"I claim the combination of the thimble and cutter, in the manner and for the purposes set forth."

No. 25,451. David Stuart, of Philadelphia, Pa., for an "Improvement in cooking stoves."

"I claim combining with the hollow cross piece *b* the distributor *a*, constructed and arranged as herein set forth."

No. 25,452. J. H. Swan, of New York, N. Y., for an "Improved folding chair."

"I claim, first, the arrangement of the back E, seat F, and arms G, G, substantially as shown, so that the back and seat, when occupied, will be nearly counterpoised, and the arms C, moved with the seat and back, for the purpose specified. 2d, in combination with the back E, seat F, and arms G, G, the curved legs A, A, B, B, when the whole are arranged substantially as shown so as to admit of being compactly folded."

No. 25,453. James Taylor, of Rushville, Ill., for an "Improved churn."

"I claim the peculiar construction and arrangement of perforated brakes and auxilliary reflectors, in combination with a dasher, having its blades flattened out gradually from near the shaft to their ends, substantially as and for the purposes set forth."

No. 25,454. James S. Taylor, of Danbury, Conn. for an "Improvement in machinery for forming hat bodies."

"I claim the combination of the two perforated cones and exhaust with one picker and seed arrangement, so arranged that the current of impelled fur is alternately shifted from the tip of one cone across on to the tip of the other, in such a manner as to give the required proportions in forming a perfect hat body."

No. 25,455. Geo. W. Tolhurst, of Liverpool, O., for an "Improved washing machine."

"I claim the inside bottom box B, constructed air-tight, so that when the pressure of the upper rubber is removed, it will float, and expose the clothes to be handled."

No. 25,456. M. L. Tourtelett, of Neshonoe Wis., for an "Improvement in seeding machines."

"I claim the combinaton and arrangement of the levers G, H, connected by the traverse rod *e*, the cam I, the slides F, F, and L, for joint operation, for the p urpose set forth."

No. 25,457. Louis S. Ullman, of Nashville, Tenn., for an "Improved hygrometer."

"I claim the combination of the capsule and naturally spiral tail like appendage of either of the plants hercin specified, with an index and dial, or their equivalents, substantially as herein described, to constitute a hygrometer."

No. 25,458. John Van Horne, of Magnolia, Ill., for an "Improvement in machine for weighing grain, &c."

"What I claim is, weighing by means of a round ball, or self-acting weigher 'O,' operating in a concave beam or balance and blocks, and spiral springs 'N, N,' working, in the bottom of the beam, by means of the grooves 'P, P,' so as to weigh different weights or drafts, and board 'H,' combined for the purposes set forth, as herein above described."

No. 25,459. Thos. J. Wallace, of Cameron, Ill., for an "Improvement in machines for raking and loading hay."

"I claim, first, a hay raker and loader, all the parts of which are constructed, arranged, and combined together for joit operation, substanaially as described. Second, the combination of the inclined part A with its pivot *c*, with the part A^1 of the main frame, and sloe *d*, substantially as and for the purposes set forth."

No. 25,460. Hamlin Whitmore and David M. Smith, of Springfield, Vt., for an "Improved carpenter's rule."

"We claim the spiral springs *h*, *h*, applied to the pindle *e* of the joint, in combination with the elastic bearings d^1 of the plates *c*, *c*, provided with notches *f* and projections *g*, as and for the purpose set forth."

No. 25,461. Chas. Whitaker, of Davenport, Iowa, for an "Improvement in corn planters."

"I claim the arrangement of the seed boxes or receptacles F, slides *g*, stationary plates G^1, and movable plate G, with the arms and weights *m*, attached, substantially as and for the purpose set forth."

No. 25,462. J. S. Williams, of St. Louis, Mo., for an "Improvement in grates."

"I claim the combination of the stove grate A, having register plates D, D, and valves H, I, I, which admit unheated air from the room at all times, through the bottom of said plates, but control the flow of heated air into the room, as described with the ordinary fireplace C, when the latter is separated from the flue above by a simple fire-board *b*, in the manner and for the purposes herein described."

No. 25,463. W. B. Williams, of Warrenton, N. C., for an "Improvement in ploughs."

"I claim, 1st, the combination of screw bolts S, nut *n*, in beam B, standard A, cuff *c*, and slotted brace *b*, to regulate the depth of ploughing, substantially as described. 2nd, and, in combination with the above, the curved arm D, for collecting weeds, substantially as described."

No. 25,464. W. B. Williams, of Warrenton, N.C., for an "Improvement in ploughs."

"I claim the combination of standards S, plate P, and oblique wings W., substantially as and for the purpose set forth, with share C."

No. 25,465. ALBERT BROUGHTON, of Malone, N.Y., assignor to himself and A. Lindsay, of same place, for an "Improvement in converting rotary into reciprocating rectilinear motion."

"I claim the combination of the divided journal box F, F¹, containing two bearings, and closed by springs G, G, and the spring I, or toothed plate I¹, with the vibrating pinion shaft E, the whole operating substantially as and for the purpose herein specified."

No. 25,466. J. H. GOULD, of Alliance, O., assignor to himself and E. A. Hartshorn, of Mount Union, O., for an "Improved cover for stove plates."

"I claim the self-erecting handle A, in combination with weight C, arranged essentially as and for the purposes set forth."

No. 25,467. JAMES A. HAMER, of Reading, Pa., assignor to himself and Norris Maris, of Kimberton, Pa., for an "Improvement in brick machines."

"I claim, first, the combination of the blades I¹, and rods L¹, with the valves J¹, and spiral K¹, constructed, arranged, and operating, in relation to each other, substantially as and for the purposes set forth. Second, the combination of the adjustable cover D, with spiral K¹, and trough B, for the purpose of relieving or increasing the pressure upon the clay in the molds, as set forth. Third, the combination of the hinged smoothing piece Q, with the hinged vertically reciprocating piece P, as and for the purposes set forth. Fourth, providing the hinged smoothing piece P, with the slot O, and tube S, as and for the purposes set forth.'

No. 25,468. S. P. LA DUE, of Rockford, Iowa., assignor to Thos. S. La Due, of same place, for an "Improvement in calendar clocks."

"I claim, 1st, the arrangement and combination of the wheels C, D, E, and G, and the ring M and Q, the faces of which are marked with the proper figures and letters, so that they indicate the seconds, the minutes, the hours, and the days of the week and month, substantially in the manner herein specified. 2nd, arranging the wheel G in such a manner that it serves the double purpose of actuating the bell hammer, and to indicate the hours of the day, substantially in the manner described. 3rd, placing the figures and dials on the faces of the driving wheels, to indicate the seconds and minutes, by a continuous motion; also to indicate the hours, either by a continuous or intermittent motion, substantially in the manner described."

No. 25,469. JOSEPH B. OKEY, of Indianapolis, Ind., assignor to himself and Wm. H. Hendrick, of same place, for an "Improvement in straw cutters."

"I claim, 1st, the combination of sliding bar B, when constructed, as set forth, with yoke C, and vibrating bottom D; and, 2nd, the combination of cams F and G, with lever A, when constructed and used as described, all operating substantially as and for the purposes mentioned in the foregoing specification."

No. 25,470. JOSEPH RIDER, of Newark, O., assignor to himself and E. Remington and Sons, of Ilion, N. Y., for an "Improvement in breech-loading fire-arms."

"I claim the combination of the movable breech pin F, and the cap tube E, applied to a pistol, substantially as herein described. And in combination with a hammer of the form herein described, I claim the arrangement of the main spring and trigger, relatively to each other, to the hammer, and to the stock and barrel, substantially as herein described."

No. 25,471. JOSEPH C. SILVEY, of New Orleans, La., assignor to Thos. J. Dobyns, of St. Helena Parish, La., for an "Improvement in sewing machines."

"I claim, 1st, operating the needle arm by means of a grooved eccentric G, and a pin *b* on the needle arm, arranged relatively to each other, to operate in the manner herein described, and illustrated in Fig. 4. 2nd, the construction or arrangement of the portion of the feed plate or table B, through which the needle and the feeding dog work, to form an inclined plane relatively to the direction of the movement of the feeding dog, substantially as herein described and illustrated in Fig. 2, for the purpose set forth. 3rd, the combination of springs R, T, and M, applied in the manner described, to effect the tightening of the stitch, and otherwise control the thread between the perforating needle and its spool by the automatic operation herein explained."

No. 25,472. SETH D. TRIPP, of Stoneham, Mass., assignor to himself and Luther Hill, of same place, for an "Improvement in apparatus for feeding pegs."

"I claim winding up the blank or strip of pegs with the ribbon *f*, so that as the ribbon is wound off by the movement of the machine, the blank will be fed up in the manner substantially as herein set forth. 2nd, I claim hanging the spool I on a vibrating arm F, so that the spool and trough M may follow the motions of the swinging gate or part of the pegging machine to which the trough M is attached."

No. 25,473. ANDREW TURNBULL, of West Meriden, Conn., assignor to himself and James D. Frary, of Meriden, Conn., for an "Improvement in scales."

"I claim, 1st, the combining of the beam lever F with scoop platform C, attached with springs K, rack J, adjustable or fixed pinion *e*, with index or indexes N, attached to its arbor *d*, and traversing over a graduated plate or plates M, substantially as and for the purpose set forth. 2nd, I claim attaching or suspending loosely the rack J to the beam lever F by means of a pivot *f*, and having a spring *g* acting on said rack, in order to keep the same in gear with the pinion *e*, for the purpose set forth. 3rd, I claim attaching the lower end of the spring K to the traverse bar *h* by means of the screw L, and nut *i*, in order to regulate the tension of the spring and preserve its uniformity, substantially as and for the purpose set forth. 4th, I claim in combination with the beam lever F, spring K, and indexes N, connected with the beam lever, the stop *j*, on the arbor B, for the purposes specified."

No. 25,474. O. H. WATERS, of Baltimore, Md., assignor to Alfred Hunter, of Washington, D. C., for an "Improved clothes dryer."

"I claim the combination and arrangement of the adjustable grooved post B, its radial arm F, and box H, with box A, cylinder B, and protector K, the whole being constructed in the manner and for the purpose herein set forth."

No. 25,475. LEWIS WHITE, of Hartford, Conn., assignor to himself and Daniel McLaughlin, of New York, N. Y., for an "Improvement in lamps."

"I claim the application and arrangement of the operating gears when placed in the manner and for the purpose as herein described. I also claim the movable flaps B, B, in the manner and for the purpose substantially as herein described."

RE-ISSUES.

WILLIAM FULTON, of Cranberry, N. J., for an "Improvement in lamps." — Patented 3rd August, 1858.—Re-issued 13th September, 1859.

"I claim, 1st, the perforated plate or air distributor C, or its equivalent, as shown in Fig. 2, for the purpose of regulating the elastic force of the air, so that it may be presented evenly to the flame (when applied to flat wick lamps), it being placed horizontal. 2nd, I claim the perforations *b* in the lower part of the cap D, as shown at Fig. 1, in combination with the perforated or air distributing plate C, as shown in Fig. 2. 3rd, I claim the register formed of the perforations, *e* in the top A, as shown in Fig. 3, in combination with the perforated plate or air distributor C, as shown in Fig. 2, and the holes *b* in the lower part of the cap D, as shown in Fig. 1, the whole being arranged substantially as and for the purpose described."

P. A. PALMER, of Troy, N. Y., for an "Improvement in heating elevated ovens,"—Patented 24th September, 1850. — Re-issued 13th September, 1859.

"I claim the arrangement and combination of revertible flues in elevated ovens of cook stoves, with partition walls, in the manner as and for the purpose herein described and set forth. I also claim the arrangement and combination of the oven plate (*c*), in and with the inner plate and ends of the oven, as and for the purpose herein described and set forth. I claim the arrangement of the damper (*e*) immediately between the main part of the stove and the bottom or lower part of the elevated oven, thereby combining it with said oven, the stove and the double fluc (*c*), for the purpose of controlling and regulating the heat in its passage into the flues of the said elevated oven, as herein described, disclaiming any damper found in any stove not having an elevated oven, as herein set forth."

HENRY B. GOODYEAR, of New York, N. Y., administrator of Nelson Goodyear, deceased, for an "Improvement in the manufacture of India fabrics."—Patented 13th May, 1845.—Extended for 7 years from 13th May, 1859.—Re-issued 13th September, 1859.

"I claim making fabrics by thoroughly intermingling and incorporating the shearings or clippings of fibrous substances with the gum, while rendered plastic by heat, substantially as and for the purpose specified."

DESIGN.

HENRY HEBBARD, of New York, N. Y., for "Design for the handles of spoons, forks, &c."

"I claim the use of the ornamental devices herein-before described, for the purpose of ornamenting the handles of spoons, forks, and other articles of table cutlery, whether made of silver or other metal."

EXTENSIONS.

C. J. WOOLSON, of Cleveland, Ohio, for an "Improvement in cooking stoves."—Patented 9th September, 1843.

"I claim the forming of the bottom plate of the oven with a number of tubes or boxes usually of sheet iron or other substance thinner than the bottom plate, that desend from it through the lower flue space, the same being effected under an arrangement of their respective parts, substantially the same with that herein described, and for the purpose set forth."

FREDERICK E. SICKELS, of New York, N. Y., for an "Improvement in the mode of tripping cut-off valves."—Patented 19th September, 1845.

"I claim tripping the drop valve of the cut-off by a motion independent of the lifters, substantially in the manner and for the purpose herein described. I also claim combining the wiper that drops the valve of the cut-off, whether working horizontally or vertically with any of the moving parts of the engine other than the lifters or their rocking shaft by means of the sector and arm or arms, by means of which the extent of the cut-off can be regulated at pleasure during the action of the engine from the full to the least portion of the stroke, as herein described."

LIST of SPECIFICATIONS, &c. published during the week ending 30th September, 1859.

No.	Price.	SUBJECT-MATTER.
499	3*d.*	Spinning and doubling machines.
503	1*s.* 3*d.*	Looms for weaving.
505	2*s.* 9*d.*	Apparatus for purifying feed water for steam generators, &c.
507	7*d.*	Forming and attaching fish plates.
508	3*d.*	Apparatus for drawing off fluids.
509	7*d.*	Weaving, &c.
510	3*d.*	Looms for weaving.
512	2*s.* 8*d.*	Electric telegraphs, &c.
513	1*s.* 4*d.*	Steam engines.
514	7*d.*	Manufacture of pickers for looms, &c.
515	3*d.*	Propelling and steering vessels.
519	3*d.*	Reducing rags and waste fibres.
520	6*d.*	Ploughs.
521	8*d.*	Joint for cabinet making, carpentry, &c.
523	6*d.*	Springs for railway carriages and locomotive engines.
524	5*d.*	Disinfection and rectification of alcohols.
525	7*d.*	Weaving.
527	6*d.*	Purification of coal gas.
528	11*d.*	Hackling machines.
529	7*d.*	Apparatus for stopping horses.
530	9*d.*	Apparatus for taking soundings and throwing life lines.
531	10*d.*	Steam agricultural machinery.
532	3*d.*	Manufacture of elastic fabrics.
533	3*d.*	Steam engines.
534	3*d.*	Rotary engines.
535	3*d.*	Fire-arms.
536	3*d.*	Preservation of animal food, &c.
537	6*d.*	Breaks for railway and other car riages.
538	3*d.*	Finishing woollen and other cloths.
539	10*d.*	Apparatus for the evaporation of sewage and other waters, &c.
540	3*d.*	Locks.
541	6*d.*	Stacking or holding earthenware for firing.
542	3*d.*	Implement for breaking and preparing land.
543	7*d.*	Manufacture of artificial fuel.
544	10*d.*	Floating docks.
545	3*d.*	Converting vegetable substances into fibrous material for the manufacture of paper, textile, and other fabrics.
546	3*d.*	Machinery for crushing and preparing flax, hemp, &c.
547	7*d.*	Spindles for locks, latches, &c.
548	3*d.*	Studs and other fastenings.
549	3*d.*	Fire-places, grates, &c.
550	7*d.*	Preparation of materials for the manufacture of paper, &c.
551	3*d.*	Chopping machine.
552	3*d.*	Buckles and clasps.
553	3*d.*	Coating the bottoms of ships and vessels.
554	4*d.*	Manufacture of paper for cigarettes; manufacture of cigars.
555	3*d.*	Stay fastening.
556	6*d.*	Barometers.
557	9*d.*	Grease boxes and bearings.
558	10*d.*	Weaving.
559	1*s.* 10*d.*	Steam engines for propelling ships and vessels.
560	6*d.*	Machinery for cutting and finishing the surfaces of woollen and other fabrics.
561	3*d.*	Manufacture of pipe stems, cigar stems, &c.
562	6*d.*	Coats.
563	3*d.*	Rotating window sashes.
564	3*d.*	Breech-loading fire-arms.
565	3*d.*	Machine for cutting or mincing meat, vegetables, &c.
566	7*d.*	Fire-arms.
567	3*d.*	Shuttles for looms.
568	3*d.*	Manufacture of soap.
569	3*d.*	Manufacture of paraffine candles.
570	6*d.*	Bit stocks or auger handles.
571	3*d.*	Apparatus for raising and lowering coffins, &c.
572	3*d.*	Discharging cargoes, &c.
573	7*d.*	Bayonets.
575	9*d.*	Spinning machinery.
579	1*s.*	Machine for cleaning fibrous materials.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).

Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Gotha—Ducal Friedeustein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.

The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 1st October, 1859.

Mornings - - - -	1266
Evenings - - - -	934
Total - - -	2200

Since the opening of the Museum Free Daily (May 12, 1858,)—147,145.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(Registered for transmission abroad.)

No. 601. FRIDAY, OCTOBER 7, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1739. To DEIDAMIA B. HALE, of the city and state of New York, in the United States of America, for the invention of "A new and useful garment for ladies wear, being a combined waist or body and a skirt supporter and bustle."—Partly a communication from Albert W. Hale, of New York aforesaid.

On his petition, recorded in the Office of the Commissioners on the 26th day of July, 1859.

2024. To JEAN BAPTISTE HENRI HONORÉ RAYMOND BARRE and JEAN BAPTIST MARIE ERNEST BARRE, of Paris, 27, Rue de Penthièvre, Merchants, for the invention of "Improvements in cutting out or engraving metals and their alloys."

On their petition, recorded in the Office of the Commissioners on the 5th day of September, 1859.

2058. To MATTHEW MURRAY JACKSON, of Zurich, in the Republic of Switzerland, Engineer, for the invention of "Improvements in generating steam for condensing engines."

On his petition, recorded in the Office of the Commissioners on the 9th day of September, 1859.

2086. To ERNEST AUGUSTE FREDERIC LEBOURGEOIS, of Suresnes, France, Mechanician, for the invention of "An improved machine for providing with pin points the blocks employed for surface printing on calico, paper, or other similar materials."

2088. And to ALEXANDER BANKIER FREELAND, of Camden Road Villas, in the county of Middlesex, for the invention of "Improvements in preparing hay and clover for food for horses and other animals."

On both their petitions, recorded in the Office of the Commissioners on the 13th day of September, 1859.

2092. To JOHN MARRITT, of Sutton, in the county of York, for the invention of "An improved double-action rotating harrow."

2094. To RICHARD CHRISTOPHER RAPIER, of Newcastle-upon-Tyne, in the county of Northumberland, Engineer, for the invention of "Improvements in the construction of steam boilers."

2096. To NATHAN DEFRIES, of No. 5, Fitzroy Square, in the county of Middlesex, Gas Engineer, for the invention of "Improvements in gas meters."

2098. And to AUGUSTUS APPLEGATH, of Dartford, in the county of Kent, Engineer, for the invention of "Improvements in machinery for printing and for cutting printed paper into sheets."

On their several petitions, recorded in the Office of the Commissioners on the 14th day of September, 1859.

2100. To JOSEPH ADDENBROOKE, of the city of London, Manufacturer, for the invention of "An apparatus for wrapping, folding, or packing up goods or parcels."

2102. To JOSEPH THOMAS WOOD, of the Strand, in the city of Westminster, Embosser and Publisher, for the invention of "Improvements in printing and embossing dies."

2104. And to JOHN PRETTY CLARKE, of King Street Mills, Leicester, for the invention of "Improvements in the manufacture of spools or reels for the winding on of cotton, linen, thread, silk, or other fibrous materials."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of September, 1859.

2106. To JAMES BOTTOMLEY, of North Bierley, near Bradford, in the county of York, Manufac-

turer, and ALEXANDER HENNAH MARTIN, of the same place, Mechanic, for the invention of "Improvements in means or apparatus employed in weaving."

2108. To BERNARD LAUTH, late of Pittsburg, Pennsylvania, but now of Manchester, in the county of Lancaster, Mechanician, for the invention of "Improvements in the manufacture of rails for railways."

2112. And to JOSEPH BECK, of the firm of Smith, Beck, and Beck, of Coleman Street, in the city of London, for the invention of "Improvements in stereoscopes."

On their several petitions, recorded in the Office of the Commissioners on the 16th day of September, 1859.

2114. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "Improvements in mechanical hammers."—A communication from abroad by Jean Schmerber, of Haut Rhin, in the empire of France.

2116. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for the invention of "An automaton bell for the prevention of collisions at sea."—A communication from abroad by Gallois Foucault, of St. Martin, in the empire of France.

2118. To JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, (Patent Agent), for the invention of "Improvements in cooling apparatus for liquids, especially beer."—A communication from abroad, by Jean Louis Baudelot, Paris, in the empire of France.

2120. And to JOHN JAMES KERR, of Twickenham, in the county of Middlesex, for the invention of "Improvements in the manufacture of cartridges containing shot."

On their several petitions, recorded in the Office of the Commissioners on the 17th day of September, 1859.

2124. To EDWARD HENRY TAYLOR, of Saltney, in the city of Chester, Wagon Builder, for the invention of "Improvements in the mode of securing the bolts in fish joint and other fastenings for rails on railways."

2126. To JOHN HAWKINS, of Lisle Street, London, in the county of Middlesex, and of Walsall, in the county of Stafford, Bit, Spur, and Stirrup Manufacturer, and CHARLES HAWKINS, of Walsall aforesaid, Manager of the Works of the said John Hawkins, for the invention of "Improvements in fly presses to be worked by steam, water, or other power."

2128. To ROBERT MCCALL, of the city of Dublin, Civil Engineer, for the invention of "Improvements in obtaining precipitates of copper, parts of which improvements are applicable to the production of yellow ochre."

2130. To THOMAS CHARLES EASTWOOD, of Bradford, in the county of York, Woolcomber, for the invention of "Improvements in means or apparatus for preparing and combing wool, cotton, and other fibres."

2134. To WILLIAM CLAR, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Certain improvements in electro-magnetic telegraphs."—A communication from abroad by Mr. Leverett Bradley, of Folsom City, in the county of Sacramento, and state of California, Doctor of Medicine.

2136. And to JOHN COURT, of Brompton Row, in the county of Middlesex, for the invention of "Improvements applicable to gas and other lamps and lights, and also gas stoves for effecting more complete combustion therein."

On their several petitions, recorded in the Office of the Commissioners on the 19th day of September, 1859.

2140. To WILLIAM MCILWRAITH, of Glasgow, in the county of Lanark, North Britain, Weaving Foreman, for the invention of "Improvements in weaving."

2142. And to ANDREW LAMB, of Southampton, in the county of Hants, Engineer, for the invention of "An improved method of heating the feed water for boilers."

On both their petitions, recorded in the Office of the Commissioners on the 20th day of September, 1859.

2155. To THOMAS FIELD, Stay Cleaner, of No. 5, Rose Gardens, Hammersmith, in the county of Middlesex, for the invention of "A new means and system for cleaning, ironing, pressing, and glazing women's stays, corsets, supporting bands, mens jackets, coats, trousers, and waistcoats, chintzs, laundry work (that is to say goods and articles generally washed by laundresses), window blinds and textile fabrics generally."

2157. And to JOHN DALES, of 11 and 12, Gresham House, Old Broad Street, in the city of London, for the invention of "Improvements in purifying sewage and other impure waters, and in separating therefrom materials suitable for use as manure and also the preparation of a substance to be employed for such purposes."

On both their petitions, recorded in the Office of the Commissioners on the 22nd day of September, 1859.

2159. To LÉON CASTELAIN, of No. 53, Newman Street, Oxford Street, and CHARLES FRÉDERIC VASSEROT, of No. 45, Essex Street, Strand, both in the county of Middlesex, for the invention of "A novel application of a plant to the manufacture of pulp for paper and millboard, and in the method of treating the same when so applied."

2161. And to CHARLES JAMES PARRY, of the firm of Parry and Briddon, of the city of Manchester, in the county of Lancaster, Shirt Front and Collar Manufacturers, for the invention of "Improvements in diamond shirt fronts."

On both their petitions, recorded in the Office of the Commissioners on the 23rd day of September, 1859.

2163. To JEAN JACQUES BOURCART, of Guebwiller, Haut Rhin, France, but now residing at Manchester, in the county of Lancaster, Spinner, for the invention of "Improvements in machinery or apparatus for opening, cleaning, carding, and drawing cotton and other fibrous materials."

2165. To ALPHONSE RENÉ LE MIRE NORMANDY, of No. 67, Judd Street, Brunswick Square, London, in the county of Middlesex, Analytical Che-

mist, for the invention of "Improvements in the application of steam for cooking food."

2167. To Charles Lambert, of Sunk Island, in the East Riding of the county of York, Farmer, for the invention of "Improvements in machines or apparatuses for cutting and pulping food for cattle and for other like purposes."

2169. To Thomas Robinson, of St. Helen's, Lancashire, Iron Founder, for the invention of "Improvements in steam hammers."

2171. To Joseph Tunnicliff Pope, of Burslem, in the county of Stafford, Potter, for the invention of "Improvements in the manufacture of marbles."

2173. And to Joseph Opie, of Tremar, in the county of Cornwall, Fuse Manufacturer, for the invention of "Improvements in instruments or apparatus for charging holes in blasting operations, parts of which are also applicable for like purposes."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of September, 1859.

2175. Robert William Sievier, of Upper Holloway, in the county of Middlesex, but now residing in the city of Hamburgh, for the invention of "Improvements in the means of creating a draught, so as to remove the gases which may be produced by combustion, or from places where gases may be generated where they may be detrimental to health."

2177. To David White, of 18, High Holborn, in the county of Middlesex, Gas Fitter and Engineer, for the invention of "Increasing the illuminating and heating powers of gases, and regulating the flow of gases, and improvement in the material for gas meters, and improvement in glass and cylinder holders."

2179. And to Joseph Villet-Collignon, Literary Man, and Louis George, Typographer, of Paris, 29, Boulevart St. Martin, in the empire of France, for the invention of "Improvements in the typography."

On their several petitions, recorded in the Office of the Commissioners on the 26th day of September, 1859.

2181. To William Airey, of Brighouse, in the county of York, and James Clayton, of Golcar, in the same county, for the invention of "Improvements in machinery or apparatus for preparing silk, wool, cotton, flax, or other fibrous substances for spinning."

2183. To Thomas Birtwell and Richard Marshall, both of Padiham, in the county of Lancaster, Farmers, for the invention of "An improved arrangement of apparatus to facilitate the putting on of boots to the feet."

2185. To John Spalding Parfitt, of Paris, 60, Boulevart de Strasbourg, Practical Engineer, for the invention of "An improved machine for heading bolts, rivets, screws, and other similar articles requiring to be headed whilst hot."

2187. And to Thomas Beards, of Stowe, in the county of Bucks, for the invention of "Improvements in ploughing and cultivating land by steam power, and in machinery used for such purposes."

On their several petitions, recorded in the Office of the Commissioners on the 27th day of September, 1859.

2189. To William Maltby, of De Crespigny Park, Camberwell, in the county of Surrey, Gentleman, for the invention of "An improved mode of producing starch-gum."

2191. To Edward Kenworthy Dutton, of Sale, in the county of Chester, Mechanical Draughtsman, for the invention of "Certain improvements in 'governors,' particularly adapted to steam engines."

2193. To Thomas Sutton, of St. Brelade, in the island of Jersey, Gentleman, for the invention of "Improvements in the construction of apparatus for taking photographic pictures, consisting of and entitled 'an improved panoramic lens for taking photographic pictures.'"

2195. To William Henry Phillips, of Nunhead, Peckham, in the county of Surrey, Engineer, for the invention of "Improvements in apparatus for generating and regulating heat, applicable to culinary and other purposes."

2197. To George Evans and Edward Huxley, both of No. 12, Old Cavendish Street, Cavendish Square, in the county of Middlesex, for the invention of "Improvements in the construction of hernial trusses and pads adapted to surgical purposes generally."

2199. To Manuel Leopold Jonas Lavater, of the Strand, in the county of Middlesex, India Rubber Manufacturer, for the invention of "Improvements in apparatus known as injection bottles, and in pneumatic discs used in apparatus for adhering to glass and other impermeable substances."

2201. And to David Stewart, of Newcastle-on-Tyne, in the county of Northumberland, and of Bombay, in the East Indies, Engineer, for the invention of "Improvements in presses used for pressing goods."

On their several petitions, recorded in the Office of the Commissioners on the 28th day of September, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

7th October, 1859.

866. Alexander Chaplin, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in steam boilers."—Dated 7th April, 1859.

876. William Campion, of the town and county of the town of Nottingham, Machine Builder, of the firm of W. W. Campion, of the said town, Machine Builders, for an invention of "Improvements in machinery for the manufacture of looped fabrics."—Dated 8th April, 1859.

877. Matthew Wheeldon, of No. 174, Liverpool Road, Burslem, in the county of Stafford, Glass Cutter, for an invention of "An improvement in looking glasses and mirrors."—Dated 8th April, 1859.

879. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "Improvements in the treatment of mineral phosphates of lime."—A communication from B. de Siebenthal, a person residing in Paris.—Dated 8th April, 1859.

881. William Hooper, of Mitcham, in the county of Surry, India Rubber Manufacturer, for an invention of "Improvements in insulating and protecting telegraphic conductors."—Dated 8th April, 1859.

882. William Hooper, of Mitcham, in the county of Surry, India Rubber Manufacturer, for an invention of "Improvement reworking or re-manufacturing compounds of india rubber and sulphur."—Dated 8th April, 1859.

888. Thomas Barnett, of Oldham, in the county of Lancaster, Henry Turner Sourbuts and William Loynd, of Hyde, in the county of Chester, Engineers, for an invention of "Improvements in steam engines."—Dated 9th April, 1859.

890. John Hawkins, of Lisle Street, London, in the county of Middlesex, and of Walsall, in the county of Stafford, Bit, Spur, and Stirrup Manufacturer, for an invention of "Certain improvements in the manufacture of stirrups, bits, spurs, buckles, and other such like articles connected with harness and saddlery."—Dated 9th April, 1859.

893. John Martin, of No. 4, Buckingham Street, Islington, in the county of Middlesex, Manufacturer, for an invention of "Improvements in the materials used in the manufacture of bonnet fronts and ruches."—Dated 9th April, 1859.

905. William Rowan, of the firm of John Rowan and Sons, of Belfast, in the county of Antrim, Engineers, for an invention of "Improvements in spinning flax, hemp, and other fibrous materials."—Dated 11th April, 1859.

906. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in candle moulds."—A communication from Auguste Godchaux, residing at Paris.—Dated 11th April, 1859.

907. William Southern Clark, of Aberdare, in the county of Glamorgan, Mining Engineer, for an invention of "Improved means of loading ships or vessels with coal and of separating or removing small coal therefrom."—Dated 11th April, 1859.

909. John Marland, of Southport, in the county of Lancaster, for an invention of "An improvement in the manufacture of cop tubes."—Dated 11th April, 1859.

912. Patrick Aitchison, Brass Founder, of Sheffield, in the county of York, for an invention of "Improvements in taps." — Dated 12th April, 1859.

918. Mathieu Castay, of Paris, in the empire of France, Clergyman, for an invention of "Improvements in metallic bridges."—Dated 12th April, 1859.

921. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in the preparation of red dyes."—A communication from abroad by Messieurs Renard Frères, of Lyons.—Dated 12th April, 1859.

922. Samuel Tatton, of Leek, in the county of Stafford, Silk Dyer, for an invention of "Improvements in preparing and treating silk, and improvements in dyeing silk."—Dated 12th April, 1859.

923. Richard Emery, of No. 6, King Street, St. James's Square, in the city of Westminster and county of Middlesex, Gentleman, for an invention of "Certain improvements in carriages for common roads."—Dated 13th April, 1859.

928. William Craft, of No. 12, Cambridge Road, Hammersmith, and Thomas Wilson, of Bradmore House, Chiswick, both in the county of Middlesex, for an invention of "Improvements in the manufacture of pinafores and bibs for children."—Dated 13th April, 1859.

929. Alfred Richard Johnson, of St. John's Wood, in the county of Middlesex, Gentleman, for an invention of "An instrument for damping, severing, and affixing postage and other like stamps."—Dated 13th April, 1859.

930. John Ambrose Coffey, of 4, Providence Row, Finsbury, in the county of Middlesex, Engineer, for an invention of "Improvements in apparatus for heating liquids."—Dated 13th April, 1859.

932. John Lee Stevens, of No. 1, Fish Street Hill, in the city of London, Civil Engineer, for an invention of "Improvements in the fire grates of locomotive marine and other furnaces."—Dated 13th April, 1859.

933. John Hughes, William Williams, and George Leyshon, of Brockmoor Works, Brierley Hill, Staffordshire, for an invention of "Improvements in the manufacture of tin and terne plates."—Dated 13th April, 1859.

946. Germain Abeillou, of Toulouse, a town of France, Joiner's Tool Manufacturer, for an invention of "An extensible arching plane."—Dated 15th April, 1859.

952. Henry Barrow, of Birmingham, in the county of Warwick, Sadler, for an invention of "A new or improved fastening for fastening trunks, boxes, and articles of dress, and for such other purposes as the same is or may be applicable to."—Dated 16th April, 1859.

956. William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "Improvements in apparatus for separating metals from their ores and other matters." — A communication from abroad by Henri François Toussaint, Chemist, and Louis Napoleon Langlois, Civil Engineer, both of Paris.—Dated 16th April, 1859.

967. Jozé Luis, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "An improved machine for raising water." — A communication from abroad by M. Dupré, of No. 10, Rue Mogador, Paris, in the empire of France.—Dated 18th April, 1859.

1045. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in the manufacture of nitric acid, and its application for the production of artificial nitrous or nitric salts."—A communication from abroad by Madame Lefebvre, of Paris, in the empire of France.—Dated 26th April, 1859.

1050. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in machinery or apparatus for combing wool and other fibrous substances."—A communication from abroad, by Cullen Whipple, of the city and county of Providence, in the state of Rhode Island, United States of America.—Dated 26th April, 1859.

1067. Robert Harrington, Watchmaker, of No. 3, Colonnade, Albany Road, in the parish of Camberwell, county of Surrey, for an invention of "Improvements in umbrellas and parasols."—Dated 28th April, 1859.

1120. Jacob Geoghegan Willans, of 2, Clarence Place, Belfast, for an invention of "Improvements in utilizing bog stuff or peat, when applied for treating metals and certain mineral and alkaline substances."—Dated 4th May, 1859.

1204. William Sparks Thomson, of New York, in the United States of America, but now of St. Martin's-le-Grand, London, Skirt Manufacturer, for an invention of "Improvements in the manufacture of hooped skirts."—Partly a communication from abroad by William Wilmot, of New York, in the United States of America.—Dated 13th May, 1859.

1270. Frederick Joseph Bramwell, of Great George Street, Westminster, in the county of Middlesex, for an invention of "Improvements in apparatus for raising ships and vessels out of the water."—Partly a communication from abroad by Messrs. Miers Brothers and Maylor, of Rio de Janeiro.—Dated 23rd May, 1859.

1297. Charles Edwards Amos, of the Grove, in the Borough of Southwark, Engineer, for an invention of "Improved apparatus for raising vessels for repair, and for floating vessels in shallow water."—Dated 25th May, 1859.

1318. Thomas Wilson, of Birmingham, in the county of Warwick, Engineer, for an invention of "Improvements in breech loading fire arms and ordnance."—Dated 28th May, 1859.

1412. William Sellers, of Philadelphia, in the state of Pennsylvania, one of the United States of America, Engineer and Machinist, for an invention of "Improvements in ovens for baking bread or other substances which improvements are also applicable for drying, annealing, and other analogous purposes."—Dated 10th June, 1859.

1552. George Baker, of Birmingham, in the county of Warwick, for an invention of "Improvements in the manufacture of metallic lattice or trellis work."—A communication from abroad by Owen Carraway, late of New York.—Dated 29th June, 1859.

1572. Edwin Archer Wood, of Victoria Terrace, Notting Hill, in the county of Middlesex, of the Peninsular and Oriental Steam Navigation Company, and Martin Dadd Rogers, of Bromley, in the county of Middlesex, Shipwright, for an invention of "Improved apparatus for raising and lowering boats."—Dated 1st July, 1859.

1592. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improvement in the process of and improved apparatus for separating metals from their ores."—A communication from abroad by Lewis Solomon, of New York, in the United States of America.—Dated 4th July, 1859.

1597. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improved apparatus for moving iron or other metals while the same is in process of manufacture at the rolls."—A communication from abroad by Charles Hewitt, of the city of Trenton, in the state of New Jersey, one of the United States of America.—Dated 5th July, 1859.

1843. John Dyer Bryant, of Rock, in the county of Cornwall, Merchant, for an invention of "Improved superphosphate of lime."—Dated 9th August, 1859.

1872. John Stuart, of Musselburgh, in the county of Mid Lothian, North Britain, and William Stuart, of the same place, Manufacturers, for an invention of "Improvements in nets for fishing and for other purposes."—Dated 13th August, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 5th October, 1859, inclusive.*)

26th September.

2266. William Smith, of Skinner Street, Snow Hill, in the city of London, and Nathaniel Fortescue Taylor, of Stratford, in the county of Essex, Gas Engineers, for an invention of "Improvements in apparatus for measuring gas and other fluids, and in regulating the flow of the same."—Dated 27th September, 1856.

4th October.

2389. George William Varnell, Assistant Professor, Royal Veterinary College, Camden Town, for an invention of "Improvements in mounting troughs, mangers, and apparatus used for feeding horses and other animals."—Dated 11th October. 1856.

5th October.

2352. Francis Whitehead, of Crayford, in the county of Kent, Draughtsman, for an invention of "A method of and apparatus for producing devices in or on wood, leather, and other similar surfaces, whether for ornamenting the same, or for the production of printing and embossing surfaces therefrom."—Dated 8th October, 1856.

2358. David Joy, of Leeds, in the county of York, Engineer, and William Holt, of the same place, Organ Builder, for an invention of "Improvements in hydraulic motive power engines, and the application thereof to certain useful purposes."—Dated 8th October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 5th October, 1859, inclusive.*)

1st October.

324. Thomas Restell, of the Strand, in the city of Westminster, Watchmaker, for an invention of "Certain improvements in chronometers, watches, and clocks, part of which improvements is applicable to roasting-jacks."— Dated 9th October, 1852.

3rd October.

234. John Balmforth, William Balmforth, and Thomas Balmforth, all of Clayton, in the county of Lancaster, Ironmasters, for an invention of "Improvements in steam-boilers, and in fixing the same."—Dated 5th October, 1852.

4th October.

280. William Bissell, of Wolverhampton, for an invention of "An improved cramp or improved cramps for cramping floors, doors, and joiners' and ship work generally."—Dated 7th October, 1852.

565. William Henry Fox Talbot, of Lacock Abbey, in the county of Wilts, Esquire, for an invention of "Improvements in the art of engraving."—Dated 29th October, 1852.

5th October.

330. Henry Moorhouse, of Dewton, in the county of Lancaster, Tailor, for an invention of "Improvements in machinery or apparatus for cleaning woollen, cotton, or linen rags and waste, which machinery or apparatus is applicable to cleaning and tempering clay or other similar purposes."—Dated 11th October, 1852.

400. Simon Pincoffs, of Manchester, in the county of Lancaster, Manufacturing Chemist, and Henry Edward Schunck, of Rochdale, in the county of Lancaster, Doctor of Philosophy, for an invention of "Improvements in the treatment of madder and other plants of the same species, and of their products for the purpose of obtaining dyeing materials."—Dated 15th October, 1852.

Erratum in Journal of 4th October.

No. 1314. For "Farrence" read "Farrance."

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February,* 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April,* 1626, *and* 23*rd July,* 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February,* 1620, *and* 2*nd May,* 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June,* 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated* 10*th January,* 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July,* 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated* 7*th August,* 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December,* 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machine by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*

The following are in the press:—

Electricity and Magnetism: their Generation and Applications.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 602. TUESDAY, OCTOBER 11, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1323. JOHN BAPTY, of Leeds, in the county of York, Foreman, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "An improved mode of, and apparatus for, manufacturing felted cloth."

As set forth in his petition, recorded in the said office on the 28th day of May, 1859.

1325. And ARCHIBALD SMITH, Engineer, of 69, Princes Street, Leicester Square, London, has given the like notice in respect of the invention of "Improvements in machinery for making lines, ropes, and cables for telegraphic and other purposes."

1326. And WESTON GRIMSHAW, of Bowdon, in the county of Chester, Gentleman, has given the like notice in respect of the invention of "Certain improvements in machinery for compressing bricks, tiles, artificial fuel, and other similar articles."

1330. And JAMES FRY, of Wrotham, Sevenoaks, in the county of Kent, Miller, has given the like notice in respect of the invention of "An improvement in mills for grinding."

As set forth in their respective petitions, all recorded in the said office on the 30th day of May, 1859.

1339. And WILLIAM SMITH, of Nos. 18 and 19, Salisbury Street, Adelphi, Civil Engineer, has given the like notice in respect of the invention of "Apparatus for raising and docking ships and other similar purposes."—A communication from abroad by Mr. John W. Nystron, a citizen of the United States of North America, at present residing in Russia.

1340. And JAMES SEPTIMUS COCKINGS, Civil Engineer, of Ann Street, Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "Certain improvements in the construction of self-adjusting cases for holding and carrying cartridges of various sizes or guages, parts of which improvements are also applicable to cartridge-carriers now in use."

1343. And JAMES WANSBROUGH, of Bridge Street, in the borough of Southwark, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of stereoscopes."—A communication from abroad by Egbert Moxham, of Bruges, in the kingdom of Belgium.

As set forth in their respective petitions, all recorded in the said office on the 31st day of May, 1859.

1349. And JEAN FELIX MIQUEL, of Paris, France, Physician, has given the like notice in respect of the invention of "Improvements in trusses."

As set forth in his petition, recorded in the said office on the 1st day of June, 1859.

1354. And SAMUEL WOOD and JOHN WOOD, both of the city of Manchester, Embroiderers, and PHILLIP BILLINGTON, of Rusholme, near the city of Manchester, Mechanic, have given the like notice in respect of the invention of "Certain improvements in, and applicable to, machines for embroidering."

As set forth in their petition, recorded in the said office on the 2nd day of June, 1859.

1366. And HERBERT NEWTON PENRICE, of Witton House, near Norwich, has given the like notice in respect of the invention of "Improvements in machinery for propelling vessels."

1370. And ALEXANDER ROBERTSON ARROTT, of Saint Helen's, in the county of Lancaster, Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture of soda."

1371. And James Burrow, of Ashford Parsonage, Bakewell, in the county of Derby, Clerk in Holy Orders, and William Newton Wilson, of 144, High Holborn, in the county of Middlesex, have given the like notice in respect of the invention of "An improved floor scrubber and sweeper for carpets, floors, lawns, and other such like useful purposes."

As set forth in their respective petitions, all recorded in the said office on the 3rd day of June, 1859.

1377. And George Davies, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "An improvement in wearing apparel."—A communication from abroad by Gabriel Jean Julien Laury, of Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 4th day of June, 1859.

1384. And Willoughby Green, of No. 2, Victoria Street, in the city of London, and of Leeds, in the county of York, has given the like notice in respect of the invention of "Improvements in mowing machines."

As set forth in his petition, recorded in the said office on the 6th day of June, 1859.

1385. And Charles Pooley, of the city of Manchester, Cotton Spinner, has given the like notice in respect of the invention of "Improvements in machinery for preparing to spin, and for spinning cotton and other fibrous materials."

1388. And William Bryer Nation, of Union Row, Union Bridge, Rotherhithe, London, Analytical Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture of superphosphate of lime."

As set forth in their respective petitions, both recorded in the said office on the 7th day of June, 1859.

1404. And Joseph Henry Tuck, of 34, Great George Street, Westminster, has given the like notice in respect of the invention of "Improvements in breakwaters, sea walls, and like structures."

1405. And Enos Wellsford, of Bona, Algeria, Proprietor, has given the like notice in respect of the invention of "Improvements in tanning."

As set forth in their respective petitions, both recorded in the said office on the 9th day of June, 1859.

1423. And Henry Lee Corlett, of Inchicore, in the county of Dublin, Engineer, has given the like notice in respect of the invention of "Improvements in rails, and the permanent way of railways, parts of such improvements being applicable to common roads."

As set forth in his petition, recorded in the said office on the 13th day of June, 1859.

1438. And Edward Humphrys, of Deptford, in the county of Kent, has given the like notice in respect of the invention of "Improvements in marine steam engines."

As set forth in his petition, recorded in the said office on the 15th day of June, 1859.

1445. And William Birkmyre, of Port Glasgow, in the county of Renfrew, North Britain, Manufacturer, has given the like notice in respect of the invention of "Improvements in drying, treating, and preparing yarns or thread."

1450. And Thomas Wharton Jones, of 35, George Street, Hanover Square, in the county of Middlesex, Esquire, has given the like notice in respect of the invention of "Stereoscopic glasses for single pictures."

1456. And Thomas Cattell, of 30, Euston Square, in the county of Middlesex, Doctor of Medicine, has given the like notice in respect of the invention of "Improvements in the manufacture of varnish and lacker."

As set forth in their respective petitions, all recorded in the said office on the 16th day of June, 1859.

1474. And William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "An improved method of supplying furnaces with hot air."—A communication from abroad by Messrs. Addison Calvin Fletcher, of Cincinnati, Ohio, and George Ambrose Redman, of New York City, Gentleman, United States of America.

As set forth in his petition, recorded in the said office on the 18th day of June, 1859.

1483. And Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved apparatus for blowing off water from steam boilers."—A communication from abroad by James Havey Washington, of Baltimore, in the United States of America.

As set forth in his petition, recorded in the said office on the 20th day of June, 1859.

1491. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improvement in tailors' and other shears."—A munication from abroad by James H. Roome, of New York, in the United States of America.

As set forth in his petition, recorded in the said office on the 21st day of June, 1859.

1551. And John Joseph Griffin, of 119 and 120, Bunhill Row, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in gas furnaces, suitable for fusing refractory metals."

As set forth in his petition, recorded in the said office on the 29th day of June, 1859.

1577. And Mark Bogg, of Duggleby, near Malton, in the county of York, Joiner, has given the like notice in respect of the invention of "Improvements in washing machines."

As set forth in his petition, recorded in the said office on the 1st day of July, 1859.

1773. And Perceval Moses Parsons, of Arthur Street West, London Bridge, has given the like notice in respect of the invention of "Improvements in switches and crossings of railways."

As set forth in his petition, recorded in the said office on the 30th day of July, 1859.

1847. And WALTER MACLELLAN, of Glasgow, in the county of Lanark, North Britain, Iron Merchant, has given the like notice in respect of the invention of "Improvements in parts of the permanent way of railways."—A communication from abroad by John Gregory, of Lisbon, in the kingdom of Portugal, Engineer.

As set forth in his petition, recorded in the said office on the 9th day of August, 1859.

1928. And WILLIAM HOLLINS, of Glossop, in the county of Derby, Overlooker, and FREDERICK HYDE, of the same place, Mechanic, have given the like notice in respect of the invention of "Improvements in power looms for weaving, part of which improvements is also applicable to other machines driven by power."

As set forth in their petition, recorded in the said office on the 23rd day of August, 1859.

1978. And JAMES COWGILL and JOHN STOCKS, both of Bradford, in the county of York, Mechanics, have given the like notice in respect of the invention of "Improvement in 'caps' for spinning fibrous substances, and in the means or method of manufacturing the same."

1981. And ROBERT BEVERLEY, of Leeds, in the county of York, Gas Meter Maker, has given the like notice in respect of the invention of "Improvements in wet gas meters."

As set forth in their respective petitions, both recorded in the said office on the 31st day of August, 1859.

2092. And JOHN MARRITT, of Sutton, in the county of York, has given the like notice in respect of the invention of "An improved double-action rotating harrow."

As set forth in his petition, recorded in the said office on the 14th day of September, 1859.

2106. And JAMES BOTTOMLEY, of North Bierley, near Bradford, in the county of York, Manufacturer, and ALEXANDER HENNAH MARTIN, of the same place, Mechanic, have given the like notice in respect of the invention of "Improvements in means or apparatus employed in weaving."

As set forth in their petition, recorded in the said office on the 16th day of September, 1859.

2129. And JAMES WRIGHT, of 42, Bridge Street, Blackfriars, city of London, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the construction of carriages, coaches, omnibuses, and other such like conveyances."—A communication from abroad by Rene Sauvage De Saint Marc, of Lyons, in the empire of France.

As set forth in his petition, recorded in the said office on the 19th day of September, 1859.

2140. And WILLIAM MCILWRAITH, of Glasgow, in the county of Lanark, North Britain, Weaving Foreman, has given the like notice in respect of the invention of "Improvements in weaving."

As set forth in his petition, recorded in the said office on the 20th day of September, 1859.

2193. And THOMAS SUTTON, of St. Brelade, in the island of Jersey, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of apparatus for taking photographic pictures, consisting of and entitled 'An improved panoramic lens for taking photographic pictures.'"

As set forth in his petition, recorded in the said office on the 28th day of September, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 7th October*, 1859, *inclusive.*)

8th October.

2380. WILLIAM RENNIE, the younger, of Lagan Foundry, Belfast, in the kingdom of Ireland, Engineer, for an invention of "Improvements in the condensing apparatus of steam-engines."—Dated 10th October, 1856.

8th October.

2364. THOMAS KING, of Spitalfields, in the county of Middlesex, Surveyor, for an invention of "An improved continuous compressing machine."—Dated 9th October, 1856.

2371. LEWIS JACOB JORDAN, of Berner Street, in the county of Middlesex, Gentleman, for an invention of "A medicine for the cure of venereal affections."—Dated 9th October, 1856.

2414. GEORGE COLLIER, of Halifax, in the county of York, Engineer, for an invention of "Improvements in the manufacture of piled fabrics."—Dated 16th October, 1856.

2446. JACQUES FELIX DESHAYES, of Paris, in the empire of France, Dyer, for an invention of "Improvements in machinery for dyeing silk, cotton, or wool, in hanks or skeins, or woven fabrics."—Dated 18th October, 1856.

2456. JOSEPH LACASSAGNE, Chemist, and RODOLPHE THIERS, Manufacturer, both of Lyons, in the empire of France, for an invention of "An improved electric lamp."—Dated 20th October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 8th October, 1859, inclusive.*)

6th October.

282. JOHN BLAIR, of Ducie Bridge Mill, Manchester, in the county of Lancaster, for an invention of "Certain improvements in the manufacture of waddings, and in the machinery for making the same."—Dated 7th October, 1852.

292. SAMUEL RAINBIRD, of Norwich, in the county of Norfolk, Builder, for an invention of "Improvements in grappling and raising sunken vessels and other submerged bodies, and in apparatus for that purpose."—Dated 7th October, 1852.

413. CHARLES TIOT JUDKINS, of Britannia Works, Manchester, in the county of Lancaster, for an invention of "Improvements in machinery or apparatus for sewing or stitching."—Dated 16th October, 1852.

448. JAMES OTAMS, of 2, Horton Villas, Camden Road, Holloway, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture of manure."—Dated 19th October, 1852.

7th October.

324. THOMAS RESTELL, of the Strand, in the city of Westminster, Watchmaker, for an invention of "Certain improvements in chronometers, watches, and clocks, part of which improvements is applicable to roasting-jacks." — Dated 9th October, 1852.

8th October.

545. CHARLES BENJAMIN NORMAND, of Havre, in the Republic of France, Ship Builder, for an invention of "Improvements in machinery for sawing wood."—Dated 27th October, 1852.

Erratum in Journal of 7th October.

No. 2126. For "Improvements" read "Certain improvements."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 20th September, 1859, and each bearing that date.

No. 25,476. LEMUEL ALLEN, of Pekin, Ill., for an "Improved planetarium."

"What I claim as my invention in the construction of planteriums is the representation of the planets and their orbits, suspended on a diametric rod, and capable of rotating on said rod within a broad belt, which represents the zodiac, substantially as set forth. I also claim the arrangement of devices, by which the earth may be adjusted to represent its relative position to the sun and to the plane of its orbit, at any point thereof, in the manner and for the purpose set forth."

No. 25,477. ASTLEY C. ANCONA, of Reading, Pa., for an "Improvement in slide valves for steam engines."

"I claim the corrugated valve seat, in combination with the cavities *c*, *c*, *c*, *c*, in the face of the valve, substantially the same as and for the purposes herein set forth."

No. 25,478. P. J. AUKNEY and DANIEL MCGREEVY, of New Lexington, O., for an "Improvement in grain separators."

"We claim, first, the oscillating hopper or trough *b*, as constructed, in combination with the revolving screen *c*, as constructed, operating jointly as described, for the purpose set forth. Second, we claim the combination of the screen *c* and trough and hopper *b* with the adjustable hopper or spout *h*, and the spout *j* with gauge j^1, cut-off *k*, and valve k^1, the whole operating as described, and for the purpose set forth."

No. 25,479. WM. R. AXE, of Beloit, Wis., for an "Improvement in mortising machines."

"I claim the gage plate R^1, and slides *x*, *x*, in combination with the reciprocating table W, and adjustable table W^1, arranged in the manner and for the purposes represented and specified."

No. 25,480. HORACE BERTOLET, of Reading, Pa., for an "Improvement in steam engines."

"I claim the peculiar arrangement of the bar I, I, in the slotted valve stem, and the connection of the arms R, R, with the cylinder cocks C, C."

No. 25,481. JONATHAN BIGELOW, of Brighton, Mass., for a "Changeable stencil."

"I claim the character plate formed at its ends, as described, for the purpose specified, whether the same be swaged at one edge or not. Also, the stencil formed by the combination of said character plates, and a frame or frames or clamps, as described."

No. 25,482. PETER S. BISHOP, of Springfield, R.I., for an "Improvement in manufacture of thimbles."

"I claim the new article of manufacture herein described, namely, a thimble made from plated or overlaid metal, either in the common form with fluted sides, or with sides in the form of a regular geometrical figure, the whole article being substantially such as specified."

No. 25,483. Alpheus Bissell, of Berlin, Wis., for an "Improved washing machine."

"I claim the arrangement of the false bottom C, cords (*a*, *a*), pulleys *x*, *x*, platform D, and cam chuck E, with the frame F, provided with corrugated rubbers H, H, with rollers *m*, *m*, and with levers I, I, said frame being operated by means of cranks J, J, the whole bing combined and used substantially as and for the purpose specified."

No. 25,484. J. L. Booth, of Cuyahoga Falls, O., for an "Improvement in grain separators."

"I claim the inclined zig-zag screens and boxes B, C, and troughs E, having a shake motion given them, and used in connection with the revolving fan G, and spout H, the parts being arranged relatively with each other, to operate as and for the purpose set forth."

No. 25,485. J. H. Boyd, of Baltimore, Md., for an "Improvement in spring saddle trees."

"I claim the employment of the double head or gullet plates C and D, when the front head or gullet D, is connected to the body of the tree by means of springs E, E, in such manner, that when the straining web is attached to said head, and to the back of the tree, a spring seat will be formed substantially as set forth."

No. 25,486. Saml. W. Brown, of Lowell, Mass., for an "Improved steam-pressure indicator or alarm."

"I claim the arrangement and combination of cylinder A, rod F and C, tube G, and valve H, with each other, in the manner described, for indicating or giving the alarm with steam from the same or contiguous chamber, essentially in the manner and for the purposes fully set forth.

No. 25,487. Morgan Chittenden, of Danbury, Conn., for an "Improved sash fastener."

"I claim the combination of a T-shaped wedge C, with a bolt case B, having an opening corresponding thereto, whereby the two sashes are uniformly and closely secured together, substantially in the manner and for the purpose described."

No. 25,488. M. H. Clark, of Danville, Va., for an "Improvement in hydraulic presses."

"I claim, 1st, the arrangement of the water reservoir D^1, force pump or pumps E, main supply pipe F, branches G, G, stop cocks H, and a series of hydraulic presses A, B, C, for united operation, substantially as and for the purposes set forth. 2nd, arranging a leather packing ring on a disc, which is divided radially into a series of parts, and fitted loosely on a conical extension of the piston, and held in contact with said extension by means of an undivided disc, which is suspended loosely so as to have vertical play on a screw or headed pin of the piston, substantially as and for the purposes set forth."

No. 25,489. Richardson P. Clark, of Johnstown, Pa., for an "Improved apple-parer."

"I claim the combination and arrangement of the paring knife A, lever *g*, N, M, spring R, cord L, clutch drum K, and spring V, with shaft C, band *g*, and pulleys H and J, and wheels D and E, and apple fork B, substantially as and for the purposes herein described."

No. 25,490. V. P. Corbett, of Washington, D. C., for an "Improvement in stoppers for preserve cans."

"I claim the arrangement of the plate *m*, screw *p*, conical nut *b*, and disc A, composed of two or more sections (*a*), when the same are used in connection with an elastic band or rim *h*, when the whole is adapted to be used as a stopper for preserve cans, substantially as specified."

No. 25,491. Geo. B. Cornish, of New York, N.Y., for an "Improved apparatus for reefing sails."

"I claim constructing the slip bands G, G, in one piece with four flanges *a*, *a*, a^1, a^1, the spaces between *a*, *a*, and a^1, a^1, serving as slip bands and the central space between flanges a^1, a^1, serving as a band on which the reef-pennant J is wound, said flanges serving to prevent any lateral movement of the yard, and also to prevent the reef-pennant from coming into contact with, and being injured by the quarter bands H, all as herein shown and described."

No. 25,492. Riley Doty, of Cardington, O., for an "Improved device for steadying logs in saw-mills."

"I claim the employment of the adjustable frames F, F^1, provided with journal bearings *n*, *n*, and with rollers *a*, *a*, the same being operated in one direction by means of the head and tail blocks, and in the opposite direction by means of a cord and a weight, one of said frames being stationed as described by a spring H, provided with a shoulder *c*, and an inclined plane *x*, the whole being arranged, substantially as and for the purpose specified."

No. 25,493. John L. Drake, of Cincinnati, O., for an "Improvement in lamps."

"I claim the employment or use of the disk E, applied to the wick tube B, and used in connection with the cap C, arranged relatively with it, for the purpose set forth."

No. 25,494. Eugene Duchamp, of St. Martinsville, La., for an "Improvement in derricks."

"What I claim, is, the combination of the toggle and right and left screw boom H, when the latter has its fulcrum movable, as above shown, with the pulleys J, J, L, N, and P, when the same are arranged essentially in the manner and for the purposes herein above represented and described."

No. 25,495. Oliver T. Eddy, of Philadelphia, Pa., for an "Improvement in coffee pots."

"I claim the annular cone-shaped deflecting plate E, resting on the bottom of the pot, and arranged in respect to the tube F, and perforated plate G, substantially as set forth and for the purpose specified."

No. 25,496. Moses G. Farmer, of Salem, Mass., for an "Improved electro-magnetic steam boile[r] gauge."

"I claim the combination of an indicator, an electric circuit or circuits, one or more circuit breakers, or rheortates with a float, in any manner substantially as herein described."

No. 25,497. L. R. Faught, of Atlanta, Geo., for an "Improvement in horse-power machines."

"I claim the arrangement and combination of a stationary geared rim A, movable rim E, supporting bar D, fitted in the pinions C, C, the shafts G, G, provided with pinions F, F, and wheels H, H, and the shaft F^1, substantially as and for the purpose set forth."

No. 25,498. Geo. Finn, of Oswego, N.Y., for an "Improved method of operating crozing knives."

"I claim arranging the cam *c*, that works the cutter on the bevel wheel O, so that it will not occupy more space on the arm that carries them, than that occupied by said bevel wheel, for the purpose of simplifying the mechanism, and economizing space on said arm, which is necessarily limited in length, as herein represented and shown."

No. 25,499. Eli Wheeler, of Elmira, N. Y., for an "Improvement in railroad car seats."

"I claim, 1st, the arrangement of box-formed supports *c*, *c*, cushioned seat bottoms C^2, C^2, and cushioned seat backs D, D, of a pair of car seats, in the manner herein specified, whereby, when the bottoms of the seats are turned over to fill up the space between the seats, the bed clothing contained in the box will be exposed so as to be readily removed, and then, when the backs are turned down to fill the place occupied by the bottoms, the said boxes will be closed up, and a continuous bed formed from one back edge to the other of the seat, as and for the purpose set forth. 2nd, the short open stationary partitions B, B, in combination with sliding panels *b*, *b*, which, when elevated, serve as head and foot boards, and allow ventilation under and above the berth during night time, and when lowered during day time, afford more room to the upper portion of the body of passengers, as they pass through the aisle of the car, substantially as set forth. 3rd, the short sliding closed blinds C, C, arranged to operate as described, and serve as foot and head boards, and allowing ventilation above and below the upper berth, in combination with the upper berths E, and partitions *c*, *c*, substantially as set forth."

No. 25,500. John Fretz, of Angel, Cal., for an "Improved furnace and apparatus for treating pyritous ores."

"I claim, first, the hollow stationary cylinder F, its revolving worm and its openings, for the admission of the pyrites and the introduction of air and discharge of the fumes of sulphur, in combination with the rotating cylinder

C, and its internal ribs, the said stationary and rotating cylinders communicating with each other through a pipe *k*, and the whole being arranged in respect to the furnace A, substantially as and for the purpose set forth. Secondly, the system of vertical boxes or chambers J, K, and L, communicating with each other, with the steam pipes k^1, the rotating cylinders C, and the exit pipe M, and arranged substantially as set forth and for the purpose specified."

No. 25,501. Richd. Garsed and Clayton Denn, of Philadelphia, for an "Improvement in machinery for warping yarn."

"We claim, 1st, the form of the drop wires, as in Fig. 14, arranged in the manner and for the purpose specified. 2nd, the cylinder 20, for the purpose of marking the cuts, operated substantially as above described. 3rd, the employment of a register, constructed substantially as above specified, for the purpose of registering the number of cuts, while the machine is in motion. 4th, the employment of the bar A, for the purpose of taking the leas constructed with fingers, either on one or both sides, as above described. 5th, the combination of the vibrating tube V, the stationary hook 52, the movable hook 55, and the pin 57, for the purpose of forming the yarn into links, constructed and operated in the manner substantially as above described."

No. 25,502. Saml. Gissinger, of Alleghany, Pa., for an "Improved churn."

"I claim the arrangement in the movable frame (*e*) of the oscillating churns (*i*) furnished with dashers (*m*) and wings (*h*), in combination with the revolving shaft (*f*) armed with wings (*g*), the whole being arranged and combined as herein described and represented, and for the purpose set forth."

No. 25,503. Eugene Grenet, jr., of Paris, France, for an "Improved galvanic battery."

"I claim, 1, the method of agitating the exciting liquid of a galvanic battery by forcing a current of air through it, in the manner and for the purposes, substantially as set forth. 2nd, arranging and constructing the zinc and charcoal elements in combination with the exciting fluid, substantially in the manner herein described, whereby they may be operated the one by the other, substantially as set forth. 3rd, forming the charcoal elements by pressing into or on to the surface of plates of lead, when yet in a semi-liquid state, small pieces of charcoal, in the manner substantially as described."

No. 25,504. Collins W. Griffith, of Dayton, O., for an "Improved gauge and box for casting journals in soft metals."

"In combination with a hollow box, I claim a loose removable gauge or centering plate, fitted and fastened to or held against the box so as to hold the shaft in its proper position in the box and at the same time retain or prevent the melted metal that is poured into the hollow box to form a box around the shaft from running out."

No. 25,505. Valentine Hall, of New York, N. Y., for an "Improvement in apparatus for cooling liquids."

"I claim the employment or use of one or more receivers A, B, placed within a tank F, and connected with the barrel or cask H, by means of a syphon I and with a pump E within or at the outer side of the tank, for the purpose set forth. I further claim combining a pump E with one or more receivers A, B, connected together and made to communicate with each other by syphons C, D, when said parts are submerged within a tank F and made to communicate with a cask or barrel H by means of a syphon I extending over the top of the tank, substantially as and for the purpose set forth."

No. 25,506. Halvor Halvorson, of Cambridge, Mass., for an "Improvement in lamps."

"I claim, 1st, the employment or use of the valve C in connection with the wick tubes B, B, for the purpose of regulating the supply of air to the interior of or between two planes of the wicks *g*, *g*. 2d, the arrangement of the shafts *e*, *f*, and their wheels e^1 so that the wheels e^1 on one shaft may gear into those on the other for the purpose of raising and lowering the wicks simultaneously by the turning of one shaft *f*."

No. 25,507. Riley Haskell, of Painesville, O., for "Trolling bait for catching fish."

"1st, I claim constructing the body of an artificial representation of a natural fish in two detached parts, to be used in combination, one portion thereof revolving and the other remaining fixed or stationary, both portions being on one shaft, as herein particularly described, and for the purpose set forth. 2nd, I claim, in connection with my first claim, filling the upper part of said fixed portion with a light substance, and weighting the lower part thereof for the purpose of keeping the said fixed portion vertical in the water, as described."

No. 25,508. Rochus Heinisch, of Newark, N. J., for an "Improvement in tailors' shears."

"I claim constructing the lower bow with its upper portion widened, and with the projection *p* thereon, so as to form a bearing for the forefinger within the bow, substantially as and for the purpose set forth."

No. 25,509. W. M. Hurlbert, of Northfield, Vt., for an "Improved variable exhaust for steam engines."

"I claim, applying the slides to operate in elbows or inverted L-shaped nozles, arranged substantially as herein described."

No. 25,510. Edwd. T. Jenkins and Frank B. Polley, of Williamsburgh, N. Y., for an "Improved steam trap."

"We claim the round pipe B, in combinatiou with the valve seat J, valve *a*, ring *c*, opening K, and float D, when arranged and operated in the manner described and for the purpose specified."

No. 25,511. Christian Kieffer, of Lancaster, Pa., for an "Improvement in boilers."

"I claim, the construction of the extension and perforated steam pipe C, with the extension hot-air flue B, the pan H, with pipes *i*, *i*, and perforated pipe K, arranged and combined substantially as herein described and for the purposes set forth."

No. 25,512. Josiah Kirby, of Cincinnati, O., for an "Improved bung-hole borer and reamer."

"I claim, the conical-shaped stock when made with a throat cut through from the edge of the bit on one side to the opposite side of the stock, so that the shavings are made to pass through the stock and out on the opposite side substantially as described. I also claim the combination of the auger bit C with reamer, when made in the manner and for the purpose substantially described."

No. 25,513. Levi L. Lancaster, of Rocky Mount, N. C., for an "Improvement in seed planters."

"I claim the frame *e*, wheels *c*, *c*, hopper *m*, cylinder *b*, pockets or depressions *r*, conveying tube D, furrow opener F, *u*, coulter Z, leveler H, H, and bottom I, I, the whole being arranged for operation conjointly as and for the purposes herein described."

No. 25,514. Lewis W. Leeds and Calvert Vaux, of New York, N.Y., for an "Improved thermometric regulator for heating apparatus."

"What we claim, is, so applying the vessel which we have termed the secondary heater containing the fluid to act upon the piston or its equivalent, in combination with the primary heater, and so applying the piston or its equivalent in combination with said secondary heater and with the regulating valve as herein described, that the secondary heater is exposed at the same time to the heating influence of the primary heater, and the cooling influence of the incoming cold air, and the fluid contained therein is by its expansion and contraction made to control the admission of the steam or other heating agent, and cause the supply of such agent to the heater to vary inversely with variations in the atmospheric temperature as herein set forth."

No. 25,515. Julius S. Lloyd, of Philadelphia, Pa., for an "Improved approach opening gate."

"I claim operating the angular bar D, by means of the carriage I, with its pulleys J and J^1, and guard L, in combination with the projecting arm f^1 of the rod F, and the cranked and weighted rods N and N^1 and their respective cords or chains, the whole being arranged for joint action as and for the purpose herein set forth."

No. 25,516. Geo. Lutz, of Logan, O., for an "Improved water indicator for steam boilers."

"I claim, first, operating auricular and visual alarms either severally or jointly at will by mechanism such as is herein described for the purpose set forth. Second, the combined index and tripping levers *e*, e^1, arranged substantially in the manner and for the purpose set forth. Third, the combina-

tion of the tripping levers c, c^1, balance lever K, and bifurcated rocking lever J, substantially as and for the purpose described. Fourth, the combination of the catch d, and dogs j, j^1, when arranged and operated substantially as and for the purpose set forth. Fifth, the combination of the bent lever D, thumb-screw d^1, and slotted bracket L, substantially as and for the purpose described."

No. 25,517. Augustus Miller, of Grafton, O., for an "Improved method of making soap."

"What I claim as my improvement, is a soap manufactured from the herein-named ingredients and chemicals, when the same are compounded substantially in the manner and for the purpose specified."

No. 25,518. G. J. Mix, of Wallingford, Conn., for an "Improved manufacture of iron spoons."

"I claim, 1st, the method substantially as herein described of making the handles of iron spoons. 2nd, forming a tongue D^1 upon the bowl blank, and a corresponding recess or inlet D upon the handles, or vice versa, substantially as and for the purposes herein set forth."

No. 25,519. Geo. G. Noyes, of Worcester, Mass.' for an "Improved carpet fastener."

"I claim the bar A, provided with the hooks B, knife edge a, and spurs d, substantially as shown, so that it may be readily secured to and detached from the base board and floor, for the purpose set forth."

No. 25,520. Wm. A. Nugent, of Susquehannah Depôt, Pa., for an "Improvement in rail road chairs."

"I claim the shell or body a, with the cam jaws b, b, and the chair, substantially as arranged, and for the purpose above specified."

No. 25,521. John K. O'Neil, of Kingston, N. Y., for an "Improved horizontal water wheel."

"I claim the arrangement of the guide partitions b, b, g, g, cylinders B, E, wheels C, D, and wheel or buckets f, f, in the manner and for the purposes substantially as herein specified."

No. 25,522. Thos. S. Page, of Milan, O., for an "Improvement in composition for tanning."

"What I claim is a liquor composed of terra japonica, sulphate of alumina, and potassa, muriate of soda, nitrate of potash, and sulphate of soda, when combined in the proportions and for the purpose herein described."

No. 25,523. Collin G. Pollock, of Cincinnati, O., for an "Improved boring and mortising machine."

"I claim the arrangement and combination of the bar o on the arbor F, projection p on the upright A, lever K, connected with the arbor F by the knuckle joint M, and the bevel gear G, H, for joint operation, substantially as set forth."

No. 25,524. Chas. Potter, jr., and C. B. Cottrell, of Westerly, R. I., for an "Improvement in feeding paper to and from printing presses."

"We claim the securing of the registering points I firmly to a fixed portion of the machine, and releasing the paper therefrom at the proper time by elevating the adjacent surface J, J, as herein set forth. We also claim depositing each sheet face upwards on the pile, by carrying it between vibrating series of tapes R, S, operated substantially in the manner herein set forth. We likewise also claim the arrangement of the cylinders n, n^1, p, p^1, and the series of tapes R, S, or their respective equivalents, in the vibrating frame P, which vibrates on the shaft N, as a center, and receives its proper vibratory motion from the hook w, or its equivalent, whereby the frame P may be readily unhooked, and swung out of the way, to allow access to the bed of the press, without deranging or disturbing any of the mechanism."

No. 25,525. Wm. H. Racey, of New York, N. Y., for an "Improvement in burners for vapor lamps."

"What I claim is the burner F and curved rods G, G, one or more in combination with one or more deflecting caps D, E, and draught tube C, arranged for joint operation substantially as and for the purpose set forth."

No. 25,526. Peter Reynard, of New York, and Victor Varin, of Brooklyn, N. Y., for an "Improved insect powder blower."

"We claim the divisions c, c, in the powder chamber to ensure the powder being in a position to be acted on by the air blown through the perforated diaphragm d, as and for the purposes set forth. And in combination with said powder chamber, constructed as aforesaid, we claim the india rubber perforated ball, fitting and acting as specified, to give the blast of air."

No. 25,527. Joshua Rollman, of Sinking Springs, Pa., for an "Improvement in threshing machines."

"I claim the application to a threshing machine of one or more independent fan blowers, which are attached outside of the machine, and in such positions as to prevent any dust arising from the operation of threshing from reaching the attendant on the machine when arranged and operated substantially in the manner herein described."

No. 25,528. Gelston Sanford, of Poughkeepsie, N. Y., for an "Improvement in horse-power machines."

"I claim, 1st, the combination of the internal toothed wheels C and F, and their connected pinions, with the hollow standard B, when arranged in the manner and for the purpose set forth. 2nd, the combination of the hollow standard B with the shaft K, and its connected gearing I and J, in the manner and for the purpose described. 3rd, the combination of the adjustable bearing or frame M with the hollow standard B and shaft K, as and for the purpose set forth."

No. 25,529. Nathan Sargent, of Charlestown, Mass., for "Improved tops for tables."

"I claim as an improved article of manufacture a panoramic table or table top, the same being constructed and operated in manner and for the purpose specified. I also claim the peculiar mechanism herein described, whereby the canvas or panoramic cloth is maintained with proper tension upon each of the rollers, however such cloth may vary in thickness or in number of folds upon such rollers."

No. 25,530. Caspar Schultze and J. Frederick Schroeder, of Covington, Ky., for an "Improvement in straw cutters."

"We claim a cutting box constructed as before shown and specified, that is, with adjustable compound knife-wheel H, in combination with feeding chute C, when these several parts are constructed and arranged for operation conjointly as and for the purposes described."

No. 25,531. Wm. W. Shipman, of New Haven, Conn., for an "Improvement in machines for making sewing-machine needles."

"I claim the feeding plier, formed by the lever F and block D, in combination with the punching die P^2, and die P^3, and 2^1, 3^1, Fig. 8, the cutter N, and clamp formed by J, J, and I, I, Fig. 5, the whole in combination as set forth in Figs. 1 and 2, and operated in the manner and for the purposes herein-before specified."

No. 25,532. Geo. B. Simpson, of Washington, D.C., for an "Improved electrical heating apparatus."

"I claim the insulation of the metallic coil or helical electrode, which I call an electro heater, and the successful generation of heat, by passing currents of electricity over a coil or coils of platina, or other metallic wire, resting on and supported by a non-conducting electrical base, or encased in metallic tubes or open vessels insulated with any of the well-known substances non-conducting of electricity, all of which is in conformity with the specifications of my caveat, filed in the Patent Office on the 16th day of December, 1857, as herein-before described."

No. 25,533. John Joseph Charles Smith, of Covington, Ky., for a "Mode of constructing matrices, &c."

"I claim the discovery of rendering a composition or alloy of copper and tin pliable, and in such a state as to admit of an easy impression of any figure or design on or in metal, whether engraved or produced by means of electrotyping, as a copy of any figure, design, or object, thus yielding a perfect matrix or mould; and this process I further claim as my invention in connection with the manufacturing of types of the 'alloy' of copper and tin, and as already aforesaid described, and which will and shall produce the intended effect."

No. 25,534. Chas. Stearns, of Lowell, Mass., for an "Improvement in making lightning conductors."

"I claim the twisting rollers, constructed as described, in combination with the corrugating rollers, for producing the corrugated twisted copper rod."

No. 25,535. Theodore J. Steffe, of Lancaster, Pa., for an "Improvement in horse-rakes."

"I claim the arrangement and combination of the teeth-heads E, key N, spiral spring attachment F, lifters B, B, lever G, H, cleaners *c*, C, when these several parts have made their centre of motion on the axle of the machine. Also, in combination with the above the foot brace K, L, hinged at I, I, slide M, and slot O, substantially as and for the purpose herein specified."

No. 23,536. Geo. Strause, of Boonsboro', Md., for an "Improvement in hominy mills."

"What I claim, is, giving to the shaft D substantially the shape represented in the accompanying drawings when the said shaft is armed with toothed segments, and is operated within a tube, which is also armed with counteracting segments, substantially in the manner herein set forth."

No. 25,537. David H. Van Duzer, of Sugar Loaf, N. Y., for an "Improvement in bridges."

"I claim, in combination with the blocks, E, F, G, H, I, rods B, B^1, blocks C, C^1, and bolts D, D^1, arranged as shown, the arrangement of the plates L, all substantially as and for the purposes herein shown and described."

No. 25,538. Saml. Walker, of Roxbury, Mass., for an "Improvement in the take up for trimming looms."

"I claim giving to the take up roll of a trimming loom, a reciprocating motion longitudinally on its axis, for the purpose specified."

No. 25,540. Chas. Fontayne, of Cincinnati, O., for "A photographic printing machine."

"I claim, first, the above-described machine for printing or multiplying photographic pictures. Second, the above described art of multiplying positive photographic pictures, or expressions, from the same negative, upon the same sheet of sensitive paper, or other material. Third, causing the sensitive material used for the reception of photographic impressions latent, or otherwise, made by the agency of solar or other light passing through a negative to traverse the aperture, or negative employed. Fourth, the traversing bed, whether cylindrical or plane, confined within a dark chamber, whose surface may be moved by ratchets, screws, cranks, or their equivalents, for the purpose of carrying the sensitive material when the same is used in connection with a negative, from which it receives positive impressions, substantially as described. Fifth, the employment of continuous sliding or revolving disks (with springs and spring stops, or their equivalents, to give them a uniform motion, and overcome the momentum or rebound) for admitting and shutting off light, uniformly to and from all parts of the surface to be acted upon, in printing positive photographic pictures from a negative, substantially as described. Sixth, the application of a lens, or lenses, for the purpose of condensing light, when used in combination with negative 28, the sensitive material and slide, or cut-off, for admitting and shutting off light, for the purpose of photographic printing. Seventh, the combination of condensing lens 33, negative 34, daguerreotype tube 75, with its lenses 76, the sensitive material and slide, or cut-off for photographic printing, substantially as described. Eighth, the combination of the sensitive material, negative 28, (as distinguished from negative 34,) and slide or cut-off, for the purpose of photographic printing. Ninth, the method of raising the glass negative, or other matrix, 28, from the sensitive material, to permit the motion of the latter, and the method of lowering it again, substantially as described. Tenth, the method of supporting and adjusting negative 28, substantially as described. Eleventh, the use of the glass negative (when negative 28 is used), or the use of a piece of plain glass in the place of it, (when negative 34 is used, or the use of a skeleton frame, for the purpose of pressing the sensitive material smoothly and evenly on roller 5, or the traversing bed, while the photographic impression is being made. Twelfth, the alternate admission and exclusion of light passing through a negative, to act upon a traversing sensitive material, confined in a portable dark chamber, substantially as described. Thirteenth, the rod 8, working through hollow slotted shaft 6, and affixed to roller 5, by plate 9, for the purpose described. Fourteenth, the combination of the lever 12, with its spring catch 13, with the ratchet wheel 14, nose 82 of shield 14, and slotted stop 11, substantially as and for the purposes described."

No. 25,541. Henry Whittington, of Philadelphia, Pa., for an "Improvement in cut-off gear for steam engines."

"I claim the inclined spiral edges *x*, *x*, on the revolving and sliding sleeve B, when the latter is applied to operate the cut-off valve G, the descent of which is caused by the pressure of steam above the valve, and when the inclined edges serve to retard the descent of the valve, as herein set rorth."

No. 25,542. Asbury Wilkinson, of Madison, Ind., for an "Improved washing machine."

"I claim the combination of circular boards B and C, suspended from a frame above by springs *b*, *b*, *b*, &c., with a rotary corrugated roller, Fig. 4, working between them, all constructed and operated substantially as set forth in the foregoing specification."

No. 25,543. Jeptha Avery Wilkinson, of Brooklyn, N. Y., for an "Improved registering apparatus."

"I claim a series of counting disks, standing at right angles or nearly so to each other, and each formed with a thread or worm around its periphery, taking teeth on the next counting disk, in the manner and for the purposes specified. I also claim the arrangement of the counting disk q^9, q^{10}, in the manner specified, whereby they can be disconnected and set to commence counting when required, as and for the purpose described and shown."

No. 25,544. John F. Cook, of Baltimore, Md., assignor to himself and Geo. F. Page, of same place, for an "Improved try-cock for steam boilers."

"I claim combining with the barrel of a try-cock a two-armed lever, one provided with springs or weight, and the other with a rubber or other equivalent disk, so that the weighted arm shall hold the valved or disk arm against the bore of the barrel of the cock, substantially as herein described and represented."

No. 25,545. Henry W. Gray, of Cleveland, O., assignor to himself and W. H. Alvord, of Homer, N. Y., for an "Improvement in rail-road chairs."

"I claim the forming the railroad chair of two sections, having the outer surfaces F convex, as described, in combination with the gripe C, and beam D, the several parts being arranged in the manner and for the purpose set forth."

No. 25,546. Horatio Francis Hicks, of Grand View, Ind., assignor to Hicks Brothers, of same place, for an "Improvement in presses."

"I claim the described combination of stepped bearings G and I with rollers K^1, adapted to operate in connection therewith without endwise pressure or tendency to displacement, in the manner and for the purpose set forth."

No. 25,547. Geo. W. McCord, of Centralia, Ill., assignor to himself, J. F. Lobdell, of Centralia, Ill., and P. V. A. Davis, of Rush, N. Y., for an "Improved deep-sea sounding apparatus."

"I claim the arrangement of the cylinder (*a*), piston (*p*), graduated scale (*f*), cap (*i*), and vernier or register (*k*), constructed and operating substantially as described, for the registration of marine soundings upon the principle of hydrostatic pressure."

No. 25,548. G. H. Sanborn, of Boston, Mass., and John E. Coffin, of Portland, Me., assignors to G. H. Sandborn aforesaid, for a "Machine for shaping and finishing the backs of books."

"We claim, 1st, the employment for shaping or finishing the backs of books of a divided roll or pair of segments C^1, C^1, operating across the backs from the centre to both sides thereof, substantially as herein described. 2nd, the combination of the cam T, slide R, toggle P, P, spring Q, link *y* lever O, link *u*, and toggles F, F, with the book-holder, for the purpose of raising the holder and causing it to close upon the book before each operation of the divided roll or pair of segments, substantially as herein described. 3rd, attaching the segment levers G, G^1, or their equivatents, to levers H, H, operated substantially as described, by cams N, N, on the conatantly revolving main shaft, for the purpose of throwing the segments out of the way of the holder at the proper stage of the operation of the machine to permit the removal and introduction of the books."

No. 25,549. Thos. Shaw, of Philadelphia, Pa., assignor to himself and J. C. Bailey, of same place, for an "Improvement in stoves."

"I claim, firstly, the adjustable legs *a*, when combined with the casing A and its gauze cylinder, and arranged as set forth, so as to serve the double purpose of tilting the stove more or less on one side, and regulating the admission of air into the casing. Secondly, operating the valve D, for regulating the flow of gas into the casing, by means of the object to be heated by the flame, in conjunction with the devices herein set forth, or their equivalents."

No. 25,550. A. P. Underhill, of New York, N.Y., assignor to C. R. Underhill, of New Castle, N. Y., for an "Improvement in converting reciprocating into rotary motion."

"I claim the arrangement and combination of the frame I, guards S, S^{1}, S^{11}, S^{111}, and ratchet wheels J, J^{1}, J^{11}, J^{111}, substantially as herein shown and described, so that the rotation of the shaft H may be reversed, as set forth."

No. 25,551. Wm. F. Warburton and Wm. B. Atkin, of Philadelphia, Pa., assignors to Wm. F. Warburton aforesaid, for an "Improvement in machinery for perforating hat bodies."

"Claim.—Firstly, the system of pointed pins *m*, hung independently of each other to the cross head J, furnished each with a separate spring, and arranged and operated substantially as set forth, in combination with the hat block, attached to the face plate F on the spindle E, for the purpose specified. Secondly, the ratchet wheel G of the same form or thereabouts as that presented by a transverse section of the hat to be perforated, in combination with the face plate F and its hat block, the said wheel being operated by the pawl *f*, and the appliances connected therewith, or their equivalents, in the manner and for the purpose herein set forth."

No. 25,552. Morris L. Keen, of Roger's Ford, Pa., for an "Improved mode of distilling liquids from coal tar."

"I claim the application of additional heat at or near the surface of the coal tar, or other similar hydrocarbon, when used in combination with pressure in the boiler, for the purpose of preventing the tarry foam from rising and overrunning the still, and thus endangering the operator as well as the premises, as herein described."

Re-issues.

James Perkins and William H. Burnet, of Newark, N. J., for an "Improved machine for bending metal pipe."— Patented 14th October, 1856.—Re-issued 20th September, 1859.

"We claim the mandrel *d*, substantially as herein described, and therewith traversing roller *b*, or its equivalent, for bending coils of metal pipe, and in combination therewith the furnace, in the manner and for the purposes set forth."

David B. Rogers, of Pittsburgh, Pa., for an "Improvement in cultivator teeth."—Patented 1st November, 1845.—Re-issued, 20th September, 1859.

"I claim making the shank or upper part of cultivator teeth of thin plate steel, shaped or curved round in front, substantially as herein-before described, for the purpose of securing the necessary strength to permit the tooth to be made entire, shank and blade, of a single piece of metal, and also of enabling the tooth to be secured in its place in the beam by means of a wedge driven into the cavity of the shank, substantially as herein-before described."

Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

(A.) "I claim the arrangement, substantially as described, of a cutting apparatus and a reel with respect to a driving wheel, and a grain wheel, or its equivalent, and a raker's seat, or its equivalent, so that the major part of the weight of the cutting apparatus and reel shall be in advance of the axis of oscillation of the machine on the said wheels while the raker's seat or stand shall be located behind that axis, and the machine with the raker thereon nearly balanced on its axis of oscillation, substantially as described."

(B.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim the combination of a tongue, or its equivalent, to draw the machine by a driving wheel and gearing arranged at the side of the frame, a short platform, a reel to gather the grain to the platform, and a stand or seat for the raker fixed upon the machine, so as to enable the raker conveniently to discharge the grain and lay it in gavels upon the ground at the side of the swath and out of the return path of the horses, substantially as described."

(C.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim a seat or stand on the reaping machine for the support of the raker laterally and in front, substantially as described."

(D.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim the combination of the reel, the divider, and the raker's seat or stand, co-operating together in such manner that the grain deposited upon the platform by the reel and divider may readily be grasped and discharged from the machine by the raker at his seat, substantially as described."

(E.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim the combination in a reaping machine of the following elements, namely, the draught and the gearing arranged at the side of the machine, two compressors, one arranged at each end of the cutter, the short reel to sweep over the space between the compressors and the short platform, substantially as described."

(F.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim the combination of the grain-guarded platform to receive and retain the cut-grain with the divider and the reel, the whole arranged substantially in the manner and for the purposes described."

(G.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim the combination of the reel support at the rear part of the outer side of the platform with the low flat frame and the divider, arranged substantially as described."

(J.) Cyrus H. McCormick, of Chicago, Ill., for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued, 21st December, 1858; and again re-issued 20th September, 1859.

"I claim the arrangement of the frame, the finger beam, the platform, and the driving wheel and gearing relatively to each other so as to secure an unobstructed gavelling space G at the side of the platform, behind the finger beam, substantially as herein described."

(I.) Cyrus H. McCormick, of Chicago, Ill, for an "Improvement in reaping machines."— Patented 23rd October, 1847.—Re-issued 24th May,

1853; again re-issued 21st December, 1858; and again, 20th September, 1859.

"I claim a reaping machine frame, consisting, namely, of two principal beams (D, D¹, and M,) crossing each other and arranged relatively to the supporting wheels, so as to give support to a platform not extending behind the gearing and without interfering with the cutter on one side, or the gavelling space on the other, substantially as described."

(H.) Cyrus H. McCormick, of Chicago, Ill, for an "Improvement in reaping machines."—Patented 23rd October, 1847.—Re-issued 24th May, 1853. —Again re-issued 21st December, 1858; and again re-issued 20th September, 1859.

"I claim, first, a dividing board, having a surface inclining towards the cutter and platform, and an outer dividing line, and an inner dividing line, arranged and acting substantially as described. Second, I claim the combination of the inclined dividing board with a guide bar, substantially as described. Third, I claim the combination of a reel, with the inclined dividing board, substantially as described. Fourth, I also claim the combination of a reel with the dividing board and guide bar, substantially as described."

Royal E. House, of Binghampton, N.Y., for an "Improvement in magnetic printing telegraphs." Patented 18th April, 1846.—Re-issued 20th September, 1859.

"I claim, first, a series of keys, each corresponding to a character, in combination with a revolving part of a circuit, so that the touching of one of the former may cause circuit to be broken or closed for the purpose of printing, substantially as specified, when the revolving part of the circuit is in a certain required angular position, properly corresponding to the key struck. Second, I claim a series of keys, each corresponding to a character, in combination with a revolving portion of a circuit, and a shaft provided with pins arranged in a helix, all substantially such as specified, or the equivalents of the whole, acting to cause circuit to be broken or closed, when the revolving part is in a certain angular position in proper correspondence with the key struck for the purpose of printing a proper corresponding letter by means of any suitable machinery. Third, I claim a key-board or series of keys, in combination with a rotating portion of a circuit and a type wheel, or its equivalent, so governed as to present a proper letter corresponding with a key touched to produce an impression, the combination being substantially such as set forth. Fourth, I claim, in combination, a single circuit of conductors, a key-board, or series of keys, a revolving portion of a circuit, and a type wheel, substantially such as specified, and these also in combination with a printing press, and with a key-shaft, or either of them, each part being substantially such as described. Fifth, I claim a series of keys, each corresponding to a character in combination with a type wheel having similar corresponding characters, both substantially as specified, when so connected by any appropriate devices, that a certain type shall be in a certain locality, when a corresponding key is actuated, and I claim these two elements, in combination with a single circuit of conductors, and with a printing apparatus, or either of them. Sixth, I claim actuating or driving a revolving portion of a circuit, or a key-shaft, or both of them, by means of a prime mover acting upon them through a friction connection, the mode of operation being substantially as specified, and doing away with sudden jars, and increasing rapidity of operation, when contrasted with a positive connection between such parts and a prime mover, and also permitting the two to move with varying velocities. Seventh, I claim actuating or driving a key-shaft and a revolving portion of a circuit, or either of them by means of a friction connection with a prime mover when the velocity of such prime mover is controlled by a governor, or some equivalent, for the purpose, which either prevents its moving too fast or increases its velocity when going too slow, or perform both these duties, substantially under the mode of operation described. Eighth, I claim governing or controlling the motions of a prime mover, which actuates a printing apparatus by the breaking and closing of an electric or galvanic circuit, so that such apparatus is put in operation both by the breaking of a circuit and by the closing thereof, substantially in the manner specified, and also the controlling of a printing apparatus so that it shall be permitted to print, when a spring returns to its normal position at the time that a circuit is broken, the mode of operation being substantially such as set forth. Ninth, I claim in a printing telegraph moving the paper to the types to produce an impression on the former, substantially in the manner described, as distinguished from former modes of operation, by which the types were moved towards the paper. Tenth, I claim in combination a revolving type wheel and a roller or its equivalent, charged with coloring matter, so as to deposite such matter on the types as they in succession come in contact with the roller, the combination being substantially such as set forth; and this I claim also when the roller is grooved as described. Eleventh, being aware of the facts that type wheels have been permitted to revolve step by step when controlled by escapements, and when such escapements have been actuated either by a prime mover governed by a pendulum, or by electric magnetic force, I claim actuating an escapement which controls the motions of a type wheel by a prime mover, whose motions are regulated by the breaking and closing of a circuit, under a mode of operation substantially such as described, whereby a small force derivable from magnetism controls any necessary power of a prime mover, there being a breaking and closing of circuit correspondent with each vibration of the escapement. Twelfth, I claim a hydraulic regulator, substantially such as described and for the purposes set forth. Thirteenth, I claim a hydraulic regulator, in combination with a type wheel and a printing apparatus and a prime mover, the combination being substantially as specified, and causing the press to print when the type wheel ceases to move for a longer time than usual. Fourteenth, in combination with a type wheel and a printing press or apparatus, I claim apparatus substantially such as specified, for making an alarm, when that apparatus is permitted or caused to act by the breaking and closing of the same circuit of conductors, which by its breaking and closing permits the printing apparatus to come into action."

Designs.

Eliza A. Murdock of Boston, Mass., for a "Design for a skating or riding cap for ladies."

"I claim the design above described, and as shown more particularly in the drawings of a cap for ladies, misses, and children, the same to be made of Berlin or Shetland worsted, or any other suitable material capable of being knit into the form as above described."

John Martino, of Philadelphia, Pa., assignor to D. Stuart and J. R. Peterson, of same place, for a "Design for a cooks' stove."

"I claim the combination and arrangement of ornamental figures and forms, represented in and by the accompanying drawing, as forming together an ornamental design for the front, side, and top plates of a cooking stove."

John Martino and James Horton, of Philadelphia, Pa., assignors to D. Stuart and J. R. Peterson, of same place, for a "Design for cylinder stoves."

"We claim the combination and arrangement of the ornamental figures and forms represented in and by the accompanying drawing, as forming together the plates of a cylinder stove."

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

List of Specifications, &c. published during the week ending 8th October, 1859.

No.	Price.	Subject-Matter.
574	3*d.*	Machines for preparing, spinning, and doubling fibrous materials.
576	6*d.*	Boiler stays.
577	7*d.*	Wet gas-meters.
578	9*d.*	Ships' berth for the prevention of sea sickness.
580	6*d.*	Purification of coal gas.
581	3*d.*	Ploughs.
582	1*s.* 4*d.*	Sewing machines.
583	3*d.*	Construction of ships and other vessels.
584	1*s.* 4*d.*	Machine for excavating, raising, and depositing soil.
585	3*d.*	Treating madder.
586	10*d.*	Machinery for reeling and leashing yarn or thread.
587	3*d.*	Strained fences.
588	1*s.* 10*d.*	Furnaces.
589	3*d.*	Laboratory forge.
590	3*d.*	Turkey red dyeing.
591	3*d.*	Railway quoins or wedges.
592	1*s.* 1*d.*	Railway carriage break and coupling apparatus.
593	3*d.*	Laminating india rubber cloths with paper sheets.
594	4*d.*	Extracting copper from its ores.
595	9*d.*	Evaporating in vacuo.
596	7*d.*	Railway and other carriages, &c.
597	3*d.*	Weaving ornamental fabrics.
598	6*d.*	Reels for winding on fibrous materials.
599	3*d.*	Manufacture of gelatine.
600	3*d.*	Preparation, spinning, and doubling machines.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 8th October, 1859.

Mornings - - - -	1214
Evenings - - - -	1980
Total - - -	3194

Since the opening of the Museum Free Daily (May 12, 1858,)—150,339.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 603. FRIDAY, OCTOBER 14, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1813. To ALEXANDER SOUTHWOOD STOCKER and GEORGE JAMES FARMER, both of Birmingham, in the county of Warwick, Manufacturers, for the invention of "Certain improvements appertaining to articles to be affixed to boots and shoes, and to the feet of animals, and in machinery and means to be employed for producing the same."

On their petition, recorded in the Office of the Commissioners on the 6th day of August, 1859.

1842. To FREDERIC LOUIS LAWRENCE, of 50, Berner's Street, Oxford Street, in the county of Middlesex, Dentist, for the invention of "Improvements in coloring and hardening elastic gums for dental purposes."

On his petition, recorded in the Office of the Commissioners on the 9th day of August, 1859.

2074. To HENRY WILLIAM RIPLEY, of Bradford, in the county of York, Dyer, for the invention of "Improvements in finishing dyed piece goods."

On his petition, recorded in the Office of the Commissioners on the 12th day of September, 1859.

2090. To SALOMON HECHT, of 36, Gresham Street, London, for the invention of "A new mode of advertising."

On his petition, recorded in the Office of the Commissioners on the 14th day of September, 1859.

2122. To THOMAS ELLIOTT, of Manchester, in the county of Lancaster, Engineer, for the invention of "Improvements in lubricators, especially applicable to steam engines."

On his petition, recorded in the Office of the Commissioners on the 17th day of September, 1859.

2137. To ALEXANDRE MANBRÉ, of No. 10, Rathbone Place, Oxford Street, London, in the county of Middlesex, Brewer, for the invention of "The manufacture of a coloring matter for coloring spirits, beers, vinegar, and other liquids and beverages."

On his petition, recorded in the Office of the Commissioners on the 20th day of September, 1859.

2148. To HENRY ALFRED JOWETT, of Sawley, in the county of Derby, Civil Engineer, for the invention of "Improvements in breaks for railway and other carriages, with means of communication between guard or conductor and driver."

2149. To JOHN BLAIR, of Manchester, in the county of Lancaster, Cotton Dealer, for the invention of "Certain improvements in the treatment of yarns during the operation of spinning, which treatment is also applicable in 'roving,' 'slubbing,' or 'doubling' machines."

2152. To ROBERT DAVISON, of London Street, in the city of London, Civil Engineer, for the invention of "Improvements in the construction of holders for containing liquid or air and other aeriform fluids, especially adapted for use in refrigerators."

2153. And to JOSEPH HARRISON, of Glossop, in the county of Derby, Overlooker of Spinners, for the invention of "An improvement in spinning mules, applicable also to the machines called twiners."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of September, 1859.

2156. To RICHARD BUTLER MOWBRAY and THOMAS COATMAN, of the city of Manchester, in the county of Lancaster, Engineers, for the invention of "Improvements in machinery or apparatus connected with and applicable to steam boilers and heating apparatus."

2158. And to EDWARD JONES, of the Russell's Hall Iron Works, Dudley, in the county of

Worcester, Furnace Manager, for the invention of "An improvement or improvements in the manufacture of coke in open coke fires, or heaps."

On both their petitions, recorded in the Office of the Commissioners on the 22nd day of September, 1859.

2160. To CHARLES JAMES PARRY, of the firm of Parry and Briddon, of the city of Manchester, in the county of Lancaster, Shirt Front and Collar Manufacturers, for the invention of "Improvements in certain apparatus applicable to sewing machines."

2162. To THOMAS BENTLEY, of Margate, in the county of Kent, Ironmonger, for the invention of "Improvements in agricultural implements for gathering and destroying weeds and stubble."

2164. And to ROBERT JAMES, of Manchester, in the county of Lancaster, Machine Maker, for the invention of "Improvements in machinery or apparatus for covering crinoline, applicable also to braiding fancy patterns for other articles."

On their several petitions, recorded in the Office of the Commissioners on the 23rd day of September, 1859.

2166. To JOHN GEDGE, of the firm of John Gedge and Son, of 4, Wellington Street South, Strand, in the county of Middlesex, Patent Agents, for the invention of "An improved stamp holder and cutter."—A communication from abroad by Denis Nefflier and Pierre Blaudin, both residing at Dijon, in the empire of France.

2168. To JAMES COEY, of Liverpool, in the county of Lancaster, Provision Merchant, for the invention of "Improvements in or applicable to packages for containing butter, lard, and other articles."

2170. To THOMAS BARNABAS DAFT, of Tottenham, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in coating metal conductors, suitable for electric telegraphs."

2172. And to JOHN TODD, of Kent Iron Works, Greenwich, in the county of Kent, Engineer, for the invention of "Improvements applicable to screw propellers in the propulsion of vessels."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of September, 1859.

2174. To JAMES FERNIHOUGH, of Dukinfield, in the county of Chester, Engineer, for the invention of "Improvements in pistons, plungers, and buckets."

On his petition, recorded in the Office of the Commissioners on the 26th day of September, 1859.

2182. To ROBERT COALES, of 53, Chancery Lane, in the county of Middlesex, for the invention of "An improved preparation or preparations for promoting the growth and otherwise improving the hair, and for the application of a certain material for like purposes."

2184. To CHARLES COWPER, of No. 20, Southampton Buildings, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in mixing or combining and deodorizing oil made from gas tar and other oils."—A communication from abroad by George Wagstaff Yapp, residing at Paris, in France.

2186. To JOHN RAYMOND PIEDNUE, of Royal Mint Refinery, Royal Mint Street, in the county of Middlesex, Assayer, for the invention of "An improved apparatus for transmitting motive power."—A communication from Alphonse Cheron, Engineer, and Desiré Honoré Sole, Professor, persons residing at Paris, France.

2188. And to PASCHAL J. LEJEUNE-CHAUMONT, of Faubourg Vivegnies, 138, Liége, for the invention of "Improvements in fire arms and ordnance, and in projectiles and cartridges to be used therewith."

On their several petitions, recorded in the Office of the Commissioners on the 27th day of September, 1859.

2190. To WILLIAM COLLINS, of Salford, in the parish of Manchester, and county of Lancaster, Engineer and Brass Founder, for the invention of "Improvements in stand pipes for hydrants."

2192. To WILLIAM JOHN DORNING, of Manchester, in the county of Lancaster, Engineer and Manager for Messrs. Edward T. Bellhouse and Co., of the same place, for the invention of "Certain improvements in traction engines."

2194. To EDMUND SMALL CATHELS and SAMUEL SPLATT, both of Dover, in the county of Kent, for the invention of "Improvements in gas meters."

2200. And to PATRICK ROBERTSON, of Sun Court, Cornhill, in the city of London, for the invention of "Improvements in the manufacture of manure."

On their several petitions, recorded in the Office of the Commissioners on the 28th day of September, 1859.

2202. To CHARLES STEVENS, of No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for the invention of "An improved steam dredging boat."—A communication from abroad by Yollet, Babin, and Gâche ainé, of Paris, in the empire of France.

2203. To GEORGE GORDON PAGE, of Whitehall, in the county of Middlesex, Civil Engineer, and CHARLES LUNGLEY, of Deptford, in the county of Kent, Ship Builder, for the invention of "Improvements in gangways or step ladders, applicable to floating bodies and other useful purposes."

2205. To WILLIAM JOHNSON, of the firm of Johnson and Booth, of Horse Shoe Court, in the city of London, Manufacturers, for the invention of "An improvement in purses."

2206. To EDWARD HAMMOND BENTALL, of Heybridge, near Maldon, in the county of Essex, Ironfounder, for the invention of "Improvements in screw presses."

2207. To CLEMENT DUPLOMB, of Rue de Rivoli, No. 112, Paris, France, Merchant, for the invention of "Improvements in presses for pressing or finishing textile fabrics."

2208. To ALEXANDER WILLIAM WILLIAMSON, of University College, and LOFTUS PERKINS, of Francis Street, Gray's Inn Road, Civil Engineer, for the invention of "Improvements in steam boilers."

2209. To WILLIAM KEMPE, of Holbeck Mills, Leeds, for the invention of "Improvements in machinery for raising the pile of woollen and other cloths."

2210. And to ROBERT OXLAND, of Plymouth, for the invention of "Improvements in the treatment of saccharine matters."

On their several petitions, recorded in the Office of the Commissioners on the 29th day of September, 1859.

2211. To JAMES WADSWORTH, of Manchester, in the county of Lancaster, Gas Engineer, for the invention of "Improvements in instruments or apparatus for measuring the quantity, for regulating the pressure, and for controlling the flow or passage of gas used for purposes of illumination, and in the construction of gas burners."

2212. To THÉOPHILE GUIBAL, Professor at the School of the Hainaut Mines, in the city of Mons, Belgium, for the invention of "Modifying the installation and working of cables used in springing up mines."

2213. To WILLIAM HARTLEY, of Bury, in the county of Lancaster, Engineer, for the invention of "Certain improvements in steam engines."

2215. To THOMAS BUCKHAM, of Gloucester, in the county of Gloucester, Civil Engineer, for the invention of "Improvements in the switches for railways."

2216. To JOB ORTON SMITH, of 18, Warwick Court, Gray's Inn, in the county of Middlesex, Gentleman, for the invention of "Improvements in the construction of children's carriages called 'perambulators.'"

2217. To BENJAMIN ATKINSON, of Rainham, in the county of Essex, for the invention of "Improvements in railway brakes."

2218. To WILLIAM HENRY BUCKLAND, of the Maesteg Iron Works, in the county of Glamorgan, Iron Master, for the invention of "Improvements in the preparation of peat."

2219. To HERBERT WILLIAM HART, of Fleet Street, in the city of London, Gas Engineer, for the invention of "Improvements in argand and other gas burners, partly applicable to oil and other lamps."

2220. To WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in railway signal apparatus."—A communication from abroad, by Messrs. Leon Jucqueau and Auguste Desgoffe, Civil Engineers, of No. 29, Boulevart St. Martin, Paris.

2221. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the construction of apparatus for reworking the waste steam of steam-engines."—A communication from abroad, by Messrs. Dalifol and Company, of Paris, Manufacturers.

2222. To MARTIN and ALEXANDER SAMUELSON, both of Scott Street Foundry, Hull, in the county of York, Engineers and Iron Ship Builders, for the invention of "Improvements in planing, slotting, and grooving machines."

2223. To the Honourable WILLIAM ERSKINE COCHRANE, of Osnaburgh Terrace, Regent's Park, in the county of Middlesex, for the invention of "Improvements in chairs and apparatus for receiving and securing the ends of the rails of railways."

2224. And to WILLIAM VAUGHAN EDWARDS, of Swindon, in the county of Wilts, Ironfounder, for the invention of "Improvements in the construction of ways and apparatus to facilitate the conveyance of mails, goods, and passengers."

On their several petitions, recorded in the Office of the Commissioners on the 30th day of September, 1859.

2226. To WILLIAM PARKIN, of Sheffield, in the county of York, Engineer, and JAMES BATES, of Hyde, in the county of Chester, Cotton Spinner, for the invention of "Improvements in wedges for railway chairs."

2229. To RICHARD ARCHIBALD BROOMAN, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in reverberatory puddling and other furnaces employed in the manufacture of iron."—A communication from abroad by G. Dallemagne, of Sclessin, Belgium.

2231. To JOHN MILLAR, of Edinburgh, in the county of Mid Lothian, North Britain, Glass Merchant, for the invention of "Improvements in reflectors for diffusing artificial light."

2232. To LEOPOLD NEWTON, Cotton Spinner, of Oldham, and JOHN GREAVES, Manager, of Staleybridge, both in the county of Lancaster, for the invention of "Improvements in cop tubes or spools, and in machinery for manufacturing the same."

2233. To GEORGE BRIDGETT, of Pilcher Gate, in the town and county of the town of Nottingham, Lace Manufacturer, for the invention of "A new mode or method of manufacturing Shetland or other falls from the stocking frame."

2234. And to JOSEPH WRIGHT, of the Teesdale Iron Works, South Stockton, in the parish of Thornaby and North Riding of the county of York, Ironfounder and Engineer, for the invention of "Improvements in apparatus for raising water and minerals from mines, which improvements are applicable to raising and hauling weights generally."

On their several petitions, recorded in the Office of the Commissioners on the 1st day of October, 1859.

2235. To EDMUND MOREWOOD, of Enfield, in the county of Middlesex, for the invention of "Improvements in coating metals."

2237. To LOUIS HENRI IGNACE LEMAIRE, of Stamford Street, Blackfriars, in the county of Surrey, Commercial Traveller, for the invention of "Improvements in the manufacture of chenille."

2238. And to WILLIAM RICHARDSON EARLE and EDWIN JOHN BARNES, of Queen's Terrace, Queen's Head Lane, Islington, in the county of Middlesex, Artists in Hair, for the invention of "Improvements in photographic and other portraits."

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of October, 1859.

2239. To GEORGE FREDERICK GREINER, of No. 57, Wells Street, St. Marylebone, in the county of Middlesex, Pianoforte Maker, for the invention of "Improvements in the construction of pianofortes."

2240. To MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Office, No. 39, Rue

de l'Echiquier, Paris, in the empire of France, for the invention of "An improved coupling joint for pipes or tubes of soft metal, caoutchouc, gutta-percha, or other yielding matter."—A communication from Louis J. Marie, a person residing in Paris.

2241. To Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for the invention of "An improved 'porte-jupe,' or apparatus for suspending dress-skirts and other objects."—A communication from Louis Auguste Mangin, residing in Paris.

2242. To John Loftus, of Elton Fold, near Bury, in the county of Lancaster, Manager, for the invention of "Improvements in machinery for combining and carding cotton or silk and wool."

2243. To Richard and William Hollis, of the firm of Richard Hollis and Son, of High Coggs, Witney, in the county of Oxford, Agricultural Implement Makers, for the invention of "Improvements in the construction of apparatus for winnowing and dressing grain."

2244. To Samuel Robert English, Seal Engraver and General Die Sinker, of Birmingham, in the county of Warwick, for the invention of "A machine or apparatus for taking copies of writing."

2245. To Robert Brearley the younger, of Batley, in the county of York, Manufacturer, for the invention of "Improvements in means or apparatus for raising the nap or pile of cloths."

2246. To William Backett, of Old Kent Road, in the county of Surrey, Oilman, for the invention of "Improved cleansing powders."

2247. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improved apparatus for generating steam."—A communication from abroad by John Mason Carr, of New York, in the United States of America.

2248. And to John Mitchell Rose and Richard Carte, of the firm of Rudall Rose Carte and Company, of Charing Cross, in the city of Westminster, Musical Instrument Makers, and William Pikesley, Mechanic, in the employ of Rudall Rose Carte and Company aforesaid, for the invention of "Improvements in drums."

On their several petitions, recorded in the office of the Commissioners on the 4th day of October, 1859.

2251. To John Thompson, of Witton, near Northwich, Cheshire, and John Thompson the younger, of Castle, Northwich aforesaid, for the invention of "The manufacture of salt by an improved and more economical mode."

2253. To Andrew Whytock, of No. 12, Little St. Andrew Street, Upper St. Martin's Lane, London, in the county of Middlesex, Superintendent, for the invention of "A mode or method of applying joined sheets of metal for roofing and other purposes."

2255. To John Shields, of the city and county of Perth, North Britain, Power Loom Manufacturer, Perth and Cromwell Park, for the invention of "Improvements in Jacquard looms or machinery for weaving."

2257. To Jehoiada Joseph Eagleton, of New York, in the United States of America, but now residing at Birmingham, in the county of Warwick, Manufacturer and Merchant, for the invention of "An improvement or improvements in annealing furnaces."

2259. To George Davies, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enock Square, in the city of Glasgow, Civil Engineer and Patent Agent, for the invention of "Improvements in the method of, and apparatus for, vaporizing liquids and heating air."—A communication from abroad by Messrs. Gargan and Co., of Villette, France, Builders.

2261. To John Scott, of Sunderland, in the county of Durham, Anchor Smith, for the invention of "Improvements in the manufacture of anchors."

2263. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in revolving fire-arms."—A communication from abroad by Messrs. Perrin and Delmas, of Paris, in the empire of France.

2265. To William Louis Earle, of Alfred Place, Bedford Square, in the county of Middlesex, Gentleman, for the invention of "Improvements in apparatus for promoting the combustion of smoke and gases arising from fuel."

2267. To John Macintosh, of North Bank, Regent's Park, for the invention of "Improvements in the manufacture of flexible tubes."

2269. And to John Macintosh, of North Bank, Regent's Park, for the invention of "Improvements in coating metallic conductors for electric telegraphs."

On their several petitions, recorded in the office of the Commissioners on the 5th day of October, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

13th October, 1859.

936. Thomas Bird, of the city of Manchester, in the county of Lancaster, Engineer, for an invention of "Improvements in the application and use of a certain natural product or products in the manufacture of pickers for looms, drawing rollers for spinning machinery, cop tubes, and for steps and bushes generally where lubrication is required."—Dated 14th April, 1859.

938. Joseph Beattie, of Lawn Place, South Lambeth, in the county of Surrey, Engineer, for an invention of "Improvements in the means of preventing locomotive engines and carriages in motion on railways leaving or running off the rails."—Dated 14th April, 1859.

943. Alexander McDougall, of Manchester, in the county of Lancaster, Chemist, for an invention of "Improvements in coating metallic surfaces."—Dated 14th April, 1859.

945. Stephen Barnwell, of Coventry, in the county of Warwick, Manufacturer, and Alexander Rollason, of Birmingham, in the same county, Chemist, for an invention of "Improvements in the manufacture of umbrellas, parasols, hats, or hat covers, caps, capes, coats, mantles, dresses, gloves, and other similar articles."—Dated 14th April, 1859.

949. George Ashcroft, of Cardiff, in the county of Glamorgan, Engineer, for an invention of "Improvements in working presses and other hydraulic machines."—Dated 15th April, 1859.

954. John Glasgow and Samuel Hand, of the city of Manchester, in the county of Lancaster, for an invention of "An improved variable circular motion applicable to slotting, shaping, and planing machines or similar purposes."—Dated 16th April, 1859.

958. John Hamilton, of Number 8, Exchange Square, Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in apparatus for regulating prime movers driven by water."—Dated 16th April, 1859.

959. Alfred Courage, of Bagillt, in the county of Flint, Smelter, for an invention of "An improved method of obtaining the metallic particles contained in fumes or vapours from lead and other smelting works."—Dated 16th April, 1859.

971. John Whitaker, of Bedford Mill Iron Works, near Leigh, in the county of Lancaster, Agricultural Machine Maker, for an invention of "Improvements in mowing machines."—Dated 18th April, 1859.

972. Joseph Seaman, of Linslade, in the county of Buckingham, Engineer, for an invention of "Improvements in agricultural implements for working or cultivating the soil."—Dated 18th April, 1859.

977. John Freer, of Rothley, in the county of Leicester, Agricultural Implement Maker, for an invention of "Improvements in machines for planting grain and seed, and an improved seed feeder and meter for planting machines."—Dated 18th April, 1859.

981. Frederick Edwards and William Edwards, of the city of Coventry, Machinists, for an invention of "Improvements in looms for weaving ribbons and other like goods."—Dated 18th April, 1859.

985. Peter Reynolds, of Belfast, in the county of Antrim, Ireland, and James Reynolds, of the same place, Engineers and Machinists, for an invention of "Improvements in machinery or apparatus for hackling flax and other fibrous materials."—Dated 19th April, 1859.

992. Quin Beck, of the firm of James Meharg and Co., of Belfast, in the county of Antrim, Manufacturers, for an invention of "Improvements in stoves."—A communication from abroad, by James Cherry, of Vermont, U.S.—Dated 20th April, 1859.

995. Alexander William Williamson, of University College, for an invention of "Improvements in obtaining extracts from the liquorice root."—Dated 20th April, 1859.

1008. Edward Clark, of New York, in the United States of America, but now of Morley's Hotel, in the city of Westminster, Gentleman, for an invention of "Improvements in sewing machinery."—A communication from abroad by Isaac Merritt Singer, of New York, aforesaid.—Dated 21st April, 1859.

1014. Charlotte Mansel, of Plymouth, in the county of Devon, for an invention of "A folding travelling case."—Dated 23rd April, 1859.

1019. William Dicks, of Leicester, Boot Manufacturer, and William Hopwell, also of Leicester, Machinist, for an invention of "Improvements in machinery for making screws, and applying them in fixing the soles of boots and shoes."—Dated 23rd April, 1859.

1024. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent, for an invention of "An improvement in the manufacture of woollen cloth."—A communication from Louis Victor Lemaignen, residing at Lisieux, France.—Dated 23rd April, 1859.

1031. George Ward, of Blackburn, in the county of Lancaster, Gold Patent Thread Manufacturer, for an invention of "Improvements in machinery or apparatus for making healds."—Dated 25th April, 1859.

1035. James Holmes, of Street, Somerset, Accountant, for an invention of "Improvements in applying eyelet holes to boots and shoes, and in binding boots and shoes."— Dated 25th April, 1859.

1036. Augustus William Gadesden, of 56, Leman Street, Goodman's Fields, for an invention of "Improvements in producing solutions of sugar."—Dated 25th April, 1859.

1037. Edward Humphrys, of Deptford, for an invention of "Improvements in steering apparatus."—Dated 25th April, 1859.

1062. Sir Thomas Tassell Grant, K.C.B., of 20, Chester Terrace, Regent's Park, in the county of Middlesex, for an invention of "Improvements in ships' cooking apparatus."—Dated 27th April, 1859.

1065. Charles Randolph and John Elder, of Glasgow, in the county of Lanark, North Britain, Engineers, for an invention of "Improvements in steam engines and boilers."—Dated 28th April, 1859.

1079. Edgar Andrew Porteus, of 18, Warwick Square, Paternoster Row, Engraver and Printer, and William Henry Burke, of 79, Cannon Street West, Manufacturer, for an invention of "Improvements in printing and other presses."—Dated 29th April, 1859.

1100. Daniel Moore, of Brooklyn, in the state of New York, United States of America, for an invention of "Improvements in machinery for rubbing or dressing types."—Dated 2nd May, 1859.

1129. William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "Improvements in seed depositors or drills."—A communication from abroad by Louis Achille Pruneau, formerly Notary, of Paris.—Dated 5th May, 1859.

1161. George Gibson Bussey, of Dunn's Passage Factory, 485, New Oxford Street, in the county of Middlesex, Manufacturer of Leather Goods, for an invention of "An improved contrivance for carrying cartridges, and to facilitate using them."—Dated 9th May, 1859.

1183. Michael Henry, of 84, Fleet Street, in the city of London, Patent Agent, for an invention of "A mode of protecting the mariner's compass agaist local attraction."—A communication from abroad by Samuel C. Bishop, residing at New York, in the United States.—Dated 11th May, 1859.

1197. William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "Certain improvements in knitting machines."—A communication from abroad by Mr. Jonas Bradley Aiken, of Manchester, in the county of Hillsborough, and state of New Hampshire, in the United States of America, Manufacturer.—Dated 13th May, 1859.

1222. Lemuel Dow Owen, of 192, Tottenham Court Road, in the county of Middlesex, Engineer, for an invention of "An improved menstrual receiver or truss."—A communication from abroad by Herman W. Ladd, of Boston, Massachusetts, United States of America. — Dated 17th May, 1859.

1251. William Colborne Cambridge, of Bristol, Agricultural Implement Maker, for an invention of "Improvements in thrashing and winnowing machines."—Dated 20th May, 1859.

1500. George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "Improvements in apparatus for winding thread of cotton or linen or other fibrous materials, or sewing silk or similar articles upon bobbins or spools."—A communication from abroad by Lawson C. Ives, of Hartford, Connecticut, United States of America. — Dated 22nd June, 1859.

1654. Thomas Wright, of 9, George Yard, Lombard Street, in the city of London, Engineer, for an invention of "Improvements in the permanent way of railways, and in the means of preventing railway accidents thereon." — Dated 12th July, 1859.

1668. Joseph Morgan, of Manchester, for an invention of "Improvements in apparatus for making candles."—Dated 14th July, 1859.

1718. Joseph Hartley, of Romiley, near Stockport, in the county of Chester, Manager, for an invention of "Improvements in machinery for regulating the velocity of steam and other engines." —Dated 22nd July, 1859.

1765. Joseph Wood, of York City, Surgical Instrument Maker, for an invention of "An improved truss for hernia."—Dated 30th July, 1859.

1774. William Campbell, Machinist, and George Worstenholm, Machinist, both of Birmingham, in the county of Warwick, for an invention of "Certain improvements in machinery for the manufacturing of wrought nails, as also in the treatment of the iron from which such or other kinds of nails may be made."—Partly a communication from abroad by George William Allen, of Rhode Island, United States of America.—Dated 1st August, 1859.

1808. Robert Thomson Pattison, residing at Daldorch, in the county of Ayr, in Scotland, for an invention of "Improvements in dyeing certain woven fabrics."—Dated 5th August, 1859.

1909. Henry William Harman, of Manchester, in the county of Lancaster, Civil Engineer, for an invention of "Improvements in steam boilers and in working the same, and in safety valves and apparatus connected therewith." — Dated 19th August, 1859.

1944. Michael John Stark, of the city of Norwich, Chemist and Merchant, for an invention of "Producing a new chemical or artificial manure from bones and all such animal and fatty matters."—Dated 26th August, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 12th October, 1859, inclusive.*)

11th October.

2385. Anton Bruno Seithen, of 12, Alpha Place, Caledonian Road, London, in the county of Middlesex, Engineer, for an invention of "Improvements in machinery or apparatus for cutting cork, in the processes of shaping and making stoppers of cork, and in the treatment of cork to be employed in the said processes, and to be applied to other useful purposes."—Dated 11th October, 1856.

2394. William Todd and Jacob Todd, of Heywood, in the county of Lancaster, Spinners and Manufacturers, for an invention of "Certain improvements in power-looms for weaving."—Dated 13th October, 1856.

12th October.

2405. Thomas Allen, of Clifton, in the city and county of Bristol, for an invention of "An improvement in the manufacture of iron and other metallic bedsteads."—Dated 14th October, 1856.

2434. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in the manufacture of tufted pile fabrics."—A communication.—Dated 17th October, 1856.

2460. Anthony Lorimier, of Bedford Square East, Commercial Road, in the county of Middlesex, for an invention of "An improvement in re-working vulcanized india-rubber."—Dated 20th October, 1856.

2544. Charles de Jongh, of Lautenbach, near Guebwiller, in the empire of France, Manufacturer, for an invention of "An improved method of and machinery for combing and preparing silk, flax, and other fibrous substances."—Dated 29th October, 1856.

2545. Peter Fairbairn, of Leeds, in the county of York, Machine Manufacturer, and Robert Newton, of Liverpool, in the county palatine of Lancaster, Gentleman, for an invention of "Improvements in machinery for dressing waste silk."—Dated 29th October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 12th October, 1859, inclusive.*)

11th October.

356. Joseph Robinson, of Southampton, in the county of Hants, Superintendent Joiner to the Peninsular and Oriental Steam Company, for an invention of "Improvements in ventilators."—Dated 12th October, 1852.

371. Walter McFarlane, of Glasgow, in the county of Lanark, North Britain, Ironfounder, for an invention of "Improvements in water-closets."—Dated 13th October, 1852.

12th October.

358. William H. Smith, of the county of Montgomery, and state of Pennsylvania, America, Clergyman, for an invention of "Improvements in the manufacture of lava ware."—Dated 12th October, 1852.

557. Robert Mallet, of the city of Dublin, in Ireland, Engineer, for an invention of "Improvements in fireproof and other buildings and structures."—Dated 28th October, 1852.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

AUSTRIA.*

List of Patents which were Delivered, Prolonged, or became Void during the Month of July, 1859.†

(*Communicated by the Austrian Government.*)

1. Patents Delivered.

1. Hermann Hirsch, of Berlin, represented by Georg Märkl, Vienna, for "A so-called 'centrifugal screw.'"—5 years.—(Public.)—Dated 6th July, 1859.
2. Franz Stampf, of Vienna, for "A ventilating apparatus with a regulator for mixing the gases issued by fuel, and convertible into smoke, for the purpose of consuming the same completely."—1 year.—(Public.)—Dated 6th July, 1859.
3. Leonhard Wolheim, of Triest, for "Improvements in the sensibility of scale-beams."—1 year.—(Public.)—Dated 6th July, 1859.
4. Henry Justinian Newcome, of Shenley, represented by Georg Märkl, Vienna, for "An improved apparatus for heating buildings, drying rooms, for washhouses, warming plates for cooking, &c."—3 years.—(Public.)—Dated 6th July, 1859.
5. William and John Banks, of Bolton, represented by Edward Schoch, Vienna, for "A peculiar apparatus for bleaching, washing, scouring, and dyeing cotton, flax, and other vegetable raw substances or fabrics made thereof, and rags."—2 years.—(Secret.)—Dated 8th July, 1859.
6. Chaim Hirsch, of Lemberg, for "Clarifying petroleum or naphtha, and obtaining a limpid and inodorous lighting substance therefrom."—1 year.—(Secret.)—Dated 8th July, 1859.
7. Philipp Eisenhut, of Leitmeritz, for "Improvements in pianofortes, by combining the sounding post, the hook bar, and the shoring into one piece of cast iron."—1 year.—(Public.)—Dated 8th July, 1859.
8. Friedrich Max Bode, of Vienna, for "A puzzle-lock that cannot be picked."—1 year.—(Public.)—Dated 8th July, 1859.
9. Theophil Berrens, of Verona, for "A portable apparatus for impregnating wood by means

* For the Austrian Patent Law, see No. 291 of this Journal.

† In the case of inventions patented in other states as well as in Austria, the Specifications (whether described as "public" or not) may in most cases be consulted, or translations of them be had at the Library of the Commissioners' Office.

of vitriol of copper and other substances."—5 years.—(Public.)—Dated 8th July, 1859.

10. Anton Proksch, of Görkau, Bohemia, for "A peculiar compound for obtaining inodorous varnish like water, and fire-proof paints for wood, pasteboard, linen, paper, bricks, absorbing stones and metals, and for protecting fruit trees from caterpillars."—1 year.—(Secret.)—Dated 8th July, 1859.

11. Franz Trupp and Joseph Pichler, of Pesth, for "A moveable cooking machine on wheels."—1 year.—(Public.)—Dated 9th July, 1859.

12. Jacob Werner, of Fünfhaus, near Vienna, for "Improvements in making dresses."—1 year.—(Secret.)—Dated 12th July, 1859.

13. Tobias Joseph Schmidt, of Vienna, for "A motor, being a substitute for steam and water power."—1 year.—(Secret.)—Dated 12th July, 1859.

14. Amédée Etienne Charles Joseph Reynaud de Taets, of Marseilles, represented by Georg Märkl, Vienna, for "A composition called 'pyronome,' for blasting rocks."—1 year.—(Secret.)—Dated 12th July, 1859.

15. Simon Schön, of Pesth, represented by Ignaz Gorlitzer, Pesth, for "Improvements in soldering gold articles."—1 year.—(Secret.)—Dated 12th July, 1859.

16. Salomon Taussig, of Prague, for "Improvements in printing and dyeing calico, linen, and woollen fabrics."—2 years.—(Secret.)—Dated 12th July, 1859.

17. Mathias Hubar, of Laibach, for "Improvements in chaff-cutting machines."—1 year.—(Public.)—Dated 12th July, 1859.

18. Conrad Otto, of Vienna, for "Improvements in shower-baths."—1 year.—(Secret.)—Dated 12th July, 1859.

19. Wenzel Bachmann, of Vienna, for "A peculiar mode of assembling the single parts of metal knives and forks, whereby they are made more durable and prevented from rusting."—1 year.—(Public.)—Dated 12th July, 1859.

20. Carl Wessely, of Vienna, for "Universal couplings of two arbors."—1 year.—(Public.)—Dated 13th July, 1859.

21. Heinrich Jacob Giffard, of Batignolles, France, represented by Georg Märkl, Vienna, for "An injection apparatus for feeding steam boilers."—1 year.—(Public.)—Dated 13th July, 1859.

22. Ferdinand Knesy, of Vienna, for "Sheet-iron forms for making double biscuit."—2 years.—(Secret.)—Dated 13th July, 1859.

23. Joseph Ulbricht and Franz Weiss, of Schönlinde, Bohemia, for "Carriages for conveying passengers and goods with breaks belonging thereto."—1 year.—(Secret.)—Dated 17th July, 1859.

24. Joseph Ulbricht and Franz Weiss, of Schönlinde, Bohemia, for "A peculiar kind of stoves and kitchen ranges."—1 year.—(Secret.)—Dated 13th July, 1859.

25. Joseph Dippold, of Vienna, for "Improvements in forks and knives for the field."—1 year.—(Secret.)—Dated 13th July, 1859.

26. August Klein, of Vienna, for "Improvements in his portemonnaie, as patented on the 10th November, 1858."—1 year.—(Secret.)—Dated 13th July, 1859.

27. Franz Tradinick, of Klausenburg, for "A peculiar construction of carriages."—1 year.—(Public.)—Dated 13th July, 1859.

28. Joseph Ulbricht and Franz Weiss, of Schönlinde, Bohemia, for "An apparatus, being a substitute for cellars for the purpose of preserving wine, beer, and other liquids."—1 year.—(Secret.) Dated 13th July, 1859.

29. Johann Baptist Filz, of Vienna, for "A compound liquid for the toilet."—3years.—(Secret.)—Dated 14th July, 1859.

30. Gustav Niemann, of Neunkirchen, near Meth, Hanover, for "A peculiar system of safety locks for iron safes and chests."—1 year.—(Public.)—Dated 14th July, 1859.

31. Georg Fusenegger, of Triest, for "Improvements in his Patent clack valves for water."—2 years.—(Public.)—Dated 16th July, 1859.

32. B. W. Ohligs-Hausmann and C. Fr. Bodmer, of Steyr, Upper Austria, for "A peculiar rolling mill for manufacturing swords."—1 year.—(Secret.)—Dated 16th July, 1859.

33. Raphael Hirz Pitzele, of Drohobyez, Galicia, for "Manufacture of odoriferous and limpid naphtha and photogen gas."—1 year.—(Secret.)—Dated 16th July, 1859.

34. Joseph Ulbricht and Franz Weiss, of Schönlinde, Bohemia, for "A peculiar kind of cast-iron roofings, with cast-iron gutters and skylights."—1 year.—(Secret.)—Dated 16th July, 1859.

35. Heinrich Anciaux, of Ixelles, near Brussels, represented by Georg Märkl, Vienna, for "A peculiar process for obtaining pure saltpetre without refining."—3 years.—(Public.)—Dated 16th July, 1859.

36. Rudolph Bujatti, of Vienna, for "A process for obtaining pressed and printed images of gold, silver, and in all colours and shapes, from foil."—1 year.—(Secret.)—Dated 16th July, 1859.

37. Georg F. Yull, of Pesth, for "Improvements in ploughs, or so-called 'plough cart.'"—1 year.—(Secret.)—Dated 16th July, 1859.

38. Conrad Schember, of Vienna, for "An apparatus for superseding the winding of the lever in centimal weighing machines, whilst the connecting levers are still lifted from their fulcra."—1 year.—(Secret.)—Dated 16th July, 1859.

39. Wolf Hirsch and Hermann Weinstock, of Vienna, for "A machine for the improved manufacture of ear drops."—1 year.—(Secret.)—Dated 21st July, 1859.

40. Georg Roy, of Vienna, for "Improvements in inodorous privies."—1 year.—(Secret.)—Dated 21st July, 1859.

41. Carl Modl, of Ebenfurth, Lower Austria, for "Improvements in guiding millstones, and obtaining a movement of the grind-hole against the stone."—2 years.—(Secret.)—Dated 21st July, 1859.

42. Salomon Ranowitz, of Vienna, for "Improvements in the manufacture of men's dresses with a peculiar lining."—1 year.—(Secret.)—Dated 22nd July, 1859.

43. Vincenz Fialla, of Oberdobling, near Vienna, for "Improvements in caoutchouc bellows."—1 year.—(Secret.)—Dated 22nd July, 1859.

44. Felix Aroux, of Montaure, represented by Georg Märkl, Vienna, for "Improvements in sowing."—1 year.—(Public.)—Dated 22nd July, 1859.

45. Anton Ehmann, of Vienna, for "An improved construction of stoves, kitchen ranges, and other apparatus used in atmospheric heating."—1 year.—(Public.)—Dated 22nd July, 1859.

46. Franz Joseph Murmann and Adam Gabler, of Vienna, for "A disinfecting salt for disinfecting fecal matter, and converting the same into good manure."—1 year.—(Secret.)—Dated 25th July, 1859.

47. Leiser Byk and Leiser Menkis, of Lemberg, for "Manufacture of white cement bricks."—1 year.—(Secret.)—Dated 25th July, 1859.

48. Carl Manuel, of Dijon, France, represented by Cornelius Kasper, Vienna, for "A peculiar centrifugal apparatus for extracting beetroot juice, and for treating the scum of sugar-works."—1 year."—(Secret.)—Dated 25th July, 1859.

49. Johann Lager, of Vienna, for "Improvements in fireplaces of kitchen-ranges, furnaces, and boilers, by introducing the air underneath the grate."—1 year.—(Secret.)—Dated 25th July, 1859.

50. Franz Fischer, of Vienna, for "A peculiar method of obtaining saltpetre of potash whilst manufacturing soap."—1 year.—(Secret.)—Dated 25th July, 1859.

51. Georg Ronsperger, of Vienna, for "Manufacture of military scarfs, tassels of swords, &c."—1 year.—(Secret.)—Dated 25th July, 1859.

52. Johann Fichtner and Sons, of Atzgersdorf, Lower Austria, for "Improvements in the manufacture of glue from animal waste."—1 year.—(Secret.)—Dated 25th July, 1859.

53. August Leonhardi, of Dresden, represented by Dr. Max von Schickh, Vienna, for "A liquid extract of ink."—2 years.—(Secret.)—Dated 25th July, 1859.

54. Carl Ludwig Joseph Diericks, of Paris, represented by Friedrick Rödiger, Vienna, for "Improvements in adjusting gold and silver planchets."—1 year.—(Secret.)—Dated 25th July, 1859.

55. Philipp Popper, of Gran, Hungary, for "Improvements in the manufacture of waterproof foot-coverings without destroying their shape."—5 years.—(Secret.)—Dated 25th July, 1859.

56. Franz Paupie, of Güns, for "A peculiar apparatus for casks for preventing the evaporation of liquids, the rotting of the casks, and the rusting of the iron hoops."—1 year.—(Secret.)—Dated 27th July, 1859.

57. Peter Emich, of Prevali, Carinthia, for "A peculiar liquid for preventing incrustations of boilers."—3 years.—(Public.)—Dated 27th July, 1859.

58. Wilhelm Samuel Dobbs, of Vienna, for "Improvements in American carriage axles and boxes."—1 year.—(Secret.)—Dated 27th July, 1859.

59. Ignaz Wottitz, of Vienna, for "Improvements in his Patent mode of manufacturing cast-steel by smelting chips of wrought iron, together with various substances in crucibles, and of casting the same in forms."—1 year.—(Secret.)—Dated 30th July, 1859.

60. Franz Simon, of Vienna, for "A peculiar electrical machine."—1 year.—(Secret.)—Dated 30th July, 1859.

61. Joseph Schedinz, of Vienna, for "Improvements in his Patent torches."—1 year.—(Secret.)—Dated 30th July, 1859.

62. Matissen Mathias and Leopold Mathias, of Cologne, for "Improvements in the manufacture of Eau de Cologne."—1 year.—(Secret.)—Dated 30th July, 1859.

---

2. Patents Prolonged.

1. V. Crunel, for "Improvements in the construction of hand-mills for grinding coffee and other dry grains."—6th year.—(Secret.)—Dated 19th June, 1854.

2. Neuburg and Eckstein and Co., for "A peculiar substance for making all kinds of matches." 5th and 6th years.—(Secret.)—Dated 15th August, 1855.

3. Ignaz and Joseph Bachrach, for "A peculiar construction of high-pressure sealing presses."—2nd year.—(Secret.)—Dated 18th June, 1858.

4. Leopold Apfelthaler, for "Using cross-ties of a peculiar construction for rivetting brewing pans, or other boiling apparatus."—2nd year.—(Public.)—Dated 23rd June, 1858.

5. Max Krauss, for "Improvements in the manufacture of ladies' dresses."—2nd year.—(Secret.)—Dated 18th June, 1858.

6. Isak Wittmann and Adolph Hetsay, for "Improvements in washing sheep and wool."—8th year.—(Secret.)—Dated 23rd July, 1852.

7. Friedrich Paget and Eduard Schmidt, for "Improvements in the construction of atmospheric hammers."—4th year.—(Secret.)—Dated 24th June, 1856.

8. Ludwig Dominik Girard, for "A peculiar system of hydraulic turbines."—2nd year.—(Public.)—Dated 5th July, 1858.

9. Johann Benda, for "A screw press for making scrapers."—2nd year.—(Secret.)—Dated 8th July, 1858.

10. Johann Bucsany, for "An improved table of patterns for cutting ladies' dresses."—2nd year.—(Secret.)—Dated 8th July, 1858.

11. Adam Krutina and David Kanitz, for "Improvements in the manufacture of fly-paper."—2nd year.—(Secret.)—Dated 22nd July, 1858.

12. William Owen, for "Improvements in the manufacture of wheels and tyres of railway carriages."—3rd year.—(Secret.)—Dated 27th June, 1857.

13. Pierre André de Coster, for "An apparatus for refining sugar."—3rd year.—(Secret.)—Dated 27th June, 1857.

14. August Pellet, for "A process for obtaining designs or ornaments in American leather cloth, and on similar fabrics."—2nd year.—(Secret.)—Dated 6th August, 1858.

15. Alexander Heinrich Carl Chiondi, for "A process for utilizing the products obtained in the distillation of peat for lighting and heating purposes."—2nd year.—(Public.)—Dated 12th August, 1858.

16. Joachim and Hermann Hartmann, for "Manufacture of soft resin, the solutions of which when applied in various forms destroy insects, their caterpillars and eggs, without acting as poison on larger animals."—3rd year.—(Secret.)—Dated 27th June, 1857.

17. Abraham Stoer, for "A means of destroying mice and rats."—9th year.—(Secret.)—Dated 9th July, 1851.

18. Alexander Legé and Fleuri Bénoit Pironnet, for "A process for dyeing, drying, and hardening all kinds of wood."—3rd year.—(Public.)—Dated 16th May, 1858.

19. Benjamin Chew Tilghmann, for "Improvements in the treatment of fat substances for the manufacture of candles and soap."—2nd year.—(Public.)—Dated 8th July, 1858.

20. Peter and Johann Baptist Barrat, for "A steam-engine for agricultural purposes."—2nd year.—(Public.)—Dated 15th September, 1858.

21. Hyacinth Ozouf, for "Apparatus for converting the lime used in clarifying beetroot and cane sugar into carbonate."—2nd year.—(Public.)—Dated 22nd November, 1858.

22. Gustav Pflaumer, for "A double mill for fulling cloth and other woollen fabrics."—2nd year.—(Secret.)—Dated 27th February, 1858.

23. Laurenz Altlechner, for "Improvements in the pavement of streets."—7th year.—(Secret.)—Dated 5th July, 1853.

24. Franz Schmidt, for "So-called 'photographic-lithographic advertising boards."—6th year.—(Secret.)—Dated 10th July, 1854.

25. Carl Voelkelt, for "A damping machine connected with a steam brushing and pressing apparatus."—4th–6th year.—Dated 31st May, 1856.

26. Friedrich Paget and Eduard Schmidt, for "Improvements in lubricating boxes."—4th year.—(Secret.)—Dated 4th July, 1856.

27. Jackson Brothers, Petin, Gaudet and Co., for "A process for the manufacture of washers and unwelded wheel tyres."—4th year.—(Public.)—Dated 8th July, 1856.

28. Cornelius Fuchs, for "Improvements in carriage lanterns."—4th and 5th year.—(Secret.)—Dated 23rd July, 1856.

29. Albert Felix Chauffriat, for "Manufacture of wheel tyres, axles, rails, &c."—3rd year.—(Public.)—Dated 11th July, 1857.

30. Ignaz Bachrach, for "A double safety high pressure press."—3rd year.—(Secret.)—Dated 17th July, 1857.

31. Carl Gurtler and Johann Kruch, for an "Improved instrument for drawing off fluids from casks, without removing their bungs, into other vessels."—5th year.—(Secret.)—Dated 11th July, 1855.

32. Michael Holmann and Alexander Bernauer, for "Folding safety-baskets to be used in cleaning windows."—4th year.—(Secret.)—Dated 27th February, 1856.

33. Emil Baars and Carl Keck, for "Improvements in fire-proof iron chests."—4th and 5th years.—(Secret.)—Dated 10th July, 1856.

34. Carl von Ruppert, for "Improvements in the construction of single parts of bridges of wrought iron."—3rd–5th year.—(Public.)—Dated 25th July, 1857.

35. Julius Baron, for "Improvements in the construction of ladies' dresses, whereby they are made more convenient."—3rd year.—(Secret.)—Dated 1st December, 1857.

36. Georg Scott, for "Improvements in steam generators."—2nd year.—(Public.)—Dated 14th November, 1858.

37. Constant Jouffray Duméry, for "Filling apparatus for the prevention of smoke."—5th year.—(Public.)—Dated 26th August, 1855.

38. Victor Augustin Kientzy, for "A machine for breaking up and ploughing lands."—3rd year.—(Public.)—Dated 28th September, 1857.

39. Eduard Adolph Joseph Estivant, for "Improvements in moulds for casting metal pipes."—3rd year.—(Secret.)—Dated 1st November, 1857.

40. Carl Girardet, for "A cylindrical shaft-bearer.—2nd year.—(Public.)—Dated 15th July, 1858.

41. August Alexander Villeneuve and Camille Georg Beaury, for "Preparing a fibrous substance not used hitherto so as to become a substitute for silk and wool."—2nd year.—(Secret.)—Dated 11th August, 1858.

42. William Orrin Grover, for "Improvements in sewing machines."—2nd year.—(Public.)—Dated 23rd August, 1858.

43. William Orrin Grover and William E. Baker, for "Improvements in sewing machines."—7th year.—(Secret.)—Dated 18th November, 1853.

44. Heinrich Voelker, for "Waterproof elastic percussion caps."—6th year.—(Secret.)—Dated 5th August, 1854.

45. Leo Joseph Pomme, for "Axle-boxes with friction rollers for railway and other carriages."—5th year.—(Public.)—Dated 30th July, 1855.

46. Joseph Lacassagne and Rudolph Thiers, for "A physical apparatus called 'electro-magnetic regulators.'"—5th year.—(Public.)—Dated 26th August, 1855.

47. Jackson Brothers, Petin, Gaudet, and Co., for "A peculiar process for the manufacture of wheels, wheel tyres, hoops, pipes, carriage axles, &c."—4th year.—(Public.)—Dated 11th November, 1856.

48. Eduard Fritsch, for "Obtaining photographs on canvass of painters."—2nd and 3rd years.—(Secret.)—Dated 8th July, 1858.

49. Carl Anton Grossmann, for "Manufacture of gold chains."—2nd year.—(Secret.)—Dated 19th July, 1858.

50. Franz Leitzner, for "Improvements in the manufacture of foot-coverings."—2nd and 3rd year.—(Secret.)—Dated 30th July, 1858.

51. Wilhelm Schmid and Franz Arend, for "A harvester."—2nd year.—(Secret.)—Dated 1st August, 1858.

---

3. Patents which have become Void.*

1. Samuel Colt, for "Improvements in fire-arms."—Dated 22nd April, 1857; expired 22nd April, 1859.

2. Samuel Colt, for "Improvements in powder flasks."—Dated 22nd April, 1857; expired 22nd April, 1859.

3. Johann Neubauer, for "A signal lantern."—Dated 22nd April, 1858; expired 22nd April, 1859.

4. Wenzel Czerny, for "A universal oil-gas lamp."—Dated 11th March, 1858; expired 11th March, 1859.

5. Jacob and Franz Kiffmann, for "Improvements in printing designs for embroidery by the fly-press."—Dated 29th April, 1857; expired 29th April, 1859.

6. Alfred Lenz, for "Improvements in machines for making envelopes."—Dated 22nd April, 1857; expired 22nd April, 1859.

7. Alfred Lenz, for "Improvemants in ploughs for removing the snow from railways."—Dated 22nd April, 1857; expired 22nd April, 1859.

8. Edmund Michel and F. Verdeil, for "An improved process for the manufacture of madder extract for dyeing and printing."—Dated 13th May, 1857; expired 13th May, 1859.

9. Joseph Mauritius Von Picko and Maria Theresia Kirchlehner, for "A cylindrical double printing machine for silk, woollen, cotton, and other fabrics."—Dated 24th May, 1857; expired 24th May, 1859.

10. Friedrich Rödiger, for "A process for obtaining products of wrought iron directly from pig iron and specular iron."—Dated 30th November, 1857; disclaimed 10th June, 1859.

11. Friedrich Rödiger, for "A peculiar process for refining pig iron."—Dated 3rd December, 1857; disclaimed 10th June, 1859.

12. Friedrich Rödiger, for "Obtaining printing surfaces for typographical and artistic purposes."—Dated 12th July, 1858; disclaimed 30th June, 1859.

13. Joseph Bauernfeind, for "Mechanical calculating tables for the conversion of Austrian moneys."—Dated 9th September, 1858; disclaimed 28th May, 1859.

14. Gustav Walter, for "Manufacture of double waterproof hats from all kinds of stuffs."—Dated 27th May, 1857; expired 27th May, 1859.

15. Johann Ignaz Fuchs, for "An electro-magnetic apparatus for protecting property."—Dated 2nd July, 1857; disclaimed 26th May, 1859.

16. Leopold Wimmer, for "An iron mechanical steam baking oven, to be heated from the outside."—Dated 4th May, 1858; expired 4th May, 1859.

17. Conrad Otto, for "Improvemente in shower baths."—Dated 21st May, 1857; expired 21st May, 1859.

18. Jacob Reuling, for "An apparatus for simultaneously working two card looms of any size."—Dated 28th August, 1857; disclaimed 28th June, 1859.

19. Jacob Radl, for "Manufacture of bent and open-worked wooden fancy articles, whereby a greater durability and better polish may be obtained."—Dated 20th April, 1858; expired 20th April, 1859.

20. Pius Fink, for "Improvements in the distributing regulators of steam engines."—Dated 22nd April, 1857; expired 22nd April, 1859.

21. Franz Stoppel, for "Applying metal springs to the upper parts of half boots."—Dated 30th January, 1853; expired 30th January, 1859.

22. Jean Claude Arnoux, for "A new system of jointed railway carriages for travelling on curves."—Dated 31st January, 1853; expired 31st January, 1859.

23. Franz Xaver Sinsler and Samuel Both, for "A machine for making button-rings of curtains, false corals, and rosaries of various substances."—Dated 7th January, 1854; expired 7th January, 1859.

24. Joseph Schaller and Carl Hoffmann, for "Portable cylindrical field forges."—Dated 9th January, 1854; expired 9th January, 1859.

25. Moriz Blaskopf, for "Manufacture of blacking."—Dated 19th January, 1854; expired 19th January, 1859.

36. Stephan von Marczell, for "A machine for breaking the ears of maize and other substances."—Dated 19th January, 1854; expired 19th January, 1859.

27. Anton Franz Hospodar, for "Improvements in cravats."—Dated 19th January, 1854; expired 19th January, 1859.

28. Jacob Franz Heinrich Hemberger, for "Improvements in the manufacture of oil for lighting and lubricating purposes."—Dated 24th January, 1854; expired 24th January, 1859.

29. Joseph Bauer, for "A steam digging machine for garden and earth works."—Dated 24th January, 1854; expired 24th January, 1859.

30. August Heinrich Rott, for "A so-called 'miniature horn.'"—Dated 22nd January, 1855; expired 22nd January, 1859.

31. Bartholomäus Predavalle, for "A process and machine for obtaining paper pulp from vegetable fibrous substances."—Dated 5th January, 1856; expired 5th January, 1859.

---

* The Specifications of these Patents may be consulted in the original language, or translations be had at the Public Free Library.

32. Adam Hügel, for "Manufacture of all kinds of tools from a composition of marl and all fusible minerals and clay."—Dated 30th January, 1856; expired 30th January, 1859.

33. Salomon Braun, for "A machine for examining the quality of corn and flour stored up."—Dated 7th January, 1856; expired 7th January, 1859.

34. Paul Firmin Didot, for "A new method of bleaching by applying carbonic gas."—Dated 30th January, 1856; expired 30th January, 1859.

35. Franz Ferko, for "A chemical means of destroying bugs." — Dated 6th January, 1857; expired 6th January, 1859.

36. Alois Eder, for "A new sofa."—Dated 10th January, 1857; expired 10th January, 1859.

37. Peter Arnhofer, for "Removing the grinding motion in machinery by applying friction cylinders."—Dated 23rd January, 1857; expired 23rd January, 1859.

38. Ludwig Amadeus Magnaghi, for "A baking oven with an alternate ventilation and new mode of bringing bread in and out."—Dated 23rd January, 1857; expired 23rd January, 1859.

39. Johann Vincenz Maria Dopter, for "Printing tissues by means of powder colours."—Dated 23rd January, 1857; expired 23rd Jrnuary, 1859.

40. Johann Vincenz Maria Dopter, for "Printing tissues by means of mordants in a powdered state, and by applying all known methods."—Dated 23rd January, 1857; expired 23rd January, 1859.

41. Johann Evangelist Hölbling, for "Obtaining economical manure from a mixture of organic and inorganic substances."—Dated 29th January, 1857; expired 29th January, 1859.

42. Eduard Zimmermann, for "Improvements in metal springs for fastening hair dresses."—Dated 31st January, 1857; expired 31st January, 1859.

43. Joseph Mohr and Sons, for "Obtaining merino yarn from a mixture of cotton and wool."—Dated 1st January, 1858; expired 1st January, 1859.

44. Christian Rahlenbeck, for "Improved incombustible mineral silicious pasteboard for covering houses."—Dated 1st January, 1858; expired 1st January, 1859.

45. Friedrich Maximilian Bode, for "A direct rotary steam engine with peculiar condensors."—Dated 2nd January, 1858; expired 2nd January, 1859.

46. Johann Rumpel, for "Obtaining seamless woollen hats and bonnets by machinery."—Dated 2nd January, 1858; expired 2nd January, 1859.

47. Franz Glembowiecky and Simon Etz, for "Improvements in double smoothing planes and double jack planes."—Dated 4th January, 1858; expired 4th January, 1859.

48. Christian Seinig, for "An apparatus for extracting the juice from beetroot and for protecting the same from discolouring."—Dated 5th January, 1858; expired 5th January, 1859.

49. Anton Luraschi, for "Hollow and grooved cushions of billiard tables."—Dated 6th January, 1858; expired 6th January, 1859.

50. Ferdinand Machts, for "Improvements in the manufacture of wooden screws, rivets, nails, and other forged articles."—Dated 7th January, 1858, expired 7th January, 1859.

51. G. Pfannkuche and C. Scheidler, for "Improvements in the manufacture of fire-proof iron chests."—Dated 7th January, 1858; expired 7th January, 1859.

52. Gustav Temesvar, for "Manufacturing waterproof boots and shoes." — Dated 7th January, 1858; expired 7th January, 1859.

53. Anton Himmelbauer and Co., for "Improvements in the manufacture of stearic acid, whereby a great saving in sulphuric acid and lime is obtained."—Dated 7th January, 1858; expired 7th January, 1859.

54. Johann Paul, for "Improvements in the construction of oil-distilling apparatus."—Dated 12th January, 1858; expired 12th January, 1859.

55. Joseph Blazek, for "A machine for splitting leather." — Dated 14th January 1858; expired 14th January, 1859.

56. Gabriel Barth, for "A system of constructing vessels whereby their sides are prevented from giving way through the pressure of heavy loads."—Dated 14th January, 1858; expired 14th January, 1859.

57. Bernhard Fischer, for "Improvements in the manufacture of convenient men's dresses."—Dated 14th January, 1858; expired 14th January, 1859.

58. The St. Georg Engine Works and Iron Foundry, at St. Gallen, Switzerland, for "A rotary machine for husking rice and rolling barley."—Dated 15th January, 1858; expired 15th January, 1859.

59. Joachim Peter Shews Harder, for "Artificial leeches."—Dated 18th January, 1858; expired 18th January, 1859.

60. Joseph Szaller, for "A new basis in the construction of pianofortes by using two iron plates."—Dated 16th January, 1858; expired 16th January, 1859.

61. Carl Hornbostel, for "Improvements in cast-iron sidings and switches of railways."—Dated 19th January, 1858; expired 19th January, 1859.

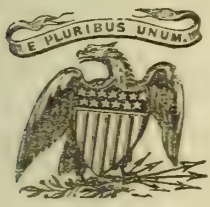
62. Johann Pack, for "Construction of so-called 'universal journal and lubricating boxes for the axles of railway carriages by using solid and fluid grease.'"—Dated 28th January, 1858; expired 28th January, 1859.

63. Peter Julius Thouret, for "A peculiar process for protecting wood and fabrics from the propagation of fire, and for preserving wood."—Dated 28th January, 1858; expired 28th January, 1859.

64. Leopold Gumbiner, for "A peculiar mashing and cooling apparatus of distilleries."—Dated 28th January, 1858; expired 28th January, 1859.

65. Veit Steiner, for "Improvements in the manufacture of wooden pegs."—Dated 28th January, 1858; expired 28th January, 1859.

66. Daniel Popper, for "Obtaining fecula from amylaceous grains through washing, and applying the gluten thereof to various technical purposes."



—Dated 29th January, 1858; expired 29th January, 1859.

67. Robert Hora and Anton Kopezky, for "An electro-motor applicable as a motive power." — Dated 29th January, 1858; expired 29th January, 1859.

68. Ignaz Martin Guggenberger, for "Improvements in the construction of railways for common carriages, and for using all kinds of railways for carriages with wheels without flanges."— Dated 9th March, 1857; expired 9th March, 1859.

69. Johann Littloch, for "Improvements in the manufacture of fireproof doors of chimneys."— Dated 18th June, 1858; expired 18th June, 1859.

70. Peter Strasser, for "Varnish for waterproofing white and grey summer felt hats."— Dated 1st January, 1853; expired 1st January, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 27th September, 1859, and each bearing that date.

No. 25,553. Abel Austin, of Altona, Ill., for an "Improved churn."

"I claim the arrangement of the shaft *a*, cranks *a*, a^1, a^{11}, dashers D, E, E, handles D^1, *e*, *e*, links *b*, *b*, *b*, springs *c*, *c*, *c*, box *i*, *i*, spring *g*, and lid F, F^1, together, the same being connected, combined, and constructed substantially as and for the purpose specified."

No. 25,554. Wm. B. Barnard and Edmund Jordan, of Waterbury, Conn., for an "Improved rotary blower."

"We claim the diaphragm *l*, in combination with the revolving propeller or propellers *k*, to deflect the blast to the mouth or opening *f* as the blower revolves in the case *e*, substantially as set forth."

No. 25,555. Elbridge G. Belknap, of Philadelphia, Pa., for an "Improved camp stool."

"I claim the combination of the case and seat frame with the swivel blocks, braces, and connecting rod, the whole being arranged substantially in the manner herein specified and described."

No. 25,556. Lewis Reese Carpenter, of Lancaster, O., for an "Improvement in seed planters."

"I claim the arrangement of the beam A, handles C, C, braces D, D, furrowing scraper E, and seed box F, with the planting slide H, lever N, wheel S, and covering scrapers L, I, the whole being constructed for joint operation as described, for the purpose set forth."

No. 25,557. Edwin S. Collins and Thos. N. Reed, of Aspen Wall, Va., for an "Improvement in machine for preparing tobacco for pressing."

"We claim the arrangement of two, three, or more pairs of progressive pressure rollers with each other, substantially in the manner and for the purpose herein set forth. We also claim combining a series of oil vessels and oiling pads with the aforesaid pairs of pressures rollers, substantially in the manner herein set forth."

No. 25,558. John Critcherson and Eri S. Moulton, of Boston, Mass., for an "Improvement in machines for splitting welts."

"We claim the beveled grooves *n* and *x*, constructed and arranged in reference to each other on the cylinder C and D, and operating in combination with the adjustable cutter H, substantially as set forth and for the purposes described."

No. 25,559. Tobias Crumbling, of Hellam, Pa., for an "Improvement in harvesters."

"I claim the arrangement and combination, as herein shown and described, of the independent platform K with the frame L^1, belt M^1, and driving axle C, for the purpose set forth."

No. 25,560. Geo. S. Curtis, of Chicago, Ill., for an "Improvement in reels for harvesters."

"I claim the employment of sliding heads B, and pivoted arms C, and bars E, in combination with the reel shaft A and beaters D, substantially as herein shown and described, so that the diameter of the reel can be expanded or contracted, as and for the purpose set forth."

No. 25,561. Jacob D. Custer, of Norristown, Pa., for an "Improvement in harvesters."

"I claim, first, the main shoe A, A, A, constructed in the manner described, in combination with the bars J, J, of main frame and supporting bar T, arranged and operating in the manner described, for the purpose set forth. Second, the caster wheel L, in combination with lever M and adjustable plate N, when the parts are constructed, arranged, and operated in the manner described, for the purpose specified, substantially as set forth."

No. 25,562. J. S. Davison, of Cranberry, N. J., for an "Improved telegraphic cable."

"I claim arranging a series of loose metal strips *a* in a coil A, or its equivalent, substantially as and for the purpose described."

No. 25,563. Eben Eaton, of Cincinnati, O., for an "Improved bedstead."

"I claim the construction of bed posts with the wedge-formed part and the square piece attached, so as to form a shoulder to receive the rail, in combination with the bottom or platform of a bedstead, with the rails formed so as to fit the posts above described, and all permanently connected together by means of cross pieces, substantially as specified."

No. 25,564. G. D. Foote, of Danbury, Conn., for an "Improvement in the mode of coloring woolen hats."

"I claim the within-described process of restoring the color of the hats after they have been dipped in the stiffening and rubbed off with sand paper, by applying the hot dying liquid, substantially in the manner herein specified."

No. 25,565. John Fritz and Geo. Fritz, of Johnstown, Pa., for an "Improvement in rolling mills."

"We claim the application to each of the pairs of drawing or forming rolls of a feed roll, such as described, and driven by gearing or other machinery, and turning in the same direction with said drawing or forming rolls, for the purpose of carrying and feeding into them the pile or bar of heavy iron, substantially as described."

No. 25,566. Harvey Guild, of New Orleans, La., for an "Improvement in apparatus for washing gas."

"I claim the arrangement of the water pipe G, and rose H, within the inlet pipe of the wash box A, in combination with the perforated plate or diaphragm F, at the junction of the inlet pipe with the wash box, substantially as herein described."

No. 25,567. Noah E. Hale, of Nashua, N. H., for an "Improved belt-hook, pliers, and punch."

"I claim, first, the combination of the roughened surfaces O and H, with the triangular wedge end G, arranged in relation to each other, substantially as and for the purposes set forth. Second, the combination of the jaws E, F, with the punch J, roughened surfaces O, H, and wedge end G, the whole being constructed and arranged as and for the purposes set forth."

No. 25,568. John Howarth, of Salem, Mass., for an "Improvement in method of distilling oil from coal."

"I claim forming oleaginous vapors from coal or other substances yielding pyrogenous oil, by passing through the material to be acted upon a current of superheated steam, in combination with steam direct from the boiler, substantially in the manner and for the purposes set forth. I also claim forming oleaginous vapors from coal or other substances yielding pyrogenous oils, by passing through the material to be acted upon, air combined with superheated steam, substantially in the manner and for the purposes set forth."

No. 25,569. Tyler Howe, of Cambridgeport, Mass., for an "Improved bedstead slats."

"I claim the within-described bed slat, consisting essentially of the lifter A, in combination with the slat, constructed and operating in the manner substantially as herein set forth. Also, the construction in the ends of the slats by which they are connected with the bedstead or springs, as shown by C and D, and as herein described."

No. 25,570. Edwd. C. Knight, of Philadelphia, Pa., for an "Improved mode of arranging couches in railroad cars."

"I claim, 1st, the arrangement of couches in railroad cars by means of the double-hinged rod C, C, constructed as described, in such a manner that the couch when not in use may be folded up against the ceiling, and retained there by means of a button or suitable device, substantially as herein described."

No. 25,571. W. Kuhlenschmidt, of New York, N. Y., for an "Improved screw wrench."

"I claim the arrangement and combination of the conical disk E with the helical groove *c*, the spring *d*, the movable jaw C, and the shank B, to operate substantially as and for the purpose set forth."

No. 25,572. James Allen Lowe, of New York, N. Y., for an "Improvement in moulding water traps."

"I claim the application of a metallic core, constructed and operating substantially as herein described, to cast water traps."

No. 25,573. James L. Meafoy, of Middletown, N. Y., for an "Improvement in cooking stoves."

"I claim the cylindrical fire chamber F, air chamber G, communicating with the fire chamber and the heater chamber I, when combined and arranged relatively with each other and the oven B, for the purpose set forth. I also claim, in combination with the fire chamber F, air chamber G, and heater chamber I, arranged as shown, the perforatedplate K, placed in the flue C, relatively with the fire chamber, for the purpose set forth."

No. 25,574. Z. N. Morrel, of Cameron, Texas, for an "Improvement in machines for distributing fertilizers."

"I claim the combined arrangement of the single side wheel D, distributing wheel C, regulating slide I, revolving arms L, boot K, set screws J, shares *d*, *d*, cog wheels E^1, E^2, draft rod S, sprocket wheels F^1, F^2, roller H, and chain G, in the manner and for the purposes set forth."

No. 25,575. Geo. M. Mowbray, of Green Point, N.Y., for an "Improvement in process of distilling oils from coal."

"In the manufacture of coal, oil, and other pyrogenous oils, by exposing the coal or other materials to the products of combustion generated in a separate furnace, I claim igniting said products of combustion previous to admitting the same into the distilling kiln, by admixture of a sufficient proportion of air, to burn the oxide of carbon into carbonic acid, substantially as described, and for the purposes set forth."

No. 25,576. Geo. Munger, of New Haven, Conn., for a "Writing tablet."

"I claim a new article of manufacture, to wit, an argillaceous surfaced wood writing slate, which is formed by uniting several layers of veneering or thin wood together, so that their grains run antagonistic to one another, and then coating the exterior surfaces of the compact mass with a composition of slate, emery, or other similar argillaceous material, substantially as and for the purposes set forth."

No. 25,577. S. D. Newbro, of Lansing, Mich., for an "Improved bed spring."

"I claim the employment of the oblong plates *a*, *a*, *a*, whether made of wood or of metal, or any other suitable material, when the same are secured together, substantially as and for the purpose set forth."

No. 25,578. Rufus Nutting, of Randolph, Vt., for an "Improved manufacture of wire cloth."

"I claim compressing wire-cloth, by passing it between rollers suitably constructed, or by equivalent means, whereby its surfaces are rendered smooth and even, in the manner and for the purposes substantially as specified."

No. 25,579. Oscar Paddock, of Watertown, N.Y., for an "Improvement in stoves."

"I claim the damper *c* arranged over the pipe *b*, through which a direct communication between the fire-place and the chimney is effected and operated by means of a rod *k*, or its equivalent, which is secured to the door B, and which acts against a forked lever *g*, substantially as and for the purpose specified."

No. 25,580. Andrew Patterson, of Birmingham, Pa., for an "Improvement in manufacture of hoes."

"I claim the improvement in the manufacture of hoes, herein substantially described, viz., forming the head or eye of a hoe, and attaching it to the blade at the same time, by pouring the molten metal to form the head, on or around the blade, substantially as described and set forth."

No. 25,581. Edward L. Perkins, of Roxbury, Mass., for an "Improved construction of packing boxes."

"I claim, first, forming the sides, ends, bottom, and top of the box with, or attaching thereto, the right angular-shaped braces, or shoulders *g*, *g*, &c. formed with beveled corners, so as to make a close and binding joint, as described. Second, in combination with the above, I claim the cover formed in two wedge-shaped pieces, or in any manner substantially similar, whereby all the parts constituting the box are drawn and held rigidly together, as set forth."

No. 25,582. Jane Phillips, of New York, N. Y., for an "Improvement in muffs."

"I claim a muff A, arranged with a cut *b* in its outside covering or shell, an annular space or pocket *a*, and a portmonnaie D, secured in its inner part, the whole constructed in the manner and for the purpose specified."

No. 25,583. Joseph F. Pond, of Cleveland, O., for an "Improvement in the hoops of skeleton skirts."

"I claim the combination of the eye *e* on one extremity of the hoop, with the series of set offs *a*, on the other, constructed and operated, substantially as and for the purposes set forth."

No. 25,584. C. W. Pyle, of Galveston, Texas, for an "Improvement in securing iron bands on cotton bales."

"I claim a plate, constructed with a short open slot, a long closed slot, and a turned-down lip, or flange, substantially as described, and for the purposes set forth."

No. 25,585. Cornelius J. Rooney and David Renshaw, of New York, N.Y., for an "Improved spring hinge."

"We claim the arrangement of the coiled spring E shaft C, and wings A and B, in combination with each other as described, for the purposes stated, when the parts are constructed, substantially as herein set forth."

No. 25,586. Abbott Q. Ross, of Cincinnati, O., for an "Improvement in burglar's alarm."

"I claim connecting the doors or windows of a house to an alarm mechanism, through a system of strained wires, so that the forcing of a door, or the cutting of any wire, shall let off the alarm mechanism, substantially in the manner described. I also claim so connecting the panels of a door with the strained wires that unite the door with the alarm mechanism, as that the cutting out of a panel, or the cutting of one of their wires shall let off the alarm mechanism, substantially as herein described. I also claim the combination of the swinging lever *t* on the door with the bolt *r*, and its inclined plane S that locks the spring drum J, for the purpose of putting said door in connection with the alarm mechanism, when said door is drawn to and shut from the outside, substantially as herein described and represented."

No. 25,587. John Rouse, of Port Gibson, N.Y., for an "Improvement in horses' harness."

"I claim the double-eyed hook D, arranged as described in the yoke ring C, so as not to be withdrawn therefrom, in combination with said ring, and with the divided hame straps E, E^1, which are respectively secured to the opposite eyes of the hook, for the purposes herein specified."

No. 25,588. John Sparrow, of Portland, Me., for an "Improved steam-punching machine."

"I claim the employment, for the purposes specified, of a single-acting cylinder and piston, operated by the pressure of steam water, or other fluid, and a toggle, combined with and arranged and applied relatively to each other, and the punch or cutter, substantially as herein described."

No. 25,589. Peter M. Statzell, of Philadelphia, Pa., for an "Improved method of operating independent second hands of stop watches."

"I claim, first, the independent seconds' hand M, adapted to a watch, substantially in the manner herein set forth, so that by means of the devices herein described, or their equivalents, the said hand may be connected to, or disconnected from the time train of the watch, without interfering with the movements of the latter, for the purpose specified. Second, the stop arm N, with its forked end so adapted to the hollow arbor L, as to serve the purpose of stopping and releasing the said arbor, and at the same time serving to maintain it in its proper vertical position. Third, the wheel P, with the springs *f*, *f*, in combination with the hollow arbor L, of the independent seconds' hand, the wheel being hung loosely to, and the springs bearing against the said arbor, as and for the purpose set forth."

No. 25,590. Wm. S. Stetson, of Baltimore, Md., for a "Safety envelope."

"I claim the mode of giving security to letter and other envelopes, substantially as herein-before set forth, the same consisting in waterproofing that part of the envelope upon which the adhesive material is applied."

No. 25,591. John Stevens and John Johnson, of New York, N.Y., for "Improvements in construction of gas-burners."

"We claim the apertures B, B^1, in combination with the movable slide C, or its equivalent, substantially as herein described, whereby the area of the passage for the gas or vapor is contracted at pleasure, at the point of its exit into the atmosphere, and the volume of the flame is diminished, without substsntially changing its character. We also claim the arrangement of the branches B, B^1, diverging from a single pipe A, and pressing by their elasticity against the opposite side of the slide C, for the purposes herein explained."

No. 25,592. J. C. Stoddard, of Worcester, Mass., for an "Improved chamber utensil."

"I claim a chamber vessel, provided with a flange (*a*), (*c*), and elastic ring (*b*), made as herein shown and described, so as to form a tight joint, and also to prevent noise, as set forth."

No. 25,593. Joseph N. Treadwell, of Redding, Conn., for an "Improvement in machines for scouring and hulling buckwheat."

"I claim, the arrangement of the revolving and graduated screens, with the hoppers, conveyors, blasts, and conductors, in the manner and for the purpose herein described."

No. 25,594. Richard Ward, of Edinburg, Ind., for an "Improvement in smut machines."

"I claim the employment of the corrugated iron plate (C), having the horseshoe perforations (*c*), in combination with the iron plate (D), having the diamond perforations (*b*), in the construction of a perforated scouring and separating cylinder (B), all being arranged to operate substantially as and for the purposes set forth."

No. 25,595. S. J. Wasterbarg, of Altona, Ill., for an "Improvement in seed planters."

"I claim the arrangement of the block A, provided with chambers (C), and chambers (B), with the rods (D), shaft *a*, handle F, hopper H, spring I, slides (E), and spring (G), substantially in the manner and for the purpose herein set forth."

No. 25,596. C. L. Whitney and Samuel Reed, of Geneseo, Ill., for an "Improvement in stoves."

"We claim the arrangement of deflecting plate F, chamber C, graduating damper J, and flue pipes H, H, in the four corners of the oven, all in combination for the purposes herein set forth; and 2nd, in combination with this, we claim the use of pipes of clay or other similar material, when the same are arranged in the manner and for the purposes above specified."

No. 25,597. A. B. Weaver, of Carthage, Ind,, for an "Improved abdominal supporter."

"I claim the employment of the hip pads F, F, and center hip straps *i*, *i*, in combination with the straps A, A^1, arranged substantially as described, for the purposes set forth."

No. 22,598. Zatter F. Wilder, of Painted Post, N.Y., for an "Improvement in method of raising water by animal power."

"I claim the arrangement of a series of platforms, in combination with a pump, so that a series or a succession of strokes of the pump piston shall be produced before the cattle arrive at the drinking trough, substantially as and for the purposes herein set forth."

No. 25,599. Reuben Wood, of Grand Ledge, Mich., for an "Improved hand punch."

"I claim, first, the peculiar relative arrangement of the two series of inclined planes on the contact faces of the circular plates C^1, C^2, C^3, to be used either with or without interposed balls or rollers, in the manner and for the purposes substantially as specified. Second, I claim the use of the slotted tube I, in combination with the two inclined ways P, P, and cross bar J, (with or without the rollers R, R,) constructed and arranged, substantially as herein described, for the purpose of extricating and lifting a punch or other tool, in the bar E, by a reversed motion of the lever."

No. 25,600. John Wilson, of Anderson, C. H., So. Ca., for an "Improvement in cotton gins."

"I claim, 1st, the employment or use of three or more toothed or serrated cylinders D, arranged and disposed so as to operate substantially as and for the purpose set forth. 2nd, in connection with the cylinders D, thus arranged and disposed, the rotating stripping brushes M, and adjustable plug or register P, to ensure respectively the proper discharge of the lint and the seed."

No. 25,601. Henry W. Wimshurst, of Dalston, England, for an "Improved manufacture of sheet metal."

"I claim the improvement herein described in the manufacture or production of the sheet metal or metal foil, as an article of manufacture and trade by cutting the same from a block or solid mass by means of a cutting mechanism, in lieu of rolling or beating the same by means of a rolling or beating mechanism, as this has heretofore been done."

No. 25,602. O. D. Barrett, of Clevelend, O., assignor to himself and J. F. Keeler, of same place, for an "Improved door spring."

"I claim the levers D and E in combination with the connecting rod F and the springs H, H, constructed and operated as specified."

No. 25,603. James Decker, of Reidsville, Geo., assignor to himself and A. P. McRae, of same place, for an "Improved stave machine."

"I claim the combination and arrangement of the convex and concave cutters *a*, *f*, bed piece C, tonguing and grooving

cutters in the heads L, L¹, and the cam H, attached to the pressure hub or roller G, and lever N, connected with said cam, and the shaft K¹ of cutter head L¹, substantially as and for the purpose set forth."

No. 25,604. Francis Dixon, of Lynn, Mass., assignor to himself and Moses Sweetser, of Newbury Port, Mass., for an "Improvement in the manufacture of cigar wrappers."

"I claim a new article of manufacture for the special purpose as above set forth, the same consisting of tobacco leaf reduced to pulp, and subsequently converted into sheets, or other desirable form suitable for use, or in the making of cigar wrappers, as explained.

No. 25,605. Luther Hall, of Boston, Mass., assignor to himself and S. S. Hemenway, of same place, for "A machine for shaping heels for boots and shoes."

"I claim the combination of the stationary bed plate A the movable cutter carriage D (provided with self-adjusting cutters O, P, and carriers I, K,) adjustable clamps S, T, a guide friction wheel N, and a curved rack and pinion, the whole being arranged and made to operate together substantially in manner for the purpose set forth. I also claim combining with the adjustable clamps S, T, (constructed as herein-before described) an adjustable holder and former Y, so constructed and arranged as not only to co-operate with the clamp in maintaining the heel of the boot or shoe firmly in position, but to serve as a pattern to give to the heel any desirable contour on its bearing surface. I also claim the peculiar construction of the secondary cutter carrier herein set forth, and the arrangement of the secondary cutter with respect to the primary cutter, the guide friction wheel, and the heel tread former Y, whereby the secondary cutter is rendered capable of giving to the lower or bearing surface of the heel any form that may be desired."

No. 25,606. John Keane, of New York, N. Y., assignor to himself and Andrew McLean Wood, of same place, for an "Improvement in bungs of casks."

"I claim providing a bung or spigot with reservoir for spirit, and a system of pipes or passages *a*, *b*, or their equivalent, so arranged as to cause all the air entering the cask to pass through the spirit in said reservoir, substantially as and for the purpose specified. And in combination with such a reservoir and system of pipes and passages, or their equivalents, I claim a valve *c*, applied to the bung or spigot, substantially as and for the purpose herein specified."

No. 25,607. James McFarlan, of Brooklyn, N.Y., assignor to James McFarlan, jr., and E. McFarlan, of same place, for an "Improved portable gas holder."

"I claim the construction of the gasometer with its upper portion B, C, of conical form, with flexible sides and with a stiff head, and of such size that it may be introverted, substantially as herein described, within the stationary tank-like portion A, to which its flexible sides are attached."

No. 25,608. Jefferson Nash, of Janesville, Wis., assignor to himself and Alonzo K. Cutts, of Fulton, Wis., for an "Improvement in grain separators."

"I claim the arrangement and combination of the vibrating lever E, the elbow crank *f*, and the rods *e* and *h*, whereby the motion of the shoe can be changed from a longitudinal to a transverse direction, and vice versa, substantially as herein described."

No. 25,609. August Schmidt, of New York, N.Y., assignor to himself, Charles Schmidt, Edward Schmidt, and Herman Schmidt, of same place, for an "Improvement in apparatus for making gas from wood."

"I claim the arrangement of the arched shaped retort *a*, and narrow flues (*g*, *g*¹, &c..) within the arch of the retort in the manner and for the purposes substantially as specified."

No. 25,610. August Schmidt, of New York, N.Y., assignor to himself, Charles Schmidt, Edward Schmidt, and Herman Schmidt, of same place, for an "Improvement in apparatus for making gas from rosin."

"I claim the retorts *c*, and its flues *e*, *e*, combined with the receptacle or kettle *g*, and arranged in the manner and for the purposes specified."

No. 25,611. Geo. Hand Smith, of Rochester, N.Y., assignor to Silas O. Smith, of same place, for an "Improved apparatus for the production of Hare's hydro-oxygen light."

"I claim, I, the use of carburetted hydrogen gas in combination with atmospheric air, or oxygen gas, in proportions desired, operating under condensation, through a proper regulator, and discharging through jets of minute orifice, upon and rendering incandescent any proper radiating material of any form, being independent of any atmospheric circumstances or situation in the manner and through the means and machinery, substantially as herein-before described. II. The arrangement of four jets or burners for directing the impact of gases on incandescent surfaces; such burners having minute orifices of discharge shall be within or nearly within one quarter of the circumference of a circle drawn through them from the center, to which they point (being not more than one-eighth of such circumference distant from each other,) and the orifice of the fourth, being diametrically opposite in such circle to the middle orifice of the other, thus substantially as before described."

Re-issues.

Elliot Savage, of Berlin, Conn., assignor to himself and Chas. Parker, of Meriden, Conn., for an "Improvement in machine for threading screw blanks."—Patented 21st November, 1854.—Re-issued 27th September, 1859.

"I claim the method herein described of causing the chasing tool to act upon the screw blank in producing both the cylindrical part and the tapering point, that is to say, by so governing the relative positions of each to the other, that while threading the cylindrical portion the chasing tool shall be presented at a right angle to the axis of rotation of the blank, and while cutting the tapering part, shall be so inclined acutely to said axis that the line of travel of the face of the chaser shall finally intersect said axis, substantially as set forth."

Elliot Savage, of Berlin, Conn., assignor to himself and Chas. Parker, of Meriden, Conn., for an "Improvement in machines for threading screw blanks."—Patented 21st November, 1854.—Re-issued 27th September, 1859.

"I claim as an improved article of manufacture, a wood screw of which the entering end is made to taper in the manner and for the purposes substantially as set forth, that is to say, by giving to the core thereof a form bounded in any plane which passes through the axis of rotation, by lines which converge toward, and if produced will intersect said axis, in contra-distinction to the known form wherein the bounding lines in such planes are parallel to said axis."

Joshua Regester, Wm. Geo. Webb, John L. Roche and John McCart, of Baltimore, Md., assignees of John Culver, of same place, for an "Improved waste device for hydrants."—Patented 22nd April, 1856.—Re-issued 27th September, 1859.

"We claim, the described arrangement of the plunger relative to the discharge pipe, and capable of elevation, proportional to the capacity of said pipe, by forming a chamber in the lower portion of the hydrant for the reception of the contents of the discharge pipe. Also in combination, the arrangement of the valve C, by means for operating it by the spring H, substantially as and for the purposes specified."

Jos. W. Bartlett, of New York, N. Y., assignee of O. L. Reynolds, of Dover, N. H., for an "Improvement in sewing machines."—Patented 14th May, 1850.—Re-issued 27th September, 1859.

"I claim, first, the employment and use, in a sewing or tamboring machine, of a needle or thread carrier, having a

movable or flexible beard or hook, and also the combination with said needle or thread carrier of a mechanism for closing the beard thereof. Second, the combination with a bearded instrument, used as before described, of the thread guide V, having the motions described, such as shall carry the thread across the path of the bearded instrument and present it to the action thereof without carrying the thread around the shank of the said bearded instrument, in the manner set forth and described. Third, the combination of the cam G, lever O, and guide V, with a spring, whereby the thread is presented to the action of the bearded instrument, as set forth."

SAMUEL MORRILL, of Andover, N. H., for an "Improvement in clothes dryers."—Patented 14th November, 1856.—Re-issued 27th September, 1859.

"I claim, first, tilting the reel to the desired position to enable a person to place the clothes on the lines without high reaching, and elevate them in good position to dry, and out of the way of injury, substantially as set forth. Second, arranging and combining with a rotary tilting reel the ratchet G and a pawl H (or their equivalents), for preventing backward rotary motion of the reel as the clothes are placed on the lines and moved along, substantially as set forth. Third, operating the reel by the combined action of the arm C, jointed arm or lever E, and loop or staple F, or its equivalent, substantially as set forth and for the purpose specified."

EPHRAIM BALL, of Canton, Ohio, assignor to Ball and Butler, and BALL and BUTLER, assignors to Ephraim Ball aforesaid, for an "Improvement in mowing machines."—Patented 1st December, 1857.—Re-issued 27th September, 1859.

"I claim, first, I claim the combination of the short curved armed R, with the bar Q, and finger bar P, the whole constructed and arranged for joint operation substantially as and for the purposes above set forth. Second, I claim the combination of the coupling arm with bar Q, wrist *f*, socket *h*, hinge *g*, and short finger beam P, substantially as and for the purposes set forth. Third, I claim extending the coupling arm R outside of the frame, in combination with the front hinges of bar Q, also outside of the main frame, when the parts are constructed and arranged in the manner substantially as described, whereby greater freedom of the movement of the cutting apparatus is secured."

EPHRAIM BALL, of Canton, Ohio, assignor to Ball and Butler, and BALL and BUTLER, assignors to Ephraim Ball aforesaid, for an "Improvement in mowing machines."—Patented 1st December, 1857.—Re-issued 27th September, 1859.

"I claim the combination of the independent driving wheel B^1 at the grain side of the machine, with the hinged bar Q, to which the short finger beam is rigidly attached, and the hinged coupling arm, whereby the cutting apparatus may rise and fall freely, and the cutters be kept in operation while turning to the left upon uneven ground, substantially as described."

DESIGNS.

SOLOMON B. ELLITHORP, of New York, N.Y., for a "Design for the frame of a sewing machine."

"I claim the design for a sewing machine illustrated and shown in the accompanying drawing."

B. M. JOHNSON, of New York, N.Y., for a "Design for gas-cocks, &c."

"I claim the use of the devices herein-before described, as adapted and used for ornamenting cocks, couplings, brackets, and other parts of gas-fixtures and chandeliers, as set forth."

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHEELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 & 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I., to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Time-keepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*

The following are in the press:—

Electricity and Magnetism: their Generation and Applications.
Preparation of Fuel, and Apparatus for its Combustion.
Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 604. TUESDAY, OCTOBER 18, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1368. JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in reducing solid substances to powder, and in the machinery or apparatus employed therein."—A communication from abroad by William James Cantelo, of Burlington, Burlington county, state of New Jersey.

As set forth in his petition, recorded in the said office on the 3rd day of June, 1859.

1383. And JAMES FERRABEE, of the Phœnix Iron Works, Stroud, in the county of Gloucester, Engineer, has given the like notice in respect of the invention of "Improved machinery for forming bats of fleece or sheet silver, and also for folding cloth and other fabrics."

As set forth in his petition, recorded in the said office on the 6th day of June, 1859.

1386. And KENNETH HENRY CORNISH, of 5, Essex Court, Middle Temple, Surgeon, M.R.C.S., F.M.S., has given the like notice in respect of the invention of "Improvements in bedsteads, sofas, couches, and chairs, applicable to other seats or reclining surfaces."

As set forth in his petition, recorded in the said office on the 7th day of June, 1859.

1408. And GEORGE JAMES FARMER, of Hampton Street, Birmingham, in the county of Warwick, Machinist, and GEORGE BRIGGS HARDY, of Alexander Place, Brompton, in the county of Middlesex, Chemist, have given the like notice in respect of the invention of "Improvements in stair rods and eyes or sockets which are also applicable for other purposes."

As set forth in their petition, recorded in the said office on the 10th day of June, 1859.

1416. And FRANCIS PALLING, of Esher Street, Lambeth, county of Surrey, Clerk, has given the like notice in respect of the invention of "Improvements in the construction of lamps for the purpose of burning tallow, grease, or oils, either singly or in combination."

1417. And THOMAS FREDERICK HENLEY, of Denbigh Street, Pimlico, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in obtaining alcohol or spirit from rice and other grain, and in apparatus for that purpose."

1421. And GEORGE CLAUDIUS ASH, of West View, Hampstead, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the manufacture of artificial teeth."

As set forth in their respective petitions, all recorded in the said office on the 11th day of June, 1859.

1422. And BENJAMIN BAUGH, Manager of Salt's Patent Enamel Works, Bradford Street, Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "Certain improvements in apparatus or machinery for raising metals."

1425. And ARTHUR SMITH, of 4, Stafford Terrace, Loughborough Road, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in bleaching and purifying bees' wax."

As set forth in their respective petitions, both recorded in the said office on the 13th day of June, 1859.

1432. And JOHN DIXON, of Bishopwearmouth, in the county of Durham, Engineer, has given the like notice in respect of the invention of "Improvements in puddling steel."

1435. And ALEXANDER MACDONALD, of Manchester, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Certain improvements in machinery or apparatus for punching patterns or devices upon metallic printing rollers or cylinders."
As set forth in their respective petitions, both recorded in the said office on the 14th day of June, 1859.

1441.. And EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., has given the like notice in respect of the invention of "An improved night lamp clock." — A communication from abroad by Louis Montanari, of Lyons, in the empire of France.

1446. And NICHOLAS CHARLES SZERELMEY, of No. 6, Park Terrace, Brixton Road, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in preparing combinations of materials for preventing rust in iron and other metals, and decay in timber."

1447. And CHARLES HENRY WARING, of Neath Abbey, in the county of Glamorgan, Mining Engineer, has given the like notice in respect of the invention of "Improvements in safety lamps."
As set forth in their respective petitions, all recorded in the said office on the 16th day of June, 1859.

1458. And HENRI EVETTE, of Lisieux, department of the Calvados, in the empire of France, Manufacturer, has given the like notice in respect of the invention of "A new system of bedding."

1466. And JOHN COMBE, of Leeds, in the county of York, Engineer, and ROBERT SMALPAGE, of the same place, Woollen Draper, have given the like notice in respect of the invention of "Improvements in winding and spinning machinery, and in arranging and securing a uniform delivery from cops, to be used as weft or warp, or for other purposes."
As set forth in their respective petitions, both recorded in the said office on the 17th day of June, 1859.

1479. And JOHN COX, Saddlers'-Ironmonger, of Birmingham, in the county of Warwick, and SAMUEL FRANKHAM and MOSES FRANKHAM, Bit, Stirrup, and Spur Manufacturers, of Walsall, in the county of Stafford, have given the like notice in respect of the invention of "Certain improvements in spurs for military and general use."
As set forth in their petition, recorded in the said office on the 20th day of June, 1859.

1495. And WILLIAM COLES FULLER, of No. 2, Bucklersbury, Cheapside, London, Patent Spring Manufacturer, has given the like notice in respect of the invention of "Improvements in india-rubber shackles, and in springs for carriages, and the metal fittings connected therewith."
As set forth in his petition, recorded in the said office on the 21st day of June, 1859.

1510. And ALEXIS JEAN DESSALES, of No. 13, Rue des Enfans Rouges, Paris, in the empire of France, has given the like notice in respect of the invention of "An improvement in the working and securing of sliding tubes applicable to gas chandeliers, lamps, and other purposes."
As set forth in his petition, recorded in the said office on the 23rd day of June, 1859.

1518. And AUGUSTE CHESNEAU, of 29, Boulevart St. Martin, Paris, in the empire of France, Merchant, has given the like notice in respect of the invention of "Improvements in paddle wheels."
As set forth in his petition, recorded in the said office on the 24th day of June, 1859.

1537. And THOMAS LEIGH, of St. Mary Cray, in the county of Kent, Millwright and JOB LINE, of the same place, Paper Maker, have given the like notice in respect of the invention of "An improvement in paper-making machinery."
As set forth in their petition, recorded in the said office on the 27th day of June, 1859.

1548. And ISAAC TIREBUCK, of Windsor Court, in the city of London, Printer, has given the like notice in respect of the invention of "Improved machinery for printing from engraved plates."
As set forth in his petition, recorded in the said office on the 29th day of June, 1859.

1555. And RICHARD KAY, Cotton Spinner, JOHN MANOCK, Manager, JOHN WHITTAKER, Mechanic, and THOMAS BOOTH, Operative Cotton Spinner, all of Heywood, in the county of Lancaster, have given the like notice in respect of the invention of "Improvements in machinery for slubbing, roving, spinning, and doubling cotton and other fibrous materials."
As set forth in their petition, recorded in the said office on the 30th day of June, 1859.

1621. And WILLIAM WAITE, of York House, No. 48, Baker Street, Portman Square, in the county of Middlesex, has given the like notice in respect of the invention of "Manufacturing bonnets, hats, and other articles, partly or entirely from the leaves of the palm tree or other flat or thin material."
As set forth in his petition, recorded in the said office on the 8th day of July, 1859.

1699. And FREDERICK COLLIER BAKEWELL, of No. 6, Haverstock Terrace, Hampstead, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in extracting oils from coal and other minerals."—A communication from abroad by David Alter and Samuel A. Hill, of Pitsburgh, in the United States of North America.
As set forth in his petition, recorded in the said office on the 19th day of July, 1859.

1756. And PATRICK ROBERTSON, of Sun Court, Cornhill, in the city of London, has given the like notice in respect of the invention of "Improvements in the manufacture of beer, ale, porter, and spirits.
As set forth in his petition, recorded in the said office on the 28th day of July, 1859.

1842. And FREDERIC LOUIS LAWRENCE, of 50, Berners Street, Oxford Street, in the county of Middlesex, Dentist, has given the like notice in respect of the invention of "Improvements in

coloring and hardening elastic gums for dental purposes."

As set forth in his petition, recorded in the said office on the 9th day of August, 1859.

1970. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of steam generators, applicable also to the construction of condensers, the heating of water generally, and to the warming of buildings."—A communication from abroad by Joseph Harrison the younger, of the city of Philadelphia, in the state of Pennsylvania, in the United States of America, Engineer.

As set forth in his petition, recorded in the said office on the 30th day of August, 1859.

2022. And FREDERICK COLLIER BAKEWELL, of No. 6, Haverstock Terrace, Hampstead, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the manufacture of caustic alkalies."—A communication from abroad by Henry Pemberton, of East Tarentum, U.S., North America.

As set forth in his petition, recorded in the said office on the 5th day of September, 1859.

2034. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "An improved fabric applicable to the manufacture of hose or flexible pipes."—A communication from abroad by Nehemiah Hunt, of Boston, in the United States of America.

As set forth in his petition, recorded in the said office on the 6th day of September, 1859.

2086. And ERNEST AUGUSTE FREDERIC LEBOURGEOIS, of Suresnes, France, Mechanician, has given the like notice in respect of the invention of "An improved machine for providing with pin points the blocks employed for surface printing on calico, paper, or other similar materials."

As set forth in his petition, recorded in the said office on the 13th day of September, 1859.

2104. And JOHN PRETTY CLARKE, of King Street Mills, Leicester, has given the like notice in respect of the invention of "Improvements in the manufacture of spools or reels for the winding on of cotton, linen, thread, silk, or other fibrous materials."

As set forth in his petition, recorded in the said office on the 15th day of September, 1859.

2126. And JOHN HAWKINS, of Lisle Street, London, in the county of Middlesex, and of Walsall, in the county of Stafford, Bit, Spur, and Stirrup Manufacturer, and CHARLES HAWKINS, of Walsall aforesaid, Manager of the Works of the said John Hawkins, have given the like notice in respect of the invention of "Certain improvements in fly presses to be worked by steam, water, or other power."

As set forth in their petition, recorded in the said office on the 19th day of September, 1859.

2157. And JOHN DALES, of 11 and 12, Gresham House, Old Broad Street, in the city of London, has given the like notice in respect of the invention of "Improvements in purifying sewage and other impure waters, and in separating therefrom materials suitable for use as manure, and also the preparation of a substance to be employed for such purposes."

As set forth in his petition, recorded in the said office on the 22nd day of September, 1859.

2201. And DAVID STEWART, of Newcastle-on-Tyne, in the county of Northumberland, and of Bombay, in the East Indies, Engineer, has given the like notice in respect of the invention of "Improvements in presses used for pressing goods."

As set forth in his petition, recorded in the said office on the 28th day of September, 1859.

2211. And JAMES WADSWORTH, of Manchester, in the county of Lancaster, Gas Engineer, has given the like notice in respect of the invention of "Improvements in instruments or apparatus for measuring the quantity, for regulating the pressure, and for controlling the flow or passage of gas used for purposes of illumination, and in the construction of gas burners."

2215. To THOMAS BUCKHAM, of Gloucester, in the county of Gloucester, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the switches for railways."

2221. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in the construction of apparatus for reworking the waste steam of steam engines."—A communication from abroad by Messrs. Delafol and Company, of Paris, Manufacturers.

As set forth in their respective petitions, all recorded in the said office on the 30th day of September, 1859.

2233. And GEORGE BRIDGETT, of Pilcher Gate, in the town and county of the town of Nottingham, Lace Manufacturer, has given the like notice in respect of the invention of "A new mode or method of manufacturing Shetland or other falls from the stocking frame."

As set forth in his petition, recorded in the said office on the 1st day of October, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 15th October*, 1859, *inclusive.*)

13th October.

2403. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent, for an invention of "An improved method of and composition for splitting or rending rock, stone, and earth."—A communication from Messieurs Murtineddu and Company, of Marseilles.—Dated 14th October, 1856.

14th October.

2467. George Blair, of Leicester, Machinist, for an invention of "Improvements in the manufacture of looped fabrics."—Dated 21st October, 1856.

15th October.

2419. Edward Tombs, of Islington, in the county of Middlesex, for an invention of "An improvement in screw-propelling."—Dated 17th October, 1856.

2428. George Wilson, of Glasgow, in the county of Lanark, North Britain, Manufacturer, for an invention of "Improvements in power-looms."—Dated 17th October, 1856.

2432. George Morton, of Keighley, in the county of York, Watchmaker, for an invention of "Improvements in escapements for chronometers and other time-keepers."—Dated 17th October, 1856.

2494. Leonard Alexander Desachy, of Great Marlborough Street, in the county of Middlesex, for an invention of "Improvements in producing architectural mouldings, ornaments, and other works of art formed with surfaces of plaster or cement."—Dated 23rd October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 15th October*, 1859, *inclusive.*)

13th October.

399. Joseph Hopkinson, the younger, of Huddersfield, in the county of York, Engineer, for an invention of "Improvements in steam boilers."—Dated 15th October, 1852.

14th October.

409. Evan Leigh, of Manchester, in the county of Lancaster, Cotton Spinner, for an invention of "Certain improvements in machinery or apparatus for carding cotton and other fibrous materials."—Dated 16th October, 1852.

15th October.

422. George Randfield Tovell, of Mistley, and John Mann, junior, Esquire, Justice of the Peace, of Colchester, both in the county of Essex, for an invention of "Improvements in the construction of ships and other vessels."—Dated 18th October, 1852.

432. Edwin Heywood, of Glasburn, in the county of York, Foreman to Messrs. Bairstow, of Sutton Mills, Keighley, in the county of York, for an invention of "Improvements in looms."—Dated 18th October, 1852.

761. Samuel Holt, of Stockport, Cheshire, Foreman to Messrs. Christy and Company, of the same place, and of Gracechurch Street, London, for an invention of "Improvements in weaving cut-piled fabrics."—Dated 15th November, 1852.

List of Specifications, &c. published during the week ending 14th October, 1859.

No.	Price.	Subject-Matter.
601	10*d.*	Machinery for the manufacture of tags for laces.
602	3*d.*	Preventing smoke and economizing fuel.
603	8*d.*	Fusee igniter for tobacco smokers.
604	5*d.*	Pianoforte action.
605	3*d.*	Preserving fruits.
606	3*d.*	Apparatus for the transmission of gas and other fluids.
607	3*d.*	Submarine telegraph cables.
608	3*d.*	Hardening india rubber for dental purposes.
609	3*d.*	Obtaining and applying motive power, &c.
610	1*s.* 9*d.*	Steam ploughs, &c.
611	3*d.*	Rifled ordnance and its projectiles.
612	10*d.*	Machinery for manufacturing needles, pointing pins, &c.
613	3*d.*	Manufacture of glass, sand, and emery papers, &c.
614	3*d.*	Wind musical instruments.
615	3*d.*	Building ships, &c.
616	3*d.*	Railway and other signals.
617	7*d.*	Machinery for rolling horse-shoe iron.
618	7*d.*	Billiard tables.
619	3*d.*	Cutting and tempering strips of metal.
620	3*d.*	Manufacture of cannon, small arms, and projectiles.
621	7*d.*	Saddle trees.
622	3*d.*	Manufacture of scale beams and fittings.
623	7*d.*	Rendering ships, batteries, &c., shot proof.
624	3*d.*	Breech-loading fire-arms.
625	3*d.*	Casting mortars and cannon.
626	9*d.*	Reaping and mowing machines.
627	7*d.*	Goffering and rouching machines.
628	6*d.*	Machine for rolling wheel tires.
629	1*s.* 1*d.*	Cutting and preparing wheat.
630	7*d.*	Rotary steam engines, &c.
631	5*d.*	Manufacture of ornamental woven fabrics.
632	3*d.*	Endless chain propellers.
633	3*d.*	Manufacture of shoes, &c.
634	3*d.*	Vermin trap, &c.
635	10*d.*	Mine cage machinery, &c.
636	1*s.* 4*d.*	Machinery for the manufacture of bricks, tiles, &c.
637	5*d.*	Nibs for gas burners.

No.	Price.	Subject-Matter.
638	7*d.*	Apparatus for boring and sinking.
639	8*d.*	Apparatus for telegraphing or signalling.
640	1*s.*	Joining leather and other materials for the production of boots and shoes, &c.
641	6*d.*	Converting wool and other fibres into threads.
642	10*d.*	Apparatus for regulating the supply of water to watercloset, &c.
643	3*d.*	Fixing colours on woven fabrics or fibrous materials.
644	1*s.* 4*d.*	Hydraulic engines and meters.
645	10*d.*	Wrench or spanner.
646	3*d.*	Furnaces for the manufacture of iron.
647	7*d.*	Lamp shades or glasses, and supports for the same.
648	6*d.*	Collecting night soil for agricultural purposes.
649	3*d.*	Manufacture of keys and wood fastenings for railways.
652	3*d.*	Calculating machines.
658	3*d.*	Looms for weaving.
661	3*d.*	Preventing the loss of corks or stoppers.
663	3*d.*	Churns.
669	3*d.*	Locks and keys.
682	3*d.*	Apparatus for lighting matches.
690	4*d.*	Metallic alloy.
694	1*s.* 7*d.*	Steam generators, &c.
710	3*d.*	Manufacture of cylinders and mandrils for printing.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset, Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent, No.* 602, *dated* 16*th March* 1744.) Price 1*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).

Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society, Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.

The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 15th October, 1859.

Mornings - - - -	791
Evenings - - - -	1438
Total - - -	2229

Since the opening of the Museum Free Daily (May 12, 1858,)—152,568.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of *2l. 3s. 11½d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of *9l. 18s. 6½d.*

The Indexes, separately, price *3s.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price *21s.*

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price *6d.*
2. SEWING AND EMBROIDERING, price *6d.*
3. MANURE, price *6d.*
4. PRESERVATION OF FOOD, price *6d.*
5. MARINE PROPULSION, price *4s.*
6. MANUFACTURE OF IRON AND STEEL, price *5s.*
7. AIDS TO LOCOMOTION, price *1s.*
8. STEAM CULTURE, price *2s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price *1s. 6d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price *6s. 6d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price *3s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price *2s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price *7s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price *9s. 6d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, *30s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 605. FRIDAY, OCTOBER 21, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1973. To THOMAS EASTMAN, of Southsea, in the county of Hants, Naval Instructor, for the invention of "Improvements in screw propellers."—A communication from abroad by James Shepard, residing at Buffalo, United States.

On his petition, recorded in the Office of the Commissioners on the 30th day of August, 1859.

2225. To SETH WARD, of 8, Stanley Place, Stanley Street, Pimlico, in the county of Middlesex, Machinist, for the invention of "An apparatus to be used in the hardening of saws and steel plates generally."

2227. And to CHARLES BROWN, of Warwick Street, Pimlico, in the county of Middlesex, for the invention of "Improvements in inkstands and date indicator."

On both their petitions, recorded in the Office of the Commissioners on the 1st day of October, 1859.

2249. To JAMES RAWLINGS, of Carlton Hill East, in the county of Middlesex, Gentleman, for the invention of "An improved construction of boot-tree."

On his petition, recorded in the Office of the Commissioners on the 4th day of October, 1859.

2271. To GUSTAVUS ADOLPHUS SMITH, of Old Cavendish Street, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in shot and shells, and other projectiles."

2273. To WILLIAM HOPKINS, of Birmingham, in the county of Warwick, Engineer, for the invention of "A new or improved steam engine."

2275. To GEORGE FREEMAN, of Unsworth, near Bury, in the county of Lancaster, Manufacturer, and JAMES ROYLE, of the same place, Manager, for the invention of "Improvements in looms."

2277. To WALTER MACFARLANE, of Glasgow, in the county of Lanark, North Britain, Engineer, for the invention of "Improvements in machinery or apparatus for drawing off or discharging liquids, and in fountains, baths, and similar receptacles for liquids."

2279. To WILLIAM BENSON, of Fourstones, near Hexham, in the county of Northumberland, Colliery Owner, for the invention of "Improvements in projectiles for muzzle loading rifled ordnance."

2281. To WILLIAM BARRON, of Elvaston, in the county of Derby, Garden Architect and Landscape Gardener, for the invention of "Improvements in boilers applicable to heating and steam generating purposes."

2283. And to WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in the construction and manufacture of casks, barrels, and such like vessels, and in the machinery or apparatus to be employed for such manufacture."—A communication from abroad by Jean De Lhatcheff, of Yaroslawl, in the empire of Russia.

On their several petitions, recorded in the Office of the Commissioners on the 6th day of October, 1859.

2285. To GEORGE LAWRENCE LEE, of 49, Holborn Hill, in the city of London, Lithographer, for the invention of "Improvements in producing printing surfaces."

2287. To GEORGE POMEROY DODGE, of 44, St. Paul's Church Yard, in the city of London, Merchant and Manufacturer, for the invention of "Improvements in apparatus for preserving life, applicable to garments."—A communication from abroad by Holman J. Hall, of New York, in the United States of America.

2289. And to DAVID MCCALLUM, of Plymouth, for the invention of "Improvements in electric telegraphs."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of October, 1859.

2291. To WILLIAM IRLAM, of Newton Heath, near the city of Manchester, Engineer, for the invention of "Improvements in the construction of railway turntables and cranes."

2293. To JOHN BROUGH, Machinist, of Birmingham, in the county of Warwick, for the invention of "An improved waterproof dress for protecting and saving life at sea or in other situations where a waterproof dress may be required, as also in the apparatus to be attached to or used with the same, for assisting the wearer to hoist or make signals, by night or by day, and to inflate, propel, and guide or direct himself as desired, the waterproofing principle of which being also applicable to other useful purposes."

2295. And to JAMES CHILDS, of Windsor House, Putney, in the county of Surrey, for the invention of "Improvements in the manufacture of artificial gums."

On their several petitions, recorded in the office of the Commissioners on the 8th day of October, 1859.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

19th October, 1859.

994. JOHN MORRIS JOHNSON and EDMUND JOHNSON, of Castle Street, Holborn, for an invention of "Improvements in the production of ornamental surfaces suitable for advertisement tablets, plates for shop fronts, and for other uses."—Dated 28th April, 1859.

1002. JAMES NAPIER, Gentleman, Partick, near Glasgow, in the county of Lanark, Scotland, for an invention of "Improvements in producing figures or representations upon glass."—Dated 21st April, 1859.

1005. DAVID AULD, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in machinery or apparatus for supplying steam boilers with water."—Dated 21st April, 1859.

1007. EDWIN LEWTHWAITE, of Halifax, in the county of York, Clock and Watch Maker, and GEORGE AMBLER, of Queenshead, near Halifax aforesaid, Clock and Watch Maker, for an invention of "Improvements in clocks, watches, chronometers, and other time keepers."—Dated 21st April, 1859.

1010. THOMAS SEAVILLE TRUSS, of Darlington, in the county of Durham, Civil Engineer, for an invention of "Improvements in the construction of pipes, and in the mode of joining the same."—Dated 21st April, 1859.

1018. JOHN ANGUS, of Glasgow, in the county of Lanark, North Britain, Saddlers' Ironmonger, for an invention of "Improvements in saddles."—Dated 23rd April, 1859.

1025. JOHN MARSHALL, junior, of Selby, in the county of York, Gentleman, for an invention of "Improvements in filtering and depurating fluids."—Dated 23rd April, 1859.

1030. JAMES HIGGIN, of the city of Manchester, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in treating madder and plants of the same family and preparations therefrom."—Dated 25th April, 1859.

1044. WILLIAM MACKENZIE, Publisher, of Glasgow, county Lanark, Scotland, for an invention of "An improved method of printing impressions upon an enlarged or reduced scale, either from engraved plates, electrotypes, blocks, drawings, or other surfaces."—Dated 26th April, 1859.

1048. RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in vulcanizing and coloring caoutchouc, and in the preparation of caoutchouc paints and colors."—A communication from abroad by Theophile Julien Laballe, of Paris.—Dated 26th April, 1859.

1055. HENRY RICHARDSON FANSHAWE, late of Messrs. Silver and Company's Works, North Woolwich, now of 13, Russell Place, Old Kent Road, in the county of Surrey, India Rubber Manufacturer, for an invention of "Improved apparatus or mechanism for drawing off, filtering, and guaging liquids in butts, barrels, casks, and such like vessels, preserving the contents from deterioration from contact with atmospheric air."—Dated 27th April, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 19th October*, 1859, *inclusive.*)

17th October.

2442. ROBERT HANHAM CGLLYER, M.D., of No. 3, Park Road, Regent's Park, London, county of Middlesex, for an invention of "Improved method of manufacturing paper."—Dated 18th October, 1856.

18th October.

2462. Henry Deacon, of Hans Place, Chelsea, in the county of Middlesex, for an invention of "Improvements in suspending carriage bodies." — Dated 20th October, 1856.

19th October.

2474. George Thomson, of Westbourne Green, Harrow Road, in the county of Middlesex, Mechanist, for an invention of "Improvements in machinery for cutting or rending wood for laths and other uses."—Dated 21st October, 1856.

2476. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improved machinery for rolling and forging iron or steel."—A communication.—Dated 21st October, 1856.

2504. Louis Auguste Mangin, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of 4, South Street, Finsbury, London, for an invention of "A self-acting door spring."—Dated 24th October, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 18th October, 1859, inclusive.*)

17th October.

450. George Heyes, of Blackburn, in the county of Lancaster, for an invention of "Improvements in the manufacture of fancy woven or textile fabrics, and in the machinery or apparatus connected therewith."—Dated 20th October, 1852.

464. John Gilbert, of 79, Wardour Street, and Samuel Nye, of the same place, in the county of Middlesex, for an invention of "Improvements in mincing meat and other substances."—Dated 20th October, 1852.

18th October.

725. Julien François Belleville, Manufacturer, of Paris, in the French republic, for an invention of "Improvements in generating steam for producing motive-power or heat." — Dated 12th November, 1852.

A List of the Letters Patent for Inventions which have become Void by reason of the Nonpayment of the additional Stamp Duty of £50 before the expiration of the Third Year from the date of such Patents, pursuant to the Act of the 16th Vict. c. 5, sec. 2,—for the Quarter ending the 30th day of September, 1859.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1536	1st July, 1856.	Charles Woide Goodhart, of Woodlands, in the county of Middlesex, Gentleman.	Improvements in bars or gratings for the security of buildings and other property.
1537	„	Frederick George Sanders, of Poole, in the county of Dorset.	Improvements in the manufacture of ornamental floor and other tiles, bricks, slabs, and other similar articles.
1538	„	Alfred Wild, of Windsor, in the county of Berks, Tanner and Currier.	Improvements in the manufacture of boots and shoes.
1539	„	John Coope Haddan, of Cannon Row, in the city of Westminster, Civil Engineer.	Improvements in the manufacture of projectiles, and in firing or discharging them from cannon.
1540	„	James Atkinson Longridge, of 17, Fludyer Street, Westminster, in the county of Middlesex.	Improvements in the application of mechanical power to ploughing and other field operations of agriculture.
1542	„	John Lacey Davies, junior, of the city of Manchester, in the county of Lancaster, Engineer, and John Broadbent, of the same place, Manufacturer.	Certain improvements in umbrellas and parasols.
1543	„	George Harvey and Alexander Harvey, junior, of Glasgow, in the county of Lanark, North Britain, Engineers.	Improvements in machinery or apparatus for boring and drilling.
1545	„	Gegrge Tomlinson Bousfield, of Sussex Place, Loughborough Road, in the county of Surrey.	Improvements in propelling and steering vessels when the force of water is used.
1546	„	George Edward Dering, of Lockleys, in the county of Herts.	Improvements in galvanic batteries.
1550	2nd July, 1856.	Joseph Henry Van Hengel, of No. 531³, Chaussée de Malines, Anvers, in the kingdom of Belgium, and of No. 4, South Street, Finsbury, London.	Improvements in apparatus for raising and lowering bodies in mines.
1552	„	James Fleming, junior, of Newlandsfields, in the county of Renfrew, North Britain, Bleacher.	Improvements in bleaching, washing, cleansing and preparing textile fabrics and materials.
1553	„	William Frederick Spittle, of Birmingham, in the county of Warwick, Machinist.	An improvement or improvements in braiding or plaiting machinery.
1554	„	Edwin Green, of Birmingham, in the county of Warwick, Manufacturer.	Improvements in the manufacture of buttons.
1557	„	Thomas Emmanuel Marais, of Ferrieres la Verrerie (Orne), France.	Improvements in railway signals.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1558	2nd July, 1856.	John Williamson and James Cochran Stevenson, of South Shields, Alkali Manufacturers.	Improvements in evaporating saline solutions.
1560	,,	William Hickling Burnett, of Margaret Street, in the county of Middlesex, Gentleman.	Improvements in electric telegraphs, and in apparatuses employed therein.
1561	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in air engines.
1562	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Certain improvements in machinery for manufacturing rope or cordage.
1563	3rd July, 1856.	John Pendlebury, of Crumpsall, in the county of Lancaster, Bleacher.	Improvements in machinery or apparatus for bleaching or cleansing textile fabrics or materials.
1567	,,	Joseph Brown, of 71, Leadenhall Street, in the city of London, Cabinet Manufacturer.	Certain improvements in hats and caps.
1568	4th July, 1856.	Hilton Greaves, of Oldham, in the county of Lancaster, Manufacturer.	Improvements in looms for weaving.
1569	,,	Edwin Greenslade Bradford, of Torquay, Devonshire.	An improved rudder.
1570	,,	Thomas Chandler, of 58, Paradise Street, Rotherhithe.	A lever cask stand.
1573	,,	John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in machinery or apparatus for cleaning and carding cotton and other fibrous substances.
1574	,,	Louis Cornides, of No. 4, Trafalgar Square (Office for Patents), Charing Cross, in the county of Middlesex.	Improvements in cementing and uniting together plain or ornamental surfaces of glass, or in uniting surfaces of glass to surfaces of metal or other material.
1575	5th July, 1856.	Edwin Travis, of Oldham, in the county of Lancaster, Engineer, and Joseph Louis Casartelli, of Manchester, in the county of Lancaster, Optician.	Certain improvements in steam-engines
1577	,,	Joseph Adshead, of the city of Manchester, Gentleman.	A new application of a known materia to be used as a substitute for plastering, painting, papering, whitewashing, and colouring.
1579	,,	James Alexander Manning, of the Inner Temple, London, Esquire.	Improvements in the manufacture or production of manure.
1585	7th July, 1856.	Robert Millward, of Patricroft, near the city of Manchester, Foreman.	An improved instrument which may be used as a screw key or gauge.
1592	,,	William Colborne Cambridge, of Bristol, Agricultural Implement Maker.	An improvement in the construction of press wheel rollers and clod crushers.
1593	,,	Henry Smith, of Brierley Hill Iron Works, near Dudley, in the county of Worcester, Manufacturer.	An improvement or improvements in the manufacture of harrows.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1598	7th July, 1856.	HENRY BOLLMANN CONDY, of Battersea -	Improvements in defecating or purifying acetic acid and other solutions, also in disinfecting rooms and other places, and in preserving wood.
1600	8th July, 1856.	GEORGE BRADSHAW WATKINS, of Godmanchester, in the county of Huntingdon, Clerk.	Improved apparatus for obtaining infusions or extracts from various substances.
1601	„	WILLIAM YOUTMAN, of Southampton, in the town and county of Southampton, Gentleman.	Improvements in valves and plugs.
1602	„	JOSEPH HENRY GEORGE WELLS, of the firm Wells and Vasserot, of 45, Essex Street, Strand, London, Patent Agents.	Improvements in pistons for steam and other motive power engines and pumps in general, and which improvements are also applicable to stuffing boxes.
1603	„	JOSEPH HENRY GEORGE WELLS, of the firm Wells and Vasserot, of 45, Essex Street, Strand, London, Patent Agents.	Improvements in governors or regulators.
1604	„	FREDERICK WILLIAM HOFFMAN, of the city of New York, United States of America.	An improvement or improvements in breech-loading fire-arms.
1605	„	HENRY PAGE, of Whitechapel Road, in the county of Middlesex, Glass Merchant.	Improvements in ornamenting or decorating glass.
1606	„	JULIEN FRANÇOIS BELLEVILLE, Civil Engineer, of Paris, in the French empire.	Certain improvements in generating and applying steam.
1607	„	ROBERT MARTINEAU, of Birmingham, in the county of Warwick, Manufacturer, and BROOKE SMITH, of Birmingham, aforesaid, Manufacturer.	Improvements in taps for drawing off liquids.
1609	„	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved fountain pen.
1610	„	ABRAHAM HERTS, of 22, Bunhill Row, Finsbury, in the county of Middlesex, Commission Agent.	An improved sheet metal bending and tubing machine.
1613	„	SEWALL SHORT, of New London, in the county of New London, U. S. of America.	Certain improvements in horse shoes, and shoes for other animals.
1615	„	DAVID FISHER, of 12, Ranelagh Road, Thames Bank, in the county of Middlesex, Engineer.	A composition for coating metal plates or wheels used for grinding, sharpening, or polishing.
1618	9th July, 1856.	RUDOLPH BODMER, of 2, Thavies Inn, Holborn, in the city of London.	Improvements in self-acting apparatus, applicable to certain kinds of machines for spinning cotton and other fibrous substances.
1620	„	WARD HOLROYD, of Queen's Head, near Halifax, in the county of York, Builder, and WILLIAM NOBLE, of the same place, Cabinet Maker.	Improvements in machinery or apparatus for cutting wood and stone.
1624	„	WILLIAM ROBERTSON, of the city of Manchester, in the county of Lancaster, Mechanician.	Improvements in machines for spinning and doubling cotton and other fibrous substances, such machines being of the kinds commonly known as mules, and twiners or doublers, and in the means of weighting rollers in the same and other machinery.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1626	9th July, 1856.	Moss Defries, of Houndsditch - -	Improvements in moderator and other lamps.
1627	,,	Richard Dugdale Kay, of Accrington, in the county of Lancaster, Manufacturer.	Improvements in machinery or apparatus for pressing, straining, sifting, or refining colours and thickened mordaunts.
1628	,,	Robert Thomas Eadon, of the firm of Moses Eadon and Sons, of Sheffield, in the county of York, Steel Manufacturers.	An improvement in the manufacture of band saws and other endless bands or hoops of metal.
1631	10th July, 1856.	John Marsh, of Nottingham, and John Catt, of Stepney, in the county of Middlesex.	Improvements in the manufacture of certain textile fabrics.
1633	,,	Samuel Hardacre, of Miles Platting, in the county of Lancaster, Machinist.	A compound conical spike and spiral double-gridded machine for opening, blowing, scutching, and cleaning cotton wool and other fibrous substances.
1634	,,	Charles William Lancaster, of New Bond Street, in the county of Middlesex, Manufacturer.	An improved method of or apparatus for inking printing or stamping surfaces.
1636	,,	Stephen Martin Saxby, of Rock Ferry, in the county of Chester, Gentleman.	Improvements in ascertaining the errors of mariners' compasses.
1639	11th July, 1856.	John Westwood, Lamp Manufacturer, of Lichfield Street, Walsall, in the county of Stafford.	Improvements in hand, roof, and other railway lamps, parts of which are also applicable to certain descriptions of oil lamps for general purposes.
1640	,,	Thomas Charlton and William Turnbull, of Brentwood, in the county of Essex, Engineers.	Improvements in steam generators.
1642	,,	Jean Baptiste Desiré Chevalier and Narcisse Rabouin O'Sullivan, of Paris (empire of France).	A new or improved method of obtaining or preparing printing surfaces, and in printing therefrom.
1643	,,	Edward Henry Cradock Monckton, of the Parthenon Club, Regent Street, in the county of Middlesex.	The application of a means or process for destroying grubs and other insects or animalculæ or infusoria injurious to plants.
1644	,,	Alfred Nicholson Wornum, of Store Street, Bedford Square, in the county of Middlesex, Pianoforte Manufacturer.	Improvements in grand pianofortes.
1645	12th July, 1856.	Benoit Frédéric Ortet, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of No. 4, South Street, Finsbusy, London, Gentleman.	A new metallic composition applicable to the coating of surfaces, and to the moulding and casting of various objects.
1646	,,	Thomas Madely Hartwell, James William Gladwin, and Henry Gladwin, of the city of Manchester, in the county of Lancaster, Stretchers and Finishers.	Improvements in machinery or apparatus for stretching woven fabrics.
1649	,,	William Petrie, of Woolwich, in the county of Kent, Civil Engineer.	A new porous material for filters and other like articles, and for certain modifications or improvements in the manufacture of the material, whereby it is adapted to the formation of vessels of capacity, to be employed as a cement, as a water and acid proof lining, as a preservative coating, and as a substitute for stone and earthenware.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1651	12th July, 1856.	JOHN AVERY, of 32, Essex Street, Strand, London, Patent Agent.	An improved "plate holder" for photographic and other purposes.
1653	14th July, 1856.	PIERRE BEAUPLANT RASSANT, of Paris, (empire of France,) and of 45, Essex Street, Strand, London.	A new mechanical contrivance for transforming an alternate into a continuous circular motion.
1654	,,	CHARLES BURRELL, of St. Nicholas Works, Thetford, in the county of Norfolk.	Improvements in arranging and rendering portable apparatus suitable for distilling from beetroot and other vegetable substances.
1656	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved mode of securing the plastering of ceilings and walls.
1657	,,	WILLIAM WILLIAMS, of the village and parish of Dale, in the county of Pembroke, Engineer and Contractor for Public Works.	Cutting and dressing stone by machinery.
1658	15th July, 1856.	JEAN LOUIS LUCAS and ALBERT DE BRIGES, Chemists, of Paris, in the French empire.	Improvements in preparing certain liquid or solid alimentary substances from the husk of a certain fruit.
1664	,,	ARTHUR NEILD, of the firm of Neild, Sutcliffe, and Company, of Manchester, in the county of Lancaster, Spinners and Manufacturers.	Improvements in Jacquard and other pattern looms.
1665	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman.	Improvements in apparatus for consuming smoke, to be applied to lamps and gas burners.
1667	,,	GEORGE TOMLINSON BOUSFIELD, of Sussex Place, Loughborough Road, in the county of Surrey.	Improvements in pumps.
1671	16th July, 1856.	JAMES FORD, of Preston, in the county of Lancaster, Manager, and PETER KNOWLES, of Bolton-le-Moors, in the same county, Overlooker.	Improvements in machinery for cleaning and preparing cotton and other fibrous substances.
1672	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improved apparatus for obtaining rotary motion.
1673	,,	RICHARD MORGAN, of Acton, Middlesex, Gentleman.	A pocket case for containing address cards, stamps, and other similar articles.
1675	,,	DAVID BOWLAS, of Reddish, in the county of Lancaster, Manufacturer.	Improvements in throstles and doubling frames for spinning and doubling cotton and other fibrous materials.
1676	,,	DUNCAN CAMERON, of Glasgow, in the county of Lanark, North Britain, Engineer.	Improvements in cranes or lifting and lowering apparatus.
1677	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman.	Improvements in circular looms.
1679	,,	ADOLPHUS FREDERICK GURLT, of 40, Newington Place, Kennington, in the county of Surrey, Mining Engineer.	Improvements in the manufacture of iron and steel.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1680	17th July, 1856.	Charles Barlow, of the Office for Patents, 89, Chancery Lane, London.	An improved surveying instrument.
1681	„	Henry Bragg, the younger, of Belfast, in the county of Antrim, in Ireland, Commission Agent.	Improvements in drying air, and in machinery for stretching, drying, and finishing fabrics.
1685	„	Ebenezer Seymour, of Bloomfield, New Jersey, in the United States of America, but now residing at Furnival's Inn, in the city of London, Gentleman.	Improvements in the construction of furnaces.
1686	„	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved regulator for heating apparatus.
1687	„	Charles Carey, of 48, Bessborough Street, Pimlico, in the county of Middlesex.	Improvements in the vessels and filters used for making infusions of coffee and other substances.
1688	18th July, 1856.	Francis Barber Howell, of Lebanon, Ohio, in the United States of America, Farmer.	Certain improvements in machinery for making corks.
1690	„	William Leuchars, of No. 38, Piccadilly, in the county of Middlesex.	Improvements in locks for travelling bags.
1692	„	George Frederick Hipkins, of Birmingham, in the county of Warwick, Manufacturer, and John Britten, of Birmingham aforesaid, Engineer.	Improvements in applying springs or weights for the purpose of closing doors or resisting shocks, strains, or pressure.
1693	„	John Cowley, of Quenington, in the county of Gloucester.	Improvements in the manufacture of paper from straw and other vegetable substances.
1694	„	Peter Hubert Desvignes, of Lewisham, in the county of Kent.	Improvements in machinery for scutching or beating flax, hemp, and other fibrous materials requiring like treatment.
1696	„	William Beevers Birkby, of Upper Rawfolds Card Works, Cleckheaton, near Leeds.	Improvements in filleting and fixing pointed teeth in the fillets used in the preparation of flax, tow, hemp, and other fibrous substances.
1697	„	John Hamilton, junior, of Liverpool -	An improvement in the bending of sheet iron for the manufacture of conical tubes.
1704	19th July, 1856.	William Stettinius Clark, of 19, Warwick Street, Charing Cross, in the county of Middlesex, Gentleman.	Improvements in machinery or apparatus for digging, pressing, and moulding peat.
1706	„	John Whitehouse, junior, of Birchall Street, Birmingham, in the county of Warwick, Brass Founder.	Certain improvements in making, mounting, and spindling knobs applicable for doors and other purposes.
1709	„	John Smith, of Oldham, in the county of Lancaster, and Enoch Harrison, of Manchester, in the same county, Manufacturers.	Improvements in machinery or apparatus for warping and beaming.
1710	„	Edward William Young, of No. 22, Maidstone Road, Rochester, in the county of Kent, Civil Engineer.	Improvements in the construction of bridges.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1712	19th July, 1856.	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	An improved method of supplying air to gas and other lights.
1716	21st July, 1856.	Marc Antoine Augustin Gaudin, Chemist, and Eugène Xavier Choumara, Clerk, both of Paris, in the empire of France.	Manufacturing factitious wholesome milk.
1717	,,	Francis Barbour, of the city of Manchester, in the county of Lancaster, Linen Manufacturer.	Improvements in penholders.
1718	,,	John Pursloe Fisher, of Edgbaston, near Birmingham, in the county of Warwick.	Improvements in cues used at billiards, bagatelle and other similar games.
1722	,,	Frederick Simpson, of Redhill, Surrey -	An improved mode of stopping bottles.
1723	,,	Maurice Vergnes, of the city and state of New York, United States of America.	Improvements in electro-galvanic machines for producing motion by galvanic electricity.
1724	,,	William Green, of York Street, City Road, London, in the county of Middlesex.	Improvements in treating, ornamenting, and waterproofing fabrics, and in machinery or apparatus for effecting the same.
1728	22nd July, 1856.	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in machinery for reaping and mowing.
1730	,,	Samuel Colman, of the city of Norwich, Manufacturer.	Improvements in steam-boilers.
1731	,,	Elias Weisskopf, of Pesth, in Hungary, and of 4, South Street, Finsbury, London, Merchant.	An artificial combustible chiefly applicable to the kindling of fires.
1732	,,	Charles Cowper, of No. 20, Southampton Buildings, Chancery Lane, in the county of Middlesex, Patent Agent.	Improvements in lighting and extinguishing gas lights.
1733	,,	Sven Johan Agrell Burg, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex.	Certain improved apparatus for preventing the explosion of steam-boilers.
1734	,,	Henry Hindle, of Cavendish Street, Ashton-under-Lyne, in the county of Lancaster.	Improvements in valves and apparatus for governing steam engines, and for increasing the safety of steam-boilers.
1736	,,	John Imray, of Bridge Road, Lambeth, in the county of Surrey, Engineer.	Improvements in bending timber.
1737	,,	James Clark, of Newton Heath, Manchester, India-rubber Manufacturer.	Improvements in the manufacture of beds, mattresses, cushions, and seats.
1738	23rd July, 1856.	John Brayshay, of Cinderhill, Ringly Bridge, near Bolton-le-Moors, in the county of Lancashire.	Certain improvements in boilers for generating steam.
1739	,,	George North, of 9, Ashburnham Road, Greenwich, in the county of Kent, Coach Builder.	An improved spring catch for the security of jewellery and articles of personal ornament and general utility.
1740	,,	Samuel Frederic Berthiez, of No. 6, Red Lion Street, Borough, in the county of Surrey.	An improvement in engines to be worked by a new elastic fluid in substitution of steam generated out of water.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1744	23rd July, 1856.	WILLIAM WEBSTER, of 22, Bunhill Row, in the county of Middlesex.	Improvements in pumps.
1746	,,	GILES MABIE, of Rockford City, Winnebago county, state of Illinois, in the United States of America, but now residing at Byron's Hotel, 2, Rue Favart, Paris, in the empire of France.	Improved machinery for mowing and reaping.
1754	24th July, 1856.	JAMES ASHMAN, of Swansea, Glamorganshire.	Improvements in the manufacture of artificial limbs.
1755	,,	CHARLES BURTON, of 162, Regent Street -	Improvements in warming houses and other buildings.
1756	,,	GEORGE TOMLINSON BOUSFIELD, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey.	An improvement in the manufacture of driving straps or bands.
1757	,,	GEORGE TOMLINSON BOUSFIELD, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey.	Improvements in the manufacture of flexible hose and tubes.
1761	,,	JOSHUA MATHER and WILLIAM FORSHAW, of Bolton-le-Moors, in the county of Lancaster, Mechanics.	Certain improvements in pickers for looms and apparatus connected therewith.
1762	,,	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in grindstones.
1765	25th July, 1856.	GEORGE SPENCER, of No. 6, Cannon Street, West, in the city of London, Railway Spring Manufacturer.	Improvements in the couplings of feed pipes of locomotive steam-engines and tenders.
1769	,,	ROBERT STUART, of Glasgow, in the county of Lanark, North Britain, Miner.	Improvements in cutting stone and other mineral substances.
1772	,,	SAMUEL JAY and GEORGE SMITH, both of No. 246, Regent Street, in the county of Middlesex.	Improvements in stuffing or padding couches, cushions, bedding, chairs, and other similar articles.
1775	,,	ISHAM BAGGS, of Manchester Street, Argyle Square, in the county of Middlesex, Engineer.	Improvements in apparatus for lighting, signalling, and telegraphing by means of electricity.
1778	26th July, 1856.	CHARLES HODGES, of the city of Manchester, in the county of Lancaster, Manufacturer and Merchant.	Improvements in apparatus for unwinding silk thread or yarn from the hank.
1779	,,	RICHARD CLARKE PAULING, of Great George Street, in the city of Westminster, Civil Engineer.	Improvements in giving increased buoyancy to ships and vessels, in raising sunken vessels, in keeping structures water-tight, and in propelling vessels.
1780	,,	JAMES DICKINSON, of Liverpool, in the county of Lancaster, Ship and Anchor Smith.	Improvements in anchors and in the manufacture of the same.
1782	,,	GEORGE COLLETON COOKE, of George Yard, Lombard Street, in the city of London, Gentleman.	Improvements in stereoscopes.
1783	,,	HENRY REMINGTON, of Camberwell, in the county of Surrey, Gentleman.	An improved gas heating and cooking apparatus.
1786	28th July, 1856.	HENRY ROBINSON, of Settle, in the county of York, Coal Agent.	Improvements in arrangements and mechanism for the conveyance or transport of loads or weights.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1787	28th July, 1856.	EDMUND EABORN and MATTHEW ROBINSON, Engineers, trading as co-partners, and carrying on business in Clement Street, Birmingham, in the county of Warwick.	Certain improvements in machinery to be used for confectionary purposes.
1788	„	WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	An improved instrument for taking altitudes.
1791	29th July, 1866.	WILLIAM GRIFFIN, of the town and county of Northampton, and ELIZABETH DULLY, of the same place.	Improvements in studs and buttons for fastening articles of dress.
1792	„	ROBERT THATCHER, of Oldham, in the county of Lancaster, Cotton Spinner.	Certain improvements in preparing for doubling or spinning cotton or other fibrous substances.
1794	„	WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Certain improvements in the process of generating illuminating gas.
1799	30th July, 1856.	ROBERT WILLIAM SIEVIER, Sculptor, of Upper Holloway, in the county of Middlesex, in the United Kingdom of Great Britain, but now residing in Bruxelles, in the kingdom of Belgium.	Improvements in preserving wood from decay, and also from destruction by insects.
1800	„	HENRI EVETTE, Manufacturer, of Lizieux, town in the French empire.	Improvements in looms for weaving.
1801	„	JULIEN DENIS, of Queenhithe, in the city of London.	An improved gelatinous and economical soap.
1805	31st July, 1856.	GEORGE HOLCROFT, of the city of Manchester, in the county of Lancaster, Consulting Engineer, and PETER JOHNSON, of Wigan, in the same county, Cotton Spinner.	Improvements in the manufacture of cement, and in the application of a known material to cementing purposes.
1807	„	CONSTANTINE JOHN BAPTIST TORASSA, of Genoa.	Improvements in obtaining motive power by the aid of explosive gases.
1811	„	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	An improvement in the construction of carriages and waggons.
1812	„	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	An improved auger or boring tool.
1813	„	PIERRE MARIE JOSEPH CHAMBLANT, of 36, Rue de Lanery, Paris.	Improvements in the manufacture of glass.
1814	„	WILLIAM COLTMAN, of Leicester, Wine Merchant.	Improvements in knitting machinery.
1815	„	THOMAS WICKSTEED, of Coleman Street, in the city of London, Civil Engineer.	Improvements in separating sewage and other matters from water, or fluid mixed therewith.
1816	„	THOMAS ROUTLEDGE, of 17, Gracechurch Street.	Improvements in the manufacture of half stuff and paper.
1818	1st August, 1856.	ALEXANDRE TOLHAUSEN, of No. 7, Duke Street, Adelphi, London, county of Middlesex, Sworn Interpreter at the Imperial Court of Paris.	A new and improved flexible pocket umbrella, being likewise applicable to common and other sticks, canes, &c.
1819	„	JOHN WATKINS BRETT, of Hanover Square, in the county of Middlesex, Gentleman.	Improvements in letter and numeral printing electric telegraphs.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1822	1st August, 1856.	JOHN AVERY, of 32, Essex Street, Strand, London, Patent Agent.	Improvements in bonnets and other coverings for the head.
1824	,,	RICHARD ALBERT TILGHMAN, of Philadelphia, in the United States of America, Chemist.	Improvements in hydro-extractors or centrifugal machines.
1825	,,	ROBERT REEVES, of Bratton, Westbury, Wilts, Agricultural Implement Maker.	Improvements in machinery for sowing or depositing seeds and manure.
1826	,,	WILLIHM FRANKLIN SHAW, of the State of Massachusetts, of the United States of America.	An improved burner or apparatus for the combustion of air and inflammable gas.
1827	2nd August, 1856.	OLIVER LONG, of Cornhill, in the city of London, Commission Agent.	Improvements in mechanical knife cleaners.
1828	,,	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in the manufacture of artificial fuel.
1829	,,	THOMAS DONKIN, of Bermondsey, in the county of Surrey, Engineer.	Improvements in the glazing of paper.
1830	,,	JOSIAH RHODES, of the firm of J. Rhodes and Company, of the Holborn Brass Foundry, in the town and county of the town of Nottingham.	Improvements in machinery or apparatus for reducing turnips and other vegetable substances to a pulpous state.
1831	,,	THOMAS GREEN, of Leeds, Mowing Machine Maker.	Improvements in mowing machinery.
1835	4th August, 1856.	CHARLES THÉODULE LAUNAY and JULES CHOPIN, Gas Fitters, of Paris, in the French empire.	Improvements in increasing the illuminating power of gas.
1836	,,	GEORGE WALKER, of Belfast, in the county of Antrim, Spinner, and JAMES SCRIMGEOUR, of the same place, Machinist.	Improvements in spinning frames.
1837	,,	THOMAS BARNABAS DAFT, of the Irish Engineering Company, Dublin.	Improvements in the manufacture of cast-iron pipes.
1838	,,	ALEXANDER WRIGHT, of Milbank Street, Westminster, Engineer.	Improvements in lighting mines and subterranean places with gas.
1839	,,	JOSIAH FIRTH, of Heckmondwike, in the county of York, Carpet Manufacturer, and JOSEPH CRABTREE, of Mill Bridge, near Heckmondwike aforesaid, Machine Maker.	Weaving Scotch, Kidderminster, and Dutch carpets by means of a power loom.
1844	5th August, 1856.	ANTOINE DOMINIQUE SISCO, of Paris, in the empire of France, Practical Engineer.	Improvements in railway breaks.
1846	,,	JEAN JACQUES DANDURAN, Civil Engineer, of No. 13, Charlotte Street, Fitzroy Square, county of Middlesex.	An apparatus called the self-swimmer.
1849	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improvement in primers for fire-arm cartridges.
1850	,,	AUGUSTUS PFALTZ, of the state of Massachusetts.	A new and useful mode or process for making soap from rosin.
1856	6th August, 1856.	THOMAS EVANS, junior, of No. 2, Belmont Terrace, Lewisham Road, in the county of Kent.	Improvements in harness.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1857	6th August, 1856.	William Hall, of Birmingham, in the county of Warwick, Gentleman, Elisha Wylde, of the same place, Engineer, and William Waite, also of the same place, Engineer.	Improvements in steam engines.
1861	7th August, 1856.	Alexandre Théodore Nicolas Goll, of 57, Rue de Bretagne, Paris, in the empire of France, and of 4, South Street, Finsbury, London.	An improved button.
1863	,,	Samuel King, of Brighton, in the county of Sussex.	Improvements in spirit lamps.
1864	,,	Coleman Defries, of the firm of Jonas Defries and Sons, Houndsditch.	Improvements in the roof lamps of railway carriages.
1867	8th August, 1856.	Joseph Lesse, junior, of Manchester, in the county of Lancaster, Calico Printer.	Certain improvements in machinery used for printing calico and other fabrics.
1868	,,	John Woodman, of the city of Manchester, in the county of Lancaster, Engineer.	An improved telegraph insulator.
1869	,,	Thomas Austen, of Waltham Abbey, in the parish of Waltham Holy Cross, in the county of Essex, Civil Engineer.	A machine for ascertaining the propelling force of gunpowder.
1870	,,	William Gorse, of Birmingham, in the county of Warwick, Manufacturer.	A new or improved door fastener.
1871	,,	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improvements in machinery for composing and distributing types.
1875	9th August, 1856.	William Webster, of 22, Bunhill Row, in the county of Middlesex.	An improved valve cock.
1878	,,	John Darlington, of No. 36, Cannon Street, in the city of London.	Improvements in superheating steam.
1880	,,	Chapman March, of Alwalton Mills, in the county of Huntingdon, Miller.	Improvements in propelling and working ships and vessels.
1882	,,	Edward Owen, of Aberdeen Terrace, Blackheath, in the county of Kent, Chemist.	Improvements in the manufacture of gas, and in the obtainment of products arising in such manufacture.
1883	,,	George Anderson, of 22, Queen's Road, Dalston, in the county of Middlesex, Gas Engineer.	Improvements in the construction of taps or valves for regulating the passage of gas.
1884	11th August, 1856.	Peter Armand le Comte de Fontaine-Moreau, of 39, Rue de l'Echiquier, Paris, in the empire of France, and 4, South Street, Finsbury, London.	A new electro-motive engine.
1887	,,	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	An improved fermenting agent.
1888	12th August, 1856.	Nicholas Doran Maillard, of Dublin	An improved mechanical and magnetic compass.
1890	,,	Edwin Firth, of the firm of Edwin Firth and Sons, of Flush Mills, Heckmondwike, near Leeds, in the county of York.	Improvements in finishing mohair cloth.
1894	13th August, 1856.	David Lesser, of Manchester, in the county of Lancaster, Confectioner.	Certain improvements in machinery or apparatus for making "Lozenges" or other similar articles.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1895	13th August, 1856.	Richard Dugdale Kay, of Accrington, in the county of Lancaster, Manufacturer.	Improvements in machinery or apparatus for washing, scouring, cleaning, preparing, dyeing, or finishing woven fabrics, yarns, or threads.
1896	,,	William Church, of Birmingham, in the county of Warwick, Engineer, and Henry Whiting Hamlyn, of Birmingham aforesaid, Corn Factor.	An improved method or improved methods of constructing or building hay and other ricks.
1897	,,	Jean Baptiste Clara, of 39, Rue de l'Echiquier, Paris, in the empire of France, and 4, South Street, Finsbury, London, Civil Engineer.	Certain improvements in producing and employing steam and the gaseous products of combustion for obtaining motive-power.
1901	14th August, 1856.	John Knowles, of Holcombe Brook, in the county of Lancaster, Manufacturer, and William Clarke, of Manchester, in the same county, Manufacturer.	Certain improvements in looms for weaving.
1902	,,	Thomas Bilbe, of Nelson Dock, Rotherhithe, in the county of Surrey, Shipbuilder.	Improvements in the construction of ships and other vessels.
1903	,,	William Morgan, of 48, Gloucester Terrace, Hyde Park.	Improvements in the manufacture of guns and mortars.
1905	,,	Peter Augustin Godefroy, of No. 3, King's Mead Cottages, New North Road, Islington, in the county of Middlesex, Operative Chemist.	An improved treatment of the matrix of rock quartz, and all like substances, for the extraction of auriferous, argentiferous and other metals contained therein.
1907	15th August, 1856.	John Burns Smith, of the city of Manchester, Mill Manager.	Certain improvements in machinery for preparing, spinning, and twisting cotton and other fibrous substances.
1908	,,	Henry Columbus Hurry, Civil Engineer, of Wolverhampton, in the county of Stafford.	Improvements in railway crossings.
1914	16th August, 1856.	William Hargreaves, of Bradford, in the county of York, Machine Woolcomber.	Improvements in Collier's combing machine in combing wool, hair, cotton, silk, flax, and other fibrous substances.
1916	,,	David Chalmers, of the city of Manchester, in the county of Lancaster, Machinist.	Improvements in looms for weaving.
1919	,,	Samuel Lilley, of Birmingham, in the county of Warwick, Engineer and Machinist.	Improvements in the manufacture of ships' iron work, a part of which improvements is applicable to the manufacture of other articles in iron.
1920	,,	Philippe Pierre Hoffmann, of Strasbourg, in the empire of France.	An improved compound to be used for waterproofing fabrics, paper, leather, or other materials.
1921	,,	Louis Auguste Joyeux, of Marseilles, empire of France.	Improvements in obtaining motive power.
1923	18th August, 1856.	Thomas Scott, of Barnhill Workhouse, Glasgow, in the county of Lanark, North Britain, Mechanic.	Improvements in cooking.
1924	,,	William Tytherleigh, of Birmingham, in the county of Warwick, Accountant Clerk.	A new or improved manufacture of rollers or cylinders for printing fabrics.
1925	,,	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improved machinery for cutting and finishing metal screws.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1927	18th August, 1856.	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improved machinery for forging or working iron and other metals.
1928	„	John Stopporton, of the Isle of Man -	Improvements in propelling vessels.
1929	„	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in stopping or retarding railway carriages and trains, and in preventing carriages running off the rails.
1930	„	Andrew Peedie How, of Mark Lane, in the city of London, Engineer.	Improvements in pumps.
1932	19th Aug. 1856.	James Leach, William Turner, and John Tempest, of Rochdale, in the county of Lancaster.	Improvements in rollers applicable to condensing and all other kinds of engines for carding wool, cotton, and other fibrous materials.
1933	„	Henry Forfar Osman, of 33, Essex Street, Strand, London, county of Middlesex, Gentleman.	An improved electric clock.
1938	„	Henry Bessemer, of Queen Street Place, New Cannon Street, in the city of London.	Improvements in the manufacture of iron and steel.
1941	„	William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	An improvement in valves for steam engines.
1942	„	Anthony Charles Vetter de Doggenfeld, of Trinity Square, Brixton, in the county of Surrey.	Improved glass ornaments for ornamenting gardens, summer houses, dinner and other tables, and for other ornamental or decorative purposes.
1943	20th August, 1856.	John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman.	Improvements in steam-engines.
1944	„	John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman.	Improvements in roller fulling mills.
1946	„	Charles Clark, of Somerset Terrace, Albion Road, Stoke Newington, in the county of Middlesex.	Improvements in combining and arranging looking glasses for toilet purposes.
1948	„	Jules Laleman, of Lille, in the empire of France, one of the members of the firm Canyn and Company, consisting of William Lenty, Widow Lenty, Victor Canyn, and Jules Laleman.	Improved machinery for combing flax and other similar fibrous materials.
1951	21st August, 1856.	Joseph Hackling, of Clitheroe, in the county of Lancaster, Cotton Manufacturer, and William Wheeler, of the same place, Gentleman.	Improvements in the mode or method of winding, warping, sizing, and beaming cotton, woollen, linen, or other yarns or threads, and in the machinery or apparatus employed therein.
1953	„	William Akroyd and John Thompson, both of Halifax, in the county of York, Carpet Weavers.	The manufacture of carpets or other fabrics.
1956	„	Robert Kenton, of Birmingham, in the county of Warwick, Manufacturer.	A new or improved manufacture of fishing reels.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1958	21st August, 1856.	GEORGE JAMES FARMER, of Birmingham, in the county of Warwick, Machinist.	Improvements in machinery to be used in the manufacture of chain links, buckles, buckle slides, rings, and other similar articles.
1959	22nd August, 1856.	THOMAS JOHN CHIPP and RICHARD BITMEAD, at present of Soho, in the county of Middlesex.	Improved apparatus for drilling and boring.
1962	,,	WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer.	Improved machinery for cutting chenille.
1964	23rd August, 1856.	FREDERICK ALBERT GATTY, of Accrington, in the county of Lancaster, Manufacturing Chemist.	Certain improvements in dyeing.
1966	,,	EDWARD HALLEN, of Cornwall Road, Lambeth, in the county of Surrey, Civil Engineer.	Improved means for washing wool.
1967	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman.	Improvements in stocking looms.
1969	,,	WILLIAM RACSTER, of 28, Francis Street, Woolwich.	Improvements in apparatus for regulating the supply of gas.
1970	,,	ETIENNE STERLINGUE, Manufacturer, of Paris, town in the French empire.	Improvements in preparing for tanning, and in tanning hides and skins.
1972	,,	GEORGE JAMES FARMER, of Birmingham, in the county of Warwick, Machinist.	Improvements in hardening iron and steel.
1973	,,	JAMES WADSWORTH, of Hazelgrove, near Stockport, in the county of Chester, Machine Maker.	Improvements in the ventilation of mines, and in removing noxious gases or vapours from places in which they accumulate or are generated, and in machinery or apparatus applicable to and to be used for such purposes.
1977	25th August, 1856.	WILLIAM WEBB, of Wilson Street, in the county of Middlesex, Upholsterer.	An improvement in reclining chairs.
1981	,,	HENRY BESSEMER, of Queen Street Place, New Cannon Street, in the city of London.	Improvements in the manufacture of iron and steel.
1982	,,	GEORGE WARRINER, of Withernsea, in the county of York, Operative Chemist.	Improvements in compounds for preserving deodorizing and fertilizing.
1983	26th August, 1856.	JOHN PERRY, of No. 14, Great Portland Street, in the county of Middlesex, Artist.	Improvements in photography.
1985	,,	WILLIAM FREDERICK BUSH, of the city and county of Bristol, Millwright, and WILLIAM HEWITT, of the same place, Gentleman.	Improvements in machinery or apparatus for grinding grain.
1987	,,	CHARLES CAREY, of the Parade, Harleyford Road, Vauxhall.	Improvements in shower baths.
1989	,,	JAMES Earl of CAITHNESS, of Barrogill Castle, in the county of Caithness, North Britain.	Improvements in cutting or shaping stone and other substances.
1990	,,	EDMUND SIMPSON, of Preston, in the county of Lancaster, Manufacturer of Gold Thread.	An improved safety cage for mines and pits, or apparatus to be fitted to cages to prevent accidents from the falling thereof.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
1997	27th August, 1856.	THOMAS LEEDS, of Stockport, in the county of Chester, Machinist.	Improvements in lubricating parts of steam-engines, and in apparatus and machinery to be applied for that purpose.
1999	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improvement in projectiles for cannon.
2000	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improved machinery for combing fibrous substances.
2003	28th August, 1856.	CHARLES DURAND GARDISSAL, of 10, Bedford Street, Strand, London, and of 29, Boulevart Saint Martin, Paris, Patent Agent.	A mode of treating and preparing sea weeds or marine plants for manure.
2004	,,	CHARLES DURAND GARDISSAL, of 10, Bedford Street, Strand, London, and of 29, Boulevart St. Martin, Paris, Patent Agent.	A new manufacture of artificial fuel.
2005	,,	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in shuttles.
2009	,,	JEAN BAPTISTE FEAUVEAU and LOUIS ALEXANDER LEGRAND, both of Brussels, kingdom of Belgium.	An improved apparatus for the purification and the combustion of gas.
2011	29th August, 1856.	EDWARD POITIERS, of No. 12, Maldon Terrace, Haverstock Hill, in the county of Middlesex.	The application of a new material or materials for the manufacture of brooms and brushes in general, and for other purposes, and for improvements in the manufacture of street scavenger's and other brooms and brushes.
2012	,,	JOHN RANDOLPH SEES, of the city of New York, in the United States of America, Mechanical Engineer.	Improved apparatus for heating the feed water of steam-boilers.
2013	,,	JOHN BROWN, of Pendleton, in the county of Lancaster, Surgeon.	Improvements in swinging hammocks, and in the construction of bedsteads or couches, and in apparatus connected therewith.
2014	30th August, 1856.	JOHN FLETCHER, of Salford, in the county of Lancaster, Ironfounder, and WILLIAM FLETCHER, of the same place, Millwright.	Certain improvements in the construction of weighing cranes or other similar elevating machines.
2015	,,	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman.	Improvements in fire-arms.
2020	,,	CHARLES GOODYEAR, of Leicester Square, in the county of Middlesex.	An improvement in combining gutta-percha and asphalt or pitch.
2024	,,	MANOAH BOWER, of Birmingham, in the county of Warwick, Manufacturer, and RICHARD PEYTON, of Birmingham aforesaid, Manufacturer, and JOSES WEAVER Downing, of Birmingham, aforesaid, Metallic Bedstead Maker.	Improvements in metallic bedsteads, cots, couches, and other such like articles.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2026	1st Sept. 1856.	Matthias Edward Bowra, of 63, Basinghall Street, in the city of London.	Improvements in the laying or placing of rails or chairs for railway and other purposes, in the shape of bed or springs or elastic sleepers.
2027	,,	Thomas Pinfold Hawkins, of Birmingham, in the county of Warwick, Manufacturer.	A new or improved manufacture of wire chain.
2029	,,	Richard Hill Norris, M.D., of 46, Stafford Street, Birmingham, in the county of Warwick.	Certain improvements in photography, by the use of collodion in a dry condition, and for a means of transferring photographic films.
2030	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved charger for shot pouches.
2033	,,	Lazarus Simon Magnus, of No. 3, Adelaide Chambers, in the city of London.	Improvements in the manufacture of coke.
2039	3rd Sept. 1856.	George Cumming Thomas, of Washington city, United States of America, but now of 67, Gracechurch Street, in the city of London.	An improved method of making steel.
2046	,,	Joseph Lamb, of Manchester, in the county of Lancaster, Spindle and Flyer Maker.	Certain improvements in machinery or apparatus for preparing, slubbing, and roving cotton, and other fibrous substances.
2041	,,	Jean Baptiste Marcelin Jobard, Directeur du Musée de l'Industrie, Belge, à Bruxelles.	Improvements in the manufacture of lamps.
2044	,,	Louis Cornides, of No. 4, Trafalgar Square, (Office for Patents,) Charing Cross, in the county of Middlesex.	A new method of dressing or preparing hides, skins, intestines, and such like animal substances.
045	,,	Simon Ghidiglia and Louis Turletti, of 39, Rue de l'Echiquier, Paris, in the empire of France, and 4, South Street, Finsbury, London.	An improved buckle.
2048	,,	Jules Mozard, of 6, Dufour Place, Golden Square, in the county of Middlesex.	Improvements in the construction of miners' lamps.
2049	4th Sept. 1856.	James Picken, of Dunlop, in the county of Ayr, North Britain, Millwright.	Improvements in the arrangement of the feed apparatus of machines for thrashing or separating grain.
2051	,,	John Morrison, of Birmingham, in the county of Warwick, Machinist, and Samuel Amphlet, of Birmingham aforesaid, Manufacturer.	A new or improved fastening for belts, bands, and other such like articles.
2052	,,	Constant Jouffroy Duméry, of Paris, in the empire of France, Civil Engineer.	Improvements in steam engines.
2053	,,	Joel Tanner Hart, of Lexington, Kentucky, in the United States of America, now of 67, Gracechurch Street, London, Sculptor.	Improvements in apparatus for modelling statuary from life, and for measuring and copying statuary and other uneven surfaces.
2055	,,	George Alfred Lewis, of Bristol, Somerset.	Disconnecting and raising screw propellers.
2056	,,	Eugene Armand Roy, John Archibald Hall, and William Thomas Binns, all of Camden Town, in the county of Middlesex.	An improved means of ensuring draught in smoke flues or chimneys.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2057	4th Sept. 1856.	William Keates, of Liverpool, in the county of Lancaster, Copper and Lead Smelter.	Improvements in the process of reducing copper to the metallic state from ores and other materials, containing copper, and in the furnaces employed therein.
2061	,,	John Loude Tabberner, of No. 4, Trafalgar Square, (Office for Patents,) Charing Cross, in the county of Middlesex.	Certain improvements in smelting ores.
2063	,,	Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in the construction of buildings and parts of buildings.
2065	5th Sept. 1856.	Henry Edward Cradock Monckton, of the Parthenon Club, Regent Street, in the county of Middlesex, and William Clark, of Upper Terrace, Islington, in the county of Middlesex.	Improvements in machinery or apparatus for tilling or cultivating the soil.
2066	,,	John Johnson, of Single Street, Mile End, London, Colour Manufacturer.	Improvements in railway carriages.
2069	,,	Ralph Reeder, of Cincinnati, in the state of Ohio, United States of America.	An improved universal dial and chronometer compass.
2072	,,	John Johnston, of Ohio, in the United States of America, and of No. 4, Trafalgar Square, (Office for Patents,) Charing Cross, in the county of Middlesex.	Improvements in photographic plates.
2080	6th Sept. 1856.	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improved machinery for cutting round files.
2081		Charles Louis Lapito, of No. 75, Faubourg Poissonier, Paris, at present residing at No. 2, High Street, Marylebone, Manufacturer of Mortar and Concrete.	A machine for manufacturing of mortar and concrete.
2083	,,	Peter Armand le Comte de Fontainemoreau, of 39, Rue de l'Echiquier, Paris, and 4, South Street, Finsbury, London, Patent Agent.	Certain improvements in making artificial stone for statues and ornamenting purposes.
2085	,	Paul Rapsey Hodge, of Albion Grove, Islington, in the county of Middlesex, Civil Engineer.	Improvements in grinding wheat and other farinaceous grains, and in the treatment of the products therefrom.
2088	8th Sept., 1856.	Adolphe Gilbert Chalus, Merchant, of Paris, empire of France, and of 45, Essex Street, Strand, London.	Certain improvements in stopping bottles and other vessels.
2092	,,	Boniface Sabatier, of Paris, and of the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex.	Improvements in photography.
2094	,,	Thomas Restell, of New Kent Road, in the county of Surrey, Chronometer Maker.	Improvements in breech-loading firearms and ordnance.
2096	,,	Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman	Improved machinery for cutting india rubber and other substances into threads or narrow strips.
2097	9th Sept., 1856.	John Watson, of 30, Tureen Street, Glasgow, in the county of Lanark, North Britain, Manufacturer, and Charles Frederic Halle, of Manchester, in the county of Lancaster.	Improvements in spinning or twisting fibrous materials.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2100	9th Sept. 1856.	WILLIAM GOSSAGE, of Widnes, in the county of Lancaster, Chemist.	Improvements in the manufacture of certain kinds of soap.
2101	„	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	An improvement in and apparatus for sprinkling substances in a state of powder.
2103	„	GEORGE TOMLINSON BOUSFIELD, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey.	An improvement in flying or roving frames.
2105	„	WILLIAM SMITH, of 10, Salisbury Street, Adelphi, in the county of Middlesex, Civil Engineer.	A powerful compound whistle.
2106	10th Sept. 1856.	HENRY COOKE, of Manchester, in the county of Lancaster, Cotton Spinner.	Certain improvements in dyeing yarns or threads.
2117	„	WILLIAM WEBSTER, of 22, Bunhill Row, Finsbury, in the county of Middlesex.	Improvements in troughs for feeding animals.
2119	„	WILLIAM OLDHAM, of Southam, in the county of Warwick, Cement Manufacturer.	Improvements in the manufacture of cement, and in treating or preparing colouring matter for cements.
2120	„	WILLIAM HENRY FORSTER, of Gravesend, in the county of Kent, Jeweller.	An improved fastening for articles of jewellery, brooches, or dress ornaments.
2122	11th Sept. 1856.	JOHN GEDGE, of No. 4, Wellington Street South, Strand, in the county of Middlesex, Patent Agent.	Improvements in paint or colouring matter, applicable to coating metals and other substances, whereby the oxidation of metal is prevented, and resistance to the action of the atmosphere, rays of heat, or acids is secured.
2123	„	JAMES HUDSON, of Halifax, in the county of York, Gentleman.	Improvements in whetting or setting printers' doctors and other straight edged tools or instruments.
2125	„	RICHARD ATKINSON COWARD, of Laurence Pountney Lane, in the city of London.	Improvements in paddle-wheels for propelling vessels.
2128	„	JOHN TALBOT PITMAN, of the American and European Patent Offices, No. 67, Gracechurch Street, in the city of London.	Improvements in the construction of iron bridges.
2131	„	CONSTANT JOUFFROY DUMÉRY, of Paris, in the empire of France, Civil Engineer.	Improvements in apparatus for counting, registering, and indicating the distance travelled by vehicles, and the speed and time of travelling.
2132	12th Sept., 1856.	WILLIAM STETTINIUS CLARK, of Camden Town, in the county of Middlesex.	Improvements in hydraulic heaters or furnace.
2134	„	JOHN TALBOT PITMAN, of the American and European Patent Offices, No. 67, Gracechurch Street, in the city of London.	Improvements in repeating fire arms.
2139	„	GEORGE HUTCHISON, of 160, Hope Street, Glasgow.	Improvements in the treatment of oils and fats.
2143	13th Sept., 1856.	WILLIAM WHITTLE, of Smethwick, in the county of Stafford, Mechanical Engineer.	New or improved machinery for the manufacture of nails.
2145	„	JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman.	Improvements in fire arms.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2151	13th Sept., 1856.	JOHN BUCHANAN, of Katrine, in the county of Ayr, North Britain, Gentleman.	Improvements in propelling vessels.
2153	15th Sept., 1856.	JOHN KNOWELDEN, of Southwark, in the county of Surrey, Engineer.	Improvements in the arrangement of valves and apparatus for preventing steam-boiler explosions.
2154	,,	JEAN BAPTISTE JUSTIN LASSIE, of 39, Rue de l'Echiquier, Paris, and 4, South Street, Finsbury, London, Mechanical Engineer.	A new system of aërial navigation.
2155	,,	CORNELIUS FERGUSON CLEMENTS, of Liverpool.	An improvement in separating copper and other metals from ores containing them.
2156	,,	CALVIN KLINE, of Brooklyn, in the county of Kings, and state of New York, United States of America.	The improvement of mariners' and other compasses, by which the effect of local attraction is cut off or neutralized, and the compass is made to traverse more perfectly.
2158	,,	ALEXANDER ROWAND, of Glasgow, in the county of Lanark, North Britain, Merchant.	Improvements in cases or vessels for holding gunpowder.
2160	16th Sept., 1856.	ROBERT ELMY GARROOD, of Chelmsford, in the county of Essex, Plumber and Glazier.	Improvements in stop cocks and valves for the drawing off and passage of air, gas, steam, water, and other fluids, or for any other purpose for which the same may be applicable.
2161	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	An improved preparation of phosphoric acid.
2162	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improved apparatus for raising water by atmospheric pressure.
2163	,,	ROBERT WALKER, junior, of 62, Buchanan Street, Glasgow.	Improvements in ascertaining the draught of water and trim of ships or vessels.
2166	,,	RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, Patent Agent.	Improvements in water-closets and night stools.
2168	,,	ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist.	Improvements in the manufacture of iron.
2170	,,	ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist.	Improvements in the manufacture of iron.
2171	,,	JOSEPH GILBERT MARTIEN, of Newark, New Jersey, in the United States of America, but at present of 32, Essex Street, Strand, London.	Improvements in the manufacture of iron.
2172	17th Sept., 1856.	ROBERT BURNS, of Liverpool, in the county palatine of Lancaster, Engineer.	Improvements in bone mills.
2176	,,	ANTOINE ANDRAUD, of Paris, in the empire of France, Engineer.	Certain improvements in wheelbarrows.
2177	,,	WILLIAM FREDERICK SPITTLE, of Birmingham, in the county of Warwick, Machinist.	A new or improved spindle for braiding and plaiting machines.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2178	17th Sept., 1856.	Alfred Lodwick Newman, of New Church Street, Bermondsey.	Improvements in processes for separating animal from vegetable fibre, and for adapting the products to manufacturing purposes and in the machinery employed therein.
2179	,,	Carl Heinrich Schröder, of Altona, in the duchy of Holstein, Engineer.	An improved rotatory engine to be worked by steam or other elastic fluid, which invention is also applicable as a rotatory pump for raising and forcing liquids.
2180	,,	George Davies, of the Office for Patents, 1, Serle Street, Lincoln's Inn, in the county of Middlesex, Civil Engineer.	Improvements in apparatus for actuating railway breaks.
2182	,,	John Muir Hetherington, of Manchester, in the county of Lancaster, Machinist, and James Gee, of the same place, Draughtsman.	Improvements in flyers for preparing cotton and other fibrous substances for spinning.
2184	18th Sept., 1856.	Thomas Callender Hinde, of Birmingham, in the county of Warwick, Merchant and Manufacturer.	An improvement or improvements in the manufacture of iron.
2186	,,	Louis Jacquemier, of Rome, now residing at Charlotte Street, Fitzroy Square, in the county of Middlesex, Gentleman.	An improved method of hardening and colouring alabaster and other gypsums and calcareous stones and earths.
2190	,,	William Frederick Plumber, of Saint Mary's, Overy Wharf, Southwark, Machinist.	An improved mode of preparing hard wheat and other hard grain for grinding.
2191	,,	Thomas Greenwood, of Leeds, in the county of York, Machinist.	Improved machinery for trimming the teeth of wheels.
2193	,,	Charles Goodyear, junior, of Leicester Square, in the county of Middlesex.	Improvements in the manufacture of penholders and handles for penholders.
2194	19th Sept., 1856.	Jean Baptiste Honoré de Roussen, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of No. 4, South Street, Finsbury, London.	Certain improved apparatus for washing and cleansing ores.
2196	,,	Charles Frederic Vasserot, of the firm Wells and Vasserot, of 45, Essex Street, Strand, London, Patent Agent.	Improvements in filtering water on a large scale.
2198	,,	Pierre Laffitte, of Paris, in the empire of France, Manufacturer.	An improved engine with rotary piston applicable to various purposes.
2199	,,	Amos Hustler, Overlooker, of Bradford, in the county York.	Improvements in looms for weaving.
2213	20th Sept., 1856.	Thomas Webster Rammell, of Trafalgar Square, in the county of Middlesex, Civil Engineer.	Improvements in constructing railways and propelling carriages thereon.
2214	,,	John Roberts, of Walsall, in the county of Stafford, Mine Agent and Surveyor, and James Beech, of Walsall aforesaid, Railway Inspector.	A new or improved railway chair.
2215	,,	Alfred Ford, of Chelsea, in the county of Middlesex, Gentleman.	Improvements in dissolving vulcanized indian rubber for waterproofing and like purposes.
2216	,,	George William Sayer, of Mark Lane, in the city of London, Gentleman.	Improved machinery for stopping or retarding railway carriages.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2217	20th Sept., 1856.	THOMAS EVANS BLACKWELL, of Clifton, Bristol, Engineer.	An improved mode of constructing fire flues and air passages.
2219	22nd Sept., 1856.	ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist.	Improvements in the manufacture of iron and steel.
2220	,,	ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist.	Improvements in the manufacture of iron and steel.
2223	,,	JOHN MORRISON, of Birmingham, in the county of Warwick, Machinist.	A new or improved penholder.
2224	,,	THOMAS WALLACE, of Limehouse, in the county of Middlesex, Engineer.	Improvements in the manufacture of wheels, axles, and axle-boxes.
2225	23rd Sept., 1856.	JOHN GEORGE TAYLOR, of Glasgow, in the county of Lanark, Merchant.	Improvements in fastenings, connectors, and couplings, and in the application thereof.
2227	,,	FRANCIS WRIGLEY, of the Long Island Iron Works, Carlisle, in the county of Cumberland, Engineer.	An improved friction coupling for the transmission of motive-power.
2229	,,	RICHARD HUSBAND, of the city of Manchester, in the county of Lancaster, Hat Manufacturer.	Certain improvements in the manufacture of silk hats.
2230	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in gimlets, augers, and other tools which operate by a rotary motion.
2231	23rd Sept., 1856.	WILLIAM JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Civil Engineer.	Improvements in machinery for doubling and twisting fibrous materials.
2233	24th Sept., 1856.	ANDREW BARRIE, of Edinburgh, Watchmaker.	A new or improved instrument or apparatus for registering the time at which workmen arrive at and leave their place of work, and for other such like purposes.
2236	,,	ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman.	Improvements in carding engines.
2237	,,	PETER WILLIAM BARLOW, of Great George Street, Westminster.	Improvements in the permanent way of railways.
2241	,,	VICTOR FREDERIC ANTOINE PROST, Merchant, of Paris, town in the French empire.	Improvements in weaving and in the machinery or apparatus employed therein.
2242	25th Sept., 1856.	ROBERT BROWN, of Glasgow, in the county of Lanark, North Britain, Brass Founder.	Improvements in taps or valves.
2243	,,	THOMAS HOLMES, of Pendleton, in the county of Lancaster, Bleacher, and THOMAS ASPINALL, of Pendleton aforesaid, Watchman.	Improvements for preventing or diminishing the production of smoke in fireplaces and furnaces, and for effecting its combustion.
2244	,,	JOSEPH WILLIAM WILSON, of Banbury, in the county of Oxford, Engineer.	Improvements in machinery or apparatus for manufacturing parts of brooms and brushes.
2249	,,	ARTHUR ALBRIGHT, of George Street, Edgbaston, in the county of Warwick.	Improvements in the manufacture of lucifer matches, and of boxes suitable for containing the same.
2250	,,	ROBERT FROST, of Steam Mills, Chester	Improvements in the manufacture of flour.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2252	25th Sept., 1856.	MATTHEW ANDREW MUIR, of Glasgow, in the county of Lanark, North Britain, Machinist, and WILLIAM JAMES WALKER, of the same place, Manufacturer.	Improvements in machinery or apparatus for sizing or dressing yarns or threads.
2254	26th Sept., 1856.	CLAUDE LANGLOIS, of Bath, in the county of Somerset, Artist.	Improvements in photography.
2256	,,	MARIUS PELLEN, of the firm Pellen and Co. of No. 63, Rue d'Anjou, St. Honoré, in the city of Paris, Merchants.	Rendering impermeable by gas caoutchouc, gold beater's skin, paper, gauze, and similar materials used for things adapted to receive an ascending force, such as balloons, aerostatic machines, toys, &c., &c., by the application of a peculiar varnish.
2257	,,	CHARLES RENSHAW, of Dukinfield, in the county of Chester, Engineer and Millwright.	Improvements in squeezing rollers, applicable to machinery or apparatus for pressing or partially drying yarns and woven fabrics.
2258	,,	WILLIAM HORSFALL, of the city of Manchester, in the county of Lancaster, Card Manufacturer.	An improvement or improvements in cards for carding fibrous substances.
2259	,,	GEORGE GOWER WOODWARD, of Kidderminster, in the county of Worcester.	Improvements in the manufacture of carpets.
2263	27th Sept., 1856.	GEORGE NEALL, Wholesale Brewer, of Northampton.	An improved union gas stove for lighting and heating.
2264	,,	JOHN BOYD, of Ashbocking, in the county of Suffolk, Gentleman.	Improvements in letterpress printing machines.
2269	,,	JOSEPH EDWARDS, of Liverpool, in the county of Lancaster, Provision Dealer.	An improved ships' log.
2270	,,	JOHN ROTHWELL, of Park Hill, Bolton, in the county of Lancaster.	A certain composition and preparation to promote the ignition and combustion of coke, coal, and other combustible substances in stoves, furnaces, and grates.
2274	29th Sept., 1856.	CHARLES JOHN CARR, of Belper, in the county of Derby, Engineer.	Improvements in operating hammers and stamps.
2275	,,	JAMES NOBLE WARD, of the Army of the United States of America.	An improvement in the construction of self-priming fire-arms.
2277	,,	MATTHEW HICKSON, of Salford, near Manchester, in the county of Lancaster, Gentleman.	Improvements in waterproofing certain woven fabrics.
2278	,,	DAVID THOM and GEORGE ALDCROFT PHILLIPS, both of Manchester, in the county of Lancaster, Soap Manufacturers.	Certain improvements in apparatus used in the manufacture of soap.
2280	,,	JOHN LORD, of Rochdale, in the county of Lancaster, Flannel Manufacturer.	Certain improvements in the process of separating or recovering animal wool or silk from cotton and woollen, or from cotton and silk or other mixed fabrics, whereby the animal wool or silk is rendered capable of being again employed, which said improvements are also applicable to wool in its unmanufactured state.
2281	,,	HENRY JENKINS, of Birmingham, in the county of Warwick, Die Sinker, Stamper, and Piercer.	Improvements in the manufacture of buckles and other dress fasteners.

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2282	29th Sept., 1856.	GEORGE TOMLINSON BOUSFIELD, of Sussex Place, Loughborough Road, Brixton, in the county of Surrey.	An improvement in the manufacture of artificial stone.
2283	,,	CHARLES WILLIAM RAMIÉ, of Pimlico, in the county of Middlesex.	Improvements in constructing the permanent ways of railways.
2285	30th Sept., 1856.	THOMAS ARTHUR DILLON, of the Registry of Deeds Office, in the county of the city of Dublin, and JOHN GRAY, M.D., of 4 and 5, Princes Street, in the county of the city of Dublin, Esquires.	An improved means for making signals on railway trains between the guard and driver respectively, and between the passengers and guard and driver, and of giving notice to the guard and driver in case of the accidental severance of the parts of a train, which invention is applicable also to steam ships, factories, and other places where it may be requisite to communicate with distant points.
2288	,,	WILLIAM GOSTWYCK GARD, of Calstock, in the county of Cornwall, Engineer.	Improvements in bits for boring and sinking.
2289	,,	DUNCAN BRUCE, of Paspebiac, in the county of Bonaventure, in the province of Canada.	Making a concentrated animal manure.

FOREIGN PATENTS.

HANOVER.*

List of Patents of Invention Delivered between the 1st July and 30th September, 1859.

(Communicated by the Hanoverian Government.)

(For previous List, see No. 580 of this Journal.)

299. Schulte, of Berlin, for "An apparatus for obtaining sulphur and sulphuric acid from plaster."—5 years.—Dated 6th July, 1859.

300. Henry Justinian Newcome, of Sherby, for "An apparatus for heating, warming, and drying, consisting of a system of pipes, which are separated from the furnace belonging thereto."—5 years.—Dated 16th July, 1859.

301. Henry Burden, of Troy, U.S., for "A machine for making horse-shoes."—5 years.—Dated 11th July, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 4th October, 1859, and each bearing that date.

No. 25,612. James G. Abbott, and Archilus Lawrence, of Philadelphia, Pa., for an "Improvement in stoves."

"We claim the combination of the ring R, perforated door frame F, extending down over the ring and slide B, with the stove cylinder, as set forth."

No. 25,613. J. C. Adams, of Greensburg, Ind., for an "Improvement in corn planters."

"I claim the arrangement of the clevis device *f*, on the rear of the pole *s*, when said pole is received through the mortise in the bar, and when the said bar is made adjustable by means of bolts and bolt holes through its ends, and through the frame pieces A, said being made so as to clasp together cross pieces *c* and c^1, all in the manner and for the purpose set forth."

No. 25,614. Charles Alden, of New York, N.Y., for "Improvements in apparatus for evaporation."

"I claim the agitator so constructed as to be capable of acting as a blower as well as a stirrer, substantially as set forth herein."

No. 25,615. Albert J. Allen, of Buffalo, N.Y., for an "Improved steam gauge."

"I claim first, capsule G, of peculiar construction, having the steam admitted at one side, and through the centre of that side, and using the flexibility of both sides (such capsule being made of a permanently elastic metal, and not injuriously oxidized by steam or water, preferring for that purpose, the metal used in making melodeon reeds), in combination with fulcrum block F, lever H, spring P, rod O, rod I, swivel block J, radius bar L, and segment K, having tail piece *k*, pinion N, index pointer E, dial plate D, and friction pressure spring M, substantially as shown and described. Second, I claim radius bar L, in combination with rod I, swivel block J, segment K, having tail piece *k*, pinion N, index pointer E, and dial plate D, having increasing divisions on its face, substantially as shown and described. Third, I claim swivel block J, in combination with rod I, radius bar L, and segment K, having tail pin *k*, substantially as shown and described."

No. 25,616. John P. Allen, of Midville, Geo., for an "Improvement in seed planters."

"I claim the arrangement and combination of the frame E, provided with the armed hub *g*, the hopper F and its bar G, in connection with the adjustable bar I, provided with the self-adjusting covering plate or bar K, substantially as and for the purpose set forth."

No. 25,617. Thos. Armitage, of Philadelphia, Pa., for an "Improvement in feed water apparatus for steam boilers."

"I claim the vessel C, with its valve *c*, opening inwards, in combination with the pipes D, E, F, H, and I, with their respective cocks, and the drum B, the whole being arranged in respect to the boiler, substantially as and for the purpose herein set forth."

No. 25,618. Henry F. Baker, of Centreville, Ind., for an "Improvement in mole plough."

"I claim the arrangement and combination of the screw E, key F, knife C, share G, and revolving packer H, as and for the purpose herein shown and described. I also claim the employment of a revolving mole or packer H, substantially as and for the purposes herein shown and described."

No. 25,619. H. H. Baker, of New Market, N.J., for an "Improvement in weeding hoes."

"I claim the arrange of the piece B, standard D, plate A concave E, and ferrule F, as described, as and for the purposes substantially as above set forth."

No. 25,620. O. D. Barrett, of Cleveland, O., for an "Improvement in rotary harrows."

"I claim the arrangement of the hooks H, H, draught bars G, G, centre pins (B, B^1), (B, B^1), arms F, F, and spring-joint D, in relation to each other and to the harrows, as and for the purpose herein set forth."

No. 25,621. Wm. W. Batchelder, of New York, N.Y., for an "Improvement in construction of vapor burners."

"What I claim, is, arranging the orifice of discharge *i*, from the retort, in reference to the open end of the gas pipe *d*, so that the sediment from the orifice cannot fall into said pipe, nor remain about and choke the orifice, substantially in the manner and for the purposes set forth. I also claim the entire disconnection of the pipe *d*, and retort, as set forth. I also claim the combination of the circular form of the gas pipe *d*, with the horizontal discharge, as set forth. I also claim connecting the retort with the ascending part of the gas pipe, and near the burner, as set forth."

* For the Hanoverian Patent Law, see No. 231 of this Journal.

No. 25,622. MAHLON BONNELL, of New York, N.Y., and ISAAC I. COLE, of Tappan, N.J., for an "Improved machine for cutting veneers."

"We claim, first, the arrangement of the cams a, a^1, or their equivalents, in combination with the log carrier A, substantially in the manner and for the purpose specified. Second, the arrangement and combination of the log carrier A, with the tank M, or its equivalent, substantially as and for the purpose described."

No. 25,623. NATHL. BOURNE, of Peosta, Iowa, for an "Improvement in construction of evaporating apparatus."

"I claim the arrangement and combination with the evaporating pan A of a series of partitions and shutters, substantially as and for the purpose herein shown and described."

No. 25,624. B. B. BRIGGS, of Sharon, O., for an "Improvement in apparatus for laying drain tile."

"I claim the herein described clutches, consisting of the block or body, and the fingers H, H^1, H^{11}, and F, F^1, constructed and operating as set forth, in combination with the rope C, or its equivalent, and hook B, when these several parts are arranged and operated, substantially as specified."

No. 25,625. ROBT. C. BUCHANAN, of U.S. Army, for an "Improvement in knapsacks."

"I claim the combination of the body yoke and end pockets to the knapsack, the whole being combined and operating, substantially as is herein set forth."

No. 25,626. J. A. BUCKWATER, of Kimberton, Pa., for an "Improvement in brick moulds."

"I claim the expanding frame B^1, formed of the movable plates c, c^1, h^*, and fitted within the frame A^1, provided with the inclined or taper pendents d, and inclined slats L, L^1, the plates c, c^1, h^*, being connected respectively to the pendents d, and slats L^1, by the pins f, and staples g, substantially as and for the purpose set forth."

No. 25,627. ERASTUS TOUCY BUSSELL, of Covington, Ky., for an "Improved measuring faucet."

"I claim, operating the cut off, by a rotary movement of the exhaust chamber, which comprises the measure proper, whereby the fluid is first admitted into said measure, and then discharged therefrom. Also a graduated plunger rod, square or otherwise, so as to admit of stop notches on each side, independent of the others, into which a pin is forced by a spring, as set forth, or its equivalent."

No. 25,628. LYSANDER BUTTON and ROBT. BLAKE, of Waterford, N.Y., for an "Improvement in supporting the carriage bodies of fire engines."

"What we claim, is, the propping of fire engines, which are mounted upon springs by means of cams a, or mechanical equivalent thereof, so arranged and operated, as by lever power, to throw the weight of the engine from and upon the springs, substantially in the manner and for the purposes set forth."

No. 25,629. G. A. CLARK, of Farmington, Conn., for an "Improvement in fireplaces."

"I claim the within described arrangement of caliducts C, D, E, E, F, G, G, H, H^1, and C^1, when the same are applied to a fireplace, in the manner and for the purposes herein set forth."

No. 25,630. POWHATTAN ELLIS COLLINS, of Mobile, Ala., for an "Improvement in cotton gins."

"I claim an adjustable hopper, as described, for changing and regulating the feed of cotton to a gin, as set forth. I also claim, in combination with an adjustable and regulating hopper, the toothed cylinder D, for conveying the cotton from the hopper to the gining or saw cylinder, as herein set forth. I also claim the arrangement of the hopper, feeding tooth roller, saw and brush cylinders, as shown, so as to operate in connection with each other, in the manner described."

No. 25,631. GARRETT COOPER, of Jersey City, N.J., for an "Improved tray bolt."

"I claim the general arrangement of bolt A, shield B, nipple C, and plate of metal H, when said bolt shall effect its own spring, and when the said parts shall be arranged and operated in the manner described, and for the purpose specified."

No. 25,632. PEARSON CROSBY, of New York, N.Y., for an "Improved manner of hanging reciprocating saws."

"I claim connecting the two plates b, b, of the caps B by means of rivets d, and pins g, k, the ends of which are fitted in holes countersunk at the inner sides of the plates to admit of the vertical adjustment of the plates b, for the purpose set forth. I also claim encompassing the rivets d of the cap B by tubes or cases f, to form a bearing for the plates b, b, and prevent an undue pressure of the caps against the saw, so that the latter may be adjusted to compensate for wear, as specified. It being understood that I do not claim broadly the tubes or cases f, but only when used in connection with or applied to the caps B, for the purpose set forth."

No. 25,633. JOSHUA DAVIS and SARAH N. DAVIS, of Maskegon, Mich., for an "Improved bread and vegetable slicer."

"We claim the arrangement and combination of the adjustable slotted plates H, gauge I, rod h, spring J, and lever F as herein shown and described, so that the slice of bread shall be supported by the gauge until the stroke of the knife is almost finished, and so that the gauge I shall fall outwardly on the depression of spring J, all as set forth."

No. 25,634. WM. H. DAVIS, of Taunton, Mass., for an "Improved blind fastener."

"I claim the application to the catch of a box to secure it from getting out of place, and of the hook on the blind, a rest to prevent the blind from sagging, as herein described."

No. 25,635. ROBT. DICK, of Toronto, Canada, for an "Improvement in accountant labels for periodicals, &c."—Patented in Canada, 26th July, 1858.

"What I claim as my invention is, the contrivance of keeping accounts current in printed form by the use of printer's type, or their equivalents, kept so arranged as to admit readily of all the re-adjustments which the currents of business may require, in manner, substantially as set forth. Based on this primary invention, I also claim the device of rendering or transmitting accounts thus, or substantially thus kept in type, by sending printed impressions taken therefrom, though the particular form of sending may not be mine. While, at the same time, I claim in the broadest and fullest sense the special mode and form herein set forth by the use of the machine herein described, as constituted by the combination of fluid vessel, reel, apron movement, and cutter stamp, which machine I also claim with all the modes indicated for operating the same, and in connection with the recited claims I thus formally make. I also claim all other means and appliances, substantially the same as those herein claimed or intended to be claimed."

No. 25,636. MASON H. FORD, of New York, N. Y., for an "Improvement in borer for excavating mud, &c."

"I claim, first, the construction of revolving excavating scoops, provided either with openings and wings or flanges on its sides, capable of opening and shutting or so constructed that part of the sides may be opened and act in that position as wings or flanches, by which the dirt, mud, or sand is, during the revolving of the scoop, thrown into the inside of the scoop, as described. 2nd, I claim the manner of attaching scoops to the shafts, so that the same will be made to turn with the shaft when the same is revolving, and at the same time capable of being raised above the surface of the water, when filled, for the purpose of being emptied without requiring to raise the shaft, substantially as described."

No. 25,637. PETER GETZ, of Lancaster, Pa., for an "Improvement in cooking stoves."

"I claim the specific arrangement of the boilers O, H, H, drum head oven C, and their combination in manner as set forth, for the purpose specified."

No. 25,638. WM. D. GUSEMAN, of Morgantown, Va., for an "Improvement in weighing scales."

"I claim the triangular recess cut out on the underside of the journals of the pendulum drum or shaft to enable said

drum to swing or roll on its axis on the upward pointing knife edges g, substantially in the manner and for the purpose herein described. I also claim, in combination with an upward pointing knife edge or roller, or pendulum drum, the journals of which are formed with triangular recesses, and a counterpoise weight, or its equivalent, vibrating below the centre of the drum or roller, substantially in the manner and for the purpose herein described, and this I claim whether the counterpoise be adjustable on its lever or not."

No. 25,639. Henry Hays, of New York, N. Y., for an "Improved stave machine."

"I claim dressing staves by a continuous operation, regardless of length or thickness, by the combined action of the feed rollers c, d, and cutters w, v, when said parts are arranged as set forth, to remove a shaving from the outer side of the stave under all circumstances, and split out, more or less, from the inner side to reduce the stave to an uniform thickness, as specified."

No. 25,640. Joseph Harrison, jr., of Philadelphia, Pa., for an "Improved steam boiler."

"I claim the construction of a boiler of distinct globular or spherical parts single or in groups, substantially as above described, united in the manner herein-before specified, or any other analogous thereto, and wherein the strength of the globular form of such parts is common to the entire structure. This claim being intended to include not true spheres only but elliptical, conical, polyhedral, or any other analogous forms, also, where the results, looking to strength and construction of the boiler, are substantially the same as those herein enumerated. I also claim the employment, as units of construction, as herein-before explained, of separate chambers of cast iron or other metal of uniform size and shape, substantially as described, to be used as wanted, wherewith boilers of different forms and dimensions may be built up, being united together in the manner herein-before specified, or any other analogous thereto. Both of the above claims involve an outside casing for the particular construction with furnace or furnaces, substantially as herein-before described. It is not, however, my intention to confine myself to any special form of boiler or mode of casing the same."

No. 25,641. Joel Haines, of West Middleburg, O., for an "Improved device for connecting the panels of portable field fences."

"I claim the jointed link J for connecting the ends of the panels, so arranged that by using a tapering key in the link the angle of a zig-zag fence may be made more or less obtuse as required, to make the fence stand firm in the position in which it is placed."

No. 25,642. W. M. Henderson, of Baltimore, Md., for an "Improvement in pumps."

"I claim the two-ball-valve cages with the suction valves in their interior, attached to the extremity of a central perforated tube, or its equivalent, in combination with the waterways and discharge valve, when constructed and operated, substantially in the manner and for the purposes set forth."

No. 25,643. Thompson Hersee and Pierre Jos. Bourgnon, of Buffalo, N. Y., for an "Improvement in faucets."

"First, we claim the relative arrangement of the valve H, chamber F, and spherical part D, in combination with the plug B, said valve having a lifter K and stem L, and the whole operating substantially as described. Second, the combination and arrangement of the lifting rod (N), valve (o), tube (P), and pipe (4), with the cross piece (L), for the purpose of ventilating the barrel at each draught, substantially as described."

No. 25,644. John B. Holmes, jr., of New York, N. Y., for an "Improved curtain fixture."

"I claim the spring d, in combination with the roughened V-shape grooved pulley b, an endless cord or band b^1, said parts being arranged to operate in relation to each other as specified. I also claim the brackets c, c^1, provided with the centre pins 1, entering the roller ends b, b^2, in the manner and for the purposes specified. I also claim forming the bracket c with the slot and opening 3, and the bracket c^1 with a hook-shaped slot 2, to afford opportunity of removing the whole of the parts without having to draw the screws or nails passing through said brackets, as specified."

No. 25,645. Lewis Hover, of Flushing, N. Y., for an "Improvement in signal lanterns."

"I claim the arrangement and combination with the case A and lamp C of the metalic cylinder D, and glass cylinder E, substantially as and for the purpose herein shown and described."

No. 25,646. Job F. Howland, of New York, N.Y., for an "Improved tool for cutting gas pipe."

"I claim the arrangement of a stationary iron frame with a slot in it, which terminates in a conical form at one end, in combination with a sliding jaw, having a V-shaped tongue, and with an adjustable sliding cutter, substantially as and for the purposes set forth."

No. 25,647. J. W. Howlett, of Greenboro', N.C., for an "Improved mode of disinfecting feathers."

"I claim the injection of combined steam and chlorine gas among the feathers, substantially as herein shown and described."

No. 25,648. B. C. Hoyt, of Port Washington, Wis., for an "Improved vegetable cutter."

"I claim the arrangement of the cutting box upon a vibrating lever C, when the lever is supported by a spring E, actuating arm D, for keeping the whole in an elevated position, as herein above set forth. I also claim the combination of slide H, angular slotted box K, and vertical cutters J, arranged and operating, substantially in the manner and for the purposes herein set forth."

No. 25,649. Rameth Hussey and Uriah Thornburgh, Sr., of Walnut Run, O., for an "Improvement in mole plough."

"We claim suspending the plow beam that carries the mole to the plow frame by means of ropes or chains, connecting its ends to one capstan, in combination with suitable catches for holding it at any adjusted height thereon, the whole being arranged in the manner and for the purpose herein set forth and explained. We also claim, in combination with the rotary mole, suspending the plow beam by both its ends to ropes or chains, which connect with a common capstan on the plow frame, in combination with racks and pawls, for holding said beam when adjusted, the whole being arranged for the purpose and substantially in the manner herein stated."

No. 25,650. Isaac E. Jones, of Cincinnati, O., for an "Improvement in spark arresters."

"I claim the arrangement of the tank (A, A^1), wind wheel (g), and agitator (k), with reference to the receiving trunk (F), and valve l, all being constructed and arranged to operate conjointly, as herein described, and for the purposes set forth."

No. 25,651. Martin C. Kilgore, of Washington, Iowa, for an "Improvement in rotating harrows."

"I claim the arrangement and combination of the windlass E, arms I, socket N, collar J, harrow P, and spindle K, as and for the purpose herein shown and described."

No. 25,652. H. B. Knowles, of Providence, R.I., for an "Improved attachment to treadles of sewing machines."

"I claim the employment of a yielding adjustable rod, having a cross-head with hooks at its upper end, in combination with a shackle bar, crank shaft and treadle, substantially as and for the purposes set forth."

No. 25,653. Philip Koch, of New Haven, Conn., for an "Improvement in punching metals."

"I claim, 1st, the employment or use of a series of arbors to which punches or shear blades are attached, fitted in a rotating or adjustable head d, when said head is connected with an arbor C, having a plate c attached, provided with bolsters c^1, and shear blades f, corresponding with the punches and shear blades of the head, substantially as and for the purpose set forth. 2d, the means employed for actuating the yoke H, and consequently the arbors e, to wit, the adjustable shaft K, provided with the eccentric J, pin w, fitted within the block L of yoke H, the adjustable shaft P, provided with the lower crank r and the recess v in the back part of plate o, to receive pin w, substantially as and for the purpose set forth."

No. 25,654. E. D. Lee, and Z. W. Lee, of Blakely, Geo., for an "Improvement in ploughs."

"We claim the arrangement of the peculiar curved clevis I, beam A, curved rod E, bar D, band G, wedge H, shank (*f*), projection (*h*), and share F, as herein specified, for the purpose set forth."

No. 25,655. Levi E. Lincoln, of Lowell, Mass., for an "Improvement in safety apparatus for steam boilers."

"I claim the application of a low-water alarm to more than one boiler (or to one), by means of a two or more legged tube, a simple or a compound syphon, in such manner that said tube shall keep said alarm charged with water, when all its pendent ends are covered by water, and shall cause said alarm to be supplied with steam when any one of its pendent ends is exposed to steam, substantially as in this specification set forth and described."

No. 25,656. W. T. Littlejohn, of Kalamazoo, Mich., for an "Improved mangle."

"I claim the arrangement of the levers D, D, with roller C at their upper end, the spring F, bar G, connected to the treadle I by the rope H, in combination with stationary roller B, substantially as and for the purpose set forth."

No. 25,657. Cornelius Mahoney, of New York, N.Y., for an "Improvement in musical notation for the blind."

"I claim the combination of letters and characters, or notes in embossed print, so as to represent music for the blind, substantially as set forth."

No. 25,658. Newton S. Manross, of Bristol Conn., for "Improvements in valves for retarding and arresting the flow of gases."

"I claim the use of a recurved or V-shaped tube or passage having its lower part connected with a well or reservoir containing quicksilver, which is made to rise within the tube by means of a plug or other equivalent pressure, substantially in the manner and for the purpose herein specified. I also claim the combination of such recurved tube closed by quicksilver, with the regulating apparatus, consisting of a tapering shoulder and movable rod, secured from leakage by passing through the quicksilver."

No. 25,659. H. Marshall, of Cincinnati, O., for an "Improvement in coffins."

"I claim the new article of manufacture herein named, to wit, a coffin having its bottom, ends and sides, wholly constructed of corrugated sheet metal, which is rolled or stamped into proper form, and surrounded at the upper edge of its body with a wrought or cast iron frame which serves as a brace to the body, and a holdfast for screws, substantially in the manner and for the purpose herein described."

No. 25,660. Nathan B. Marsh, of Cincinnati, O., for an "Improvement in hydrants."

"I claim the arrangement in connection with the main casing G, discharge pipe S, and air chamber E, of a hydrant of the upper and lower plunger or valve chamber A, C, made in one piece F, upper plunger or valve D, when composed of parts *k*, *l*, *m*, *n*, *r*, and lower conical guide and stop, plunger composed of parts B, *h*, *i*, the whole being constructed, arranged and used together in the manner and for the purpose herein described."

No. 25,661. J. Plympton Marshall, of Millbury, Mass., for an "Improvement in breech-loading fire-arms."

"I claim, 1st, the combination of the lock bolt (of the movable breech) or its equivalent, and the discharging lock of the arm with intermediate parts for the purpose above set forth. 2d, arranging the lock for the tape primers in the manner above described for the purpose specified."

No. 25,662. Edwin May, of Indianapolis, Ind., for an "Improvement in the construction of prisons."

"I claim, first, the angle door D, in combination with the safe lock or bolt I, when constructed and operated substantially as set forth. Second, the safe J, containing the drum (*p*), and bolt I, and being held by the outer door C, when constructed and operated substantially as and for the purpose set forth. Third, the endless chain or rope (*e*), in combination with the levers (*d*), when constructed and operated substantially as and for the purposes set forth. Fourth, the combination and arrangement of the levers (*b*), box (*a*), and bolts or lugs (*s*), when operated from without the grating (*i*), substantially as and for the purposes set forth."

No. 25,663. Edwd. Maynard, of Washington, D.C., for an "Improvement in back sight for fire-arms."

"I claim the device as set forth, viz: the grooved cylindrical end of the sight carriage, in combination with a spring bolt or pin of such form that it shall fall into the grooves, and bear against their two sides, and yet not touch the bottoms of the grooves, so that as it wears it will still press on the sides of the grooves and hold the carriage firm in either of its positions. 2ndly, I claim the device as set forth, of placing the spring and its bolt or pin within the stock or breech of the gun, for its more perfect protection from wet and damage by accident, the opening through which the pin acts, being susceptible of being closed with oil or packing."

No. 25,664. Edwd. Maynard, of Washington, D. C., for an "Improvement in the nipples of fire arms."

"I claim the permanent union of a cap or nipple (*a*) with the closed end of a tube (*b*), whose open end has screw threads formed within it, by which I am enabled to combine the said nipple and its tubular seat with the abutment (*d*) of the breech piece of a fire-arm by means of a transverse perforation in said abutment for the reception of the tubular nipple seat, and a nick-headed screw (*c*) inserted into the left-hand end of said perforation, and working into the screw threads in the open end of said tubular nipple seat, substantially as herein set forth."

No. 25,665. John McCluskey, jr., of South Boston, Mass., for an "Improvement in skates."

"I claim the jointed heel-strap C, as set forth, in combination with the toe-strap B, when the latter is made longitudinally adjustable upon the runner A, substantially as specified."

No. 25,666. Wm. Howard Mitchell, of San Francisco, Cal., for an "Improvement in window-sash supporter."

"I claim, 1st, the roller A, arranged on an angular double jointed arm B, B, C, C, so as to have slight play up or down between two stops E, G, accordingly as it is operated upon by a spring F or the weight of the sash N, substantially as and for the purposes set forth. 2nd, the combination of the angular double-jointed arm B, B, C, C, spring F, thumb piece H, friction roller A, and semicircular recess *m*, in the window frame, substantially as and for the purposes set forth."

No. 25,667. Mortimer Nelson, of New York, N. Y., for an "Improved gold washer."

"I claim, 1st, the combination of a series of concave plain pans with a series of convex riffled pans, said pans all being arranged on the same vertical shaft, substantially as and for the purposes set forth. 2nd, the arrangement of a horizontal cam wheel, ball, horizontal friction roller, two bevel wheels, a rising and falling driving shaft, and a collar on the vertical shaft for operation together, substantially in the manner and for the purposes set forth. 3rd, the combination of a revolving perforated platform or grating with a non-revolving but yielding raking device, substantially as and and for the purposes set forth. 4th, the combination of the stationary case with the revolving perforated platform, raking device, and the horizontally revolving pans, substantially as and for the purposes set forth."

No. 25,668. Nelson Orcutt, of Binghamton, N. Y., for an "Improvement in composition for soap."

"I claim making soap from untried or unrendered tallow or grease, and the other ingredients herein named, the ingredients being in the proportions as herein stated."

No. 25,669. Lewis Pagin, of Elmore, O., for an "Improved combined table and clothes dryer."

"I claim a combined table or stand and a clothes dryer, composed substantially of a table or stand with a reversible top and a box, drawer, or recess, and two or more jointed arms that will fold up and lie within said box, drawer, or recess, the whole being combined and arranged for the purpose set forth."

No. 25,670. Benjn. S. Pardee, of Mount Carmel, and Thos. Rawling, of New Haven, Conn., for an "Improved upholstery nail."

"What we claim as a new article of manufacture is, the paper-headed nail or tack, constructed substantially as herein described."

No. 25,671. Seneca Pierce and Frederick F. Beardsley, of Castle Grove, Iowa, for an "Improvement in composition for tanning."

"What we claim is, a composition for tanning, made of terra japonica alum, glauber salts, and saltpetre, in the proportions and manner herein set forth."

No. 25,672. Josiah W. Prentiss, of Pultney, N. Y., for an "Improved mode of restoring rancid butter."

"The particular improvement which I claim as having been originally and first invented by me, is, the mode described of restoring rancid butter in the firkin by removing the hoops so as to open the joints, enclosing it in a bag or other texile fabric, and then surrounding the whole with charcoal, substantially as herein-before described, and for the purpose set forth."

No. 25,673. James Parinton, jr., of Lynn, Mass., for an "Improved machine for lasting boots and shoes."

"What I herein claim is, the clamps A, A, A, A, in combination with the slides B, B, B, and C, and for the purposes herein specified, said clamps and slides being carried to their place by their levers I, I, I, I, and J, J, J, J, or their equivalents. I also claim the opening and closing slide C, and Figure 2, also the roughing or cutting slide D, Figure 3, for the purposes and as herein described."

No. 25,674. Edward A. L. Roberts, of New York, N. Y., for an "Improved lathe chuck."

"I claim the application and use of the ball and socket joint, in combination with the mandrel or chuck of lathes, substantially as and for the purposes set forth and described."

No. 25,675. Christian Ropp, of McLean County, Ill., for an "Improvement in corn planters."

"I claim the arrangement of dog wheel P, levers u^{II}, and u^{III}, stops u and u^{I}, with stops f, springs s, bent rods g, and feed wheels F, F^{I}, the whole being constructed substantially as and for the purpose set forth."

No. 25,676. O. Sage, of Wellington, O., for an "Improvement in cheese vats."

"I claim the combination of the furnace D, and smoke pipe e, with the open and curved bottom b^{1} of the water box b, pipe E, equalizer G, and milk box c, said parts being constructed, arranged, combined, and operating in relation to each other, substantially as and for the purposes set forth."

No. 25,677. Jacob Seebold, of New Berlin, Pa., for an "Improvement in grain separators."

"I claim attaching the separator to the thresher by rocking frames e and f, in combination with wheel W, rod d, slotted arm b, and spring s, for producing its reciprocating movement, substantially as described."

No. 25,678. Saml. R. Seibert, of Munising, Mich., for an "Improved surveying instrument."

"I claim constructing the Y's or supports of the telescope in a surveying instrument, as set forth, also constructing a clamping pinion, in the manner and for the purposes as herein described."

No. 25,679. J. H. Shireman, of East Berlin, Pa., for an "Improvement in dividers for harvesters."

"I claim the combination of the adjustable case B, with the stationary horizontal dividing point A, the parts being constructed and arranged in the manner and for the purpose described."

No. 25,680. Thos. P. Sink, of Fairton, N. J., for an "Improvement in oyster dredges."

"I claim the arrangement and combination of the chuck or block A, and its pulley B with the roller E, the respective parts being formed and operating substantially in the manner and for the purposes above set forth."

No. 25,681. Seymour Smith, of Sharon, Conn., for an "Improved saw-set."

"I claim the mill saw-set herein described as a new article of manufacture, the several parts A, B, and F, being constructed and arranged substantially in the manner and so as to be operated as herein set forth."

No. 25,682. Leonard Snider, of Indianapolis, Ind., for an "Improvement in covering coffins."

"I claim using and applying flook as a covering for coffins, whether the same is prepared or secured, or in the manner herein set forth, or in any other manner substantially the same."

No. 25,683. Charles L. Stacy, of Cincinnati, O., for an "Improvement in hydrants."

"I claim the relative arrangement of the cup formed discs F, G, and G^{III}, and the apertures K and L, adapted in the manner set forth, to form a chamber I, closed on all sides (with the exception of the ingress aperture K), while the hydrant is open for the purpose of expanding the flanges f and g, and upon the closing of the hydrant to uncover the aperture L, and thereby empty the discharge pipe C."

No. 25,684. James E. B. Stuart, of Wytheville Va., for an "Improved method of attaching sabres to belts."

"I claim the attachment hook H, in combination with the ring O, P, or its equivalent attached to the waist belt, as indicated in the drawing M, the whole being constructed and operated substantially in the manner and for the purposes set forth."

No. 25,685. W. H. Stuart, of Millington, Md., for an "Improvement in seed planters."

"I claim, first, a double corn planter, the parts of which are constructed, combined, and arranged to operate in relation to each other, as described. Second, connecting the two independent sets of valves by means of that flexible connection H, in combination with single operating chain or cord H^{1}, as and for the purposes set forth."

No. 25,686. H. K. Symmes, of Newton, Mass., for an "Improvement in construction of gas burners."

"I claim the combination with the inverted cup D, and tube C, and the quicksilver basin or basins, or their equivalents forming a movable connection between the base and tip of the burner, operating as described, of the pawl-like rod or its equivalent, attached to the cup, and a rest for the said rod attached to the base of the burner, the whole operating as described, to shut off the gas from the tip by the temporary increase, and subsequent reduction of the pressure in the pipes."

No. 25,687. George S. Tiffany, of Palmyra, Mich, for an "Improvement in tile machines."

"I claim the extension of the flanged feeding shaft C, so as to form a revolving core C^{1}, operating substantially as herein shown and described."

No. 25,688. George W. Tolhurst, of Liverpool, Ohio, for an "Improvement in corn shellers."

"I claim the flexible hinged apron, in combination with the disk B and flange-wheel D, when the several parts are constructed and arranged for operation, in the manner described, for the purpose specified."

No. 25,689. Philip Ulmer, of New York, N.Y., for an "Improved spring bed bottom."

"I claim the method herein described, of connecting the spring b, or any equivalent means by which the same is secured in place by contact between compressing surfaces, substantially in the manner and for the purposes set forth."

No. 25,690. Rufus M. Varner, of Oxford, Miss., for an "Improvement in corn planters."

"I claim the arrangement of the table (r), delivering tube (h), furrow plow (j), feeding disc (g), hopper (f), all attached to the rear end of the tongue and placed between and subject to the action of the straps and the springs, as here described, and in connection therewith. I claim the combination of the spaces (p) of the hoppers side, with the india-rubber strip, the beveled edge of the hoppers bottom and the gonged holes of the feeding disc, as and for the purposes set forth."

No. 25,691. JOHN WAGNER, of Philadelphia, Pa., for an "Improvement in machines for hoisting ice."

"I claim, 1st, the combination of the slides, carriages, supporters and projections on the chutes, arranged and operating in the manner and for the purpose herein before specified. 2nd, the antifriction rollers y, y, y^1, &c. in connection with the slides, arranged and operating as herein-before specified. 3rd, the counterbalancing rope or chain and rollers K and K^1, in combination with the pulley R, and the slides S and S^1, operating in the manner and for the purpose as herein-before specified."

No. 25,692. KASIMER VOGEL, of Chelsea, Mass., for an "Improvement in sewing machines."

"I claim, first, the employment, in combination with two or more needles a, b, or their equivalents, which work together to perforate or pass from one side to the other of the cloth, or other material to be operated upon, and with suitable means of carrying a locking thread through the loops of the threads of those needles, of a thread conductor Y, so applied and operated, as to effect the interlacing of the threads of said needles on the opposite side of the material to that on which they are interlaced with the locking thread, substantially as described, whereby they are made to produce the different kinds of stitching represented in Figures 10, 11 and 12. Second, the employment of a movable needle plate K, containing two or more needle holes of different size, form, or arrangement, applied to the bed plate, or work plate of a sewing machine, in such a manner as to be capable of adjustment to bring either of its holes into position, for the proper needles to work in it, substantially as herein described."

No. 25,693. HENRY PRITCHARD, of Brooklyn, N. Y., for an "Improvement in guide rings for fishing rods."

"I claim the combination of the fixed ferrule f, and the the movable thimble (c), with its eye (d), constructed substantially as described for the porpose set forth."

No. 25,694. JOHN I. VINTON and EDWD. JOHN, of Ironton, O., for an "Improvement in furnaces."

"We claim the employment of reverberatory furnaces of the water, as herein described, when constructed and fitted in place, in the manner set forth."

No. 25,695. CHAPMAN WARNER, of New York, N.Y., for an "Improved clothes clamp."

"I claim the mode of securing between the buttons A and C the garment, or whatever else may be placed between them, by means of binding or wedging effect of the pin B, in the hole of button C, with the spiral spring D, as and for the purpose specified."

No. 25,696. A. L. WHIPPLE, of Elmira, N. Y., for an "Improvement in machines for trimming wall paper."

"I claim the manner of constructing the spool, with fixed rotating head D, and yielding head C, in combination with the movable bed B, for holding the roll firmly in the proper relative position to the knives, substantially as herein described."

No. 25,697. DAVID ZUG, of Shaefferstown, Pa., for an "Improvement in harvesters."

"I claim the combination of the brace V, with the gum elastic stuffing box P, and the supporting bar Y, when these several parts are constructed and arranged in the manner described, for the purpose specified."

No. 25,698. WM. BINKLEY, of Manchester, N. H., assignor to Saml. N. Bell, of same place, for an "Improvement in knitting machines."

"I claim the hollow cone Q, cut off elliptically, and with the parallel elliptical cam R, on its inner surface, together with the projection P on the lower side, supported by the shaft O, passing through the hollow shaft s, and attached to the arm Q, of the standard No. 3, or their equivalent, substantially as described, for the purposes set forth."

No. 25,699. WALDREN BEACH, of Baltimore, Md., assignor to himself and John L. Reese, jr., of same place, for an "Improvement in corn harvesters."

"I claim the vertically adjustable cutting apparatus C, in combination with rests R, R^1, lever L, jointed arms A, and spring f, operating substantially as and for the purposes set forth."

No. 25,700. A. D. BROWN, of Columbus, Geo., as signor to Sallie C. Brown, of same place, for an "Improvement in straw cutters."

"I claim the arrangement and combination of the yielding strips (a), constituting guard R, with the wheels D, sash L, and trough B, as and for the purpose herein shown and described."

No. 25,701. JAMES DRAPER, of New York, N. Y., assignor to himself and Saml. H. Dougherty, of same place, for an "Improvement in skeleton skirts."

"I claim the new manufacture of skeleton skirt herein described, in which the hoops B are secured by glue, or equivalent cement, between separately woven parts of the tapes, in contra-distinction to the stitched or clasped skirt, when the parts are woven together, as single tapes between the hoops, and separately, as distinct tapes, at the points where the hoops are received."

No. 25,702. NATHAN C. LEWIS, jr., of Boston, Mass., assignor to himself and Edwin Brace, of same place, for "Improvements in construction of dentist's chairs."

"I claim the combination of the adjustable body rest with the chair. I also claim the combination of the auxiliary, or elbow rest, and the body rest, applied to a chair. I also claim the mode of applying the body rest to the elbow rest, that is, by means of an adjustable arm c, applied and operating with respect to the elbow rest, as set forth."

No. 25,703. JAMES C. MILLER, of Irwin, O., and STILLMAN A. CLEMENS, of Rockford, Ill., and GILBERT H. CLEMENS, of Urbana, O., for an "Improvement in lining underground drains."

"We claim, first, the method of making covered field drains by lining the inside with hydraulic lime mortar or other suitable material. Second, a conducting tube connected with a coulter. Third, a forcing bar, with valve pistons attached, and working in a conducting tube. Fourth, a follower of less transverse dimensions than the mole to which it is attached, all substantially as described and for the specified purposes."

No. 25,704. JAMES MOLYNEUX, of Bordentown, N. J., assignor to the Bordentown Machine Company, for an "Improvement in rotary dredging machine."

"1, I claim the combination and arrangement of devices, substantially as set forth and described, for raising, lowering and holding the levers C, C, which support and carry the dredging wheel, as required. 2, I claim the rams on the dredging wheel for the purposes set forth, substantially as described. 3, I claim the chute hinged substantially as described, so that it may be raised when the bucket passes under it, and lowered to receive the contents of the bucket, substantially as described. 4, and, in combination with a hinged chute, I claim the arm e on the wheel B just before the bucket, for the purpose of raising the chute, and allowing the bucket to pass under it. 5, I claim a chute, arranged to traverse on ways, so as that it may be adjusted to the dredging wheel. 6, I claim the levers M, and links M^1, arranged to operate substantially as described, for the purpose of traversing the chute, as described for the purposes set forth. 7, I claim the traversing bars P, P, armed with picks, or chisels, and arranged to operate on the bottom of the river, in advance of the dredging wheel, substantially as described. 8, I claim the shaft and wipers, in combination with the traversing bars, carrying picks, chisels, &c., for the purposes specified, substantially as described."

No. 25,705. JOHN SLOAN, of Pittsburgh, Pa., assignor to himself and Eberhard H. Dierker, of same place, for an "Improvement in the construction of distilling apparatus."

"I claim, first, the combination and arrangement of the condensing worm or pipe (F), the wheels (h, i, and j), the receiving chamber (x), with the governor (g), and valve (o), for the purpose of regulating the quantity of steam in the heating pipe (d), as herein described, and for the purpose set forth. Second, the combination and arrangement of the chambers (A, B, C, and D), with the conducting pipes (e), when used in connection with the condensing worm or pipe (F), as herein described, and for the purpose set forth."

No. 25,706. ADOLPH STEMPEL, of Newark, N. J., assignor to himself and Owen McFarland, of same place, for an "Improved trace trimmer."

"I claim, first, the arrangement and combination of the vertically sliding spring bar C, laterally adjustable bed pieces D, D^1, and suspended curved cutters F, substantially as and for the purpose described. Second, in combination with the bed pieces D, D^1, and cutters F, I claim the adjustable jaws E, or their equivalents, arranged substantinlly as and for the purpose specified."

No. 25,707. DAVID L. STILES, of Rochester, N. Y., assignor to John M. French and Co., of same place, for an "Improvement in moulding stove covers."

"I claim the employment of the coniform plugs *d*, *d*, and pivoted thumb levers *f*, *f*, in combination with that portion of the pattern which forms the recess of the cover, substantially in the manner and for the purposes herein specified."

No. 25,708. WM. F. STEWART, of Patuxent Forge, Md., for an "Improvement in railroad car brakes."

"I claim the combination of the various parts of the apparatus herein described, when so constructed and arranged in relation to the means by which they are actuated, as to apply and release the brakes upon the whole train upon sections, or upon single cars, by the engineer, or by one or more of the brakemen, or by all or part of them, collectively or individually, the brake apparatus of each car or of each section being complete in itself, when the cars are uncoupled or the train divided into sections."

RE-ISSUE.

JAMES M. CLARK, of Philadelphia, Pa., for an "Improvement in flour bolts."—Patented 26th July, 1859.—Re-issued 4th October, 1859.

"1, what I claim is, the slide valves *d*, so arranged and operating with the apertures *e*, e^1, in the sides of the bolting chest, that either of these apertures can be opened or closed, or both closed when required for the purpose of turning the material as desired in either of three directions, as set forth. 2, I claim in combination with these valves the concave M, and scrapers d^1 upon the bolt, all arranged and operating as herein set forth."

DESIGNS.

E. J. CRIDGE, of Troy, N. Y., for a "Design for a box stove."

"I claim the ornamental design and configuration of stove plates, such as herein described and shown in the annexed drawings."

JAS. S. MCCURDY, of Brooklyn, N. Y., assignor to J. M. Myers, of New York City, for a "Design for the arms of sewing machines."

"I claim the ornamental design of the shape or configuration of the sewing machine arm, as represented."

GARRETTSON SMITH and H. BROWN, of Philadelphia, Pa., assignor to Hayward, Bartlett, and Co., of Baltimore, Md., for a "Design for stoves."

"We claim the design, configuration, and arrangement of the several ornaments in bas-relief, as herein described and set forth in the drawing as the design for stove patapsco cook."

ADDITIONAL IMPROVEMENTS.

ALEX. WM. and JAMES CAMPBELL, of Harrison, Ohio, for an "Improvement in corn planters."—Patented 28th June, 1859.—Additional Improvement, dated 4th October, 1859.

"We claim, 1st, the described arrangement of the weighted valve V, rod *v*, tappet *x*, wheel K, *k*, slides H, and tube D, for the purpose set forth. 2nd, in the described combination with a cam wheel K, *k*, crank shaft M, rod O, and rocking lever J, *j*, we claim the inverted arch yoke Y, *y*, constructed and operating as set forth."

WM. R. MUSSER and J. COLEMAN, of Lynchburg, Va., for an "Improvement in tobacco presses."—Patented 2nd February, 1858.—Additional Improvement, dated 4th October, 1859.

"We claim, 1st, the 'top plate' of the press, marked in two drawings as A and No. 5 A, in connection with the 'bottom plate' of said press, marked in drawings as *c*, used for retaining pressure, and forming the 'bed' of the 'main truck,' constructed as described. 2d, the 'groove nuts,' for raising and lowering the 'top plate' of the press without taking it from the 'bars,' as described."

EXTENSION.

WM. TRAPP, jr., of Dryden, N. Y., for "Improvements in barrel machinery."—Re-issued 1st October, 1845.—Re-issued 10th March, 1849.

"I claim, 1st, the combination of the slide rest *k*, guided in the manner set forth, with the tool L, for turning off the cask, constructed and arranged in the manner set forth. 2nd, I also claim the apparatus for chamfering, and howelling, and crozing, that is to say, the combination of the cylinder E, open at both ends, so that both ends of the cask can be worked off without changing; with the ring chucks O, for fastening the cask into the cylinder, and with the the tools as herein described, for chamfering and howelling. 3rd, I also claim the crozing tool V, with the changeable face plate *w*, as herein set forth. 4th, I likewise claim the combination of the stock *l*, cutter l^1, adjustable and gauge plate l^2, constituting the tool for turning and smoothing the outside of the cask, as above described and represented in Fig. 4. 5th, I likewise claim the peculiar construction of the tool for howelling the cask, as above described and represented at Fig. 9. 6th, I likewise claim the peculiar construction of the tool for chamfering the ends of the cask, as above described and represented in Figure 8. 7th, I likewise claim the mode of edging and jointing bilge staves for making barrels and other bilge work by the employment of a swing frame having a concave or convex bed, in or against which the stave is sprung and secured to the required bilge, in combination with the revolving edging saw and reciprocating straight jointer or either, whether the said swing frame for confining the stave in its bent position, and converging it to the edging saw and straight jointer, be constructed, arranged, and operated in the manner herein set forth, or in any other mode or manner that may be substantially the same, and by which analogous results shall be produced."

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l*. 3*s*. 11½*d*.

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l*. 18*s*. 6½*d*.

The Indexes, separately, price 3*s*.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s*.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).

The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent. No.* 602, *dated* 16*th March* 1744.) Price

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 606. TUESDAY, OCTOBER 25, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1414. WILLIAM DONBAVAND, of the city of Manchester, in the county of Lancaster, Scale-beam and Weighing Machine Manufacturer, and DAVID CRICHTON, of the same place, Machinist, have given notice at the office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "Improvements in looms for weaving."

As set forth in their petition, recorded in the said office on the 11*th day of June*, 1859.

1424. And OLIVER MAGGS, of Bourton, in the county of Dorset, has given the like notice in respect of the invention of "Improvements in washing machines."

1426. And CONSTANTINE NICOLAUS KOTTULA, of Liverpool, in the county of Lancaster, Soap Manufacturer, has given the like notice in respect of the invention of "A means of cleansing or purifying the 'Thames.'"

As set forth in their respective petitions, both recorded in the said office on the 13*th day of June*, 1859.

1433. And JOHN COWAN, of the firm of L. Cowan and Sons, of Barnes, in the county of Surrey, Soap Manufacturers, has given the like notice in respect of the invention of "An improved soap."

As set forth in his petition, recorded in the said office on the 14*th day of June*, 1859.

1452. And HENRY FRANCIS SMITH, of No. 4, Dale Street, in the city of Manchester, Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of driving straps or bands."

As set forth in his petition, recorded in the said office on the 16*th day of June*, 1859.

1457. And THOMAS ORRELL, junior, of Mill Hill, Bolton-le-Moors, in the county of Lancaster, Cotton Spinner, has given the like notice in respect of the invention of "Certain improvements in mules for spinning."

1459. And EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., has given the like notice in respect of the invention of "Improvements in treating and decomposing fatty substances."—A communication from abroad by Charles Leroy and Joseph Jean Marie Durand, both residing at No. 25, Route de Fontainebleau, at Chantilly, near Paris, in the empire of France.

1465. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improved means for assorting substances of different specific gravities."—A communication from abroad by Désiré Marchal, of Brussels.

As set forth in their respective petitions, all recorded in the said office on the 17*th day of June*, 1859.

1468. And JAMES COX, of Wenlock Road, City Road, in the county of Middlesex, Printing Press Manufacturer and Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for cutting rags for paper makers."

1469. And ALFRED JEFFERY, of the Commercial Road, in the parish of Limehouse, in the county of Middlesex, Manufacturer, has given the like notice in respect of the invention of "An improved mode of giving rotary motion to projectiles fired from rifled fire-arms."

1471. And RICHARD HARPER, Lace Maker, and ROBERT STOKES, Lace Maker, and THOMAS WALKER, Clock Maker, each of Derby, in the county of Derby, have given the like notice in respect of the invention of "An improvement in the manufacture of chenille bonnet wreaths and bonnet feathers."

1473. And GEORGE JUBILEE PARKER, of Church Street, Stoke Newington, in the county of Middlesex, Carpenter, has given the like notice in respect of the invention of "A self-acting apparatus for giving alarm of fire, which is also useful in checking the same."

1475. And PAUL FRANÇOIS AERTS, formerly of Brussels, in the kingdom of Belgium, but now residing in London, England, Civil Engineer, has given the like notice in respect of the invention of "Improved apparatus for lubricating railway rolling stock, and the moving parts of machinery."

As set forth in their respective petitions, all recorded in the said office on the 18th day of June, 1859.

1481. And CHARLES LOUIS JOSEPH DIERICKX, Director of the Paris Mint, of the Hôtel des Monnaies, in the city of Paris, has given the like notice in respect of the invention of "Improvements in coining,"

1485. And WILLIAM ROWAN, of the firm of John Rowan and Sons, Engineers, of Belfast, in the county of Antrim, has given the like notice in respect of the invention of "Improvements in the generation of steam."

As set forth in their respective petitions, both recorded in the said office on the 20th day of June, 1859.

1496. And EBENEZER OLIVER, of King William Street, in the city of London, has given the like notice in respect of the invention of "Improved medicinal mixtures for the cure of rheumatism, tic-doloreux, lumbago, cramp, sciatica, and such like complaints."

As set forth in his petition, recorded in the said office on the 21st day of June, 1859.

1506. And JAMES APPERLY, Cloth Manufacturer, and WILLIAM CLISSOLD, Engineer, both of Dudbridge, in the county of Gloucester, have given the like notice in respect of the invention of "Improvements in the manufacture of wheels for carriages and engines."

As set forth in their petition, recorded in the said office on the 22nd day of June, 1859.

1507. And MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, No. 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "Improvements in machinery for the manufacture of bolts and rivets."—A communication from I. L. Vergniais, residing in Paris.

As set forth in his petition, recorded in the said office on the 23rd day of June, 1859.

1532. And ROBERT DICK, of the city of Toronto, in the county of York, and province of Canada, has given the like notice in respect of the invention of "Keeping accounts current in printed form, for addressing cards, circulars, papers, and periodicals of all kinds, with great rapidity, by the aid of a very simple machine, which is a constituent part of this invention."

As set forth in his petition, recorded in the said office on the 27th day of June, 1859.

1539. And WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improvement in variable cut-off gear for producing expansion in steam and other motive engines."—A communication from abroad by Ambrose Foster, Noah Sutton, and James Stephens, all of New York.

As set forth in his petition, recorded in the said office on the 28th day of June, 1859.

1559. And THOMAS BELL, of Plaistow, in the county of Essex, has given the like notice in respect of the invention of "Improvements in the manufacture of manure."

As set forth in his petition, recorded in the said office on the 30th day of June, 1859.

1573. And SAMUEL FISHER, of Birmingham, in the county of Warwick, Manufacturer, has given the like notice in respect of the invention of "Improvements in ordnance and projectiles."

As set forth in his petition, recorded in the said office on the 1st day of July, 1859.

1604. And CHARLES HAGAN, Clerk of Works, Tower of London, has given the like notice in respect of the invention of "Improvements in apparatus for curing smoky chimneys and preventing down draught."

As set forth in his petition, recorded in the said office on the 6th day of July, 1859.

1652. And JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Improvements in railway car seats and arm chairs."—A communication from abroad by Bernard Joachim La Mothe, No. 10, Rue Mogador, Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 12th day of July, 1859.

2103. And HENRY WINTER, of Albion Place, Hackney, in the county of Middlesex, has given the like notice in respect of the invention of "A machine or apparatus for lifting and weighing loaded sacks and also merchandize."

As set forth in his petition, recorded in the said office on the 15th day of September, 1859.

2122. And THOMAS ELLIOTT, of Manchester, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Improvements in lubricators especially applicable to steam engines."

As set forth in his petition, recorded in the said office on the 17th day of September, 1859.

2133. And RICHARD ARCHIBALD BROOMAN, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in elevators or lifts for hotels, warehouses, and other structures."—A communication from abroad by Otis Tufts, of Boston, United States.

As set forth in his petition, recorded in the said office on the 19th day of September, 1859.

2170. And THOMAS BARNABAS DAFT, of Tottenham, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in coating metal conductors suitable for electric telegraphs."

2172. And JOHN TODD, of Kent Iron Works, Greenwich, in the county of Kent, Engineer, has given the like notice in respect of the invention of "Improvements applicable to screw propellers in the propulsion of vessels."

As set forth in their respective petitions, both recorded in the said office on the 24th day of September, 1859.

2190. And WILLIAM COLLINS, of Salford, in the parish of Manchester and county of Lancaster, Engineer and Brass Founder, has given the like notice in respect of the invention of "Improvements in stand pipes for hydrants."

As set forth in his petition, recorded in the said office on the 28th day of September, 1859.

2202. And CHARLES STEVENS, of No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, has given the like notice in respect of the invention of "An improved steam dredging boat."—A communication from aboad by Yollet Babin and Gâche Ainé, of Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 29th day of September, 1859.

2217. And BENJAMIN ATKINSON, of Rainham, in the county of Essex, has given the like notice in respect of the invention of "Improvements in railway brakes."

As set forth in his petition, recorded in the said office on the 30th day of September, 1859.

2267. And JOHN MACINTOSH, of North Bank, Regent's Park, has given the like notice in respect of the invention of "Improvements in the manufacture of flexible tubes."

2269. And JOHN MACINTOSH, of North Bank, Regent's Park, has given the like notice in respect of the invention of "Improvements in coating metallic conductors for electric telegraphs."

As set forth in his respective petitions, both recorded in the said office on the 5th day of October, 1859.

2277. And WALTER MACFARLANE, of Glasgow, in the county of Lanark, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for drawing off or discharging liquids, and in fountains, baths, and similar receptacles for liquids."

2283. And WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the construction and manufacture of casks, barrels, and such like vessels, and in the machinery or apparatus to be employed for such manufacture."—A communication from abroad by Jean De Lihatcheff, of Yaroslawl, in the empire of Russia.

As set forth in their respective petitions, both recorded in the said office on the 6th day of October, 1859.

2331. And THOMAS TWELLS, of the town and county of the town of Nottingham, Mechanist, has given the like notice in respect of the invention of "Improvements in machinery and apparatus connected therewith for embroidering or ornamenting woven, looped, or lace fabrics."

As set forth in his petition, recorded in the said office on the 12th day of October, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patent on which the Stamp Duty of £50 has been Paid.

(*To 21st October*, 1859.)

2480. GODFREY ERMEN, of Manchester, in the county of Lancaster, Cotton Spinner and Manufacturer, for an invention of "Certain improvements in machinery or apparatus for the finishing and treatment of yarns or threads."—Dated 22nd October, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 21st October*, 1859.)

655. ROBERT BOOTY COUSENS, of 50, Halliford Street, in the county of Middlesex, for an invention of "Improvements in machinery for cutting cork."—Dated 5th November, 1852.

Notices of Applications for Prolongation.

In the matter of Letters Patent for England, granted to JOHN DEARMAN DUNNICLIFF, of Nottingham, Lace Manufacturer, and WILLIAM BULL DEXTER, of the same place, Lace Maker, for "Improvements in the manufacture of warp fabrics," bearing date, at Westminster, the 24th day of December, 1845.

Notice is hereby given, that under and in pursuance of an Act made and passed in the 5th and 6th years of the reign of His late Majesty King William the 4th, intituled "An Act to amend the law touching Letters Patent for inventions;" of an Act made and passed in the 7th and 8th years of the reign of Her present Majesty Queen Victoria, intituled "An

Act for amending an Act passed in the 4th year of the reign of His late Majesty, intituled 'An Act for the better administration of justice in His Majesty's Privy Council, and to extend its jurisdiction and powers,' and of the 'Patent Law Amendment Act, 1852,'" THOMAS BALL, WILLIAM BALL, and JOHN WILKINS, all of Nottingham, Lace Makers, intend to petition Her Majesty in Council, praying Her Majesty to grant unto them a prolongation of the term of sole using and vending the invention for which the said Letters Patent were so granted as aforesaid: And notice is hereby further given, that an application will be made on the 22nd day of November, 1859, or so soon after as their Lordships shall be sitting and counsel can be heard, to the Right Honourable the Lords of the Judicial Committee of the Privy Council, to fix an early day for the hearing of the matters contained in the said petition; and all persons desirous of being heard in opposition to the prayer of such petition, are, on or before the said 22nd day of November, 1859, to enter a caveat at the Privy Council Office.

WATKINS, HOOPER, BAYLIS, and BAKER,
11, Sackville Street, London,
Solicitors for the Petitioners.

Notice is hereby given, that RALPH RADCLIFFE WHITEHEAD, JAMES HEYWOOD WHITEHEAD, and JOHN DICKEN WHITEHEAD, of Royal George Mills, Saddleworth, in the county of York, Manufacturers, intend to apply by petition under the statutes 5th and 6th William the Fourth, cap. 83; 2nd and 3rd Vict. cap. 67; 7th and 8th Vict. cap. 69; and of the Patent Law Amendment Act, 1852; and 16th and 17th Vict. cap. 117, to Her Majesty in Council, for a prolongation of the terms of sole using and vending the invention of "Improvements in the manufacture of epithems used for medical and surgical purposes," for which Her Majesty's Royal Letters Patent were severally granted to Alfred Markwick, respectively bearing date at Westminster, on the 20th day of May, in the ninth year of the reign of Her Majesty Queen Victoria, and in the year of our Lord 1846, and at Edinburgh, on the 27th day of October, in the ninth year of the reign of Her said Majesty Queen Victoria, and in the year of our Lord 1846, which said several Letters Patent have been assigned to and are now vested in the said intended petitioners: And notice is hereby further given, that the said Ralph Radcliffe Whitehead, James Heywood Whitehead, and John Dicken Whitehead, intend to apply by counsel to the Judicial Committee of the Privy Council, on Monday the 28th day of November now next, or if the Judicial Committee shall not sit on that day at the then next sitting of the said Judicial Committee for a time to be fixed for hearing the matter of the said petition, and that on or before the said 28th day of November next notice must be given of any opposition intended to be made to the said petition; and any person intending to oppose the said application, must lodge notice to that effect at the Council Office, on or before that day.—Dated 21st October, 1859.

W. and H. P. SHARP,
150, Leadenhall Street, in the city of London, Solicitors for the above-named Ralph Radcliffe Whitehead, James Heywood Whitehead, and John Dicken Whitehead.

Notice of Application for Leave to enter a Memorandum of Alteration.

In the matter of Letters Patents granted to ARTHUR PAGET, of Loughborough, in the county of Leicester, Manufacturer, for "Improvements in machinery or apparatus for the manufacture of looped fabrics, and in the manner of constructing the same."—Dated 2nd April, 1859.

Notice is hereby given, that the said ARTHUR PAGET has applied by petition to the Commissioners of Patents, according to the statute in that case made and provided, for leave to enter a memorandum of alteration of certain parts of the specification of the said Letters Patent.—Dated 12th October, 1859.

HUGHES and BLOODWORTH,
No. 17, Cross Street, Manchester.

HUGHES and SON,
No. 123, Chancery Lane, London,
Agents for the Petitioner.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of *2l. 3s. 11½d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of *9l. 18s. 6½d.*

The Indexes, separately, price *3s.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price *21s.*

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

List of Specifications, &c. published during the week ending 21st October, 1859.

No.	Price.	Subject-Matter.
650	10*d.*	Looms for weaving.
651	8*d.*	Steam vessels, &c.
653	10*d.*	Apparatus for regulating electric lamps or lights.
654	6*d.*	Hats, caps, &c.
655	10*d.*	Rolling iron and steel for railway wheels, &c.
656	1*s.* 4*d.*	Manufacture of refined sugar, potash, and soda.
657	11*d.*	Weaving.
659	3*d.*	Sails and propellers.
660	7*d.*	Locks and latches.
662	10*d.*	Breech-loading ordnance, &c.
664	9*d.*	Machinery for the manufacture of screws.
665	6*d.*	Railway crossings.
666	5*d.*	Apparatus for delineating views.
667	6*d.*	Carpet sweeper.
668	7*d.*	Manufacture of fabrics containing compounds of india rubber.
670	7*d.*	Manufacture of crank axles.
671	1*s.* 4*d.*	Blocking or securing ships for repair.
672	6*d.*	Lamps.
673	7*d.*	Machinery for ginning and cleaning cotton, &c.
674	3*d.*	Machinery for folding and stitching sheets of paper.
675	3*d.*	Machinery for crushing sugar canes, &c.
676	3*d.*	Obtaining new alimentary substances from barley.
677	3*d.*	Steering apparatus.
678	6*d.*	Counteracting damp in buildings.
679	6*d.*	Machinery for brewing.
680	6*d.*	Manufacture of glass bottles.
681	3*d.*	Manufacture of iron.
683	3*d.*	Smoke-consuming furnaces or fire-places.
684	6*d.*	Looms for weaving.
685	3*d.*	Igniting explosive projectiles.
686	3*d.*	Supports for flowers or trees.
687	3*d.*	Electric telegraphs.
688	3*d.*	Apparatus for obtaining aërated fresh water from salt water.
689	3*d.*	Penholder.
691	4*d.*	Manufacture of cast steel.
692	10*d.*	Mills.
693	5*d.*	Corn and seed drills.
695	3*d.*	Petticoats.
696	7*d.*	Metal bars for window sashes, &c.
697	3*d.*	Casting steel.
698	3*d.*	Manufacture of carton or pasteboard for roofing, sheathing, &c.
699	3*d.*	Musical instrument.
700	5*d.*	Apparatus for the destruction of flies, &c.
701	3*d.*	Manufacture of paper or cardboard.
702	1*s.* 9*d.*	Steam-engines, boilers, &c.
703	4*d.*	Manufacture of cast steel.
704	3*d.*	Stiffening or sizing fabrics.
705	7*d.*	Propelling vessels.
706	6*d.*	Chain harrow.
707	6*d.*	Increasing the strength of metals and other materials.
708	3*d.*	Apparatus for the manufacture of sugar.
711	3*d.*	Destruction of insects and vermin.
712	6*d.*	Packing for pistons.
713	3*d.*	Manufacture of various articles from talc, &c.
714	3*d.*	Opening and securing window sashes.
715	3*d.*	Currying leather.
716	3*d.*	Compound for insulating electric conductors.
717	9*d.*	Fire-proof safes.
718	3*d.*	Veils.
719	1*s.* 3*d.*	Musical instruments.
720	3*d.*	Metallic pens.
721	9*d.*	Apparatus for stretching and polishing silk thread.
722	1*s.* 3*d.*	Machinery for coating metal, wood, &c., with paint, &c.
723	3*d.*	Fastening and securing treasure or bullion cases.
724	7*d.*	Springs for railroad cars, &c.
725	11*d.*	Breech-loading fire-arms.
729	10*d.*	Straightening and separating the fibres of silk waste.
730	3*d.*	Manufacture of textile fabrics.
731	8*d.*	Fire-arms, ordnance, projectiles, &c.
732	9*d.*	Apparatus for indicating the speed of ships and other vessels.
734	4*d.*	Tents.
735	6*d.*	Pipes or tubes for generating and superheating steam.
736	6*d.*	Apparatus for propelling vessels.
737	3*d.*	Candles.
738	10*d.*	Propelling vessels.
742	7*d.*	Gas regulator.
743	3*d.*	Ploughs.
744	6*d.*	Machinery for the manufacture of sheet tin.
746	9*d.*	Machinery for cutting splints for matches.
749	3*d.*	Candle burner.
751	3*d.*	Manufacture of elastic fabrics.
752	3*d.*	Preparation of thin strips or sheets of steel.
756	6*d.*	Chronometers, watches, &c.
757	7*d.*	Fire-arms.
758	7*d.*	Ovens for baking bread, &c.
760	3*d.*	Unhairing hides and skins.
764	3*d.*	Preservation of eggs.
765	7*d.*	Machinery for grinding saws and flat plates of steel.
769	3*d.*	Glass weights.
770	3*d.*	Preparation of colouring matter for dyeing and printing.
778	10*d.*	Machinery for disintegrating artificial manures, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE ALPHABETICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE CHRONOLOGICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 22nd October, 1859.

Mornings - - - -	1026
Evenings - - - -	1627
Total - - -	2653

Since the opening of the Museum Free Daily (May 12, 1858,)—155,221.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*

The following are in the press:—

ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS.
PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

(*Registered for transmission abroad.*)

No. 607. FRIDAY, OCTOBER 28, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1968. To ROBERT BESLEY, of Fann Street, Aldersgate Street, in the city of London, Type Founder, for the invention of "Improvements in machinery for printing and for numbering and perforating documents."—A communication from abroad by William Shaw, of Melbourne, in the colony of Victoria, Australia.

On his petition, recorded in the Office of the Commissioners on the 29th day of August, 1859.

2084. To WILLIAM BRIDGES ADAMS, of No. 1, Adam Street, Adelphi, in the county of Middlesex, Engineer, for the invention of "Improvements in the permanent way of railways."

On his petition, recorded in the Office of the Commissioners on the 13th day of September, 1859.

2146. To GEORGE KENNEDY GEYELIN, Civil Engineer, of 462, Oxford Street, in the county of Middlesex, for the invention of "Improvements in machinery for making solid, hollow, and perforated bricks, also tiles, drain and socket pipes."

2150. And to GEORGE DANNETT ROBINSON, 15, Church Street, Islington, London, for the invention of "Improvements in apparatus for regulating the pressure of gas and other fluids."

On both their petitions, recorded in the Office of the Commissioners on the 21st day of September, 1859.

2176. To RICHARD KAY, of Busby, in the county of Renfrew, North Britain, Bleacher, for the invention of "Improvements in preparing and bleaching textile fabrics and materials, and in the machinery or apparatus employed therein."

On his petition, recorded in the Office of the Commissioners on the 26th day of September, 1859.

2196. To JOHN FORDHAM STANFORD, of No. 7, Denbigh Place, Pimlico, in the parish of Saint George, Hanover Square, in the county of Middlesex, Architect, for the invention of "An improved apparatus for giving warmth to the lower extremities and members of invalids and others when travelling, or in churches, chapels, theatres, rooms, carriages, and other similar places, and on ship-board, and also for airing carriages.

On his petition, recorded in the Office of the Commissioners on the 28th day of September, 1859.

2204. To THOMAS ALLAN, of Adelphi Terrace, in the city of Westminster, Civil Engineer, for the invention of "Improvements in applying electricity for telegraphic purposes, and in apparatus employed therein."

On his petition, recorded in the Office of the Commissioners on the 29th day of September, 1859.

2214. To EDWARD SONNEBORN, of Lüdge, in Westphalia, kingdom of Prussia, and now residing at 39, Finsbury Square, London, for the invention of "An improvement in the manufacture of cement."

On his petition, recorded in the Office of the Commissioners on the 30th day of September, 1859.

2230. To JOHN BAUGHAN, of Pimlico, in the county of Middlesex, for the invention of "Improvements in the manufacture of soap."

On his petition, recorded in the office of the Commissioners on the 1st day of October, 1859.

2236. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in treating clay, and in the manufacture of bricks, tiles, and other like articles, and in machinery employed therein."—A communication from abroad by Jean Marie Rabier, of Paris.

On his petition, recorded in the Office of the Commissioners on the 3rd day of October, 1859.

2252. To Frederic John Dove, of Studd Street, Islington, in the county of Middlesex, for the invention of "Iron clasped bonding plates for joists and other building purposes."

2256. To William George Sharp Mockford, of No. 67, Upper Thames Street, in the city of London, Merchant, for the invention of "Improvements in the manufacture of starch."

2260. To Thomas Henry Dodd, of Bessborough Place, Pimlico, Gun Maker, for the invention of "Improvements in portable apparatuses for the use of smiths, carpenters, and other workmen."

2262. To William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in blankets used for printing calicoes and other fabrics, and in the mode of washing or cleaning the same."—A communication from abroad by Seth W. Baker, of Providence Rhode Island, in the United States of America.

2264. To John Prichard, of No. 6, Whitehall, in the county of Middlesex, Esquire, for the invention of "Improvements in spurs."

2266. To James Webster, of Birmingham, in the county of Warwick, Engineer, for the invention of "An improved construction of spring for carriages and other purposes."

2268. To James Turpie, of North Shields, for the invention of "Improvements in the fore and aft gaff and boom sails of ships."

2270. And to George Long and James Archer, both of Landport, in the county of Hants, for the invention of "Improvements in the manufacture of manure."

On their several petitions, recorded in the office of the Commissioners on the 5th day of October, 1859.

2272. To John Peers Scott and Edward Scott, both of the city of Manchester, Agents, for the invention of "An improved instrument for boring and drilling."—A communication from abroad by Constantin Von Longinoff, of St. Petersburgh, in the empire of Russia.

2276. To Enoch Oldfield Tindall, of Scarborough, in the county of York, Engineer, for the invention of "Improvements in machinery or apparatus for crushing or reducing grain, seeds, and other substances."

2278. To Alexander Mackenzie Ferry, of Edinburgh, in the county of Midlothian, North Britain, Merchant, for the invention of "Improvements in the manufacture or production of oil, and in lamps for burning the same."

2280. To Andrew Hind, of No. 60, High Street, Poplar, and Julius Lowenthal, of No. 16, Little Tower Street, for the invention of "Improvements in the manufacture of pottery and china wares."—A communication from abroad by Gustav Gumpel, of No. 1, Stobenstrasse, Brunswick, Germany.

2282. To Robert Warry, of Brompton Barracks, in the county of Kent, Armourer Sergeant, 3rd Depôt Battalion, for the invention of "Improvements in breech-loading ordnance, and in projectiles for the same."

2284. And to George Gibson and James Gibson, of Southall, in the county of Middlesex, Surveyors, for the invention of "Improved machinery for raising and removing soil or earth from sewer and other excavations."

On their several petitions, recorded in the Office of the Commissioners on the 6th day of October, 1859.

2286. To William Brookes, of No. 73, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in securing the tyres of railway carriage and engine wheels." A communication from abroad by Robert Stothert Kirkpatrick, of Brussels, in the kingdom of Belgium, Civil Engineer.

On his petition, recorded in the Office of the Commissioners on the 7th day of October, 1859.

2290. To William Dawson, of Blackburn, in the county of Lancaster, Shuttle Maker, and Thomas Singleton, of Over Darwen, in the said county, Weaver, for the invention of "Improvements in apparatus applicable to looms for weaving."

2292. To John Henry Johnson, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the treatment of fatty matter."—A communication from abroad by Joseph Etienne Lhonoré, of Paris, in the empire of France, Manufacturer.

2294. To Patrick Robertson, of Sun Court, Cornhill, in the city of London, for the invention of "Improvements in preparing, boiling, and fermenting worts, and in maturing beer, spirits, and cyder."

2296. And to Henry Monument, of Myrtle Street, Dalston, and George Berry, of Buttesland Street, Shoreditch, for the invention of "Improvements in apparatus for raising and moving earth, and other matters and bodies."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of October, 1859.

2297. To John Spalding Parfitt, of No. 60, Boulevart de Strasbourg, Paris, Practical Engineer, for the invention of "A registering nautical velocimeter, for measuring the speed of ships, and also of currents of water."

2299. To Charles Albert Shaw, of Biddeford, in the state of Maine, in the United States of America, Broker, for the invention of "Improvements in machinery for shaping or bending tinned sheet iron, and other sheet metal."—A communication from abroad by William Burton, of Cazenovia, in the county of Madison, and state of New York, America.

2300. To Thomas Knowles and James Knowles, of the city of Manchester, in the county of Lancaster, Engineers, and Arthur Rigg, of the city of Chester, for the invention of "Improvements in machinery or apparatus for shaping, cutting, punching, and drilling metals, which improvements are also applicable to presses."

2301. To George White, of No. 34, Dowgate Hill, Cannon Street, in the city of London, for the invention of "Improvements in frames for spinning and twisting yarn of any description of textile materials."—A communication from abroad by Mr. Charles Leyherr, of Leval, France.

2303. To Samuel Brewster Parker, of Deptford, in the county of Kent, Manufacturer, for the invention of "A method of, and apparatus for, revivifying oxide of iron, and other agents, for purifying gas containing metallic particles."

2304. And to William Martin junior, of Dundee, Calenderer, for the invention of "An improved method of damping linen and other textile fabrics."

On their several petitions, recorded in the office of the Commissioners on the 10th day of October, 1859.

2305. To Louis Joseph Jeannin, of the town of Pontarlier, department of the Doubs, empire of France, a Mechanic, for the invention of "A new system of pumps."

2306. To Charles Frederick Beyer, of the firm of Messrs. Beyer, Peacock, and Company, of the Gorton Foundry, near the city of Manchester, Engineers, for the invention of "Improvements in machinery for boring and drilling."

2307. To Joseph Louis Tenting, ainé, of Paris, France, Engineer, for the invention of "Improvements in the construction of buffers for railway and other carriages, also applicable to other purposes where springs are employed."

2308. To Joseph Louis Tenting, ainé, of Paris, France, Engineer, for the invention of "Improvements in the construction of the axles of railway and other carriages."

2309. To John Earl, of Melbourne, in the county of Derby, Railway Contractor, for the invention of "Improvements in arranging and applying harness to the draft of carriages."

2310. To William Dickson Hart, of Edinburgh, in the county of Mid-Lothian, North Britain, Philosophical Instrument Maker, for the invention of "Improvements in pressure regulating apparatus for gas burners."

2311. To John Smith, of Oldham, in the county of Lancaster, Manufacturer, for the invention of "Improvements in breech-loading fire-arms and ordnance."

2312. To Patrick Gregson Cunningham, of Salisbury, Wilts, for the invention of "Improvements in the construction of artificial teeth and gums."

2313. To Andrew Whytock, of 12, Little Saint Andrew Street, Upper Saint Martin's Lane, in the county of Middlesex, for the invention of "Improvements in coating sheets of metal with other metals and other substances."

2314. To Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improved mode of clarifying and defecating saccharine solutions and juices."—A communication from abroad by Horatio Nelson Fryatt, of New York, in the United States of America.

2315. And to Franz Anton Lohage, of Unna, Westphalia, in the kingdom of Prussia, Chemist, for the invention of "An improved construction of water wheel."—A communication from abroad by Mr. Scharschmidt, of Arnsberg, in Westphalia aforesaid.

On their several petitions, recorded in the Office of the Commissioners on the 11th day of October, 1859.

2316. To Joseph Skertchly, of Ashby-de-la-Zouch, in the county of Leicester, Engineer, for the invention of "Improvements in the manufacture of mosaic and other ornamental tiles and slabs, and in apparatus connected therewith."

2317. To George Scott, Engineer, of No. 3, Priory Cottages, Peckham, in the county of Surry, for the invention of "Improvements in generating elastic fluids and in the apparatus for that purpose."

2318. To William Day, Builder, of Burton Latimer, near Wellingborough, in the county of Northampton, for the invention of "A direct-action rotary steam engine."

2319. To Alfred Augustus De Reginald Hely, of 2, Park Village West, Regent's Park, in the county of Middlesex, Gentleman, for the invention of "Certain improvements in the manufacture of tobacco for smoking purposes."

2320. To James Carrick, Hotel Proprietor, Glasgow, for the invention of "Improvements in commodes, water closets, and other sanitary appliances."

2321. To Zaccheus Nuttall, of Stockport, in the county of Chester, Weaver, for the invention of "Improvements in looms for weaving."

2322. To James Thomson, of Notting Hill, in the county of Middlesex, Gas Engineer, for the invention of "An improved form of hydraulic valve and apparatus to be used in the manufacture of gas."

2323. To Thomas Rothwell, of Manchester, in the county of Lancaster, Contractor, for the invention of "Improvements applicable to warehouses and other buildings in which 'well-holes' are constructed for the purposes of light and ventilation."

2324. To Edward Howorth Baron, Manager, and James Wheater, Mechanic, both of Lee Mill, near Bacup, and Lambert Tatley, Cotton Manufacturer, of Crawshaw Booth, all in the county of Lancaster, for the invention of "Certain improvements in carding engines for carding cotton, wool, or other fibrous materials."

2325. To James Tangye, of Birmingham, in the county of Warwick, Engineer, for the invention of "A new or improved method of actuating certain kinds of motive power engines, and in the distribution of motive power."

2326. To Edward Henry Taylor, of Rubicon Works, Saltney, in the city of Chester, Engineer, for the invention of "Improvements in apparatus applicable to the permanent-way of railways."

2327. To Charles Henry Southall, of Blackburn, in the county of Lancaster, Boot and Shoe Maker, for the invention of "An improved apparatus for making and finishing boots and shoes."

2328. To Charles Peters Moody, of Corton Denham, in the county of Somerset, Gentleman, for the invention of "A method of, and apparatus for, raising grass and other crops on to stacks,

which apparatus is also applicable to raising and transferring weights."

2329. To THOMAS BARNABAS DAFT, of Tottenham, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in flexible valves."

2330. To HENRY BRIGHT, of Sandwich Street, Burton Crescent, in the county of Middlesex, for the invention of "Improvements in machinery or apparatus for navigating the air."

2331. And to THOMAS TWELLS, of the town and county of the town of Nottingham, Machinist, for the invention of "Improvements in machinery and apparatus connected therewith for embroidering or ornamenting woven, looped, or lace fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 12th day of October, 1859.

2333. To JONATHAN RHONE, of Leman Street, Whitechapel, for the invention of "An indicating meter tap."

2335. To JAMES HUNTER, of Kilmahumaig, in the county of Argyll, North Britain, Farmer, for the invention of "Improvements in machinery or apparatus for ploughing or cultivating land."

2337. And to LOUIS HENRI ROUSSEAU, of 29, Boulevart St. Martin, Paris, in the empire of France, Mechanician, for the invention of "Improvements in steam engines."

On their several petitions, recorded in the Office of the Commissioners on the 13th day of October, 1859.

2341. To FREDERICK LEVICK, of Blaina Cwm Celyn and Coalbrook Vale Iron Works, in the county of Monmouth, Iron Master, for the invention of "An improvement or improvements in the manufacture of iron."

2345. To JAMES JACK, of Liverpool, in the county of Lancaster, Engineer, for the invention of "Certain improvements in steam engines and boilers for marine and land purposes.

2347. And to THOMAS ROBINSON, of St. Helen's, Lancashire, Iron Founder, for the invention of "Improvements in annealing or softening wire."

On their several petitions, recorded in the Office of the Commissioners on the 14th day of October, 1859.

2349. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improvement in the mode of applying india rubber, gutta percha, or other elastic substances to give elasticity between the tires or outer rims, and the hubs or naves of railway or other wheels, and between other metallic bodies."—A communication from abroad by Edward Crane, of Dorchester, Norfolk County, Massachusetts, in the United States of America.

2351. To FREDERICK ALLEN LEIGH, of the city of Manchester, in the county of Lancaster, Mechanical Engineer, for the invention of "Improvements in machinery or apparatus for the manufacture of screws, bolts, and nuts."—A communication from abroad by Richard Hartmann, of Chemintz, in the kingdom of Saxony.

2353. To RALPH BATES, of Castle Mills, Stalybridge, in the county of Lancaster, Cotton Spinner, for the invention of "Improvements in engines for carding cotton and other fibrous substances."—A communication from abroad by John Robinson, of New York, United States of America.

2355. To JOSEPH ECHARD, of Paris, France, Agricultural Implement Manufacturer, for the invention of "Improvements in machines and apparatus for ploughing and sowing."—A communication from Mr. Estlimbaum, a person resident Rue de Bondy, 54, at Paris.

2357. And to JOHN HARCOURT BROWN, of Abbey Mill House, Romsey, in the county of Hants, for the invention of "Improvements in the preparation of gunpowder for loading ordnance and fire arms."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of October, 1859.

2361. To GEORGE BERRY, of No. 19, Buttesland Street, in the county of Middlesex, Gentleman, for the invention of "Improvements in the construction of glass and earthenware vessels for containing fluids, particularly such vessels as are intended to contain fluids which may exert dynamic force on the stoppers of such vessels."

2363. To LUCIEN VIDIE, of Paris, France, Gentleman, for the invention of "Improvements in transmitting the motion of steam engines."

2365. To GEORGE WAIDE REYNOLDS, of Birmingham, in the county of Warwick, Manufacturer, and ENOCH DANCE, of Birmingham, aforesaid, Manager of Works, for the invention of "A new or improved manufacture of baskets and other articles usually made of wicker work, and new or improved machinery to be employed in the said manufacture."

2367. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in preserving and disinfecting organic substances."—A communication from abroad by Vincent Marie Féraud, Leonard Laureau, and Felix Richard, all of Paris, in the empire of France.

2369. To JULIAN BERNARD, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, for the invention of "Improvements in the manufacture or production of boots and shoes, and other coverings for the feet, and in the maahinery, apparatus, and means connected with such manufacture."

2371. To DAVID JONES, of Bassaleg, in the county of Monmouth, Civil Engineer, for the invention of "Improvements in self-acting breaks to be used on railways."

2373. And to WALTER HALL and ARTHUR WELLS, both of Erith, in the county of Kent, India Rubber Web Manufacturers, for the invention of "Improvements in the manufacture of ropes and cords."

On their several petitions, recorded in the Office of the Commissioners on the 17th day of October, 1859.

2375. To GERMAIN CANOUIL, of No. 93, Curtain Road, Shoreditch, in the county of Middlesex, Chemist, for the invention of "Cartridges's paper, chemically prepared for percussion fire arm."

2377. To JOSEPH REYNOLDS, of 21, Bull and Mouth Street, city of London, Engineer, for the invention of "Improvements in the manufacture

of wrought nails."—A communication from abroad by Henry Coggshall, of Providence, R. I., U. S. of America.

2379. To GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, for the invention of "Improvements in machinery for steering vessels."—A communication from abroad by Edward N. Dickerson, of Park Row, New York, United States of America.

2381. To CALEB HILL, of Cheddar, in the county of Somerset, Stay Manufacturer, for the invention of "An improved fastening for stays and other purposes."

2383. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improved method of making combs or gills employed in the preparation of fibrous substances." — A communication from abroad by Charles de Jongh, of Guebwiller, in the empire of France.

2385. And to AUGUSTE SCHEURER ROTT, of Thann, in the French empire, Manufacturer, for the invention of "The preparation of certain substances for fixing colors in dyeing and printing, and for other purposes."

On their several petitions, recorded in the Office of the Commissioners on the 18*th day of October*, 1859.

2387. To GEORGE WORSSAM, of No. 3, Oakeley Crescent, City Road, in the county of Middlesex, for the invention of "An improvement in non-condencing steam engines."

2389. To JOHN GORDON, Engineer, 3, Railway Place, Fenchurch Street, in the city of London, for the invention of "Improvements in machinery or apparatus for pulping coffee."

2391. To THOMAS SPENCER, of 192, Euston Road, Euston Square, in the county of Middlesex, Analytical and Consulting Chemist, for the invention of "Improvements in the manufacture of carbonate of soda."

2393. To CHARLES COWPER, of 20, Southampton Buildings, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in photographing on uneven surfaces, and in apparatus for that purpose."—A communication from abroad by John Henry Pein, of New York, in the United States of America.

2395. To JOHN JAMES BOWEN, of 136, Great Dover Street, Southwark, in the county of Surrey, Licensed Victuallers' Pot Manufacturer, for the invention of "Improvements in manufacturing the pots for containing liquids used by publicans and others."

2397. To WILLIAM WARNE, JAMES ARCHIBALD JAQUES, and JOHN AMERICUS FANSHAWE, of Tottenham, in the county of Middlesex, India Rubber Manufacturers, for the invention of "Improvements in the manufacture of elastic hoops or bands and other analogous elastic articles, applicable to various parts of ladies' and gentlemen's wearing apparel, and in the machinery employed in such manufacture."

2399. And to JOSEPH RANDALL PALMER, of Newport Cottage, Old Ford, Bow, in the county of Middlesex, for the invention of "Improvements in the manufacture of printing ink and paints and varnishes, and also in the manufacture of lacquers, japans, and blacking."

On their several petitions, recorded in the Office of the Commissioners on the 19*th day of October*, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

Notice is hereby given, that the petition of

2413. JOHN AVERY, of Essex Street, in the county of Middlesex, Patent Agent, praying for Letters Patent for the invention of "Improvements in rail-road weigh-locks and other platform scales,"—a communication from E. Sampson and Dennison S. Wheeler, of Troy, U.S.A.,—was deposited and recorded in the Office of the Commissioners on the 22nd day of October, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

27th October, 1859.

1053. GEORGE PEARSON, of Bugbrook, near Weedon, in the county of Northampton, Contractor, for an invention of "Improvements in apparatus for cutting and shaping trenails." — Dated 27th April, 1859.

1058. ROBERT JAMES LAING, of the Independent Gas Works, Haggerstone, in the county of Middlesex, Engineer, for an invention of "Improvements in wet gas meters." — Dated 27th April, 1859.

1061. THOMAS LACEY, of Grafton Street, in the city of Westminster, Gas Engineer, for an invention of "Improvements in gas regulators." — Dated 27th April, 1859.

1068. NICOLAS LIBOTTE, Mechanician, of 33, Boulevard St. Martin, Paris (empire of France), for an invention of "A steam brake for mines which may also be worked by hand."—Dated 28th April, 1859.

1069. NATHANIEL JOHN HOLMES, Gentleman, of Glasgow, county Lanark, Scotland, for an invention of "Improvements in electric telegraphs and apparatus connected therewith." — Dated 28th April, 1859.

1070. EUGÈNE LARDENOIS, of Brussels, in the kingdom of Belgium, Merchant, for an invention of "Improvements in the manufacture of pulp for paper, pasteboard, and other like articles."—A communication from Bonnet Frederic Brunel, residing in Brussels."—Dated 28th April, 1859.

1071. THOMAS CLARKE, of Hackney, in the county of Middlesex, Engineer, for an invention of "Im-

provements in sheaves or pulleys for paying out and hauling in ropes, chains, and cables, for communicating motion to machinery and for other useful purposes."—Dated 28th April, 1859.

1072. JOHN WHEAT, of Hinckley, in the county of Leicester, for an invention of "Certain improvements in drilling machines employed for agricultural purposes."—Dated 28th April, 1859.

1076. WILLIAM CORBETT, of Clayton, near Manchester, in the county of Lancaster, and WILLIAM CARMONT, of the same place, Iron and Steel Manufacturers, for an invention of "Certain improvements in the construction and arrangement of furnaces employed in the manufacture of iron and steel, and for other similar purposes."—Dated 29th April, 1859.

1077. JOHN WELLINGTON WELCH, of Manchester, in the county of Lancaster, Warp Sizer, for an invention of "Improvements in sizing or dressing yarns or threads for weaving."—Dated 29th April, 1859.

1081. THOMAS SMITH, of Bredfield, in the county of Suffolk, for an invention of "Improvements in cultivating implements."—Dated 29th April, 1859.

1082. WILLIAM WINSTANLEY and JOSEPH KELLY, of Liverpool, in the county of Lancaster, Hydraulic Engineers, for an invention of "Improvements in pumps and gearing, and appliances for working the same."—Dated 30th April, 1859.

1084. JOHN DARLINGTON, of No. 36, Cannon Street, in the city of London, county of Middlesex, Mining Engineer, for an invention of "Improvements in zinc retort furnaces."—Dated 30th April, 1859.

1085. EDWARD FRANCIS, of Wrexham, in the county of Denbigh, Grocer, for an invention of "Improved apparatus, applicable to the treatment of tea and other useful purposes."—Dated 30th April, 1859.

1087. WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "Improvements in ventilating or supplying air to diving bells and divers, and in holding communication therewith from above."—A communication from abroad by Francois Aquilas Laurent, of Paris. — Dated 30th April, 1859.

1091. JOSEPH SOUQUIÈRE (called EMILE), of 29, Boulevart St. Martin, Paris, in the empire of France, Civil Engineer, for an invention of "A new or improved process for distilling coal."—Dated 30th April, 1859.

1092. THOMAS HALL ARROWSMITH, of Bolton, in the county of Lancaster, Cotton Spinner, for an invention of "Improvements in carding engines."—Dated 2nd May, 1859.

1095. WILLIAM BAYLISS, of the firm of W. and M. Bayliss and Co., Flat and Chain Cable and Iron Hurdle and Fencing Manufacturers, of Monmore Green, Wolverhampton, in the county of Stafford, for an invention of "Improvements in the manufacture of iron hurdles and fencing."—Dated 2nd May, 1859.

1096. RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in and in connection with electro-magnetic engines."—A communication from abroad by Alexandre Paul Marie Darlu, of Paris.—Dated 2nd May, 1859.

1097 JOHN BASFORD, of the Brick Yard, Oundle, in the county of Northampton, for an invention of "An improvement in the apparatus used when expressing clay or brick earth through dies."—Dated 2nd May, 1859.

1101. WILLIAM GOSSAGE, of Widnes, in the county of Lancaster, Chemist, for an invention of "Improvements in the manufacture of caustic soda and carbonate of soda from certain alkaline liquors and salts."—Dated 2nd May, 1859.

1103. FREDERICK WILLIAM EMERSON, of 110, Fenchurch Street, in the city of London, for an invention of "Improvements in treating ores to obtain a new metallic substance, and its salts, and in the application of such matters, and also certain products of tungsten in dyeing, printing, and painting."—Dated 2nd May, 1859.

1106. THOMAS WILLIAM MILLER, of Her Majesty's Dockyard, in the parish of Portsea, in the county of Southampton, for an invention of "Improvements in apparatus for and mode of generating steam and economising fuel."—Dated 3rd May, 1859.

1107. WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "Improvements in obtaining or extracting quinine and the principal organic alkalies."—A communication from abroad by Lalonel de Sourdeval, 22, Rue Bergere, Paris. —Dated 3rd May, 1859.

1114. EDWARD WATKIN SCALE, of Merthyr Tydfil, in the county of Glamorgan, Gentleman, for an invention of "Improvements in railway signals." —Dated 3rd May, 1859.

1115. ROBERT MUSHET, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "An improvement in the manufacture of cast steel." —Dated 3rd May, 1859.

1116. WILLIAM HOLLAND KINGSTON, A. B., Trinity College, Dublin, and of Bandon, county of Cork, Ireland, for an invention of "Improved means of communication between the passengers and guards and guards and engine drivers of railway trains."—Dated 4th May, 1859.

1123. JOSEPH FELIX ALLENDER, of Brierley Hill, in the county of Stafford, Manager of Works, and DANIEL ROWLEY, of Brierley Hill aforesaid, Iron Roller, for an invention of "Improvements in shears for cutting boiler plates and sheets and for other like purposes."—Dated 5th May, 1859.

1140. SAMUEL WRIGHT, of Sudbury, in the county of Suffolk, Gas Engineer, for an invention of "An improved gas governor or regulator."—Dated 6th May, 1859.

1145. GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "Improvements in apparatus for grinding grain and other substances."—A communication from abroad by Pierre Etienne Brisson, of Orleans, France.—Dated 6th May, 1859.

1148. ADAM CARLISLE BAMLETT, of Middleton Tyas, in the county of York, Farmer, for an invention of "Improvements in reaping machines, part

of which improvements is applicable to other agricultural implements."—Dated 7th May, 1859.

1149. Michael Henry, of 84, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in the manufacture and construction of locks and fastenings."—A communication from abroad by Joseph Napoleon Rebour, a foreigner residing at Paris (France.)—Dated 7th May, 1859.

1150. Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "Improvements in puddling iron and steel."—Dated 7th May, 1859.

1151. Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "Improvements in the manufacture of iron."—Dated 7th May, 1859.

1157. John Ramsbottom, of Crawshaw Booth, near Rawtenstall, in the county of Lancaster, Machine Printer, for an invention of "Certain improvements in machinery for printing fabrics."—Dated 9th May, 1859.

1174. Michael Henry, of 84, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in treating and in supplying air, and in the apparatus employed therein, part of which improvements is also applicable to exhausting fluids."—A communication from abroad by Louis Cyrille Bureau, residing at Paris, in the French empire.—Dated 10th May, 1859.

1176. William Oland Bourne, of the city and state of New York, United States of America, for an invention of "Improvements in the means of and apparatus for separating metals, ores, and other substances of different specific gravities."—Dated 10th May, 1859.

1185. William Spence, of 50, Chancery Lane, in the county of Middlesex, Patent Agent, for an invention of "Improvements in knapsacks and other military equipments."—A communication from abroad by John Rider, of New York, United States.—Dated 11th May, 1859.

1188. James Bagster Lyall, of Castle Frome, in the county of Hereford, Gentleman, and Frederick William Campin, of the Strand, in the county of Middlesex, Patent Agent, for an invention of "Improvements in the 'saloon' omnibus and other omnibuses, the wheels and springs whereof and mode of attaching them being applicable to other carriages."—Dated 11th May, 1859.

1193. Thomas Ridley Oswald, of Sunderland, Ship Builder, for an invention of "Improvements in building ships and other vessels."—Dated 12th May, 1859.

1223. John Brown the younger, of the Rotherham Iron Works, Rotherham, in the county of York, Ironfounder, for an invention of "Improvements in buffers, draw springs, and bearing springs."—Dated 17th May, 1859.

1237. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in lubricating certain portions of machinery."—A communication from abroad by Michael Bonière the younger, of Paris, in the empire of France, Manufacturer.—Dated 18th May, 1859.

1239. James Childs, of Windsor House, Putney, in the county of Surrey, for an invention of "Improvements in hardening and vulcanizing compounds of sulphur with india rubber and gutta percha."—Dated 18th May, 1859.

1242. Robert Wilson, of Patricroft, near the city of Manchester, Engineer, for an invention of "Improvements in hydraulic machinery."—Dated 20th May, 1859.

1257. William Henry Perkin, King David Fort, St. George-in-the-East, in the county of Middlesex, and Matthew Gray, of the Dalmonach Print Works, Bonhill, Dumbartonshire, for an invention of "Improvements in mordanting and dyeing fabrics of cotton and other vegetable fibres."—Dated 21st May, 1859.

1305. William Henry Nevill, of Llanelly, in the county of Carmarthen, Manufacturer, for an invention of "Improvements in the manufacture of steel and wrought iron."—Dated 26th May, 1859.

1308. James Corn Bent, of Birmingham, in the county of Warwick, Gas Meter Manufacturer, for an invention of "Improvements in gas-meters."—Dated 26th May, 1859.

1320. William Henry Graveley, of Upper East Smithfield, in the county of Middlesex, Engineer, for an invention of "Improvements in apparatuses for purifying and aërating sea water, parts of which may be employed for cooking and baking purposes."—Dated 28th May, 1859.

1327. Edgar Breffit, of 61, King William Street, in the city of London, Glass Manufacturer, for an invention of "Improvements in machinery or apparatus for the manufacture of hollow corks."—Dated 30th May, 1859.

1419. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improvement in fire arms."—A communication from abroad by Charles Theodore Pierson, of New York, in the United States of America.—Dated 11th June, 1859.

1440. Simon Levy, of the city of Manchester, in the county of Lancaster, Cap Manufacturer, for an invention of "Improvements in hats, caps, or coverings for the head."—Dated 16th June, 1859.

1540. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery for cutting corks."—A communication from abroad by Edward Conroy, of Boston, in the United States of America.—Dated 28th June, 1859.

1560. John Lawson, of Leeds, in the county of York, Engineer, and Stephen Cotton, of Leeds aforesaid, Draftsman, for an invention of "Certain

improvements in machinery for roving, twisting, and spinning flax, cotton, wool, and other fibrous substances."—Dated 30th June, 1859.

1628. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in moulding or shaping metals by pressure, and in the machinery or apparatus employed therein."—A communication from abroad by Levi Dodge, of the United States of America.—Dated 8th July, 1859.

1661. James Combs, of Belfast, for an invention of "Improvements in machinery for hackling flax and other fibrous substances." — Dated 13th July, 1859.

1731. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in extracting oil from coal and other substances yielding pyrogenous oils."—A communication from abroad by Franklin W. Willard, of New York, in the United States of America. —Dated 25th July, 1859.

1742. John Davies, of Tetbury, in the county of Gloucester, Machinist, for an invention of "A new or improved self-adjusting ventilating apparatus." —Dated 27th July, 1859.

1812. William Richard Drake, of No. 46, Parliament Street, Westminster, in the county of Middlesex, Gentleman, for an invention of "An apparatus for conducting electricity in the sea, and for telegraphing and sounding in deep water."—A communication from abroad by Emile Schneider, of Ecole de Droit, Saint Petersburgh, in the empire of Russia.—Dated 6th August, 1859.

1836. John Cannon, of Billiter Street, in the city of London, Ship Broker, for an invention of "Improvements in washing machines."—A communication from abroad by Abiel Odell, of Bourmanville, in the county of Durham, Canada, Machinist. —Dated 9th August, 1859.

1840. George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, for an invention of "A new and useful method of manufacturing the vulcanized compounds of vulcanizable gums."—A communication from abroad by John Murphy, of the city, county, and state of New York.—Dated 9th August, 1859.

1860. Warren De La Rue, Manufacturer, and Dr. Hugo Müller, both of 110, Bunhill Row, in the county of Middlesex, for an invention of "Improvements in treating Japan and other vegetable wax."—Dated 11th August, 1859.

1919. The Honourable William Talbot, of the Army and Navy Club, Pall Mall, in the county of Middlesex, for an invention of "An improved cigar lighter."—Dated 22nd August, 1859.

1930. Thomas Richardson, of New Bridge Street, Newcastle-on-Tyne, for an invention of "Improvements in treating copper ores."—Dated 23rd August, 1859.

1965. David Todd, of Bridge-of-Weir, in the county of Renfrew, North Britain, Mill Manager, for an invention of "Improvements in machinery or apparatus for carding and treating, or preparing fibrous materials."—Dated 29th August, 1859.

2001. William Brown the younger, of the town county of Selkirk, North Britain, Manufacturer, and Simeon Bathgate, of the same place, Engineer, for an invention of "Improvements in machinery or apparatus for grinding or sharpening the card teeth of carding engines for carding brous materials."—Dated 2nd September, 1859.

2032. John James Sieber, of 5, Baring Street, New North Road, London, in the county of Middlesex, for an invention of "Improvements in power looms."—A communication from abroad by Henry Honegger, of Thiengen, Grand Duchy of Baden.—Dated 6th September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 26th October*, 1859, *inclusive.*)

25th October.

2557. John Lawson, of 2, Morris Place, Glasgow, for an invention of "Improvements in the manufacture of pile and other fabrics."—Dated 31st October, 1856.

26th October.

2650. William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer, for an invention of "Improvements in the manufacture of barytes and strontian, and their salts, and in their application to various purposes."—A communication.—Dated 11th November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 26th October*, 1859, *inclusive.*)

25th October.

519. Mathew Fitzpatrick, of Upper Cleveland Street, Fitzroy Square, in the county of Middlesex, Machinist, for an invention of "Certain improvements in machinery or apparatus to be applied to locomotive engines and carriages for the prevention of accidents, and also in the manufacture and application of indestructible and non-rebounding cushions to be applied to the above, and for other similar purposes."—Dated 25th October, 1852.

525. Myer Myers and Maurice Myers, trading as the firm of Myers and Son, and William Hill, Manager to the said Firm, Steel Pen Manu-

facturers, all of Birmingham, in the county of Warwick, for an invention of "Certain improvements in pens and penholders."—Dated 26th October, 1852.

543. JOHN NORTON, of Cork, in the county of Cork, Esquire, Captain, late of H. M. 34th Foot, for an invention of "Improvements in blasting."—Dated 27th October, 1852.

572. HENRY BRINSMEAD, of the parish of St. Giles in the Wood, in the county of Devon, Machine Maker, for an invention "For shaking straw to be attached to thrashing machines."—Dated 30th October, 1852.

26th October.

552. GEORGE HATTERSLEY, of Sheffield, in the county of York, for an invention of "A radiating hearth-plate."—Dated 28th October, 1852.

756. FRANCIS MONTGOMERY JENNINGS, of Cork, in the kingdom of Ireland, Manufacturing Chemist, for an invention of "Improvements in preparing flax, hemp, China grass, and other vegetable fibrous substances."—Dated 15th November, 1852.

Erratum in Journal of 18th October.

Page 1200, col. 2, No. 626, for "wheat" read "peat."

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March, (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated* 16*th March* 1744.) Price

---

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*
15. Electricity and Magnetism: their Generation and Applications, price 8*s.* 6*d.*
16. Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing, price 10*s.*

The following are in the press:—

Preparation of Fuel, and Apparatus for its Combustion.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

LONDON:

(*Registered for transmission abroad.*)

No. 608. TUESDAY, NOVEMBER 1, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1463. CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in the construction of stereoscopes."—A communication from Henry Adolphe Corbin, residing in Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 17th day of June, 1859.

1487. And ANDREW PEDDIE HOW, of No. 81, Mark Lane, in the city of London, Engineer, has given the like notice in respect of the invention of "Improvements in self-supplying distilling apparatus, and in apparatus for cooking combined therewith."

1492. And JAMES MEIKLE, of 79, Rumford Street, Glasgow, has given the like notice in respect of the invention of "Improvements in coating iron ships with asphalte, which improvements are also applicable to coating other surfaces."

As set forth in their respective petitions, both recorded in the said office on the 21st day of June, 1859.

1499. And ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, Engineer, has given the like notice in respect of the invention of "Improvements in steam hammers and pile driving machines."

1504. And WILLIAM RUSSELL, of the borough of Leicester, in the county of Leicester, Ironmonger, has given the like notice in respect of the invention of "Improvements in wheels for ploughs, cultivators and other implements or carriages."

As set forth in their respective petitions, both recorded in the said office on the 22nd day of June, 1859.

1514. And HENRY DOULTON, of Lambeth, has given the like notice in respect of the invention of "Improvements in earthenware jars and bottles."

As set forth in his petition, recorded in the said office on the 23rd day of June, 1859.

1517. And JAMES MILLS, of Heaton Norris, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in the manufacture of keys and gibs, and in the machinery employed therein."

As set forth in his petition, recorded in the said office on the 24th day of June, 1859.

1524. And THOMAS HOWARD, of King and Queen Iron Works, Rotherhithe, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in condensing steam in engines where superheated steam is used."

1526. And CHARLES WYE WILLIAMS, of Liverpool, in the county of Lancaster, has given the like notice in respect of the invention of "Improvements in steam boilers."

1531. And WILLIAM COPPIN, of Strand Foundry, Londonderry, Marine Architect and Engineer, has given the like notice in respect of the invention of "Improvements in apparatus for raising sunken and stranded vessels and their cargoes, and for raising and lowering other bodies into and out of the water, part of which improvements are applicable to raising weights generally."

As set forth in their respective petitions, all recorded in the said office on the 25th day of June, 1859.

1534. And DANIEL JOSEPH FLEETWOOD, of Birmingham, in the county of Warwick, Copper Agent, has given the like notice in respect of the invention of "An improvement or improvements in shaping metals."

1535. To BETHEL BURTON, of Brooklyn, in the state of New York, United States of America, hae

given the like notice in respect of the invention of "Improvements in breech-loading fire-arms."
As set forth in their respective petitions, both recorded in the said office on the 27th day of June, 1859.

1550. And GEORGE CHAPMAN, of Rutland Street, Leicester, has given the like notice in respect of the invention of "Improvements in knitting machines."
As set forth in his petition, recorded in the said office on the 29th day of June, 1859.

1554. And ALPHONSE GUEYTON, of Paris, in the French empire, Jeweller, has given the like notice in respect of the invention of "Improvements in enamelling articles of jewellery, applicable also to other similar purposes."

1557. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in lithographic and chromolithographic presses."—A communication from abroad by Jean Théodore Dupuy, of Paris.

1562. And JEPTHA AVERY WILKINSON, of Brooklyn, in the state of New York, United States of America, has given the like notice in respect of the invention of "Improvements in printing presses and apparatus connected therewith."

1564. And JULIAN BERNARD, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in uniting certain parts of boots and shoes, and in the means employed therein."
As set forth in their respective petitions, all recorded in the said office on the 30th day of June, 1859.

1574. And ROBERT ROYDS and ANTHONY HARCOURT, both of Woolston, in the county of Hants, Engineers, have given the like notice in respect of the invention of "An improved composition for protecting the bottoms of ships and other structures of iron."
As set forth in their petition, recorded in the said office on the 1st day of July, 1859.

1583. And CHARLES HANSON GREVILLE WILLIAMS, of No. 39, Regent Square, Gray's Inn Road, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in dyeing fabrics and yarns."
As set forth in his petition, recorded in the said office on the 2nd day of July, 1859.

1586. And JOSEPH SIMON, residing in Paris, Passage des Petites Ecuries, No. 5, has given the like notice in respect of the invention of "A composition named zeiodelite, a kind of paste, which becomes as hard as stone, is unchangeable by the air, and, being proof against the action of acids, may replace lead and other substances for various uses."
As set forth in his petition, recorded in the said office on the 4th day of July, 1859.

1701. And HENRI PARENT, of Roubaix, in the empire of France, Manufacturer, has given the like notice in respect of the invention of "Improvements in or applicable to looms for weaving."
As set forth in his petition, recorded in the said office on the 19th day of July, 1859.

1712. And GEORGE WELCH, of Birmingham, in the county of Warwick, Manufacturer, has given the like notice in respect of the invention of "An improvement or improvements in the manufacture of frames for mirrors, pictures, and other articles."
As set forth in his petition, recorded in the said office on the 21st day of July, 1859.

1733. And JAMES KING, of Glasgow, in the county of Lanark, North Britain, Chemist, has given the like notice in respect of the invention of "Improvements in the treatment of materials used in or resulting from the distillation of spirits."
As set forth in his petition, recorded in the said office on the 26th day of July, 1859.

1895. And RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in locks and keys."—A communication from abroad by Jules Emile Petit, of Paris.
As set forth in his petition, recorded in the said office on the 17th day of August, 1859.

2038. And EDWARD ROBERT DANN and EDWARD GOLDSCHMIDT, both of Nottingham, have given the like notice in respect of the invention of "Improvements in the manufacture of bonnet fronts or lappets."
As set forth in their petition, recorded in the said office on the 7th day of September, 1859.

2112. And JOSEPH BECK, of the firm of Smith, Beck, and Beck, of Coleman Street, in the city of London, has given the like notice in respect of the invention of "Improvements in stereoscopes."
As set forth in his petition, recorded in the said office on the 16th day of September, 1859.

2166. And JOHN GEDGE, of the firm of John Gedge and Son, of 4, Wellington Street South, Strand, in the county of Middlesex, Patent Agents, has given the like notice in respect of the invention of "An improved stamp holder and cutter."—A communication from abroad by Denis Nefflier and Pierre Blandin, both residing at Dijon, in the empire of France.
As set forth in his petition, recorded in the said office on the 24th day of September, 1859.

2199. And MANUEL LEOPOLD JONAS LAVATER, of the Strand, in the county of Middlesex, India Rubber Manufacturer, has given the like notice in respect of the invention of "Improvements in apparatus known as injection bottles, and in pneumatic discs, used in apparatus for adhering to glass and other impermeable substances."
As set forth in his petition, recorded in the said office on the 28th day of September, 1859.

2214. And EDWARD SONNEBORN, of Lüdge, in Westphalia, kingdom of Prussia, and now residing at 39, Finsbury Square, London, has given the like notice in respect of the invention of "An improvement in the manufacture of cement."
As set forth in his petition, recorded in the said office on the 30th day of September, 1859.

2276. And ENOCH OLDFIELD TINDALL, of Scarborough, in the county of York, Engineer, has

given the like notice in respect of the invention of "Improvements in machinery or apparatus for crushing or reducing grain, seeds, and other substances."

2278. And Alexander Mackenzie Ferry, of Edinburgh, in the county of Midlothian, North Britain, Merchant, has given the like notice in respect of the invention of "Improvements in the manufacture or production of oil, and in lamps for burning the same."

As set forth in their respective petitions, both recorded in the said office on the 6th day of October, 1859.

2309. And John Earl, of Melbourne, in the county of Derby, Railway Contractor, has given the like notice in respect of the invention of "Improvements in arranging and applying harness to the draft of carriages."

As set forth in his petition, recorded in the said office on the 11th day of October, 1859.

2331. And Thomas Twells, of the town and county of the town of Nottingham, Mechanist, has given the like notice in respect of the invention of "Improvements in machinery and apparatus connected therewith for embroidering or ornamenting woven, looped, or lace fabrics."

As set forth in his petition, recorded in the said office on the 12th day of October, 1859.

2363. And Lucien Vidie, of Paris, France, Gentleman, has given the like notice in respect of the invention of "Improvements in transmitting the motion of steam engines."

2371. And David Jones, of Bassaleg, in the county of Monmouth, Civil Engineer, has given the like notice in respect of the invention of "Improvements in self-acting breaks to be used on railways."

As set forth in their respective petitions, both recorded in the said office on the 17th day of October, 1859.

2377. And Joseph Reynolds, of 21, Bull and Mouth Street, City of London, Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of wrought nails."—A communication from abroad by Henry Coggshall, of Providence, R.I., U.S. of America.

As set forth in his petition, recorded in the said office on the 18th day of October, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Errata.

2331, appeared prematurely in Journal of 25th October.

Journal of Friday, 28th October,

2351. For "Chemintz" read "Chemnitz."

Patents on which the Stamp Duty of £50 has been Paid.

(*To 28th October*, 1859, *inclusive.*)

27th October.

2527. William Septimus Losh, of Wreay Syke, in the county of Cumberland, Esquire, for an invention of "Improvements in the preparation of size, which may also be used as a waterproof varnish or coating."—Dated 28th October, 1856.

2539. Thomas Clutton Salt, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "A new or improved method of coating with glass or enamelling surfaces of cast iron."—Dated 29th October, 1856.

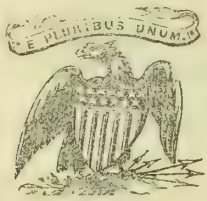
2578. Samuel Middleton, of No. 15, Porter Street, Newport Market, in the county of Middlesex, for an invention of "Improvements in the manufacture of certain articles of leather without seams."—Dated 3rd November, 1856.

28th October.

2530. Joseph Armstrong, of Normanton, in the county of York, Engineer, for an invention of "Improvements in the permanent way of railways."—Dated 28th October, 1856.

2541. Thomas Smith Henzell, of South Shields, in the county of Durham, Ship Owner, for an invention of "Improvements in the construction of ships or vessels."—Dated 29th October, 1856.

2547. John Thomas Way, of Welbeck Street, in the county of Middlesex, for an invention of "Improvements in obtaining light by electricity."—Dated 29th October, 1856.



2569. James Coul Sinclair, of Elgin, in the county of Moray, North Britain, Accountant, for an invention of "Improvements in treating, preparing, and drying agricultural produce."—Dated 1st November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 28th October*, 1859.)

579. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in machinery for cutting corn and other standing crops."—A communication from John H. Manny, of Waddam's Grove, in the county of Stephenson, and state of Illinois, in the United States of America.—Dated 30th October, 1852.

710. James Noble, of Leeds, in the county of York, Manufacturer, for an invention of "Improvements in combing wool and other fibres."—Dated 11th November, 1852.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 11th October, 1859, and each bearing that date.

No. 25,709. W. H. ALLEN and A. J. BENTLEY, of New York, N. Y., for an "Improved rope nipper."

"We claim the rope pincers composed of the grooved pivoted jaws D and levers A, and otherwise constructed as herein shown and described."

No. 25,710. THOS. C. AVERY, of New York, N. Y., for an "Improved galvanic battery."

"1st, I claim the use of the insulating amalgam, substantially as described, in combination with the surfaces of the zincs of galvanic batteries for telegraphic purposes, for obtaining the results herein-before set forth. 2d, I also claim the use of two or more independent strips of platinum in the construction of galvanic batteries for telegraphic purposes, as an improvement on the grove battery, for the purpose of obtaining the results herein-before set forth, but irrespective of their use, in combination with the insulated amalgamated zincs before described, I make no claim to them."

No. 25,711. AUGUSTUS BAILEY, of Gardiner, Me., for an "Improved machine for bending wood."

"I claim the combination of the aforesaid horizontal sliding roll (G) and graduated hook (Q) with the semi-cylinder (A), acting substantially in the manner and for the purpose herein set forth and described."

No. 25,712. JAMES D. BALDWIN, of Columbus, Geo., for an "Improvement in composition for paint oil."

"I claim as a new or improved article of manufacture, the paint oil composed of the ingredients herein specified, essentially in the proportions named and prepared, substantially as described for use, as herein set forth."

No. 25,713. W. D. BALLARD, of Kansas City, Mo., for an "Improvement in steam boiler furnaces."

"I claim the arrangement of the fireplace B, the partitions *f*, *f*, *g*, *h*, *h*, of the setting and the chimney E, substantially as herein described, with the two flued boiler."

No. 25,714. GEO. F. BENCKERT and DAVID H. BENCKERT, of Philadelphia, Pa., for an "Improved signal bell."

"We claim, 1st, the latch D, operating with the hammer and pull bar, with the one spring, as specified. 2d, placing the working parts of a signal bell within the sounding box, substantially as and for the purpose herein specified."

No. 25,715. SOLOMON E. BLAKE and THOS. JOHNSTON, of Louisville, Ky., for an "Improvement in hemming guides for sewing machines."

"We claim, 1st, the combination and arrangement of the spiral tongue G, flanged roller F, *f*, and yielding plate B, for the purpose set forth. 2d, the spring plate B, B^1, constructed as described, with an oblique slot in the limb B, combined with the adjustable gauge C, in the manner and for the purpose set forth. 3rd, the yielding pressure roller K, adapted and applied, substantially as set forth, to smooth and flatten the hem, previous to stitching."

No. 25,716. REINHOLD BOEKLEN, of Jersey City, N. J., for an "Improvement in connecting rods applied to cranks."

"I claim giving the rod elasticity both longitudinally and in a lateral direction, parallel with the plane of revolution of the crank, by extending it in the form of a bow or arc beyond the crank pin or wrist, and making such bow elastic, substantially as and for the purpose specified."

No. 25,717. JOHN K. BOOTON, of Luray, Va., for an "Improvement in machines for breaking and cleaning hemp."

"First, I claim the combination and arrangement of the cylindrical grating J, J, K, K, K, and lever arms *x*, *x*, *y*, *y*, and swords Z, Z, and concave grating b^2, b^2, with the hurder cylinder P, formed with alternate plain edge and serrated ridges or ribs *q*, *r*, *q*, *r*, substantially as set forth and described. Secondly, I claim the combination and arrangement of a fan or blast wheel c^2, c^2, c^2, with the hurder cylinder P, *q*, *r*, and endless apron *u*, *u*, substantially as set forth and described."

No. 25,718. L. BRADLEY, of Tolsom, Cal., for an "Improved telegraphic machine."

"I claim, 1st, arranging the type and mechanism for closing the circuit, substantially as described, or in an equivalent manner, so that a double closing of the circuit is effected, as each tooth of the type comes in contact with the closing mechanism. 2nd, the combination of the type and composing sticks, with a yielding insulating plate, carrying the mechanism for breaking and closing the circuit, whereby the contact of the closing mechanism with the face of the type is insured. 3rd, the vibrating hook (*g*) and bar (*i*), or their equivalents, in combination with a yielding insulating plate and type and sticks, for the purpose of closing the circuit. 4th, the combination of the composing stick and type, with the spring (*c*), or its equivalent, arranged substantially as described, so that the type are made to form a portion of the circuit, for the purpose set forth. 5th, the combination of the carrying band and mechanism for closing the circuit, with the composing sticks and type arranged on the band, in relation to each other, substantially as described, so that the sticks are successively carried forward in the order in which they are arranged, brought into the current, and the message transmitted without interruption. 6th, the combination of the movable platform, carrying the recording mechanism with the rotating cylinder, carrying the record paper, arranged substantially as described, so that the message, as transmitted, is recorded in parallel lines on the paper. 7th, constructing the composing sticks and types, substantially as described, so that the sticks, when filled with the type, shall present an even and flat surface on either side. 8th, the application of a syphon pen, constructed and arranged substantially as described, for the purpose of recording the messages. 9th, the inclined plane B, arranged substantially as described, in combination with the band D, whereby the composing sticks are received from the band, in such manner as not to interfere with each other's delivery, and in the same order in which they were placed on the band."

No. 25,719. T. B. BURTIS, of Chicago, Ill., for an "Improved refrigerator."

"I claim the employment or use of the ice chamber B, water chamber C, air passages D, E, G, and a series of provision chambers F, arranged relatively with each other, for the purpose set forth."

No. 25,720. JOHN BUZBY, of Moorestown, N.J., for an "Improvement in grate bars."

"I claim making the mortises in and the tenons on the grate bars, alternately one above the other, or one side of the other, so that the mortises may be made entirely through the bar, without interferring with the tenors, and so the tenons may extend entirely through the bar, without interferring with one another, and be made so long as not to be drawn out of the mortises by the warping or springing of the grate bars."

No. 25,721. A. S. CAPRON and D. S. DAVIS, of Grass Lake, Mich., for an "Improvement in potatoe diggers."

"I claim the arrangement of axle B, wheels A, A^1, and wheel C, pinion F, crank and shaft E, guides *e*, *e*, roller *x*, rake D, apron H, and hooks *i*, *i*, the whole being connected together, and operating substantially as and for the purpose specified."

No. 25,722. TISDALE CARPENTER, of Providence, R.I., for an "Improvement for operating the valves of steam engines."

"What I claim as my invention and improvement in devices for operating the induction valves of steam or gas engines, so as to supply and graduate the steam or gas, in proportion to the power or resistance to be overcome, and cut off the steam or gas when it is no longer required, is the adjustable graduated scroll-shaped side cam, so arranged as to be traversed and adjusted, by a regulator or governor, while the engine is in motion, substantially as described, or adjusted and fixed or set by hand, while the engine is stopped."

No. 25,723. SAML. CHACE, of Providence, R.I., for an "Improvement in awnings."

"I claim the application of the various devices before described, viz., the gear toothed tracks C, C, with the pinions E, E, also the dogs G, G, and finally the box or covering K, to an awning, the whole being constructed substantially as and for the purposes set forth."

No. 25,724. JAMES S. COLVIN, of Alleghany, Pa., for an "Improved gasket for steam and other joints."

"I claim a joint gasket, composed of a ring of india rubber, incased with copper or other metal, substantially as herein described."

No. 25,725. NORMAN COWLES and A. HULBERT, of Edgefield, S.C., for an "Improvement in spring back carriage seat."

"We claim the employment of springs D, D, substantially as described, when in connection with a back B, supported by hinged uprights, in the manner and for the purposes set forth."

No. 25,726. BIRAM C. DAVIS, of Binghamton, N.Y., for an "Improved hand machine for wiring blind rods."

"I claim, first, the setting form 'A' which sets over the rod 'C,' and straddles the slats 'D,' and which is secured under the blind by means of the stationary bar 'B,' in such a manner as to set the staples through the eye of the staple in the rod (C) into the slats 'D,' 'D,' being the equivalent means employed for setting the staples into the rod 'C,' in combination with the adjustable arrangement 'K,' operating substantially as described. Second, I claim, in combination with the form 'A,' the joint lever 'G,' flange rod or driver (H), dividing slide 'I,' inclined needle bar 'J,' the whole being arranged substantially as described, and for the purpose set forth."

No. 25,727. E. DOUGHERTY, of Cedarville, O., for an "Improved wheelwright machine."

"I claim the combination of devices as herein specified substantially as and for the purposes set forth."

No. 25,728. H. F. DROTT, of Cumberland, Md., for an "Improved shutter hinge."

"I claim the employment of the spring E, as constructed, when used in connection with the plate *n*, as constructed, the two being used in combination with any common shutter hinge, substantially as and for the purpose specified."

No. 25,729. B. WELLS DUNKLEE, of Boston, Mass., for an "Improvement in furnaces."

"For the purpose of warming and ventilating a number of rooms simultaneously, I claim the general arrangement as above described of the space Q, the chamber or dome I, the dampers M and N, and pipe or T, L, and the ventilating pipe S, and smoke drum G, and ventilating pipe P, and smoke pipe *t*, and air duck R, and series of dampers in flues F, in relation to each other, and with respect to the flue F, and hot-air chamber E, the whole being made to operate substantially in the manner and for the purposes as above set forth."

No. 25,730. WM. O. GROOVER and WM. E. BAKER, of Boston, Mass., and O. B. POTTER, of New York, N.Y., for an "Improvement in sewing machines."

"We claim a non-penetrating instrument, and a piercing eye-pointed needle, acting together to make an interlocking of threads, substantially such as is represented, in combination with a clamping apparatus, acting substantially as specified, the combination being substantially such as is set forth, and acting to make a double looped stitch, substantially in the manner described. And, second, we claim mounting a spool or bobbin, from which thread is to be delivered for the purpose of sewing by machinery upon two truncated cones, substantially as herein-before set forth."

No. 25,731. HORACE GUSHEE and JOHN G. DAWES, of San Francisco, Cal., for an "Improvement in beehives."

"We claim the combination of the comb-formed D, rods E, staples a^1, *a*, and cleat H, arranged as described, whereby the comb frames may be readily removed or inserted in the manner described, and for the purpose specified."

No. 25,732. JOHN R. GUY, of Springfield, O., for an "Improved bedstead."

"I claim the arrangement of the frame C, D, E, with reference to the heads B, A, and their connection by means of the joints H, G, and slides I, and plates J, or their equivalents substantially as described."

No. 25,733. JOSHUA HENDY, of San Francisco, Cal., for an "Improved double friction coupling."

"What I claim is, the application of two such truncated cones to one coupling, one at either end, and operated by a single lever, so as to work in cavities or conical sleeves, attached to pulleys or wheels, arranged on one shaft, so that said shaft may be run slow or fast, or backward or forward, or entirely stopped, without stopping the prime motor or changing its speed, substantially as herein set forth and explained."

No. 25,734. HATSEL HIGGINS, of Orleans, Mass., for an "Improved steering apparatus."

"I claim the arrangement substantially as specified of the rudder head intermediately between the supports, which respectively serve as bearings to the hand wheel shaft, and the rudder operating gear, said shaft extending back of and over said gear, whereby the rudder may be operated either by the gear or by a tiller from the wheel shaft as described, and also compactness of the steering apparatus and economy of deck space is obtained."

No. 25,735. ISAAC H. HOBBS, ABRAHAM W. RAND and GEO. H. SELLERS, of Philadelphia, Pa., for an "Improvement in hot-air furnaces."

"We claim, 1st, the general arrangement of the subdivided air chamber in connection with the separate receiving and discharging openings, substantially in the manner and for the purpose specified. 2nd, we also claim the deflecting diaphragms in combination with the above-described arrangement, in the manner substantially and for the purpose set forth."

No. 25,736. SIDNEY S. HOGLE, of Cleveland, O., for an "Improvement in rotary harrows."

"I claim the combination of a series of individually rotating toothed frames or wheels with a rotating central frame or wheel in such a manner that the said parts will operate substantially in the manner herein set forth."

No. 25,737. D. E. HOLMES, of Halifax, Mass., for an "Improved clothes frame."

"I claim the combination of the standards A, A, horizontal hinged frames C, C, when the same are sustained and braced by slotted braces F, F, all arranged substantially in the manner as and for the purposes herein set forth."

No. 25,738. BOLD R. HOOD, of Clinton, N. C., for an "Improvement in ploughs."

"I claim the combination of the standard D, with the standard C, and land sides E, when these parts are constructed as described, and adapted to receive the various forms of shovel points and mold boards in use, in the manner described for the purpose specified."

No. 25,739. WM. H. JOHNSON, of Springfield, Mass., for an "Improved telegraphic cable."

"I claim an electro-telegraphic conductor constructed in the manner and for the purpose set forth."

No. 25,740. W. M. KEAGUE, of Brooklyn, N.Y., for an "Improved omnibus register."

"I claim, first, the arrangement and combination of the platform D, vibrating lever C, and adjustable spring G, sub-

stantially as and for the purpose specified. Second, in combination with the platform D and spring G, I claim the sliding bar H, spring catch n, and wheel K, substantially as and for the purpose described. Third, arranging the step A in combination with the registering apparatus substantially as described, so that it registers half fares as well as full fares."

No. 25,741. Miles Keely and G. W. Cressman, of Barren Hill, Pa., for an "Improvement in hydraulic motors."

"We claim the arrangement and combination with the levers M, lever frames K, L, and bottoms (k) of the adjustable slots (r), and bars (t), which the speed of the machine, length of stroke of the levers, and distance of water may be regulated at pleasure as herein shown and described."

No. 25,742. Archibald C. Ketchum, of New York, N.Y., for an "Improvement in tea kettles."

"I claim the combination of the tin top, copper bottom, and sheet iron skirt, when the same are all united by one and the same lap joint, and just below the spout of the kettle as described and represented, constituting a new article of manufacture."

No. 25,743. Isaac R. Lawrence and Geo. E. Gould, of Green Island, N.Y., for an "Improvement in endless chains for horse-power machines."

"We claim, first, extending both the lags A and the links B of such chains to or beyond the threads q of the friction wheels c, carried by axles h, cast on the links substantially as and for the purpose herein described. And second, we also claim forming and arranging projections r and s, in the links B of the chain substantially as and for the purpose herein set forth, the links being provided with male lugs d, and female lugs f, substantially as herein described."

No. 25,744. Lucius Leavenworth, of Trumansburgh, N. Y., for an "Improvement in straw-cutters."

"I claim the arrangement and combination of the rockers C and E, and springs d, substantially as described, for the purpose of giving a double motion to the knife, and to avoid friction of the working parts."

No. 25,745. Sylvester Marsh, of West Roxburg, Mass., for an "Improved apparatus for stirring and delivering grain."

"I claim, 1st, the combination, with the reticulated bed, or other suitable drying table of a reciprocating truck, armed with paddles or stirrers, for agitating the grain on the drying surface. 2d, the arrangement, substantially as specified, of the truck paddles in rows, one in advance of the other, and the paddles of each preceding row intermediate of those next behind them. 3d, giving to the paddles of the reciprocating truck an oblique set for and during the forward travel of the truck, and giving them an edge presentation or set for and during the back travel of the same, essentially as and for the purposes set forth. 4th, giving to said paddles reverse obliquities for and during the forward travel of the truck, so as to throw the grain alternately to the right and to the left in the feed forward of the grain by the paddles. 5th, the combination with the reciprocating truck and its paddles of a cross sliding frame, made to gear by cranks, or their equivalents, with the several paddles, for simultaneously changing the latter from an oblique to a straight set, and vice versa, substantially as specified. 6th, the combination with the cross sliding frame to the reciprocating truck of one or more adjustable inclines and stops, for automatically reversing the position of the paddles in their one direction. 7th, drawing the cross frame back to its original position to give the paddles a different set by means of a clip lever, acted on by a weight, weighted catch, and inclined projection, connected with the reciprocating truck, or their equivalents; also afterwards returning said lever to its former position, to be locked by the weighted catch, by an inclined plane on the truck acting against and over a swell on the lever, substantially as herein set forth. 8th, varying the range of motion of the reciprocating truck on or over the drying surface, and relatively to the feed or delivery ends thereof, by means of a lengthening and shortening driving pitman, made adjustable, substantially as specified."

No. 25,746. Andreas Maurer, of New Carlisle, Ind., for an "Improvement in seed planters."

"I claim the arrangement and combination of the vertically moving and seed-distributing supporting axle D, seed boxes E, and lever F, as and for the purpose herein shown and described."

No. 25,747. Thos. J. Mayall, of Roxburg, Mass., for an "Improvement in method of combining emery with caoutchouc."

"I claim the new process herein described, of making emery sharpening and polishing tools, by combining emery with india rubber, gutta percha, or other substances, and then submitting the same, while under great pressure, to a high degree of artificial heat, substantially as set forth, whereby, with a given quantity of rubber, emery may be combined in much greater quantities than it could be heretofore done."

No. 25,748. James McAleer, of Chambersburg, Pa., for an "Improvement in harvesters."

"I claim the arrangement of the two seats D, D^1, one facing at right angles to the other, conducting trough and binding table F, F^1, and the elevating device C, all for use together, in the manner and for the purpose herein described."

No. 25,749. J. McDougall, of Masonville, Mich., for an "Improved mode of forming joints in india-rubber belting."

"I claim the employment, in combination with the belt ends A, B, of the tongues and cavities (c, c), so that the sides of the tongue portion shall be protected by the selvages of the cavity parts, substantially as herein shown and described."

No. 25,750. S. T. McDougall, of New York, N.Y., for a "Traveller's ticket holder."

"I claim the lever C, spring c^1, point i, or their equivalents, in combination with an ordinary shawl pin, the whole constructed and operating as above set forth for the purposes specified."

No. 25,751. James P. McLean, of New York, N. Y., for an "Improvement in skates."

"I claim the arrangement and use of the side or ankle springs (A, A^1), with pads (B, B^1), and instep projections (2 and 3) adjustable or otherwise, in combination with the heel spring (h), having a pad at its top end, and with the cork sole (m), in the form of a shoe or otherwise, as set forth and shown at Figs 1, 2, 3, and 4. Secondly, I claim the combined arrangement and use of the railroad attachment (K, K^1) and (Y, Y^1), as applied to a skate, the same forming a toe-strap loop, if required, in the manner and for the purpose set forth and shown in the drawing."

No. 25,752. James C. Miller, of Union Township, Pa., for an "Improvement in horse power locomotive."

"I claim horse-power sweep levers, connected with one or more ground wheels, substantially as described, and for the purpose specified."

No. 25,753. Geo. F. Milliken, of Somerville, Mass., for electro-magnetic burglar alarm."

"I claim the combination of a galvanic battery, an electric circuit, a circuit breaker, operated by a window or door, with a step by step indicator, substantially as herein described. I claim causing a window or door automatically to prevent any alteration upon the circuit during the closing of the window or door, until it is nearly clearly closed, in any manner, substantially as herein described. I claim the use of the armature J, for the double purpose of regulating the movements of the points, and setting in motion the alarm apparatus."

No. 25,754. B. S. Morgan, of Delhi, Iowa, for an "Improvement in cultivators."

"I claim the arrangement and combination of the side wings D, and wheels H, H, I, of a cultivator, with the levers h, h, i, bar d, rods e, and hand lever f, substantially as and for the purpose specified."

No. 25,755. Wm. A. Morrison, of Morrisania, N. Y., for an "Improved boot and shoe brush and scraper."

"I claim the arrangement of the spring B, in combination with screws A, in such a manner as to throw the brushes C forward parallel with the scraper D, as and for the purpose specified."

No. 25,756. Abel R. Nixon, of Rhea Spring, Tenn., for an "Improvement in hand loom."

"I claim, in combination with the lay beam and spring pricker stalls, the toggle levers *b*, *b*, triggers *f*, *f*, and flexible connections *e*, *h*, for effecting the setting and tripping of the picker staff, substantially as described. And I also claim, in combination with the lay and the treadles for working the harness or sheds, the toggle levers *q*, and trigger cords *h*, so that the shed shall be properly made before the trigger is drawn, to let the shuttle fly, thus ensuring a perfect sequency of operation, and with great saving of manual labor on the part of the operator, as set forth."

No. 25,757. Saml. Page, of Chelsea, Mass., for an "Improved varnish."

"I claim the above described varnish, made of the materials specified."

No. 25,758. Wm. Munroe, of West Auburn, Me., for an "Improvement in sole cutting machines."

"I claim, 1st, the arrangement of the vertical slots *i*, *i*, in the arbor E, elastic bars *q*, *r*, with their projections *s* fitting respectively in said slots. The weight P, bar *f*, and the shafts I, N, provided respectively with the cam K, spring P^1, pinion M, part pinion L, and strap O, substantially as described, to operate the arbor E, and its die or cutting flanch *l*. 2d, the stop S attached to a shaft Q, provided with springs j^1, *k*, and actuated by the pin *h*, on the rod F, and the notched block f^1 attached to the bar R, substantially as and for the purpose set forth."

No. 25,759. Henry Pfarrer, of New York, N.Y., for an "Improvement in gear cutting engines."

"I claim a pattern *t*, mounted on a shaft or spindle, which also carries the gear to be cut, in combination with a fixed dog or guide *u*, when said dog or guide is so located that the pattern runs off, and is clear of the same, so as to be turned at the time the gear is clear of the cutter, and said pattern again takes and is held by said dog, as the cutting commences, and is proceeded with, as set forth. I also claim the arrangement of the lever *x*, pawl *y*, and adjustable stop *z*, to give motion to the pattern *t*, when not in contact with the stop or dog *u*, as described and shown. In combination with the pattern *t* and dog *u*, I also claim the stok *p*, carrying the shaft or spindle *s*, and actuated by the lever *k*, for the purposes as specified."

No. 25,760. Mathieu Philippi, of Troy, N.Y., for an "Improvement in key board for pianofortes."

"I claim so constructing the upper surfaces of the keys of a pianoforte, that while the ordinary form of the key board is retained, portions of all the keys are brought to the same level in the key board, substantially as and for the purpose herein described."

No. 25,761. Henry B. Ramsey, of Indianopolis, Ind., for an "Improvement in harvesters."

"I claim the combination of the frames N, O, and K, chain L, chain wheel M, crank V, screw rod X, friction bearers *b*, *b*, and grain table Y, when these several parts are constructed and arranged for operation in the manner and for the purpose set forth."

No. 25,762. L. B. Richardson, of Athol, Mass., for an "Improvement in lasting pincers."

"I claim the application of a swinging fulcrum to lasting pincers, constructed and arranged substantially in the manner and for the purpose set forth in the above specification."

No. 25,763. Robt. E. Rogers, of Philadelphia, Pa., for an "Improvement in umbrella frames."

"I claim combining with the tubular ribs and stretchers, constructed as herein described, the means of uniting the ribs and stretchers, and for strengthening the tubular parts of the frame, as herein set forth."

No. 25,764. Wm. Seeley, of Chillicothe, Ill., for an "Improvement in cultivators."

"I claim the arrangement of the post D, arms E, cross-bar F, lever H, wheels W, shovels B and C, chains R and Q, arms U, cross bar K, vertical lever Y and Y^2, rods Z, whiffle tree X, and draft hook A^2, the whole being constructed and combined in the manner and for the purpose above described."

No. 25,765. Joseph Seymour, of Syracuse, N. Y., for an "Improvement in making spoons."

"I claim the machine known as 'the rolls,' having the form or figure of any article to be made up plain, of silver or other metal, cut upon one or both of them, so much larger than the same article when finished that the article itself can be cut with a punch of the desired size and shape out of a piece of metal after it has been passed between the rolls, and entirely within the margin or edge of the impression made upon the metal by the form or figure cut into one or both of the rolls, substantially as herein described and set forth."

No. 25,766. H. O. Sheidley, of Republic, O., for an "Improved invalid bedstead."

"I claim the combination of the sliding hinged bottom B, B^1, B^{11}, with the crank shaft, cords, and attached levers, and the movable foot board F, substantially as and for the purposes set forth."

No. 25,767. John H. Shrote, of Baltimore, Md., for an "Improvement in cutting and panning cakes."

"I claim the cutters A, as constructed, or its equivalent, in combination with the pan E and bottom board D, for the purposes of facilitating the cutting and removing the cakes to the oven, as set forth and described."

No. 25,768. Charles R. Smith, of Haverhill, N.H., for an "Improved device for bracing and ventilating fence posts."

"I claim, 1st, the peculiar construction and arrangement of the wire loop K, in combination with one pair of braces, a post, and a sill, substantially as and for the purposes set forth. 2d, the grooved post E and the grooved cleats D and F, in combination with the lengthwise boards or slats B, B, B, B, substantially as and for the purpose set forth."

No. 25,769. H. D. Snow, of Rochester. N. Y., for an "Improvement in governors for steam and other engines."

"I claim the use of collar T, first, to control the passage of steam through the valve A on starting the engine. Secondly, to control the extreme downward movement of the valve A, by means of stops I, I, so connected with the valve openings E, E, as to close them at either extreme of the movement. I also claim locating the weight X beneath and partially entering the tube of the valve A, as represented in figure 2."

No. 25,770. C. M. Spencer, of Manchester, Conn., for an "Apparatus for cutting and attaching labels."

"I claim the cutting and affixing labels upon spools by one or the same action of a machine, as the dies M, L, or the tubular cutters *e*, follower *c*, or their equivalents, substantially in the manner as and for the purpose described."

No. 25,771. Joseph Andrew Stephan, of Lafayette, Ind., for an "Improvement in adjustable rails for replacing cars on the track."

"I claim, first, the fish pieces B, C, D, clamped to the permanent rails A, A, and elevated high enough above said rails to carry the flanges of the car to be replaced over them, substantially as described. And I also claim, in combination with an elevated temporary track secured to, and high enough above the permanent track, to carry over the flanges of the wheels, the sections G, G^1, and their switches *e*, *h*, extending to each of the pairs of wheels of the car, said sections having all the elements of switches, frogs, and rails, substantially as described."

No. 25,772. David Stewart, of Annapolis, Md.' for an "Improved method of preparing bones for fertilizing purposes."

"What I claim as my improvement in the preparation of bones for fertilizing purposes, is the stratification of the bones with materials, animal, vegetable, and mineral, substantially in the order and upon the principles herein set forth, using the materials above designated, or their equivalents, whereby bones are reduced in a most economical manner to an available condition for manure, and a thorough compost obtained, adapted to all the necessities of growing and fruiting plants, without any mechanical labour, other than that of stratifying, cutting down, and screening, as herein above set forth."

No. 25,773. Wm. H. Tambling, of Berlin, Wis., for an "Improved milk safe."

"I claim the within described safe as an article of manufacture, constructed in the particular manner set forth, to wit, with gauze wire sides and doors, and with shelves, which consist of longitudinal slats C, C, to which are secured a series of wooden cross slats D, D, which are made broad at their base, and beveled to an edge on their tops, the whole being arranged together, and used in the manner and for the purpose specified."

No. 25,774. Wm. H. Tambling, of Berlin, Wis., for an "Improved washing machine."

"I claim, 1st, the arrangement of the buckets (D, D), in the four corners of the interior of the box A; said buckets being made in a triangular form, and open at one angle as at x, x, the same being used in the manner and for the purpose specified. 2nd, the arrangement of the bars a, a, as provided with pins n, n, and in the forms represented, when used in connection with the box A, and the buckets (D, D), as constructed, the whole operating substantially as and for the purpose specified."

No. 25,775. Francis C. Treadwell, Jr., of New York, N.Y., and Henry McCollum, of Windham, Conn., for an "Improved mode of making cylindrical strips of dough, in the manufacture of crackers."

"We claim the above described improved method of forming skin covered strips from a sheet of previously smooth rolled dough, by passing it between a pair of grooved rollers, arranged and constructed substantially as herein-before described, with the groove separated by portions of the plane surface of the rollers."

No. 25,776. John G. Treadwell, of Albany, N.Y., for an "Improvement in apparatus for ventilating railroad cars."

"I claim the arrangement in the boxes A^1, of the porous partitions C, C, and the pipe e, provided at its lower end with a sprinkler O, when the same are used in connection with the openings D, substantially in the manner and for the purpose specified."

No. 25,777. Isaac Wait, of Watertown, N.Y., for an "Improvement in grain cleaners."

"I claim the combination of the separating sieves and the burr surfaced plates, by means of the vibrating lever, which gives a contrary motion to each, at every revolution of the wheel, or crank, substantially in the manner and for the purpose herein described."

No. 25,778. John Walker, of Sunbury, O., for an "Improved locomotive cross-cut sawing machine."

"I claim, 1st, the arrangement of an upright steam engine A on a truck frame B, with a horizontal crank shaft D, and a vibrating saw L, substantially as herein set forth, 2nd, the employment of conical pulleys Q, Q^1, Q^2, Q^3, and shiftable bands R, R, in combination with the other machinery and the engine which operates the saw for the purpose of guiding the machine when moving from place to place, substantially as and for the purposes set forth."

No. 25,779. Caleb C. Walworth, of Boston, Mass., for an "Improvement in cutting screw threads on gas pipe."

"I claim the combination of two or more mandrels parallel or nearly parallel to each other, and arranged to carry cutting tools with two or more vises, when these are arranged to revolve around a common center. I also claim the combination of two or more sets of mandrels, as above, with two or more sets of vises, as above, when each set of mandrels is arranged to operate in unison with its corresponding set of vises. I do not herein intend to claim the arrangement of two or more vises, so as to revolve about a common center, and locking the same in any desired position, as such an arrangement was described by me in the American Patent, numbered 15,862, and in the English Patent, numbered ; but I do claim the combination of two or more series of vises, one beyond the other, and arranged to revolve about a common center. I also claim operating two or more vises independently of each other or together, by one wrench, and by the means and in the manner substantially as specified."

No. 25,780. Daniel Winder, of Cincinnati, O., for an "Improved bed bottom."

"I claim the combination of the rings a and b, and tension screw c, operating in connection with a radial bed cord or webbing, in the manner and for the purpose set forth."

No. 25,781. Oliver Evans Woods, of Philadelphia, Pa., for an "Improved life-preserving buoy."

"I claim a buoy arranged with two frames A, A^1, stays D, and cross braces E, and with a valve or valves F, and otherwise constructed and operated as herein described."

No. 25,782. Francis G. Woodward, of Worcester, Mass., for an "Improvement in sewing machines."

"I claim the peculiar manner of working the looping hoop d by means of the wheel F and the double joint E, substantially as specified."

No. 25,783. Le Roy S. White, of Waterbury, Conn., for an "Improved burnishing machine."

"I claim, 1st, the arrangement of the burnisher or burnishers in a burnishing machine in a sliding gate, or its equivalent, carried by and working perpendicularly to a rectilineally reciprocating shaft, or its equivalent, substantially as and for the purpose herein described. 2nd, providing for the burnisher or burnishers employed on one side of the article to be burnished in a so applied gate, or its equivalent, such a movement independently of that or those employed on the opposite side, substantially as herein described, as to produce the greater movement that is necessary or desirable for the reason herein-before explained on the convex side of any article of curved form. 3rd, fitting a burnisher in a burnishing machine to a suitable holder g, or its equivalent, in which it is permitted a free vibration laterally to the movement it makes in the burnishing operation, substantially as and for the purpose herein specified."

No. 25,784. Geo. W. Banker, of Medford, Mass., assignor to himself and G. O. Carpenter, of South Reading, Mass., for an "Improved mode of manufacturing barrels, &c."

"I claim the method herein described of securing the heads of casks by means of the chamfer 5 and shoulder e, as described. 2nd, I claim a keg furnished with ears and a bale as above described, for the purpose specified."

No. 25,785. Oliver D. Barret, of Cleveland, O., assignor to himself and Sears E. Smith, of same place, for an "Improvement in sewing machines."

"I claim, first, the crank consisting of the disk Q, and pin O, in combination with the pin O^1, in the pulley Q^1, and hinge R, whereby I am enabled to turn the machine up from the table designated for it to stand on, in order to adjust or thread the under needle d, without unbanding the machine, substantially in the manner and for the purpose herein described. Second, hinging the foot holder F to the head of the goose neck B, in a position vertical to the feeding surface of the feeder Y, substantially in the manner and for the purpose herein described. Third, the foot holder F, constructed and hinged as set forth, in combination with the rod H, spring I, foot K, and feeder Y, substantially in the manner, and for the purpose set forth."

No. 25,786. Thos. A. Earl, of North Attleborough, Mass., assignor to himself and Charles A. Durgin, of New York, N. Y., for an "Improvement in bustles."

"I claim the segment c, supported as described, in combination with the projecting strut E, slide F, and strip G, the whole being constructed and operated substantially as set forth and described."

No. 25,787. Wm. Gluyas, of San Francisco, Cal., assignor to himself and Wm. H. O. Neill, of same place, for a "Composition for preparing gold and silver ores for amalgamation."

"I claim the mixture or composition herein-before described, used with pulverized ores or tailings, the whole being brought to a boiling heat, and being constantly agitated, thereby preparing the precious metals for a more perfect amalgamation with quick silver."

No. 25,788. Stoughton B. Holden, of Woburn, Mass., assignor to himself and Parker Nichols, of Reading, Mass., for "Burglar's alarm."

"I claim the rrrangement of the candle carrier D, and its hammer b, upon the torped o post, or standard B, the trigger lever g, and the grater or friction plate C, the whole forming an improved, efficient, and simple alarm, to operate as specified."

No. 25,789. JOHN S. LASH, of Carlisle, Pa., assignor to himself and Franklin Knauss, of Allentown, Pa, for an "Improvement in straw cutters."

"I claim forming the bed F, in sections *c*, each being provided with a spring *e*, and having the spiral beaters or followers provided with shoulders *g*, substantially as shown, to prevent the lateral movement of the straw or stalks, in the feed-box, under the action of the beaters or followers."

No. 25,790. ALFRED MARSH, of Detroit, Mich., assignor to John Q. Dudley, of same place, for an "Improved method of preventing deposition of carbon in gas retorts."

"I claim the introduction into the retort during the gas making process of chlorate of potash, or other substance, which evolves oxygen, when heated for the purpose set forth."

No. 25,791. CHARLES O'BRYAN, of Salem, Ohio, assignor to himself and Joseph S. Haldeman, of same place, for an "Improved tool for cutting round tenons."

"I claim the combination of the hollow conical head A, external nut B, and plate C, constructed and arranged as described, for adjusting and holding when adjusted, the bits or cutters, or their guides, substantially as represented."

No. 25,792. ROBT. PATTERSON, of Philadelphia Pa., assignor to Horace Vaughn, of Providence, R. I., for a "Solution for thinning lubricating compound."

"I claim a thinning solution applicable to the reduction of the lubricating compound described in the Patent of Vaughn and Hutton, dated 2nd August, 1859, made of the substances, and applied substantially in the manner specified."

No. 25,793. THOS. D. RICHARDSON, of New York, N. Y., assignor to Wm. Richardson, of same place, for an "Improvement in pen and pencil holder."

"I claim the arrangement and combination of the elongated tube (*h*), with the handle A, and the tubes B, C, as and for the purpose herein shown and described."

No. 25,794. NATHAN C. TRAVIS, of Alton, Ill., assignor to himself, Nathan Johnson, and Richard Emerson, of same place, for an "Improved regulator valve for steam engines."

"I claim, 1st, the arrangement and combination of the valve box A, and casing C, as and for the purposes shown and described. 2nd, the arrangement and combination of the screw socket *k*, stem (*j*), rod (*l*), arm (*p*), groove (*q*), and band wheel J, so that by turning the band wheel J the stem (*j*) may be elevated and depressed, irrespective of the rise and fall of the rod (*l*), and without rotating the latter, all as herein shown and described."

RE-ISSUE.

JEREMIAH STEVER, of Bristol, Conn., for an "Improvement in machines for burnishing metals."—Patented 1st May, 1855.—Re-issued 11th October, 1859.

"I claim, 1st, the burnishing of silver plated and other metallic ware, such as spoons, knives and forks, or other similar articles which have a concave, convex, or bevel surface, by an organized machine, requiring no other attention than being kept in proper order, adjusted to suit the article about being burnished, set in motion, and having the articles properly introduced to it successively, substantially in the manner herein set forth."

DESIGNS.

ROSWELL KIMBERLY, of Ansonia, Conn., for a "Design for clock case front."

"I claim the semi-octagonal top, in combination with the corner blocks and tips, when the whole is constructed, arranged, and made to present the symmetry of the new design, as herein described and represented."

JAMES H. MCLEAN, of St. Louis, Mo., for a "Design for trade mark."

"I claim the design shown by the annexed drawing, and described herein, to be used as a trademark upon an article of manufacture, with the name thereon inscribed."

ADDITIONAL IMPROVEMENT.

DOUGLAS BLY, of Rochester, N. Y., for an "Improvement in attaching thills to vehicles."—Patented 12th April, 1859.—Additional improvement dated 11th October, 1859.

"I claim, combining with the hook A a coller G, having a reverse hook or lip K, corresponding with the point A, to form an eye therewith, together with the screw shank and binding nut H, substantially as and for the purpose herein specified."

EXTENSION.

LEWIS EDWARDS, of Norwich, Conn., for an improvement in "Ruling machines." — Patented 9th October, 1845.

"I claim, the causing the pens to be raised by the edge of the paper in its passage through the machine, thus causing each sheet to determine the length of its own lines."

LIST OF SPECIFICATIONS, &c. published during the week ending 28th October, 1859.

No.	Price.	SUBJECT-MATTER.
709	11*d.*	Looms for weaving.
726	9*d.*	Apparatus for distributing seeds and manure.
727	10*d.*	Suspension rail or road ways, &c.
728	1*s.* 7*d.*	Valves for steam engines.
733	6*d.*	Manufacture of brushes.
739	10*d.*	Manufacture of paper.
740	10*d.*	Apparatus for operating switches and signals on railways.
741	3*d.*	Apparatus for pressing or moulding bricks, &c.
747	9*d.*	Metallic pistons.
748	7*d.*	Manufacture of boxes or cases for needles, pens, &c.
750	10*d.*	Machinery for corking bottles.
753	10*d.*	Machine for separating oats from chaff.
754	2*s.* 3*d.*	Machinery for obtaining motive power.
755	3*d.*	Telegraphic cables.
759	3*d.*	Railways.
761	1*s.* 9*d.*	Manufacture of small metallic chains.
763	5*d.*	Apparatus for preventing the guttering of candles.
767	7*d.*	Apparatus for superheating steam.
768	1*s.* 9*d.*	Moulding or shaping metals.
771	9*d.*	Machinery for printing woven fabrics.
772	1*s.* 10*d.*	Chimneys or flues.
774	3*d.*	Machinery for drawing fibrous substances.
775	3*d.*	Furnace for re-heating steel.
776	3*d.*	Manufacture of elastic fabrics.
777	3*d.*	Apparatus for maintaining the temperature of oil for tempering steel.
779	5*d.*	Cigars.
780	3*d.*	Embossing or cutting presses.
781	5*d.*	Gas burners.
785	3*d.*	Electric telegraphs.
786	9*d.*	Horse hoes.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 29th October, 1859.

Mornings - - - -	1400
Evenings - - - -	579
Total - - -	1979

Since the opening of the Museum Free Daily (May 12, 1858,)—157,200.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 609. FRIDAY, NOVEMBER 4, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1982. To GILBERT STANTON FLEMING, of 498, New Oxford Street, in the county of Middlesex, for the invention of "Improvements in candles for the purpose of indicating time, and the facility of lighting the same."

On his petition, recorded in the Office of the Commissioners on the 31st day of August, 1859.

2178. To GEORGE ADDENBROOKE, of Greenhill Wimbourn, Wolverhampton, for the invention of "Improvements in raising and lowering boats and other vessels from one water level to another, applicable in inland navigation."

On his petition, recorded in the Office of the Commissioners on the 26th day of September, 1859.

2198. To EDWARD THORNHILL SIMPSON, of Walton, near Wakefield, in the county of York, for the invention of "Improvements in apparatus for condensing distilled fatty matters."

On his petition, recorded in the Office of the Commissioners on the 28th day of September, 1859.

2274. To EDWARD O'CONNELL, of Bury, in the county of Lancaster, Surveyor and Draughtsman, for the invention of "Improvements in apparatus for supplying liquid nourishment to infants, invalids, and others, and for warming or heating the same."

On his petition, recorded in the Office of the Commissioners on the 6th day of October, 1859.

2288. To JOHN DIXON, of the borough and county of Newcastle-upon-Tyne, Engineer, for the invention of "Improvements in apparatus for supplying water to waterclosets."

On his petition, recorded in the Office of the Commissioners on the 7th day of October, 1859.

2302. To GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for the invention of "Improvements in the manufacture of paper pasteboard and cardboard."—A communication from abroad by Messrs. Jules, Lagosse and Sons, Manufacturers, and Frederic Quentin, Merchant, all of Paris, France.

On his petition, recorded in the Office of the Commissioners on the 10th day of October, 1859.

2332. To ABRAHAM HOLDEN, of North End, near Stalybridge, in the county of Chester, Manager, and JAMES HOLDEN, of Micklehurst, in the same county, Madder Dyer, for the invention of "Improvements in machinery used in washing, dyeing, sizing, and drying yarn and thread."

2334. To WILLIAM PROSSER, of 24, Dorset Place, Dorset Square, in the county of Middlesex, Gentleman, for the invention of "Improvements in apparatus employed in the production of light."

2336. And to WILLIAM BURGESS, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Implement Makers, for the invention of "Improvements in reaping and mowing machines."

On their several petitions, recorded in the Office of the Commissioners on the 13th day of October, 1859.

2339. To CHARLES COLLINS, of Lower Road, Islington, in the county of Middlesex, Gentleman, for the invention of "Improvements in the manufacture of grease for lubricating the axles of railway and other carriages, the journals of machinery, and for other like purposes."—A communication from abroad by P. Gailhard Fisse, of Alicante, in the kingdom of Spain.

2342. To JOHN PIERCY HENDERSON, of Summerford House, in the county of Stirling, North Britain, Manufacturing Chemist, for the invention of "Improvements in stopcocks or valves."

2343. To GEORGE PRICE, of Wolverhampton, in the county of Stafford, Fire-proof Safe Manufacturer, for the invention of "Improvements in locks."

2344. To JOHN VARLEY, of Radcliffe, in the county of Lancaster, Engineer, and JEREMIAH CROWTHER, of Bradford, in the county of York, Carrier, for the invention of "Improvements in steam engines and boilers."

2346. To GEORGE GOLDSMITH, of Leicester, Gas Meter Inspector, for the invention of "Improvements in gas meters."

2348. And to HENRY WILLIAM CHAPMAN WISE, of Titchfield, Hampshire, for the invention of "An improved domestic apparatus for making tea, coffee, and other such like beverages."

On their several petitions, recorded in the Office of the Commissioners on the 14th day of October, 1859.

2350. To HENRY CHAPMAN, of Battlebarrow Appleby, in the county of Westmoreland, for the invention of "An improved self-acting safety railway break."

2352. To JAMES FERNIHOUGH, of Dukinfield, in the county of Chester, Engineer, for the invention of "Improvements in the construction of steam boilers and apparatus connected therewith."

2354. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in machinery or apparatus for breaking stones."—A communication from abroad by Monsieur Bac, of Paris, in the empire of France.

2358. To NAPOLEON MONTANARI, of Charles Street, Soho Square, in the county of Middlesex, for the invention of "An improved apparatus for aiding children in learning to walk."

2360. And to JOHN ELDER, of Glasgow, Enginee r for the invention of "Improvements in steam and other engines."

On their several petitions, recorded in the office of the Commissioners on the 15th day of October, 1859.

2362. To WILLIAM KEMBLE HALL, Engineer, of 36, Cannon Street, in the city of London, for the invention of "Improvements in apparatus for manufacturing cotton wadding."—A communication from abroad by John Smith, of New York, in the U.S. of America.

2364. To SAMUEL NEWBERRY, of Burnley, in the county of Lancaster, Manager, and HENRY MOORE, of the same place, Cotton Spinner, for the invention of "Certain improvements in looms for weaving."

2366. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in rotary steam engines."—A communication from abroad by Charles Smith Hathaway, of Athol, Thomas Huston Witherby, and Luke Bucklin Witherby, both of Worcester, and Jonathan Horatio Nelson, of Shrewsbury, all in the county of Worcester, and state of Massachusetts, United States of America.

2368. To WILLIAM NORTON, of Hollybank, in the county of Cavan, Mill Owner and Farmer, for the invention of "Improvements in kilns for drying grain."

2370. To JAMES THOM, Powerloom Manufacturer, and ANGUS KENNEDY, Civil Engineer, both of Glasgow, in the county of Lanark, North Britain, for the invention of "Improvements in looms for weaving."

2372. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in electro-magnetic engines, and in apparatus connected therewith."—A communication from abroad by Messrs. J. S. Rousselot and Company, of Paris.

2374. And to WILLIAM TILLIE, of the city of Londonderry, Manufacturer, for the invention of "Improvements in sewing machines."

On their several petitions, recorded in the Office of the Commissioners on the 17th day of October, 1859.

2378. To ALEXANDER WILLIAM WILLIAMSON, of University College, for the invention of "Improvements in obtaining extracts from poppies."

2380. To JAMES HIGGINS, of Salford, in the county of Lancaster, Machine Maker, and THOMAS SCHOFIELD WHITWORTH, of the same place, Manager, for the invention of "Improvements in machinery or apparatus for preparing and spinning cotton and other fibrous materials."

2382. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in machinery used for preparing for spinning silk, wool, or other fibrous substances."—A communication from abroad by Charles De Jongh, of Guebwiller, in the empire of France.

2384. And to HERMANN HIRSCH, of Berlin, in the kingdom of Prussia, for the invention of "A new propellor for ships."

On their several petitions, recorded in the Office of the Commissioners on the 18th day of October, 1859.

2386. To JOHN HENRY BANKS, of the Mediæval Works, Radnor Street, in the city of Manchester Sculptor, for the invention of "Improvements in machinery for boring, cutting, moulding, and carving wood, stone, and other materials."

2392. To CHARLES SETON, of Edinburgh, in the county of Mid-Lothian, Coach Builder, for the invention of "Improvements applicable to the wheels of carriages generally for the purpose of reducing the draught thereof."

2394. To GEORGE HART, of No. 6, Chapel Street West, May Fair, in the county of Middlesex, for the invention of "Improvements in the manufacture of hats."

2396. And to JOHN BRUCKSHAW, of Longslow, in the county of Salop, and HENRY BRUCKSHAW, of Hinstock, in the same county, Engineers, and WILLIAM SCOTT UNDERHILL, of Newport, in the same county, Manufacturer, for the invention of "Improvements in machinery for elevating grain or other similar substances."

On their several petitions, recorded in the Office of the Commissioners on the 19th day of October, 1859.

2400. To Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "Improvements in machinery or apparatus for compressing and making caps for cartridges."—A communication from abroad by Henri Mennig, Mécanician, residing at Molenbeck St. Jean, Belgium.

2401. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "A cryptographic machine or apparatus for carrying on secret correspondence."—A communication from abroad by Jules François Victor Mouilleron, of Paris.

2402. To Peter Augustin Godefroy, of King's Mead Cottages, New North Road, Islington, in the county of Middlesex, for the invention of "Improvements in the construction of submarine cables."

2403. To François Nivelle, of Paris, in the empire of France, Shoemaker, for the invention of "Improvements in sewing machines."

2404. To James Hodgson, of Liverpool, for the invention of "Improvements in building ships and vessels."

2405. And to Charles Hanson, of Tottenham Court Road, in the county of Middlesex, Gun Manufacturer, for the invention of "Improvements in fire arms and ordnance."

On their several petitions, recorded in the Office of the Commissioners on the 20th day of October, 1859.

2406. To James Musgrave, of the firm of John Musgrave and Sons, of the Globe Iron Works, Bolton-le-Moors, in the county of Lancaster, Engineer, for the invention of "Certain improvements in steam boilers."

2407. To Jonathan Harrington Green, of Christiansberg, in the county of Wapello, and state of Iowa, in the United States of America, for the invention of "A composition for coating metals and other substances for various purposes."

2408. To John Talbot Pitman, of the American and European Patent Offices, No. 67, Gracechurch Street, London, for the invention of "An improved mode of converting cast iron into soft malleable iron without change of form."—A communication from abroad by J. A. K. Eaton, of the city, county, and state of New York, in the United States of America.

2410. To George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, for the invention of "Improvements in apparatus for steering vessels."—A communication from abroad by E. N. Dickerson, of Park Row, New York, United States of America.

2411. To Thomas Symes Prideaux, of Willow House, Hampstead, and 32, Charing Cross, Civil Engineer, for the invention of "Improvements in the construction of ships and rafts."

2412. And to William Maltby, of De Crespigny Park, Camberwell, in the county of Surrey, Gentleman, for the invention of "Improvements in refining oil."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of October, 1859.

2414. To Peter Jones, of the city of Manchester, in the county of Lancaster, Machinist, for the invention of "Improvements in machinery or apparatus for suspending, carrying, and laying down paper, woven fabrics, paper-hangings, and all kinds of flexible materials during and after the process of drying, and also for giving a continuous positive motion to the suspending rods or spindles."

2415. To George Bickerton Mill, of the city of Toronto, Canada West, Plumber, for the invention of "Improvements in pressure regulating apparatus for gas burners."

2416. To William Fox, of Amiens, in the department of the Somme, in the empire of France, Umbrella Frame Manufacturer, and James Willis, of Little Britain, in the city of London, Umbrella Manufacturer, for the invention of "Improvements in the manufacture of umbrellas and parasols, part of which improvements is applicable to other purposes."

2417. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "A method of preparing inoxidizable oils and fats to be employed as lubricating substances."—A communication from abroad by Jules Roth, of Mulhouse, France."

2418. To William Brookes, of 73, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in machinery or apparatus for preparing wool and other fibrous materials."—A communication from abroad by Messrs. Dombret and Dugnolle, of Valenciennes, and Potez Ainé, of St. Mandé, near Paris, in the empire of France.

2419. To Septimus Beardmore, of No. 27, Albion Street, Hyde Park, London, Civil Engineer, for the invention of "Improvements in electric telegraphs."

2420. To William Thorold, of Norwich, Engineer, for the invention of "Improvements in apparatus applied to locomotive engines for condensing steam."

2421. To Julius Dahlke, of Providence Row, Finsbury, in the county of Middlesex, Analytical Chemist, for the invention of "Improvements in the preparation of charcoal, and its application to the purification of water and the preservation of organic matters, and in apparatus connected therewith."

2422. To Francis Wrightson, of Birmingham, in the county of Warwick, Professor of Chemistry, in Sydenham College, Birmingham, for the invention of "Improvements in purifying coal gas, and in utilizing compounds obtained in purifying coal gas."

2423. And to Francis North Clerk, of the firm of Peyton and Clerk, of Birmingham, in the county of Warwick, Edge Tool Manufacturers, and Charles Thomas, of Birmingham aforesaid, Foreman of Works, for the invention of "Improvements in cleavers or choppers."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of October, 1859.

2424. To Andrew Linmere Dowie, of Glasgow, in the county of Lanark, North Britain, Merchant, for the invention of "Improvements in gas burners, and in pressure regulating apparatus for the same."

2425. To GEORGE HOLDEN, of Preston, in the county of Lancaster, Manager, for the invention of "Improvements in machinery for spinning cotton and other fibrous substances."

2427. To AUGUSTE CONSTANTIN BERTRAND, of Paris, in the empire of France, for the invention of "Improvements in the manufacture of herbal cigarrettes."

2428. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in daylight and other reflectors, and in the method of supporting lamp reflectors."—A communication from abroad by Jean Boy, of Paris.

2429. To MATHEW FITZPATRICK, of 29, Boulevart St. Martin, Paris, Civil Engineer, for the invention of "Apparatus to be applied to the prevention of accidents on railways, called 'parachoc.'"

2430. To ROBERT SEAGER, of Peter Street, Ipswich, for the invention of "Improvements in compounds of india rubber and gutta percha."

2431. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in the construction of ships or vessels."—A communication from abroad by Rollin Germain, of the city of Buffalo, United States of America.

2432. And to WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in paddle wheels."—A communication from abroad by Rollin German, of the city of Buffalo, United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 24th day of October, 1859.

2433. To HENRY SHEPHERD ROSSER, of No. 17, Upper Philimore Gardens, Kensington, in the county of Middlesex, for the invention of "Improvements in electric telegraph cables, and in the mode of obtaining signals."

2437. To WILLIAM ANTHONY MATTHEWS, of Sheffield, in the county of York, Steel Manufacturer, for the invention of "Improvements in springs."

2439. To EDWIN ELLIS, of St. Ann's Wells Road, Nottingham, for the invention of "Improvements in the manufacture of lace, and in apparatus employed therein."

2441. And to EDWARD SQUIRE TEBBUTT, of the firm of W. J. Windram and Co., of Leicester, Elastic Webb Manufacturers, for the invention of "An improved manufacture of elastic fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 25th day of October, 1859.

2443. To WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in the preparation and application of baths or bathing media, and in apparatus employed therein."—A communication from abroad by Emile Muller, of Paris, in the empire of France, Civil Engineer.

2445. To JOHN ZUILL KAY, of Dundee, in the county of Forfar, North Britain, Gas Engineer, for the invention of "Improvements in gas meters, and in apparatus for maintaining or preserving the levels of liquids."

2447. To JAMES HENRY PATERSON, of Glasgow, in the county of Lanark, North Britain, Manufacturer, for the invention of "Improvements in shirting cloths and in shirts."

2451. To CHARLES EDMUND WILSON, Manufacturer, and HENRY GEORGE HACKER, Warehouseman, both of Monkwell Street, in the city of London, for the invention of "Improvements in machinery for the manufacture of chenille."

2453. And to TIMOTHY WHITBY, of Millbank Street, Westminster, and WILLIAM DEMPSEY, of Great George Street, Westminster, in the county of Middlesex, Civil Engineers, for the invention of "Improvements in ordnance and fire arms."

On their several petitions, recorded in the Office of the Commissioners on the 26th day of October, 1859.

2455. To CHARLES STEVENS, of No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for the invention of "A machine for scouring and polishing floors and decks of ships."—A communication from abroad by Jean Jacques Monnié, of Paris, in the empire of France.

2457. To EUGÈNE HIPPOLYTE RASCOL, of No. 4, Brydges Street, Covent Garden, in the county of Middlesex, Gentleman, for the invention of "A new implement for cleansing of the plates, dishes, and other table or kitchen utensils."—A communication from Johanna Perry, a person residing abroad, 51, Rue Dareau, Gentilly, near Paris.

2459. To ROWLAND MASON ORDISH, Civil Engineer, of 18, Great George Street, Westminster, in the county of Middlesex, for the invention of "Improvements in railway fastenings."

2461. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in the preparation of red coloring matters or dyes."—A communication from abroad by Messrs. Renard, frères, of Lyons.

2463. And to HENRY COWAN, of Boileau Lodge, Barnes, in the county of Surrey, Esquire, for the invention of "An improvement in waistcoats, and certain other articles of wearing apparel."

On their several petitions, recorded in the office of the Commissioners on the 27th day of October, 1859.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

4th November, 1859.

1039. HENRY COLUMBUS HURRY, of Wolverhampton, in the county of Stafford, Civil Engineer, for an invention of "Improved means of and apparatus for obtaining motive power."—Dated 25th April, 1859.

1122. HENRY TURNER, of Park Street, Mile End, Engineer, for an invention of "Improvements in steam-engines and apparatus connected therewith."—Dated 5th May, 1859.

1131. Henry Reynolds, of Denmark Hill, in the county of Surrey, Gentleman, for an invention of "Improvements in refining sugar and other saccharine substances."—Dated 5th May, 1859.

1132. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in cannon and other fire arms and in projectiles, wads, and cartridges to be used therewith."—A communication from abroad by John Webster Cochran, of New York.—Dated 5th May, 1859.

1137. William Kellingley, of No. 13, Mason Street, New Cross, Surrey, Carriage Builder, for an invention of "Improvements in the mode of lubricating the journals of the axles of locomotive engines, of carriages, and machinery."—Dated 6th May, 1859.

1138. Frederick Angerstein, of Kennington, in the county of Surrey, Esquire, Robert Clegg, of Islington, in the county of Middlesex, Gentleman, and George Thorrington, of Egham, in the said county of Surrey, Lighterman, for an invention of "Improvements in apparatus for obtaining motive power."—Dated 6th May, 1859.

1142. Thomas Jones, of Liverpool, in the county of Lancaster, Slater and Plasterer, for an invention of "An improved apparatus and arrangement of flues for heating and ventilating buildings, ships and other structures, and for causing draughts in chimnies."—Dated 6th May, 1859.

1154. William Edward Gedge, of the firm of John Gedge and Son, No. 4, Wellington Street South, Strand, in the county of Middlesex, Patent Agents, for an invention of "Improvements in the manufacture of steel."—A communication from abroad by Claude Joseph Perinel, of Fourvoiry, departement de l'Isère, in the empire of France, Ironmaster.—Dated 7th May, 1859.

1156. Walter Jeffery, of Eastgate Street, Gloucester, for an invention of "Rendering more convenient out-door manipulations in photography by means of an improved portable photographic tent and tent camera."—Dated 7th May, 1859.

1163. Alexander Morton, of Morton Place, Kilmarnock, county of Ayr, for an invention of "Improvements in means or apparatus, employed in the weaving of figured fabrics."—Dated 9th May, 1859.

1164. Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for an invention of "Improvements in obtaining motive power."—A communication from abroad by Aimé Francois Lapène, of Paris, in the empire of France.—Dated 9th May, 1859.

1165. Thomas Green, junior, of Old Broad Street, in the city of London, for an invention of "Improvements in apparatus applicable to steam boilers to obtain greater security against explosion."—Dated 9th May, 1859.

1169. William Wilkinson and Charles Whitley, of the city of Manchester, in the county of Lancaster, for an invention of "Improvements in buttons and fastenings for garments, harness, and other similar purposes, and in the method of securing the same."—Dated 10th May, 1859.

1170. Moss Defries, of Houndsditch, in the city of London, Manufacturer, for an invention of "Improved apparatus for regulating the pressure of gas."—Dated 10th May, 1859.

1171. John Norman, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in furnaces."—Dated 10th May, 1859.

1172. Robert Thomson, of Glasgow, in the county of Lanark, North Britain, Manager, for an invention of "Improvements in shuttles."—Dated 10th May, 1859.

1173. George Bell, of Wandsworth, in the county of Surrey, Manufacturer, for an invention of "Improvements in matches or fusees."—Dated 10th May, 1859.

1182. Henry Clarke, of Wakefield, in the county of York, Corn Factor, for an invention of "Improvements in balancing millstones to the running as well as the standing state."—A communication from abroad by Thomas Narburgh, of St. Louis, Missouri, North America.—Dated 11th May, 1859.

1187. James Leadbetter, of Leeds, in the county of York, Brazier, and James Rhodes, of Armley, near Leeds, in the same county, Water Rate Collector, for an invention of "Improvements in pumps."—Dated 11th May, 1859.

1190. John Saxby, Engineer, of Brighton, Sussex, for an invention of "Improvements in the mode of securing the rails on railways."—Dated 12th May, 1859.

1191. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E. C., Editor of the Mechanics' Magazine and Patent Agent, for an invention of "Improvements in machinery for solidifying, pressing, and moulding."—A communication from abroad by Felix Dehaynin, residing at Paris.—Dated 12th May, 1859.

1205. Joshua Taylor Beale, of Greenwich, in the county of Kent, Engineer, and Thomas Nesham Kirkham, of Upper Halliford, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in the preparation of colors for dyeing and printing."—Dated 13th May, 1859.

1213. John Chatterton, of 7, Devonshire Street, Islington, in the county of Middlesex, for an invention of "Improvements in covering wires and other metal conductors for telegraphic purposes."—Dated 14th May, 1859.

1229. Robert Romaine, late of Canada West, but now of Chapel Street, Bedford Row, in the county of Middlesex, Gentleman, for an invention of "Improvements in the means of applying steam power to the cultivation of the soil."—Dated 18th May, 1859.

1247. John Henry Johnson, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in the roasting or calcining of ores, applicable also to the oxidising of other substances."—A communication from abroad by Professor Jean François Persoz, of Paris, in the empire of France.—Dated 20th May, 1859.

1259. Eugène Pasquier, Mechanic, residing at Reims, Hinemar prolongée Street, Marne, in the empire of France, for an invention of "Apparatus for drying wool and all filaceous matters."—Dated 23rd May, 1859.

1288. David Simpson Price, of 7, Green Street, Grosvenor Square, in the county of Middlesex, Analytical Chemist, for an invention of "Improvements in the production of colors for dyeing and printing."—Dated 25th May, 1859.

1331. Oliver Maggs, of Bourton, in the county of Dorset, for an invention of "Improvements in harrows."—Dated 30th May, 1859.

1358. William Henry Parkes, of Birmingham, in the county of Warwick, Manufacturer, and William Bagnall, of Birmingham aforesaid, Plater, for an invention of "A new or improved ventilator for hats and other head coverings, and also for carriages."—Dated 2nd June, 1859.

1361. John Wilson, of St. Helens, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in the manufacture of carbonate of soda."—Dated 3rd June, 1859.

1390. Robert Barclay, of Bucklersbury, in the city of London, for an invention of "Improvements in the manufacture of paper from which writing or other inks cannot be expunged or extracted without detection."—Dated 7th June, 1859.

1407. Michael John Haines, of Dursley, in the county of Gloucester, Strap Maker, for an invention of "Improvements in the manufacture of driving straps or bands."—Dated 10th June, 1859.

1501. Charles Clarini, of New York, U. S. A., for an invention of "Making wrought metal nails by machinery."—Dated 22nd June, 1859.

1748. Alfred Sidebottom, of Crown Street, Camberwell, in the county of Surrey, Consulting Chemist, for an invention of "Improvements in the mode or process of separating animal fibre from mixed fabrics of animal fibre and cotton or other vegetable fibre."—Dated 28th July, 1859.

1759. James Wright, of 42, Bridge Street, Blackfriars, city of London, Civil Engineer, for an invention of "An improved method of raising or drawing up the skirts of gowns or dresses."—A communication from abroad by M. Bresson, of Paris, in the French empire, Civil Engineer.——Dated 29th July, 1859.

1972. George Collier, of 23, Elizabeth Street, Eaton Square, in the county of Middlesex, for an invention of "Improvements in chairs and couches."—Dated 30th August, 1859.

1990. Edwin Ellis, of St. Ann's Well Road, Nottingham, for an invention of "Improvements in finishing silk fabrics made on bobbin net and warp frames."—Dated 31st August, 1859.

2081. Henry George Collins, of McLean's Buildings, New Street Square, in the city of London, for an invention of "Improvements in producing printing surfaces on stone, metal, and other materials capable of being employed in printing in the manner of lithographic stones, also in the production of printing plates and surface printing blocks, and in transfer inks."—Dated 12th September, 1859.

2131. Peter Fairbairn, of Leeds, in the county of York, Knight, for an invention of "Improved machinery for finishing the teeth of spur and other gearing."—Dated 19th September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 2nd November, 1859, inclusive.*)

31st October.

2576. Samuel Tearne, Japanner, of Birmingham, in the county of Warwick, and George William Richmond, Artist, also of Birmingham, in the same county, for an invention of "Certain improvements in producing ornamental designs on the surfaces of fancy and other goods made of papier mâché, wood, glass, china, earthenware, tin, iron, or other such like materials, the surfaces of which when made up are usually finished by staining, varnishing, painting, or japanning."—Dated 3rd November, 1856.

1st November.

2577. James Nasmyth and Robert Wilson, both of Patricroft, near the city of Manchester, Engineers, for an invention of "Improvements in hydraulic pumps and presses for packing cotton and other articles of the like nature."—Dated 3rd November, 1856.

2605. William Seed, of Preston, in the county of Lancaster, Spindle and Flyer Maker, and William Ryder, of Bolton-le-Moors, in the county of Lancaster, Spindle and Flyer Maker, for an invention of "Improvements in certain parts of machinery for slubbing and roving cotton and other fibrous materials."—Dated 5th November, 1856.

2nd November.

2585. Henry Bessemer, of Queen Street Place, New Cannon Street, in the city of London, for an invention of "Improvements in the manufacture of rails or railway bars and axles."—Dated 4th November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 2nd November, 1859, inclusive.*)

31st October.

683. Jean Jacques Ziegler, of Guebwiller, in the department du Haut Rhin, in the Republic of France, Engineer, for an invention of "Certain improvements in machinery for preparing to be spun, cotton, wool, silk, silk-waste, flax, tow, and other fibrous substances."—Dated 9th November, 1852.

1st November.

590. William Petrie, of Woolwich, in the county of Kent, Civil Engineer, for an invention of "Improvements in the manufacture of sulphuric acid."—Dated 1st November, 1852.

2nd November.

624. Edward Lord, of Todmorden, in the county of York, Machine Maker, for an invention of "Improvements in certain machinery to be used in preparing, spinning, and weaving cotton and other fibrous substances."—Dated 3rd November, 1852.

FOREIGN PATENTS.

AUSTRIA.*

List of Patents which were Delivered, Prolonged, or became Void during the Month of August, 1859.†

(*Communicated by the Austrian Government.*)

1. Patents Delivered.

1. Sigmund Roth, of Pesth, for "Improvements in gilding." — 1 year. — (Secret.) — Dated 7th August, 1859.

2. Johann Zizula, of Vienna, for "Improved cushions of billiard tables with double helical springs."—1 year.—(Secret.)—Dated 7th August, 1859.

3. Eduard Schmidt, of Vienna, for "A machine for spooling thread."—3 years.—(Secret.)—Dated 9th August, 1859.

4. Ludwig von Kosztka, of Vessprim, Hungary, for "An apparatus for catching flies."—1 year.—(Public.)—Dated 10th August, 1859.

5. Ignaz Pfliger, of Vienna, for "A peculiar apparatus for loading railway carriages with coal."—1 year.—(Public.)—Dated 10th August, 1859.

6. Moriz Goldmann, of Vienna, for "Manufacturing meerschaum pipes from the waste of meerschaum."—1 year.—(Secret.)—Dated 10th August, 1859.

7. Johann Julius Wilhelm Spindler, of Berlin, represented by Georg Märkl, Vienna, for "Manufacture and use of a peculiar red dye substance, called 'fuchsine.'"—1 year.—(Secret.)—Dated 11th August, 1859.

8. Hermann Kohn, of Pesth, for "Impervious linings of hats."—1 year.—(Secret.)—Dated 11th August, 1859.

9. C. J. Loicq, of Charleroi, Belgium, represented by Alfred Lenz, Vienna, for "Improvements in railway crossings, whereby single parts may be easily exchanged."—1 year.—(Public.)—Dated 11th August, 1859.—(Belgian Patent, 22nd January, 1858.)

10. Carl von Hauer and Ferdinand Lehner, of Vienna, for "Obtaining watery solutions of chemically pure carbonate of protoxide of iron, unmixed or containing other salts."—1 year.—(Secret.)—Dated 11th August, 1859.

11. Carl Pfraumer, of Reichraming, Upper Austria for "A peculiar flux for the manufacture of cast steel, whereby a greater quantity of pig iron may be employed."—2 years.—(Secret.)—Dated 11th August, 1859.

12. E. C. Stiles, of Vienna, for "A peculiar apparatus for heating apartments."—1 year.—(Secret.)—Dated 12th August, 1859.

13. Johann Kessler, of Pardubitz, for "Improvements in railway-breaks."—1 year.—(Public.)—Dated 12th August, 1859.

14. Eduard Sedlaczek, of Vienna, for "Obtaining a saving in galvanic batteries of telegraph stations."—1 year.—(Secret.)—Dated 12th August, 1859.

15. Hermann Heinrich Frickenhaus, of Mannheim, represented by Dr. Joseph Neumann, Vienna, for "Applying manganese or super-oxide of manganese to the manufacture of sugar, whereby a better separation of the raw beetroot juice is obtained."—3 years.—(Public.)—Dated 12th August, 1859.

16. Franz Julius Schnecberger, of Vienna, for "A so-called 'gravitation machine,' being a substitute for steam engines."—5 years.—(Secret.)—Dated 14th August, 1859.

17. Anton Watzak, of Stein, for "A peculiar powder for cleaning metal."—1 year.—(Secret.)—Dated 14th August, 1859.

18. Markus Schwartz, of Pesth, for "A peculiar method of preventing all kinds of clocks from becoming rusty."—1 year.—(Secret.)—Dated 14th August, 1859.

19. Weston Grimshaw, of Bowden, England, represented by Friedrich Paget, Vienna, for "Improvements in machines for the manufacture of bricks, tiles, and similar articles, and in the treatment of the earth used thereat."—3 years.—(Public.)—Dated 15th August, 1859.

20. Sophie Paul, of Theresienfeld, Lower Austria, for "Improvements in the manufacture of socks of wool, linen, and cotton."—1 year.—(Public.)—Dated 15th August, 1859.

21. Johann Felix Miguel, of Paris, represented by Georg Märkl, Vienna, for "A peculiar truss."—1 year.—(Public.)—Dated 15th August, 1859.

22. Joseph Seitz, of Vienna, for "Cutting dresses by machinery."—1 year.—(Secret.)—Dated 16th August, 1859.

23. H. W. Jentsch, of Untermeidling, Theodro Hoffmann and Franz Podany, Vienna, for "Improvements in enamelling kitchen vessels of sheet iron and iron, and also ovens."—3 years.—(Secret.)—Dated 20th August, 1859.

24. Felix Alexander Testud de Beauregard, of Paris, represented by Georg Märkl, Vienna, for "A peculiar spheroidical steam generator."—1 year.—(Public.)—Dated 20th August, 1859.

25. Heinrich Seymour Lansing, of New York, represented by Friedric Paget, Vienna, for "Improvements in revolvers."—3 years.—(Public.)—Dated 25th August, 1859.

* For the Austrian Patent Law, see No. 291 of this Journal.

† In the case of inventions patented in other states as well as in Austria, the Specifications (whether described as "public" or not) may in most cases be consulted, or translations of them be had at the Library of the Commissioners' Office.

2. Patents Prolonged.

1. Albert Pucher, for "A new kind of bricks, called 'tetrahedron bricks.'"—2nd year.—(Public.) —Dated 12th July, 1858.

2. Georg von Haanen, for "Giving paper, wood, metal, and other substances the appearance of tortoise shell, polished stone, or wood."—8th year. —(Secret.)—Dated 23rd July, 1852.

3. Wilhelm Rampach, for "Improvements in the manufacture of cast and pressed silver articles."— 8th year.—(Secret.)—Dated 28th July, 1852.

4. Thonet Brothers, for "Giving wood any curvature and form by means of cutting and glueing the same."—8th year.—(Secret.)—Dated 28th July, 1852.

5. Felicitas Hager, for "Animal strengthening pomatum."—6th year.—(Secret.)—Dated 10th August, 1854.

6. Felicitas Hager, for "A cosmetic."—5th year. —(Secret.)—Dated 4th August, 1855.

7. Wendelin Mottl, for "A reducing machine for tailors for applying the centimetre."—3rd year. —(Public.)—Dated 18th August, 1857.

8. Michael Ronsperger, (Joachim Bachrich, assignee,) for "Improvements in spring petticoats." —2nd year.—(Public.)—Dated 1st August, 1858.

9. Bernhard Kastriner, (Moriz Dirnfeld, assignee,) for "Dresses which may be widened and straightened."—3rd year.—(Secret.)—Dated 3rd August, 1857.

10. Leopold Munding, for "An hydraulic motor." —6th year.—(Public.)—Dated 29th July, 1854.

11. Joseph Berger, for "Preventing spirituous beverages from becoming sour."—2nd year.— (Secret.)—Dated 16th August, 1858.

12. Mathias Burger, (Friedrich Paget, assignee,) for "Improvements in the patent cement oil colours."—8th year.—(Secret.)—Dated 4th August, 1852.

13. Marcus Lippmann, for "A composition of tin for dyeing wool."—2nd year.—(Secret.)—Dated 17th August, 1857.

14. Joseph Leon Pomme de Mirimonde, for "Axle boxes of railway and other carriages."— 3rd year.—(Public.)—Dated 2nd September, 1857.

15. G. Pfannkuche and C. Scheidler, for "Improvements in fireproof iron safes and chests."— 2nd year.—(Public.)—Dated 1st August, 1858.

16. Thonet Brothers, for "Manufacture of chairs, arm-chairs, sofas, and feet of tables from wood bent by means of steam or boiling liquids.—4th to 6th years.—(Secret.)—Dated 10th July, 1856.

17. Joseph Hermann, for "A new mode of printing calico and shawls."—4th year.—(Public.)— Dated 2nd August, 1856.

18. Johann Desmarest, for "Improvements in the manufacture of nails."—3rd to 4th years.— —(Secret.)—Dated 28th August, 1857.

19. Georg Gleischner, for "Improvements in scissors for cutting vines."—2nd year.—(Secret.) —Dated 14th August, 1858.

20. Bernard von Morell, for "Peculiar docks." —4th year.—(Secret.)—Dated 20th September, 1856.

21. Peter Pfeffermann, for "Tooth powder."— 2nd year.—(Public.)—Dated 7th October, 1858.

22. David Chlodroig Knab, for "Improvements in distilling coal, brown coal, turf, &c."—2nd year. —(Public.)—Dated 7th October, 1858.

23. Alfred Fauvin Jaloureau, for "A peculiar process for the manufacture of waterproof and air-tight pipes for the conveyance of gas, water, and subterraneous telegraphs."—2nd year.—(Public.)—Dated 8th November, 1858.

24. Carl Theodor Launay and Julius Chopin, for "An apparatus for preserving the lighting power of gas."—4th year.—(Secret.)—Dated 13th October, 1856.

25. Jacob Franz Heinrich Hemberger (Johann Wethered, assignee,) for "Improvements in increasing the expansion of steam at a fixed ratio, by superheating."—6th to 10th years.—(Public.)— Dated 7th March, 1854.

26. Joseph Cavalli, for "Presses for obtaining initials, stars, laces, and similar articles of cloth, &c."—7th year.—(Public.)—Dated 3rd August, 1853.

27. Wilhelm Bernhuber, for "Applying the principle of the expeditious manufacture of vinegar to the manufacture of ammonia and ammonia salts."—4th year.—(Secret.)—Dated 7th August, 1856.

28. Julius Offermann, for "Improvements in his Patent means of preventing and removing the incrustation of boilers."—2nd year.—(Secret.)— Dated 8th August, 1858.

29. August Sonntag, for "Improvements in fluid lamps."—3rd year.—(Secret.)—Dated 12th August, 1857.

30. Alfred Ludwig Stanislaus Chenot, for "Apparatus for compressing spungy metal, pulverized ores, and the chemical agents acting on the same."—3rd year.—(Public.)—Dated 17th August, 1857.

31. Anton Fuchs, (Josepha Berger, assignee,) for "Improvements in the construction of kitchen vessels."—2nd year.—(Secret.)—Dated 16th August, 1858.

32. Leopold Fried, for "Improvements in removing the fusel from spirits of wine."—2nd year. —(Secret.)—Dated 20th August, 1858.

33. Wilhelm Goldner, for "Improvements in the manufacture of men's dresses."—2nd year.— (Secret.)—Dated 24th September, 1858.

34. August Ferdinand Sicker, for "A peculiar construction of power looms."—2nd year.—(Secret.)—Dated 22nd November, 1858.

35. Joseph Pankl and Franz Herold, for "A machine for printing cloth with a peculiar carriage and self-revolving frame."—2nd year.—(Secret.)— Dated 14th August, 1858.

36. Joseph Schröfle, for "Improvements in the manufacture of waterproof ventilating woollen fabrics."—2nd year.—(Secret.)—Dated 10th August, 1858.

3. Patents which have become Void.*

1. Leopold Hahn, for "Improvements in the manufacture of the vamps of half-boots."—Dated 4th November, 1851; disclaimed 25th May, 1859.

2. Isaak Wittmann, for "A lye for bleaching woollen fabrics previous to printing, by a cold process, and for washing linen."—Dated 9th March, 1855; expired 9th March, 1859.

3. Johann Lages, for "Improvements in the manufacture of portable iron and clay kitchen ranges."—Dated 12th June, 1855; expired 12th June, 1859.

4. Wilhelm Kraft, for "A calculation slide for converting Austrian moneys."—Dated 22nd November, 1858; disclaimed 8th July, 1859.

5. Dr. Franz Spitaler, for "Improvements in vinegar vats." — Dated 22nd February, 1849; expired 22nd February, 1859.

6. Joseph Adolph Grünwald and Ludwig Seyss, for "Improvements in looms." — Dated 4th July, 1852; expired 4th July, 1859.

7. Joseph Klemm and Simon Marth, for "Apparatus for the conversion of moneys."—Dated 10th December, 1858; disclaimed 30th May, 1859.

8. Friedrich Max Bode, for "A puzzle-lock, which cannot be picked."—Dated 8th July, 1858; disclaimer 22nd July, 1859.

9. Georg Märkl, for "Improvements in the manufacture of terrestrial and celestial globes."—Dated 3rd December, 1856; disclaimed 18th July, 1859.

10. Edward Steiner, for "A set of jewels which may be changed."—Dated 18th Decembed, 1858; disclaimer 18th December, 1859.

11. Eduard Steiner, for "Moveable brilliant jewels of gold, silver, bronze, or steel."—Dated 20th December, 1858; disclaimed 23rd July, 1859.

12. Andreas Link, for "Nut pomatum."—Dated 22nd May, 1851; expired 22nd May, 1859.

13. Ignaz Stelzig, for "An apparatus for replacing horse-shoes when lost."—Dated 29th May, 1857; expired 29th May, 1859.

14. Luigi Cavezzali, for "Obtaining silk by chemical means, without employing silk worms." — Dated 1st February, 1854; expired 1st February, 1859.

15. Maruti Brothers, for "A process for measuring the fineness of silk threads by means of a scale."—Dated 18th February, 1854; expired 18th February, 1859.

16. Joseph Lovati, for "A new mechanism and process for preparing silk-waste, so as to be converted into skeins on common cards."—Dated 20th February, 1855; expired 20th February, 1859.

17. Joseph Freund, for "An apparatus for widening and straightening stays and dresses by mere pressure and pulling." — Dated 20th February, 1855; expired 20th February, 1859.

18. Ladislaus von Ohlah, for "Iron roofings covered with iron, zinc, or copper."—Dated 14th February, 1856; expired 14th February, 1859.

19. Franz Kaufmann, for "Improvements in the manufacture of pine-gas."—Dated 17th February, 1856; expired 17th February, 1859.

20. Joseph Pinet, for "A peculiar horse gin."—Dated 17th February, 1856; expired 25th February, 1859.

21. Thomas Patzal, for "Improvements in dioptrical stereoscopes."—Dated 25th February, 1856; expired 25th February, 1859.

22. Carl Abegg, for "Improvements in spooling yarns by means of flyers."—Dated 26th February, 1856; expired 26th February, 1859.

23. Dr. Franz Drinkwalder and Johann Kensch, for "Improvements in hoes for cultivating vineyards."—Dated 27th February, 1856; expired 27th February, 1859.

24. Philipp Granichstädten, for "Impermeable hats."—Dated 27th February, 1854; expired 27th February, 1859.

25. Anton Patzelt, for "So-called 'helical stoves.'"—Dated 6th February, 1857; expired 6th February, 1859.

26. Eugen de Varroc, for "A process for foliating and coating glass, and for obtaining reflectors."—Dated 6th February, 1857; expired 6th February 1859.

27. Christoph Ressig, for "Improvements in the manufacture of hydraulic cement which may be polished."—Dated 8th February, 1857; expired 8th February, 1859.

28. Carl Janig, for "Improvements in machines for making hooks."—Dated 10th February, 1857; expired 10th February, 1859.

29. Eduard Albert, for "Obtaining felt from vegetable substances partly or entirely."—Dated 15th February, 1857; expired 15th February, 1859.

30. Clodwig Porta, for "A peculiar machine for driving in piles."—Dated 20th February, 1857; expired 20th February, 1859.

31. Carl Hanseli, for "Improvements in his patent machines for cutting the wood for matches." —Dated 18th February, 1857; expired 18th February, 1859.

32. Johann Schuberth, for "A new kind of bullen nails, coated or uncoated, for upholsterers, saddlers, &c."—Dated 3rd February, 1858; expired 3rd February, 1859.

33. Joseph Pizzocheri, for "An apparatus applicable to all clocks for ascertaining the right time, even after having made a mistake in counting the number of strokes or beats."—Dated 3rd February, 1858; expired 3rd February, 1859.

34. Hermann Berger, for "Artificial press yeast made independently from breweries and distilleries." —Dated 8th February, 1858; expired 8th February, 1859.

35. Franz Hittich, for "Making furniture from curved hoop iron."—Dated 18th February, 1858; expired 18th February, 1859.

* The Specifications of these Patents may be consulted in the original language, or translations be had at the Public Free Library.

36. Gustav Alexander Fischel, for "Preparing rape oil for lubricating purposes, so as to become a substitute for salad oil."—Dated 22nd February, 1858; expired 22nd February, 1859.

37. Gustav Hennoch, for "Improvements in miners' safety lamps."—Dated 24th February, 1858; expired 24th February, 1859.

38. Julius Viault, for "Self-acting signal discs for preventing railway collisions."—Dated 24th February, 1858; expired 24th February, 1859.

39. Ferdinand Danbrawa, for "A so-called self-acting apparatus for obtaining purified or dry gas to any amount, and apparatus for conveying gases into vessels without allowing them to flow back."—Dated 24th February, 1858; expired 24th February, 1859.

40. Albert Friedrich Riedl, for "Printing a mordant on glass for transparent colours and coatings."—Dated 24th February, 1858; expired 24th February, 1859.

41. Hyacinth Potez, for "A powder for preventing and removing the incrustation of locomotive and other steam pipes."—Dated 27th February, 1858; expired 27th February, 1859.

42. Wilhelm Skallitzky, for "Manufacture of prismatic letters, cyphers, symbols, and medals."—Dated 24th March, 1846; expired 24th March, 1859.

43. Pick Brothers, for "Improvements in the manufacture of oil."—Dated 24th March, 1846; expired 24th March, 1859.

44. Johann Keusch, for "Scissors for cutting vines."—Dated 18th March, 1850; expired 18th March, 1859.

45. Franz Xaver Kukla, for "Preventing bank notes, bills, &c. from being imitated by means of chemical and physical processes."—Dated 30th March, 1851; expired 30th March, 1859.

46. William Crosskill, for "Improvements in the construction of clod crushers."—Dated 30th March, 1851; expired 30th March, 1859.

47. Schlegel and Co., for "Winding off silk cocoons by means of circulating hot water, and beaters heated by steam."—Dated 16th March, 1852; expired 16th March, 1859.

48. Wenzel Schwarz, for "Improvements in his pomatum as patented 3rd September, 1841."—Dated 29th March, 1852; expired 29th March, 1859.

49. Frederic William Mowbray, for "Improvements in looms."—Dated 27th March, 1856; expired 27th March, 1859.

50. Eduard Müller and Carl Demuth, for "Improvements in machines used in the manufacture of gas."—Dated 12th May, 1856; expired 12th May, 1859.

51. Adolph Pulzer, for "Artificial square stones made of bricks and a peculiar mode of applying the same to constructions."—Dated 14th July, 1858; expired 14th July, 1859.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset, Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of severa new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated* 16*th March* 1744.) Price

---

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

A Free Library and Reading Room, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

Note.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).

Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.

Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 8*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

(*Registered for transmission abroad.*)

No. 610. TUESDAY, NOVEMBER 8, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1528. JOHN ROBERTS, of Upnor, in the county of Kent, Terra Cotta Manufacturer, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in filters."

As set forth in his petition, recorded in the said office on the 25th day of June, 1859.

1533. And GEORGE WRIGLEY, of the firm of Messieurs Cryer, Lees, and Company, of Dukinfield, in the county of Chester, Machine Makers, and THOMAS HIRAM WRIGLEY, of Mossley, in the county of York, Overlooker, have given the like notice in respect of the invention of "Improvements in self-acting mules for spinning and doubling."

As set forth in their petition, recorded in the said office on the 27th day of June, 1859.

1543. And GEORGE HALL, jr., of Montrose, in the county of Forfar, North Britain, Farmer, has given the like notice in respect of the invention of "Improvements in reaping machines."

1545. And WILLIAM WRAY and JOHN WRAY, both of Leeming, near Beedale, Yorkshire, have given the like notice in respect of the invention of "Certain improvements in reaping machines."

1546. And THOMAS WIGHT, of Middlesborough-on-Tees, in the county of York, Foundry Manager, has given the like notice in respect of the invention of "Improvements in the apparatus used in the manufacture of cast metal pipes and castings, termed core bars, or spindles and chaplets."

As set forth in their respective petitions, all recorded in the said office on the 29th day of June, 1859.

1553. And EDWARD FRANCIS, of Wrexham, in the county of Denbigh, Grocer, has given the like notice in respect of the invention of "Apparatus for facilitating the 'making up' or packing of sugar and other articles of grocery and other substances."

1558. And LOUIS BOIGEOL, of Giromagny, near Belfors, town in the French empire, Manufacturer, has given the like notice in respect of the invention of "Improved machinery for winding and twisting fibrous materials."

As set forth in their respective petitions, both recorded in the said office on the 30th day of June, 1859.

1579. And ROBERT WHITESIDE MORVILLE, of Pendleton, Salford, in the county of Lancaster, late of the United States, Engraver, has given the like notice in respect of the invention of "Improvements in mechanism or arrangements for suspending and securing window sashes."—A communication from abroad, by Porter A. Gladwin, of Pawtucket, Rhode Island, United States.

As set forth in his petition, recorded in the said office on the 2nd day of July, 1859.

1589. And HENRY CHARLES HOWELLS, of 120, Duane Street, New York, in the state of New York, and JOSEPH CHARLES HOWELLS, of Madison, in the state of Wisconsin, both in the United States of America, have given the like notice in respect of the invention of "Improvements in the mode of registering the number of persons entering or leaving public conveyances or places of public resort, and of determining the value of the entry or fare."

As set forth in their petition, recorded in the said office on the 4th day of July, 1859.

1593. And JAMES MCINTOSH, of Glasgow, in the county of Lanark, North Britain, Tanner and Currier, has given the like notice in respect of the invention of "Improvements in the manufacture of leather driving belts."

1596. And ARSÈNE BEAULIEU, of 25, Rue du Chemin de Fer, Porte de Cologne, Brussels, in the

kingdom of Belgium, Mechanical Engineer, has given the like notice in respect of the invention of "Improvements in crinolines, and in machinery for manufacturing springs for such and other purposes."—A communication from abroad by Henri Theodore Van Eycken, a person resident at Rue Terre-Neuve, No. 25, Brussels.

As set forth in their respective petitions, both recorded in the said office on the 5th day of July, 1859.

1607. And Louis Schwartzkopff, of Berlin, and Ferdinand Carl Philippson, of Dusseldorf, have given the like notice in respect of the invention of "Improvements in steam hammers and in machines for cutting files, and for planing and grooving iron, stone, and other substances."

As set forth in their petition, recorded in the said office on the 6th day of July, 1859.

1612. And François Alexandre Le Mat, of New Orleans, in the state of Louisiana, in the United States of America, Colonel Aide-de-Camp, has given the like notice in respect of the invention of "Improvements applicable to ordnance."

1614. And Richard Christopher Rapier, of Newcastle-upon-Tyne, in the county of Northumberland, Engineer, has given the like notice in respect of the invention of "Improvements in working rolls for rolling plates of unequal thicknesses."

1618. And John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in knitting frames."—A communication from abroad by Jules Nicholas Poivret, of Troyes, France, Mechanician.

As set forth in their respective petitions, all recorded in the said office on the 7th day of July, 1859.

1620. And William Henry Dawes, of Bromford Iron Works, West Bromwich, in the county of Stafford, Iron Master, has given the like notice in respect of the invention of "An improvement or improvements in the manufacture of iron."

1622. And François Alexandre Le Mat, of New Orleans, in the state of Louisiana, in the United States of America, Colonel Aide-de-Camp, has given the like notice in respect of the invention of "Improvements in the construction of revolving or repeating fire-arms."

As set forth in their respective petitions, both recorded in the said office on the 8th day of July, 1859.

1636. And Michael Henry, of No. 84, Fleet Street, in the city of London, Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of overshoes and other articles worn on the feet, and in the apparatus employed therein."—A communication from abroad by Louis Alfred d'Hennin, Mathilde Catherine Georgette Ponceot, and Caliste Bloisbluche, all of Paris, in the French empire.

As set forth in his petition, recorded in the said office on the 9th day of July, 1859.

1660. And William Cotton, of Loughborough, in the county of Leicester, Manufacturer, has given the like notice in respect of the invention of "Improvements in means or apparatus for connecting together or uniting looped fabrics."

As set forth in his petition, recorded in the said office on the 13th day of July, 1859.

1664. And Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, has given the like notice in respect of the invention of "Improvements in the manufacture of shot and shell and other projectiles."

1665. And Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, has given the like notice in respect of the invention of "A new or improved manufacture of certain metallic compounds or alloys."

As set forth in his respective petitions, both recorded in the said office on the 14th day of July, 1859.

1674. And Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, has given the like notice in respect of the invention of "New or improved methods of manufacturing a certain metallic compound or alloy."

As set forth in his petition, recorded in the said office on the 15th day of July, 1859.

1707. And the Right Honourable James Earl of Caithness, of Hill Street, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the permanent way of railways."

As set forth in his petition, recorded in the said office on the 20th day of July, 1859.

1747. And Edward Hunt and Henry Davis Pochin, both of Salford, in the county of Lancaster, Chemists, have given the like notice in respect of the invention of "Improved resin and resinous substances."

As set forth in their petition, recorded in the said office on the 28th day of July, 1859.

2069. And Edward Jones Mallett, of the city of New York, but now Commercial Agent of the United States, at Florence, in Italy, has given the like notice in respect of the invention of "Improvements in axles."

As set forth in his petition, recorded in the said office on the 10th day of September, 1859.

2152. And Robert Davison, of London Street, in the city of London, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the construction of holders for containing liquid or air, and other aeriform fluids, especially adapted for use in refrigerators."

As set forth in his petition, recorded in the said office on the 21st day of September, 1859.

2176. And Richard Kay, of Busby, in the county of Renfrew, North Britain, Bleacher, has given the like notice in respect of the invention of "Improvements in preparing and bleaching textile fabrics and materials, and in the machinery or apparatus employed therein."

As set forth in his petition, recorded in the said office on the 26th day of September, 1859.

2181. And William Airey, of Brighouse, in the county of York, and James Clayton, of Golcar, in the same county, have given the like notice in

respect of the invention of "Improvements in machinery or apparatus for preparing silk, wool, cotton, flax, or other fibrous substances, for spinning."
As set forth in their petition, recorded in the said office on the 27th day of September, 1859.

2251. And JOHN THOMPSON, of Witton, near Northwich, Cheshire, and JOHN THOMPSON, the younger, of Castle, Northwich, aforesaid, have given the like notice in respect of the invention of "The manufacture of salt by an improved and more economical mode."

2263. And WILLIAM EDWARD NEWTON, of the Office of Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in revolving fire-arms."—A communication from abroad by Messrs. Perrin and Delmas, of Paris, in the empire of France.
As set forth in their respective petitions, both recorded in the said office on the 5th day of October, 1859.

2314. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "An improved mode of clarifying and defecating saccharine solutions and juices."—A communication from abroad by Horatio Nelson Tryatt, of New York, in the United States of America.
As set forth in his petition, recorded in the said office on the 11th day of October, 1859.

2318 And WILLIAM DAY, Builder, of Burton Latimer, near Wellingborough, in the county of Northampton, has given the like notice in respect of the invention of "A direct-action rotary steam engine."

2323. And THOMAS ROTHWELL, of Manchester, in the county of Lancaster, Contractor, has given the like notice in respect of the invention of "Improvements applicable to warehouses and other buildings in which 'well-holes' are constructed for the purposes of light and ventilation."
As set forth in their respective petitions, both recorded in the said office on the 12th day of October, 1859.

2343. And GEORGE PRICE, of Wolverhampton, in the county of Stafford, Fire-proof Safe Manufacturer, has given the like notice in respect of the invention of "Improvements in locks."
As set forth in his petition, recorded in the said office on the 14th day of October, 1859.

2362. And WILLIAM KEMBLE HALL, Engineer, of 36, Cannon Street, in the city of London, has given the like notice in respect of the invention of "Improvements in apparatus for manufacturing cotton wadding."—A communi ation from abroad by John Smith, of New York, in the U. S. of America.
As set forth in his petition, recorded in the said office on the 17th day of October, 1859.

2411. And THOMAS SYMES PRIDEAUX, of Willow House, Hampstead, and 32, Charing Cross, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the construction of ships and rafts."
As set forth in his petition, recorded in the said office on the 21st day of October, 1859.

2419. And SEPTIMUS BEARDMORE, of No. 27, Albion Street, Hyde Park, London, Civil Engineer, has given the like notice in respect of the invention of "Improvements in electric telegraphs."
As set forth in his petition, recorded in the said office on the 22nd day of October, 1859.

2441. And EDWARD SQUIRE TEBBUTT, of the firm of W. J. Windram and Co., of Leicester, Elastic Webb Manufacturers, has given the like notice in respect of the invention of "An improved manufacture of elastic fabrics."
As set forth in his petition, recorded in the said office on the 25th day of October, 1859.

2445. And JOHN ZUILL KAY, of Dundee, in the county of Forfar, North Britain, Gas Engineer, has given the like notice in respect of the invention of "Improvements in gas meters, and in apparatus for maintaining or preserving the levels of liquids."
As set forth in his petition, recorded in the said office on the 26th day of October, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

8th November, 1859.

1196. THOMAS SCOTT, of Rouen, in the empire of France, Engineer, for an invention of "An improved surface condenser and refrigerator."—Dated 13th May, 1859.

1200. ROBERT GOURLAY, of the firm of Alston and Gourlay, of Glasgow, in the county of Lanark, North Britain, Ironfounders, for an invention of "Improvements in making moulds for casting."——Dated 13th May, 1859.

1207. JOHN MAY MUNRO, of the city and county of Bristol, Agricultural Machine and Implement Manufacturer, for an invention of "Improvements in the manufacture and arrangements of chain harrows."—Dated 14th May, 1859.

1208. MATTHEW LEAHY, of 53, Hereford Road, Westbourne Park, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in apparatus for facilitating the draught of carriages."—Dated 14th May, 1859.

1296. JAMES HOWARD, of Bedford, Agricultural Implement Maker, for an invention of "An improved construction of horse-rake."—Dated 25th May, 1859.

1306. John Draper, of 5, Little Tower Street, in the city of London, for an invention of "Improvements in applying indices to account and other books."—Dated 26th May, 1859.

1374. Richard Chrimes, of Rotherham, in the county of York, Brass and Ironfounder, for an invention of "Improvements in apparatus for supplying water to and discharging the contents from urinals, wash hand basins, and other similar articles."—Dated 4th June, 1859.

1569. Nesserwanjee Ardaseer, British Subject of Bombay, East Indies, for an invention of "An improved method of making steam boilers."—Dated 1st July, 1859.

1640. William MacKean, of Paisley, in the county of Renfrew, Scotland, Starch Manufacturer, for an invention of "Improvements in the manufacture or treatment of farinaceous matters for the obtainment of starch and food."—Dated 9th July, 1859.

1645. Henry Davies, of No. 13, Leicester Buildings, in King Street, Liverpool, in the county of Lancaster, for an invention of "Improvements in the manufacture of soap."—Dated 11th July, 1859.

1915. William Aristides Vérel, of Macduff, in the county of Banff, Merchant, for an invention of "Improvements in the preparation of bones for manure."—Dated 22nd August, 1859.

2080. Josiah Mason, of Birmingham, for an invention of "An improvement in boxes or cases and cards to contain or hold pens."—Dated 12th September, 1859.

2089. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improved apparatus for drying paper and other fabrics."—A communication from abroad by Edward L. Perkins, of Roxbury, in the county of Norfolk, and state of Massachusetts, United States of America.—Dated 13th September, 1859.

2109. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in machinery for forming hat bodies."—A communication from abroad by H. A. Burr, of New York.—Dated 16th September, 1859.

2111. Henry Jackson, of Oak Works, Oak Lane, Limehouse, for an invention of "Improvements in fire bars."—Dated 16th September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 5th November*, 1859, *inclusive.*)

3rd November.

2824. Charles William Siemens, of John Street, Adelphi, in the county of Middlesex, for an invention of "Improvements in fluid meters."—Dated 29th November, 1856.

4th November.

2593. William Weild, of the city of Manchester, in the county of Lancaster, Machinist, for an invention of "Improvements in velvet or cut pile fabrics, and in looms or machinery used for weaving such velvet and other loop pile fabrics."—Dated 5th November, 1856.

2596. Charles Titterton, of Roehampton, in the county of Surrey, for an invention of "Improvements in the manufacture of zinc and zinc white."—Dated 5th November, 1856.

2617. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, for an invention of "Improvements in the manufacture of cranked axles and shafts."—A communication from C. Russery.—Dated 6th November, 1856.

2831. Joseph Latimer Clark, of Adelaide Road, Haverstock Hill, Hampstead, for an invention of "Improvements in electric telegraphs."—Partly a communication.—Dated 29th November, 1856.

5th November.

2625. Louis Joseph Victor Vuitton, of Paris, in the empire of France, Mechanician, for an invention of "An improved apparatus for consuming smoke."—Dated 7th November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 4th November*, 1859, *inclusive.*)

3rd November.

649. Andrew Lawson Knox, of Glasgow, in the county of Lanark, North Britain, Manufacturer, for an invention of "Improvements in the manufacture or production of ornamental fabrics."—Dated 5th November, 1852.

650. James Wotherspoon, of Glasgow, in the county of Lanark, North Britain, Wholesale Confectioner, for an invention of "Improvements in the manufacture or production of confectionary, and in the machinery, apparatus, or means employed therein."—Dated 5th November, 1852.

4th November.

656. Admiral the Earl of Dundonald, of Belgrave Road, in the county of Middlesex, for an invention of "Improving bituminous substances, thereby rendering them available for purposes to which they never heretofore have been successfully applied."—Dated 5th November, 1852.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 18th October, 1859, and each bearing that date.

No. 25,795. Saml. C. Abbot, of Zanesville, O., for an "Improvement in the adaptation of wads to shots and shells."

"I claim, in combination with a shot or shell that receives its rotation by the action of the atmosphere in its flight, and which has an open funnel-shaped base, a similarly shaped open wad or packing, that when expanded by the gas shall impinge, both upon the bore of the gun and the interior of the shot or shell, as herein described and represented."

No. 25,796. Avery Babbitt, of Auburn, N.Y., for an "Improvement in jacquard machines."

"I claim, first, arranging two or more trapboards in one frame, in such manner, that when all the said trapboards so arranged are lifted for the purpose of opening the shed all the untrapped knot cords may pass said truss boards without obstruction, in combination with an ascending and descending suspension board, substantially as above described. Second, in combination with the jacquard machine, I claim the device represented on the sides of the machine for working the journals or parts of journals, consisting of the pin wheel Z, shaft B^1, hooks y, y, y, y, and the hooks o, o, o, o, and the dog E^1, substantially in the manner and for the purposes specified. Third, dividing the journals commonly used in two or three ply jacquard weaving, and working them in any required order, substantially in the manner and for the purpose above specified."

No. 25,797. E. Ball, of Canton, Ohio, for an "Improvement in harvesters."

"First, I claim the hinged plate G, constructed as shown and specified, in communication with the finger bar D, and brace plate E, substantially as described. Second, I claim the combination of the coupling arm t, (swiveled only at the point of connection with the main frame), in combination with hinged plate G, hinged braced plate E, and guide piece F, substantially as set forth. Third, I claim the guide piece F, in combination with the brace rod q, hinged plate G, brace plate E, coupling arm t, and chain b^{11}, substantially as described. Fourth, I claim the combination and relative arrangement of spur k^1, with coupling arm t, and pitman k, as and for the purposes set forth. Fifth, I claim the combination of the hinged plate G, and adjusting screw s, with the slotted guide piece F, hinged brace plate E, and chain b^{11}, arranged as and for the purposes set forth."

No. 25,798. Daniel Barnum, of New York, N.Y., for an "Improvement in steam engines."

"I claim the method of constructing and combining adjustable cut-off cams and adjusting screws and a revolving and sliding rock shaft, substantially as specified, and of combining these with the means described for working puppet valves in steam engines, substantially as and for the purposes specified; the method of constructing or using, or adjusting, the cut-off cams 1, 1^1, for the purpose of enabling me to fix or to adjust the point at which the steam is to be cut-off during any portion of the stroke, whether it be done while the engine is in motion or at rest, substantially as described and shown, Figs. 1, 4, and 5."

No. 25,799. Wm. W. Batchelder, of New York, N.Y., for an "Improvement in construction of vapor lamp burners."

"I claim modifying the flame under the retort by means of the wires a^1, a^2, or their equivalents, in such manner that the deposit of carbon shall be prevented and the blue flame produced, as herein set forth. I claim deriving the gas for heating the retort from the gas pipe d, after its commixture with air, and before it reaches the illuminating jet m, by means of the aperture n, as set forth."

No. 25,800. John Beach, of De Ruyter, N.Y., for an "Improvement in cheese hoops."

"I claim, firstly, a hoop, having a cross-cut or division at its periphery, and constructed to open and close as described, when provided on opposite sides of said division with hook or eye straps, united by a tie band of oval configuration or other similar shape, and serving in connection with the eye straps to open and close the hoop, and to hold the same when expanded or contracted, substantially as herein set forth. Secondly, providing the oval tie band to the hook or eye straps of the opening and closing hoop, with a lever or handle arranged to cross the oval band at points intermediate to the intersections therewith of the transverse and conjugate axis of the band, and secured to the band on its one side, but projecting freely through it on the opposite side, essentially as specified."

No. 25,801. Charles G. Bloomer, of North Kingston, R. I., for an "Improvement in operating window blinds."

"I claim the segmental disk D, or its equivalent, and the spring F, or its equivalent, in combination with one of the slats of a blind, when arranged to operate in the manner, substantially as described for the purposes specified."

No. 25,802. M. S. Bringier, of New Orleans, La., for an "Improved steam boiler."

"I claim the arrangement of a series of horizontal tubes or pipes, connecting two cylindrical chambers or reservoirs of water and steam, in combination with the steam cylinder C connecting the same chambers, substantially as described."

No. 25,803. Wm. M. Bryant, of Washington, D.C., for a "Smoking tube."

"I claim a tubular tobacco pipe, which contains the supply of tobacco within it, and is furnished with a spring and follower, or their equivalents, that force up the tobacco to the burning point or chamber, as fast as it is consumed, substantially in the manner and for the purpose herein set forth."

No. 25,804. S. N. Campbell, of Elgin, Ill., for an "Improved churn."

"I claim the arrangement and combination of the button K, dasher rod F, movable slats H, H^1, pieces L, and bar J, as and for the purposes herein set forth and described."

No. 25,805. John H. Carter, of Cincinnati, O., for "Improvements in the construction of hydrants for filtration."

"I claim the cylindrical inner vessel (g) within the case A, and made removable, as represented, in combination with the receiver B, for receiving the sediment, as described, and the cap e^1, for favoring the direction of the sediment downward, in the manner and for the purpose set forth."

No. 25,806. Asa L. Caswell, of Lansingburgh, N. Y., for an "Improvement in operating gun carriages."

"I claim, first, returning the gun up to the porthole after being discharged by means of a roller and cords or chains operated by a lever, or its equivalent, when the same are arranged in the manner, and dispense with the use of gun tackle, as set forth. Second, I claim the manner herein described, or equivalently the same, for securing the gun and carriage in a fixed position upon the truck, so as to maintain a given range for any number of discharges, as set forth."

No. 25,807. Leverett Clark, of Monticello, N.Y., for an "Improvement in hem folder."

"I claim the hem folder, composed of a straight gauge a, and adjustable plate c, constructed as described, and a bar k, the whole combined as described, either arranged as shown in Figures 1, 3, and 4, or as in Figures 2, 5, and 6, and operating substantially as herein described."

No. 25,808. B. R. Cole, of Geneva, N. Y., for an "Improved method of opening and closing gates."

"I claim the attachment of the bar G^2 to the levers G^3 and G^4, at such points as to give their lower ends the same motion inward or outward at the same time, as in my description above substantially set forth."

No. 25,809. Jonathan Creager, of Cincinnati, O., for an "Improvement in machines for sawing beveled curves."

"I claim, 1st, the combination of the inclined rest R with a crown saw, for the production of a crowning cylindrical segment. 2nd, the combination of the rocking rest H, with a crown saw, for the manufacture of a cylindrical segment having oblique axes."

No. 25,810. James Cumming, of Boston, Mass., for an "Improved try-cock for steam boilers."

"I claim the combination with an ordinary try cock E, of a straight hollow tube D, moving vertically on axis C, and which is also the indicator at its outer closed end, and extending through the end or side of the boiler, and at certain periods remaining elevated above the level of the water, but capable of being brought below the same whenever necessary, substantially as and for the purposes set forth."

No. 25,811. Wm. P. Curry, of Vincennes, Ind., for an "Improved feed water apparatus for steam boilers."

"I claim the arrangement of the rods G, G^1, H, H^1, I, I^1, or their equivalents, to operate in combination with the disks *i*, *e*, *k*, *m*, or their equivalents, and with the float B and stop valve K, substantially as and for the purpose described."

No. 25,812. Andrew J. Curtis, of Frankfort, Me., for an "Improvement in operating field gates."

"I claim the improved arrangement of mechanism hereinbefore described for opening or closing a gate, the same consisting of the lever G and the connecting rods M, N, applied to the said lever and the gate posts H, I, substantially in manner and for the purpose set forth. And, in combination therewith, I claim the peculiar arrangement of the block *f*, the same operating in connection with the lever G, in manner and for the purpose specified."

No. 25,813. J. B. Dagne, of Ashley, O., for an "Improvement in construction of evaporating apparatus."

"I claim the employment of the pan F, which is provided with two or more compartments, and situated over a furnace, when said pan is used in connection with the slides E and C, and damper D, the whole being combined and arranged substantially in the manner herein set forth, for the purpose of forming a sugar evaporator, as is described."

No. 25,814. John Danner, of Canton, O., for an "Improvement in sleeping cars."

"First, I claim the combination of the hinged false back *d* with the permanent back *a*, as and for the purposes set forth. Second, I claim making each alternate back *a* with a false back *d*, in combination with making each alternate back a^1 shorter than the backs *a*, and hinged to the seat c^1, substantially as and for the purposes set forth."

No. 25,815. John Ebner and Frank Lenthy, of Lancaster, Pa., for an "Improvement in harvesters."

"We claim the arrangement of the three eccentrics C, C, and D, revolving with the shaft of the driving wheel, in combination with the rake connecting mechanism, constructed and operating in the manner described."

No. 25,816. David Eldred, of Monmouth, Ill., for an "Improvement in ploughs."

"I claim the arrangement, for joint operation, of the share frames B, B, axle H, and coulter L, as and for the purpose set forth."

No. 25,817. Gilmore Emery and Aaron C. Wilson, of Newfield, Me., for an "Improvement in ploughs."

"We claim the arrangement of the various parts of the plow, when constructed as herein described, for the purposes set forth."

No. 25,818. Frank P. Goodall, of Deering, N. H., for an "Improvement in pruning knives."

"I claim the improved article of manufacture, or combination of pruning knife and arm rest, arranged substantially as specified."

No. 25,819. Merritt Goodman, of Whitlocks, Cal., for an "Improvement in machines for crushing quartz."

"I claim a revolving mortar 'I,' or stamping bed, in combination with a hollow stamp and shaft 'A,' described as aforesaid."

No. 25,820. Oliver C. Green, of Dublin, Ind., for an "Improvement in clothes racks."

"I claim the combination and arrangement of the center post A, *a*, arms B, C, and braces D, E, operating in the manner and for the purposes set forth."

No. 25,821. Joel Haines, of West Middleburgh, O., for an "Improvement in field fences."

"I claim the peculiar construction of the braces, so as to adapt them to the keys, when combined with a sill having one or more notches, so as to hold the fence perpendicular when the sill lies inclined, substantially as described."

No. 25,822. Wm. Hall, of Indianapolis, Ind., for an "Improved apparatus for preventing horses from running away."

"I claim the apparatus herein described when constructed and operated in the manner and for the purpose herein set forth."

No. 25,823. Wm. Hall, of Indianapolis, Ind., for an "Improved lightning rod.'

"I claim as an article of manufacture the construction of a lightning rod, presenting a great amount of conducting surface in a compact form, when the same is constructed in the manner described."

No. 25,824. Samuel W. Hamsher, of Decatur, Ill., for an "Improvement in harrows."

"I claim the arrangement of the harrow frames, toothed roller, and hinged adjustable arms, as herein set forth and explained, and for the purpose stated."

No. 25,825. Joseph Harris, of Alleghany, Pa., for an "Improvement in railroad brakes."

"I claim, 1st, the combination of the winding apparatus, the weight w^1, lever *t*, rod r^1, bent lever e^1, sliding ring d^1, sleeve *r*, anti-friction ring Z^1, and Z^{11}, conical center piece *p*, collar c^{11}, with friction plates a^1, and a^{11}, and spring plates b^1 and b^{11}, also screws n^1 and n^{11}, arranged in the manner and for the purpose substantially of operating a railroad brake. 2d, the combination of the pawl *t* and spring *u* with ratchet *s*, and drum *l*, with short chains *k*, *k*, and rods *h*, *h*, the arm *m*, *m*, with pulleys *q*, *q*, connected by chains, rods, or ropes for applying and maintaining the strain of a railroad brake at the centre of each car, substantially as herein-before described and set forth. 3rd, the combination of the rod *v* with the long arm of pawl *t*, and the cross lever *y* connecting the shaft of the bunter X to pawl *t*, for the purpose of setting the brakes free, the whole substantially as herein-before described and set forth."

No. 25,826. James Hawkins, of Wilkins Township, Pa., for an "Improvement in steam ploughs."

"I claim the arrangement of the frames A and F, levers J and E, caster wheels G and I, drivers B, crank shaft S, cutter P, toothed cylinders C and H, levers D and N, operating conjointly as set forth, for the purposes specified."

No. 25,827. Joseph Hollen, of Fostoria, Pa., for an "Improvement in knitting machines."

"I claim the combination of a needle, the barb of which is pressed by its own spring into its own groove with a thread carrier to release the barb, and lay the thread therein, and a supporting guide to sustain the needle, when arranged and operated substantially in the manner and for the purpose described."

No. 25,828. Francis A. Hoyt, of Boston, Mass., for an "Improved water gauge for steam boilers."

"I claim the above-described arrangement of the steam whistle, its valve conduit, and valve seat relatively to the dry steam chamber and the operating lever of the float."

No. 25,829. Thos. J. Hudson, of Newbern, N. C., for an "Improvement in packing piston rods of steam engines."

"I claim the method of packing the glands *a*, *a*, and applying the glands *c*, *c*, with the packing in *d*, *d*."

No. 25,830. Wm. H. Hunt, of Brooklyn, N. Y., for "Improvements in the construction of vapor burners."

"I claim the combination in a vapor burner of a conic frustum *i* and draft holes *k*, substantially as specified, in combination with the orifice *n* and damper *v*, the whole being constructed and combined substantially as and for the purpose specified and shown."

No. 25,831. Geo. P. Hunt, of New York, N. Y., for an "Improvement in oil cans."

"I claim the arrangement of the valve in the point of the tube or spout, as described, in combination with the extension of the point of the valve for operating it, by which arrangement, when the point of the valve is relieved from pressure, the further discharge of oil from within the tube is prevented, as set forth."

No. 25,832. J. Burrows Hyde, of Newark, N. J., for "Improvements in the construction of compound blow pipe."

"I claim, 1st, the compound conical nozzle *g*, constructed with the projecting tubes *n* and *k*, as described, combined with the concentric elastic tubes *e* and *f*, as described; and 2d, the receiving tubes *a* and *b*, with their projecting tubes *c* and *d* for attaching thereto the elastic tubes, as described."

No. 25,833. A. Kirlin, of New Boston, Ill., for an "Improvement in corn planters."

"I claim the cam I, spring arm J, ratchet and pawl K, L, when the same are arranged as set forth, and operated by the marker wheel G, G, for giving motion to the rotary hopper bottoms for planting the corn, as herein-before described."

No. 25,834. Geo. H. Kitchen, of New York, N. Y., for an "Improvement in the construction of gas regulators."

"I claim the construction of the valve chamber A, having the valve fitted within it, substantially as described, with a series of recesses *d*, *d*, whose width increases in an upward direction, or an equivalent series of passages surrounding the valve, and having their area of opening increased by the ascent and diminished by the descent of the valve, as described."

No. 25,835. Adam Klaus, of Belleville, Ill., for an "Improvement in seed planters."

"I claim the valve *r*, in combination with the sliding door *p*, when the same are operated simultaneously with the seed slide, substantially in the manner and for the purpose described."

No. 25,836. Jesse S. Lake, of Smith's Landing, N. J., for an "Improved steering apparatus."

"I claim the arrangement of catches I, I, braces L, L, collar O, pin F, in combination with the barrel C, substantially in the manner and for the purposes set forth."

No. 25,837. James Lancelott, of South Providence, R. I., for an "Improvement in making ornamental chairs."

"I claim, 1st, the employment or use of the filling b^1 in the female die Q, when used in connection with a traveling die *r*, for the purpose of ensuring the proper presentation of the blanks to the latter, and at the same time admitting of a proper cutting edge for the female die Q. 2nd, the employment or use of a forming die J in connection with a rotating or partially rotating die *r*, arranged substantially as shown, to ensure simultaneously with the process of swaging of the blanks into the proper-shaped links the proper adjustment of the latter, for interlocking of the same. 3rd, the decreased diameter of the upper portion of the forming die J, so as to ensure the adhesion of the cap, cup, or link to it, and enable said die to perform the double function of die and carrier, when said die J is used in connection with the die *r*, to operate conjointly as and for the purpose set forth. 4th, constructing the die *r* with a rod v^1 with or without shears or projections a^1, and arranged substantially as and for the purpose set forth. 5th, the clearer rod *h* and collar *n*, either or both applied to the forming die J and arranged to operate in connection with the die *r* and rod *v*, substantially as and for the purpose set forth. 6th, the clamps *j* in connection with the swage or clinching tool R, or its equivalent, arranged to operate conjointly, as shown, and for the purpose specified. 7th, the guide plate *f*, in connection with the swage or clinching tool R, the forming serving as a guide to the latter and ensuring its proper action. 8th, the swage or clinching tool R, when constructed, as shown, to bend or clinch the arms of the links, and at the same time keep the arms of the uppermost link in proper position, so that the latter may readily receive the succeeding link."

No. 25,838. S. E. Lanphear and O. D. Barrett, of Cleveland, O., for an "Improved washing machine."

"We claim supporting the disk D by its stem C on the standard B, as and for the purpose herein set forth."

No. 25,839. Evan Leigh, of Manchester, England, for an "Improvement in cotton spinning machinery."—Patented in England, 26th February, 1858.

"I claim, firstly, the construction of the top rollers and spindles with the arrangement of one or more of the bosses loose, revolving thereon. Secondly, the application of a journal for all kinds of shafting, spindles, studs, or axles, having the bearing part of the shaft, spindle or axle, or stud larger in diameter than the part immediately outside the bearing. And, thirdly, the rounding out or dishing the edges of steps or bosses, in combination with the tapering of journals or axles of all kinds, by which I obtain the action of capillary attraction, for the purpose set forth. I also claim the application of a top roller of a spinning machine to its spindle, in such manner as to enable such top roller to rotate on the spindle, and to rock in a longitudinal direction thereon, in order that it may properly adjust itself to the under roller while the two may be in use."

No. 25,840. Frank Maxson, of San Francisco, Cal., for an "Improved amalgamator."

"I claim the use of the eccentric revolving pan, constructed and operated as described in connection with the amalgamated plate as specified. I also claim the arrangement of the shaft E, projection pin F, with the slotted piece C^1, and wood D^1, whereby a more or less eccentric motion is imparted to the pan A, as described."

No. 25,841. Thomas J. Mayall, of Roxbury, Mass., for an "Improvement in composition of emery for grinding and polishing tools."

"I claim my new compound for emery, sharpening and polishing tools, the same being made by combining 15lbs. of emery, 1lb. of india rubber or gutta percha, and 5oz. of sulphur."

No. 25,842. C. A. McEvoy, of Richmond, Va., for an "Improvement in metallic seals for letters, &c."

"I claim the use together in the manner herein described of the metallic concave discs, having sharp points projecting from their circumferences substantially as set forth."

No. 25,843. Thomas McQuiston, of Morning Sun, O., for an "Improvement in cultivators."

"I claim the described arrangement of the elevated axle D, beams A, A^1, brackets C, C^1, and rods B, B^1, the whole being constructed in the manner and for the purposes set forth."

No. 25,844. John H. Mears and George Cameron, of Oshkosh, Wis., for an "Improvement in car coupling."

"We claim, 1st, the tongue G for retaining link H, constructed and operating as described. 2nd, the arrangement of yoke A, lever C, and spring B, and connecting rod F, constructed and operating as described."

No. 25,845. Adam Miller, of Mount Pleasant, Iowa, for an "Improvement in mole plough."

"I claim the employment of the rod H, in combination with the coulter B, provided with staples *o*, *o*, o^1, and the mole I, provided with the hooks *m*, *n* and *s*, *s*, substantially as and for the purposes specified."

No. 25,846. John Morrison, of De Witt, Ill., for an "Improvement in mole plough."

"I claim the draught chain G, bar F, loops H, H, and the adjusting screw rods J, J, or their equivalents, combined, arranged and applied to the plow, substantially as and for the purpose set forth."

No. 25,847. Wm. Henry Morrison, of Nottingham, England, for an "Improved machine for manufacturing bonnet and cap fronts, &c."

"I claim the application in apparatus or machinery of the character referred to of bars or gauges *h*, *h*, operated to move simultaneously towards the lace or other fabric, substantially as explained. Also, I claim the adaptation of plates *f*, *f*, operating in manner and for the purpose substantially as explained, when employed in the manufacture of bonnet and cap fronts, rouches, and such like articles of millinery."

No. 25,848. Enoch Osgood, of Boston, Mass., for an "Improvement in cotton gins."

"I claim, 1st, the rollers B, B, plates C, C, and bands D, arranged substantially as and for the purpose set forth. 2nd, the combination and arrangement in a cotton gin or wool burring machine of the clearer K, rollers B, B, angular plates C, C, bands D, slotted arms or bars J, J, *d*, *d*, pinion G, and wheel I, in the manner and for the purpose herein described."

No. 25,849. Sewall Pearson, of Boston, Mass., for an "Improved cabinet chair."

"I claim arranging in a bureau, chair, or other piece of furniture A, in combination with a perforated seat B, and with a self-closing pot G, a water tank C, which forms the back for the seat, and which communicates with the pot by means of a spout E, substantially as and for the purpose specified."

No. 25,850. Geo. J. Prentiss, of Fall River, Mass., for an "Improved polishing iron."

"I claim the polishing cup A, as set forth, having two handles C, E, arranged as represented and described, or in any other manner substantially the same, for the purposes herein mentioned."

No. 25,851. Hiram M. Smith, of Richmond, Va., for an "Improvement in truss for relieving piles."

"I claim as improvements in the construction of anti-hemorrhoidal pads, 1st, the manner of sustaining such pads by means of springs passing from the pad to the front of the patient, and in a spiral form along the groin to a point over the hip joint, in combination with the plan of sustaining the instrument by flexible fastenings attached above the hip joints, thus making the instrument self-adjusting, and enabling the patient to exercise in any position without inconvenience. Second, the manner of balancing the instrument by means of flexible fastenings attached over the hip joints, no matter how the arms of the pad may be varied."

No. 25,852. Joseph W. Sprague, of Rochester, N. Y., for "Improvements in tubular connections of bridges."

"I claim the above-described series of clutches C, provided with bands *c*, in combination with the tubular sections B, for the purpose substantially as set forth."

No. 25,853. David H. Stickney, of Cincinnati, O., for an "Improvement in cocks."

"I claim the supplementary chamber D and stationary stuffing box C, in combination with a hollow piston E, having ingress apertures G, adapted to be placed on either side of the said stuffing box by the motion of the piston, as set forth."

No. 25,854. Augustus J. Thompson, of Malden, Mass., for an "Improvement in bustles."

"I claim the combination of a spring bustle, of a flat spring or springs (*b*) united at their ends, to form the perimeter of the bustle or its framework, and spread or divided to establish a base at their bearing surface or surfaces against the body of the wearer, and spiral springs (*c*) of conical configuration, and arranged to form cross ties to the flat springs, with their bases resting against the base formed by the latter, and for action in concert with the latter, and unitedly, essentially as herein set forth."

No. 25,855. Elijah Thorn, of Selma, O., for an "Improvement in portable crab for mole ploughs."

"I claim the arrangement of the frame F as constructed, with the boxes *a*, *a*, which are attached to the rear of the frame A, and with the axle I, and wheels J, J, the several parts being connected together and used not only for elevating the machine but for guiding its rear and changing its position, substantially as set forth."

No. 25,856. Eben C. Tuttle, of Naugatuck, Conn., for an "Improvement in manufacture of hoes."

"I claim the construction of a hoe as a new article of manufacture, by securing the eye in the blade by two projecting swells or beads (*a* and *b*), when constructed and fitted for use, substantially as herein described."

No. 25,857. Benjn. F. Wells, of Georgetown, D. C., for an "Improvement in naval architecture."

"I claim deriving the lines of vessels of all kinds and dimensions from sections of a circular spindle of any dimensions or proportions, substantially as described and shown."

No. 25,858. Wm. Wheeler, of West Poultney, Vt., for an "Improved carpet stretcher."

"I claim the stretcher C when provided with the notch and the heel points *t*, *t*, for the purpose herein set forth."

No. 25,859. J. T. Wilder, of Greensburgh, Ind., for an "Improved horizontal water wheel."

"I claim, 1st, constructing a water wheel with two sets of involute buckets, whose capacity shall be in the relative proportion to each other herein fully specified, for the purpose set forth. 2d, the combination with a wheel such as has been described, of a casing provided with two channels of different capacities, and with two gates arranged as described, the whole being constructed and operated, substantially as and for the purpose specified."

No. 25,860. Charles A. Wilson, of Cincinnati, O., for an "Improvement in thermostats."

"I claim a tubular thermostat forming a part of the steam or other passage, to be regulated and adapted by means of the unequal expansion of the metals of which it is composed, to close the said passage by lateral deflection, as explained."

No. 25,861. Geo. W. Yerby, of New York, N. Y., for an "Improvement in bustles."

"I claim the bustle, as described, in which the waistband has a back piece S, and a corset, or part corset *a* in front, provided with one, two, or more sets of pockets into which the springs of the bustle are inserted, the whole being constructed and operated in the manner and for the purpose substantially as described."

No. 25,862. James M. Adams, of Canton, Mass., assignor to himself and Alonzo Johnson, of same place, for an "Improvement in weeding hoes."

"I claim the arrangement of the two blades with the bifarcated handle, the whole being constructed in the manner and for the purposes herein set forth."

No. 25,863. Benjn. L. Agnew, of Indiana, Pa., assignor to G. P. Reed, of same place, for an "Improvement in preserve cans."

"I claim the combination in a preserve jar of a deep outer flanch or rim E, with a shallow inner flanch B, in the manner and for the purpose herein described."

No. 25,864. John G. Baker, of Washington, D.C., assignor to himself and Asa L. Carrier, of same place, for an "Improvement in the rods of window blinds."

"I claim the peculiar construction of thin metallic tubes, the two edges so forming the ears or rings (*e*, *e*, *e*), in combination with wire staples or rings to connect wood slats for movable blinds, substantially as set forth."

No. 25,865. Barron Davis, of Brooklyn, N. Y., assignor to Osborn and Vincent, of New York City, for an "Improvement in bustles."

"What I claim is, attaching the hoops *c*, *d*, *e*, &c. to the extension B by fixed and immovable connections (so that the hoops cannot be thrown forward or outward) when the hoops are connected to the band A by means of the cross bands *g*, *g*, in combination with the back point or extension C, as and for the purposes set forth."

No. 25,866. J. Burrows Hyde, of Newark, N. J., assignor to Phebe Bamman, of same place, for an "Improvement in the method of making gas from peat."

"I claim, 1st, exposing such peaty matter to thorough desiccation by artificial heat, and conveying it to the retort

without permitting it to absorb moisture from the air. 2d, granulating or powdering such peaty matter, distilling and cooling it in closed cases, as described. 3rd, employing the heat evolved in cooling the carbonized material to aid in desiccating the peaty matter, as described."

No. 25,867. JOHN MACLURE, of Newark, N. J., assignor to himself, Samuel E. Tompkins, and Samuel C. Northrup, of same place, for an "Improved machine for covering saddle trees."

"I claim the employment of an elastic bed or cushion D in combination with the cover and seat J, substantially as and for the purpose herein shown and described. 2nd, the arrangement and combination of the box B, adjustable sliding bars E, elastic cushion D, seat J, clamp K[1], and pressing lever G, as and for the purpose herein shown and described."

No. 25,868. S. W. PALMER and J. F. PALMER, of Auburn, N. Y., assignors to S. W. Palmer, N. Palmer, and John Patty, of same place, for an "Improved clothes frame."

"We claim, 1st, hinging the arms of a clothes frame to the sliding hubs, by means of the pins *d*, which are supported by the open lugs C, when said arms are constructed, and the several parts arranged, substantially in the manner and for the purpose described. We also claim, in combination with the shaft and its grooves, the sliding catch ring F, with its spring *h*, and projection *i*, for retaining the frame in its position, substantially as described. We also claim, in combination with the central post or shaft and sliding frame, the hoisting apparatus, consisting of the clutch rings *k* and *m*, with their springs *e*, lever *p*, and link *q*, substantially in the manner and for the purpose described."

No. 25,869. CONRAD RODER, of Ceralvo, Ky., assignor to himself and J. F. Iler, of same place, for an "Improvement in fancy looms."

"I claim the combination and arrangement of the double catch hooks (*h*, *h*[1]), adjustable guide plate (*j*), the sash E and J, with the lifting bar (K), in the manner and for the purpose herein described."

No. 25,870. WM. DAVID SLOAN, of New York, N.Y., assignor to A. B. Chapman, of same place, for an "Improved clasp for skeleton skirts."

"I claim the clasp *c*, for uniting the tapes or galloons to the hoops in the skeleton skirts, said clasp being formed with a narrow ribbon or V-shape back piece (2), for the purposes as specified."

No. 25,871. JAMES SPEERS, of West Manchester, Pa., assignor to himself, Alexr. Postley, and John Wible, of Alleghany county, Pa., for an "Improved paddle wheel."

"I claim the arrangement of the flanges (*a* and *a* 1), the arms (*b*), with points (X), the braces (*c*), and floats (*d*), when used for the purpose of constructing a propeller, substantially in the manner herein set forth."

No. 25,872. STEPHEN F. VAN HAGEN, of Albany, N. Y., assignor to George Kilbourn, of same place, for an "Improvement in banjos."

"I claim the combination, in one instrument, of the banjo parchment covered open body with the neck and fretted finger board of the guitar, the thumb string of the banjo being added to the usual strings of the guitar, substantially in the manner and for the purposes set forth in the within specification. I also claim the formation of the front part of the body of the instrument, of an acute oval or lancet form, in the manner and for the purposes set forth in the within specification."

RE-ISSUES.

SQUIRE M. FALES, of Baltimore, Md., for an "Improved furnace for smelting iron."—Patented 8th February, 1859.—Re-issued 18th October, 1859.

"I claim, 1st, the combination with the cone of a furnace of one or more arched recesses or chambers A, A, substantially as and for the purposes set forth. 2nd, the combination of an opening I, with the crown of the arch A, substantially as and for the purposes set forth." 3rd, the combination with the arch recess A, opening I, in the crown of the same of a movable tymp B, B, to be applied to the outer ends of the arched recesses or chambers A, A, instead of the permanent tymp now in use, which movable tymp is kept in place by a cross bar that can be removed at pleasure, substantially as and for the purposes set forth."

CHARLES B. WAITE and JOSEPH W. SENER, of Fredericksburgh, Va., for an "Improvement in coffee pots."—Patented 22nd April, 1856.—Re-issued 10th August, 1858.—Again re-issued 18th October, 1859.

"We claim the employment in a condensing boiler in which the water in the condenser is impregnated with the aroma of the coffee or other articles under treatment of a syphon, or equivalent self-acting device, for the discharge of the contents of the condenser into the body of the boiler, substantially as described."

HOLLY SKINNER, of Huron, Ohio, for an "Improved calender clock."—Patented 2nd March, 1858.—Re-issued 18th October, 1859.

"I claim, 1st, the extra movable tooth *m* and leap-year wheel G applied to or controlled by the gear wheel F, to operate in the manner described, for the purpose of regulating the effective length of the tooth which represents the month of February. 2nd, the arrangement of the month wheel C, its attached pinions *t*, and pin 4, the rack bar H, and its pawl *q*, the spring *v*, or its equivalent, the lever D, E, and its stud *i*, or their equivalents, the catch K, or its equivalent, and the stop 7, the whole being applied to operate upon and be controlled by the year wheel of a calender movement, as and for the purpose herein set forth. 3rd, arranging the month wheel in such a manner that the same at the end of each month returns to its original position by the action of a spring, or its equivalent, gathered up or strained by the action of the clockwork, substantially in the manner and for the purpose herein described."

WALLACE WELLS, of New York, N. Y., for an "Improved construction of cylinders and pistons for pumps and steam engines."—Patented 12th October, 1858.—Re-issusd 18th October, 1859.

"I claim the combination of the cylinder open at both ends with three pistons, and their connections, arranged substantially as herein set forth."

CHARLES WESTON, T. F. WESTON, and JOHN W. WESTON, of Salem, Mass., for an "Improvement in leather finishing machines."—Patented 25th September, 1855.—Re-issued 18th October 1859.

"We claim, 1st, in machines for finishing leather, the employment of a soft elastic bed, substantially as described, 2nd, the combination of an elastic bed and tool both constructed and operating together, to produce the desired effect upon the leather, as set forth. 3rd, in combination with the soft elastic bed and elastic finishing tool, the cord *p*, secured to the tool stock for the purpose of keeping the tool clear of the leather during its retrograde movement over the bed, as herein-above set forth."

ARETUS A. WILDER, of Detroit, Mich., for an "Improved clap-board machine."—Patented 30th October, 1855.—Re-issued 18th October, 1859.

"I claim resawing and bringing plank to an equal width at the same time. 2nd, the flange rollers, with their springs, or equivalents, in combination with the adjustable back rest, for the purposes herein-before described."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

List of Specifications published during the week ending 4th November, 1859.

No.	Price.	Subject-Matter.
762	3*d.*	Pillow travelling cap.
766	3*d.*	Apparatus for measuring and indicating distances.
773	3*d.*	Diving apparatus.
782	3*d.*	Manufacture of gas.
783	3*d.*	Manufacture of railway grease.
784	3*d.*	Motive power, projectiles, &c.
787	3*d.*	Increasing the strength of paper.
788	10*d.*	Apparatus for preparing and preserving timber.
789	10*d.*	Machine for cutting leather and other materials.
790	10*d.*	Manufacture of clog soles, &c.
791	3*d.*	Binding or covering books.
792	4*d.*	Manufacture of silk waste into yarns or thread.
793	3*d.*	Construction of ways and apparatus for the conveyance of mails, goods, and passengers.
794	3*d.*	Apparatus for preventing the explosion of steam boilers.
795	7*d.*	Apparatus for stamping and printing.
796	3*d.*	Castors for furniture.
797	9*d.*	Clod crushers.
798	6*d.*	Apparatus for defending guns, &c.
799	3*d.*	Manufacture of alkaline silicates, &c.
800	7*d.*	Governor for marine and other steam engines.
801	10*d.*	Apparatus for regulating the flow of fluids.
802	6*d.*	Machinery for preparing and spinning cotton, &c.
803	3*d.*	Apparatus for brewing.
804	3*d.*	Apparatus for cultivating land.
805	1*s.*	Rotary engines.
806	1*s.*	Steam boilers and furnaces.
807	1*s.* 1*d.*	Sextants or quadrants.
808	3*d.*	Sounding lead or plummet.
809	1*s.* 1*d.*	Generation of steam, &c.
810	1*s.* 5*d.*	Fences, posts, pillars, &c.
811	7*d.*	Mills for cleaning rice.
812	7*d.*	Steam boiler and other furnaces.
813	7*d.*	Feed water heating apparatus.
814	3*d.*	Preparation of food for herbivorous animals.
815	3*d.*	Manufacture of artificial teeth.
816	3*d.*	Machinery for solidifying, pressing, and moulding.
817	3*d.*	Preparation of indigo for dyeing.
818	5*d.*	Cricket bats.
819	4*d.*	Manufacture of sulphate of lead, &c.
820	3*d.*	Pad for inking or damping.
821	1*s.* 5*d.*	Marine steam engines.
822	6*d.*	Propeller for ships, vessels, &c.
823	3*d.*	Gas burning and lighting apparatus.
824	1*s.*	Machinery for striking or scraping leather or hides.
825	3*d.*	Machinery for hoisting, lowering, pulling, or drawing weights.
826	3*d.*	Furnaces for the manufacture of iron and steel.
827	3*d.*	Making up packets of needles and steel pens.
828	3*d.*	Apparatus for regulating the pressure of gas.
829	3*d.*	Apparatus for catching and destroying flies, &c.
831	3*d.*	Diving apparatus.
832	10*d.*	Furnaces.
833	7*d.*	Harbours of refuge, breakwaters, &c.
834	6*d.*	Screw stocks and dies.
835	3*d.*	Manufacture of calico printing rollers or cylinders, &c.
836	10*d.*	Machinery for the manufacture of bricks, tiles, &c.
841	3*d.*	Ladies' hooped skirts.
843	10*d.*	Working marine engines.
846	7*d.*	Coating metals.
851	3*d.*	Ornamenting metallic bedsteads, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos. 33 and 85, respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated 16th March* 1744.) Price

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library, Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.

The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 5th November, 1859.

Mornings - - - -	927
Evenings - - - -	1288
Total - - -	2215

Since the opening of the Museum Free Daily (May 12, 1858,)—158,836.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 611. FRIDAY, NOVEMBER 11, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1894. To ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improvements in the construction of carriages, and in apparatus for guiding or reining in carriage horses."—A communication from abroad by Isaac M. Singer, of New York, in the United States of America.

On his petition, recorded in the Office of the Commissioners on the 17th day of August, 1859.

1932. To GEORGE RILEY, of Elm Tree Lodge, South Lambeth, in the county of Surry, for the invention of "Improvements on helical refrigerators for cooling brewers and distillers worts."

On his petition, recorded in the Office of the Commissioners on the 24th day of August, 1859.

2083. To ANTON BRUNO SEITHEN, of 6, Alpha Place, Caledonian Road, London, in the county of Middlesex, for the invention of "Improvements in apparatus for shaping cork stoppers, and in the manufacture of life buoys and buffers of cork."

On his petition, recorded in the Office of the Commissioners on the 13th day of September, 1859.

2144. To LEONARD MATTHEWS, of No. 28, Fletcher Gate, in the town and county of the town of Nottingham, Lace Manufacturer, for the invention of "Improvements in machinery to be employed in introducing plain or coloured wire upon lace or other fabrics, for the purpose of ornamenting the same, or for running on and stiffening caps, cap-borders, or for other similar purposes."

On his petition, recorded in the Office of the Commissioners on the 20th day of September, 1859.

2250. To THOMAS COOK, of Coburg Road, Old Kent Road, in the county of Surrey, Machinist, for the invention of "Improved tools for making screws."

On his petition, recorded in the Office of the Commissioners on the 4th day of October, 1859.

2258. To ROBERT FISHER, of Westbourne Grove, and CHARLES ASPRAY, of Newton Road, Westbourne Grove, for the invention of "Improvements in photographic stereoscope slides, and in the stereoscopes employed in viewing the same."

On their petition, recorded in the Office of the Commissioners on the 5th day of October, 1859.

2298. To JOSEPH BENTLEY, of Liverpool, in the county of Lancaster, Gun Manufacturer, and HERMAN JAMES SILLEM, of the firm of Fawcett, Preston, and Co., of Liverpool aforesaid, Engineers, for the invention of "Improvements in breech loading fire arms, and the machinery for manufacturing projectiles for small arms."

On their petition, recorded in the Office of the Commissioners on the 10th day of October, 1859.

2340. To JEAN FRANÇOIS CONSCIENCE, of No. 8, St. John Street Road, Clerkenwell, London, in the county of Middlesex, for the invention of "A new and improved process of making bread, and certain machinery connected with it."

On his petition, recorded in the office of the Commissioners on the 14th day of October, 1859.

2356. To MICHAEL HENRY, of 84, Fleet Street, in the city of London, Patent Agent, for the invention of "An apparatus for washing hanks, skeins, threads, and yarns of silk and other fibrous materials."—A communication from abroad by Jean Baptiste Berthand the younger, of 33, Boulevard Saint Martin, Paris, France.

On his petition, recorded in the Office of the Commissioners on the 15th day of October, 1859.

2398. To RICHARD HOBSON, of Leeds, in the county of York, Doctor of Medicine, for the invention of "Improvements in producing ornamental devices in glass or other transparent substances for decorative or other purposes."

On his petition, recorded in the Office of the Commissioners on the 19th day of October, 1859.

2436. To WILLIAM CHARLES DAY, of the Strand, in the county of Middlesex, Military Outfitter, for the invention of "Improvements in stockings and drawers, and other articles of under clothing."

2438. To JAMES MURDOCH NAPIER, of the York Road, Lambeth, Engineer, for the invention of "Improvements in printing machines."

2440. And to HENRY COLUMBUS HURRY, of the city of Worcester, Engineer, for the invention of "Improved apparatus for applying or using magnetism or electro-magnetism as a motive power."

On their several petitions, recorded in the Office of the Commissioners on the 25th day of October, 1859.

2442. To ALEXANDER MCGLASHAN, of Coal Yard, Drury Lane, in the county of Middlesex, Engineer, for the invention of "Improvements in refrigerators for cooling worts and other liquors."

2444. To JEAN JACQUES BOURCART, of Guebwiller, Haut Rhin, France, but now residing in Manchester, in the county of Lancaster, Machinist, for the invention of "Improvements in mules for spinning."

2446. To WILLIAM WEMYSS KENNEDY, of Glasgow, in the county of Lanark, North Britain, Shirt Cutter, for the invention of "Improvements in shirts."

2448. To JOHN WESLEY HACKWORTH, of Priestgate Engine Works, Darlington, Engineer, for the invention of "Improvements in dynamic valve gear, applicable to locomotive marine and other engines."

2450. To JOHN ARMOUR, of Perceton Fire Clay Works, Kilmarnock, North Britain, Manager, for the invention of "Improvements in apparatus for measuring and for regulating supplies of solid and fluid substances in the preparation of mixtures or compounds."

2452. And to RICHARD CHRISTY the younger, of Weston, in the county of Herts, Farmer, for the invention of "Improvements in means or apparatus for securing the closing of doors."

On their several petitions, recorded in the Office of the Commissioners on the 26th day of October, 1859.

2454. To IGNAZIO ZACHERONI, of Liverpool, in the county of Lancaster, Artist, for the invention of "Improvements in electric telegraphic cables for submarine and subterranean uses, and in submerging the same."

2456. To PHILO D. MICKLES, of Syracuse, state of New York, United States of America, for the invention of "An automatic railroad switch."—A communication from Danforth Johnson, a person resident at Chicago, state of Illinois, United States.

2460. To HENRY PHILLIPS, of Penhoe, in the county of Devon, Chemist, and JAMES BANNEHR, of Exeter, in the same county, for the invention of "Improvements in the manufacture of manure."

2462. And to RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improved threads for weaving, and a machine for making the same, which is also applicable to the winding or coating of one thread with another."—A communication from abroad by Alphonse Loiseau, of Bernay, France.

On their several petitions, recorded in the Office of the Commissioners on the 27th day of October, 1859.

2464. To AURELIUS BRUCE MITCHELL, of Birmingham, in the county of Warwick, Manufacturer, for the invention of "A new or improved penholder."

2465. To JOSEPH PLANTIER, of Paris, France, Gentleman, for the invention of "Improvements in brushes and brooms."

2467. To DEÏLE DILLIES, of Roubaix, department du Nord, in the empire of France, Manufacturer, for the invention of "Innovations in weaving looms."

2469. To JAMES FERGUSON COLE, of Devonshire Street, in the county of Middlesex, Watch Maker, for the invention of "Improvements in timekeepers."

2470. And to JEAN JOSEPH BARANOWSKI, of Paris, in the empire of France, Gentleman, for the invention of "Improvements in railway signal apparatuses."

On their several petitions, recorded in the Office of the Commissioners on the 28th day of October, 1859.

2471. To GUSTAVE GHESQUIÈRE, of No. 11, Quai Conti, in the city of Paris, in the empire of France, Gentleman, for the invention of "A process to render gold and silver malleable and ductile."

2473. To SAMUEL CUNLIFFE LISTER, of Manningham, and JAMES WARBURTON, of Addingham, Spinners, for the invention of "Improvements in dyeing silk, cotton, and china grass, and similar vegetable fibre, and in preparing and spinning colored and mixed colored yarns from such fibres."

2474. To CHARLES STANNET, of New Street, Covent Garden, in the county of Middlesex, Boot and Shoe Maker, for the invention of "Improvements in apparatus used in the manufacture of boots and shoes or other coverings for the feet."

2475. And to JOHN STEWART MARGETSON, of Cheapside, in the city of London, for the invention of "Improvements in collars for gentlemen's, ladies', or children's wear."

On their several petitions, recorded in the Office of the Commissioners on the 29th day of October, 1859.

2477. To JAMES ALFRED TURNER, of the city of Manchester, in the county of Lancaster, Paper Manufacturer, for the invention of "Improvements in rendering paper waterproof."

2479. To THOMAS CAUTLEY NEWBY, of Welbeck Street, in the county of Middlesex, Publisher, and JULES ADOLPHE RAINÉ, of Wells Street, Gray's-Inn-Road, in the county of Middlesex, Gentleman, for the invention of "Improvements in portable bedsteads and spring mattresses."

2480. To JOHN INGHAM, of Halifax, in the county of York, Manufacturer, and GEORGE COLLIER, of the same place, Engineer, for the invention of

"Improvements in the manufacture of fabric, of the character of that technically called 'camlet,' also in the winding of yarn employed in the production of such fabric, part of which improvements is applicable to other weavings."

2481. To JOHN BOLTON, of Halifax, in the county of York, Manufacturer, for the invention of "Improvements in means or apparatus for winding thread or yarn on to shuttle bobbins, or pirns, which improvements are also applicable in winding on to other bobbins, or spools, or tubes."

2483. To RICHARD ARCHIBALD BROOMAN, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Certain plastic compositions to be employed for building and decorative purposes, and in lieu of marble, stone, brick, and cement."—A communication from abroad, by Lippmann Schneckenburger and Co., of Paris.

2484. To ROMAN CICHOWSKI, of Linow, in the kingdom of Poland, Landed Proprietor and Agriculturalist, for the invention of "Improvements in ploughs."

2485. To JOSEPH HOLMES, of Pleystowe Capel, in the county of Surrey, Esquire, for the invention of "An improved halter-block for stable purposes."

2487. And to LUDWIG POHL, of the firm of Eduard Posen and Company, of Offenbach, in Germany, Manufacturers, for the invention of "Improvements in fastenings for bags, purses, and similar purposes."

On their several petitions, recorded in the office of the Commissioners on the 31st day of October, 1859.

2488. To CHARLES READ, of Birmingham, in the county of Warwick, Ironmonger, and ISAAC ALFRED READ, of Smethwick, near Birmingham aforesaid, Draughtsman, for the invention of "A new or improved tap or stop cock."

2489. To WILLIAM SPENCE, of No. 50, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "An instrument for taking and registering deep sea soundings."—A communication from abroad by Thomas P. How, of Broadway, New York.

2490. To ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improved mode of and apparatus for condensing and cooling vapour and fluids."—A communication from abroad by Ananias Smith, of Niagara Falls, in the United States of America.

2491. To JOSIAH JONES, junior, of Liverpool, for the invention of "Improvements in ship building."

2492. To WILLIAM HENRY PERKIN, of King David Fort, St. George's-in-the-East, for the invention of "Improvements in the manufacture of coloring matters."

2493. And to ROBERT DE BARY, of Finsbury Square, in the county of Middlesex, Engineer, for the invention of "Improvements in machinery for the manufacture of cigars."—A communication from abroad by Julius De Bary, of Offenbach.

On their several petitions, recorded in the Office of the Commissioners on the 1st day of November, 1859.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

11th November, 1859.

1192. ANDRÉ PROSPER ROCHETTE, of Brighouse, in the county of York, for an invention of "An improvement in the manufacture of soft soap."—Dated 12th May, 1859.

1214. SCHOFIELD CROWTHER SHEARD, Engineer, of Smethwick, in the county of Stafford, for an invention of "Certain improvements in fire-bars, which bars are applicable to all furnaces where great heat and economy of fuel are required."—Dated 16th May, 1859.

1216. WILLIAM MIDWORTH, of the firm of Messieurs John Midworth and William Midworth, of Newark-upon-Trent, in the county of Nottingham, Engineers, Ironfounders, and Ironmongers, for an invention of "An improved iron for the use of laundries, tailors, or other purposes."—Dated 16th May, 1859.

1224. ALEXANDRE RÉNÉ LANDRE, POLYDORE GRAS, and ANTOINE LOUIS AUGUSTE BOUCHERIE, all of the city of Marseilles, in the empire of France, Merchants, trading under the firm Landre, Gras, and Co., for an invention of "Distilling schist or boghead coal and other minerals for lighting."—Dated 17th May, 1859.

1294. JOHN MALLETT, of Barnstaple, in the county of Devon, Watch Manufacturer, Silversmith, and Jeweller, for an invention of "An improved regulator for watches, portable clocks, and timepieces."—Dated 25th May, 1859.

1870. WILLIAM GREEN, of Kidderminster, WILLIAM FAWCETT, of Wolverley, and FRANCIS BEST FAWCETT, of Wolverley, all in the county of Worcester, Carpet Manufacturers, for an invention of "Improvements in the manufacture of rugs."—Dated 13th August, 1859.

1998. PETER WRIGHT, of Dudley, in the county of Worcester, Manufacturer, for an invention of "An improvement or improvements in the manufacture of anvils."—Dated 2nd September, 1859.

2064. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in the process of and machinery for manufacturing hat bodies."—A communication from abroad by Andrew Campbell, of New York, in the United States of America.—Dated 9th September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 8th November*, 1859, *inclusive.*)

7th November.

2629. WILLIAM PORTER, of No. 9, Lansdowne Villas, Brompton, Middlesex, Civil Engineer, for an invention of "Improvements in the grinding of cements and other substances, and in the construction of millstones for the same."—Dated 8th November, 1856.

8th November.

2639. HENRY BESSEMER, of 4, Queen Street Place, in the city of London, for an invention of "Improvements in the manufacture and treatment of iron, and in the manufacture of steel."—Dated 10th November, 1856.

2645. JAMES SOMERVILLE, of Glasgow, in the county of Lanark, North Britain, Manager, for an invention of "Improvements in weaving."—Dated 10th November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 8th November*, 1859, *inclusive.*)

7th November.

709. GEORGE LUCAS, of 42, Kennedy Street, Manchester, in the county of Lancaster, Engraver, for an invention of "A composition for filling engraved cast or sunk letters, devices, or ornaments, on or in brass, zinc, or other metallic plates."—Dated 11th November, 1852.

721. CALEB BLOOMER, of West Bromwich, in the county of Stafford, for an invention of "Improvements in the manufacture of anchors."—Dated 12th November, 1852.

832. JOHN BEALE, of East Greenwich, in the county of Kent, Engineer, for an invention of "An improved arrangement of steam-engine, and an improved packing to be used therein."—Dated 23rd November, 1852.

8th November.

685. ROBERT KNOWLES, of Chorlton-upon-Medlock, in the county of Lancaster, Mechanic, for an invention of "Certain improvements in boilers and apparatus for generating steam."—Dated 9th November, 1852.

Erratum in Journal of 7th October.

In the List of "Patents on which the Stamp Duty of £50 has been paid," the following title must be cancelled, it having been omitted in error from the previous Quarterly List of Patents become Void by reason of non-payment of said Stamp Duty of £50:—

26th September.

2266. WILLIAM SMITH, of Skinner Street, Snow Hill, in the city of London, and NATHANIEL FORTESCUE TAYLOR, of Stratford, in the county of Essex, Gas Engineers, for an invention of "Improvements in apparatus for measuring gas and other fluids, and in regulating the flow of the same."—Dated 27th September, 1856.

FOREIGN PATENTS.

BELGIUM.*

LIST of PATENTS Delivered on the 3rd November, 1859.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 600 of this Journal.)

7886 G. HOYER, represented by D. de Vos-Verraert, of Brussels, for an imported invention of "A licking salt-stone for cattle."—Dated 19th August, 1859.—(Saxon Patent, 19th May, 1859.)

7919. H. E. ROISIN, of Chatelet, for "A machine for grinding grain."—Dated 29th August, 1859.

7996. L. L. BEQUEMIE, represented by A. Hennelle, of Saint Josse-ten-Noode, for "A lift and force pump."—Dated 16th September, 1859.

7997. J. L. JULLION, represented by A. Picard, of Brussels, for "Improvements in the manufacture of gelatin."—Dated 17th September, 1859.

7998. H. WATSON, represented by F. Lebrun, for "An alarum whistle for steam boilers."—Dated 17th September, 1859.

7999. E. H. BENTALL, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in machines for grinding or pulverizing various substances."—Dated 19th September, 1859.—(English Patent, 1st February, 1859.)

8000. A. C. CHAUDESAIGUES, represented by F. Anthoine, of Brussels, for "A so-called 'Isabella tournure petticoat.'"—Dated 19th September, 1859.

8001. L. ENGLER and E. F. KRAUSS, represented by O. Daillencourt, of Brussels, for an imported invention of "An insulator of telegraph wires."—Dated 19th September, 1859.—(French Patent, 15th September, 1859.)

8002. L. DESCHAMPS, of Dour, for "An apparatus for boring mines."—Dated 20th September, 1859.

8003. J. PAQUET, represented by S. Progueaux, of Gilly, for "A game of dominoes."—Dated 20th September, 1859.

8004. J. BROZE, of Verviers, for "Improvements in looms."—Dated 21st September, 1859.

8005. A. L. SCHLOSSER, of Brussels, a Patent of Improvement for "A system of cylinders for ironing linen."—Dated 22nd September, 1859.—(Original Patent, 27th September, 1855.)

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office, where also translated Indexes may be consulted.

8006. V. and Ch. Michel Brothers, of Molenbeek St. Jean, for "An expeditious mode of manufacturing velvet warps, called 'chenille.'"—Dated 22nd September, 1859.

8007. L. J. Vandecasteele, of Bruges, for "A mode of preventing accidents on railways, occasioned by the closing of the doors of the carriages."—Dated 22nd September, 1859.

8008. W. Petrie, represented by A. Cossée, of Marchienne-au-Pont, a Patent of Improvement for "Manufacture of sulphuric acid."—Dated 21st September, 1859.—(Original Patent, 12th March, 1857.)

8009. J. Dartois, of Fléron, for "A ventilator with an alternate movement, and with a continuous air current."—Dated 21st September, 1859.

8010. H. Thomas, of Brussels, for "A furnace with a reversed fire, for rolling-mills and other works."—Dated 21st September, 1859.

8011. J. Lee, represented by Th. Boutillier, of Schaerbeek, for an imported invention of "Improvements in the manufacture of crank axles of steam-engines."—Dated 21st September, 1859.—(English Patent, 7th February, 1859.)

8012. A. Billotet, represented by Th. Boutillier, of Schaerbeek, for an imported invention of "A pendulum regulator, applicable to screw steamers."—Dated 21st September, 1859.—(French Patent, 8th May, 1858.)

8013. G. Ermen, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in machines for finishing thread."—Dated 21st September, 1859.—(French Patent, 13th September, 1859.)

8014. H. Winter, represented by A. Crooy, of Brussels, for an imported invention of "An apparatus for raising sacks and other weights."—Dated 21st September, 1859.—(English Patent, 15th September, 1859.)

8015. G. D. Vandenhaute, of Brussels, for "Improvements in gasmeters."—Dated 20th September, 1859.

8016. Th. Birde, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of castors for furniture."—Dated 20th September, 1859.—(English Patent, 26th August, 1859.)

8017. H. Dombret, H. Dugnolle, and H. Potez, represented by R. S. Kirkpatrick, of Ixelles, for "A machine for cleaning and preparing all kinds of filaments."—Dated 20th September, 1859.—(French Patent, 7th July, 1859.)

8018. A. Van Langenhove, represented by V. Lefebvre, of Alost, a Patent of Improvement for "Applying colza straw to the manufacture of paper-pulp."—Dated 20th September, 1859.—(Original Patent, 13th August, 1859.)

8019. P. Reich, of Ghent, for "A loom for weaving figured stuffs, being a substitute for jacquart looms."—Dated 21st September, 1859.

8020. L. J. Vandecasteele, of Bruges, for "Increasing the motive power of locomotives."—Dated 23rd September, 1859.

8021. E. Laurent, of Dinant, for "Vats for breweries."—Dated 24th September, 1859.

8022. Ch. Gondeau, of Alost, a Patent of Improvement for "A single and double action apparatus applicable to looms."—Dated 24th September, 1859.—(Original Patent, 4th June, 1858.)

8023. A. Brison, of Petit-Roeulx, for "A machine for compressing rough iron balls."—Dated 24th September, 1859.

8024. O. A. David, represented by H. Biebuyck, of Brussels, for an imported invention of "A machine for conglomerating coal dust and other substances."—Dated 26th September, 1859.

8025. J. Harrison, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the construction of steam-boilers."—Dated 26th September, 1859.—(French Patent, 13th September, 1859.)

8026. M. Schloss, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in water-closets."—Dated 26th September, 1859.—(French Patent, 20th September, 1859.)

8027. F. Durand and H. A. Pradel, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in jacquart looms."—Dated 26th September, 1859.—(French Patent, 20th September, 1859.)

8028. F. Heindryckx, of Brussels, a Patent of Improvement for "A system of railway chairs."—Dated 27th September, 1859.—(Original Patent, 12th September, 1859.)

8029. L. Lemesre, of Tournai, for an imported invention of "A system of self-acting winding machines."—Dated 28th September, 1859.—(French Patent, 15th July, 1859.)

8030. J. Bataille, represented by H. Biebuyck, of Brussels, for an imported invention of "Turntables for railways."—Dated 28th September, 1859.—(French Patent, 23rd April, 1858.)

8031. J. E. Durand, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of paper from small poppy."—Dated 28th September, 1859.—(French Patent, 19th July, 1859.)

8032. J. M. Rabier, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of bricks, flagstones, tiles, and other ceramic products."—Dated 28th September, 1859.—(French Patent, 28th July, 1859.)

8033. J. F. Harmegnies, of Dour, for "Preventing the shaking of ropes in working mines."—Dated 26th September, 1859.

8035. L. Réquilé Delhey and Son, represeuted by D. Tassin, of Liége, for "A system of balances with variable arms."—Dated 24th September, 1859.

8036. The Vieille Montagne Company, represented by H. Renard, of Angleur, for "Bleaching raw tissues and paper pulp."—Dated 30th September, 1859.

8037. V. Moreau, of Liége, a Patent of Improvement for "A calorifere stove with tubular fireplaces for cooking food."—Dated 1st October, 1859.—(Original Patent, 18th February, 1857.)

8038. J. Huytens of Ghent, for "A machine for cleaning, boring, and pressing pickers (taquets)."—Dated 30th September, 1859.

8039. A. Légé, represented by J. Piddington, of Brussels, a Patent of Improvement for "Preserving, colouring, and drying timber."—Dated 30th September,1859.—(Original Patent, 7th February, 1859.)

8040. J. Leigh, represented by R. Culliford, of Brussels, for an imported invention of "Improvements in purifying coal gas."—Dated 30th September, 1859.—(English Patent, 5th March, 1859.)

8041. J. Dulait, of Charleroi, a Patent of Improvement for "A system of blast engines for blast furnaces."—Dated 3rd October, 1859.—(Original Patent, 28th January, 1858.)

8042. Th. Fouqueré, represented by X. Raclot, of Brussels, for "Applying photography to lace, gimps, embroideries, &c."—Dated 1st October, 1859.

8043. Ch. de Clippele d'Hem, represented by D. de Vos Verraert, of Brussels, a Patent of Improvement for "A process for soldering iron with wood, leather, &c."—Dated 1st October, 1859.—(Original Patent, 26th June, 1857.)

8044. M. Lejeune, of Liége, for "A revolving double gun."—Dated 3rd October, 1859.

8045. C. de Longuinoff, of Liége, for "An auger of mines."—Dated 4th October, 1859.

8046. A. Dean, of Hensy, for "An apparatus for oiling wool, applicable to carding machines.'—Dated 5th October, 1859.

8047. A. Demaret, of Soignies, a Patent of Improvement for "A rotary steam engine."—Dated 5th October, 1859.—(Original Patent, 4th August, 1859.)

8048. F. C. Knowles, of Namur, for an imported invention of "Improvements in the manufacture of iron and steel, and in purifying cast iron."—Dated 3rd October, 1859.—(English Patent, 7th July, 1859.)

8049. V. Carlier, of Ixelles, for "A new mode of applying horsehair to the manufacture of a stuff for making sacks."—Dated 3rd October, 1859.

8050. C. Duplomb, represented by A. Picard, of Brussels, for an imported invention of "A press for finishing stuffs."—Dated 4th October, 1859.

8051. J. L. Baudelot, represented by A. Picard, of Brussels, for "Improvements in freezing apparatus."—Dated 4th October, 1859.

8052. A. Courtois, represented by A. Picard, of Brussels, for an imported invention of "A kiln for burning lime, plaster, and other similar products."—Dated 4th October, 1859.—(French Patent, 12th November, 1855.)

8053. E. A. Lebourgeois, represented by A. Picard, of Brussels, for an imported invention of "A machine for pricking plates for printing tissues, &c."—Dated 4th October, 1859.—(French Patent, 11th August, 1859.)

8054. C. Gabriel, of Brussels, for "Improvements in the manufacture of pasteboard."—Dated 4th October, 1859.

8056. G. Horner, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in machines and processes for heckling flax, hemp, and other filamentous substances."—Dated 5th October, 1859.—(American Patent, 28th February, 1859.)

8057. J. B. Carlier, represented by O. Daillencourt, of Brussels, for "Manufacture of hair tissues used for distilling oil and other oil seeds."—Dated 5th October, 1859.

8058. A. Sauvage, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in steam engines."—Dated 6th October, 1859.—(French Patent, 12th November, 1859.)

8059. J. Villet-Collignon and L. George, represented by O. Daillencourt, of Brussels, for an imported invention of "A system of composing type, called 'Breviotypie,' and being applicable to all languages."—Dated 6th October, 1859.—(French Patent, 19th September, 1859.)

8061. F. Malfait, of Meulebeke, for "Modifications in Jacquart looms."—Dated 6th October, 1859.

8062. L. Morauw, of Ghent, for "Improvements in machines for spinning flax, hemp, and oakum."——Dated 7th October, 1859.

8063. L. A. Le Paige, represented by H. Biebuyck, of Brussels, for "A process for purifying certain kinds of grease and oil, and using the same for the manufacture of candles, soap, &c."—Dated 7th October, 1859.

8064. J. B. Becelaere, of St. Josse-ten-Noode, for "A machine for obtaining guilloshee mouldings of wood."—Dated 8th October, 1859.

8065. J. Kershaw, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Apparatus for weaving."—Dated 8th October, 1859.—(Original Patent, 30th April, 1859.)

8066. F. Ridaura-y-Abad, represented by H. Biebuyck, of Brussels, for an imported invention for "Cigaret paper."—Dated 8th October, 1859.—(French Patent, 18th February, 1859.)

8067. M. J. Coston, represented by Eug. Guillery, of Molenbeek St. Jean, for "Improvements in the construction and use of fireworks as signals."—Dated 8th October, 1859.

8068. V. A. Prou, represented by X. Raclot, of Brussels, a Patent of Improvement for "A hydro-atmospheric lever, applicable to railroads."—Dated 8th October, 1859.—(Original Patent, 12th March, 1859.)

8069. A. Bodart, of Brussels, for "An apparatus and process for manufacturing gas by means of rich tar or other substances containing much carburet."—Dated 8th October, 1859.

8070. A. Deru, of Hensy, for "A system of oiling wool applicable to cards."—Dated 10th October, 1859.

8071. Steven Brothers, of Liége, for "A system of jets d'eau with changing figures."—Dated 11th October, 1859.

8072. A. Hubart and V. Cantillon, of Liége, for "Manufacture of glass or porcelain casks."—Dated 8th October, 1859.

8073. D. Baligant, of Brussels, for "A continuous draught apparatus for chimneys."—Dated 10th October, 1859.

8074. A. Halbleib, of Brussels, for "A system of ironwork for blinds."—Dated 10th October, 1859.

8075. Carmier and Masson, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A system of axles applicable to all kinds of carriages."—Dated 10th October, 1859.

8076. C. B. Lehodey, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of inkstands."—Dated 10th October, 1859.—(French Patent, 6th October, 1859.)

8077. J. Rousselot and Co., represented by H. Biebuyck, of Brussels, for an imported invention of "An electromotive apparatus."—Dated 10th October, 1859.—(French Patent, 6th October, 1859.)

8078. J. De Lihatcheff, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of casks, tuns, &c."—Dated 10th October, 1859.

8079. H. Desplas, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A system of transmitting alternate motion applicable to machines for washing wool."—Dated 10th October, 1859.—(French Patent, 19th June, 1859.)

8080. P. Baudet, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A system of poniard-bayonets applicable to fire-arms."—Dated 10th October, 1859.—(French Patent, 1st October, 1859.)

8081. Dalifol and Co., represented by H. Biebuyck, of Brussels, for "Improvements in apparatus for using steam a second time."—Dated 10th October, 1859.

8082. Viney, Sommer, and Hamm, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Improvements in smoking-pipes, cigar-cases, &c."—Dated 10th August, 1859.—(French Patent, 16th August, 1859.)

8083. Viney, Sommer, and Hamm, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "Improvements in cigar-cases."—Dated 10th October, 1859.—(French Patent, 16th September, 1859.)

8084. J. Lagosse and Son, and F. Quentin, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of paper."—Dated 10th October, 1859.—(French Patent, 24th September, 1859.)

8085. V. Delperdange, of Schaerbeek, a Patent of Improvement for "Lamps with a superior reservoir."—Dated 10th October, 1859.—(Original Patent, 2nd July, 1859.)

8086. P. J. Fontaine, of Peruwelz, for an imported invention of "A parachute for mines."—Dated 11th October, 1859.—(French Patent, 14th March, 1859.)

8087. F. Michaux and Co., of Mons, for "A safety lamp for miners."—Dated 11th October, 1859.

8088. F. Michaux and Co., of Mons, for "A metrical counting log for measuring the speed of vessels."—Dated 11th October, 1859.

8089. S. J. Decroupet, of Beyne, Hensay, for "A system of jacks for mines."—Dated 12th October, 1859.

8090. B. M. Morillon, represented by C. Wenseleers, of Brussels, for an imported invention of "A system of pumps."—Dated 11th October, 1859.—(French Patent, 31st May, 1858.)

8091. Echard, Choumara, and Co., represented by C. Wenseleers, of Brussels, for an imported invention of "Improvements in agricultural implements."—Dated 11th October, 1859.—(French Patent, 26th December, 1855.)

8092. L. H. Rousseau, represented by O. Daillencourt, of Brussels, for an imported invention of "Machines worked by means of regenerated steam."—Dated 11th October, 1859.—(French Patent, 12th March, 1859.)

8093. De Dietrich and Co., represented by A. Anoul, of Ixelles, for an imported invention of "A prohibition railway disc."—Dated 11th October, 1859.—(Limonze's French Patent, 16th November, 1857.)

8094. A. Vanderjonckheydt, of Antwerp, for "A system of binding music-books."—Dated 12th October, 1859.

8095. J. Lambotte, of Auvelais, for "Manufacture of sulphate of soda and muriatic acid."—Dated 12th October, 1859.

8096. Gourmont Brothers, of Dinant, a Patent of Improvement for "A system of boilers for breweries."—Dated 15th October, 1859.—(Original Patent, 21st April, 1859.)

8097. H. J. Lambert, of Verviers, for "Horse-shoes for the ice."—Dated 15th October, 1859.

8098. A. Pollet and Son, of Tournai, for "Manufacture of soap."—Dated 15th October, 1859.

8099. E. Myers and H. Petit, of Saint Josse-ten-Noude, for "A gas meter, with a steady quantity of water."—Dated 12th October, 1859.

8100. G. Lemmen and F. H. Knickenberg, of Saint Josse-ten-Noude, for "A system of steam-towing."—Dated 12th October, 1859.

8101. J. L. Stevens, represented by Anoul, of Ixelles, for an imported invention of "Improvements in grates of fire-places of locomotive, marine, and other engines."—Dated 12th October, 1859.—(English Patent, 13th April, 1859.)

8102. A. Paget, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in apparatus for manufacturing open-worked tissues."—Dated 12th October, 1859.—(English Patent, 2nd April, 1859.)

8103. M. Mennig, represented by H. Biebuyck, of Brussels, for "A machine for compressing tubes of cartridges for fire-arms."—(Dated 14th October, 1859.

8104. F. Nivelle, represented by O. Daillencourt, of Brussels, a Patent of Improvement for "Sewing machines."—Dated 14th October, 1859.—(Original Patent, 15th September, 1859.)

8105. A. Dessart, of Limburg, for "A process for sizing warps previous to weaving."—Dated 17th October, 1859.

8106. P. Van Hercke, of Ostende, a Patent of Improvement for "An apparatus for preventing the back flow of smoke in chimneys."—Dated 18th October, 1859.—(Original Patent, 8th November, 1858.)

8107. Vermeire and Co., of Brussels, for "Rendering miners' cases or platforms flexible."—Dated 17th October, 1859.

8108. Vermeire and Co., of Brussels, for "Improvements in apparatus for working mines."—Dated 17th October, 1859.

8109. E. R. Handcock, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in steam engines and other apparatus for obtaining motive power."—Dated 17th October, 1859.—(English Patent, 8th April, 1859.)

8110. Féraud, Laureau, and Richard, represented by H. Biebuyck, of Brussels, for an imported invention of "A process for preserving organic substances."—Dated 17th October, 1859. —(French Patent, 31st August, 1859.

8111. F. Waefelaer, of Brussels, for an imported invention of "A cock for distributing water."—Dated 17th October, 1859.—(Thomas Kennedy's English Patent, 17th March, 1857.)

8112. L. Duhent, of Brussels, for "A threefold system of loading guns by the breech."—Dated 18th October, 1859.

8113. J. Eccles, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in machines for moulding bricks, tiles, and similar products."—Dated 18th October, 1859.—(French Patent, 8th October, 1859.)

8114. Everaert Brothers, of Brussels, for "A system of razors."—Dated 18th October, 1859.

8115. A. A. P. Mallet, represented by O. Daillencourt, of Brussels, a Patent of Improvement for "Utilizing heavy oils and naphthaline obtained by distilling coal and other tar."—Dated 18th October, 1859.—(Original Patent, 22nd October, 1858.)

8116. R. Lermusiaux, of Jemmapes, for "A system of sliding, being a substitute for slide blocks in horizontal steam engines."—Dated 18th October, 1859.

8117. J. Dumont, of Saint Josse-ten-Noode, for "A system for preserving the lustre and freshness of manufactured chocolate."—Dated 19th October, 1859.

8118. J. Brière, represented by A. Depuichault, of Schaerbeek, for "A system of scales with self-acting levers."—Dated 19th October, 1859.

8119. S. S. Hogle, represented by A. Crooy, of Brussels, for an imported invention of "Harrows with rotary motion."—Dated 19th October, 1859. —(American Patent, 17th March, 1857.)

8120. C. Mertens, of Brussels, for "A kind of fastenings, being a substitute for braces."—Dated 19th October, 1859.

8121. J. C. Goossens, represented by H. Biebuyck, of Brussels, for "A kind of printed and embroidered tissue."—Dated 19th October. 1859.

8123. L. Nagant, of Liége, for "A system of revolving pistols and rifles."—Dated 19th October, 1859.

8124. J. B. Geens-Persiaux, represented by D. Tassin, of Liége, for "Varnish for metals."—Dated 19th October, 1859.

8125. E. L. Montefiore, of Val-Benoît, for "Manufacture of zinc by a wet process."—Dated 20th October, 1859.

8126. Ch. Leyherr, represented by Alb. Picard, of Brussels, for an imported invention of "A continuous self-actor."—Dated 20th October, 1859,—(French Patent, 20th August, 1858.)

8127. J. Moll, of Brussels, a Patent of Improvement for "A disinfecting powder."—Dated 20th October, 1859.—(Original French Patent, 25th February, 1856.)

8128. L. Beckers, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "An apparatus for exhibiting stereoscopic paintings."—Dated 20th October, 1859. — (Original Patent, 1st December, 1857.)

8129. J. Aspinall, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in apparatus for evaporating liquids in a vacuum."—Dated 20th October, 1859.—(English Patent, 7th March, 1859.)

8130. R. W. Sievier, represented by H. Biebuyck, of Brussels, for an imported invention of "An apparatus for promoting the combustion of fuel." —Dated 20th October, 1859.—(French Patent, 7th October, 1859.)

8131. H. W. Ward, represented by F. Anthoine, of Brussels, for an imported invention of "A system of turn-tables of railways."—Dated 20th October, 1859.—(French Patent, 7th October, 1859.)

8132. H. W. Ward, represented by F. Anthoine, of Brussels, for an imported invention of "A system of wheels of locomotives and other railway carriages."—Dated 20th October, 1859.—(French Patent, 1st October, 1859.)

8133. L. Vernay, represented by A. Crooy, of Brussels, for an imported invention of "An apparatus for laying casks, sacks, and stones one above the other."—Dated 20th October, 1859.—(French Patent, 27th July, 1859.)

8134. G. C. Delettrez, represented by A. Crooy, of Brussels, for an imported invention of "A kind of mittens with ruffles."—Dated 20th October, 1859.—(French Patent, 3rd October, 1859.)

8135. J. Norris, junr., represented by J. Sainthill, of Brussels, a Patent of Improvement for "A machine for manufacturing nails by a hot process."—Dated 21st October, 1859.—(Original Patent, 15th July, 1856.)

8136. Mrs. De Morcoux, represented by L. Lebrun, of Brussels, for "A kind of pen."—Dated 21st October, 1859.

8137. J. Letoret, of Jemmapes, for "A system of distilling coal and other substances."—Dated 21st October, 1859.

8138. J. Delhove, of Maffles, for "A kind of plough."—Dated 22nd October, 1859.

8139. Aug. Lefebvre, of Braine-le-Comte, for "A system of distilling apparatus."—Dated 17th October, 1859.

PRUSSIA.*

List of Patents Delivered and Annulled between the 1st September and 31st October, 1859.

(*Communicated by the Minister of Commerce and Public Works.*)

1. Patents Delivered.

1. Friederich Georg Wieck, of Leipzig, for an imported invention of "An apparatus for boring wells, &c."—5 years. — Dated 9th September, 1859.

2. Becherer and Kesseler, of Greifswald, for "A press with a closed head-piece for making hollow bricks."—5 years.—Dated 17th September, 1859.

3. H. Egells, of Berlin, for "A rotary expansion steam engine."—5 years.—Dated 21st September, 1859.

4. Friedrich Adolph Schmidt, of Cologne, for "An improved mode of reverberating the sound in trumpets provided with valves."—5 years.—Dated 25th September, 1859.

5. A. F. Sicker and Adolph Ferdinand Arndt, of Grossenhayn, Saxony, for "A power loom."—5 years.—Dated 6th October, 1859.

6. Baldamus and Grüne, of Charlottenburg, for "A peculiar apparatus for obtaining lighting-gas."—5 years.—Dated 9th October, 1859.

7. J. H. F. Prillwitz, of Berlin, for an imported invention of "An apparatus for loading percussion fire-arms by the breech."—5 years.—Dated 14th October, 1859.

8. Albert Fesca, of Berlin, for "A centrifugal apparatus for extracting sugar juice from the residue of beetroot."— 5 years. — Dated 23rd October, 1859.

9. J. H. F. Prillwitz, of Berlin, for "A machine for moulding candles."—5 years. — Dated 23rd October, 1859.

10. J. H. F. Prillwitz, of Berlin, for an imported invention of "A regulator for machines worked by means of steam or other fluids."—5 years.—Dated 24th October, 1859.

11. Gottlob Seyrig, of Berlin, for "A break for centrifugal machines."—5 years. — Dated 26th October, 1859.

12. Eugen Langen, of Cologne, for "Grates laid one above the other."—5 years. — Dated 27th October, 1859.

* For the Prussian Patent Law, see Nos. 313 and 329 of this Journal.

2. Patents Annulled.

1. Albert Behl, of Magdeburg, for "A sewing machine."—Dated 15th June, 1858; annulled 2nd September, 1859.

2. Dr. H. Schwarz, of Breslau, for "Manufacture of starch-sugar."—Dated 1st September, 1858; annulled 10th September, 1859.

3. J. H. F. Prillwitz, of Berlin, for an imported invention of "A new grinding machine."—Dated 16th September, 1858; annulled 14th October 1859.

4. Heinrich Beinhauer, of Deutz, for "A machine for draining mines."—Dated 27th August, 1858; annulled 26th October, 1859.

COLONIAL PATENTS.

VICTORIA.

List of Letters Patent issued during the Year 1858.

(Continued from No. 508.—See page 1288 of Journal for 1858.)

Note.—The consecutive number shows how many Patents have been issued in the colony; and the chronological number the order in which the Specifications have been lodged.

117. Frederick Marlborough Moore, of Geelong, in the colony of Victoria, for an invention intituled "Improvements in machinery for boring, breaking, and cutting stone."—Dated 12th June, 1858.—Chronological No. 116.

118. James Farquharson Mackenzie and Robert Harper, of Lygon Street, North Melbourne, in the colony of Victoria, for an invention intituled "Improvements in roasting coffee and other seeds and roots; also in drying grain."—Dated 23rd September, 1858.—Chron. No. 163.

119. John Danks, Samuel Danks, and Thomas Danks, of Emerald Hill, in the colony of Victoria, for an invention "For the making of an artificial fuel."— Dated 30th September, 1858.—Chron. No. 166.

120. John Hartham and Ezra Hartham, both of Timbersbrook, near Congleton, in the county of Chester, England, for an invention intituled "An improved engine for obtaining motive power."—Dated 14th October, 1858.—Chron. No. 171.

121. Bernard Josephson, of Melbourne, in the colony of Victoria, for an invention for "The manufacture of gas."—Dated 15th October, 1858.—Chron. No. 172.

122. John Thomas, of Great Lonsdale Street, in the city of Melbourne, for an invention for "Circular and octagon billiard-bagatelle tables." — Dated 26th October, 1858.—Chron. No. 175.

123. Daniel Peterson and John Lidgate, of Melbourne, in the colony of Victoria, for an inven-

tion intituled "Improvements in applying the waste heat arising from the manufacture of coke." —Dated 10th September, 1858.—Chron. No. 152.

124. William Croker Cornish and John Vans Agnew Bruce, of Melbourne, in the colony of Victoria, for an invention intituled "Improvements in machinery for breaking stones."—Dated 18th September, 1858.—Chron. No. 1858.

125. Arthur Kinder, of the city of Worcester, England, for an invention intituled "Improvements in cutting irregular forms, and in the machinery or apparatus employed therein or connected therewith." — Dated 28th May, 1858. — Chron. No. 107.

List of Letters Patent issued during the year 1859.

126. John Hackett, of the city of Melbourne, in the colony of Victoria, for an invention of "An improvement in certain descriptions of carriages." —Dated 15th June, 1858.—Chron. No. 119.

127. James Hart, of Melbourne, in the colony of Victoria, for an invention intituled "Improvements in working stamps for stamping ores."—Dated 19th August, 1858.—Chron. No. 140.

128. James Foot Dow, of Melbourne, in the colony of Victoria, for an invention intituled "An improvement in the manufacture of shaking tables for dressing minerals."—Dated 14th May, 1858.—Chron. No. 103.

129. Edward Smith, of Prahran, in the county of Bourke, for an invention intituled "Improvements in obtaining gold from quartz."—Dated 23rd June, 1858.—Chron. No. 123.

130. John Kane Smyth, of Melbourne, in the colony of Victoria, for an invention intituled "Improvements in machinery for crushing quartz and for amalgamating."—Dated 29th October, 1858.—Chron. No. 177.

131. Charles Knight, of Russell Street, in the city of Melbourne, Victoria, for an invention intituled "A method of obtaining mercury and metallic substances from the human body."—Dated 24th November, 1858.—Chron. No. 178.

132. William Hilton, of Collingwood, in the county of Bourke, for an invention of "A stone and quartz-breaking machine."—Dated 30th August, 1858.—Chron. No. 47.

133. Richard Manuel, of Collingwood, in the county of Bourke, Victoria, for an invention intituled "Improvements in the construction of bridges."—Dated 6th September, 1858.—Chron. No. 149.

134. Richard Barrett and Henry Costin, both of Ballarat, in the colony of Victoria, for an invention of "Certain improvements in machinery for washing auriferous earths, parts of which are applicable to other useful purposes."—Dated 1st October, 1858.—Chron. No. 167.

135. Richard Fregaskis, of Tarrengower, in the colony of Victoria, for an invention of "Improvements in machinery for washing and grinding earthy matters containing gold and in amalgamation." — Dated 11th October, 1858. — Chron. No. 170.

136. Frederick William Nicholls, of Melbourne, in the county of Bourke, for an invention "For using water of a high pressure for a motion-giving power to machinery, called 'the water engine.'" — Dated 19th October, 1859.—Chron. No. 173.

137. John Thomas Saunders, of Sandhurst, in the colony of Victoria, for an invention intituled "Improvements in the manufacture of gas, and in apparatus for making gas from an oil from resin, and other oils and fatty matters."—Dated 26th October, 1858.—Chron. No. 174.

138. John Goyne, of Epsom, near Sandhurst, in the colony of Victoria, for an invention of "An improvement in manufacturing gratings used when stamping or crushing quartz or other minerals."—Dated 24th November, 1858.—Chron. No. 179.

139. John Stephen, of the city of Melbourne, Victoria, for an invention for "The effectual, speedy, and economical cooling of worts with ease and despatch."—Dated 21st December, 1858.—Chron. No. 183.

140. John Robert Richards the elder, of Little Collins Street West, Melbourne, Victoria, for an invention of "Improvements in apparatus for raising water."—Dated 29th December, 1858. —Chron. No. 186.

141. Robert McGavin, of the Clyde Galvanizing Works, Glasgow, N.B., Engineer, for an invention intituled "Improvements in manufacturing metal roofing plates."—Dated 9th February, 1859.—Chron. No. 197.

142. Thomas Tennant, of the city of Edinburgh, North Britain, for an invention intituled "Improvements in machinery or apparatus for crushing or pulverizing minerals."— Dated 9th February, 1859.—Chron. No. 198.

143. Angus Kennedy, of Sandhurst, in the colony of Victoria, for an invention intituled "Certain arrangements of machinery for treating earthy matters to obtain gold therefrom."—Dated 29th September, 1858.—Chron. No. 165.

144. John Robert Richards the elder, of Collin's Street West, in the city of Melbourne, for an invention intituled "Certain new and useful improvements in machines for forging, specially intended for forging nails, also applied to forge other articles."—Dated 26th January, 1859.—Chron. No. 195.

145. John Hart, of Adelaide, in the province of South Australia, for an invention intituled "Improvements in the manufacture of gas when oils or fatty matters are used, and in applying the refuse obtained in such manufacture to a useful purpose." —Dated 29th December, 1858.—Chron. No. 187.

146. Richard Jenkin Polglace, of Bourke Street West, in the city of Melbourne, for an invention intituled "Improvements in machinery for breaking stones."—Dated 30th August, 1858.—Chron. No. 146.

147. Frederick Courtin, of Maldon, in the colony of Victoria, for an invention intituled "Improvements in machinery for puddling and washing earthy matters to obtain gold therefrom."—Dated 21st September, 1858.—Chron. No. 160.

148. John Robert Richards and Alfred Grimshaw, both of the city of Melbourne, for an invention intituled "Improvements in burning gas."—Dated 23rd February, 1859.—Chron. No. 199.

149. William Elsdon, of Sandridge, in the county of Bourke, Victoria, for an invention intituled "A self-acting rotary platform, with a self-acting latch for railway purposes."—Dated 8th April, 1859.—Chron. No. 210.

150. Willis Humiston, of the city of Troy, state of New York, U.S. of America, for an invention intituled "Certain improvements in machinery for making mould candles."—Dated 3rd May, 1859.—Chron. No. 216.

151. George Richard Rowe Vivian, of Castlemaine, in the county of Talbot, Victoria, for an invention intituled "An improvement in working stamps used for crushing minerals."—Dated 3rd March, 1859.—Chron. No. 202.

152. David Wilkinson, of Melbourne, in the colony of Victoria, for an invention intituled "Improvements in obtaining gold and other metals from quartz."—Dated 7th June, 1858.—Chron. No. 113.

153. Stephen Richards and John Richards, both of Ballarat, for an invention intituled "Improvements in the manufacture of cradles to obtain gold from earthy matters, to be termed, 'The Tom sluicing cradle.'"—Dated 7th August, 1858.—Chron. No. 134.

154. Thomas Mathews, of St. Kilda, in the county of Bourke, for an invention intituled "An improvement in certain descriptions of mangles."—Dated 9th August, 1858.—Chron. No. 137.

155. Robert Savage, of South Melbourne, in the county of Bourke, for an invention intituled "Improvements in the mode of puddling and washing earth containing gold or other metals or minerals."—Dated 19th August, 1858.—Chron. No. 139.

156. Benjamin Hawkins Dods, of Green Street, in the city of Melbourne, Victoria, for an invention intituled "Improvements in pumps and cocks part of which improvements are appplicable to hydrants and other apparatus where valves are used."—Dated 22nd December, 1858.—Chron. No. 184.

157. Enoch Chambers, of Little Collins Street, in the city of Melbourne, for an invention intituled "A new method of bending and shaping iron and other metals, and compressing wood for railway and other purposes."—Dated 29th December, 1859.—Chron. No. 188.

158. Edward Henderson and John Frederick Droop, both of the city of Melbourne, for an invention intituled "Improvements in machinery for stamping minerals."—Dated 7th March, 1859.—Chron. No. 203.

159. William Stevens and George Hosking, both of Epsom, near Sandhurst, in the colony of Victoria, for an invention intituled "Improvements in the construction and working of harrows for puddling or reducing clay or other earthy matters."—Dated 9th May, 1859.—Chron. No. 219.

160. Henry Elder, of Bourke Street, of the city of Melbourne, Victoria, for an invention intituled "Certain improvements in working clocks."—Dated 6th June, 1859.—Chron. No. 225.

161. William Ogden Porter, of Melbourne, in the colony of Victoria, for an invention intituled "Improvements in the construction of shaking-tables for dressing minerals."—Dated 21st September, 1858.—Chron. No. 161.

162. George Jones, of Mercer Street, Geelong, in the county of Grant, Victoria, for an invention intituled "Improvements in the manufacture of boots, shoes, goloshes, and overalls."—Dated 3rd May, 1859.—Chron. No. 215.

Registrar General's Office, Melbourne,
16th September, 1859.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated 16th March* 1744.) Price

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 8*s.*

THE ALPHABETICAL INDEX for the above period. Price 6*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 612. TUESDAY, NOVEMBER 15, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1591. RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given notice at the office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "A cementing powder or mixture and process for cementing, converting, refining, strengthening, and steelifying iron."—A communication from abroad by Job Johnson, of East Brooklyn, Long Island, in the state of New York.

As set forth in his petition, recorded in the said office on the 4th day of July, 1859.

1606. And SAMPSON LLOYD, of Wednesbury, Staffordshire, has given the like notice in respect of the invention of "Improvements in the manufacture of cast steel tyres."

1608. And BENJAMIN SEED, of Keighley, Grease Manufacturer, and THOMAS STEEL, of Bradford, Foreman, both in the county of York, have given the like notice in respect of the invention of "Improvements in apparatus employed in the treatment of soap-suds or other saponaceous or oily matters."

1609. And JOHN THOMAS EDMONDS, of Prestwood, Great Missenden, in the county of Bucks, Ironfounder, has given the like notice in respect of the invention of "Improvements in winnowing or corn cleaning machines, parts of which are applicable for other screening or sifting purposes."

As set forth in their respective petitions, all recorded in the said office on the 6th day of July, 1859.

1615. And Sir FRANCIS CHARLES KNOWLES, of Lovell Hill, in the county of Berks, Baronet, has given the like notice in respect of the invention of "Improvements in making iron castings."

1616. And JOHN SMITH, of Norton Street, Cherry Square, New Radford, in the county of Nottingham, Lace Manufacturer, has given the like notice in respect of the invention of "Improvements in propelling ships and other vessels."

As set forth in their respective petitions, both recorded in the said office on the 7th day of July, 1859.

1619. And GEORGE ELLIS, of No. 4, Collier Street, Pentonville, in the county of Middlesex, Merchant, has given the like notice in respect of the invention of "The improvement of muffs, to be called 'the patent reticule travelling muff.'"

1623. And JOSEPH GIBBS, of Brentford, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of brushes, brooms, coverings for floors, mats, scrapers, and other scraping and rubbing surfaces."

1629. And WILLIAM HORATIO HARFIELD, of Fenchurch Street, in the city of London, has given the like notice in respect of the invention of "Improvements in ships' capstans and riding bits."

1630. And HENRY BRINSMEAD and JEREMIAH LAWRENCE, of Ipswich, have given the like notice in respect of the invention of "Rotatory screens."

1631. And JOHN TAYLOR, of Roupell Park, Streatham Hill, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in the construction of walls to prevent damp from rising, and also in tiles to be used for this purpose in building walls."

1632. And THOMAS DUPPA DUPPA, of Longville, Wistanton, Shropshire, has given the like notice in respect of the invention of "Improvements in carpenters' benches."

1634. And WILLIAM NEWZAM NICHOLSON, of Newark-on-Trent, Agricultural Implement Maker, has given the like notice in respect of the invention of "Improvements in machines for making and collecting hay, and for cutting thistles and weeds, which improvements, in whole or

in part, are applicable to other agricultural implements where teeth or tines are used."

1635. And WILLIAM NEWZAM NICHOLSON, of Newark-on-Trent, Agricultural Implement Maker, has given the like notice in respect of the invention of "Improvements in clod crushers and land and garden rollers."

As set forth in their respective petitions, all recorded in the said office on the 8th day of July, 1859.

1642. And JOHN SMITH, of Bradford, in the county of York, Engineer, has given the like notice in respect of the invention of "Improvements in apparatus for heating and cooling water."

As set forth in his petition, recorded in the said office on the 9th day of July, 1859.

1644. And ROBERT CLEGG, of Islington, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in machines for cutting wood and metal, and in the means of fixing saws thereto."—A communication from abroad by Felix Crampe, of No. 107, Rue de Vangirard, Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 11th day of July, 1859.

1653. And CAMILLE JOSEPH PROAL, of 4, South Street, Finsbury, London, Gentleman, has given the like notice in respect of the invention of "The application of photographic impressions or pictures upon fabrics or tissues for rendering such fabrics or tissues applicable to various useful purposes."—A communication from abroad by Jules Bernard, of Paris, France.

As set forth in his petition, recorded in the said office on the 12th day of July, 1859.

1656. And WILLIAM AUGUSTUS MUNN, of Throwley House, near Feversham, in the county of Kent, late a Major in the East Kent Militia, a Deputy Lieutenant and Justice of Peace for the said county of Kent, has given the like notice in respect of the invention of "Improvements in reaping machines."

As set forth in his petition, recorded in the said office on the 13th day of July, 1859.

1670. And RICHARD LONGSTAFF, of Mornington Road, New Cross, in the county of Kent, Pattern Maker, and ABRAHAM PULLAN, of Fortie Cottage, New Cross, in the same county, Engineer, have given the like notice in respect of the invention of "Improvements in traction or locomotive engines."

As set forth in their petition, recorded in the said office on the 14th day of July, 1859.

1678. And WILLIAM ORME CARTER, of 12, South John Street, Liverpool, in the county of Lancaster, has given the like notice in respect of the invention of "Improvements in machinery for sawing slate."

As set forth in his petition, recorded in the said office on the 15th day of July, 1859.

1695. And WILLIAM HORATIO HARFIELD, of Fenchurch Street, in the city of London, has given the like notice in respect of the invention of "Improvements in apparatus employed in getting ships' anchors and in shackling chains."

As set forth in his petition, recorded in the said office on the 18th day of July, 1859.

1698. And JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "A new system of eccentric socket adapted to axletrees."—A communication from abroad by Jean Baptiste Gangand, No. 10, Rue Mogador, Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 19th day of July, 1859.

1708. And ZEPHIRIN GASPARD ALEXANDRE NATHAN PETRONE ORIOLI, of 29, Boulevart St. Martin, Paris, in the empire of France, Civil Engineer, has given the like notice in respect of the invention of "New applications of hypochloride of alumina to bleaching and dyeing, and to the disinfection and preservation of organic matters."

As set forth in his petition, recorded in the said office on the 20th day of July, 1859.

1726. And WILLIAM HORATIO HARFIELD, of Fenchurch Street, in the city of London, has given the like notice in respect of the invention of "Improvements in capstans, riding bits, and stoppers for working with chains."

As set forth in his petition, recorded in the said office on the 23rd day of July, 1859.

1746. And WILLIAM HUDSON, of Burnley, in the county of Lancaster, Machinist, and CHRISTOPHER CATLOW, of the same place, Overlooker, have given the like notice in respect of the invention of "Certain improvements in looms for weaving."

1754. And WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Improved apparatus for turning over music leaves or sheets."—A communication from abroad by Hermine Madeleine Basset, of Boulevart St. Martin, Paris, in the empire of France.

As set forth in their respective petitions, both recorded in the said office on the 28th day of July, 1859.

1776. And THOMAS WRIGHT GARDINER TREEBY, of No. 1, Westbourne Terrace Villas, Upper Westbourne Terrace, Paddington, Middlesex, has given the like notice in respect of the invention of "Improvements in targets."

As set forth in his petition, recorded in the said office on the 1st day of August, 1859.

2042. And JOHN LOUIS JULLION and GORDON PIRIE, both of Stoneywood Works, Aberdeen, North Britain, Paper Makers, have given the like notice in respect of the invention of "The manufacture of gelatine, and apparatus to be employed therein."

As set forth in their petition, recorded in the said office on the 7th day of September, 1859.

2178. And George Addenbrooke, of Greenhill Wimbourn, Wolverhampton, has given the like notice in respect of the invention of "Improvements in raising and lowering boats and other vessels from one water level to another, applicable in inland navigation."

As set forth in his petition, recorded in the said office on the 26th day of September, 1859.

2262. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in blankets used for printing calicoes and other fabrics, and in the mode of washing or cleaning the same."—A communication from abroad by Seth W. Baker, of Providence, Rhode Island, in the United States of America.

As set forth in his petition, recorded in the said office on the 5th day of October, 1859.

2316. And Joseph Skertchly, of Ashby-de-la-Zouch, in the county of Leicester, Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of mosaic and other ornamental tiles and slabs, and in apparatus connected therewith."

2328. And Charles Peters Moody, of Corton Denham, in the county of Somerset, Gentleman, has given the like notice in respect of the invention of "A method of, and apparatus for, raising grass and other crops on to stacks, which apparatus is also applicable to raising and transferring weights."

As set forth in their respective petitions, both recorded in the said office on the 12th day of October, 1859.

2364. And Samuel Newberry, of Burnley, in the county of Lancaster, Manager, and Henry Moore, of the same place, Cotton Spinner, have given the like notice in respect of the invention of "Certain improvements in looms for weaving."

As set forth in their petition, recorded in the said office on the 17th day of October, 1859.

2392. And Charles Seton, of Edinburgh, in the county of Mid-Lothian, Coach Builder, has given the like notice in respect of the invention of "Improvements applicable to the wheels of carriages generally for the purpose of reducing the draught thereof."

2394. And George Hart, of No. 6, Chapel Street West, May Fair, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the manufacture of hats."

As set forth in their respective petitions, both recorded in the said office on the 19th day of October, 1859.

2410. And George Tomlinson Bousfield, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in apparatus for steering vessels."—A communication from abroad by E. N. Dickerson, of Park Row, New York, United States of America.

As set forth in his petition, recorded in the said office on the 21st day of October, 1859.

2416. And William Fox, of Amiens, in the department of the Somme, in the empire of France, Umbrella Frame Manufacturer, and James Willis, of Little Britain, in the city of London, Umbrella Manufacturer, have given the like notice in respect of the invention of "Improvements in the manufacture of umbrellas and parasols, part of which improvements is applicable to other purposes."

2423. And Francis North Clerk, of the firm of Peyton and Clerk, of Birmingham, in the county of Warwick, Edge Tool Manufacturers, and Charles Thomas, of Birmingham aforesaid, Foreman of Works, have given the like notice in respect of the invention of "Improvements in cleavers or choppers."

As set forth in their respective petitions, both recorded in the said office on the 22nd day of October, 1859.

2439. And Edwin Ellis, of St. Ann's Wells Road, Nottingham, has given the like notice in respect of the invention of "Improvements in the manufacture of lace, and in apparatus employed therein."

As set forth in his petition, recorded in the said office on the 25th day of October, 1859.

2477. And James Alfred Turner, of the city of Manchester, in the county of Lancaster, Paper Manufacturer, has given the like notice in respect of the invention of "Improvements in rendering paper waterproof."

As set forth in his petition, recorded in the said office on the 31st day of October, 1859.

2490. And Alfred Vincent Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "An improved mode of and apparatus for condensing and cooling vapour and fluids."—A communication from abroad by Ananias Smith, of Niagara Falls, in the United States of America.

As set forth in his petition, recorded in the said office on the 1st day of November, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

15th November, 1859.

1219. George Allcraft, of Upper Thames Street in the city of London, for an invention of "Improvements in pressure guages."—A communication from abroad by John Allcraft, of Bedford Street, New York.—Dated 16th May, 1859.

1226. Amèdée Etienne Charles Joseph Reynaud de Trets, of Marseilles, in the French empire, Gentleman, for an invention of "An improved composition for splitting rock."—Dated 17th May, 1859.

1227. James Nasmyth, of Surrey Street, Strand, in the city of Westminster, Engineer, for an invention of "Improved apparatus for obtaining and applying motive power."—Dated 17th May, 1859.

1231. Edward Charlesworth, of No. 1, De Grey Street, York, and No. 3, King William Street, Strand, in the county of Middlesex, for an invention of "Counteracting the recoil of small fire arms, and lessening the risk of injury arising from bursting of the same."—Dated 18th May, 1859.

1232. Samuel Norton Evans, of Chapel Yard, North Street, Wolverhampton, in the county of Stafford, Commission Agent, for an invention of "Improved mechanism for preventing accidents at mines from overwinding."—Dated 18th May, 1859.

1238. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in heating."—A communication from abroad by Stanislas Lebobe, of Paris.—Dated 18th May, 1859.

1240. Johan Valda, of London, in the county of Middlesex, for an invention of "Improvements in stud-fastenings, and a system of ornamenting and adapting belts, cravats, ribbons, draperies, and other articles to stud fastenings."—Dated 20th May, 1859.

1241. George Walker, of Old Nickols Street, Church Street, Shoreditch, in the county of Middlesex, for an invention of "Certain improvements in swing looking glasses."—Dated 20th May, 1859.

1244. George John Parfitt, of the city of Bath, in the county of Somerset, City Surveyor, for an invention of "Improvements in gas burners."—Dated 20th May, 1859.

1282. George Hadfield, of Carlisle, in the county of Cumberland, Varnish Manufacturer, for an invention of "An improved arrangement of heating and evaporating apparatus."—Dated 24th May, 1859.

1334. James Lee Norton, of Belle Sauvage Yard, Ludgate Hill, in the city of London, for an invention of "Improvements in machines for stretching and drying fabrics, and in drying wool and other fibres."—Dated 30th May, 1859.

1354. Samuel Wood and John Wood, both of the city of Manchester, Embroiderers, and Phillip Billington, of Rusholme, near the city of Manchester, Mechanic, for an invention of "Certain improvements in and applicable to machines for embroidering."—Dated 2nd June, 1859.

1360. Jean Baptiste Pascal, of Paris, in the empire of France, Civil Engineer, for an invention of "Improvements in hot-air engines."—Dated 2nd June, 1859.

1365. Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "An improvement or improvements in the manufacture of iron and steel."—Dated 3rd June, 1859.

1384. Willoughby Green, of 2, Victoria Street, in the city of London, and of Leeds, in the county of York, for an invention of "Improvements in mowing machines."—Dated 6th June, 1859.

1385. Charles Pooley, of the city of Manchester, Cotton Spinner, for an invention of "Improvements in machinery for preparing to spin, and for spinning cotton and other fibrous materials."—Dated 7th June, 1859.

1404. Joseph Henry Tuck, of 34, Great George Street, Westminster, for an invention of "Improvements in breakwaters, sea walls, and like structures."—Dated 9th June, 1859.

1405. Enos Welsford, of Bona Algeria, Proprietor, for an invention of "Improvements in tanning."—Dated 9th June, 1859.

1438. Edward Humphrys, of Deptford, in the county of Kent, for an invention of "Improvements in marine steam engines."—Dated 15th June, 1859.

1445. William Birkmyre, of Port Glasgow, in the county of Renfrew, North Britain, Manufacturer, for an invention of "Improvements in drying, treating, and preparing yarns or thread."—Dated 16th June, 1859.

1474. William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for an invention of "An improved method of supplying furnaces with hot air."—A communication from abroad by Messrs. Addison Calvin Fletcher, of Cincinnati, Ohio, and George Ambrose Redman, of New York City, Gentleman, United States of America.—Dated 18th June, 1859.

1483. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved apparatus for blowing off water from steam boilers."—A communication from abroad by James Havey Washington, of Baltimore, in the United States of America.—Dated 20th June, 1859.

1491. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improvement in tailors' and other shears."—A communication from abroad by James H. Roome, of New York, in the United States of America.—Dated 21st June, 1859.

1551. John Joseph Griffin, of 119 and 120, Bunhill Row, in the county of Middlesex, for an invention of "Improvements in gas furnaces suitable for fusing refractory metals."—Dated 29th June, 1859.

1847. Walter Mac Lellan, of Glasgow, in the county of Lanark, North Britain, Iron Merchant, for an invention of "Improvements in parts of the permanent way of railways."—A communication from abroad by John Gregory, of Lisbon, in the kingdom of Portugal, Engineer.—Dated 9th August, 1859.

2193. Thomas Sutton, of St. Brelade, in the Island of Jersey, Gentleman, for an invention of "Improvements in the construction of apparatus for taking photographic pictures, consisting of and entitled 'an improved panoramic lens for taking photographic pictures.'"—Dated 28th September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 12th November, 1859, inclusive.*)

10th November.

2641. Andrew Barlow, of Shirley, in the county of Hants, Brewer, for an invention of "Improvements in mashing apparatuses." — Dated 10th November, 1856.

2642. François Jules Manceaux, of Paris, in the French empire, Manufacturer, and Eugène Napoleon Vieillard, of the same place, Gunsmith, for an invention of "An improvement in breech-loading fire-arms and ordnance."—Dated 10th November, 1856.

2648. William Smith, of 10, Salisbury Street, Adelphi, Civil Engineer, for an invention of "Improvements in machinery for sewing cloth and other materials."—A communication from Edward Howard and others, of Massachusetts, United States.—Dated 11th November, 1856.

2657. Julian Bernard, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, for an invention of "Improvements in the manufacture or production of boots and shoes or coverings for the feet, and in the machinery or apparatus employed in such manufacture."—Dated 11th November, 1856.

2671. William Green, junior, of Framwellgate Colliery, near Durham, in the county of Durham, Colliery Viewer, and Thomas Storey, of the same place, Engine Wright, for an invention of "Improvements in machinery or apparatus for washing or cleaning coal."—Dated 12th November, 1856.

2700. Nicolas Pierre Joseph Leseure, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of No. 4, South Street, Finsbury, London, Gentleman, for an invention of "An improved embroidering machine."—Dated 15th November, 1856.

11th November.

2668. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in the preparation of fibres for spinning, and in machinery employed therein."—A communication from H. Hofer.—Dated 12th November, 1856.

2681. The Honorable William Erskine Cochrane, of No. 5, Osnaburgh Terrace, Regent's Park, in the county of Middlesex, for an invention of "Improvements in the permanent way of railways."—Dated 14th November, 1856.

2768. Alexander Clark, of Gate Street, Lincoln's Inn Fields, in the county of Middlesex, Engineer, for an invention of "Improvements in the application and construction of revolving window shutters and blinds, and metal window sashes."—Dated 21st November, 1856.

2777. William Edward Laycock, of Sheffield, in the county of York, Manufacturer, for an invention of "Improvements in looms for weaving."—Dated 22nd November, 1856.

12th November.

2674. Charles Wastell Dixey, of 3, New Bond Street, in the county of Middlesex, of the firm of C. W. Dixey and Co., Opticians, Mathematical and Philosophical Instrument Makers to Her Majesty, for an invention of "Improvements in double opera glasses and other glasses of a similar nature."—Dated 13th November, 1856.

2680. John Kinniburgh, of the town and county of Renfrew, North Britain, Foundry Manager, for an invention of "Improvements in moulding or shaping metals."—Dated 13th November, 1856.

2706. John Billing, of Abingdon Street, Westminster, in the county of Middlesex, Architect, for an invention of "Improvements in chimneys."—Dated 15th November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 12th November, 1859, inclusive.*)

11th November.

808. George Wilson, of the York Glass Company, in the city of York, for an invention of "An improved manufacture of glass bottles and jars."—Dated 20th November, 1852.

12th November.

755. James Robertson, of Glasgow, in the county of Lanark, North Britain, Cooper, for an invention of "Improvements in the manufacture of casks and other wooden vessels."—Dated 15th November, 1852.

FOREIGN PATENTS.

THE NETHERLANDS.

List of Patents Delivered since the 2nd July, 1859.*

(*Communicated by His Excellency the Minister of the Interior.*)

(For previous List, see No. 576 of this Journal.)

1. R. Passenger, of Rotterdam, represented by A. S. Preston, of Rotterdam, for "Improvements in washing machines."—10 years.—Dated 22nd January, 1858.
2. D. H. Carpenter, of New York, represented by J. De Bas, of Gravenhage, for an imported invention of "Improvements in lamps for burning camphine, naphtha, &c."—10 years.—Dated 5th May, 1858.

* For the Dutch Patent Law, see No 289 of this Journal.

3. Charles and Cler, of Paris, represented by L. J. Vonk, of Gravenhage, for an imported invention of "Improvements in the bars of grates and grates."—10 years.—Dated 20th June, 1858.

4. E. Delloye, of Lacken, represented by J. J. Van Dort, of Gravenhage, for an imported invention of "A new mode of obtaining pure saltpetre without refining."—15 years.—Dated 20th June, 1858.

5. F. D. Lepreux, of Paris, represented by L. J. Vonk, of Gravenhage, for "Improvements in machines for collecting and treating turf."—5 years.—Dated 13th July, 1858.

6. P. Pimont, of Rouen, represented by J. J. Van Dort, of Gravenhage, for an imported invention of "A new composition for coating walls of buildings, vessels, or machines."—5 years.—Dated 15th July, 1858.

7. S. Carpmael, of London, represented by A. S. Preston, of Rotterdam, for an imported invention of "Improvements in the construction of railways, and especially of rails."—10 years.—Dated 14th September, 1858.

8. Ch. Manuel, of Dijon, represented by Van Vlissingen van Heel and Derosne Cail and Co., of Amsterdam, for an imported invention of "Improvements in centrifugal machines for the manufacture of beetroot sugar."—15 years.—Dated 21st July, 1859.

9. H. Bourdon, of Paris, represented by Paul Van Vlissingen and Dudok Van Heel, of Amsterdam, for an imported invention of "Improvements in machines called 'hydro-pyrogènes-ignifères,' for applying steam and heat as a motive-power."—5 years.—Dated 21st July, 1859.

10. B. Andreae, of Buckan, near Magdeburg, represented by Van Vlissingen, Van Heel, and Derosne Cail and Co., of Amsterdam, for an imported invention of "An apparatus for bringing back condensed steam from the worms and double bottoms of boiling pans to the boilers."—5 years.—Dated 9th September, 1859.

11. C. Remy, of Delfshaven, for an "Improved yeast-press."—5 years.—Dated 10th September, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 25th October, 1859, and each bearing that date.

No. 25,873. Benjn. F. Avery, of Louisville, Ky., for an "Improvement in moulding ploughs."

"I claim the peculiar construction of the patterns B, C, of the short land side, as set forth, so that they may be drawn at opposite angles from each other, for the purpose and in the manner herein specified."

No. 25,874. G. H. Babcock, of Westerly, R.I., for a "Bronzing machine."

"I claim, first, in combination with mechanism for conveying the sheet, the use of rubbing cylinder E, and brush F, one or more of each, for the purposes and operating substantially in the manner herein described. Second, I claim the use of one or more stationary rubbers H, or their equivalents, for the purposes specified. Third, I claim the wires *x*, *x*, *x*, *x*, or their equivalents, for freeing the brush from the powder. Fourth, I claim constructing the gripper in the manner described, whereby I obtain the advantages above set forth. Fifth, I claim enclosing the rubbing and brushing cylinders in a case, for the purpose of retaining the powder and preventing waste."

No. 25,875. John W. Barcroft, of Friendship, Va., for an "Improvement in ditching machine."

"I claim, first, the combination of a revolving wheel B^2, having its buckets or scoops C, set tangentially with a stationary circular guard I, and an adjustable scraper G, substantially as and for the purposes set forth. 2nd, having the buckets or scoops hung on an axis D, at the centre of their length, and adjustable at both ends, substantially as and for the purposes set forth. 3rd, providing sharp cutters *a*, projecting at right angles from the centre of the scoop, substantially as and for the purposes set forth."

No. 25,876. Wm. T. Barnes, of Buffalo, N.Y., for an "Improvement in sewing machines."

"I claim the arrangement of the threaded elastic looper H, as constructed with a receiving and transferring spring G, when the two are secured on opposite sides of the needle, and operated to and from the needle by means of levers E and F, connecting rods D and D^1, and frames C, C, the several parts being combined and connected, substantially as and for the purpose herein specified."

No. 25,877. Mellen Battel, of Albany, N.Y., for an "Improvement in coal sifters."

"I claim the stationary ploughs and brushes and rubbers, in combination with the horizontal revolving sieve, as hereinbefore described and set forth, and made to operate."

No. 25,878. C. F. E. Blaich, of Elyria, O., for an "Improved apparatus for operating rudders."

"I claim the combination of the rudder B, C, spiral ribs D, and spirally grooved sliding tube E, substantially in the manner and for the purposes set forth."

No. 25,879. C. C. Bomberger, of West Carlisle, O., for an "Improved method of elevating water."

"I claim the arrangement of the air-tight boxes C, F, connected by the pipe G, and communicating respectively with the pipes A, D, in connection with the open vessel E, tube H, and the valves *b*, *o*, placed in the tube H and pipe P, and operated automatically as shown, or in an equivalent way, for the purpose set forth."

No. 25,880. W. Newton Brown, of New York, N.Y., for an "Improvement in mechanism for converting rotary into reciprocating motion."

"I claim the rock shaft D, having a hollow hub F, substantially as described, in combination with the oblong ring H, and rotating cam J, the said parts being made and operating in the manner set forth and for the purposes described."

No. 25,881. Martin J. Butler, of Nashville, Tenn., for an "Improved floating safety cabin."

"I claim the arrangement of the detached boat shaped cabin A, gate propeller I, J, K, M, jointed hinged straps D, D, wedge E, rudder F, windlass G, ordinary vessel O, valve S, R, Q, and passage P, and stairs N, all in the manner and for the purpose herein set forth."

No. 25,882. Mortimer M. Camp, of New Haven, Conn., for an "Improved surf life-boat."

"I claim, 1st, the combination of the water-ballast chamber D with the aperture E, and air pipe H, for the purpose of ballasting the boat when she enters the water, and of lightening it when she touches and reaches the shore as herein set forth. 2d, the combination of the valve F with the ballast chamber D and aperture E, for the purpose specified. 3rd, the combination of the floors C and G, for the purpose of forming the air chamber M beneath the working floor, and between the two floors as herein described. 4th, the combinations of the divisions I^1, I^1, with the working floor G, to form receptacles between said divisions, and the sides of the boat as and for the purpose set forth."

No. 25,883. JOHN R. CANNON, of New Albany, Ind., for an "Improvement in the construction of glass coffins."

"I claim constructing a coffin of glass, the body of which is provided with a groove *x*, *x*, and the lid with a flange *a*, *a*, and a pump B, the lid being secured to the body, by means of metallic bands D, D, substantially as and for the purpose specified."

No. 25,884. M. H. COLLINS, of Chelsea, Mass., for an "Improvement in machines for bolting flour, &c."

"I claim, 1st, a curved frame in which are placed one or more bolting sieves *d*, *g*, this frame being open at each end for the discharge of bran or other coarse material, substantially as and for the purposes set forth. 2nd, the combination with the curved frame and sieves of a corrugated rubber *t*, the frame and sieves having a vibrating motion in the path of a circle, while the rubber remains stationary, substantially as and for the purposes set forth. 3rd, the arrangement of sieves of different sized meshes, and having the same vibrating motion on the circular vibrating frame, and in the relation shown to a fan wheel, which causes a draft at the back of the machine, substantially as and for the purposes set forth."

No. 25,885. CHAUNCEY O. CROSBY, of New Haven, Conn., for an "Improvement in sewing machines."

"I claim, 1st, the rotary bobbin case H (armed with the inclined loop spreader H^1, and supporting on a pin *w* in its centre, the bobbin G, which holds one of the threads), in combination with the loop detainer *x*, when the whole is constructed, arranged, and made to operate substantially as and by the means herein described. 2nd, I claim the method of detaining the loop of the needle thread after the loop has passed the full diameter of the bobbin case, by the projection and inclined plane terminating in a point on the buffer. 3rd, I claim the frame or form composed of the curved bar O, bar R, and foot *k*, in combination with the bolt D^1, elbow-shaped lever *i* (carrying the pieces *g*), and friction cap a^1, when the whole is constructed, arranged, connected, and made to feed the material, substantially as herein described."

No. 25,886. JAMES CUMMING, of Boston, Mass., for an "Improvement in drilling machines."

"I claim, 1st, the arrangement of the notched interlocking slides H, H^1, right and left screws G, G, pinions E, E, *d*, *d*, shaft D, bed plate C, I, and upright drill J, all for operation together in the manner and for the purpose described. 2d, the combination of the drill arbor J, hollow swivel oiling cup K, L, independently rising and falling rod J, and disk *k*, attached in the manner and for the purpose herein described."

No. 25,887. R. C. CYPHERS, of Milledgeville, Geo., for an "Improved washing machine."

"I claim, first, the arrangement of the elastic suspended concave B, with slats *f*, pivoted to elastic strips *g*, in combination with the jointed spring rubber C, substantially as and for the purpose described. Second, in combination with the jointed spring rubber C, I claim the employment of a flexible band or rope *m*, for the purpose of securing the clothes to the rubber substantially as specified. Third, the arrangement of the central slat f^1, in combination with the elastic suspended concave B, and grooves *n*, substantially as and for the purpose set forth."

No. 25,888. HORACE L. EMERY, of Albany, N.Y., for an "Improvement in harvesters."

"I claim, 1st, combining with the cutter bar an adjustable arm or lever, provided with a roller or other means of sliding easily upon the ground, for the purpose of sustaining the cutter bar at any required distance from the ground, or allowing it to rest upon the ground at pleasure, for purposes herein set forth. 2nd, I also claim placing said arm directly in rear of the shoe, in order that it may be prevented by said shoe from clogging, as described. 3rd, I also claim connecting said arm by a rod along the back of the cutter bar with a lever near the frame of the machine, so that the attendant may elevate and depress the cutter bar at pleasure."

No. 25,889. GEORGE M. EVANS, of Pittsburgh, Pa., for an "Improvement in seed planters."

"I claim the combination and arrangement of the seed drums (*x*), elevators (*e*) on the belt (*f*), with the compartments (1, 2, and 3) of hopper (*d*), the cranks (*i* and *j*), the connecting rods (*k*), the ratchet wheels (*g*, B, and B 1), and the wheel (*b* 1), as herein described, and for the purpose set forth."

No. 25,890. H. B. FAY, of New York, N. Y., for an "Improvement in coffee pots."

"I claim the arrangement of the tube *d*, in combination with the adjustable double strainer D, that is arranged in a pot A between the spout and the liquid, substantially as and for the purpose specified."

No. 25,891. FELIX A. FINN, of New York, N. Y., for an "Improvement in studs and sleeve fasteners."

"I claim, first, the swivel bar and arm, arranged and operating as above specified, for the purpose set forth. I also claim, in combination therewith, the dovetail stud *m*, to confine the front end of the arm *f* when closed upon it, as and for the purposes set forth. I also claim the projecting screw *c*, against which the spring acts, as above described. I also claim, in combination with the above devices, the spring constructed and arranged as herein set forth."

No. 25,892. FREDERICK O. DEGENER, of New York, N. Y., for an "Improved automatic fan."

"I claim the arrangement and combination of a rotary fan blower with the hollow vibrating or distributing fan, for the purpose of producing a current of air and causing it to be distributed, substantially as and for the purpose specified."

No. 25,893. B. WELLS DUNKLEE, of Boston, Mass., for "Improved valves for stoves, furnaces, &c."

"I claim the side plates *a*, *c*, projecting from and connected with the hoe valve *b*, as related to each other, and in respect to the openings *h*, *h*, and flue F, substantially in manner, and for the purpose as above described."

No. 25,894. WM. FRIDLEY and FREDERICK CORNMAN, of Carlisle, Pa., for an "Improvement in preserve cans."

"We claim the employment of a perforated cover B, in combination with the gasket C and mouth (*b*, *b*), as herein shown and described, so that the gasket constitutes virtually a portion of the cover of and an index to the condition of the contents of the vessel."

No. 25,895. W. C. GEER, of Rockville, Conn., for an "Improvement in machine for cleaning and opening flock."

"I claim the employment or use of a revolving cone or cylinder C, provided with toothed lugs *a*, and placed within a correspondingly-shaped toothed shell B, in combination with the toothed cylinder I, concave J, and fan G, arranged for joint operation, substantially as and for the purpose set forth."

No. 25,896. DANIEL GORDON, of Evansville, Ind., for an "Improvement in implement for boring earth."

"I claim arranging the blades (*c*) on the convex surface of the bottom of the auger and extending the cut beyond the periphery, as represented. I also claim arranging the valves in the concave sides of the bottom of the auger, as set forth."

No. 25,897. DANIEL HESS, of West Union, Iowa, for an "Improvement in machinery for cleaning cotton."

"I claim, 1st, the curved metallic division F in combination with the front rollers B, B, and the bolting cloth, substantially in the manner and for the purpose set forth. 2nd, the combination of the fan C and case E with the back rollers B, B, and the bolting cloth D, for the purpose of cleansing the cloth from fibres of cotton, substantially as specified."

No. 25,898. SILAS HEWIT, of Seneca Falls, N. Y., for an "Improvement in pumps."

"I claim the plunger or bucket, when constructed in the manner and for the purposes set forth."

No. 25,899. ISAAC HOSKINS and JOSIAH HOSKINS, of Wilmington, Ohio, for an "Improvement in ditching and grading machine."

"We claim making the side wheel adjustable, so as to raise and lower the side of the frame to level or adjust it, as desired. We claim a bell made of bars with projections or flanges at each end, arranged to travel under cleats on the sides of the frame or trough, substantially as described."

No. 25,900. Anthony Iske and Jacob Teufel, of Lancaster, Pa., for an "Improved door latch and lock."

"We claim the arrangement and combination of the curved swivel lever D, bolt H, with its peg *f*, and projecting end to answer both for turning, pulling, and pushing, as shown, together with the revolving lever *s*, for operating the lock, when these several parts are made for the purpose and in the manner described or herein specified."

No. 25,901. Edwd. H. Jones, of Albany, N. Y., and Robt. Stevenson, of Schnectady, N. Y., for an "Improvement in furnaces for steam boilers."

"We claim the arrangement of the hopper-shaped grate box B, D, so constructed as to be adjustable in height, combined with the grates E, E, having means attached for rocking or agitating them, in their relation to each other and to the boiler firebox A, in the manner and for the purposes set forth."

No. 25,902. Saml. F. Jones, of St. Paul, Ind., for an "Improvement in mole plough."

"I claim, 1st, the employment of the ball *a*, not generally, but when said ball is secured in such a manner upon the top of the rear of the mole that it will revolve when the mole is in motion for the purpose of arching the top of the drain, and closing the opening of the coulter, substantially as set forth. 2nd, the combination of the nose E, mole D, ball *a*, rod *d*, and wheel F, when the same are used for the purpose of forming and arching the drain and closing the opening of the colter, substantially as and for the purpose set forth."

No. 25,903. Louis Koch, of New York, N. Y., for an "Improvement in moving tread power."

"I claim, first, the described mechanism, or its equivalent, when operated by the feet of man or animal in stepping on the ends of bands or cords during the act of walking. Secondly, I claim using the weight of man or animal in stepping on bands, or their equivalent, as a cause of resistance against the propelling of the machine, and giving motion by the walking of said man or animal to said mechanism, or its equivalent, independently of the motion of the wheels on which the whole mechanism is supported, substantially as described."

No. 25,904. Charles N. Lovejoy, of Columbia, S. C., for an "Improvement in cotton presses."

"I claim the guides Y for guiding the chains W and X upon fusee wheels S, and the follower I, block J, and windlasses T and Z, arranged and operated with each other and in the manner as described, when combined with the cotton box E, F, and G, and its operative parts L and S, in the manner described and for the purposes fully set forth."

No. 25,905. John McNeven, of Brooklyn, N. Y., for an "Improvement in skirt supporters."

"I claim the within-described dress supporter, consisting of a hoop A and stiffeners C, branching off from said hoop A, the wristband G, and tapes J, J, when the same are arranged, and combined, and applied to the body, substantially in the manner and for the purposes herein described."

No. 25,906. L. H. Miller, of Baltimore, Md., for an "Improvement in doors for iron safes."

"I claim the combination of the tongue *f*, groove *d*, flanges *b*, b^1, b^2, b^3, V-shaped mouldings *c*, *c*, and V-shaped grooves *e*, *e*, in the construction of a fireproof safe or bank vault, substantially in the manner and for the purpose herein described."

No. 25,907. Thos. Moore, of Minneapolis, Minn., for an "Improved apparatus for generating steam."

"I claim the employment, in combination with a steam engine or other apparatus in which steam is used, and the boiler which supplies it, of a system or arrangement of one or more condensers and heaters, with connecting pipes and a tank, whereby the exhaust steam, after passing along a pipe running through the boiler itself, is condensed by delivering up its remaining latent heat to water, which, after having been previously condensed in the same manner, is on its way back to the boiler, and whereby the water obtained by the condensation of the exhaust steam is heated on its way back to the boiler, and partly converted into steam again by the combined agencies of the latent heat it absorbs from the escaping steam, and by the heat it absorbs from the escaping waste production of combustion, substantially as herein described."

No. 25,908. James W. Neff, of Sacramento, Cal., for an "Improvement in windmills."

"I claim the arrrangement of the sails 'D,' arms or spokes 'G,' and hub 'E,' as described, and placing them in rear of the spiral spring 'A' and flange 'B,' and connecting flange 'B,' with sails 'D,' by rods 'F,' the whole operating as described and for the purposes set forth."

No. 25,909. George Neilson, of Boston, Mass. for an "Improvement in coffee pots."

"I claim the reversible cafetiere as composed of the boiler A, the filtering biggin B, the foraminus cup or strainer C, and the condenser or coffee pot D, having a spout *h* and cap *i*, the whole being arranged in manner and so as to operate as herein-before explained. I also claim the combination of the air and tell-tale pipe *c* with the boiling vessel A, the condensing vessel D, the biggin B, and the strainer or cap C, the object or purposes of the said pipe being as explained."

No. 25,910. Adrian V. B. Orr, of Lancaster, Pa., for an "Improvement in nail machines."

"First, I claim combining in a single pair of dies, constructed as described, the operations of cutting, pressing and gripping the nails or spike, substantially as specified. 2nd, I claim the slide point O, operating as described, in combination with the slide *h*, arranged as specified and for the purposes as set forth."

No. 25,911. Geo. F. Outten, of Norfolk, Va., for an "Improvement in car brakes."

"I claim the combination and arrangement of slide H, pawl *g*, spring *a*, ratchet wheels B, and chain I, levers *d* and *b*, and spring *h*, operating automatically or by hand, as may be desired, as herein set forth and described."

No. 25,912. Elhanaan Puffer, of Oxford, N. Y., for "Improved apparatus for raising water from wells, &c."

"I claim producing and controlling the movements of the windlass roller A, upon and with its actuating shaft B, in such a manner as to prevent the necessity of ever imparting a reverse rotary movement to the windlass shaft, whilst operating said apparatus, and by means substantially the same as those herein represented and described. I also claim combining the valve *j*, which closes the discharging aperture in the bottom of the bucket (C), with the inner end of the lever *h*, which is pivoted to the after edge of the mouth of said bucket, when arod *l*, or the equivalent of the same, is so situated within the curb as to be taken hold of by the hooked shaped outer end of said lever, just before the bucket reaches its highest position, for the purpose of causing the further upward movement of said bucket to throw forward its bottom and discharge its contents, substantially as herein set forth."

No. 25,913. T. J. W. Robertson, of New York, N. Y., for an "Improvement in sewing machines."

"I claim the arrangement and combination of the carrier M, spring plug Q, and vibrating arm L, substantially as and for the purposes herein shown and described."

No. 25,914. Alfred Rose, of Penn Yan, N. Y., for an "Improved churn dasher."

"I claim the churn dasher when made in the manner substantially as specified and set forth."

No. 25,915. Albert W. Roberts, of Hartford, Conn., for an "Improved disengaging hook."

"What I claim as a new article of manufacture is, a hook consisting of a hook link E, with bearer G on its side, in combination with the jointed ring A, lever D, crank pin c^1, and collar *c*, substantially as described."

No. 25,916. F. M. Robinson, of Conneautville, Pa., for an "Improvement in mills for crushing sugar-cane."

"I claim the combination of the flanged journal boxes D with the flanged sockets (*e*), in connection with the flanges (*g*, *h*), of the above parts, all as and for the purpose herein shown and described."

No. 25,917. Samuel Samuels, of Brooklyn, N.Y., for an "Improvement in reefing fore and aft sails."

"I claim supporting the rolling boom in two bearings, one of which is in a truss connected with the mast by a hoop, or its equivalent, and the other in a ring, which is held by the lift and braces, substantially as herein specified. And I further claim the combination with the rolling boom of the gyp. cy purchase, applied as herein described."

No. 25,918. Irwin B. Sawyer and F. Alsop, of Springfield, Ill., for an "Improvement in sewing machines."

"We claim the use of the hook *q* formed and moving substantially as described, combined with the shuttle and needle, substantially as described, and for the purpose specified."

No. 25,919. Thomas S. Seabury, of Stony Brook, N. Y., assignor to R. B. Gorsuch, of New York City, for a "Piano-forte action."

"I claim, first, pivoting the hammer butt to a post, or its equivalent, carried by its respective key, substantially as herein specified, for the purpose of enabling it to be withdrawn from the instrument along with the key. Second, the suspended jack or fly lever E attached to the hammer butt, and provided with a notch *e*, operating in combination with stationary rail F, substantially as herein described. Third, the arrangement of the regulating screw in the suspended jack or fly lever, in combination with the inclined plane *f* on the post erected upon the key to carry the hammer, substantially as herein described; but I wish to be understood as not claiming generally either the placing of the regulating screw in the jack or the employment of an inclined plane or wedge, to act in combination with an inclined or wedge-like surface. Fourth, the check H applied to the bottom of the key, and operating in combination with the suspended jack or fly lever, substantially as herein described."

No. 25,920. Isaac M. Singer, of New York, N.Y., for an "Improvement in carriages."

"I claim the arrangement in the main body of the carriage of the low seats, in combination with elevated seats, arranged in manner substantially as above described, and for the purposes set forth. I also claim, in combination with the back depressed and elevated seats, as described, the arrangement of the hinged partition, to answer the three-fold purpose of a step to get to the elevated back seats, as a back to the middle depressed seat, and to separate the feet of the persons sitting on the elevated seat from the persons sitting on the depressed seats. I also claim, in combination with the front elevated seats, as described, the arrangement of the hinged step leading to the elevated seats, together with its dirt flap, as described, for the three-fold purpose of a step to the elevated seats, a dirt protector, and of a seat in case of necessity. I also claim the arrangement of the boot for baggage in the space between the bottom and the front elevated seats, with doors at the sides, as described, thus placing the weight below, and concentrating it on the front axle, as described. I also claim the combination with the main body of the carriage the placing the coupé at the rear thereof, and communicating therewith by a doorway through the back, as described. I also claim depressing the coupé at the back of the main body that the bottom of both may extend below, and leave the required open space for the rear axle and its connections, and that the top of the coupé may form a footboard to the seats at the back edge of the top of the main body, as described. I also claim, in combination with the coupé, the open spaces under the back elevated seats of the main body opening into the coupé, as described, and for the purposes set forth."

No. 25,921. George A. Stone, of Roxbury, Mass., for an "Improvement in thrust bearings for rotating shafts."

"I claim, first, the combination of these four things, namely, a collar or collars on the shaft, washers provided with grooves on their faces, extending from their outer to their inner edges, made substantially as described, a reservoir of oil or other lubricating material, and a pillow block, or stationary resistance, all being and acting in combination, substantially as herein-before described for the purposes set forth; and, second, in combination with washers provided with grooves on their faces, a reservoir of lubricating material, a pillow block, or its equivalent, and a collar on a shaft, all as specified in my first claim. I claim grooves extending from face to face of the washers, made substantially in the manner, and serving the purposes described."

No. 25,922. F. Swift, of Hudson, Mich., for an "Improvement in grain separators."

"I claim the employment or use of a supplemental shoe C, placed within the shoe B, provided with screws *c*, and having an independent longitudinal shake movement given it, while the shoe B, with its screens *b*, has the usual lateral shake movement imparted to it, substantially as and for the purpose set forth."

No. 25,923. Peter Van Antwerp, of New York, N.Y., for an "Improvement in keys for locks."

"I claim constructing the stems of keys with a hole near the end, instead of the usual permanent bow, or ring handle, and to be fitted loosely to the usual ring for connecting a series of keys, and in such manner, substantially as described, that said connecting ring shall answer the further purpose of the usual bow, or fixed ring, for turning the keys when inserted in the lock, as set forth."

No. 25,924. John L. Whipple, of Detroit, Mich., for an "Improved spring bed."

"I claim the general arrangements of the slat (S), spring (W), and the strap (L), when constructed in the form above described and combined for the pupose, in the position as set forth."

No. 25,925. John L. Wentworth, of Spread Eagle Pa., for an "Improvement in field fences."

"I claim constructing each section of a fence of the two end posts A and B, the upper and lower longitudinal rails C and D, any suitable number of intermediate rails E and F, and the vertical bar G, when the several parts are arranged in respect to, and adapted to each other, substantially as set forth."

No. 25,926. Franklin Wesson and Nathan S. Harrington, of Worcester, Mass., for an "Improvement in breech-loading fire-arm."

"We claim, first, the arrangement of the mechanism for locking and unlocking the barrel, and the arrangement of the trigger, substantially as described. Second, we also claim the combination with the locking, and the unlocking mechanism, the spring (*k*), arranged substantially as described, for elevating the breech. Third, and we claim, in combination with the barrel, the wedge-shaped recess in the recoil plate, arranged substantially as described for the purpose set forth."

No. 25,927. J. S. Voorhies, of Catlettsburg, Ky., for "Improved portable shelves."

"I claim constructing portable box shelving for stores, book-cases, and all similar purposes, in the manner described, and operating as set forth."

No. 25,928. Dutee Wilcox, of Providence, R. I., for an "Improvement in shirt studs."

"I claim the above described new or improved mode of making a shirt stud, or button, viz., of the two parts or plates A, B, and the two hooks or curved holders C, D, constructed and applied, or arranged together, substantially in manner and to operate as described."

No. 25,929. Joseph Adams, of Cleveland, O., assignor to himself and B. Barker, of same place, for an "Improvement in cannon."

"I claim the use and application of a piston for the purpose of loading, cleaning, and cooling a cannon, the stem or rod (G) of which passes through the breech or rear end of the gun, and is attached to a head or metallic piston, the circumference of which is equal to that of the bore of the cannon, and is made to fit the same exactly, and which piston-head when drawn back rests upon the main shoulder or substance of the breech at the point where the rod G connects therewith, and is of sufficient length to cover and serve as a valve to close the lateral opening at the breech end of the cannon, through which water is admitted to fill the bore of the gun, when said piston is forced forward towards the muzzle, and which piston plays forward and backward the entire length of the bore of the gun, so as to protrude sufficiently at the muzzle when forced forward, thus carrying out any substance of the exhausted cartridge after firing, and to which piston head or bulb the new cartridge is attached and drawn back to the breech or but of the gun by the force applied to said rod, and in which condition the gun is loaded and ready to be again discharged. 2nd, I claim the construction and employment of a lateral opening from the main chamber or bore of the gun, either passing through the breech pin or otherwise at or near the rear end thereof, and where the same will be closed and covered by the piston head, when the same is fully drawn back into (or by means of a tube or pipe connecting with a water sack or vessel), and by means of which arrangement water is admitted and drawn into the gun by the same force which carries the piston forward to receive the charge at the muzzle, and is returned to the vessel again by the same force which carries in the charge, thus washing and cooling the gun at every discharge without any other movement than that necessarily employed in the act of loading alone."

No. 25,930. M. C. CRONK, of Auburn, N. Y., assignor to himself, Wm. Boynton, jr., and Albert H. Goss, of same place, for an "Improved mode of feeding in fuel to the fire boxes of cooking stoves."

"I claim, 1st, in combination with the stationary upper fire box, a rocking or swinging fire box underneath it, having a flange or cut-off *o* connected thereto, substantially as herein described. I also claim, in combination with the rocking or swinging fire box and cut off, a rising and falling grate H, substantially as described. I also claim, in combination with the rocking or swinging fire box and rising and falling grate, a single rod or shaft, with its cams for operating both, substantially as described."

No. 25,931. D. W. C. FARRINGTON, of Lowell, Mass., assignor to Tuttle and Mudge, of Boston, Mass., for an "Improvement in stoves."

"I claim a parlor stove, having an oven which is opened by raising the top in the manner substantially as herein set forth."

No. 25,932. CHARLES YOUNGLOVE HAYNES, of Philadelphia, Pa., assignor to C. Y. Haynes and Co., of same place, for an "Improvement in razor straps."

"I claim the strap, when constructed substantially in the manner and for the purposes described."

No. 25,933. W. H. HOWLAND, of San Francisco, Cal., assignor to himself and JOHN O. HANSCOM, of same place, for an "Improved amalgamator."

"I claim the combination of a pair of grinding cones F, G, revolving in different directions with a horizontally oscillating chambered dish G, substantially as and for the purposes herein shown and described."

No. 25,934. JOSEPH IVES, of Bristol, Conn., for an "Improvement in watches."

"I claim, first, the combination of the spring B, lever C, cam D, substantially in the manner as and for the purpose described. 2nd, I claim the substitution of ribbed or corrugated, planished or unplanished, tin plate for running gear, &c. (for other metals), when used in combination with the rolling pinion, substantially as and for the purpose described. And, 3, I claim making a crown wheel with rollers instead of teeth, to prevent slide and friction upon the verge or pallate, in the manner and for the purpose described."

No. 25,935. GEORGE W. SLAGLE, of Washington, D. C., assignor to himself and O. A. Dailey, of same place, for a "Composition for mixing with paints."

"I claim making melaniline oil or a substitute for linseed oil by mixing together linseed oil or other vegetable oil possessing similar qualities, water, and sal soda, or other similar suitable alkali, substantially in the manner set forth."

RE-ISSUES.

S. W. HOFFMAN and ADAM J. FREDERICK, of Philadelphia, Pa., assignees through Mesne assignment of Robert McWilliams, of said Philadelphia, for an "Improvement in journal boxes for railroad cars."—Patented 19th July, 1859.—Re-issued 25th October, 1859.

"We claim, firstly, the upper half A of the box, with its socket, formed by the flange *h*, in combination with the lower half B of the box, when the two halves are arranged substantially as set forth, so that on adjusting the lower half to its place it may assume the position shown in Fig. 1, and so that when adjusted the end *w* of the oil chamber shall be close to the axle, as and for the purpose specified. Secondly, the self-adusting leather packing E, and the metal plate F, when both are dependent upon the lower half of the box for their proper position within the other half, and when they are otherwise arranged in respect to both upper and lower half of the box, as and for the purpose set forth."

W. S. STETSON, of Baltimore, Md., for an "Improvement in harvesters."—Patented 5th April, 1859.—Re-issued 25th October, 1859.

"I claim, in combination with a main frame H, supported upon two carriage wheels A, A^1, which frame bears the shaft M and main cog wheel S, a second frame hinged to and vibrating about said shaft M, so that the crank shaft on said second frame shall always be in a radial line to the main cog wheel S, however much said second frame may vibrate on the main frame, as set forth. Second, I claim supporting the crank shaft V upon a vibrating frame R, intermediate between the cutter bar or its shoe X and the main frame H, when said main frame bears the main cog wheel S, and said intermediate frame vibrates or turns about an axis parallel to the axis of the driving or carriage wheels, as set forth."

W. S. STETSON, of Baltimore, Md., for an "Improvement in harvesters."—Patented 5th April, 1859.—Re-issued 25th October, 1859.

"I claim, first, the main frame H, which bears the pinion K, and has its vibratory motions up and down, independent of the motions of the platform and pole, in combination with the vibrating frame R, intermediate between the said main frame and cutter bar, as set forth. Second, I claim combining the adjusting lever Z with the platform C and main frame H, in the manner and for the purposes set forth. Third, I claim giving to the main frame H, which bears the driving pinion K, a back and forth motion upon the axletree, as set forth."

W. S. STETSON, of Baltimore, Md., for an "Improvement in harvesters."—Patented 5th April, 1859.—Re-issued 25th October, 1859.

"I claim the combination of shoe X with the vibrating frame R, by means of axis *y*, at the rear end of said frame, as set forth. Second, I claim horsing or supporting the knife bar in a position at right angles, or nearly so, to the carriage axle by two movements, substantially as described."

DESIGNS.

WM. NEWTON BROWN, of New York, N. Y., for a "Design for ornamenting sewing machines."

"I claim the use of the combination and application of the devices herein-before described for ornamenting the frame and working parts of sewing machinery, as set forth."

ANTHONY JOHN GALLAGHER, of Philadelphia, Pa., for a "Design for cooks' stoves."

"I claim the arrangement and combination of the ornaments that form the design herein above specified and represented in the accompanying drawings."

C. HARRIS and PAUL W. ZOINER, of Cincinnati, Ohio, for a "Design for parlor stoves."

"I claim the scrolls, flutings, and mouldings as set forth in the accompanying drawings, as forming an ornamental design for wood parlor stoves."

JEREMIAH MEGER, of New York, N. Y., assignor to A. Sampson, of Manchester, N. H., for a "Design for floor clothes."

"I claim the ornamental design represented in the accompanying pattern."

THOMAS H. WOOD, JOHN E. ROBERTS, and HENRY S. HUBBELL, of Utica, N. Y., for a "Design for cook's stoves."

"We claim the general design and configuration, represented in the accompanying photograph."

L. Q. C. WISHART, of Philadelphia, Pa., for a "Design for ornamenting bottles."

"I claim the ornamental design, described and represented in the drawing, for pine tree tar cordial bottles."

ADDITIONAL IMPROVEMENT.

JOSEPH F. HALL, of Bangor, Me., for "Improved curtain fixtures."—Patented 9th March, 1858.—Additional Improvement dated 25th October, 1859.

"I claim the application of the lever, as before explained and as it is represented in Figure 2, in combination with the cord and tassel, with the pulley or eye in the end of the tassel, and for the purpose described. And this I am desirous of adding to my original Letters Patent aforesaid."

Extension.

David B. Rogers, of Pittsburgh, Pa., for an "Improvement in cultivator teeth." — Patented 1st November, 1845. — Re-issued 20th September, 1859.

"I claim, making the shank or upper part of cultivator teeth of thin plate steel, U-shaped or curved round in front substantially as herein-before described, for the purpose of securing the necessary strength to permit the tooth to be made entire, shank and blade, of a single piece of metal, and also of enabling the tooth to be secured in its place in the hand by means of a wedge driven into the cavity of the shank, substantially as herein-before described."

List of Specifications published during the week ending 11th November, 1859.

No.	Price.	Subject-Matter.
		1856 (*Disclaimer*).
2218	7*d.*	Iron and steel.
		(1858 *Disclaimer*).
2377	3*d.*	Umbrellas and parasols.
		1859.
837	3*d.*	Protecting telegraph wires.
838	3*d.*	Manufacture of cocoa-nut fibre, yarn, and matting.
839	3*d.*	Hay-making machines.
840	3*d.*	Manufacture of barrels for small-arms.
842	3*d.*	Break for railway carriages.
844	9*d.*	Paddle wheels.
845	9*d.*	Ships' pumps, &c.
847	3*d.*	Jacquard machines.
848	6*d.*	Machinery for forging and stamping, metals.
849	1*s.* 1*d.*	Sewing machines.
850	6*d.*	Machinery for carding wool, &c.
852	5*d.*	Open fire-places.
853	7*d.*	Apparatus for regulating the quantity of water used tor flushing waterclosets, &c.
854	3*d.*	Propelling ships and other vessels.
855	10*d.*	Machinery for spinning and doubling cotton, &c.
856	3*d.*	Preparation of fibrous materials.
857	7*d.*	Safety apparatus for mine cages.
858	5*d.*	Clocks or timekeepers.
859	3*d.*	Cheese vats.
860	5*d.*	Tubular chain cable guide.
861	3*d.*	Preparation of writing paper and ink.
862	3*s.* 6*d.*	Manufacture of railway wheels and tyres, &c.
863	6*d.*	Coating electric telegraph wires.
864	3*d.*	Lubricating projectiles and cartridges.
865	3*d.*	Manufacture of card for carding cotton, &c.
866	7*d.*	Steam boilers.
867	6*d.*	Harness pads.
868	3*d.*	Reaping machines.
869	3*d.*	Reaping machines.
870	3*d.*	Agricultural drill.
871	6*d.*	Goblets, jugs, &c.
872	3*d.*	Boot trees.
873	7*d.*	Pyrotechnic signals.
874	3*d.*	Cartridges and fire-arms.
875	7*d.*	Rotatory steam-engines and pumps, &c.
876	1*s.* 10*d.*	Machinery for the manufacture of looped fabrics.
877	3*d.*	Looking glasses and mirrors.
878	7*d.*	Articulated joint for water, gas, and steam pipes.
879	3*d.*	Treatment of mineral phosphates of lime.
880	4*d.*	Dyeing fibrous materials or fabrics.
881	4*d.*	Insulating and protecting telegraphic conductors.
882	3*d.*	Remanufacturing compounds of india-rubber and sulphur.
883	6*d.*	Treating ores to obtain products therefrom.
884	7*d.*	Telegraphing and telegraphic apparatus.
885	7*d.*	Steam engines, &c.
886	5*d.*	Treatment of waste matter containing sulphur.
887	5*d.*	Manufacture of woven fabrics.
888	9*d.*	Steam engines.
889	2*s.* 8*d.*	Composing and distributing types.
890	1*s.* 4*d.*	Manufacture of stirrups, bits, spurs, &c.
891	7*d.*	Manufacture of ferro-cyanide and cyanide of potassium.
892	3*d.*	Cheese vats.
893	3*d.*	Manufacture of bonnet fronts and ruches.
894	3*d.*	Motive power for tanneries.
895	1*s.* 5*d.*	Steam engines and boilers.
896	1*s.*	Machinery for blocking and crimping the uppers of boots and shoes, &c.
897	3*d.*	Stoves and apparatus for warming and ventilating.
898	3*d.*	Working fly presses by steam, &c.
899	9*d.*	Cop tubes, &c. for spinning.
908	1*s.* 2*d.*	Beams and girders.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Erratum in Journal of 11th November.

2356. For "Berthand" read "Berthaud."

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in the Colonies; contained in Communications from the Governors, &c. of the different British Colonies in answer to the Application of Mr. W. J. Curtis for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 12th November, 1859.

Mornings - - - -	1039
Evenings - - - -	1433
Total - - -	2472

Since the opening of the Museum Free Daily (May 12, 1858,)—161,308.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

(*Registered for transmission abroad.*)

No. 613. FRIDAY, NOVEMBER 18, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2132. To HUBERT JOSEPH WARLOMONT, Manager of the Vieille Montagne Zinc Works at Liege, in the kingdom of Belgium, for the invention of "Improvements in apparatus to be employed in the manufacture of zinc."

On his petition, recorded in the Office of the Commissioners on the 19th day of September, 1859.

2388. To GEORGE GREGG, of Sheffield, in the county of York, Currier, for the invention of "An improved method of dyeing leather black."

On his petition, recorded in the Office of the Commissioners on the 19th day of October, 1859.

2458. To PAUL RAPSEY HODGE, of No. 16, Chalcot Crescent, near Primrose Hill, in the county of Middlesex, Engineer, for the invention of "Improvements in the process of brewing fermented liquors, and in apparatus connected therewith, and in preparing and separating the materials, and the manner of using them in producing fermented liquors."

On his petition, recorded in the office of the Commissioners on the 27th day of October, 1859.

2472. To JOSEPH MASCORD, of Banbury, in the county of Oxford, Seedsman, JOSEPH BONNER, of the same place, Draper, and FREDERICK VINER, also of Banbury, Engineer, for the invention of "Improved machinery or apparatus for cutting up and pulping or reducing vegetable and animal substances."

On their petition, recorded in the Office of the Commissioners on the 29th day of October, 1859.

2495. To JOHN LEGGETT BUDDEN, Merchant, of 48, Fenchurch Street, in the city of London, for the invention of "Improvements in forming and driving piles for the construction of piers, jetties, viaducts, bridges, or other works where piles are usually employed."—A communication from abroad by Woodford Pilkington, Civil Engineer, of the Cape of Good Hope.

On his petition, recorded in the Office of the Commissioners on the 2nd day of November, 1859.

2497. To JAMES ALFRED TURNER, of the city of Manchester, in the county of Lancaster, Paper Manufacturer, for the invention of "Improvements in rendering paper waterproof."

2499. To ISIDORE FRANÇOIS DELAVIER, of Paris, France, Merchant, for the invention of "Improvements in coffee pots, tea pots, and other culinary or pharmaceutical vessels of the same nature."

2501. To CHARLES BACON, of Edgware Road, in the county of Middlesex, Esquire, for the invention of "Improvements in globes and shades for gas-lights, and oil or other lamps."

2503. To CHARLES WILLIAM SIEMENS, of Great George Street, Westminster, in the county of Middlesex, for the invention of "Improvements in insulating electric telegraphic conductors and in battery arrangements connected therewith."—Partly a communication from abroad by Werner Siemens, residing at Berlin, in Prussia.

2505. And to GEORGE WEMYSS, of Springwood Park, in the county of Roxburgh, North Britain, Gardener, for the invention of "Improvements in ventilators.

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of November, 1859.

2507. To ETIENNE JUZET, of 29, Boulevart St. Martin, Paris, in the empire of France, Mechanician, for the invention of "Improvements in lubricating apparatus."

2509. To AUGUST PETER BOOTHBY, of Dean Street, Soho, in the county of Middlesex, Travelling Bag Manufacturer, for the invention of "Improvements in travelling and such like bags."

2511. To LOUIS KOCH, Engineer, of New York, in the United States of America, for the invention of "A moving tread power."

2513. To CHARLES BROOK, junior, of Meltham Mill, in the county of York, Thread Manufacturer, for the invention of "Improved arrangements and apparatus for folding, tieing, and labelling hanks of yarn or thread."

2515. To WILLIAM CLARKE, of Nottingham, Manufacturer, and JOSEPH GEE, of Lenton, in the county of Nottingham, Mechanic, for the invention of "Improvements in the manufacture of looped fabrics."

2517. And to RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E. C., Patent Agent, for the invention of "Improvements in breech-loading ordnance and other fire-arms, and in projectiles to be used therewith."—A communication from abroad by John Webster Cochran, of New York.

On their several petitions, recorded in the Office of the Commissioners on the 4th day of November, 1859.

2521. To DAVID JOY, of Strangeways Iron Works, Manchester, in the county of Lancaster, Engineer, for the invention of "Improvements in machinery for the manufacture of telegraphic cables."—A communication from abroad by Charles de Bergue, residing at Barcelona, in the kingdom of Spain.

2523. To EMILE ALEXANDRE CUCHE, of 29, Boulevart St. Martin, Paris, in the empire of France, Civil Engineer, for the invention of "Improvements in galvanizing metallic wires."

2525. And to THOMAS WHITTAKER MCCALLUM, of Belper, in the county of Derby, Hosier, and LUKE WOODWARD, of the town of Nottingham, Framesmith, for the invention of "Improvements in framework knitting machinery."

On their several petitions, recorded in the office of the Commissioners on the 5th day of November, 1859.

2527. To PETER DIETENS, of Brussels, in the kingdom of Belgium, Manufacturer, for the invention of "A system of letter-paper, letter-invoices, letter circulars, prices-currents, memorandums, and other missives."

2529. To JOHN ALGERNON CLARKE, of Long Sutton, in the county of Lincoln, Farmer, for the invention of "Improvements in extracting seeds or stones from foot."

2531. To HENRY CHARLTON, of Blackfriars, Manchester, in the county of Lancaster, Calenderer and Finisher, for the invention of "Certain improvements in the method of navigating steam ships or vessels, and in the apparatus connected therewith."

2533. To GEORGE MELINE, of Lay St. Christhope, in the department of the Meurthe, in the empire of France, Gentleman, for the invention of "Improvements in mills of whatever kind."

2535. And to WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in promoting or accelerating combustion in furnaces or fireplaces."—A communication from abroad by Charles Joseph Leopold Maire and Jean Baptiste Frédéric Jules Vallée, of Tours, in the empire of France.

On their several petitions, recorded in the Office of the Commissioners on the 7th day of November, 1859.

2537. To HENRY BUCKWORTH POWELL, of Foxleize Park, Lyndhurst, Hants, for the invention of "The protection and prevention of fouling or injuring by foreign matters the screws, paddles, rudders, and stern posts of steam ships or other vessels."

2539. To CHARLES GREED, of Birmingham, for invention of "Improvements in the manufacture of tubes suitable for locomotives and other steam boilers."

2541. To JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in 'passe-partouts,' or mounts for pictures."—A communication from abroad, by Auguste Pinard, of Paris, in the empire of France, Manufacturer.

2543. To GEORGE HADFIELD, of Carlisle, in the county of Cumberland, Varnish Manufacturer, for the invention of "Improved machinery for cutting staves for casks and barrels."

2545. And to WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "A compound applicable for the manufacture of manure, the preservation and disinfection of organic matters, and for other purposes."—A communication from abroad, by Mr. Victor Corne, of Boulevart St. Martin, Paris.

On their several petitions, recorded in the Office of the Commissioners on the 8th day of November, 1859.

2547. To GEORGE WHITE, of 34, Dowgate Hill, Cannon Street, in the city of London, for the invention of "Improvements in the manufacture of endless leather bands, straps, or bells for driving machinery, and in apparatus for effecting the same."—A communication from abroad by Mr. Eugène Scellos, of Rue Popincourt, Paris.

2549. To MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for the invention of "An improved means of destroying insects in grain and other organic matters."—A communication from Louis Poret, residing at Mans (départ^{t} de la Sarthe), France.

2551. And to JOHN DALES, of 11 and 12, Gresham House, Old Broad Street, in the city of London, for the invention of "Improvements in applying deodorizing fluids to sewers and other receptacles of sewage."

On their several petitions, recorded in the Office of the Commissioners on the 9th day of November, 1859.

2553. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "Improvements in railway breaks, also applicable for arresting the rotary motion of wheels and cylindrical bodies in general."—A communication from abroad by Jules Clément, Gentleman, residing at No. 17, Rue Tronchet, Paris, in the empire of France.

2555. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in mills or apparatuses for extracting oil from seeds, and for other purposes."—A communication from abroad by C. S. Francis, of Calcutta.

2557. To ARTHUR JAMES MELHUISH, of Holborn Bars, and also of Bowater Place, Blackheath, Optician, for the invention of "Improvements in the construction of cameras for obtaining photographic pictures."

2559. To GEORGE SEYMOUR, of 116, Fenchurch Street, in the city of London, for the invention of

"Improvements in insulating and protecting electric telegraph conductors."

3561. And to WILLIAM DAY, Builder, of Burton Latimer, near Wellingborough, in the county of Northampton, for the invention of "Certain improvements in propelling vessels, which said invention is also applicable for converting the force of the wind into a motive power to be used in any convenient way either for stationary or moveable purposes."

On their several petitions, recorded in the Office of the Commissioners on the 10th day of November, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given, that the petition of

2574. MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, praying for Letters Patent for the invention of "Improved apparatuses for the concentration, distribution, and application of the heat evolved by gas, oil, and other lamps,"—a communication from Henri Auguste D'Arbel, senr., of Paris,—was deposited and recorded in the Office of the Commissioners on the 14th day of November, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

18th November, 1859.

1243. HENRY NEWMAN, of Liverpool, in the county of Lancaster, Dentist, for an invention of "Improvements in the construction of artificial teeth, and in the mode or manner of affixing the same to the frame."—Dated 20th May, 1859.

1250. JAMES PALMER BUDD, of Ystalyfera, near Swansea, for an invention of "Improvements in the manufacture of tin and terne plates."—Dated 20th May, 1859.

1253. JOHN ROBINSON SCARTLIFF, of Wolverhampton, in the county of Stafford, Mechanic, for an invention of "Improvements in the construction of lubricating and other cans, in order to regulate the discharge or flow of the liquids they contain."—Dated 21st May, 1859.

1349. JEAN FELIX MIQUEL, of Paris, France, Physician, for an invention of "Improvements in trusses."—Dated 1st June, 1859.

1402. WILLIAM BURNESS, of 2, Prospect Terrace, Brixton, in the county of Surrey, for an invention of "Improvements in steam-culture machinery, part of which is applicable to steam cartage and other purposes."—Dated 9th June, 1859.

1511. EDWARD THOMAS HUGHES, of the firm of Hughes & Son, Patent Agents, 123, Chancery Lane, London, W.C., for an invention of "Improvements in the manufacture of artificial sandstone, bricks, tiles, and similar articles."—A communication from abroad by Léon and Edouard Pavin de Lafarge, Merchants, residing at Viviers, département de l'Ardèche, in the empire of France. —Dated 23rd June, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 16th November, 1859, inclusive.*)

14th November.

2705. GEORGE DAVIES, of the Office for Patents, 1, Serle Street, Lincoln's Inn, in the county of Middlesex, Civil Engineer, for an invention of "An improved paper suitable for the filtration of liquids, the dressing of wounds, and for the manufacture of envelopes, bags, bands, and for other similar purposes."—A communication from Jean Alphonse Pichot and Pierre Prosper Malapert, both of Poitiers, in the empire of France.—Dated 15th November, 1856.

16th November.

2797. JOHN MARSHALL, junior, of Selby, in the county of York, Oil Refiner, for an invention of "An improvement in the purifying of oils and fatty matters."—Dated 25th November, 1856.

2818. JOSEPH M. SAUNDERS, of Menloe Rathgar, Dublin, and 16, Westmoreland Street, Dublin, for an invention of "Improvements in cooking-ranges."—Dated 28th November, 1856.

2858. MATTHEW TOWNSEND, of Leicester, Fancy Hosier, for an invention of "Improvements in machinery for the manufacture of knitted fabrics." —Dated 2nd December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 15th November*, 1859.)

767. JOHN RAMSBOTTOM, of Longsight, near Manchester, in the county of Lancaster, Engineer, for an invention of "Certain improvements in steam-engines."—Dated 16th November, 1852.

Erratum in Journal of 21st October.

In the List of Letters Patent which had become Void by reason of the non-payment of the additional Stamp Duty of £50, the following Patent was omitted in error, it having been returned as stamped by the Stamp Office:—

No. of Register.	Date of Patent.	Name and Address of Patentee.	Title of Invention.
2266	27th Sept. 1856.	WILLIAM SMITH, of Skinner Street, Snow Hill, in the city of London, and NATHANIEL FORTESCUE TAYLOR, of Stratford, in the county of Essex, Gas Engineers.	Improvements in apparatus for measuring gas and other fluids, and in regulating the flow of the same.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 614. · TUESDAY, NOVEMBER 22, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1657. CHARLES SAMUEL WALKER and ROBERT HOYLE, both of Bury, in the county of Lancaster, Engineers, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "Improvements in machinery or apparatus for promoting the consumption of smoke in steam boiler and other furnaces, and for preventing the explosion of steam boilers."

1662. And JOHN TAYLOR, of Roupell Park, Streatham Hill, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in stoves and fire places, and in the arrangement of flues connected therewith."

As set forth in their respective petitions, both recorded in the said office on the 13*th day of July*, 1859.

1666. And JOSEPH ATKINSON, of Lancaster, in the county of Lancaster, Gun Manufacturer, has given the like notice in respect of the invention of "Improvements in fire-arms."

As set forth in his petition, recorded in the said office on the 14*th day of July*, 1859.

1671. And CHRISTOPHER KINGSFORD, of Seaton, near Wingham, in the county of Kent, Civil Engineer, has given the like notice in respect of the invention of "Improvements in the preparation of peat and charcoal for fuel, in the manufacture of coke therefrom, and in the machinery and apparatus employed for effecting the same."

1672. And WILLIAM CLARK and WILLIAM WILLIAMS, of the city of Manchester, in the county of Lancaster, have given the like notice in respect of the invention of "Improvements in finishing woven fabrics."

1676. And JOHN PRENTICE FARRAR, of New York, in the United States of America, Gentleman, has given the like notice in respect of the invention of "Improvements in the treatment of iron."

As set forth in their respective petitions, all recorded in the said office on the 15*th day of July*, 1859.

1684. And HENRY CUNNEW, of the Triangle, Hackney, in the county of Middlesex, Manufacturer, has given the like notice in respect of the invention of "Improvements in elastic bands."

1686. And O'DONNELL GRIMSHAW, of Belfast, in the kingdom of Ireland, Postmaster, has given the like notice in respect of the invention of "Improvements in safety letter boxes or bags."

1689. And THOMAS CARLIELL, of Union Street, Portsea, Hampshire, has given the like notice in respect of the invention of "Improvements in vent pegs."

As set forth in their respective petitions, all recorded in the said office on the 16*th day of July*, 1859.

1692. And HENRY CHRISTOPHE MARTIN CRAMER, of Paris, France, Joiner, has given the like notice in respect of the invention of "Improvements in bedsteads."

1697. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improvements in the manufacture of india rubber and other like fabrics."—A communication from abroad by Jonathan Thompson Trotter, of New York, in the United States of America.

As set forth in their respective petitions, both recorded in the said office on the 18*th day of July*, 1859.

1700. And JAMES SHANKS, of Arbroath, in the county of Forfar, North Britain, Machinist, has given the like notice in respect of the invention of "Improvements in mowing machines."

1702. And JOHN CHARLEY RIDDEL, of Belfast, in the county of Antrim, Ireland, has given the like

notice in respect of the invention of "Improvements in stalls, loose-boxes, and enclosures for horses, cows, pigs, or other animals."

As set forth in their respective petitions, both recorded in the said office on the 19th day of July, 1859.

1703. And James Erskine, of Newton Stewart, North Britain, Gun Maker, has given the like notice in respect of the invention of "Improvements in breech loading fire arms."

1704. And Thomas Curtis and Jonathan Haigh, both of Leeds, in the county of York, Cloth Finishers, have given the like notice in respect of the invention of "Improvements in the finishing of cloths."

As set forth in their respective petitions, both recorded in the said office on the 20th day of July, 1859.

1723. And Horatio Nelson Harrop, jr., of Manchester, in the county of Lancaster, Cigar Dealer, has given the like notice in respect of the invention of "Certain improvements in a cigar lighter and fusee box."

As set forth in his petition, recorded in the said office on the 23rd day of July, 1859.

1728. And John Rowland, junior, of Oldham, in the county of Lancaster, Manufacturer, and George Hall, of the same place, Engineer, have given the like notice in respect of the invention of "Improvements in machinery or apparatus for sizing yarns or threads, which said improvements are also applicable to dressing machines or other similar apparatus."

As set forth in their petition, recorded in the said office on the 25th day of July, 1859.

1735. And John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "Improvements in slide valves for steam engines."—A communication from abroad by Richard C. Bristol, of Chicago, United States of America.

As set forth in his petition, recorded in the said office on the 26th day of July, 1859.

1758. And Isaac Martin Lindley, of Staley Bridge, in the county of Chester, Currier and Leather Merchant, has given the like notice in respect of the invention of "Improvements in cop tubes."

1764. And Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Certain improvements in that class of fire-arms known as revolvers, and in bullets for the same."—A communication from abroad by John Walch, of New York, in the United States of America.

As set forth in their respective petitions, both recorded in the said office on the 29th day of July, 1859.

1781. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improvement applicable to salinometer cases for steam boilers."—A communication from abroad by Joseph Grice, of New York City, in the United States of America.

As set forth in his petition, recorded in the said office on the 1st day of August, 1859.

1786. And Bryan Donkin, of Bermondsey, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in, and in connection with, slide and other valves."—A communication from abroad by Thomas Coates, of Sommerfeld, Silesia, Engineer.

As set forth in his petition, recorded in the said office on the 2nd day of August, 1859.

1818. And Albert François Delannoy, of Paris, in the empire of France, Civil Engineer, has given the like notice in respect of the invention of "Improvements in lubricating the axles or journals of wheels, also applicable to lubricating apparatus for the transmission of motion in general."

As set forth in his petition, recorded in the said office on the 6th day of August, 1859.

1826. And Louis Bertrand Ollivier, of 29, Boulevart St. Martin, Paris, in the empire of France, Gentleman, has given the like notice in respect of the invention of "Improvements in closing or stoppering bottles, jars, and other receptacles."

As set forth in his petition, recorded in the said office on the 8th day of August, 1859.

1834. And Nelson Kenward, of Sutton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in constructing tubular steam boilers."

As set forth in his petition, recorded in the said office on the 9th day of August, 1859.

1989. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improvements in treating auriferous and argentiferous ores and substances."—A communication from abroad by Dr. Raoul Destrem, residing at Paris.

As set forth in his petition, recorded in the said office on the 31st day of August, 1859.

2031. And Richard Kelly Geldard, of Plymouth, in the county of Devon, Pharmaceutical Chemist, has given the like notice in respect of the invention of "Improvements in the method of and apparatus for making pharmaceutical or other infusions."

As set forth in his petition, recorded in the said office on the 6th day of September, 1859.

2084. And William Bridges Adams, of No. 1, Adam Street, Adelphi, in the county of Middlesex Engineer, has given the like notice in respect of the invention of "Improvements in the permanent way of railways."

As set forth in his petition, recorded in the said office on the 13th day of September, 1859.

2116. And Jozé Luis, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in

respect of the invention of "An automaton bell for the prevention of collisions at sea."—A communication from abroad by Gallois Foucoult, of St. Martin, in the empire of France.

As set forth in his petition, recorded in the said office on the 17th day of September, 1859.

2188. And Paschal J. Lejeune Chaumont, of Faubourg Vivegenes, 138, Liége, has given the like notice in respect of the invention of "Improvement in fire arms and ordnance, and in projectiles and cartridges to be used therewith."

As set forth in his petition, recorded in the said office on the 27th day of September, 1859.

2382. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "Improvements in machinery used for preparing for spinning silk, wool, or other fibrous substances."—A communication from abroad by Charles de Jongh, of Guebwiller, in the empire of France.

2383. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improved method of making combs or gills employed in the preparation of fibrous substances."—A communication from abroad by Charles de Jongh, of Guebwiller, in the empire of France.

2385. And Auguste Scheurer Rott, of Thann, in the French empire, Manufacturer, has given the like notice in respect of the invention of "The preparation of certain substances for fixing colors in dyeing and printing, and for other purposes."

As set forth in their petition, all recorded in the said office on the 18th day of October, 1859.

2389. And John Gordon, Engineer, 3, Railway Place, Fenchurch Street, in the city of London, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for pulping coffee."

As set forth in his petition, recorded in the said office on the 19th day of October, 1859.

2413. And John Avery, of Essex Street, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Improvements in railroad weigh-locks and other platform scales."—A communication from E. Sampson and Dennison S. Wheeler, of Troy, U.S.A.

As set forth in his petition, recorded in the said office on the 22nd day of October, 1859.

2436. And William Charles Day, of the Strand, in the county of Middlesex, Military Outfitter, has given the like notice in respect of the invention of "Improvements in stockings and drawers, and other articles of underclothing."

As set forth in his petition, recorded in the said office on the 23rd day of October, 1859.

2442. And Alexander McGlashan, of Coal Yard, Drury Lane, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in refrigerators for cooling worts and other liquors."

As set forth in his petition, recorded in the said office on the 26th day of October, 1859.

2480. And John Ingham, of Halifax, in the county of York, Manufacturer, and George Collier, of the same place, Engineer, have given the like notice in respect of the invention of "Improvements in the manufacture of fabric of the character of that technically called 'camlet,' also in the winding of yarn employed in the production of such fabric, part of which improvements is applicable to other weavings."

As set forth in their petition, recorded in the said office on the 31st day of October, 1859.

2495. And John Leggett Budden, Merchant, of No. 48, Fenchurch Street, in the city of London, has given the like notice in respect of the invention of "Improvements in forming and driving piles for the construction of piers, jetties, viaducts, bridges, or other works where piles are usually employed."—A communication from abroad by Woodford Pilkington, Civil Engineer, of the Cape of Good Hope.

As set forth in his petition, recorded in the said office on the 2nd day of November, 1859.

2505. And George Wemyss, of Springwood Park in the county of Roxburgh, North Britain, Gardener, has given the like notice in respect of the invention of "Improvements in ventilators."

As set forth in his petition, recorded in the said office on the 3rd day of November, 1859.

2511. And Louis Koch, Engineer, of New York, in the United States of America, has given the like notice in respect of the invention of "A moving tread power."

As set forth in his petition, recorded in the said office on the 4th day of November, 1859.

2531. And Henry Charlton, of Blackfriars, Manchester, in the county of Lancaster, Calenderer and Finisher, has given the like notice in respect of the invention of "Certain improvements in the method of navigating steam ships or vessels, and in the apparatus connected therewith."

As set forth in his petition, recorded in the said office on the 7th day of November, 1859.

2561. And William Day, Builder, of Burton Latimer, near Wellingborough, in the county of Northampton, has given the like notice in respect of the invention of "Certain improvements in propelling vessels, which said invention is also applicable for converting the force of the wind into a motive power to be used in any convenient way, either for stationary or moveable purposes."

As set forth in his petition, recorded in the said office on the 10th day of November, 1859.

2574. And Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "Improved apparatuses for the concentration, distribution, and application of the heat evolved by gas, oil, and other lamps."—A communication from Henri Auguste D'Arbel, of Paris.

As set forth in his petition, recorded in the said office on the 14th day of November, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

22nd November, 1859.

1261. John Knowles, of Lower Broughton, near Manchester, in the county of Lancaster, Machinist, for an invention of "Certain improvements in power looms for weaving."—Dated 23rd May, 1859.

1262. Robert Valentine Leach, of Briton Ferry, in the county of Glamorgan, and of Devizes, in the county of Wilts, Tin-plate Manufacturer, and Thomas William Willett, of Pontneath-Vaughan, in the county of Brecon, Civil Engineer, for an invention of "Improvements in the manufacture of tin plates and terne or leaded plates, and in the apparatus connected therewith."—Dated 23rd May, 1859.

1264. George Burnell, of East Hoathly, in the county of Sussex, Gentleman, for an invention of "An improved preparation or medicine for the cure of ague."—Dated 23rd May, 1859.

1268. Charles Peters Moody, of Corton Denham, in the county of Somerset, Gentleman, for an invention of "Improvements in machinery for the manufacture of matting or fabric from straw and other vegetable fibres, and rods, or bars of wood and metal."—Dated 23rd May, 1859.

1269. Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Editor of the Mechanic's Magazine and Patent Agent, for an invention of "Improvements in axles and in fitting wheels thereto." — A communication from abroad by M. Masson, residing at Paris.—Dated 23rd May, 1859.

1277. George Davies, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for an invention of "Atmospheric apparatus for the submarine transport of blocks of stone, and for raising sunken vessels." — A communication from abroad by T. Bandier, of Paris, in the empire of France.—Dated 24th May, 1859.

1279. Gilbert Daniel Jones, of Clerkenwell, in the county of Middlesex, Engineer, for an invention of "Improvements in mills or machinery for grinding, reducing, and pulverizing."—Dated 24th May, 1859.

1280. Joseph Gibbs, of Brentford, in the county of Middlesex, Civil Engineer, for an invention of "A method of treating coal, shale, lignites, and peat, in order to manufacture manure."—Dated 24th May, 1859.

1284. Antoine Joseph Sax, trading under the firm of Adolphe Sax, of Paris, France, Musical Instrument Maker, for an invention of "Improvements in wind musical instruments."—Dated 24th May, 1859.

1292. Alexander Prince, of the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex, for an invention of "Improvements in screw propellers." — A communication from abroad by Hermann Hirsch, resident at Berlin, in the kingdom of Prussia.—Dated 25th May, 1859.

1300. Hugh William Patrick, of No. 4, Mill Hill Terrace, Acton, in the county of Middlesex, for an invention of "A new substance or material to be used in lieu of ivory and other like substances."—Dated 26th May, 1859.

1304. George Frederic Chantrell, of Liverpool, in the county of Lancaster, Furnace Engineer, for an invention of "Improvements in the construction of charcoal kilns, and in the manufacture of coolers for charcoal kilns." — Dated 26th May, 1859.

1314. Leon Farrenc, Gentleman, and Bernard Subra, Professor of Mathematics, both of Paris, France, for an invention of "Improvements in gas lighting by means of direct carburators."—Dated 27th May, 1859.

1316. George Hadfield, of Carlisle, in the county of Cumberland, Varnish Manufacturer, for an invention of "Improvements in the mode of and apparatus for forming casks or barrels."—Dated 27th May, 1859.

1328. John Bruce, of Tiddington, near Stratford-on-Avon, in the county of Warwick, Agricultural Implement Maker, for an invention of "An improvement in agricultural drills." — Dated 30th May, 1859.

1332. William Green, of Victoria Works, Dod Street, Limehouse, in the county of Middlesex, for an invention of "Improvements in washing or purifying and treating sugar."—Dated 30th May, 1859.

1344. George Henry Smith, of the city of Manchester, in the county of Lancaster, for an invention of "Improvements in sewing machines."—Dated 31st May, 1859.

1346. John James Lundy, of the city of Manchester, in the county of Lancaster, and of Leith, North Britain, Colour and Varnish Manufacturer, for an invention of "Improvements in cartridges and gun-wads, for facilitating the loading and lubricating of fire arms."—Dated 31st May, 1859.

1368. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in reducing solid substances to powder, and in the machinery or apparatus employed therein."—A communication from abroad by William James Cantelo, of Burlington, Burlington county, state of New Jersey.—Dated 3rd June, 1859.

1406. Thomas Greenshields, of No. 11, Little Titchfield Street, London, for an invention of "Improvements in purifying gas, and obtaining ammoniacal and other salts."—Dated 10th June, 1859.

1450. Thomas Wharton Jones, of 35, George Street, Hanover Square, in the county of Middle-

sex, Esquire, for an invention of "Stereoscopic glasses for single pictures."—Dated 16th June, 1859.

1756. Patrick Robertson, of Sun Court, Cornhill, in the city of London, for an invention of "Improvements in the manufacture of beer, ale, porter, and spirits."—Dated 28th July, 1859.

1842. Frederic Louis Lawrence, of 50, Berners Street, Oxford Street, in the county of Middlesex, Dentist, for an invention of "Improvements in coloring and hardening elastic gums for dental purposes."—Dated 9th August, 1859.

1958. Emil Rettig, of New Cross, in the county of Kent, Merchant, for an invention of "Improvements in the form and construction of anchors."—Partly a communication from abroad by Ferdinand Martin, of Marseilles, in the French empire, Merchant.—Dated 27th August, 1859.

1970. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in the construction of steam generators, applicable also to the construction of condensers, the heating of water generally, and to the warming of buildings."—A communication from abroad by Joseph Harrison, the younger, of the city of Philadelphia, in the state of Pennsylvania, in the United States of America, Engineer.—Dated 30th August, 1859.

1978. James Cowgill and John Stocks, both of Bradford, in the county of York, Mechanics, for an invention of "Improvements in 'caps' for spinning fibrous substances, and in the means or method of manufacturing the same."—Dated 31st August, 1859.

2034. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improved fabric applicable to the manufacture of hose or flexible pipes."—A communication from abroad by Nehemiah Hunt, of Boston, in the United States of America.—Dated 6th September, 1859.

2072. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "An improved arrangement of piston packing principally applicable to hydraulic apparatus."—A communication from Casimir and Celestin Dabbène, residing at Verduno, Sardinian States.—Dated 12th September, 1859.

2104. John Pretty Clarke, of King Street Mills, Leicester, for an invention of "Improvements in the manufacture of spools or reels for the winding on of cotton, linen, thread, silk, or other fibrous materials."—Dated 15th September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 19th November*, 1859, *inclusive.*)

17th November.

2717. Esteves Blanchon, of Blois, in the empire of France, Gentleman, for an invention of "Machinery and apparatus for marking and boring leather and other similar substances, for making and cutting screwed pins, and for uniting leather and other similar materials."—A communication.—Dated 17th November, 1856.

2741. Samuel Fox, of Deepcar, Sheffield, for an invention of "Improvements in heating steel wire and tubes, also ribs and stretchers of umbrellas and parasols, for hardening, and in apparatus for straightening wire and tubes."—Dated 19th November, 1856.

2815. James Higgin, of the city of Manchester, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in treating certain vegetable dye stuffs, or preparations therefrom, so as to obtain a colouring substance of increased purity."—Dated 28th November, 1856.

19th November.

2743. James Montgomery Gilbert, of the city of Manchester, Engraver, for an invention of "Improvements in certain machines for etching or engraving."—Dated 20th November, 1856.

2757. John William Clare, of White Street, in the parish of St. George the Martyr, in the county of Surrey, for an invention of "Improvements in preventing, removing, consuming, and condensing smoke and noxious vapours, and in apparatus for those purposes."—Dated 21st November, 1856.

2758. Charles Tooth, of Burton-upon-Trent, Brewer, for an invention of "Improvements in charging or filling and filling up casks or other vessels for containing fermenting liquids."—Dated 21st November, 1856.

2894. William Hadfield Bowers, of Gorton, in the parish of Manchester, in the county of Lancaster, Manufacturing Chemist, for an invention of "Improvements in apparatus to be used for the purposes of distillation."—Dated 6th December, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 18th November*, 1859, *inclusive.*)

17th November.

771. John Thomas Way, of Holles Street, Cavendish Square, in the county of Middlesex, Professor of Chemistry, and John Manwaring Paine, of Farnham, in the county of Surrey, Gentleman, for an invention of "Improvements in the manufacture of burned and fired ware."—Dated 17th November, 1852.

785. Peter Carmichael, of Dens Works, Dundee, in the county of Forfar, for an invention of "Improvements in machinery for winding yarn or thread."—Dated 19th November, 1852.

18th November.

780. James Potter, of Manchester, in the county of Lancaster, Machinist, for an invention of "Improvements in machinery for spinning cotton and other fibrous substances."—Dated 19th November, 1852.

TABLE showing the Number of Patents of Invention granted in England to Residents in the undermentioned Countries from A.D. 1617 to A.D. 1858 (Dec. 31):—

England	27,759
France	2,176
Scotland	1,514
United States of America	776
Ireland	427
Wales	261
Belgium	134
Prussia	75
Germany	71
Italy	38
Channel Islands	37
Switzerland	34
Sardinia	33
Austria	31
British North America	24
West Indies	17
Denmark	14
Spain	13
Sweden	13
Holland	10
East Indies	8
Portugal	8
Australia	6
Russia	6
Turkey	4
Ceylon	3
Hungary	3
Mexico	3
South America	3
Algeria	2
British Guiana	2
Mauritius	2
Arabia	1
Barbadoes	1
Bermuda	1
Cape of Good Hope	1
Norway	1
Number of Patents in which the Patentees have given no address	531

B. WOODCROFT.

Errata in Journal of 18th November.

2529. For "foot" read "fruit."

2539. For "Greed" read "Green."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

BELGIUM.*

LIST of PATENTS Delivered on the 17th November 1859.†

(*Communicated by the Belgian Government.*)

* (For previous List, see No. 611 of this Journal.)

8060. J. FYNN, of Ghent, for "A trocar with a stop for cutting abscesses in the maxillar sinus."—Dated 6th October, 1859.

8140. H. CUNNEW, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in elastic bands for keeping notes, letters, &c."—Dated 22nd October, 1859.—(English Patent, 19th July, 1859.)

8141. B. J. JEAN, of St. Ghislain, a Patent of Improvement for "A process for preserving yeast of beer."—Dated 22nd October, 1859. — (Original Patent, 7th April, 1859.)

8142. G. SMITH, represented by A Crooy, of Brussels, for an imported invention of "An improved hatband."—Dated 24th October, 1859.—(English Patent, 10th June, 1859.)

8143. E. MOXHAM, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in stereoscopic apparatus."— Dated 24th October, 1859. — (English Patent, 31st May, 1859.)

8144. CH. CHRISTMANN, represented by V. Huyge, of Lokeren, for an imported invention of "A dividing engine for moulding gear wheels of all diameters."—Dated 24th October, 1859.—(French Patent, 15th June, 1858.)

8145. E. MULLER, represented by O. Daillencourt, of Brussels, for an imported invention of "A system of bathing in mists of mineral water, seawater, &c."—Dated 25th October, 1859.—(French Patent, 14th March, 1859.)

8146. J. MOLL, of Brussels, for "A disinfecting substance."—Dated 26th October, 1859.

8147. HEROLD, PANKL, and SCHEITHAUER, represented by D. de Vos-Verraert, of Brussels, for an imported invention of "A machine for printing woollen tissues."—Dated 26th October, 1859.—(Austrian Patent, 14th August, 1858.)

8148. L. CAHEN, of Brussels, for "Manufacture of wheels of steam carriages, locomotives, &c."—Dated 26th October, 1859.

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office where also translated Indexes may be consulted.

8149. C. J. B. E. Caillonè, represented by H. Biebuyck, of Brussels, for an imported invention of "Smoothing-irons." — Dated 26th October, 1859.—(French Patent, 21st October, 1859.)

8150. J. Boy, represented by H. Biebuyck, of Brussels, for an imported invention of "An electro-crystal reflector for gas apparatus."—Dated 26th October, 1859.—(French Patent, 18th October, 1859.)

8151. A. Loiseau, represented by H. Biebuyck, of Brussels, for an imported invention of "Manufacture of economical cloth or tissue."—Dated 26th October, 1859.—(French Patent, 19th October, 1859.)

8152. E. A. Boudier, represented by X. Raclot, of Brussels, for an imported invention of "Arrangements in slides and pipes for Woolf's steam engines, with a movement of alternate pistons."—Dated 26th October, 1859.—(French Patent, 8th December, 1857.)

8153. J. Beattie, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in means of preventing locomotives, carriages, &c. from running off the rails."—Dated 26th October, 1859.—(English Patent, 14th April, 1859.)

8154. J. Marchand, of Lize-lez-Seraing, for "A parachute for mines." — Dated 25th October, 1859.

8855. A. J. Gérard, of Liége, a Patent of Improvement for "Electro motors."—Dated 26th October, 1859.—(Original Patent, 29th August, 1859.)

8156. J. Dartois, of Filéron, for "An apparatus for boring mines."—Dated 27th October, 1859.

8157. J. Croisy, represented by G. Burle, of Brussels, for an imported invention of "A machine for making bolts and rivets."—Dated 27th October, 1859.—(French Patent, 11th August, 1857.)

8158. L. J. E. Dupont, represented by A. Picard, of Brussels, for an imported invention of "A process for impregnating grits with steam."—Dated 27th October, 1859.—(French Patent, 10th September, 1859.)

8159. F. Durand, of Brussels, for an imported invention of "Manufacture of vegetable glue from wheat."—Dated 28th October, 1859. — (French Patent, 22nd October, 1859.)

8160. L. Serbat, represented by F. Mahien, of Brussels, for "Removing the incrustation of tubular boilers."—Dated 28th October, 1859.

161. N. Verhaeren, of Molenbeek St. Jean, for "A colourless siccative."—Dated 28th October, 1859.

8162. A. Romedenne, of Liége, for "Breech-loading muskets with fixed barrels and revolving cartridges."—Dated 28th October, 1859.

8164. H. Godin, of Liége, a Patent of Improvement for "Keys of Lefaucheux' guns."—Dated 31st October, 1859. — (Original Patent, 9th June, 1856.)

8165. J. Malherbe, of Liége, for "A process for turning cylinders of rolling mills." — Dated 31st October, 1859.

8166. G. J. Heuse-Orban, of Nessonvaux, for "Manufacture of gun-barrels lined with steel."—Dated 31st October, 1859.

8167. Eug. Lacroix, represented by X. Raclot, of Brussels, for "A mechanical means of regulating the immersion of propellers for inland navigation." —Dated 29th October, 1859.

8168. J. Brière, represented by Th. Boutillier, for "Compasses with multiple divisions."—Dated 29th October, 1859.

8169. R. Mushet, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in the manufacture of cast steel."—Dated 29th October, 1859.—(English Patent, 3rd May, 1859.)

8170. J. H. Young, represented by G. Jollie, of Antwerp, for an imported invention of "A machine for setting and distributing type."—Dated 2nd November, 1859.—(English Patent, 9th April, 1859.)

8171. Jollet, Babin, and Gâche, sen., represented by A. Picard, of Brussels, for an imported invention of "A steam boat for dredging basins of water."— Dated 31st October, 1859.—(French Patent, 3rd September, 1859.)

8172. C. Eyrand, represented by F. Clavareau, of Brussels, for "A system of revolvers with fire-locks and gearings."—Dated 31st October, 1859.—(French Patent, 15th Norember, 1858.)

8173. J. F. Dugniolle, of Brussels, for "A mode of fitting metal pipes."—Dated 31st October, 1859.

8174. P. Chaineux, of Hoignée-Cheratte, for "Fastenings of revolvers."—Dated 3rd November, 1859.

8175. J. Chaineaux, of Wandre, for "Improvements in Mathieu and Lefaucheux' breech-loading revolvers."—Dated 3rd November, 1859.

8176. J. B. Delrieux, of Liége, for "Manufacture of gun-barrels of cast steel without welding."—Dated 3rd November, 1859.

8177. P. Dietens, of Brussels, for "Safety seals of letters and missives."—Dated 3rd November, 1859.

8178. Th. Cook, represented by A. Crooy, of Brussels, for an imported invention of "Improvements in the manufacture of small wooden screws."—Dated 3rd November, 1859. — (English Patent, 14th October, 1859.)

8180. J. Reynolds, represented by F. Anthoine, for an imported invention of "Improvements in propelling vessels."—Dated 3rd November, 1859.—(English Patent, 26th May, 1859.)

8181. R. Mushet, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in manufacturing and puddling iron and steel."—Dated 3rd November, 1859. — (English Patent, 7th May, 1859.)

8182. H. Comblain, of Wandre, a Patent of Improvement for "Revolvers."—Dated 27th October, 1859.—(Original Patent, 31st March, 1854.)

8183. J. Lerat, represented by F. Cordie, of Mons, a Patent of Improvement for "Heating lime-kilns."— Dated 4th November, 1859.—(Original Patent, 2nd November, 1858.)

8184. J. B. J. Desramaut, of Saint-Nicholas, for "Manufacture of varnish."—Dated 7th November, 1859.

8186. P. Dietens, of Brussels, for "Envelopes of letters and missives, with a safety seal."—Dated 4th November, 1859.

SAXONY.*

List of Patents for Inventions Delivered between the 1st July and 30th September, 1859.†

(*Communicated by the Saxon Government.*)

(For preceding List, the No. 578 of this Journal.)

1. Franz Louis Schwalbe, of Chemnitz, for "A machine for cleaning malt and corn."—5 years."—Dated 1st July, 1859.
2. Richard Hartmann, of Chemnitz, for the St. George's Iron Works, near St. Gallen, for "A double embroidering machine."—5 years."—Dated 1st July, 1859.
3. Grabert, of Neuwedel, for "Prismatic sights of fire-arms."—5 years.—Dated 1st July, 1859.
4. Albert Ostertag, of Dresden, for A. E. Rochette and Co., of Paris, for "A chromotypographic press, for printing fabrics with manifold colours."—5 years.—Dated 30th June, 1859.
5. Carl Gottlob Knöfel, of Wernsdorf, for "Construction of a tower clock with a repose cylinder escapement.—5 years.—Dated 30th June, 1859.
6. T. H. F. Prillwitz, of Berlin, for Walter Ralston, of Manchester, for "Improvements in apparatus for calico-printing."—5 years.—Dated 1st July, 1859.
7. Hermann Wilke, of Chemnitz, for "A weaving machine."—5 years.—Dated 4th July, 1859.
8. Schäffer and Budenberg, of Buckau, near Magdeburg, for "A water-gauge of steam boilers."—5 years.—Dated 7th July, 1859.
9. Schäffer and Budenberg, of Buckau, near Magdeburg, for "A safety apparatus or alarum for steam boilers."—5 years.—Dated 7th July, 1859.
10. Dr. Meissner, of Leipzig, for Richard Demeuse, of Verviers, for "An apparatus for feeding steam boilers."—5 years.—Dated 7th July, 1859.
11. Hermann Findeisen, of Chemnitz, for Adolph Schöller, of Brünn, for "Manufacture of asphalt woollen felt."—5 years.—Dated 9th July, 1859.
12. J. H. F. Prillwitz, of Berlin, for Lewis Wells Broadwell, of New Orleans, for "Improvements in preparing millstones."—5 years.—Dated 13th July, 1859.
13. S. Elster, of Berlin, for "A new gasmeter with a steady waterwheel."—5 years.—Dated 16th July, 1859.
14. Christian Weidenmüller, of Auerbach, for "A circular tenter."—5 years.—Dated 19th July, 1859.
15. Sachsenberg Brothers, of Rosslau on the Elbe, for "A press for making bricks."—5 years.—Dated 20th July, 1859.
16. Christian Heinrich Knoth, of Laubegast, for "A machine for pressing bricks."—5 years.—Dated 23rd July, 1859.
17. Julius Gustav Schindler, of Strühlen, near Dresden, for "A process for obtaining flour, and apparatus belonging thereto, the cylinder press of which being also applicable to pressing out juice, and to other purposes."—5 years.—Dated 26th July, 1859.
18. Christian Friedrich Jage, of Leipzig, for "Improvements in ice-safes."—5 years.—Dated 28th July, 1859.
19. Wilhelm Ernst Kaps, of Dresden, for "A repeating mechanism of oblique pianofortes."—5 years.—Dated 28th July, 1859.
20. Julius Wilhelm Spindler, of Berlin, for "A method of obtaining and applying a new red dyeing substance, called 'fuchsine.'"—5 years.—Dated 28th July, 1859.
21. Münnich and Co., of Chemnitz, for "Improvements in malt kilns with rotary cylinders."—5 years.—Dated 28th July, 1859.
22. Friedrich Carl Hoffmann, of Zwickau, for "Improvements in malt kilns with rotary cylinders."—5 years.—Dated 29th July, 1859.
23. Friedrich Wilhelm Grüner, of Glauchau, for "A machine for washing raw woollen yarns."—5 years.—Dated 1st August, 1859.
24. Joseph Asbach, of Chemnitz, for "A rotary malt kiln."—5 years.—Dated 13th August, 1859.
25. Friedrich Hoffmann, of Sebnitz, for "A peculiar kind of boxes for winding up lamps."—5 years.—Dated 15th August, 1859.
26. Richard Lauckner, of Aue, for "An arrangement in cards for cotton, wool, oakum, flax, silk, and other fibrous substances, whereby the fleece may be divided broadwise into any number of slubs."—5 years.—Dated 16th August, 1859.
27. F. Edmund Thode, of Dresden, for "Improvements in straining paper pulp."—5 years.—Dated 23rd August, 1859.
28. Ernst Seidler, of Dresden, and Friedrich August Stolle, of Chemnitz, for "A smoke-consuming firing apparatus."—5 years.—Dated 30th August, 1859.
29. Johannes Mathias Forster, of Dresden, for "A mode of fixing brushes to walking sticks for cleaning foot coverings from dust and snow."—5 years.—Dated 1st September, 1859.
30. C. F. Schmidt, of Frankenburg, for "A mechanical hand-printing table with a stretching and report frame."—5 years.—Dated 7th September, 1859.
31. Bernhard Leopold Löbel, of Limbach, near Chemnitz, for "A mechanical hosiery frame for

† For the Saxon Patent Law, see No. 236 of this Journal.
‡ All the published Specifications are deposited in the free Library of the Commissioners of Patents, where translations of the same may be had.

obtaining regular fabrics."—5 years.—Dated 13th September, 1859.

32. Friederich August Jentsch, of Chemnitz, for "Improvements in Jaquin's stocking-frames."—5 years.—Dated 13th September, 1859.

33. J. H. F. Prillwitz, of Berlin, for Jean Bradly' Aiken, of Manchester, for "Improvements in machines for knitting tricot."—5 years.—Dated 21st September, 1859.

34. Dr. John Baptist Rottenstein, of Frankfort-on-the-Maine, for "Putnam's method of applying vulcanized caoutchouc or gutta percha as a substitute for gold or other metals to the manufacture of artificial sets of teeth, and apparatus for shaping and vulcanizing caoutchouc and portable steam apparatus for hardening caoutchouc, gutta percha, and other substances used in the manufacture of artificial sets of teeth."—5 years.—Dated 21st September, 1859.

35. Alois Auer, of Vienna, for "Self-acting apparatus combined with fly-presses for laying in and cutting paper, together with a damping machine."—5 years.—Dated 26th September, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 1st November, 1859, and each bearing that date.

No. 25,936. Edward R. Arnold, of Providence, R. I., for an "Improvement in cut-off valves of steam engines."

"I claim, 1st, making the tappet C, Fig. 4, and the ends of the jointed valve rods D, D^1, Fig. 3, inclined in a direction at right angles to their lines of motion, and combining and arranging them substantially as herein set forth. 2nd, the combination of the regulator with a tappet, constructed and operated substantially as described, for the purpose specified."

No. 25,937. L. S. Ballon, jr., of New York, N. Y.' for an "Improvement in shirts."

"I claim a shirt formed by having its yoke made of two pointed projections *c*, *c*, extending down from the shoulders or inclined front ends *a* of the yoke on the shoulder blades of the wearer, in such a manner as to leave a recess *d* between the projections, which recess extends upward nearly to the neck band, substantially as and for the purpose set forth."

No. 25,938. Henry A. Barnes, of Milwaukie, Wis., for an "Improvement in railroad car couplings."

"I claim the arrangement of the latch C in the draw head A, in combination with the cam D, latch or hook connection B, lever or treadle G, substantially in the manner as and for the purpose described."

No. 25,939. E. F. Barnes, of Brooklyn, N. Y., for an "Improved method of protecting telegraphic instruments against atmospheric electricity."

"I claim the application and use in a telegraphic line, or in connection with telegraphic instruments of a vessel A, containing acidulated water or fluid, as described, and having a platinum or other metallic wire B of better conductability than the contents of such vessel, passing through such vessel, and connecting by one end with the main wire and by the other with the telegraphic machine, the whole arranged substantially as and for the purposes set forth. I claim also in combination or connection with such vessel or fluid A and wire B, the arrangement of the metallic points *b*, *c*, *d*, on the wire of the main line, and extending in to the fluid in A, substantially as and for the purpose set forth."

No. 25,940. J. Bartholomew, of Union, N. Y., for an "Improvement in machine for packing flour in barrels."

"I claim, 1st, the combination with the packing screw, or its equivalent, of a cylinder, or its equivalent, so that the flour will be first packed within the said cylinder, or its equivalent, and then discharged therefrom in a packed state into a bag, barrel, or other receptacle, as set forth. 2nd, the arrangement of the rod L, levers Q, K, block *l*, connected with the shaft J by the cord or chain *u*, and the hub or boss *k* on screw shaft F, for the purpose of automatically discharging the packed flour from the cylinder or measure M. 3rd, the arrangement of the lever D with pinion E attached, block *l*, hub or boss *k*, levers O, P, and spring *t*, for the purpose of automatically discharging the pinion E from the wheel *d*, and thereby stopping the rotation of the screw G at the proper time."

No. 25,941. Richard L. Bate and James Caulkins, of Adrian, Mich., for an "Improved coffee roaster."

"We claim the combination of the stationary cylindrical chamber, revolving skeleton stirrer, and outer vertical cylindrical casing, all constructed in the manner and for the purposes set forth."

No. 25,942. G. W. R. Bayley, of Brashear, La., for an "Improvement in rails for railroads."

"I claim the reversible Z rail for railways, that is to say, I claim the rail with its stem placed inside of the vertical centre of its head, outside of the vertical centre of its base, with the inner and outer portions of its head, and of its base of different thickness and form, with its head and its base similar in transverse section as to outline, though reversed as to relative position and connection to the rail stem, the stem being nearest to the inside thick lip of the rail head and to the outside thick lip of the rail base, while the thin lip of the rail base is inside and the thin lip of the rail head is outside, substantially as herein described and specified."

No. 25,943. Benjamin G. Beadle, of Memphis, Tenn., for an "Improvement in cotton gins."

"I claim, first, uniting the knuckles or projections *b* on the ribs by a back or brace *c* extending through the series for the purpose of strength, and for keeping them in proper position, substantially as set forth."

No. 25,944. T. G. Beecher, of Beaver Dam, N.Y., for an "Improved farm fence."

"I claim my improved method of construction as shown namely, combining with the posts A, arranged as described, the rails B, made removable and replaceable by means of the locking device *e*, *f*, *g*, substantially as herein specified."

No. 25,945. Wm. H. Bitzer, of Muscatine, Iowa, for an "Improved arrangement of devices in shingle machines."

"I claim the arrangement of the frame Q, and planer R, upon the self-adjusting swinging bar P, and the combination of the parts thus arranged with the pivoted lever U, and reciprocating carriage F, as and for the purpose herein shown and described."

No. 25,946. Wm. G. Budlong, of Hartford, Conn., for an "Improvement in sewing machines."

"I claim the combination of the adjustable groove segment I, with the looper bar J, fitted loosely therein, feeder arrangement P, Q, R, operating rod X, having cams 1, 2, 3, secured thereto, and connected by arms *c*, *d*, *e*, G, the whole being arranged and operating substantially in the manner as and for the purpose described."

No. 25,947. Samuel F. Burdett, of Keokuk, Iowa, and Henry Still, of Leavenworth city, K.T., for an "Improved scale for cutting boots and shoes."

"We claim, first, the lines of average ankle, heel, instep, and ball measures, running from the point 'A' (in figure No. 1, A), or any other given point that will produce the same result, with the lines of increase and decrease intersecting them at such an angle, and at such a distance from each other as will produce the purpose set forth. Secondly, we claim the device of so arranging the heel and instep measures, as in the figures No. 1, B, and No. 2, B, that any required size of said heel and instep may be marked at one stroke, with or without the combination of the average measures of the same. Thirdly, we claim the one third of an inch increase and decrease of average heel measures, upon the different lengths of lasts or such portions of an inch as will produce the same effect substantially as herein set forth."

No. 25,948. Levi Burnell, of Milwaukie, Wis., for an "Improvement in water meters."

"I claim the arrangement of the hollow arbor B, with a narrow slot *j*, in combination with the lips *h*, formed by the inner edges of the buckets D, substantially as and for the purpose specified."

No. 25,949. Robert H. Champlin, of East Greenwich, R. I., for an "Improved washing machine."

"I claim the combination of the rounds or slats and springs with the cylinder, when constructed and operating substantially as herein described."

No. 25,950. Edward C. Clay, of Malden, Mass., for an "Improved electro-magnetic burglar alarm."

"I claim the combination in an electric burglar's alarm of galvanometer, with a resistance coil and an automatic switch for the purpose of indicating the point where a burglar is attempting to effect an entrance substantially as herein described. I claim also the combination in an electric burglar alarm of a galvanometer and a bell, with suitable mechanism for ringing it, for the purpose of simultaneously giving an alarm, and of indicating the place of attack. I claim also, the use in a burglar alarm of a regulating coil, in combination with the resistance coils, substantially as herein described for the purpose of maintaining a constant relation between the strength of the current, and the varying resistance of the circuit when the respective resistance coils are included."

No. 25,951. John Webster Cochran, of New York, N.Y., for an "Improvement in projectile for ordnance."

"I claim constructing and combining the body of the projectile and its shirt or case of soft metal substantially as herein described, to wit, so that the passages for the gases of the exploded powder are formed partly in the body of the projectile and partly in the shirt or case, with their entrances in the shirt or case, without perforating the body of the projectile, and that the shirt can be carried separately from the body, and slipped on when required for use, in such manner as to remain secured thereon during the flight of the projectile as herein set forth."

No. 25,952. Nathan Cope, of Cincinnati, O., for an "Improvement in slide valve of steam engines.

"I claim the combination with the valves B, C, of the grooves *g*, *g*, and notches *h*, *h*, as and for the purposes set forth."

No. 25,953. Thos. Crossley, of Rockville, Conn., for an "Improvement in electrotype printing blocks."

"I claim an electrotype printing block for printing fibrous and textile fabrics, which is prepared from a mould formed of at least three different lengths of type, as represented at *c*, *d*, *e*, so as to have a highly raised printing face, composed of metal margins surrounding a felt or other equivalent ductile or plastic substance, to lift and carry the color, substantially as herein represented."

No. 25,954. Bradford Dean, of Clayville, N. Y., for an "Improved meat slicer."

"I claim the arrangement of the knives I, and I^1, knives D, and D^1, and the adjustable guide B, as shown and described, substantially as and for the purpose specified."

No. 25,955. James Cumming, of Boston, Mass., for an "Improvement in steam engines."

"I claim, 1st, the combination with a square piston chamber A, of a square piston, which is constructed of a series of angular sections of packing D, joined loosely together by lap joints, and made adjustable and kept seam-tight, substantially in the manner and for the purpose set forth. 2nd, in combination with the above, the use of a square piston rod C, and a square stuffing box F, F^1, substantially in the manner and for the purpose set forth."

No. 25,956. John K. Derby, of Jamestown, N. Y., for an "Improved stave jointing machine."

"I claim, 1st, the employment or use of two conical cutter heads B, B, provided with suitable knives C, connected by teeth *d*, or other means, so as to ensure a simultaneous rotation, and placed on frames A, A, connected by hinges or joints *a*, *a*, substantially as and for the purpose set forth. 2nd, the attaching of the knives C, C, to the cutter heads B, B, in reverse positions, so that they will cut from the centres of the staves outward, for the purpose specified."

No. 25,957. George Dieffenbach, of New York, N. Y., for an "Improved method of making a hard compound of rubber."

"I claim the application of artificial heat to a composition of matter, consisting of sulphate of alumina and other ingredients, substantially as described, for the purpose of curing or hardening the said composition, substantially as specified."

No. 25,958. Wm. Doulin, of Youngstown, Ohio, for an "Improvement in hanging carriage bodies."

"What I claim is, in combination with any of the ordinary springs of a carriage, an elliptic spring G, on the reach of the wagon, said elliptic spring being constructed and arranged in the manner and for the purpose herein set forth and explained."

No. 25,959. C. Duckworth, of Hartford, Conn., for an "Improvement in locks."

"I claim the tumblers E, slotted arm D, attached to the bolt B, lever G, or its equivalent, and the key F, provided with lever H, combined and arranged, substantially as and for the purpose set forth."

No. 25,960. J. A. Dufield, of McHenry, Ill., for an "Improvement in harvesters."

"I claim wheels (*a*, *a*) provided with pins (*c*, *c*,) and diamond shaped plates (F, F) in combination with cutter bar (P), shaft (D), wheel (*d*), and lever H, the whole being combined and arranged, in relation to each other, substantially as and for the purpose set forth and described."

No. 25,961. Aaron Eames, of Kalamazor, Mich., for a "Fly trap."

"I claim the combination of the fly-receptacle B, register C, rotating clearer F, bait board H, and gate G, arranged substantially as and for the purpose set forth."

No. 25,962. Thaddeus Fairbanks, of St. Johnsbury, Vt., for an "Improvement in platform scales for railroads, &c."

"I claim the arrangement of the supporting standards, and the loops or supports of the longitudinal levers and platform, with respect to each other, and so as to extend within or into the space between the side timbers of the platform, substantially as specified."

No. 25,963. Wm. A. Fosket and Elliot Savage, of Meriden, Conn., for an "Improvement in sewing machines."

"We claim, firstly, the presser foot, in combination with its spring, and with the needle stock, when so arranged that by the operation of the latter the force of the spring will be taken from the presser foot at the time the feed of cloth is to be given, that is, when the needle is out of the cloth, but without the said presser foot from the cloth, in the manner and for the purpose substantially as described. Secondly, the needle guard, constructed and operating substantially as set forth, in combination with the needle and with the thread carrier or looper. Thirdly, we claim so combining and arranging the double-jointed stock of the thread carrier with the two levers (*o*), and (r^1), as that the said parts shall vibrate in the same plane, and also that the said stock shall form a link between the two levers, which are operated to have their arcs of vibration opposite to each other, where-

by, with the least throw of the said levers, the greatest vibration of the thread carrier is produced."

No. 25,964. James P. Gage, of New York, N. Y., for an "Improvement in mills for crushing and pulverizing quartz, &c."

"I claim, first, the combination of cast rolls upon wrought iron shafts (the rolls cast solid upon the shafts), with the wrought-iron box or frame, the conicals upon the shaft, and the sliding cast-iron journal boxes, arranged and operating for the purposes and in the manner described. 2, I claim the combination of the rollers, the case or frame D, the box L, and the wide shoe, and the diagonal plates, operating in the manner and for the purposes described."

No. 25,965. Wm. Hall, of St. Louis, Mo., for an "Improvement in bran dusters."

"I claim the combination of the flange M, with its arms *t*, and the head *o*, with its scuppers N, with the brushes and fans K and P, substantially as described for the purpose specified."

No. 25,966. C. A. Harper, of Fort Worth, Texas, for an "Improvement in converting reciprocating into rotary motion."

"I claim producing the rotary motion of shaft S^1 and saw C by the reciprocating racks R, R^1, in combination with gear wheel *a*, spring pawls *p*, drum D, shafts S, and wheels B and W, substantially as described."

No. 25,967. John Holroyd, of Washington, D.C., for an "Improvement in projectile for fire-arms."

"I claim constructing the projectile with the reversed curved grooves A and B on the rear and front, substantially as and for the purpose set forth."

No. 25,968. Henry Hudson, of Three Springs, Pa., for an "Improvement in sewing machines."

"I claim the carrying of a self-feeding automatic stitch forming device (like that herein shown and described, or its equivalent,) over the surface of a stretched or stationary fabric, substantially as and for the purpose herein set forth."

No. 25,969. Wm. James, of Baltimore, Md., for an "Improvement in hydrants."

"I claim the movable cylinder (B) and tube (C), when combined with the fixed piston (E) upon the supply pipe (A), and so constructed and arranged in relation to the supply pipe that its elevation shall open a direct communication with the main, in the manner and for the purposes specified."

No. 25,970. A. Livingston Johnson, of Baltimore, Md., for an "Improvement in machines for preventing engines and railroad cars from being thrown from the track."

"I claim, in combination with a locomotive and a pioneer safety car in advance of it the bars A, fastened to one and extending into loops or mortises in the other, to prevent the lighter car from leaving the track, or one from mounting or riding one on the other, in case of accident or sudden stoppage, substantially as described. I also claim, in combination with the locomotive and pioneer safety car, an advange of the link or drag bar B, so connected thereto as that the propelling force transmitted through it shall tend to hold the forward part of the safety car to the track, substantially as described."

No. 25,971. Geo. W. La Baw, of Jersey City, N.J., for an "Improved life boat."

"I claim the arrangement of ribs D, with the main rib K, and keel E, and cut waters I, I, the whole being constructed substantially, as and for the purpose specified."

No. 25,972. Sylvester Littlefield, of Alfred, Maine, for an "Improvement in sawing machines."

"I claim, first, combining with a circular saw A, on a vibrating adjustable arm D, an auxiliary saw G, substantially as and for the purpose described. Second, arranging an arm B, with two guides C, in such a manner that it vibrates on the arbor of the saw, and that it can be raised and lowered instantaneously, substantially as and for the purpose described."

No. 25,973. I. I. Magee, of Fernandina, Florida, for an "Improved machine for unloading vessels."

"I claim the arrangement of the frames A and H, with rollers C and I, and with screws G and J, or their equivalents, substantially as and for the purpose specified."

No. 25,974. C. K. Marshall, of Vicksburgh, Mass., for an "Apparatus for printing addresses on newspapers, &c."

"I claim, 1st, a chain of plates, or solid links, having characters of the description substantially as described, placed, cut, or set into the face of its links, and arranged to wind in scrolls on to one pulley or roller from another, substantially as and for the purposes herein set forth. 2nd, the combination of the above with an inking device, which supplies the characters made on the faces of its links with ink, and with a stamping device, which will cause the respective links of the chain as they come into play, to produce a clear impression upon the article being directed or superscribed, substantially as and for the purposes set forth. 3rd, the employment of an inclined hopper, having openings in its bottom and furnished with a spring stop, in combination with the revolving bulk feeding arms, substantially as and for the purpose set forth." 4th, the combination with the features embraced in the 3rd claim of the raking, single feeding device, substantially as and for the purposes herein described. 5th, the use of the scroll winding post office indicating belt with the superscribing chain, or other superscribing device, substantially as and for the purposes set forth. 6th, the manner, substantially as described, of effecting a combination between said belt and chain. 7th, the combination of the features embraced in the 5th claim, with the 'mail' assorting box, substantially as and for the purpose set forth. 8th, the use of the slate indicating belt, with the post office indicating belt, and with a superscribing device, substantially as and for the purpose set forth. 9th, the organization of an apparatus, by means, substantially as described, for accomplishing by one continuous operation, the several results herein specified."

No. 25,975. John Mayrhofer, of New York, N.Y., for an "Improvement in process of preparing paper pulp."

"What I claim, in making paper, impervious to water, is mixing the alkaline solution of rosin with the pulp, and then adding what is known as English sulphuric acid, and after the sheets have been formed, drying them by contact with heated metallic surfaces, all substantially as and for the purposes specified."

No. 25,976. Caesar Newmann, of New York, N.Y., for an "Improvement in skeleton hoop skirts."

"I claim combining a series of spring hoops, as herein set forth, by means of a series of twisted cord, and thus forming a skeleton skirt, as above specified."

No. 25,977. John S. McClure, of Mobile, Ala., for a "Method of mounting ambrotypes."

"I claim the employment of a concave back ground, or surface D, in combination with an ambrotype picture, substantially as and for the purposes herein shown and described."

No. 25,978. J. E. Palmer, of St. Louis, Mo., for an "Improved tackle block."

"I claim the form of the block in the inside, and the form of the pulley, when the two are combined and arranged, substantially as described, for the purpose specified."

No. 25,979. John W. Palmer, of Port Republic, Va., for an "Improvement in bee hives."

"I claim providing the within-described bee hives, with one or more partitions (I), with opening *a*, *m*, e^1, *c*, and *g*, g^1, and with feed boxes (*c*), which contain separating boxes D, constructed substantially as described, the whole being arranged and used in the manner and for the purpose set forth."

No. 25,980. Walter Ralston, of Manchester, England, for an "Improvement in embossing and finishing woven fabrics."—Patented in England, 23rd November, 1858.

"I claim the employment of grooved, fluted, engraved, milled, or otherwise indented rollers of metal, wood, or other suitable material, driven at a greater speed than the boul or bowls connected with them, so as to exert a rubbing or friction upon the fabric submitted to their action, and thereby produce an indefinite variety of pattern as well as a bright finish or lustre, and also reversing the operation by giving the bowl a quicker motion than the pattern roller."

No. 25,981. Charles E. Rowan, of New York, N. Y., for an "Improvement in machines for polishing rice."

"I claim, 1st, the combination of the conductors H, H^1, when constructed substantially as described, and secured

within a loose wire-cloth cylinder A, with the scouring disks G, G[1], G[11], constructed substantially as shown, and secured to the driving shaft B, as set forth, so that the friction of the grain will cause the cylinder A to revolve and lift and deliver the grain through the machine, all as herein specified. 2nd, in combination with the parts above described, I claim the tubes k^* and openings (*l*), (*m*), arranged as shown, so that the dust may escape, and air may enter to cool the contents of the cylinder A during the scouring operation. 3rd, I claim placing the feeding screw E upon the same shaft B that carries the scouring disks G, G[1], G[11], as set forth."

No. 25,982. Wm. R. Satterly, of Setauket, N. Y., for an "Improvement in reefing fore-and-aft sails."

"I claim the combination with and above the triangular sail G of another triangular sail H which has a boom C attached to it, so that when the two sails and boom are put together they form the ordinary fore-and-aft sail, operating in the usual manner, but when the sail H and its attached boom C are removed, as described, the small triangular sail G remains, all substantially as set forth."

No. 25,983. Nathaniel Snow, jr., of Boston, Mass., for an "Improved steering apparatus."

"I claim the above-described steering apparatus, consisting essentially of the wheel I, pinion G, rods D, and yoke C, arranged and operating substantially as described."

No. 25,984. N. Spofford, of Haverhill, Mass., for an "Improved bit stock."

"I claim arranging the socket A of a brace with a slot *a*, as described, in combination with a thumb screw *b* and projections *d*, or their equivalents, substantially as and for the purpose specified."

No. 25,985. E. N. Sprinkle, of Marion, Va., for an "Improved churn."

"I claim, as an improvement on the churn patented to Hatfield and Goldsmith on the 13th of July, 1858, the combination of the perforated obliquely-arranged dashers *c*, *c*, *c*, with the single inclined stationary guard F, substantially as and for the purposes set forth."

No. 25,986. Robert Steel, of Philadelphia, Pa., for an "Improvement in the construction of burners for vapor lamps."

"I claim the combination of a metallic gas generating chamber and burner, applicable to a lamp, chandelier, or other gas fixture, for the purpose of generating vapor or gas from burning fluid, and consuming the same as fast as it is generated, thereby producing a superior artificial gas light, as is described, and particularly set forth in the specification."

No. 25,987. John G. Treadwell, of Albany, N. Y., for an "Improvement in stoves."

"I claim providing the door (H) with an inclined projection (*a*) on one side, and a hinged rack bar (*d*) on the other, when said door is used in connection with the cross bar (*c*) and with the damper (D), as constructed, the whole being arranged and operated substantially as and for the purpose described."

No. 25,988. George Whitcomb, of Springfield, O., for an "Improvement in mole ploughs."

"I claim the construction of a flexible mold by the combination of sections which are not attached to each other, but by being held in place by the chains (J), or its equivalent, as set forth."

No. 25,989. Luke H. Ward, of Marlboro', Mass., for an "Improvement in pegging machines."

"I claim the particular arrangement and combination of the feeding apparatus, consisting of the levers R, Q, and O, spring P, and wheels N, L, in connection with the lever U, and its stud I, and the awl and driver operated by the levers W and X, in connection with the peg feeding apparatus and pivoted saw for cutting off the pegs, when constructed and operating as above set forth and described."

No. 25,990. Simeon Wood, of Worcester, Mass., for an "Improved auger."

"I claim the combination of the chipping bit or bits with a band or hook, having teeth or cutters on its bottom edge, substantially as and for the purpose set forth."

No. 25,991. R. F. Wolcott, of Claremont, N. H., for an "Improvement in platform scales."

"I claim, 1st, the combination of the two graduated wheels Q, R, screw *s*, and bar *r*, arranged substantially as and for the purpose set forth. 2nd, attaching the lever I to the platform B, levers H, H, and rod J, when the above parts are arranged to operate, as described. 3rd, the construction and arrangement of the fulcrum arms *g* of the shaft D, projections *b*, and plates *e*, of the hangers C, and the plates G, *l*, of the beams F, F, substantially as and for the purpose set forth."

No. 25,992. Jean Louis Baudelot, of Harencourt, France, assignor to Henry Migeon, of Wolcottsville, Conn., for an "Improvement in apparatus for cooling liquids."—Patented in France, 13th April, 1856.

"I claim a cooling apparatus for liquids composed of a vertical range of pipes passing the liquid successively from the lower to the upper pipes in said range, in combination with the perforated trough (*d*), or its equivalent, supplying the other liquid which trickles over the surface of said range of pipes, as set forth. I also claim in such a cooling apparatus a series of teeth or projections on the under side of the horizontal pipes, for the purpose of conducting or distributing the liquid falling successively from one pipe to the other, substantially as specified."

No. 25,993. Edward Behr and L. Froelich, of New York, N. Y., assignors to Edward Behr aforesaid, for an "Improvement in skate straps."

"We claim the rod F fitted longitudinally in the stock A, provided with screw sections *c*, *j*, with cylinders E, H, fitted thereon, and one end of the heel and toe straps D, G, attached to said cylinders, the latter being provided with the ratches *d*, *k*, into which the pawls *e*, *l*, catch, substantially as and for the purpose set forth."

No. 25,994. Thos. Bishop, of Plainville, Conn., assignor to himself and James M. Bishop, of same place, for an "Improvement in tea and coffee pots."

"I claim the arrangement of the area E, flanges X, upon the lid G, with the apertures F and D, in the manner as and for the purpose described."

No. 25,995. D. G. Chase, of Boston, Mass., assignor to George Parr, of Buffalo, N. Y., for an "Improved shank laster."

"I claim the jointed cross bars A, A, provided with the swivel jaws E, E, and swivel nuts *a*, *a*, in connection with the right and left screw shaft C, the whole being arranged substantially as and for the purpose set forth."

No. 25,996. John Colville, of Wilmington, N.C., assignor to himself and T. L. Colville, of same place, for an "Improved method of adjusting circular saws."

"I claim the expansion ring or plate of copper G, or any other suitable metal capable of being expanded for setting or adjusting the saw properly upon the shaft at any given point or points, when the same is interposed between the saw and fixed collar, as set forth."

No. 25,997. Wm. Elwell, of Gardiner, Me., assignor to himself and N. O. Mitchell, of same place, for a "Fly-trap."

"I claim the two boxes A, A[1], of a quadrangular or other shape, provided with sliding glass tops and sliding bottom G, in combination with the perforations B, surrounded with projecting pins for the purposes, and when the same are all arranged in the manner herein set forth."

No. 25,998. John A. Evarts, of West Meriden, Conn., assignor to Homer Curtis, of same place, for "Improved cast metal pulleys."

"I claim forming the core D, of the shell B, by covering the wheel A with the sand *b*, and having the hole *c*, made through the core, so that in casting the shell, the pintle or axis E of the wheel will be cast, simultaneously with the shell, and the wheel, when the sand *b* is removed, be properly adjusted within the shell, substantially as described."

No. 25,999. JOHN JEWELL FLANDERS, of Manchester, N.H., assignor to himself and E. G. W. Bartlett, of same place, for an "Improvement in rotary pumps."

"I claim the combination of the revolving annular inverted gear, the pinion S, and stationary crescent U, the whole being arranged to operate in the case, substantially as described, for the purposes set forth."

No. 26,000. H. K. SYMMES, of Newton, Mass., assignor to himself and R. W. Holman, of same place, for an "Improvement in apparatus for manufacture of coal oil."

"I claim, 1st, an oil retort A, in combination with the gas retort D, or its equivalent, for the purpose of saving the gas which escapes from the oil retort, and to improve its quality, substantially as herein specified. 2nd, in combination with the two retorts A and D, I claim the pump G^1, or its equivalent, for the purpose of imparting to the gas the necessary pressure, substantially as set forth."

No. 26,001. ISAAC GOODSPEED, of Norwich, Conn., assignor to himself and George A. Mansfield, of Boston, Mass., for a "Pocket alarm."

"I claim in the pocket thief and burglar alarm, constructed in the form and manner represented and described. I claim the combination and arrangement of the independent lever K, adapted to cap and cock the alarm, and while both the cap tube and hammer are arranged within, and do not project outside the shell or case."

No. 26,002. STEPHEN H. HEAD, of Boston, Mass., assignor to himself and Wm. P. Parrott, of same place, for an "Improvement in steam boilers."

"I claim, in combination with the furnaces B, C, and the lateral passage E, and damper *e*, chamber F, located at the front of the furnaces, and between them and the flues, for the purpose and in the manner substantially as herein set forth."

No. 26,003. GEORGE M. PHELPS, of Troy, N.Y., assignor to the American Telegraph Company, for an "Improvement in telegraphic machines."

"I claim, first, producing from a magneto-electric battery, the momentary electric currents required for actuating the printing mechanism, by giving momentary motion to the armature, or other current, inducing part of the magneto-electric battery, by means of a set of finger-keys, which, when depressed are controlled in their action, upon the current, inducing part of the magneto-electric battery, by a mechanical contrivance, which constantly moves in harmony with the unintermittingly revolving type wheel, substantially as herein described. I also claim increasing the capability of the instruments for telegraphing, by so increasing the speed of the transmitting device and type wheel, in relation to the motion of the parts which perform the printing, that two or more types shall pass the platen, while the printing mechanism is acting once, as herein described. I also claim turning the cylindrical platen, while each impression is being made, by means of rings of teeth R and T, upon the type-wheel and platen, as and for the purpose herein set forth. And, finally, I claim making a revolving wheel or shaft U or *i*, turn the corrector M, armature C, or another wheel or shaft, a certain fixed distance, with the same speed as itself at any time and any desired number of times, by the use of a ratchet wheel V or *h*, catch W or *f*, guide X or *k*, and detent K or *e*, all arranged together, and with the said driving and driven wheel or shaft for conjoint operation, as herein set forth."

No. 26,004. CHAS. A. GAGE, of Boston, Mass., assignor to Albert S. Hall, of Malden, Mass, and A. R. Davis, of Cambridge, Mass., for an "Improved clothes dryer."

"I claim the combination, substantially as described, of the mantel or shelf, and the folding slats, arranged and operating as set forth, for the objects specified."

RE-ISSUES.

WILLIAM M. GRIFFITH and Company, of Martin's Ferry, Ohio, assignees of William. H. Orr, of said Martin's Ferry, for an "Improvement in machines for cleaning grain."—Patented 13th July, 1858.—Re-issued 1st November, 1859.

"We claim the arrangement and application of the stirrer K, in the described relation to the riddle or shoe of a grain separating machine, operating in the manner and for the purpose set forth."

E. K. ROOT, of Hartford, Conn,, for an "Improvement in revolving fire arms."—Patented 25th December, 1855.—Re-issued 1st November, 1859.

"I claim combining the driving pin that works in the grooves to rotate and hold the breech in line with a slide below, adapted to the reception of and to be operated by the trigger finger, and acting on the lock at the end of the back motion, to liberate the cock or hammer, discharge the load, substantially as described. And I also claim, combining the plunger with the many-chambered rotating breech-pistol, or other fire-arm, by means of a lever with a cogged sector engaging the cogs of a straight rack, substantially as and for the purpose specified."

DESIGNS.

CHARLES T. FOOT, of Bristol, Conn., for a "Design for clock cases."

"I claim the design for a clock case, as herein above illustrated and set forth."

THOMAS HARDGROVE and SAMUEL HARDGROVE, of Richmond, Va., for a "Design for a trade mark."

"We claim the within design of picture to be affixed to our wares and manufactures, and to be designated as the peach brand."

ALLEN LEONARD, of Hartford, Conn., for a "Design for a base for castors."

"I claim the shape and configuration as described."

ALLEN LEONARD, of Hartford, Conn., for a "Design for castor handles."

"I claim the configuration of, or tasteful and artistical wrought figure for an ornamental design for a handle or lift, substantially as described, for a castor, &c."

WM. H. LEWIS, of Glastenbury, Conn., for a "Design for fork or spoon handles."

"I claim the configuration and ornamentation, the shield, the urn, or vase, the strawberry fruit, vine, and foliage combined as described to produce an ornamental design for a handle."

GARRETTSON SMITH and HENRY BROWN, of Philadelphia, Pa., assignors to Cox, Whitman, and Cox, of same place, for a "Design for stoves."

"We claim the design and configuration in bass-relief on the ornamental castings for a stove design, as above set forth, and represented by the annexed drawing."

LIST of SPECIFICATIONS published during the week ending 18th November, 1859.

No.	Price.	SUBJECT-MATTER.
900	3*d.*	Effervescing lemonade.
901	3*d.*	Furnaces.
902	3*d.*	Manufacture of soap.
903	3*d.*	Preparation for killing beetles.
904	3*d.*	Keels of vessels.
905	6*d.*	Spinning.
906	6*d.*	Candle moulds.
907	7*d.*	Loading ships or vessels with coal, &c.
909	3*d.*	Manufacture of cop tubes.
911	9*d.*	Gas lamps.
912	5*d.*	Taps.
913	3*d.*	Seed drills.

LIST of SPECIFICATIONS—*continued.*

No.	Price.	SUBJECT-MATTER.
914	3*d.*	Ventilator.
915	3*d.*	Manufacture of iron.
916	5*d.*	Weaving double pile fabrics.
917	3*d.*	Apparatus for screening corn and seed.
918	1*s.*	Metallic bridges.
919	10*d.*	Boots and shoes.
920	3*d.*	Working fly presses.
921	3*d.*	Preparation of red dyes.
922	3*d.*	Treating and dyeing silk.
923	8*d.*	Carriages for common roads.
925	3*d.*	Lamp regulator.
926	7*d.*	Agricultural implements.
927	3*d.*	Fulling machine.
928	3*d.*	Pinafores and bibs.
929	6*d.*	Instrument for damping, silvering, and affixing stamps.
930	7*d.*	Apparatus for heating liquids.
931	3*d.*	Axles for railway and other carriages.
932	6*d.*	Fire grates for locomotive, marine, and other furnaces.
933	1*s.* 4*d.*	Manufacture of tin and terne plates.
934	10*d.*	Mill for reducing bones, &c.
935	6*d.*	Apparatus for cooling liquids.
936	6*d.*	Application of nuts for the manufacture of pickers for looms, drawing rollers, steps and bushes.
937	3*d.*	Steam engines.
938	10*d.*	Guide rails, &c., for locomotive engines and carriages.
939	6*d.*	Manufacture of axle boxes.
940	3*d.*	Retarding and stopping railway locomotives and trains.
941	3*d.*	Weighing machines.
942	7*d.*	Electric telegraph cables, &c.
943	3*d.*	Coating metallic surfaces.
944	3*d.*	Billiard tables.
945	4*d.*	Manufacture of umbrellas, parasols, &c.
946	1*s.* 7*d.*	Extensible archin plane.
947	3*d.*	Buffers.
948	7*d.*	Manufacture of angle iron.
949	3*d.*	Working presses and other hydraulic machines.
950	3*d.*	Treating the pelts or skins of sheep, &c.
951	3*d.*	Insulating wire for electric telegraphs.
952	6*d.*	Fastening for trunks, boxes, articles of dress, &c.
953	3*d.*	Liquor, cruet, and other stands.
954	6*d.*	Variable circular motion for slotting, shaping, and planing machines.
955	3*d.*	Feeding apparatus for grain, sugar, &c.
956	1*s.*	Apparatus for separating metals from their ores, &c.
957	5*d.*	Manufacture of alumina.
958	10*d.*	Apparatus for regulating prime movers driven by water.
959	3*d.*	Obtaining metallic particles from the fumes or vapours of smelting works.
960	6*d.*	Looms for weaving.
961	10*d.*	Cop tubes for spinning machines.
963	3*d.*	Machinery for obtaining motive power.
964	3*d.*	Fog horns.
965	3*d.*	Rocket guns.
966	3*d.*	Compound liquid for illuminating.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d.*

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 19th November, 1859.

Mornings - - - -	755
Evenings - - - -	786
Total - - -	1541

Since the opening of the Museum Free Daily (May 12, 1858,)—162,849.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL,

By Authority.

(*Registered for transmission abroad.*)

No. 615. FRIDAY, NOVEMBER 25, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1861. To LOUIS ANTOINE POSSOZ, of No. 37, Rue de Rivoli, in the city Paris, in the empire of France, Chemist, for the invention of "Improvements in the manufacture and baking of sugars."

On his petition, recorded in the Office of the Commissioners on the 12th day of August, 1859.

2359. To ROBERT SMITH, of Islington, in the borough of Finsbury, Shipowner, for the invention of "The purification of water and other fluids."

On his petition, recorded in the Office of the Commissioners on the 15th day of October, 1859.

2435. To GERMAIN CANOUIL, of 93, Curtain Road, Shoreditch, in the county of Middlesex, Chemist, for the invention of "New machinery for priming percussion caps without danger of explosion, also a new fulminate not hitherto employed."

On his petition, recorded in the office of the Commissioners on the 25th day of October, 1859.

2494. To BENJAMIN BROWNE, of No. 52, King William Street, in the city of London, Civil Engineer, and Patent Agent, for the invention of "A self-heating ironing apparatus."—A communication from abroad by Charles Jean Eugene Baptiste Cailloüé, of Paris, Barrister.

2496. And to RICHARD HEINRICH HESS, of Newton Street, Hoxton, in the county of Middlesex, Engineer, for the invention of "Improvements in gas burners."

On both their petitions, recorded in the Office of the Commissioners on the 2nd day of November, 1859.

2498. To JAMES LEEMING, of Bradford, in the county of York, Machine Maker, and JOHN CARTER RAMSDEN, of the same place, Manufacturer, for the invention of "Improvements in looms for weaving."

2502. To WILLIAM WILSON, of Newcastle-upon-Tyne, Hat Manufacturer, for the invention of "Improvements in machinery for the manufacture of felted fabrics, suitable for the bodies of hats, caps, and bonnets."

2504. And to JOHN HOWARD, of Fenchurch Street, in the city of London, Merchant, for the invention of "Improved machinery for moulding hollow bricks and tubular articles."—A communication from abroad by M. Becherer and C. Kesseler, of Greisswald, in the kingdom of Prussia.

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of November, 1859.

2506. To ASPULL BINCKES, of Cornbury Place, Old Kent Road, in the county of Surrey, for the invention of "Improvements in optical instruments."

2508. To GEORGE NICHOLAS BULLER, of No. 28, Bartlett's Buildings, Holborn, Wholesale Jeweller, for the invention of "An improved mode or method of ornamenting articles composed wholly or partially of jet."

2510. To JOSEPH ALEXANDER MAXWELL, of No. 53, Chancery Lane, in the county of Middlesex, Gentleman, for the invention of "Improvements in hydraulic engines to act either alone or in combination with steam and steam engines."

2512. To FREDERICK HALE HOLMES, of Northfleet, in the county of Kent, Professor of Natural Philosophy, for the invention of "Improvements in apparatus for transmitting light."

2514. To ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improvements in type setting

and distributing apparatus."—A communication from abroad by Thomas Walker Gilmer, of Virginia, in the United States of America, administrator of John Baker Gilmer, deceased.

2516. To WILLIAM HILL, of Coombe Haye, near Bath, in the county of Somerset, for the invention of "Improvements in lightening conductors."

2518. And to JAMES CHESTERMAN, of Sheffield, in the county of York, Manufacturer, for the invention of "New and improved methods of and furnace for heating, hardening, and tempering clock springs, watch springs, band saws, steel for dresses, such as crinoline steel, and other like purposes."

On their several petitions, recorded in the Office of the Commissioners on the 4th day of November, 1859.

2520. To COLIN MACKENZIE, of Stornoway, in the county of Ross, North Britain, Barrel Manufacturer, for the invention of "Improvements in machinery or apparatus for cutting and dressing staves for casks, barrels, and other wooden vessels."

2522. To FRANCIS PICHLER, of No. 162, Great Portland Street, Oxford Street, and HENRY JOHN WIGLEY, of No. 5, Gloucester Place, Gloucester Gate, Regent's Park, both in the county of Middlesex, for the invention of "The arrangement and construction of wheeled carriages or other vehicles or machines, in such manner that the occupant or occupants thereof may propel the same by alternating the weight of the person or persons riding."

2524. To GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, for the invention of "Improvements in machinery for grinding and polishing sheets of plate and other glass."—A communication from abroad by J. J. Greenough, of Wall Street, New York.

2526. And to WILLIAM MANNIX, of Wolverhampton, M.D., for the invention of "Improvements in the manufacture of manure."

On their several petitions, recorded in the office of the Commissioners on the 5th day of November, 1859.

2528. To ANDREW LINMERE DOWIE, of Glasgow, in the county of Lanark, North Britain, Merchant, for the invention of "Improvements in effecting communications or signalling between distant or distinct parts of railway trains."

2530. To GEORGE PACEY, Coach Builder and Harness Manufacturer, of No. 2, Waterloo Street, and Upper Priory, Birmingham, for the invention of "A rein handle and holder applicable for riding or driving, either for single, double, or team reins."

2532. To HENRY BARKER, of Hastings, in the county of Sussex, Tobacco and Cigar Dealer, for the invention of "An improvement in clay, meerschaum, and other pipes."

2536. And to ARCHIBALD TEMPLETON, of No. 7, Skinner Street, in the city of London, and JOHN LAWSON, of Glasgow, for the invention of "Improvements in the manufacture of chenille or like fabrics suitable to be used in woven and other ornamental piled fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of November, 1859.

2540. To JOHN THOMSON, of Dundee, in the county of Forfar, Manufacturer, for the invention of "Improvements in the manufacture or production of Brussels and velvet pile carpet fabrics and hearth rugs."

2542. To JOHN HENRY JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in watches or timekeepers."—A communication from abroad by Merrick Price, of Philadelphia, in the United States of America.

2544. And to THOMAS SAMUEL BOTTOM, of Park Terrace, Old Ford, in the county of Middlesex, Chenille Manufacturer, for the invention of "Improvements in the manufacture of chenille."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of November, 1859.

2546. To JOB HAMER, of Longsight, in the parish of Manchester, and county of Lancaster, Mercantile Clerk, for the invention of "An improved material for insulating the wires of electric telegraphs, for lining articles of dress, for covering clothing, casing or lining steam boilers, pipes, cylinders, and other vessels, conduits, or chambers, and for other similar purposes, to which the said material is or may be applicable as a non-conductor, for preventing or diminishing the transmission of heat or of the electric fluid."

2548. To DAVID FULTON, of Glasgow, in the county of Lanark, North Britain, Engraver to Calico Printers, for the invention of "Improvements in cylinders or rollers for printing and other purposes."

2550. To GEORGE SPILL and DANIEL SPILL, both of Stepney Green, in the county of Middlesex, Manufacturers, for the invention of "An improvement in the manufacture of bands for driving machinery, and for various other purposes."

2552. And to WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in the construction and application of electric telegraph wires or conductors."—A communication from abroad by Mr. E. D. Rosencrantz, of New York, United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 9th day of November, 1859.

2554. To JOHN EDWARDS, of No. 77, Aldermanbury, in the city of London, and JOHN SKIRROW WRIGHT, of Birmingham, in the county of Warwick, for the invention of "Improvements in the manufacture of buttons."

2556. To JOHN TENWICK, of Clarendon Street, Albion Foundry, Portsmouth, Hampshire, for the invention of "Improvements in the construction of street gutters."

2560. And to WILLIAM FLETCHER, of Kilburn, in the county of Derby, Framework Knitter, for the invention of "Improvements in machinery for making looped fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 10th day of November, 1859.

2562. To FREDERICK DECASTRO JONES, of No. 29, Tavistock Street, Covent Garden, in the county of

Middlesex, for the invention of "A weaver's loom with combs opened at the summit, and with moveable floating chains."—A communication from abroad by Paul Gadrat, of 48 bis, Rue Basse du Rempart, Paris.

2563. To Thomas Blinkhorn, of Spalding, in the county of Lincoln, Engineer, for the invention of "Improvements in pumps."

2564. To Richard Archibald Brooman, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "The preparation of a salt and means of combining, mixing, or applying the same to render fabrics, pulp, wood, oil, and other substances uninflammable."—A communication from abroad by Messieurs Demangeot and Co., of Paris.

2565. To Richard Archibald Brooman, of No. 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "An improved method of preparing plates and cylinders for printing from."—A communication from abroad by Jules Michel Isidore Melotte and Charles Jules Thiesset, of Paris.

2566. And to Augustin Jacquelain, of Paris, in the French empire, Chemist, for the invention of "Improvements in the manufacture of carbon, and in apparatus employed therein."

On their several petitions, recorded in the Office of the Commissioners on the 11th day of November, 1859.

2567. To Richard Lansdale, of Pendleton, near Manchester, in the county of Lancaster, for the invention of "Improvements in machinery or apparatus for washing and cleansing fabrics, which improvements are also applicable to churning."

2568. To William Burgess, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Implement Makers, for the invention of "An improvement in mowing and reaping machines."

2569. To John Scott, of Sunderland, in the county of Durham, Anchor Smith, for the invention of "An improvement in anchors."

2570. To Archibald Vickers, of the city of Bristol, Cotton Spinner, for the invention of "A method of opening and shutting two or four gates or doors simultaneously, and for fastening the same when either open or shut, applicable to railway crossings and other purposes."

2571. To Charles Norrington, of Green Bank, Plymouth, Merchant, for the invention of "Improvements in the protection of ships or vessels, forts or batteries, from cannon shot, shell, or any other projectile."

2573. And to Elizabeth Ann Sellon Burgess-Burgess, of No. 107, Strand, in the county of Middlesex, for the invention of "Improvements in the preparation of anchovies."

On their several petitions, recorded in the Office of the Commissioners on the 12th day of November, 1859.

2575. To Peter Graham, of Oxford Street, in the county of Middlesex, for the invention of "Improvements in machinery or apparatus for cutting wood."

2576. To Augustus Applegath, of Dartford, in the county of Kent, Engineer, for the invention of "Improvements in surface block printing."

2577. To John Madin, of Fitzwilliam Street, Sheffield, in the county of York, Contractor, for the invention of "Improvements in furnaces and appliances connected therewith, for hardening and tempering crinoline or sheet steel, and measuring the same."

2578. To James Walworth and Robert Harrowby, of Bradford, in the county of York, Machine Makers, for the invention of "Improvements in smut machines or corn screens."

2579. To Joseph and Gustav Goldberg, both of Manchester, in the county of Lancaster, Manufacturers, for the invention of "Certain improvements in the construction of purses or 'portmonnaies,' and in an improved lock or fastening applicable to purses, bags, or other similar receptacles."

2580. To Alexander Robert Arrott, of Saint Helens, in the county of Lancaster, Chemist, for the invention of "Improvements in the manufacture of carbonate of soda."

2581. To Charles Henry Brooks, of Great George Street, in the city of Westminster, Engineer, for the invention of "Improvements in apparatuses for paying out and hauling in telegraph cables."

2582. And to James Holgate, of No. 33, Great Dover Street, in the county of Surrey, Army Contractor, and John Henderson, of Ramsgate, in the county of Kent, Engineer, for the invention of "Improvements in locomotive engines, partly applicable to other steam engines."

On their several petitions, recorded in the Office of the Commissioners on the 14th day of November, 1859.

2585. To William Henry Ward, of the city of Auburn, in the county of Cayuga and state of New York, one of the United States of North America, for the invention of "An improved turn-table for railways and other purposes."

2586. To Edward Borlase, of Allenheads, Haydon Bridge, in the county of Northumberland, Mining Engineer, for the invention of "Improved apparatus for separating metals and metallic ores, when mingled with other substances in the state of slime."

2587. To James Donald, Engineer, and Peter Smith, Foreman Engineer, both of Johnstone, in the county of Renfrew, North Britain, for the invention of "Improvements in apparatus for raising and for extracting liquids."

2588. To Charles Chalmers, of Merchiston Castle, Bank Morningside, Edinburgh, in the county of Mid-Lothian, North Britain, Gentleman, for the invention of "Improvements in gas stoves, for heating buildings, apartments, and other similar places."

2589. To William Elliott, of Norwich, in the county of Norfolk, Engineer, for the invention of "An improved method of raising water and other liquids."

2390. To Charles Pewtress Alvey, of Commerce Place, Brixton Road, in the county of Surrey, for the invention of "Improved machinery or apparatus for the manufacture of envelopes."

2591. To William Henry Ward, of the city of Auburn, in the county of Cayuga and state of New

York, one of the United States of North America, for the invention of "Improvements in tanning hides and skins."

2592. To WILLIAM WILKINS, of Banbury, in the county Oxford, Builder, for the invention of "A ridge trestle," or apparatus which may be employed on the ridges of buildings to support persons and planking."

2593. To ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improvement in the manufacture of hose or flexible pipe."—A communication from abroad by Nehemiah Hunt, of Boston, in the United States of America.

2594. To THOMAS DIX PERKIN, of King David Fort, St. Georges in the East, in the county of Middlesex, for the invention of "Improvements in the manufacture of coloring matters."—A communication from abroad by Rudolph Knosp, of Stutgart.

2595. And to JAMES GRAHAM, of Warrington Junction, Lancashire, for the invention of "Improvements in treating and applying products obtained when galvanizing iron."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of November, 1859.

Invention protected for Six Months by the Deposit of a Complete Specification.

NOTICE is hereby given that the petition of

2614. JOSEPH WILLCOCK, of 89, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, praying for Letters Patent for the invention of "Improvements in the construction and arrangement of the boiler and working parts of steam fire engines, parts of which are applicable to engines for other purposes,"—a communication from abroad by Joseph G. E. Larned, of Brooklyn, state of New York, United States of America,—was deposited and recorded in the Office of the Commissioners on the 19th day of November, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

25th November, 1859.

924. WILLIAM ARENA MARTIN and JAMES PURDIE, of Woolwich, in the county of Kent, Engineers, for an invention of "Improvements in fire bars."—Dated 13th April, 1859.

1287. JAMES HARMER, of St. James Street, Lower Road, Islington, in the county of Middlesex, for an invention of "Improvements in parts of dry gas meters."—Partly a communication from abroad by William Sinderby, of Boston, Massachusetts, in the United States of America. — Dated 25th May, 1859.

1289. RICHARD ATWOOD GLASS, of 115, Leadenhall Street, in the city of London, Submarine Telegraph Cable and Wire Rope Manufacturer, for an invention of "Improvements in submarine electric telegraph cables." — Dated 25th May, 1859.

1291. ALEXANDER PRINCE, of the Office for Patents, 4, Trafalgar Square, Charing Cross, in the county of Middlesex, for an invention of "Improvements in the construction of ships and vessels."—A communication from abroad by Hermann Hirsch, resident at Berlin, in the kingdom of Prussia.—Dated 25th May, 1859.

1311. WILLIAM WEILD, of the city of Manchester, in the county of Lancaster, Machinist, for an invention of "Improvements in looms for weaving pile fabrics."—Dated 27th May, 1859.

1315. PATRICK AITCHISON, Brass Founder, and THOMAS BINKS, Plumber, both of Sheffield, in the county of York, for an invention of "Improvements in self-acting and other water-closets, and in flushing apparatus connected therewith."—Dated 27th May, 1859.

1315. HILARY NICHOLAS NISSEN, of Mark Lane, in the city of London, Stationer and Printer, for an invention of "An improvement in book indexes."—Dated 27th May, 1859.

1321. RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in machinery for cleaning, grinding, and bolting corn and other grain."—A communication from abroad by Jean Baptiste Falguière, of Marseilles.—Dated 28th May, 1859.

1324. MARCUS DAVIS, of 5, Lyon's Inn, Strand, in the city of Westminster, Caoutchouc Wheel Manufacturer, for an invention of "Improvements in the construction of wheels, axles, and boxes for carriages."—Dated 30th May, 1859.

1329. WILLIAM GOSSAGE, of Widnes, in the county of Lancaster, Chemist, for an invention of "Improvements in the manufacture of iron and steel."—Dated 30th May, 1859.

1366. HERBERT NEWTON PENRICE, of Witton House, near Norwich, for an invention of "Improvements in machinery for propelling vessels."—Dated 3rd June, 1859.

1421. GEORGE CLAUDIUS ASH, of West View, Hampstead, in the county of Middlesex, for an invention of "Improvements in the manufacture of artificial teeth."—Dated 11th June, 1859.

1425. ARTHUR SMITH, of 4, Stafford Terrace, Loughborough Road, Brixton, in the county of Surrey, for an invention of "Improvements in bleaching and purifying bees' wax."—Dated 13th June, 1859.

1430. GEORGE SMITH, of Manor Road, Saint Mary's, Newington, in the county of Surrey, for an invention of "Improvements in hat bands."—Dated 14th June, 1859.

1494. LEMUEL DOW OWEN, of No. 192, Tottenham Court Road, in the county of Middlesex, Engineer, for an invention of "Improvements in machinery for manufacturing bolts and nails."—A communication by Foreigners residing abroad, videlicet, by Messieurs Buck and Company, Engineers, of Lebanon, New Hampshire, in the United States of America.—Dated 21st June 1859.

1555. Richard Kay, Cotton Spinner, John Manock, Manager, John Whittaker, Mechanic, and Thomas Booth, Operative Cotton Spinner, all of Heywood, in the county of Lancaster, for an invention of "Improvements in machinery for slubbing, roving, spinning, and doubling cotton and other fibrous materials."—Dated 30th June, 1859.

2059. John Gay Newton Alleyne, of Butterley Iron Works, Alfreton, in the county of Derby, for an invention of "Improvements in the manufacture of wrought iron beams."—Dated 9th September, 1859.

2073. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "Improvements in the construction of hydraulic pumps."—A communication from Louis Laurent Bequemie, residing in Paris.—Dated 12th September, 1859.

2157. John Dales, of 11 and 12, Gresham House, Old Broad Street, in the city of London, for an invention of "Improvements in purifying sewage and other impure waters, and in separating therefrom materials suitable for use as manure, and also the preparation of a substance to be employed for such purposes."—Dated 22nd September, 1859.

2201. David Stewart, of Newcastle-on-Tyne, in the county of Northumberland, and of Bombay, in the East Indies, Engineer, for an invention of "Improvements in presses used for pressing goods."—Dated 28th September, 1859.

2221. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in the construction of apparatus for reworking the waste steam of steam engines."—A communication from abroad by Messieurs Dalifol and Company, of Paris, Manufacturers.—Dated 30th September, 1859.

Patent on which the Stamp Duty of £50 has been Paid.

(*To 23rd November*, 1859, *inclusive.*)

21st November.

2767. Thomas Roberts and John Dale, both of Manchester, in the county of Lancaster, Manufacturing Chemists, and John Daniell Pritchard, of Warrington, in the said county, Chemist, for an invention of "Improvements in obtaining and purifying oxalate of soda, which improvements are also applicable to the manufacture of oxalic acid."—Dated 21st November, 1856.

2798. Alfred Vincent Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved machinery for forging iron."—A communication.—Dated 25th November, 1856.

22nd November.

2782. James Broadley, of Saltaire, in the county of York, Overlooker to Messrs. Titus Salt, Sons, and Co., of Saltaire, for an invention of "Improvements in weaving."—Dated 24th November, 1856.

2788. Charles Edwin Heinke, of Great Portland Street, in the county of Middlesex, Submarine Engineer, for an invention of "Improved apparatus for illuminating objects beneath the surface of water or for giving light in mines and other places where combustible or explosive gases exist."—Dated 24th November, 1856.

2789. John Orr, of Glasgow, in the county of Lanark, North Britain, Weaving Foreman, for an invention of "Improvements in the manufacture of pile fabrics."—Dated 24th November, 1856.

2816. Camille Auguste Tissot, of 39, Rue de l'Echiquier, Paris, in the empire of France, and of 4, South Street, Finsbury, London, Middlesex, for an invention of "Improvements in the production of motive power, and in the apparatus connected therewith."—Dated 28th November, 1856.

23rd November.

2840. George Collier, of Halifax, in the county of York, and James William Crossley, of Brighouse, in the same county, for an invention of "Improvements in apparatus used in hot pressing, and in the means of manufacturing parts of apparatus used for such purpose."—Dated 1st December, 1856.

2867. Adam Bullough, of Blackburn, in the county of Lancaster, Manufacturer, and William Bullough, of the same place, Machinist, for an invention of "Improvements in looms."—Dated 3rd December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 22nd November*, 1859.)

1015. Henry Clayton, of the Atlas Works, Upper Park Place, Dorset Square, in the county of Middlesex, for an invention of "Improvements in the manufacture of bricks."—Dated 13th December, 1852.

Notice of Application for Leave to enter a Disclaimer and Memorandum of Alteration.

In the matter of a Patent granted to John Carter Ramsden, of Bradford, in the county of York, Stuff Manufacturer, for the invention of "Improvements in apparatus or the mechanism of looms for weaving a certain class of plaids, checks, and fancy woven fabrics, bearing date the 28th November, 1853. (No. 2771.)

Notice is hereby given that the said John Carter Ramsden has applied by petition to Her Majesty's Commissioners of Patents for leave to enter a Disclaimer and Memorandum of Alteration of certain parts of the specification of the said Letters Patent.—Dated this 17th day of November, 1859.

William Carpmael,
Agent for the Petitioner,
No. 24, Southampton Buildings,
Chancery Lane.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 8th November, 1859, and each bearing that date.

No. 26,005. CORINTHA ALDEN, of Cassadaga, N.Y., for an "Improved clothes ironing apparatus."

"I claim the arrangement of the box A with the follower B, or its equivalent, in combination with the tank D, substantially as and for the purpose specified."

No. 26,006. EPHRAIM C. ALLEN, of Le Roy, N.Y., for an "Improvement in corn planters."

"I claim the arrangement of the various parts of the seeding machine herein described, when the whole are constructed and combined for operation conjointly, as and for the purposes in this specification herein set forth."

No. 26,007. JOHN ASPINALL, of London, England, for an "Improvement in refining sugar."—Patented in England, 8th February, 1859.

"I claim the method herein described, of effecting the 'blowing up' or melting of raw sugars, that is to say, by so supporting or upholding the sugar, that successive portions will be brought into contact with the water, whereby the sugar will be melted at or near the surface, for the purposes and substantially in the manner set forth."

No. 26,008. MERRICK BEMIS, of Ashburnham, Mass., for an "Improved conpensating pendulum."

"But what I do claim, is, my improved mode of making a compensating pendulum, viz.: by arranging a part of the rod in the form of a bow or sectoral bend, and applying to such bend, or part, a clasp or bow of metal having a different 'expansive ratio,' the whole being substantially as specified."

No. 26,009. ROBT. BLAIR, of Malugin Grove, Ill., for an "Improved device for applying steam as a motor."

"I claim the combination with a radial lever or frame D, and circular railway A, and central revolving power transmitting shaft C, of a traction steam engine B, when the crank axes of said engine radiate from the central shaft C, and the inner traction wheels are made of smaller diameter than the outer one, the whole arranged and operated substantially in the manner and for the purpose set forth."

No. 26,010. NELSON BURR, of Batavia, Ill., for an "Improvement in corn shellers."

"I claim the peculiar arrangement of the section *e*, provided with the ring *j*, and placed relatively with the cylinder A, and adjoining sections *d*, *f*, to effect the object herein set forth, substantially as described."

No. 26,011. THOS. CARPENTER, of Battle Creek, Mich., for an "Improved shoe making table."

"I claim the movable bottom D, arranged in combination with the 'bench' A, and compartment box B, constructed as described, substantially in the manner and for the purpose herein specified."

No. 26,012. R. CARKHUFF and B. CHALPANT, of Lewisburgh, Pa., for an "Improvement in steam valves."

"We claim the peculiar arrangement of the slide T and transverse bar *t*, which form the valve of the steam chest K, the bar U, and the cross arm *r*, of rod S, whereby said valve is allowed a lateral as well as a longitudinal movement within the chest for the purpose set forth."

No. 26,013. LUCIUS C. CHASE, of Boston, Mass., for an "Improvement in girth buckles."

"I claim constructing a buckle with wings B, B, or their equivalents, and furnished with holes *b*, *b*, substantially as set forth and for the objects specified."

No. 26,014. B. S. CHURCH, of Manhattanville, N.Y., for an "Improvement in water meters."

"I claim, first, the arrangement of the partitions *g*, g^1, in the trough G as described, in combination with the air-tight chamber D, chamber F, and tubes I, whereby that portion of the water does not pass through the measuring buckets is prevented carrying off any of the air in chamber D. 2nd, arranging in the air chamber D, or float *j*, in combination with a valve *h*, or its equivalent, substantially as and for the purpose described."

No. 26,015. GEORGE CLAY, of New York, N.Y., for an "Improvement in packing for sliding gas lights."

"I claim the combination with the pipe D, shell A, and pipe B of the elastic tube C, when the latter is fitted so that its central portion will contract and press upon the burner, or upon the sliding pipe, so as to form a gas-tight joint, all as herein shown and described."

No. 26,016. J. W. COCHRAN, of New York, N.Y., for an "Improvement in projectiles for rifled ordnance."

"I claim, 1st, the band C, of copper or other wire, applied substantially as described, in combination with the cup or cup-like frame B, attached to the rear of the projectile, for the purpose herein described. 2nd, the expanding ring D, applied substantially as described, in combination with a conical surface *f*, formed behind a shoulder on the front part of the projectile, for the purpose herein set forth."

No. 26,017. J. W. COCHRAN, of New York, N. Y., for an "Improvement in projectiles for rifled ordnance."

"I claim the application to a projectile for rifled ordnance of a covering or of one or more bands, composed of a coil or coils of copper or other wire, wound upon its exterior substantially as herein described for the purpose specified."

No. 26,018. D. W. COMSTOCK, of Chicago, Ill., for an "Improvement in railroad gate."

"I claim placing the ends of two pairs of adjoining rails B^1 on a rising and falling platform C, when the latter is suspended from the short arms *d* of crank levers *d*, *e*, the long arm *e* of which carry the panels F of a gate, substantially in the manner and for the purpose described."

No. 26,019. WM. F. CONVERSE, of Harrison, Ohio., for an "Improvement in railroad car springs."

"I claim, 1st, the combination of a clamp *f*, *g*, *h*, with a disk spring, in the manner and for the purpose explained. 2nd, in connection with the above I claim the series of annular steel disks, of unequal diameter, arranged in manner and for the purpose described."

No. 26,020. N. B. COOPER, of Gratis, Ohio, for an "Improved churn dasher."

"I claim the arrangement of the arms *d*, *d*, on the two pivots *b*, b^1, one on each side of the upright B, when the upright B is made removable by means of the ways *x*, *x*, substantially as set forth."

No. 26,021. EDWARD CRANE, of Dorchester, Mass., for an "Improved steam boiler."

"I claim a fire box, surrounded by a water jacket, the combination of the tubes in the fire box with the boxes or chambers, as herein described, so that a number of tubes shall have the same connections through the said boxes or chambers with the water jacket and steam chamber, and shall also be capable of being put in and taken out of the boiler at the same time. I claim the use of tubes coiled

or folded into the fire box, and connected with the water jacket and steam chamber through the boxes or chambers a and b, and a^{11} and b^{11}, as herein described, of such length in proportion to their diameter that all the water entering them at the lower end shall be converted into steam in the lower portion, and the steam be superheated in the upper portion before it is discharged into the steam chamber. I claim the use of tubes in the steam chamber, for discharging the steam generated in the tubes in the fire box, so bent that the superheated steam issuing therefrom shall be discharged into a drum around the chimney, and against the chimney in the first instance, and then against the surface of the water, as herein described. I also claim the use of the drum around the chimney in the steam chamber for securing the discharge from the tubes, and checking the disturbance of the water through the whole extent of the steam chamber, arranged and constructed as herein described. I claim the combination of the blow-off cocks e, with the stopcocks g, for the purpose of blowing off each section of tubes separately, as herein described. I claim the use of the tube coiled around the chimney for the purpose of taking the steam from the steam chamber at the point where it has the highest temperature."

No. 26,022. Edward Crane, of Dorchester, Mass., for an "Improvement in railroad car wheels."

"I claim a wheel having its rim and tire secured together by india rubber vulcanized in place, as set forth."

No. 26,023. Munson C. Cronk, of Auburn, N.Y., for an "Improved clothes dryer."

"I claim the combination and arrangement of the hollow post A, the sliding piece R, brace cords M, N, O, P, Q, the hub B, the stands W, X, Y, Z, and the radial arms C, D, E, F, G, the ring V, substantially in the manner and for the purpose specified."

No. 26,024. Charles A. Desobry, of Plaquemine, La., for an "Improvement in pans for evaporating cane juice."

"I claim the heaters B, B, of inverted cup form, applied within the pan, in combination with the system of connections E, E, F, F, and the two series of pipes S, S, and W, W, below the pan, substantially as herein described. And, in combination with the said heaters, connections, and two systems of pipes, I claim the pipes b, b, passing through the said heaters, substantially as herein described."

No. 26,025. Jacob Edson, of Boston, Mass., for an "Improvement in pumps."

I claim the peculiar manner in which I support the cylinder upon the flanges L, in combination with the vacuum chamber H, for the purpose of ensuring an unobstructed passage between the said chamber and the induction pipe below the valves, in the manner and for the purpose, substantially as herein set forth. 2d, I claim the manner herein described, of securing the induction pipe to the pump, by means of the projecting bearing points m, operating in the manner substantially as herein set forth. 3d, I claim the within described combination and arrangement of the division plate K, and the cylinder I, whereby the body of the pump is divided into two distinct chambers, the one serving as an air or water chamber, and the other as a vacuum chamber, as set forth."

No. 26,026. Thaddeus Fairbanks, of St. Johnsbury, Vt. for an "Improvement in letter scales."

"I claim my improved manufacture of letter scale as made, not only with its pendulous weight k, connected with the scale pan F, by a forked arm H, H, I^1, provided with bearings h, i, for receiving and resting on knife edges of a bar I, extended from the steelyard, as specified, but with a bar steelyard E, made without any fork, and extended into a stationary staple or stop g, the whole being arranged in manner, and to operate as specified."

No. 26,027. John M. Forrest, of Norfolk, Va., for an "Improved sash fastener."

"I claim the springs C and C^1, and the ratchets G and G^1, as constructed, in combination with the levers D, and cord F, operating as described, and for the purposes set forth."

No. 26,028. Leonard D. Gale, of Washington, D.C., for an "Improvement in manufacture of gas."

"I claim the treatment of bitumen, bituminous coal, and their distillates, or their equivalent, by first converting the volatile portions to a state of vapor, at a temperature below a cherry-red heat, and then forcing the vapour so generated into contact with a red hot surface, in such a manner that the gas generated may be instantaneously removed from the said heated surface, and thus be prevented from further decomposition."

No. 26,029. Thaddeus A. Granger, of Wilson county, N.C., for an "Improvement in machines for hoisting marl, &c."

"I claim the construction of the cap timber (C), in combination with the supporting timber (D), which forms the swivel to allow the beam (D) to be moved to any point desired."

No. 26,030. Leonard D. Gale, of Washington, D.C., for an "Improvement in manufacture of gas."

"I claim the treatment of all woody, resinous, and fatty bodies, as well as all tarry matter, except bitumen, bituminous coal and other distillates, by first converting the volatile portions to vapor, at a temperature below a cherry-red heat, and afterward forcing the vapor so generated into contact with a red hot surface, in such manner that the gas generated thereby may be instantly removed from said heated surface, and thus be prevented from further decomposition."

No. 26,031. Noah E. Hale, of Nashua, N.H., for an "Improvement in applying pressure to top rolls of drawing machinery."

"I claim the arrangement and combination of the drawing rolls C^1, D^1, straps H, attached at the ends of said rolls, adjustable bars G, lever J, weight K, rod N, bell crank lever L, and hanger O, as and for the purpose herein shown and described."

No. 26,032. E. H. Harris, of Palmetto, Geo., for an "Improvement in carriage seats."

"I claim attaching the seat B, to the body A, of the vehicle, by means of the bars a, and rods c, or their equivalents, so as to permit of a certain degree of play of the seats, or movement thereof, independent of the body A, for the purpose specified."

No. 26,033. I. P. Harris, of Byhalia, Miss., for an "Improvement in ploughs."

"I claim the combination of the separately adjustable and removable mould board E, with a sub-soil share C, situated behind and below it, the said sub-soil share being also separately removable, to allow the separate use of said mould board, substantially as specified."

No. 26,034. Horatio F. Hicks, of Grand View, Ind., for an "Improvement in machines for pulling and cutting cotton and corn stalks."

"I claim the combination of the reel D, paddle H, drum G, and cutter I, operating substantially as and for the purpose set forth."

No. 26,035. Wm. Cleveland Hicks, of Boston, Mass., for an "Improvement in sewing machines."

"I claim as my method of controlling needle thread in 'sewing machines,' by a combination of mechanism, substantially as herein described, by which a bar or wire, through which the thread passes, and by which the thread is tightened and loosened, shall have the herein-described motion, combined, firstly, to be drawn up by the needle bar, or its equivalent, during its entire upward motion. Secondly, held at rest until the needle eye is at or near the material to be sewed; and thirdly, to be disengaged and allowed, or caused to fall by its own gravity, or by the assistance of a spring, for the purpose of gaining the amount of motion lost by remaining at rest, during the first part of the downward motion of the needle bar, all substantially as herein described and specified."

No. 26,036. N. E. Hinds, of Cooperstown, N.Y., for an "Improved horse shoe."

"1st, I claim the wider and thicker enlargement of the toe or fore part of the shoe. 2d, I claim the trough like concave form of the underside of the shoe, and the raised edges B, B, and C, that ensue as a consequence of the construction of said concave form. 3d, I claim the construction of calks made in a V or double V form, all of which is constructed and claimed, substantially as and for the purposes set forth and specified."

No. 26,037. A. D. Hoffman, of Belleville, Mich., for an "Improvement in cider mills."

"I claim the combination of the crushing rollers B, B¹, pressure rollers E, F, and endless apron G, when the crushing rollers B, B¹, are provided respectively with teeth *a*, and recesses *b*, and the pressure roller E, provided with the yielding bars *e*, and canvas covering *g*, substantially as and for the purpose set forth."

No. 26,038. S. F. Lewis, of San Francisco, Cal., for an "Improvement in pulley blocks."

"I claim, 1st, the arrangement and combination of the pulley C, shoe D, and eccentric E, within the block A, as and for the purpose specified. 2nd, the teeth or projections *b*, and stop *c*, formed respectively on the pulley C, and shoe D, to operate as and for the purpose set forth."

No. 26,039. James P. McLean, of New York, N.Y., for an "Improvement in abdominal corsets."

"I claim a corset or belt, with cork brackets or projections (B, B, B¹,) on its zone, the upper or top edge of such brackets being beveled, as shown in the drawings, in combination with the abdominal pads (A^1, A^1, A^2, A^2,) which form a part of the lower section of the corset or bandage, and are held in their places by the same, in the manner and for the purpose set forth and shown in the drawings."

No. 26,040. James McNamee, of Easton, Pa., for an "Improved knife cleaner."

"I claim the upper socket D, with its pad I, operated by the socket F, with its pad and the reservoir B, when the pad of the lower socket is rendered adjustable in respect to the reservoir, and when the several parts are arranged in respect to each other, as and for the purpose herein set forth."

No. 26,041. Allen N. Merrill, of Batavia, Ill., for an "Improvement in seeding machines."

"I claim, 1st, the employment or use of a longitudinal adjustable shaft H, provided with cylinders J, having different sized seed cells in connection with perforated bars *g*, slides *i*, and plate *k*, arranged to operate substantially as and for the purpose set forth. 2nd, the arrangement and combination of the spout *l*, conductors K, shoe spouts L, and elevating arms E, on shaft D, connected to the conductors K, the whole being arranged substantially as and for the purpose set forth."

No. 26,042. John H. Miller and Samuel Albright, of Grafton, Va., for an "Improvement in portable gas apparatus."

"We claim a portable gasometer C furnished with a central gas discharge pipe E, a central guide rod S, a flexible connecting pipe F, and one or more ratchet bars H, H, and arranged in a frame A, A, B, B, which is provided with one or more spring pawls I, I, for use in a railroad car or other traveling apparatus, which is subject to a jolting or vibrating motion for the purpose of supplying gas to a series of gas burners, substantially as and for the purposes set forth."

No. 26,043. Charles Minzesheimer, of New York, N. Y., for an "Improvement in shirts."

"I claim the expanding joint D, D, and strings E, E¹, or their equivalents, at the back of the shirt, in combination with the openings *m*, *m*, in the other, substantially as and for the purposes herein specified."

No. 26,044. Oliver P. Moran, of Haynesville, Md., for an "Improvement in corn planters."

"I claim the combination of the curved concentric aperture *o*, in the bottom of the seed box G, with the sliding strike N, and measuring holes *m*, *m*, for the purpose of charging said holes from the seed box with the least possible weight upon and impediment to the motion of the dropping wheel, as herein specified. I also claim the combination of the concentric vibratory arm *h*, and projecting pin *l* thereon, with the measuring holes *m*, *m*, substantially as specified, for the purpose of imparting the proper movement to the dropping wheel D. I also claim the arrangement of the instant valve 'M' upon the curved weighted hinge *t*, which is pivoted to the sides of the chamber G in a position nearly vertically over the valve, in combination with the slotted connecting rod S, for the purpose of producing a superior quickness and delicacy of action on the valve, substantially as herein specified."

No. 26,045. Austin W. Moses and Joseph Springer, of Philadelphia, Pa., for an "Improvement in casting car wheels."

"We claim the described method of casting railroad car wheels by pouring the central portion of the wheel independently and in advance of the tread, to allow said central portion to cool and contract to any desired degree before adding the metal forming the tread of the wheel, when said end is accomplished by the employment of a ring, composed of any convenient number of segments F, F, or their equivalents, and arranged to operate in combination with the annular part D of the flask, substantially in the manner and for the purpose specified."

No. 24,046. Jacob H. Mumma, of Harrisburgh, Pa., for an "Improvement in straw cutters."

"I claim the employment of a hawk-bill cutter (*a*, *a*), constructed and arranged as described, in connection with a cutter bar (*c*) of a straw cutter, operating in the manner as and for the purposes set forth. 2nd, I claim the slat bed (*h*) for the purpose of not only cleaning the material from dirt, but also as a feed to the rollers, substantially in the manner and for the purposes set forth. 3rd, I claim the employment of the rib *d* feed rollers for crushing and dividing the sheet of material to be cut, when arranged and combined with a hawk-bill cutter *a*, *a*, and bar C, substantially in the manner set forth."

No. 26,047. Adrian V. B. Orr, of Lancaster, Pa., for an "Improvement in sawing machines."

"I claim the oscillating lever D, B, in combination with the spring T, and feed lever *l*, *l*, when constructed as described, and operating either a single saw or a pair of saws, as specified."

No. 26,048. George R. Osbrey, of Providence, R. I., for an "Improvement in heating apparatus."

"I claim the combination of an alcohol reservoir and vaporizer, with a lamp for heating the same when such vessels are connected by a liquid pipe E, and a vapor pipe F, said pipes acting in such connection to maintain a constant level within the vaporizer, in the manner and for the purpose substantially as herein set forth. I also claim combining with such device for vaporizing a conical disseminator I, and a convex deflector K, arranged substantially as specified, and for the purpose herein set forth."

No. 26,049. George W. Parrott and Charles K. Bradford, of Lynn, Mass., for an "Improved machine for cutting boot and shoe soles."

"We claim the combination and arrangement of an automatic feed, sole by sole, with the cutting knives, substantially as described."

No. 26,050. Hiram G. C. Paulsen, of Flatland, N. Y., for an "Improvement in clarifying and refining sugar juices, &c."

"I claim the application of alcohol, in combination with water, in all the proportions as stated, and at the temperature of boiling of said combined liquids, to the melting or dissolving, boiling or treating raw sugars or juices of saccharine substances, as herein described, for the purpose and to the effect of producing the intended making and refining of said sugars."

No. 26,051. Wm. Pettet, of New York, N. Y., for an "Improved cooking range."

"I claim the combination with a central fire grate having openings in its side, and with the side roasting chambers, or spits, of dampers, which can be adjusted so that the roasting may either be effected in the side chambers by direct action of the burning coals, or by the heat radiated from the sides of the fire chambers, substantially as and for the purposes set forth."

No. 26,052. Edward R. Pye, of New York, N. Y., for an "Improved sweat knife for cutting hat and cap linings."

"I claim the employment or use of the knife D on the projection C of the bar B, and secured thereto by the set screw *c*, in connection with the pointed wheel E, attached to the projection C, the whole being arranged substantially as and for the purpose set forth."

No. 26,053. JOHN ROBINSON, of Eli, of Sharptown, Md., for an "Improvement in portable turn table."

"I claim the adjustable sliding turn table D, E, G, the whole constructed and operating substantially as specified for the purpose set forth."

No. 26,054. JOSIAH M. READ, of Boston, Mass., for an "Improvement in stoves, ranges, &c."

"I claim the application and construction of the flue G, with its door *h*, substantially in the manner as and for the purposes as described."

No. 26,055. PETER REYNARD, of New York, N. Y., and VICTOR VARIN, of Brooklyn, N. Y., for an "Improved insect powder blower."

"We claim, first, the ball *c* attached directly to the chamber or neck *b*, and acting to blow the powder out of the neck or chamber, as set forth, and either with or without the valves 1 and 2, for the purposes and as specified. Second, we claim the holder, composed of the rod *e* and ring *f*, when provided with the rod *g*, or its equivalent, and the button *h* to act on the elastic ball *c*, for the purposes and as described and shown."

No. 26,056. C. BIRD PATE, of Moore's Mill, Ind., for an "Improvement in stump extractor."

"I claim the arrangement of levers E, F, and L, and spar H, the whole being for operation conjointly as and for the purpose above set forth."

No. 26,057. ISRAEL M. ROSE, of New York, N. Y., for an "Improvement in sewing machines."

"I claim the combination of two needles and a shuttle, or their equivalents, to operate, substantially as herein set forth, for the purpose of producing a stitch of the structure herein described and represented."

No. 26,058. CHRISTIAN CHARLES SCHIEFERDECKER, of Baltimore, Md., for an "Improvement in stoves."

"I claim the combination of the central air space (*f*), containing material refractory to heat, with the series of surrounding ascending and descending smoke flues (*n*, *o*, *p*), when arranged substantially as herein set forth, for the purposes described."

No. 26,059. CHARLES SCOFIELD, of Adams, N. Y., for an "Improvement in sewing machines."

"I claim, 1st, the auxiliary feeding plate Q, with pins or teeth on its surface, in combination with the perforated slotted main feeding plate N, when said plate Q combines in itself the properties of a spring and of a feed bar, and is otherwise constructed and arranged so as to operate in the manner herein described. 2nd, the arrangement of the pivoted lever S, adjustable collar *q*, pressure pad F, F^1, and needle lever D, in the relation shown to one another and for united operation, in the manner and for the purpose set forth. 3rd, the lever S, when made elastic laterally pivoted at *n*, provided with a pin *p*, and coupled to the pressure pad F, F^1, by an adjustable collar *q*, in combination with the needle lever D and the recess S in the standard C, substantially as and for the purpose set forth. 4th, the looper W, *x*, U, T, when the part U, T, is made rigid and attached to the horizontal rock shaft V, and the part W, *x*, is made yielding or with a spring, and form or arranged on one side of part U, T, and in the relation shown to a projection on the peripherical surface *x* of the actuating cam, in the manner and for the purpose herein described. 5th, the combination of the adjustable intermediate plate 13 with the jaws T, *x*, of the looper, substantially as described, for the purpose of adapting the same looper without removing it from the machine which is used for sewing either in the double looped or other stitch made with two threads for sewing in the chain-stitch, as set forth."

No. 26,060. JAMES STIMPSON, of Baldwinsville, Mass., for an "Improved machine for making box-joints."

"1st, I claim the combination of the hollow bit *r*, the cutters *w* and d^2, or their equivalents, operating as set forth, to form the tenons *a*. 2nd, in combination with the above, I claim the auger bit i^2, operating as described, to form the holes *c* to correspond with the tenons *a*, as set forth."

No. 26,061. CHESTER W. SYKES, of New York, N. Y., for an "Improved carving knife."

"I claim the combination of a knife and shears, substantially as described, as an instrument specially adapted for carving meats."

No. 26,062. HARVEY TRUMBULL, of Central College, Ohio, for an "Improvement in straw cutters."

"I claim the combination of a self-adjusting spring pressure clasp L to or with an automatic rake, for the purpose of feeding the material to the knife, substantially as specified."

No. 26,063. NATHANIEL WATERBURY, of Fond du Lac, Wis., for an "Improvement in gates."

"I claim the arrangement and combination of the pendulous rod J and weight K with the axis of the pulley H, as and for the purpose herein shown and described."

No. 26,064. JAMES WHITEHILL, of Frederick, Md., for an "Improvement in hot air furnaces."

"I claim, 1st, a furnace, constructed with two separate fire chambers and grates, with an air passage between the chambers closed at their sides but open at the bottom and top, substantially as and for the purposes set forth. 2nd, the combination of the peculiar labrynthian air passage described and the peculiar furnace described, in the manner and for the purpose set forth. 3rd, the combination with the peculiar furnace and peculiar labrynthian air passage, herein described, of the curved cold air pipe M, substantially in the manner and for the purpose set forth."

No. 26,065. FERDINAND WUTERICH and JACOB KOERBER, of New York, N. Y., for an "Improvement in cotton gins."

"We claim the arrangement of the finger shafts C and D, operating and constructed in the manner described, and acting together, so that while the fingers of the shaft C during its revolution pull the cotton out of the hopper, the fingers of the shaft D take the cotton from the former and deposit the same upon the guiding rollers, substantially as specified."

No. 26,066. WM. C. ALLISON, of Philadelphia, Pa., assignor to himself and John Murphy, of same place, for an "Improvement in the mode of confining the seat of the driver on city railroad cars."

"I claim the combination of the board D, rod E, with its collar *f*, and the catch *h*, when the said rod serves the double purpose of supporting the seat, and in conjunction with the catch *h*, of maintaining the seat folded up, out of the way, and when the several parts are arranged on the front of the car, as and for the purpose herein set forth."

No. 26,067. HENRY C. BROWN, of Buffalo, N. Y., assignor to Charles O. Brown, of Dalton, Mass., for an "Improved handle for smoothing irons."

"I claim a ventilated smoothing iron handle, constructed for the purposes substantially as herein described."

No. 26,068. WM. E. COOPER, of Dunkirk, N. Y, assignor to Charles D. Gibson, of New York, N. Y., for an "Improvement in railroad car springs."

"I claim the combination and arrangement of groups of four springs, by and with the suspension bracket, or stirrup B, B^1, &c., constructed, arranged, and operating in the manner above described."

No. 26,069. JOHN DANNER, of Canton, Ohio, assignor to himself and J. M. Jay, of same place, for an "Improvement in sleeping cars."

"I claim the combination of the hinged back d^1, with the hinged and reversible frame D^1, and removable piece E, constructed and arranged to operate in relation to seat C^1, and false back *d*, of the back B^1, substantially as and for the purposes set forth."

No. 26,070. PEARSON B. KITCHEN, of Philadelphia, Pa., assignor to Wm. M. Marshall, of same place, for an "Improvement in apparatus for heating hydro-carbon liquids."

"I claim the application to gas generators of a hot-air chamber, as previously described, and the submerging of one

or more air pipes therefrom, into and upon the chemicals, for the purposes set forth and herein described, or any other, substantially the same, and which will produce the intended effect."

No. 26,071. A. H. KNAPP, of Newton Centre, Mass., assignor to himself, E. H. Barstow, and A. R. Trowbridge, of same place, for an "Improvement in lamps."

"I claim the 'wick protector' I, arranged and operating substantially as and for the purpose herein described."

No. 26,072. AMBROSE LOVIS, of Boston, Mass., assignor to himself and Charles E. Hodges, of same place, for an "Improvement in composition for detergent purposes."

"I claim the above described cleansing, bleaching, and disinfecting liquid, consisting of an alkaline silicate combined with chlorine, for the purpose specified."

No. 26,073. JAMES A. WHIPPLE, of Boston, Mass., assignor to himself and George A. Stone, of Roxbury, Mass., for an "Improvement in method of driving piles."

"I claim the method or process of driving piles by exploding charges of gunpowder, or its equivalent, between the pile and a fulcrum, or resistance, so that the force of the explosion shall wholly or partially act to drive the pile in the direction of its length, or nearly so."

No. 26,074. JOSEPH BARRANS, of 2, Caledonia Terrace, Queen's Road, Peckham, county of Surrey, England, for an "Improvement in portable traction locomotive."

"I claim, first, the method herein described of supporting the front portions of traction, or portable steam engines, by means of a spring or elasticated beam, or lever, at or near the middle thereof, the said beam or lever being arranged constantly to occupy a position in a vertical plane, passing through the axis of the boiler, by having its near and front ends applied and jointed respectively to the bottom of the barrel of the boiler, and to the fore-carriage, substantially in the manner and for the purposes herein set forth. Second, the application and use in traction and portable steam engines of tensional rods or bars, for retaining the driving wheel train centres at the proper distance, asunder from the axis of the ground driving wheels. Third, application and use in traction and portable steam engines of ground driving wheels, in two or more sections, capable of being put into and out of working action for the purpose herein-before described, and such wheels having teeth-holding projections upon their peripheries, of the form and arrangement herein-before described."

RE-ISSUES.

DEWITT C. CUMINGS, of Fulton, N. Y., for an "Improvement in saw cutters."—Patented 7th August, 1855.—Re-issued 8th November, 1859.

"I claim operating the adjustable lower feed roller by means of a spur wheel hung in a vibrating frame or yoke, the axis of which is connected with the said roller by means of an universal coupling when said roller is supported on spring bearings, independent of each other, substantially as and for the purpose specified. 2nd, the employment of a cylinder, provided with a knife or knives which have an upward cylindrical cut when the same is arranged with two independent feed rollers, the lower one of which being supported on a spring or springs in such a manner that it can adjust to act with greater or less pressure on the material to be cut, substantially as set forth."

WILLIAM M. HENDERSON, of Baltimore, Md., for an "Improvement in pumps." — Patented 4th October, 1859.—Re-issued 8th November, 1859.

"The two ball valve cages, with the suction valves in their interior attached to the extremities of a central perforated tube, or its equivalent, in combination with the waterways and discharge valve or valves. The water entering between the plunger valves, and alternately discharged from the ends of the pump barrel, in direction of the stroke, the whole being constructed and operated substantially in the manner and for the purposes set forth."

JOHN H. LYON, of New York, N. Y., for an "Improved lock and detector."—Patented 13th September, 1859.—Re-issued 8th November, 1859.

"I claim combining with a padlock, or any lock provided with as shackle, a lead, or soft metal tube or seal, so arranged as to be temporarily secured thereto, and admitting of being released only by the removing or breaking of said tube or seal, which thereby serves as a detector, substantially as set forth."

ADDITIONAL IMPROVEMENT.

MORTIMER NELSON, of New York, N. Y., for an "Improved gold washer."—Patented 4th October, 1859.—Additional Improvement dated 8th November, 1859.

"I claim, first, imparting to the shaft b, and the series of pans thereon, an intermitted or oscillating movement, for the purposes and as specified; and in combination with the shaft b and pans having the intermitted or oscillating movement set forth, I claim the cam h and ball i, to give the vertical or jigging movement, as specified. Second, the conical hoods or funnels o^1, o^1, in combination with the pans n, n, for the purposes and as specified."

EXTENSION.

THADDEUS HYATT, of New York, N. Y., for an "Improvement in vault covers."—Patented 12th November, 1845.—Re-issued 3rd April, 1855.

"I claim making them of a metallic grating, or perforated metallic plate, with the apertures so small that persons or bodies passing over or falling on them may be entirely sustained by the metal, substantially as described; but this I only claim when the apertures are protected by glass, substantially as and for the purpose specified. And I also claim, in combination with the grating or perforated cover, and glass fitted thereto, the knobs or protuberances on the upper surface of the grating or perforated plate, for preventing the abrasion or scratching of the glass, substantially as specified."

Erratum in Journal of 22nd November.

In the List of Specifications, &c., No. 929 (page 1338), for "silvering" read "severing."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 616. TUESDAY, NOVEMBER 29, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1696. WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given notice at the office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in the method of constructing and operating batteries for generating or exciting by chemical action, electricity for telegraphic purposes."—A communication from abroad by Thomas C. Avery, of New York, in the United States of America.

As set forth in his petition, recorded in the said office on the 18*th day of July*, 1859.

1711. And JAMES TODD, the younger, of Castlemains, in the county of Haddington, North Britain, Farmer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for dressing or cleansing and separating grain and seeds."

1714. And CHARLES TAPP and JAMES BRYANT TAPP, of Chesterfield, Derbyshire, Engineers, have given the like notice in respect of the invention of "Improvements applicable to steam boilers and furnaces for consuming smoke and economizing fuel in the generation of steam, and in the apparatus connected therewith."

As set forth in their respective petitions, both recorded in the said office on the 21*st day of July*, 1859.

1775. And JOHN MOLLADY, of Manchester, in the county of Lancaster, Hat Manufacturer, has given the like notice in respect of the invention of "An improved form or construction of hat, cap, or covering for the head."

As set forth in his petition, recorded in the said office on the 1*st day of August*, 1859.

1800. And EDWARD JAMES CORDNER, of Derramore, in the county of Down, Ireland, Clerk, has given the like notice in respect of the invention of "Improvements in the application of kites to the saving of life and property from shipwreck, and to other purposes."

As set forth in his petition, recorded in the said office on the 4*th day of August*, 1859.

1857. And JOHN TALBOT PITMAN, of the American and European Patent Offices, No. 67, Gracechurch Street, London, has given the like notice in respect of the invention of "A composition applicable to the lubrication of machinery, and to various other uses."—A communication from abroad by Horace Vaughn, of the city of Providence, in the state of Rhode Island, one of the United States of North America.

1858. And WILLIAM BOUCH, of Shildon, in the county of Durham, Engineer, has given the like notice in respect of the invention of "Improvements in breaks, in buffers, and in couplings to be used on railways."

As set forth in their respective petitions, both recorded in the said office on the 11*th day of August*, 1859.

1894. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improvements in the construction of carriages, and in apparatus for guiding or reining in carriage horses."—A communication from abroad by Isaac M. Singer, of New York, in the United States of America.

As set forth in his petition, recorded in the said office on the 17*th day of August*, 1859.

1935. And DANIEL RUSSELL, of 1, Grove Cottage, Southampton Street, Camberwell, in the county of Surrey, and JONATHAN RUSSELL, of 6, Devonshire Terrace, Queen's Road, Peckham, in the county of Surrey, have given the like notice in

respect of the invention of "Improving the means of docking and lifting ships out of the water for the purpose of examining and cleaning their bottoms, effecting any necessary repairs, fixing new screw propellor, rudder, raising sunken vessels or anything else for which it is desirable to get at any portion of a vessel generally under water."

As set forth in their petition, recorded in the said office on the 24th day of August, 1859.

1999. And JULIAN BERNARD, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture or production of boots and shoes, in the machinery, apparatus, and means employed in such manufacture."

As set forth in his petition, recorded in the said office on the 2nd day of September, 1859.

2062. And WILLIAM EDWARD GEDGE, of the firm of John Gedge and Son, of No. 4, Wellington Street South, Strand, London, Patent Agents, has given the like notice in respect of the invention of "Improvements in the manufacture of nails."—A communication from abroad by Bernard Roelandt and Company, of Fontaine l'Evèque, Belgium, Nail Manufacturer.

As set forth in his petition, recorded in the said office on the 9th day of September, 1859.

2142. And ANDREW LAMB, of Southampton, in the county of Hants, Engineer, has given the like notice in respect of the invention of "An improved method of heating the feed water for boilers."

As set forth in his petition, recorded in the said office on the 20th day of September, 1859.

2245. And ROBERT BREARLEY, the younger, of Batley, in the county of York, Manufacturer, has given the like notice in respect of the invention of "Improvements in means or apparatus for raising the nap or pile of cloths."

As set forth in his petition, recorded in the said office on the 4th day of October, 1859.

2334. And WILLIAM PROSSER, of No. 24, Dorset Place, Dorset Square, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in apparatus employed in the production of light."

As set forth in his petition, recorded in the said office on the 13th day of October, 1859.

2358. And NAPOLEON MONTANARI, of Charles Street, Soho Square, in the county of Middlesex, has given the like notice in respect of the invention of "An improved apparatus for aiding children in learning to walk."

As set forth in his petition, recorded in the said office on the 15th day of October, 1859.

2369. And JULIAN BERNARD, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in the manufacture or production of boots and shoes, and other coverings for the feet, and in the machinery, apparatus, and means connected with such manufacture."

As set forth in his petition, recorded in the said office on the 17th day of October, 1859.

2408. And JOHN TALBOT PITMAN, of the American and European Patent Offices, No. 67, Gracechurch Street, London, has given the like notice in respect of the invention of "An improved mode of converting cast iron into soft malleable iron without change of form."—A communication from abroad by I. A. K. Eaton, of the city, county, and state of New York, in the United States of America.

As set forth in his petition, recorded in the said office on the 21st day of October, 1859.

2424. And ANDREW LINMERE DOWIE, of Glasgow in the county of Lanark, North Britain, Merchant, has given the like notice in respect of the invention of "Improvements in gas burners, and in pressure-regulating apparatus for the same."

As set forth in his petition, recorded in the said office on the 24th day of October, 1859.

2450. And JOHN ARMOUR, of Perceton Fire Clay Works, Kilmarnock, North Britain, Manager, has given the like notice in respect of the invention of "Improvements in apparatus for measuring and for regulating supplies of solid and fluid substances in the preparation of mixtures or compounds."

As set forth in his petition, recorded in the said office on the 26th day of October, 1859.

2487. And LUDWIG POHL, of the firm of Eduard Posen and Company, of Offenbach, in Germany, Manufacturers, has given the like notice in respect of the invention of "Improvements in fastenings for bags, purses, and similar purposes."

As set forth in his petition, recorded in the said office on the 31st day of October, 1859.

2498. And JAMES LEEMING, of Bradford, in the county of York, Machine Maker, and JOHN CARTER RAMSDEN, of the same place, Manufacturer, have given the like notice in respect of the invention of "Improvements in looms for weaving."

As set forth in their petition, recorded in the said office on the 3rd day of November, 1859.

2528. And ANDREW LINMERE DOWIE, of Glasgow, in the county of Lanark, North Britain, Merchant, has given the like notice in respect of the invention of "Improvements in effecting communications or signalling between distant or distinct parts of railway trains."

2536. And ARCHIBALD TEMPLETON, of No. 7, Skinner Sereet, in the city of London, and JOHN LAWSON, of Glasgow, have given the like notice in respect of the invention of "Improvements in the manufacture of chenille or like fabrics, suitable to be used in woven and other ornamental piled fabrics."

As set forth in their respective petitions, both recorded in the said office on the 7th day of November, 1859.

2540. And JOHN THOMSON, of Dundee, in the county of Forfar, Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture or production of Brussels and velvet pile carpet fabrics and hearthrugs."

As set forth in his petition, recorded in the said office on the 8th day of November, 1859.

2550. And GEORGE SPILL and DANIEL SPILL, both of Stepney Green, in the county of Middle-

sex, Manufacturers, have given the like notice in respect of the invention of "An improvement in the manufacture of bands for driving machinery, and for various other purposes."

As set forth in their petition, recorded in the said office on the 9th day of November, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

29th November, 1859.

1325. Archibald Smith, Engineer, of 69, Princes Street, Leicester Square, London, for an invention of "Improvements in machinery for making lines, ropes, and cables for telegraphic and other purposes."—Dated 30th May, 1859.

1326. Weston Grimshaw, of Bowdon, in the county of Chester, Gentleman, for an invention of "Certain improvements in machinery for compressing bricks, tiles, artificial fuel, and other similar articles."—Dated 30th May, 1859.

1330. James Fry, of Wrotham, Sevenoaks, in the county of Kent, Miller, for an invention of "An improvement in mills for grinding."—Dated 30th May, 1859.

1333. Isaac Blackburn and Robert Blackburn, both of Long Eaton, in the county of Derby, Engineers, for an invention of "Improvements in locomotive or traction engines, and in implements connected therewith for [cultivating the soil."—Dated 30th May, 1859.

1335. Arthur Mickelthwate, Joseph Peace, and Samuel Johnstone Hobson, all of Sheffield, in the county of York, for an invention of "Improvements in the coating and covering of metallic springs, steel, iron, and other metal bands for the use of any kind of machinery, driving bands or straps, ribs suitable for umbrellas and parasols, stay busks, and ribs for stays, hats, bonnets, reeds, and crinoline and articles of dress, and other useful purposes."—Dated 30th May, 1859.

1336. Enoch Leeson, of No. 13, Traffic Street, Derby, in the county of Derby, Lace Manufacturer, for an invention of "Improvements in machinery for the manufacture of ornamental chenille fringes and braids, or other fabrics."—Dated 30th May, 1859.

1339. William Smith, of Nos. 18 and 19, Salisbury Street, Adelphi, Civil Engineer, for an invention of "Apparatus for raising and docking ships, and other similar purposes.—A communication from abroad by Mr. John W. Nystrom, a citizen of the United States of North America, at present residing in Russia.—Dated 31st May, 1859.

1340. James Septimus Cockings, Civil Engineer, of Ann Street, Birmingham, in the county of Warwick, for an invention of "Certain improvements in the construction of self-adjusting cases for holding and carrying cartridges of various sizes or guages, parts of which improvements are also applicable to cartridge-carriers now in use."—Dated 31st May, 1859.

1341. Samuel Carr and George Butterworth, of the firm of Carr and Butterworth, of Leeds, in the county of York, Manufacturers, for an invention of "Improvements in the manufacture of felted cloth, and in the machinery or apparatus employed in such manufacture."—Dated 31st May, 1859.

1343. James Wansbrough, of Bridge Street, in the borough of Southwark, Gentleman, for an invention of "Improvements in the construction of stereoscopes."—A communication from abroad by Egbert Moxham, of Bruges, in the kingdom of Belgium.—Dated 31st May, 1859.

1348. Frederick Roberts, of Maiden Newton, and Alexander Roberts, of Froome Vanchurch, both in the county of Dorset, for an invention of "Improvements in apparatus employed for ploughing, tilling, or cultivating land, when steam power is employed."—Dated 31st May, 1859.

1350. George Hallen Cortam and Henry Richard Cottam, of St. Pancras Iron Works, Old St. Pancras Road, in the county of Middlesex, for an invention of "Improvements in stable fittings."—Dated 1st June, 1859.

1351. Francis Walter Saltonstall, of Northumberland Street, Strand, in the county of Middlesex, and Alfred Bush, of Hanover Cottage, Park Road, Saint John's Wood, in the county of Middlesex aforesaid, for an invention of "An improved machine or apparatus for dredging and excavating."—Dated 2nd June, 1859.

1356. Samuel Bury, of Manchester, in the county of Lancaster, Manager, for an invention of "Certain improvements in machinery or apparatus for embossing and finishing textile fabrics or other like surfaces."—Dated 2nd June, 1859.

1357. Samuel Bury, of Manchester, in the county of Lancaster, Manager, for an invention of "Certain improvements in machinery or apparatus for embossing and finishing textile fabrics or other like surfaces."—Dated 2nd June, 1859.

1370. Alexander Robertson Arrott, of Saint Helens, in the county of Lancaster, Chemist, for an invention of "Improvements in the manufacture of soda."—Dated 3rd June, 1859.

1377. George Davies, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for an invention of "An improvement in wearing apparel."—A communication from abroad by Gabriel Jean Julien Laury, of Paris, in the empire of France.—Dated 4th June, 1859.

1379. Christopher James, of Mountain Ash, Aberdare, in the county of Glamorgan, Agent, for an invention of "An improvement in the manufacture of railway chairs."—Dated 4th June, 1859.

1424. Oliver Maggs, of Bourton, in the county of Dorset, for an invention of "Improvements in washing machines."—Dated 13th June, 1859.

1446. Nicholas Charles Szerelmey, of No. 6, Park Terrace, Brixton Road, in the county of Surrey, for an invention of "Improvements in preparing combinations of materials for preventing rust in iron and other metals and decay in timber."—Dated 16th June, 1859.

1452. Henry Francis Smith, of No. 4, Dale Street, in the city of Manchester, Agent, for an invention of "Improvements in the manufacture of driving straps or bands."—Dated 16th June, 1859.

1456. Thomas Cattell, of 30, Euston Square, in the county of Middlesex, Doctor of Medicine, for an invention of "Improvements in the manufacture of varnish and lacker."—Dated 16th June, 1859.

1457. Thomas Orrell, junior, of Mill Hill, Bolton-le-Moors, in the county of Lancaster, Cotton Spinner, for an invention of "Certain improvements in mules for spinning."—Dated 17th June, 1859.

1539. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improvement in variable cut-off gear for producing expansion in steam and other motive engines."—A communication from abroad by Ambrose Foster, Noah Sutton, and James Stephens, all of New York.—Dated 28th June, 1859.

1559. Thomas Bell, of Plaistow, in the county of Essex, for an invention of "Improvements in the manufacture of manure."—Dated 30th June, 1859.

1599. John Watkins, of the Cwmamman Colliery, Aberdare, in the county of Glamorgan, Agent, and James Pugh, of the same place, Mechanic, for an invention of "Improvements in lubricating wheels."—Dated 5th July, 1859.

1778. Elizabeth Merrell, of Little George Street, Minories, in the city of London, Tin and Zinc Plate Worker, for an invention of "Improvements in apparatus for washing and cleansing."—Dated 1st August, 1859.

2170. Thomas Barnabas Daft, of Tottenham, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in coating metal conductors suitable for electric telegraphs."—Dated 24th September, 1859.

2267. John Macintosh, of North Bank, Regent's Park, for an invention of "Improvements in the manufacture of flexible tubes."—Dated 5th October, 1859.

2269. John Macintosh, of North Bank, Regent's Park, for an invention of "Improvements in coating metallic conductors for electric telegraphs."—Dated 5th October, 1859.

2277. Walter Macfarlane, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in machinery or apparatus for drawing off or discharging liquids, and in fountains, baths, and similar receptacles for liquids."—Dated 6th October, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 26th November*, 1859, *inclusive.*)

24th November.

2793. Henry Bougleux, of Leghorn, for an invention of "Improvements in the construction of steam boilers."—Dated 25th November, 1856.

2802. Francis North Clerk, of Birmingham, in the county of Warwick, for an invention of "Improvements in metallic roofing for buildings, and in appendages to roofs."—Dated 26th November, 1856.

2810. William Woofe, of Weston Birt, in the county of Gloucester, Agriculturalist, for an invention of "An implement for paring land, applicable also to the removing of turf."—Dated 27th November, 1856.

25th November.

2828. Laban Clarke Stuart, of New York, in the United States of America, for an invention of "Improvements in machinery for reducing fibres to pulp."—A communication from Joseph Kingsland, junior.—Dated 29th November, 1856.

26th November.

2800. John Brown, of Bolton-le-Moors, in the county of Lancaster, Machine Maker, and John Adin, of the city of Manchester, Manufacturer, for an invention of "Certain improvements in jacquard machines."—Dated 26th November, 1856.

2829. John Brown, of Liverpool, in the county of Lancaster, Mast Maker, for an invention of "Improvements in the construction of the lower masts of ships."—Dated 29th November, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 26th November*, 1859, *inculsive.*)

24th November.

877. Thomas Ainsley Cook, of Wallsend, in the county of Northumberland, Manufacturing Chemist, for an invention of "Improvements in bleaching."—Dated 26th November, 1852.

919. James Barlow, of King William Street, in the city of London, Ironmonger, for an invention of "Improvements in stands or supports for casks, barrels, and other like vessels."—Dated 30th November, 1852.

1073. André Cointry, of Nantes, in the empire of France, Manufacturer, and of 4, South Street, Finsbury, London, for an invention of "Improvements in the manufacture of bread and biscuits."—Dated 16th December, 1852.

25th November.

884. Robert Barnard Feather, of Liverpool, Merchant, for an invention of "Improvements in the construction of ships, and in rendering ships and boats impervious to shot."—Dated 26th November, 1852.

26th November.

900. Samuel Cunliffe Lister, of Manningham, in the county of York, Manufacturer, and James Warburton, of Addingham, in the same county, Worsted Spinner, for an invention of "Improvements in the manufacture of yarn from fibrous materials."—Dated 29th November, 1852.

List of Specifications published during the week ending 25th November, 1859.

No.	Price.	Subject-Matter.
967	10*d.*	Machine for raising water.
968	3*d.*	Breech-loading ordnance, and its projectiles.
969	3*d.*	Apparatus employed in the production of light.
970	3*d.*	Valves or cocks.
971	8*d.*	Mowing machines.
972	10*d.*	Agricultural implements.
973	3*d.*	Disinfecting compounds.
974	3*d.*	Reversible mantle.
975	3*d.*	Safety fusee box.
976	3*d.*	Safety apparatus for clearing off condensed steam from steam engines.
977	11*d.*	Seed planters.
978	3*d.*	Ash pans.
979	3*d.*	Covering crinoline.
980	3*d.*	Mowing machine.
981	10*d.*	Looms for weaving ribbons, &c.
982	3*d.*	Preparation of sheet iron.
983	3*d.*	Apparatus for facilitating the draught of locomotive, traction, and other carriages.
984	3*d.*	Rifle canon and projectiles.
985	11*d.*	Machinery for hackling flax, &c.
986	6*d.*	Apparatus for communicating railway signals.
987	7*d.*	Machinery for raising mine skips or cages.
988	3*d.*	Obtaining liquorice extract.
989	3*d.*	Cheese presses.
990	3*d.*	Manufacture of hats, &c.
991	1*s.* 1*d.*	Machinery for weaving seamless rags &c.
992	5*d.*	Stoves.
993	7*d.*	Raising or shaping metals.
994	3*d.*	Production of ornamental surfaces for advertisement tablets, &c.
995	3*d.*	Obtaining liquorice extract.
996	2*s.*	Machinery for combing wool and other fibres.
997	2*s.* 3*d.*	Knitting machinery.
998	3*d.*	Apparatus for oiling wool.
999	3*d.*	Kiln for drying malt.
1000	3*d.*	Apparatus for cutting or sawing metals.
1001	3*d.*	Pencil cases, watch seals, and keys, &c.
1002	3*d.*	Producing figures or representations upon glass.
1003	6*d.*	Instrument for extracting weeds.
1004	8*d.*	Apparatus for ringing door bells, &c.
1005	10*d.*	Machinery for supplying steam boilers with water.
1006	3*d.*	Knitting frames.
1007	6*d.*	Clocks, watches, chronometers, &c.
1008	11*d.*	Sewing machinery.
1009	3*d.*	Manufacture of candles.
1010	7*d.*	Pipes and couplings.
1011	3*d.*	Apparatus for showing stereoscopic pictures.
1012	3*d.*	Advertising circulars.
1013	3*d.*	Crinoline skirts.
1014	6*d.*	Folding travelling case.
1015	3*d.*	Buttons.
1016	3*d.*	Drying and preserving timber.
1017	7*d.*	Branding or marking wood for casks, barrels, &c.
1018	7*d.*	Saddles.
1019	10*d.*	Machinery for making and applying screws for fixing the soles of boots and shoes.
1020	3*d.*	Transmitting motive power to ships' pumps.
1021	3*d.*	Gas burners.
1022	3*d.*	Motive power.
1023	9*d.*	Steering apparatus.
1024	3*d.*	Manufacture of woollen cloth.
1025	10*d.*	Filtering and depurating fluids.
1026	10*d.*	Apparatus for raising and lowering heavy bodies.
1027	3*d.*	Utilization of sewage.
1046	7*d.*	Wheels for carriages.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c.. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Waterscoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Watercommanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset. Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated* 16*th March* 1744.) Price

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick
Liverpool (*Free Public Library, Duke Street*).
———— (*Royal Institution*).
London (*British Museum*).
———— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
———— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
———— Steam Branch.
———— Deptford Dockyard.
———— Woolwich ditto.
———— Chatham ditto.
———— Sheerness ditto.
———— Portsmouth ditto.
———— Devonport ditto.
———— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
———— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.

Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 26th November, 1859.

Mornings - - - -	748
Evenings - - - -	1181
Total - - -	1929

Since the opening of the Museum Free Daily (May 12, 1858,)—164,778.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 527 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

(Registered for transmission abroad.)

No. 617. FRIDAY, DECEMBER 2, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1784. To HENRY FLETCHER, of Swan Court, Manchester, in the county of Lancaster, Engraver, for the invention of "Certain improvements in sewing and embroidering machinery."
On his petition, recorded in the Office of the Commissioners on the 2nd day of August, 1859.

2110. To THOMAS RICHARDSON, of New Bridge Street, Newcastle-upon-Tyne, for the invention of "Improvements in the manufacture of sulphuric acid and in applying the heat generated in the process."
On his petition, recorded in the Office of the Commissioners on the 16th day of September, 1859.

2180. To FREDERICK SIMPSON, of City Terrace St. Luke's, in the county of Middlesex, for the invention of "An improved method of fastening or securing envelopes and other like receptacles, also for affixing postage stamps, receipt stamps, and all other similar labels requiring adhesive properties."
On his petition, recorded in the Office of the Commissioners on the 27th day of September, 1859.

2254. To JANE ANN HERBERT, of Guildford, in the county of Surrey, Widow, for the invention of "Manufacturing of oxychloride of lead."—A communication from abroad by Ludwig Brumleu, of New York, in the United States of America.
On her petition, recorded in the Office of the Commissioners on the 5th day of October, 1859.

2338. To THOMAS VICARS, senior, THOMAS VICARS, junior, THOMAS ASHMORE, Engineers, and JAMES SMITH, Baker, all of Liverpool, in the county palatine of Lancaster, for the invention of "Improvements in the manufacture of bread, biscuits, and like articles, and in the machinery and apparatus connected therewith."
On their petition, recorded in the Office of the Commissioners on the 13th day of October, 1859.

2390. To JOHN KENYON BLACKWELL, of No. 73, Gloucester Terrace, Hyde Park, in the county of Middlesex, Iron Master, for the invention of "Improvements in reverberatory and other furnaces."—A communication from abroad by W. H. Kirkpatrick, of 11, Rue Martel, Paris.
On his petition, recorded in the Office of the Commissioners on the 19th day of October, 1859.

2426. To PIERRE MICHEL ALBERT LAURENT, Ex-Naval Officer, of Havre, town in the French empire, for the invention of "Certain improvements in eye-glasses for optical instruments."
On his petition, recorded in the Office of the Commissioners on the 24th day of October, 1859.

2519. To JEAN GASPARD MEYER, of Paris, in the French empire, Merchant, for the invention of "The employment of the 'tacca pinatifida' as a substitute for straw now used in various manufactures."
On his petition, recorded in the Office of the Commissioners on the 4th day of November, 1859.

2558. To SAMUEL EVANS, WALTER EVANS, and HENRY EVANS, of Derby, in the county of Derby, Cotton Manufacturers, for the invention of "Improvements in polishing thread and yarn, and in machinery to be employed for that purpose."
On their petition, recorded in the Office of the Commissioners on the 10th day of November, 1859.

2584. To WILLIAM HENRY WARD, of the city of Auburn, in the county of Cayuga, and state of New York, one of the United States of North

America, for the invention of "Improvements in wheels for railway engines and carriages."

On his petition, recorded in the Office of the Commissioners on the 15th day of November, 1859.

2596. To CHARLES GREEN, of Winnington, near Northwich, in the county of Chester, Gentleman, for the invention of "Improvement in the method of applying heat in the manufacture and drying of salt."

2597. To WHITMORE BAKER, of Downham, in the county of Norfolk, Surgeon-Dentist, for the invention of "Apparatus to facilitate the delivery of coins, for the giving of change and the like."

2598. To WILLIAM JOHNSON, of No. 47, Lincoln's Inn Fields, in the county of Middlesex, and of No. 166, Buchanan Street, in the city of Glasgow, North Britain, Civil Engineer, for the invention of "Improvements in gas burners."—A communication from abroad by George Mill, of Toronto, Canada, West.

2599. To ROBERT WHITE, of Edinburgh, in the county of Mid Lothian, North Britain, Writer to the Signet, for the invention of "Improvements in shirts."

2600. To THOMAS GREENWOOD and JOHN BATLEY, of Leeds, in the county of York, Machinists, for the invention of "Improvements in the construction of the beds of lathes, and the tables of planing machines."

2601. To GEORGE TAYLOR, of the firm of Taylor Brothers, and Company, of Clarence Iron Works, Leeds, in the county of York, Ironmaster, for the invention of "An improvement in the mode of manufacturing wrought-iron crank axles."

2602. To JAMES BURROW, of Ashford Parsonage, Bakewell, Clerk, for the invention of "Improvements in umbrellas and parasols."

2603. And to JAMES WARD, Truss Maker, and HENRY BURMAN, Brick Maker, both of Stratford-on-Avon, in the county of Warwick, for the invention of "Improvements in machinery for making bricks and tiles, and for moulding peat and plastic substances."

On their several petitions, recorded in the office of the Commissioners on the 16th day of November, 1859.

2604. To JEROME ANDRÉ DRIEU and AUGUSTE LEGEAY, of No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, for the invention of "A tissue, being a substitute for leather, mill-board, and papier-maché."

2605. To ISAAC WHITE, of Nailsea, in the county of Somerset, Glass Manufacturer, for the invention of "Improvements in glass furnaces."

2606. To DAVID JONES, of Dartmouth Street, Birmingham, in the county of Warwick, Manufacturer, for the invention of "Improvements in metallic casks."

2607. To RICHARD LAMING, of Clifton Villas, Maida Hill West, in the county of Middlesex, for the invention of "Improvements in obtaining alkalies and alkaline compounds."

2608. To THOMAS ROBINSON, of St. Helens, Lancashire, for the invention of "Improvements in steam engines."

2609. To JOHN LOUIS JULLION and GORDON PIRIE, both of Stoneywood Works, Aberdeen, North Britain, Paper Makers, for the invention of "An improvement in the manufacture of paper."

2610. And to JAMES MCKENZIE, of No. 16, St. Martins-le-Grand, in the city of London, and STEPHEN THOMAS WENTWORTH, of the same place, Gas Engineers, for the invention of "Improvements in breech-loading fire-arms."

On their several petitions, recorded in the Office of the Commissioners on the 17th day of November, 1859.

2611. To JOHN HENRY BRIERLEY, Small Ware Manufacturer, residing at No. 19, Milton Place, Halifax, Yorkshire, for the invention of "A belt or band fastener."

2612. To WILLIAM GOSSAGE, of Widnes, in the county of Lancaster, Chemist, for the invention of "Improvements in the manufacture of carbonate of soda."

2613. And to JAMES PINCHBECK, of Camden Street, Islington, in the county of Middlesex, for the invention of "Improvements in consumer's compensating gas meters, which are partly applicable to ordinary consumers' meters."

On their several petitions, recorded in the Office of the Commissioners on the 18th day of November, 1859.

2615. To SAMUEL CORBETT, of Wellington, in the county of Salop, Agricultural Implement Manufacturer, for the invention of "An improvement or improvements in pulpers for pulping food for cattle."

2616. To WILLIAM CLARK, of No. 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in the preservation of animal and vegetable matters."—A communication from abroad by Louis Joseph Frederic Margueritte, of Paris, Chemist."

2617. To WILLIAM BLINKHORN, of Sutton, near St. Helens, in the county of Lancaster, Manager of the London and Manchester Glass Company, for the invention of "The novel application of certain materials to the manufacture of bricks, quarries, or tiles to be employed principally in the construction of furnaces as 'fire-bricks.'"

2618. To JOHN KNIGHT, of Newton Heath, near the city of Manchester, Manager, for the invention of "Certain improvements in or applicable to looms for weaving, part of which is applicable to lubricating axles and bearings for other purposes."

2619. To EDWARD BARLOW, of the firm of Messieurs Dobson and Barlow, Machine Makers, of Bolton-le-Moors, in the county of Lancaster, and FRANCIS HAMILTON, of the same place, Manager, for the invention of "Certain improvements in carding engines."

2620. To AUGUSTE HONORÉ LE PONTOIS, of L'Orient, town in the French empire, Merchant, for the invention of "Improvements in machines for distributing seed and manure."

2621. To JOHN BANCROFT, of Halifax, in the county of York, for the invention of "Improvements in the manufacture of fabrics adapted to be used for

curtains, coverings of furniture, table covers, and such like uses."

2623. To Auguste Godchaux, Editor, of Paris (empire of France), and of No. 45, Essex Street, Strand, London, for the invention of "Improvements in the mode of printing forms, or models, or copies of penmanship and designs on paper, and other fabrics."

2624. To John Petrie, junior, of Rochdale, in the county of Lancaster, Machine Maker, and John Lord, of Manchester, in the said county, Manufacturer, for the invention of "Improvements in machinery or apparatus for drying rags, wool, and other fibrous materials."

2625. To Alfred Vincent Newton, of the Office of Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Improvements in the mode of and machinery for drying cloths."—A communication from abroad by Bezaleel Sexton, of East Windsor, in the county of Hartford, and state of Connecticut, United States of America.

2627. To George Laidlaw, of Glasgow, in the county of Lanark, North Britain, Hat Manufacturer, for the invention of "Improvements in hats and other coverings for the head."

2628. And to Henry Naylor, Twister, and William Crossley, Manufacturer, both of Calder Vale, near Todmorden, in the county of Lancaster, for the invention of "Improvements in pickers used in looms for weaving."

On their several petitions, recorded in the Office of the Commissioners on the 19th day of November, 1859.

2630. To Pierre Jochem, of Paris, France, Gentleman, for the invention of "Improvements in brakes for railway and other carriages."

2632. To Joseph Cowan, of Liverpool, in the county of Lancaster, Cabinet Maker, for the invention of "Improvements in 'bracing' or connecting the angles or corners of chairs and other like articles of cabinet-furniture."

2636. And to Joseph Apsey, of Cornwall Road, Lambeth, in the county of Surrey, Engineer, and William George Buckwell, of the Phœnix Stone Works, East Greenwich, in the county of Kent, Engineer, for the invention of "Improvements in boilers and other furnaces, smoke consuming and steam generating."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of November, 1859.

2638. To Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, No. 123, Chancery Lane, London, W.C., for the invention of "Improvements in weaving silk and other materials, and in the machinery or apparatus employed therein."—A communication from abroad by Horace Verzier, Manufacturer, residing at Lyon, in the empire of France.

2640. To James Shand, of No. 245, Blackfriars Road, in the county of Surry, Engineer, and John Rowley, of No. 3, St. George's Road, Notting Hill, in the county of Middlesex, Gentleman, for the invention of "Improvements in fire engines, part of which improvements are applicable to other pumps."

2644. To William Edward Newton, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Certain improvements in obtaining compensation for the effects of changes of temperature in time-keepers."—A communication from abroad by Henry Boehm James, of Trenton, in the county of Mercer, and state of New Jersey, United States of America.

2646. And to Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for the invention of "An improvement or improvements in the manufacture of iron and steel."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of November, 1859.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

2nd December, 1859.

1371. James Burrow, of Ashford Parsonage, Bakewell, in the county of Derby, Clerk in Holy Orders, and William Newton Wilson, of 144, High Holborn, in the county of Middlesex, for an invention of "An improved floor scrubber and sweeper for carpets, floors, lawns, and other such like useful purposes."—Dated 3rd June, 1859.

1378. James Wood and William Wood, both of the town and county of the town of Nottingham, Lace Manufacturers, for an invention of "A peculiar mode or method of dying lace or other fabrics, and making the same into bonnet and cap fronts, or other articles."—Dated 4th June, 1859.

1383. James Ferrabee, of the Phœnix Iron Works, Stroud, in the county of Gloucester, Engineer, for an invention of "Improved machinery for forming bats of fleece or sheet sliver, and also for folding cloth and other fabrics."—Dated 6th June, 1859.

1388. William Bryer Nation, of Union Row, Union Bridge, Rotherhithe, London, Analytical Chemist, for an invention of "Improvements in the manufacture of superphosphate of lime."—Dated 7th June, 1859.

1573. Samuel Fisher, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "Improvements in ordnance and projectiles."—Dated 1st July, 1859.

2022. Frederick Collier Bakewell, of No. 6, Haverstock Terrace, Hampstead, in the county of Middlesex, for an invention of "Improvements in the manufacture of caustic alkalies."—A communication from abroad by Henry Pemberton, of East Tarentum, U. S. North America.—Dated 5th September, 1859.

2377. Joseph Reynolds, of 21, Bull and Mouth Street, city of London, Engineer, for an invention of "Improvements in the manufacture of wrought nails."—A communication from abroad by Henry Coggshall, of Providence, R. I., U. S. of America.—Dated 18th October, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 30th November, 1859, inclusive.*)

28th November.

2839. JOHN GIBSON, of Paddington, in the county of Middlesex, Engineer, for an invention of "Improvements in buffing and drawing apparatus."—Dated 1st December, 1856.

30th November.

2841. EDWARD JACKSON EMMONS, of the state of Massachusetts, of the United States of America, for an invention of "A new or improved nursery chair."—A communication from Joshua Stevens, a resident of the aforesaid state of Massachusetts.—Dated 1st December, 1856.

2849. JOHN LONGBOTTOM, of Leeds, in the county of York, Gas Engineer, for an invention of "Improvements in apparatus for drying, roasting, carbonizing, and calcining vegetable, mineral, and animal substances."—Dated 2nd December, 1856.

2861. FREDERIC SIEMENS, of 7, John Street, Adelphi, London, Engineer, for an invention of "Improved arrangement of furnaces, which improvements are applicable in all cases where great heat is required."—Dated 2nd December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 30th November, 1859.*)

939. JAMES NEWALL, of Bury, in the county of Lancaster, Railway-carriage Builder, for an invention of "Improvements in breaks, machinery, or apparatus applied to railway and other carriages in motion, and in the mode or method of connecting two or more of such breaks together."—Dated 3rd December, 1852.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 15th November, 1859, and each bearing that date.

No. 26,075. JAMES ALBRO, of Elizabeth, N.J., for a "Method of printing floor cloth."

"I claim the production of grained or variegated designs upon oil cloth, by applying the printing blocks to cushions or pads, upon which the colors have been previously 'grained' or 'combed,' as herein set forth."

No. 26,076. WM. H. ARNOLD, of Washington, D.C., for an "Improvement in breech loading fire arms,"

"I claim, 1st, the combination of cap lever L, shackle piece C, pin *e*, and grooves *i*, with the breech piston P, for operating the same, substantially as described. 2nd, the combination of slide piece *k* joined, as described, with the pin *a*, and hammer H, operating substantially as and for the purpose set forth. 3d, the cavity *m*, in the piston P, for the reception of the rear projecting tail piece of the projectile, as set forth."

No. 26,077. J. M. BAIRD, of Wheeling, Va., and LEVI F. SMITH, of Stonington, Conn., for an "Improved reclining chair."

"We claim, first, the combination and arrangement of the oscillating pedestal A, vertical lever B, the sliding seat frame C, and stand D, substantially as and for the purposes described. Second, we claim, in combination with the fall L, the vibrating foot board P, the oscillating bars H, and pitman F, or their equivalents, operating in the manner and for the purposes as described."

No. 26,078. WM. H. BAKER, of Tamaqua, Pa., for an "Improvement in mechanical movement."

"I claim the drum B, placed loosely on the shaft C, and having ropes or chains *l*, *m*, and a weight or weights attached to it, as shown, in connection with the toothed spring L, toothed wheel E, train of wheels *i*, fly wheel G, and cam H, fitted between the friction rollers *j* of the shaft I, the whole being combined and arranged to operate as and for the purpose set forth."

No. 26,079. WM. C. BAMBERGER, of Washington, D.C., for an "Improved gauge for iron axles."

"I claim an axle gauge constructed and operated substantially in the manner described."

No. 26,080. JACOB W. BANTA, of Buffalo, N.Y., for an "Improvement in ship building."

"For the purpose of combining great strength and sharpness in the construction of the bows of vessels, of twenty or more tons burthen, I claim extending the planking upon both sides of the bow, and uniting their contiguous ends forward of the dead wood, the planking and dead wood being chamfered, to admit of such extension and union, substantially as herein described."

No. 26,081. JAMES BIDWELL, of New York, N.Y., for an "Improvement in burr cylinders."

"I claim securing the toothed plate D in place, by providing them with projections or recesses, to fit to corresponding

recesses or projections, provided in or on the interposed packing rings fitting to the body of the cylinder, substantially as herein described."

No. 26,082. Aaron Bowers, Jacob H. Griggs, and John Wilson, of Monmouth, Ill., for an "Improvement in mole ploughs."

"We claim the combination of the peculiarly constructed mole A, with the scrapers *a*, *a*, and presser D, arranged and operating in relation to each other, as and for the purposes set forth."

No. 26,083. Adolfus Brass, of Newark, N.J., for an "Improved tool for cutting corks."

"I claim a cutter, consisting of two curved blades *e*, *e*, two spring or hinged arms *x*, *x*, and a sliding ring c^1, with extensions, substantially as and for the purposes set forth."

No. 26,084. Isaac A. Brownell, of Providence, R.I., for an "Improvement in machine for packing starch, &c."

"I claim the tunnel T, as constructed for the purpose, substantially as herein above described. Second, I claim attaching the cans *i*, *i*, to upright strips of wood or metal, which receive and transmit to the said cans the motions which reduce in bulk the commodity placed therein. Third, I claim the wheel F, or its equivalent, for holding or carrying the blocks *h*, *h*, in combination with the cam wheel G, or its equivalent, and the studs *l*, *l*, &c., for imparting the motions which reduce the commodity in bulk, and also the intermitting rotary motion to the wheel F, for the purpose set forth. Fourth, I claim the arrangement of the foot lever *u*, and the rod *v*, and the punch *s*, with the rod and plate *j*, for the purpose specified. I also claim, in combination with the punch *s*, the pawl *w*, rod *y*, and sliding hub *x*, for liberating the wheel F at the proper time. Fifth, I claim the rail *a*, *a*, and the studs *r*, *r*, &c., with the stop O, for withholding, in the manner and for the purpose specified."

No. 26,085. Joseph Bullock, of Cohoes, N. Y., for an "Improvement in knitting machines."

"I claim the employment, in combination with such a circular series of stationary needles, of a series of lever-like jacks F, applied substantially as herein described, and having a movement between the needles in a direction radial to the centre of the machine, as described, but no rotary motion."

No. 26,086. George T. Bushnell, of Birmingham, Conn., for an "Improved martingale ring."

"I claim, as a new article of manufacture, a martingale ring, whose exterior edge is thinner than the interior, in combination with an exterior band, whose edges extend down upon the sides of the ring, forming a hollow or corrugated band on its surface, substantially as described, for the purposes as aforesaid."

No. 26,087. John T. Butler, of Natchez, Miss., for an "Improvement in fastening metal hoops on cotton bales."

"I claim the combination of the buckle frame A, when made without any opening in the border of it, with the hooks C, C^1, when the latter are received through the former and held in place by the pressure of the bale against them, substantially as described and represented."

No. 26,088. Lysander Button and Robt. Blake, of Waterford, N. Y., for an "Improvement in nozzles for fire-engines, &c."

"We claim the removable ring B, constructed and combined with the adjutage, substantially as herein set forth."

No. 26,089. Wm. L. Carter, of Marietta, Pa., for an "Improved ore washer."

"I claim a double conical-shaped vessel, provided with teeth or cutters inside at the end where the ore is received, and the grinders G, with the means described for supporting and adjusting the same, substantially as specified."

No. 26,090. Cyrus Chambers, jr., of Philadelphia, Pa., for an "Improvement in machines for folding paper."

"I claim, first, so arranging the drop roller that it shall co-operate with one of the feeding rollers in feeding in the sheet. Second, forming grooves in the folding rollers for the reception of the adjustable guides, as described. Third, the combination of the carrying roller with the folding roller for carrying in the sheet. Fourth, giving the curved bars a projection beyond the surface of the rollers, for the purpose of raising or bearing off the sheet from the folding roller, substantially in the manner described. Fifth, moving the folding knife in an arc around one of the folding rollers, as and for the purpose specified. Sixth, placing the centre of the arc in which the folding knife moves near or within the periphery of the roller, around which it moves, substantially as and for the purpose set forth. Seventh, corrugating the sheet as it passes from one folding mechanism to a position to be acted upon by the next, for the purpose described. Eighth, turning or conducting the paper by means of the bent bars 13 or 22, or their equivalents, substantially in the manner specified. Ninth, the combination of the bent bars with the straight bars and adjustable stop, arranged substantially in the manner described. Tenth, the combination of the bent bars with the tapes and stop, for the purpose specified. Eleventh, the oscillating packer or plunger B, having its centre of motion below the point of contact with the folded sheet, as set forth. Twelfth, the yielding catches for preventing the return of the packed sheets, constructed and operating substantially as described. Thirteenth, making one or more notches in the plunger for clearing the yielding catches, as set forth and shown."

No. 26,091. George E. Chenoweth, of Baltimore, Md., for an "Improvement in harvesters."

"I claim the described arrangement and combination of the finger bar and main frame, whereby the bar can be folded forwards, to the side of the machine with its front downwards, so that the platform can remain attached to the bar, and occupy a vertical plane therewith when folded to this position, all as described and represented in the foregoing specification and the accompanying drawings."

No. 26,092. Philip L. Clow, of Cohoes, N.Y., for an "Improved churn."

"I claim, first, hanging the outer parts *a*, *a*, a^1, a^1, of the two contrarily revolving dashers B, B^1, to the central portions *c*, c^1, by hinges *d*, in the manner and for the purposes herein set forth. And second, I also claim the arrangement of the air pump E, and water reservoir F, with the revolving dashers B, B^1, and cream vessel G, as and for the purpose herein described."

No. 26,093. Aaron S. Cornell, of New York, N.Y., for an "Improved rotary churn."

"I claim the arrangement of the rotating shafts armed with the concave or recessed crags or dashers within the two concave or half cylinder chambers, placed back to back, as herein described."

No. 26,094. Hunter Davidson, of United States Navy, for an "Improved apparatus for working ships' boats."

"I claim the boat apparatus consisting of the reel, the attaching and detaching hooks, constructed and operating substantially as specified."

No. 26,095. Thomas H. Dodge, of Washington, D.C., for an "Improvement in mowing machines."

"First, I claim the arrangement and combination of the levers, standards, and cords *i*, *i*, or their equivalents, with shoe C, whereby the driver, from his seat on the machine, can elevate either end of the finger bar, independently of the other, or the entire bar, substantially as described for the purposes specified. Second, I claim the combination of the cutting apparatus with the main frame and mechanism represented in figs. 2 and 16 or its equivalent, so constructed and arranged, that the driver can without leaving his seat on the machine, fold up and unfold the finger bar, without taking hold of it with his hand, substantially as and for the purpose stated. Third, I claim the combination and arrangement of the levers G, G^1, with the driver's seat E, and cord or chain h^1, whereby the driver may when necessary employ both his hands and his feet, together with the power of the team, to raise the finger bar, and cutting apparatus, substantially as set forth. Fourth, I claim so combining mechanism with the machine, as that the driver can employ the power of the team to assist to elevate the finger bar and cutting apparatus at pleasure, without changing the horizontal position of the main frame substantially as described. Fifth, I claim in a reaping and mowing machine, the folding guard F, and rein hitch *h*, in combination with the driver's seat, substantially as and for the purposes set forth. Sixth, I claim the flexible or adjustable draft connection b^1, or X, to which the team is attached, in combination with the coupling arm *a*, and shoe C, substantially as and for the purposes set forth. Seventh, I claim the spiral cutters *k*, when constructed and arranged as shown in fig. 11, and operating substantially as and for the purposes set forth. Eighth, I claim hinging the track clearer to the extension piece (j^1), or its equivalent, by means of the cranks *j*, *j*, for the purposes described. Ninth, I claim so constructing the track clearer,

that its weight may be adjusted in the manner and for the purposes substantially as set forth."

No. 26,096. Miles Earnhart, of Cold Water, Miss., for an "Improvement in cotton scrapers."

"I claim the arrangement and combination of the double adjustments of the mold board E, with the stock C, and rigid supporting brace G, substantially as and for the purpose herein specified."

No. 26,097. Moses G. Farmer, of Salem, Mass., for an "Improvemént in telegraphic machines."

"I claim the use of a key or circuit breaker, which shall close one circuit before or at the same time that it opens another, in connection with an electro-magnet with two sets of helices operating on one and the same armature lever, or two separate electro-magnets, operating upon one and the same armature lever, for the purpose of transmitting two messages simultaneously upon a single wire."

No. 26,098. Wm. Frost, of Amenia, N. Y., for an "Improved milk can."

"I claim a milk can provided with tinned iron hoops B, with their ends connected together by rivets *b* and solder *a*, either or both, and secured on the can by solder, to form an improved article of manufacture, as set forth."

No. 26,099. Rollins Germain, of Buffalo, N. Y., for an "Improvement in the construction of ships and other navigable vessels."

"I claim, 1st, vessels for navigation when the bow and stern sections shall taper uniformly, and the vessel below its water lines be of the form and model substantially as described, and when the relative proportions as to length, breadth of beam, and draught of water, shall be such that—if a right line be drawn longitudinally through the middle, commencing at the water line at the bow and terminating at the water line at the stern, (when the vessel is loaded,) and another line be drawn at right angles to said line along the water surface from the water line on one side to the water line on the other side, at the middle of the part of the vessel where a cross section below the water line is greatest, and from every point in this last described line right lines be drawn to each end of the first described line,—the average of all the angles made by these last lines with the first-described line shall not exceed two degrees. 2nd, the combination of the fin-like projection V with a vessel constructed below its water lines, substantially as herein described. 3d, the combination of the overhanging deck with a vessel constructed below its water lines, substantially as herein described. 4th, constructing the pilot house and smoke stacks (separately) in respect to their forward and rear parts, in a tapering or wedge-like form, substantially as herein described. 5th, the combination of the notched plates C, C, the iron knee D, and rivets E with a vessel constructed substantially as described for the purposes set forth."

No. 26,100. James Giles, of Dryden, N. Y., and C. B. Tompkins, of Wysses, N. Y., for an "Improvement in cylinders for smoothing walks, &c."

"We claim making cylinders for rollers and other purposes with grooved metal flanges, into which wood staves are fitted, which form the rolling surface, substantially as described, and for the purposes specified. Also, the mode of making and applying cross bars between rollers when two or more cylinders are required for smoothing surfaces, as described."

No. 26,101. George Hamel, of Abington, Pa., for an "Improvement in apparatus for starting city railroad horse cars."

"I claim the relative arrangement of the levers (E, E,) the pawls (F, F), in combination with their rest pins (*u*) and inclined planes (u^1, u^1), the draw bar (D) in combination with the inclined pieces (S, S,) and the staying pins (*p* and *q*), or their equivalents, for holding and releasing the draw bar (D), the same being constructed and arranged to operate substantially in the manner and for the purposes specified and described. I also claim, in combination with the said draw bar (D), the devices H, I, K, L, and M, the same being arranged so as to be operated by the cam (N) for their readjustment, substantially in the manner set forth and described."

No. 26,102. Jacob E. Hardenbergh, of Fultonville, N. Y., for an "Improvement in potato harvesters."

"I claim, 1st, the employment or use of the adjustable share N, in connection with the rotary screen P, and with or without the discharging device Q, the parts being applied to a mounted frame, and arranged to operate substantially as and for the purpose set forth. 2nd, the rotary discharging device Q placed eccentrically on the screw P, kept in proper relative position therewith by the plate R, and rotated from the screen P by the projection *q*, substantially as described. 3rd, the combination of the share N, rotary screen P, and discharging device Q, when attached to a mounted frame A, and arranged substantially as shown, so that the screen and discharging device may be adjusted independently of the share and the discharging device Q, rotated by the screen P, and kept in an eccentric position thereon for the purpose specified."

No. 26,103. Albert H. Hook, of New York, N. Y., for an "Improvement in machines for grinding glass."

"I claim the combination of the inclined carriage *c* and cylinder *i*, arranged and operated in the manner and for the purposes specified."

No. 26,104. Elisha G. Hopkins, of Penn Yan., N. Y., for an "Improved bedstead fastening."

"I claim the construction and arrangement of the parts, C, D, E, and F, substantially as specified, and for the purpose set forth."

No. 26,105. M. G. Hubbard, of New York, N.Y., for an "Improvement in harvesters."

"I claim the universal joint 'O' in the reel, in which the arms and wings are pivoted, or flexible and yielding, substantially as above specified. I also claim the combination of the flexible reel 'G,' with the flexible platform 'D,' substantially in the manner and for the purposes specified. I also claim the outer reel arm 'S,' in combination with the flexible reel and platform, as herein described."

No. 26,106. Daniel Hughes, of Rochester, N.Y., for an "Improved propeller."

"I claim the arrangement of the spiral screw propellers C, C^1, so that their blades shall work nearly in contact, and thus present a broad, unbroken, resisting surface, substantially as and for the purposes herein shown and described."

No. 26,107. Wm. J. Innis, of Providence, R. I., for an "Improved belt-awl and punch."

"I claim the combination of the punch-awl and spring handle, substantially as described."

No. 26,108. Enoch Jacobs, of Cincinnati, O., for an "Improved fastening for jail doors."

"I claim 1, making the casings of heavy iron doors of double angle iron, substantially as described. 2, fastening iron doors by swinging bars working in the outside cavity of the double angle iron casing, substantially in the manner and for the purpose set forth."

No. 26,109. Thos. A. Jebb, of Buffalo, N.Y., for an "Improved churn."

"I claim the arrangement of the short dash blades H, and long dash blade H^2, relatively to each other, and to the segmental stave B, so that the short dash blades will revolve within, and the long dash blade under the lower beveled end of the segmental stave, substantially as herein set forth."

No. 26,110. Arthur E. Jerome, of Monroeville, O., for an "Improvement in seeding harrows."

"I claim, 1st, making the axis on which the harrows rotate, hollow, and in the form of a drill tooth, substantially as and for the purposes set forth. 2nd, combining a corn planter, or a broad cast sower with the harrows, substantially as and for the purposes set forth."

No. 26,111. W. T. Jones, of Joliet, Ill., for an "Improvement in ploughs."

"I claim the attaching of the mould board E, land side F, and share G, to the standard C, by means of a joint or hinge, the plates or leaves *e*, *f*, of which are provided with screws, and arranged substantially as and for the purpose set forth. I also claim constructing the standard C with a forked upper end, in connection with the rod D, lug *h*+, and flanch *f*, arranged substantially as shown, to admit of the proper attachment of the beam and handles to the plow."

No. 26,112. J. G. Kappner, of New York, N. Y., for an "Improved billiard table."

"I claim the combination with the cushion rail B of the circular guide plate C, pivoted cross arm E, and hook (*c*), as and for the purpose herein shown and described."

No. 26,113. John Kimball, of Boston, Mass., for an "Improved machine for rabbeting wooden soles for shoes."

"I claim, first, the combination of the convex guide rest G with the pressure roller J and feed roller E when arranged substantially as and for the purpose set forth. Second, I claim, in combination with the rotary cutters and feed rollers E, the fixed tool P, when used in the manner and for the purposes herein set forth."

No. 26,114. Wm. A. Kirby, of Buffalo, N.Y., for an "Improvement in harvesters."

"I claim locating the raker's seat over the open space at the side of the platform, so that the delivery may be at any point along the whole side of said platform that the raker may desire, substantially as herein described and represented."

No. 26,115. Wm. S. Mathews, of Meriden, Conn., for an "Improved beer pitcher."

"I claim a pitcher A with two strainers F and G, one at the bottom and the other at the top of a partition E, and otherwise constructed as herein specified."

No. 26,116. Louis Meyer, of Columbus, Geo., for an "Improved extension table."

"I claim the beveled arms or braces G, G, G^1, G^1, central cross piece B, and stops b, b, b, b, on the brace arms, when they are all combined and arranged as and for the purposes herein set forth."

No. 26,117. David Mumma, jr., of Harrisburgh, Pa., for an "Improvement in mode of operating brakes on railroad cars."

"I claim the employment of a movable plate E, or its equivalent, provided with a shoe x, when in combination with a friction wheel (n), a lever D, and wheel (a), all so arranged that friction from said shoe and plate may be applied in the manner and for the purposes substantially as set forth. I claim the arrangement of the brake chain attached to the axle (o), as described, so the said axle may be employed as a lever, for the purposes set forth."

No. 26,118. J. D. Otstot, of Springfield, O., for an "Improvement in potato harvesters."

"I claim the arrangement and combination of the bent lever (h, h^{11},) excavator (d), rotary rake (k, k^1, k^{11},) hopper (l, l), and driving wheels B, B, substantially in the manner and for the purpose set forth."

No. 26,119. George F. Palmer, of Farmington, N. Y., for an "Improved machine for making wooden boxes."

"I claim, first, the arrangement of the cutters a, b, in combination with the stationary saws H and K, and with the adjustable saws J and N, substantially as and for the purpose specified. Second, the employment of the expanding sliding platforms I and M, arranged in combination with the saws H, K, J, and N, substantially as and for the purpose specified."

No. 26,120. John Patton, of Arcadia, Ind., for an "Improved washing machine."

"I claim the spiral springs J, clamp I, the hook K, in combination with the groove in the cylinder C, poles H, chains F, cross pieces G, rollers D, board B, compound wringer and rinser o and O^1, cylinder C, when operated as herein described."

No. 26,121. Isaac N. Pyle, of Decatur, Ind., for an "Improvement in cultivators."

"I claim the arrangement and combination of the curved pivoted wing rods A, A, curved adjustable central rod C, looped sockets F, vertical movable standards J, rods M, braces L, and handles E, as and for the purpose herein shown and described."

No. 26,122. J. R. Perry, of Port Clinton, Pa., for an "Improved machine for cutting tenons."

"I claim, 1st, the combination of the right and left hand screw L with the cutter heads K, in the manner and for the purpose set forth. 2ndly, constructing the cutter bits with lugs to receive the shoulder bits, as herein specified."

No. 26,123. John Pyne and Washington Barr, of Harrisburgh, Pa., for an "Improved egg-beater or ice cream freezer."

"We claim an ice cream freezer or egg-beater the bottom having corrugated perforated circles in which the shafts and wires of the dasher revolve, as and for the purposes above set forth and described."

No. 26,124. George M. Ransom, of United States Navy, for an "Improvement in apparatus for elevating cannon."

"I claim the application of trunnions and bearings (or equivalents) to the nut, in combination with jointing or hinging the upper end of the upper screw to the cascable or to a saddle attached to or supporting the cascable. I also claim the combination of the cascable saddle with the elevating screw and cascable of the gun."

No. 26,125. John H. Redstone and Albert E. Redstone, of Indianapolis, Ind., for an "Improved lath machine."

"We claim, first, operating the knife plate H, H, by the sliding bar C, C, and groove or yoke E, in combination with the roller F, when attached to the knife plate H, H, substantially as set forth. Secondly, the guides Q and Q, roller R, slide S, S, pins T, L, and L, and slots Y, O, and O, when combined and operated as set forth."

No. 26,126. Nathan F. Rice, of New Orleans, La., for an "Improvement in baker's ovens."

"What I claim is, the bakery herein-before described, constructed, arranged, and operating as specified, the same consisting of a series of ovens placed on different floors of a building, and heated successively, by products of combustion, directed and controlled by the described combination of flues, dampers, and air chambers, arranged and co-operating as shown."

No. 26,127. Albert C. Richard, of Newtown, Conn., for a "Letter envelope."

"I claim, as a new article of manufacture, a letter envelope having the properties fully set forth herein for the purpose as described."

No. 26,128. George D. Sharp, of New York, N.Y., for an "Improved billiard table cushion."

"I claim the combination of the hollow cushion, with a square, or slightly beveled face for the ball to impinge against thus producing a spring of greater ductility than other billiard table cushions have."

No. 26,129. S. A. Shurtleff, of North Carver, Mass., for an "Improved fire-iron for the use of shoemakers."

"I claim the adjustable beading-plate D, applied to a stock B, and arranged substantially as shown, to form an improved article of manufacture for the purpose specified."

No. 26,130. E. C. Singer, of Port Lavaca, Texas, for an "Improvement in sewing machines."

"I claim the feed device, the essential features of which are the plate l, the block p, and the lever m, and stop s, operated by the grooved sliding bar Q, arranged and constructed, substantially in the manner and for the purposes set forth."

No. 26,131. Ferdinand M. Sofge, of Macon, Geo., for an "Improved billiard register."

"I claim the arrangement of springs a, b, and c, operated by means of cylinder A upon tallcy d, as and for the purpose herein described. I also claim, in combination with the above, the cylinder C, in connection with the tally 1 and 2, or any number of tallies, and springs h, constructed and operating as and for the purpose above set forth."

No. 26,132. W. H. Tupper, of New York, N.Y., for an "Improvement in pouncing hat bodies."

"I claim the employment of an air blast to cleanse and hold the body G, within the hollow cone F, while the said body is being rotated and pounced as herein shown and described."

No. 26,133. JOHN F. TOWNSEND, of Brenham, Texas, for an "Improvement in ploughs."

"I claim the arrangement and combination of the land side A, standard B, C, mould board H, share F, braces or arms D, E, I, and cross bar G, substantially as and for the purpose set forth."

No. 26,134. W. H. RODGERS, of New York, N. Y., for an "Improvement in machines for inserting eyelets."

"I claim single punch B, operated as described, in combination with the connection lever A, cutter D, and yielding spring guide point F."

No. 26,135. WM. T. VOSE, of Newtonville, Mass., for an "Improved portable pump."

"I claim an improved pump as constructed, with a barrel and the foot stand, or rest, combined and arranged together, substantially as described."

No. 26,136. EDWARD WIEBÈ, of Brooklyn, N.Y., for a "Mode of advertising.'

"I claim the above described mode of exhibiting advertisements, when operated automatically, substantially in the manner set forth."

No. 26,137. JOSEPH A. WOODWARD, of Philadelphia, Pa., for an "Improved signal bell."

"I claim the lever escapement bar L, E, B, constructed substantially as described, with the elliptical slot and projecting point (x, x) in combination with the projecting point (x) of the hammer or striking arm (S, A), the whole arranged substantially as described, and for the purpose set forth."

No. 26,138. WM. WRIGHT, of Hartford, Conn., for an "Improvement in steam pumping engines."

"I claim, first, the application of the forked yoke, inclined arms and levers, in conjunction with an independent hydraulic cylinder or engine for working the valves of a steam engine properly, opening and closing them, and effecting the cut-off at the proper points, and performing all the offices and obtaining all the useful results of a well regulated and effective valve gearing. I also claim the combination of the forked frame and inclined arms, for controlling and regulating the length of stroke between certain points on the faces of said planes, and graduating it between these points, at the will and pleasure of the engineer, so as to reduce the clearance in the steam cylinder to a minimum. I also claim the manner in which the main valve of the hydraulic cylinder is brought into action at proper and fixed intervals, and working the steam valves of the engine, independently of the forked frame and its inclined arm, should the latter part of the gearing fail, from any cause, to assist in performing their duty. I also claim the application of the auxiliary valve, in combination with the main valve of the hydraulic cylinder, for effecting at the proper point the opening of the steam valves instantaneously and ahead of the steam piston, or, in other words, for giving the lead to the valve as effectually as an eccentric will on a crank engine, and forming a cushion for the piston at the end of the stroke, reversing the movement and holding the valves wide open until the cut-off is accomplished, substantially in the manner described. I also claim the mechanism for accomplishing positively the cut-off, and insuring the closing of the valves, and in connection therewith, the method of regulating and adjusting the same to any required point of the cut-off that the beneficial working of the engine may demand, as explained."

No. 26,139. WM. WRIGHT, of Hartford, Conn., for an "Improvement in pumps."

"I claim, first, the construction of the pump, by the application of an auxiliary barrel to the working or bucket barrel, and connecting both barrels by a double beat valve, thus effecting a combined opening through the auxiliary and the bucket valves, with a minimum lift of said valves greater than the area of the pump itself, and obviating to a great degree the frictional resistances that would be produced by passing all the water through the pump bucket valves alone, preventing all throttling, and permitting the engine to work more regularly and economically, substantially as described. I also claim the placing of one pump above the other, when made as above described, and connecting both together, and passing the load of one through the working and auxiliary barrels, and the bucket and auxiliary valves of the other, and vice versâ, thus allowing the engine to have complete control over the column of water, substantially as described."

No. 26,140. SAMUEL K. ZOOK, of New York, N.Y., for an "Improved mode of telegraphing."

"I claim the construction of telegraphic lines of metallic conductors of a high conducting power, having the portions of the wire conductors, which are between the two telegraphic extremes in the earth, or submerged in the ocean or rivers, not artificially insulated, but using the earth or water as the natural insulator of those parts, in combination with the artificially insulated portions of the wire on each or either side of the battery or batteries, in the manner and for the purposes described."

No. 26,141. CHARLES F. BENNETT, of Warehouse Point, Conn., assignor to Julius H. Baker, of East Windsor, Conn., for an "Improvement in machinery for drying cloth."

"I claim the extra adjusting vibratory arrangements, plate 2, Fig. 7, whereby the cloth can be spread and straightened on the selvage while passing over the rollers, in the manner substantially as herein set forth and described."

No. 26,142. JOHN BUTTER, of Buffalo, N.Y., assignor to James A. Saxton, of Canton, O., for an "Improvement in harvesters."

"I claim the combination of the shoe L, with hinged and adjusting rods c and N, plate M, and cap k, constructed, arranged, and operating in relation to each other and the main frame, as and for the purposes set forth."

No. 26,143. WM. DARKER, jr., of West Philadelphia, Pa., assignor to J. B. Thompson, of Philadelphia, Pa., for an "Improvement in tempering steel wire."

"I claim combining the drum D, by which the steel ribbon or wire is drawn through the fire and bath with the main or counter shaft, from which it derives motion by means of a pair of cone pulleys and belt, substantially as and for the purpose herein specified."

No. 26,144. JOHN H. DOOLITTLE, of Ansonia, Conn., assignor to Wallace and Sons, of same place, for an "Improvement in making clasps for hoop skirts."

"I claim manufacturing metal clasps for fastening the tapes on hoop skirts, and for similar or analogous purposes, by cutting the 'scraps' from the metal strips A, so that the 'blanks' b will be attached thereto, and while thus connected fed to the swaging or raising device, and swaged in proper form to produce the clasps, substantially as described."

No. 26,145. DARIUS WELLINGTON, of Boston, Mass., assignor to C. Wellington, of same place, for an "Improvement in cocks for waterclosets."

"I claim the employment or use of the valve b and plunger B, connected by the stem C, placed within a suitable cylinder A, and arranged relatively with the supply and discharge pipes D, E, to operate as and for the purpose set forth."

No. 26,146. LEWIS WHITE, of Hartford, Conn., assignor to himself and E. P. Miller, of same place, for an "Improved curtain fixture."

"I claim the application of the bracket and brake E, in combination with the pulley cord and pendant lever K, thus forming a double brake, in the manner substantially as herein set forth and described."

No. 26,147. WM. L. WILLIAMS, of New York, N.Y., assignor to himself and Thos. J. O'Connor, of same place, for a "Machine for bundling kindling wood."

"I claim, first, the follower c, acting to lift a bundle of wood through a ring or opening, and separate the same from the mass of split kindling wood in the trough (b), substantially as specified. Second, I claim the ring separator or the knife p, arranged substantially as set forth, and acting to split or separate from the mass of kindling wood a bundle, as described and shown. Third, I claim the combination of the follower c, and ring separator or knife p, in the manner and for the purposes set forth. Fourth, I claim two (or more) slides h, h, with curved ends acting against and on opposite sides of a bundle of kindling wood to compress the same previous to being secured by a wire or string, as and for the purposes specified. Fifth, I claim the compressing levers n, n, in combination with the slides h, h, to act in

compressing the bundle of wood, as set forth. Sixth, I claim the twisting jaws or pincers t, t^1, fitted to receive the wire, in the manner specified, so that the act of revolving said jaws to twist the wire shall first draw the wire tight, as set forth. Seventh, I claim the weight l, hung on the levers m, m, and acting to bring the ends of the wood level, as set forth."

No. 26,148. HENRY C. RICE, of Worcester, Mass., administrator of the estate of John H. Hathaway, deceased, late of Millbury, Mass., for an "Improvement in rotary engines."

"I claim the combination with the cross head, or its equivalent, which carries the abutment or cylinder F, of the rock shaft I, the toggle J, L, and the vibrating arm M, the whole applied and operating substantially as herein described, in combination with the guide arms H, for the purpose specified. And, in combination with the above mentioned rock shaft, I claim the arm K, slide N, lever P, and eccentric Q, applied substantially as herein described, to produce an intermittent or remittent motion of the said rock shaft, as herein set forth."

No. 26,149. THOS. W. GILMER, of Charlottsville, Va., administrator of John B. Gilmer, deceased, late of same place, for an "Improvement in type setters and distributors."

"I claim withdrawing the type from the type cases, and setting them in line in the composing stick, without the aid of intermediate carrying mechanism, but by the direct application of the composing stick to the type case, substantially as described. I claim distributing the type to the type cases, by the direct application of the distributing stick to said cases, substantially as described. I also claim, in combination with the type case, the holding dog, or its equivalent, arranged and operated, substantially as described, so as to retain the type as they descend opposite the mouth of the case, and release the type when the mouth of the composing stick is in position to receive them. I claim arranging the type case, substantially as described, so that by a retrograde movement of the case, the type are discharged into the composing stick, as described. And I claim, in combination with the composing stick, the spring mouth plate, to hold the type, as they enter the stick. In combination with the spring mouth plate, I claim the lip (l) or its equivalent, arranged substantially as described, to assist in withdrawing the type from the case, and to prevent their turning or falling out of the composing stick, as they are withdrawn from the case. I claim discharging the type into the case through the bottom of the distributing stick, substantially as described. And I also claim, in combination with the distributing stick, a separating and discharging mechanism to the type, arranged substantially as described, so as to separate the front type from the near, and force them into the type case."

RE-ISSUES.

CHARLES G. BLOOMER, of Wickford, R. I., for a "Rim for lockets."—Patented 28th April, 1857.—Re-issued 15th November, 1859.

"I claim a rim for lockets and similar metallic cases formed of sheet metal, in such manner that the face of the field piece within the case, and the exterior surface of the rim, are both formed from the same side or surface of the original sheet metal, and that the field piece and rim are of one piece of metal."

CHARLES G. BLOOMER, of Wickford, R. I., for a "Mode of constructing lockets."—Patented 28th April, 1857.—Re-issued 15th November, 1859.

"I claim the method of imparting the finished shape to case rims of sheet or thin metal, in which the external ring and field piece are one piece of metal, by means of dies, substantially as herein set forth."

MOSES S. BEACH, of Brooklyn, N.Y., for a "Machine for wetting and cutting paper for printing presses."—Patented 25th August, 1857.—Re-issued 15th November, 1859.

"I claim, 1st, the combination with the printing machine of the mechanism herein described, or its equivalent, so arranged as that the paper, as it passes along from the reel to be printed upon, shall be dampened, as set forth, 2nd, the combination with the cylinders C, D, or their equivalents, of the adjustable rollers E, F, or their equivalents, to supply the moisture for the paper, and also to regulate the quantity of that moisture, as set forth. 3rd, the combination with the printing machine of the moisture vessels G, H, or their equivalents, as set forth. 4th, the combination of the cutting knife, with the dampening roll or cylinder, or its equivalent, as set forth. 5th, simultaneously wetting or moistening both sides of the paper, in the manner substantially as described. 6th, leaving the paper dry at the point or line of cutting, substantially as described. 7th, the employment of spring pressure to project the knife, in the manner substantially as herein shown and described. 8th, retiring the knife within circumference of the cylinder by means of the cams R, or their equivalents, as set forth. 9th, catching the knife when retired within the circumference of the cylinder C, retaining it while so retired, and releasing for the operation of cutting by means of the catches e, f, the springs j, and the tripping pins I, or their equivalents, in the manner substantially as described. 10th, the employment of cylinders C, D, or their equivalents, to draw the paper from the reel, to be afterwards cut into sheets, and fed into the printing machine, as set forth. 11th, Breaking or tearing asunder any fibres of paper left uncut by the knife, by the grasp of the cylinder M and roller Q, or their equivalents, as set forth. 12th, giving the conducting or guide tapes K, or their equivalents, a speed greater than that of the paper, as set forth. 13th, the combination of the feeding mechanism, cutting apparatus, and the printing machine, or their equivalents, in the said combination, for feeding the paper from a roll to a printing machine, and cutting or partially cutting it into sheets as it passes along to be printed, as set forth."

THOMAS BLANCHARD, of Boston, Mass., for an "Improvement in bending wood."—Patented 18th December, 1849.—Re-issued 15th November, 1859.

"I claim my improved method of bending wood, substantially as herein-before described."

DESIGN.

HARRISON GROSH, of Liriz, Warwick Township, Pa., for a "Design for carriage bodies."

"I claim the design consisting of the grooved seat B, with the round corners, to ornament the seat of a carriage or buggy body."

ADDITIONAL IMPROVEMENT.

WILLIAM C. ALLISON, of Philadelphia, Pa., assignor to himself and Jno. Murphy, of said Philadelphia, Pa., for an "Apparatus for watering and sweeping railways."—Patented 6th September, 1859.—Additional Improvement dated 15th November, 1859.

"I claim combining a fireplace and flues, or other equivalent heating apparatus, with the water-tank L, for the the purpose specified."

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in he Colonies; contained in Communications from he Gover nors, &c. of the different British Colonies n answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol, II. Index.) Price 21*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET. Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated 16th March* 1744.) Price

---

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 618. TUESDAY, DECEMBER 6, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1722. JOHN BATKIN WHITEHALL, of the town and county of the town of Nottingham, Engineer, and SAMUEL WHEATCROFT, of the New North Road, county of Middlesex, Engineer, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "Improvements in the construction of certain parts of the apparatus or machinery made use of for manufacturing bonnet and cap fronts rouches and such like articles of millinery."

As set forth in their petition, recorded in the said office on the 23rd day of July, 1859.

1729. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in dyeing yarns, threads, or woven fabrics of wool, silk, cotton, linen, or other fibrous or filamentous material."—A communication from abroad by François Xavier Hurstel, of Paris, Woo Comber.

1732. And CHARLES FRÉDERIC VASSEROT, of 45, Essex Street, Strand, London, Patent Agent, has given the like notice in respect of the invention of "Preventing and removing incrustations in steam boilers."—A communication from Jean Claude Chavanne, residing in Lyons, in the empire of France.

As set forth in their respective petitions, both recorded in the said office on the 25th day of July, 1859.

1734. And WILLIAM HENRY BUCKLAND, of Maesteg Iron Works, in the county of Glamorgan, Iron Master, has given the like notice in respect of the invention of "An improved preparation of peat."

1736. And PHILO D. MICKLES, of Syracuse, State of New York, United States of America, has given the like notice in respect of the invention of "An improved spring for railroad and other carriages, and for other uses and applications where springs are required."—A communication from Danforth Johnson, a person resident at Chicago, state of Illinois, U. S. A.

1739. And DEIDAMIA B. HALE, of the city and state of New York, in the United States of America, has given the like notice in respect of the invention of "A new and useful garment for ladies' wear, being a combined dress, waist, or body, and a skirt supporter and bustle."—Partly a communication from Albert W. Hale, of New York, aforesaid.

As set forth in their respective petitions, recorded in the said office on the 26th day of July, 1859.

1744. And JOHN SCOFFERN, of No. 4, Barnard's Inn, in the county of Middlesex, Bachelor of Medicine, has given the like notice in respect of the invention of "Improvements in waterproofing, cementing, and stiffening fabrics and fibrous materials, and also in dyeing fabrics and fibrous materials."

As set forth in his petition, recorded in the said office on the 27th day of July, 1859.

1750. And WILLIAM KENT, of Paternoster Row, in the city of London, has given the like notice in respect of the invention of "A self-acting fan."

1752. And JOHN ASPINALL, of Charing Cross, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in evaporating, and in apparatus for the same, especially applicable to the evaporation of sugar."

1755. And JOHN JACKSON, of Church Street, Spitalfields, in the county of Middlesex, Pen Manufacturer, has given the like notice in respect of the invention of "Improvement in metal pens."

As set forth in their respective petitions, all recorded in the said office on the 28th day of July, 1859.

1761. And POLYNICE AUGUSTE VIETTE, of No. 25, Faubourg de Shaerbeck, near Brussels, a Major

in the service of His Majesty the King of the Belgians, has given the like notice in respect of the invention of "Improvements in engraving on metal, or on other substances decomposable by acids or corrosive salts."

As set forth in his petition, recorded in the said office on the 29th day of July, 1859.

1766. And François Haeck, of Schaerbeck, near Brussels, in the kingdom of Belgium, Gentleman, has given the like notice in respect of the invention of "Improvements in refrigerating apparatus, especially adapted to pumps, or other apparatus for the supply of beer and other liquids."

As set forth in his petition, recorded in the said office on the 30th day of July, 1859.

1782. And Eugene de Bassano, of Brussels, in the kingdom of Belgium, has given the like notice in respect of the invention of "Improvements in the manufacture of artificial fuel, commonly called patent fuel."

As set forth in his petition, recorded in the said office on the 1st day of August, 1859.

1784. And Henry Fletcher, of Swan Court, Manchester, in the county of Lancaster, Engraver, has given the like notice in respect of the invention of "Certain improvements in sewing and embroidering machinery."

As set forth in his petition, recorded in the said office on the 2nd day of August, 1859.

1787. And Auguste Pin, of Castelnaudary, in the department of the Aude, in France, has given the like notice in respect of the invention of "The compounding, preparing, and application of a new sort of paint."

1788. And John Hewett, of the firm of Hewett, Allott, and Walker, Accountants, of High Street, Sheffield, in the county of York, has given the like notice in respect of the invention of "Improvements in self-acting waterclosets."

As set forth in their respective petitions, both recorded in the said office on the 3rd day of August, 1859.

1798. And James Horton, of Handsworth, in the county of Stafford, Brewer, has given the like notice in respect of the invention of "A new or improved water gauge for steam boilers."

As set forth in his petition, recorded in the said office on the 4th day of August, 1859.

1824. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improved means of preventing incrustations in steam boilers."—A communication from abroad by Louis Serbat, of Saint Saulve, France.

As set forth in his petition, recorded in the said office on the 8th day of August, 1859.

1851. And William King Westly, of Leeds, in the county of York, Machinist, has given the like notice in respect of the invention of "Improved machinery for combining, heckling, and preparing to be spun, flax and other fibrous substances."

As set forth in his petition, recorded in the said office on the 10th day of August, 1859.

1862. And William Clark, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Certain improvements in oscillating engines."—A communication from abroad by Messrs. Mark Runkel, of New York City, and Frederick Franch, of San Francisco, in the state of California.

As set forth in his petition, recorded in the said office on the 12th day of August, 1859.

1882. And Charles Glassborow, of Girard Avenue, Philadelphia, in the United States of America, Piano Manufacturer, has given the like notice in respect of the invention of "Improvements in pianos."

As set forth in his petition, recorded in the said Office on the 15th day of August, 1859.

1932. And George Riley, of Elm Tree Lodge, South Lambeth, in the county of Surry, has given the like notice in respect of the invention of "Improvements on helical refrigerators for cooling brewers' and distillers' worts."

As set forth in his petition, recorded in the said office on the 24th day of August, 1859.

1976. And Henry Hutton, of Palace Road, Lambeth, in the county of Surrey, has given the like notice in respect of the invention of "An improved lubricator."

As set forth in his petition, recorded in the said office on the 30th day of August, 1859.

1984. And James Mackenzie, of St. Martin's-le-Grand, in the county of Middlesex, and Stephen Thomas Wentworth, of the same place, Gas Engineers, have given the like notice in respect of the invention of "Improvements in breech loading fire arms."

As set forth in their petition, recorded in the said office on the 31st day of August, 1859.

2165. And Alphonse René Le Mire Normandy, of 67, Judd Street, Brunswick Square, London, Analytical Chemist, has given the like notice in respect of the invention of "Improvements in the application of steam for cooking food."

As set forth in his petition, recorded in the said office on the 24th day of September, 1859.

2208. And Alexander William Williamson, of University College, and Loftus Perkins, of Francis Street, Gray's Inn Road, Civil Engineer, have given the like notice in respect of the invention of "Improvements in steam boilers."

As set forth in their petition, recorded in the said office on the 29th day of September, 1859.

2336. And William Burgess, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Implement Makers, has given the like notice in respect of the invention of "Improvements in reaping and mowing machines."

2338. And Thomas Vicars, senior, Thomas Vicars, junior, and Thomas Ashmore, Engineers, and James Smith, Baker, all of Liverpool, in the county palatine of Lancaster, have given the like notice in respect of the invention of "Improvements in the manufacture of bread, biscuits, and like articles, and in the machinery and apparatus connected therewith."

As set forth in their respective petitions, both recorded in the said office on the 13th day of October, 1859.

2352. And James Fernihough, of Dukinfield, in the county of Chester, Engineer, has given the like notice in respect of the invention of "Improvements in the construction of steam boilers and apparatus connected therewith."

2359. And Robert Smith, of Islington, in the borough of Finsbury, Shipowner, has given the

like notice in respect of the invention of "Purification of water and other fluids."
As set forth in their respective petitions, both recorded in the said office on the 15th day of October, 1859.

2398. And RICHARD HOBSON, of Leeds, in the county of York, Doctor of Medicine, has given the like notice in respect of the invention of "Improvements in producing ornamental devices in glass or other transparent substances for decorative or other purposes."
As set forth in his petition, recorded in the said office on the 19th day of October, 1859.

2524. And GEORGE TOMLINSON BOUSFIELD, of Loughborough Park, Brixton, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in machinery for grinding and polishing sheets of plate and other glass."—A communication from abroad by J. J. Greenough of Wall Street, New York.
As set forth in his petition, recorded in the said office on the 5th day of November, 1859.

2539. And CHARLES GREEN, of Birmingham, has given the like notice in respect of the invention of "Improvements in the manufacture of tubes suitable for locomotive and other steam boilers."
As set forth in his petition, recorded in the said office on the 8th day of November, 1859.

2568. And WILLIAM BURGESS, of the firm of Burgess and Key, of Newgate Street, in the city of London, Agricultural Implement Makers, has given the like notice in respect of the invention of "An improvement in mowing and reaping machines."
As set forth in his petition, recorded in the said office on the 12th day of November, 1859.

2576. And AUGUSTUS APPLEGATH of Dartford, in the county of Kent, Engineer, has given the like notice in respect of the invention of "Improvements in surface block printing."
As set forth in his petition, recorded in the said office on the 14th day of November, 1859.

2599. And ROBERT WHITE, of Edinburgh, in the county of Mid Lothian, North Britain, Writer to the Signet, has given the like notice in respect of the invention of "Improvements in shirts."

2601. And GEORGE TAYLOR, of the firm of Taylor Brothers and Company, of Clarence Iron Works, Leeds, in the county of York, Iron Master, has given the like notice in respect of the invention of "An improvement in the mode of manufacturing wrought iron crank axles."
As set forth in their respective petitions, both recorded in the said office on the 16th day of November, 1859.

2621. And JOHN BANCROFT, of Halifax, in the county of York, has given the like notice in respect of the invention of "Improvements in the manufacture of fabrics adapted to be used for curtains, coverings of furniture, table covers, and such like uses."

2627. And GEORGE LAIDLAW, of Glasgow, in the county of Lanark, North Britain, Hat Manufacturer, has given the like notice in respect of the invention of "Improvements in hats, and other coverings for the head."
As set forth in their respective petitions, both recorded in the said office on the 19th day of November, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

6th December, 1859.

1395. CHARLES DE BERGUE, of No. 9, Dowgate Hill, in the city of London, Engineer, for an invention of "Improvements in machinery for punching and shearing metal."—Partly a communication from abroad by Michael de Bergue, of Barcelona, in the kingdom of Spain.—Dated 8th June, 1859.

1396. JOSEPH BENNETT HOWELL, of Sheffield, in the county of York, Steel Manufacturer, JOHN HICK, of Great Bolton, in the county of Lancaster, Ironfounder, and WILLIAM HARGREAVES, of the same place, Ironfounder, for an invention of "Improvements in apparatus for applying heat to steam or other boilers or vessels, and for facilitating the combustion of gases and smoke."—Dated 8th June, 1859.

1408. GEORGE JAMES FARMER, of Hampton Street, Birmingham, in the county of Warwick, Machinist, and GEORGE BRIGGS HARDY, of Alexander Place, Brompton, in the county of Middlesex, Chemist, for an invention of "Improvements in stair rods and eyes, or sockets which are also applicable for other purposes."—Dated 10th June, 1859.

1413. MOSES HAYM PICCIOTTO, of Finsbury Circus, in the city of London, Merchant, for an invention of "Improvements in apparatus for producing or obtaining motive power."—Dated 10th June, 1859.

1423. HENRY LEE CORLETT, of Inchicore, in the county of Dublin, Engineer, for an invention of "Improvements in rails and the permanent way of railways, parts of such improvements being applicable to common roads."—Dated 13th June, 1859.

1447. CHARLES HENRY WARING, of Neath Abbey, in the county of Glamorgan, Mining Engineer, for an invention of "Improvements in safety lamps."—Dated 16th June, 1859.

1465. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improved means for assorting substances of different specific gravities."—A communication from abroad by Désiré Marchal, of Brussels."—Dated 17th June, 1859.

1504. WILLIAM RUSSELL, of the borough of Leicester, in the county of Leicester, Ironmonger, for an invention of "Improvements in wheels for ploughs, cultivators, and other implements or carriages."——Dated 22nd June, 1859.

1507. MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "Improvements in machinery for the manufacture of bolts and rivets."—A communication from I. L. Vergniais, residing in Paris.—Dated 23rd June, 1859.

1514. HENRY DOULTON, of Lambeth, for an invention of "Improvements in earthenware jars and bottles."—Dated 23rd June, 1859.

1517. James Mills, of Heaton Norris, in the county of Lancaster Machinist, for an invention of "Improvements in the manufacture of keys and gibs, and in the machinery employed therein."—Dated 24th June, 1859.

1518. Auguste Chesneau, of 29, Boulevart St. Martin, Paris, in the empire of France, Merchant, for an invention of "Improvements in paddle-wheels."—Dated 24th June, 1859.

1531. William Coppin, of Strand Foundry, Londonderry, Marine Architect and Engineer, for an invention of "Improvements in apparatus for raising sunken and stranded vessels and their cargoes, and for raising and lowering other bodies into and out of the water, part of which improvements are applicable to raising weights generally."—Dated 25th June, 1859.

1535. Bethel Burton, of Brooklyn, in the state of New York, United States of America, for an invention of "Improvements in breech-loading fire-arms."—Dated 27th June, 1859.

1550. George Chapman, of Rutland Street, Leicester, for an invention of "Improvements in knitting machines."—Dated 29th June, 1859.

1583. Charles Hanson Greville Williams, of 39, Regent Square, Gray's Inn Road, in the county of Middlesex, for an invention of "Improvements in dyeing fabrics and yarns."—Dated 2nd July, 1859.

1699. Frederick Collier Bakewell, of No. 6, Haverstock Terrace, Hampstead, in the county of Middlesex, for an invention of "Improvements in extracting oils from coal and other minerals."—A communication from abroad by David Alter and Samuel A. Hill, of Pittsburgh, in the United States, North America.—Dated 19th July, 1859.

2038. Edward Robert Dann and Edward Goldschmidt, both of Nottingham, for an invention of "Improvements in the manufacture of bonnet fronts or lappets."—Dated 7th September, 1859.

2112. Joseph Beck, of the firm of Smith, Beck, and Beck, of Coleman Street, in the city of London, for an invention of "Improvements in stereoscopes."—Dated16th September, 1859.

2276. Enoch Oldfield Tindall, of Scarborough, in the county of York, Engineer, for an invention of "Improvements in machinery or apparatus for crushing or reducing grain seeds and other substances."—Dated 6th October, 1859.

2278. Alexander Mackenzie Ferry, of Edinburgh, in the county of Mid Lothian, North Britain, Merchant, for an invention of "Improvements in the manufacture or production of oil, and in lamps for burning the same."—Dated 6th October, 1859.

2309. John Earl, of Melbourne, in the county of Derby, Railway Contractor, for an invention of "Improvements in arranging and applying harness to the draft of carriages."—Dated 11th October, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 2nd December*, 1859, *inclusive.*)

1st December.

2874. James Apperly, Cloth Manufacturer, and William Clissold, Engineer, both of Dudbridge, in the county of Gloucester, for an invention of "Improved machinery for preparing fibrous substances for spinning."—Dated 4th December, 1856.

2nd December.

2866. Thomas Crabtree, of Halifax, in the county of York, Machine Maker, for an invention of "Improvements in card-setting machines, and in certain machinery or apparatus employed in the construction thereof, which apparatus is also applicable to similar purposes."—Dated 3rd December, 1856.

2869. Julien Denis, of 14, Queenhithe, in the city of London, for an invention of "Improvements in apparatus for corking and uncorking bottles, without leaving any air between the liquid and the cork."—A communication.—Dated 3rd December, 1856.

2878. Ebenezer Daggett Draper, and George Draper, of the state of Massachusetts, of the United States of America, for an invention of "Certain new and useful improvements in oil feeders, vessels, or cans, for oiling machinery."—Partly a communication.—Dated 4th December, 1856.

2882. Auguste Edouard Loradoux Bellford, of 10, Bedford Street, Strand, London, for an invention for "Improvements in drying, burning, and cooling bricks, tiles, and other ceramic substances."—A communication.—Dated 4th December, 1856.

2884. David Crawford, of Glasgow, in the county of Lanark, North Britain, Manager, for an invention of "Improvements in washing, cleansing, and preparing textile fabrics and materials."—Dated 4th December, 1856.

2896. Christian Schiele, of Oldham, in the county of Lancaster, Engineer, for an invention of "Certain improvements in machinery or apparatus for cutting nuts, screws, or bolts, and toothed wheels."—Dated 6th December, 1856.

2898. John Longbottom, of Leeds, in the county of York, Engineer, for an invention of "Improvements in generating, surcharging, or superheating steam."—Dated 6th December, 1856.

2940. William Lund, of Fleet Street, in the city of London, Manufacturer, for an invention of "An improved 'spring clip' for holding or retaining loose papers or other loose articles."—Dated 11th December, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 2nd December*, 1859, *inclusive.*)

1st December.

936. John Norton, of Cork, in the county of Cork, Esquire, for an invention of "Improvements in shot or projectiles."—Dated 2nd December, 1852.

2nd December.

983. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of Glasgow, North Britain, Gentleman, for an invention of "Improvements in weaving carpets and other fabrics, and in the machinery or apparatus employed therein."—A communication.—Dated 7th December, 1852.

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1859.

(*Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.*)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

40,738. BENGEL, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Using and applying aluminium in the manufacture of gas-burners and other articles used for lighting and combustion."—Dated 23rd April, 1859.

40,740. CHARBONNEL, of 42, Rue au Maire, Paris, for "Night lamps which may be used for warming liquids."—Dated 23rd April, 1859.

40,743. CLÉRET, of 196, Rue Normandie, Havre, for "A steam regenerator."—Dated 30th April, 1859.

40,745. GARDE, of 4, Rue de l'Abbaye, Paris, for "Machines and other improvements for building in pise, and by means of lithogenic brickwork, as patented 8th June, 1858."—Dated 23rd April, 1859.

40,746. GIESENDORFF, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction of arm-chairs, chairs, &c."—Dated 23rd April, 1859.

40,748. GRAVIER, of Valenciennes, département du Nord, for "A kind of axles."—Dated 6th May, 1859.

40,749. GRENIER, DERAMERU and Co., represented by Ruchet, of 58 bis, Rue de la Chaussée, d'Antin, Paris, for "Improvements in obtaining and manufacturing grits of oats."—Dated 26th April, 1859.

40,750. HIFFELSHEIM, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Substances and means for obtaining a pulp for parchment paper or animal paper."—Dated 23rd April, 1859.

40,751. JOURNET and CONVERS, of 20, Route d'Asnières, Batignolles, for "Musical carriages."—Dated 23rd April, 1859.

For the French Patent Law see No. 228 of this Journal.

40,752. KERSHAW and SILTZER and Co., represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Improvements in means and apparatus for weaving."—Dated 24th April, 1859.—(English Patent, 2nd March, 1859.)

40,753. LAFON, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of raised letters."—Dated 23rd April, 1859.

40,754. LEROY, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in lace-work mixed with all kinds of wood, and being chiefly applicable to ornamenting hangings in general."—Dated 23rd April, 1859.

40,755. LOIR, of 64, Rue Lafayette, Paris, for "A bath called continuous shower bath."—Dated 23rd April, 1859.

40,757. LUND, represented by Perpigna, of 42, Rue Neuve, Saint Augustin, Paris, for "Improvements in the manufacture of stuffs or fabrics for umbrellas and parasols."—Dated 22nd April, 1859.—(English Patent, 22nd February, 1859.)

40,759. MAUPRIVEZ, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "A so-called 'manifold machine for breaking sugar.'"—Dated 23rd April, 1859.

40,761. PENDRIÉ, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A kind of spring petticoat, called 'Universal petticoat.'"—Dated 23rd April, 1859.

40,762. POLINO, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A kind of bedstead."—Dated 23rd April, 1859.

40,763. PRADINE and Co., represented by Dauphinot, of 9, Rue du Cloître, Reims, for "A mechanism for winding-off warps in looms."—Dated 4th May, 1859.

40,764. REGNAUT, of 398, Rue St. Honoré, Paris, for "Improvements in perfumery, or apparatus called mechanical perfumery."—Dated 23rd April, 1859.

40,766. TÉTARD, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of watch keys."—Dated 23rd April, 1859.

40,767. VEILLON and CHALMETTON, of Alais, département du Gard, for "A system of axles applicable to all carriages, and especially to the waggons used in mines."—Dated 5th May, 1859.

40,768. WILD, of 41, Rue St. Nicolas, Nancy, for "Improvements in the manufacture of so-called 'Brasilian straw hats.'"—Dated 5th May, 1859.

40,769. ARCHEREAU and COUILLARD, represented by Pocholle, of 16, Rue Neuve, St. Eustache, Paris, for "A mode of washing coals, coke, and other fuel, &c."—Dated 27th April, 1859.

40,770. BAUER, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A mechanism for making paste and pastry."—Dated 27th April, 1859.

40,771. BECKER and OTTO, of 79, Rue du Temple, Paris, for "A kind of cigar boxes."—Dated 29th April, 1859.

40,772. BOURET and FERRÉ, of 11, Rue du Perche, Paris, for "A kind of bezels for articles of jewelry."—Dated 28th April, 1859.

40,773. Bourgeois, of 38, Rue de la Bienfaisance, Paris, for "Substituting water for steam as a motive-power in piston engines." — Dated 28th April, 1859.

40,774. Boutet, of 39, Boulevart du Temple, Paris, for "A system of ladies' pages."—Dated 26th April, 1859.

40,775. Charnier, of 40, Rue d'Enghien, Paris, for "A mode of preserving fresh sardines."—Dated 27th April, 1859.

40,776. Chevalier and Champeaux, of 52, Rue St. Denis, Belleville, for "A kind of salt, called 'azotate' resembling silver, being a substitute for azotate of silver in photography."—Dated 27th April, 1859.

40,777. Collyer and Gaupillat, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Machines for bruising, crushing, and pulverizing substances, said machines being chiefly applicable to preparing straw and other substances for the manufacture of paper."—Dated 26th April, 1859. —(English Patent, 2nd March, 1859.)

40,778. Crossdale, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the manufacture of boots and shoes."—Dated 26th April, 1859.—(English Patent.)—Dated 12th April, 1859.

40,779. Darlu, of 1, Rue Louis-le-Grand, Paris, for "An electro-motor."—Dated 27th April, 1859.

40,780. D'Hertmanni and Christophe, represented by Ricordeau, of 23, Boulevard de Strasbourg, Paris, for "Lever closets for vessels and private houses."—Dated 27th April, 1859.

40,781. Dubos, of Beauvais, département de l'Oise, for "Jointed knee-caps for horses."—Dated 5th May, 1859.

40,782. François Vaillant, of 30, Rue des Jardins, Metz, for "Economical kitchen-ranges, called 'field kitchen ranges.'"—Dated 4th May, 1859.

40,783. Gaupillat, Illig, and Gaupillat, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in cartridges for breech-loading fire-arms." — Dated 26th April, 1859.

40,784. Gérard, of 9, Rue Geoffroy-l'Angevin, Paris, for "A so-called 'mechanical spindle for making lace work.'"—Dated 26th April, 1859.

40,785. Guido-Schultze, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Tubular heating apparatus."—Dated 27th April, 1859.

40,786. Henri Depoilly and Son, of 64, Rue du Château d'Eau, Paris, for "Improvements in locks."—Dated 28th April, 1859.

40,787. Henri Depoilly and Son, of 64, Rue du Château d'Eau, Paris, for "Improvements in locks."—Dated 28th April, 1859.

40,788. Hubert, domiciled with Armengaud, of 45, Rue St. Sébastien, Paris, for "Improvements in sizing the warps of woollen, cotton, and other tissues."—Dated 27th April, 1859.

40,789. Jigaroff, of 18, Chaussée Ménilmontant Belleville, for "A sewing machine, worked by means of a keyboard."—Dated 29th April, 1859.

40,790. Langenard, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A machine for making metal buttons."—Dated 27th April, 1859.

40,791. Lapène, of 9, Place de l'Arsenal, Paris, for "Substituting the expansive power of gas for steam power."—Dated 26th April, 1859.

40,792. Lavater, represented by Halff, of 8 and 10, Passage du Saumon, Paris, for "Improvements in surgical instruments and toys of india-rubber."—Dated 26th April, 1859.

40,793. Lebrun, of 12, Rue Croix-des-Petits-Champs, Paris, for "Apparatus and processes for building houses by means of small materials."—Dated 28th April, 1859.

40,794. L'Enfant, of 78, Rue St. Jean, Caen, for "A hairy tissue, called 'Caen point.'"—Dated 7th May, 1859.

40,795. Marix, of 146, Rue Montmartre, Paris, for "A musical instrument."— Dated 29th April, 1859.

40,796. Péan de Saint-Gilles, of 8, Place de la Concorde, Paris, for "A mode of treating the residue of zinc works and other substances containing zinc, for the purpose of obtaining chloride of zinc therefrom."—Dated 26th April, 1859.

40,797. Prat, of Pernes, département de la Vaucluse, for "A sowing machine with a regulator."—Dated 5th May, 1859.

40,798. Salomon, of 46, Rue Bourbon-Villeneuve, Paris, for "An economical system of lighting by means of oleaginous essences with a base of rosin-oil, applicable to smoke-consuming lamps with a steady level and to moderator lamps."—Dated 27th April, 1859.

40,799. Sauton, Son, of 10, Rue de la Monnaie, Paris, for "Improvements in gloves."—Dated 28th April, 1859.

40,800. Teissère and Guillois, of 66, Rue Villiers Neuilly, for "Improvements in the manufacture and sale of gaseous liquids."—Dated 26th April, 1859.

40,801. Bastard-Lanoy, represented by Blanchet, of Beauvais, département de l'Oise, for "Applying sculptured work to the plumes of fans."—Dated 2nd April, 1859.

40,802. Bayle, of 32, Rue Notre Dame, Bordeaux, for "An instrument for putting bottoms to boxes for preserved food."—Dated 9th May, 1859.

40,803. Boulenger, of Rue Stanislas Girardin, Rouen, for "Whalebone petticoats, called 'Milanese petticoats.'"—Dated 11th May, 1859.

40,804. Brichet, of 20, Rue de la Fosse, Nantes, for "A system of single or double guns, especially breech-loading guns, opened by means of the trigger-guard."—Dated 6th May, 1859.

40,805. Cadet, of Chalô St. Mars, département de Seine et Oise, for "A machine for crushing and sieving plaster."—Dated 6th May, 1859.

40,806. Chassaignon-Dominget, of Rue St. Jean, Lyon, for "A means of preventing gold and silver embroideries from being torn."—Dated 5th May, 1859.

40,807. Coste, Father, of Saint Laurent de Cerdans, département des Pyrenées Orientales, for "A kind

of foot coverings, called 'Roussillon vegetable foot coverings.'"—Dated 9th May, 1859.

40,808. Dayre-Nieto, of 8, Rue Cacault, Nantes, for "Folding lever-scales with cases."—Dated 6th May, 1859.

40,809. Franck, of Saint Dié, département des Vosges, for "A vertical weaving machine."—Dated 13th April, 1859.

40,810. Gasquet and Bardou, of Castres, département du Tarn, for "A husking machine."—Dated 9th May, 1859.

40,811. Gaubert, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of fire-arms."—Dated 30th April, 1859.

40,812. Grangier and Guinas, of Sorgues, département de la Vaucluse, for "Using the waste heat of gas works for the manufacture of lime."—Dated 6th May, 1859.

40,813. Jacquet-Robillard, of Arras, for "A kind of sowing machine."—Dated 9th May, 1859.

40,814. Jones, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in sewing machines."—Dated 30th April, 1859.—(English Patent, 15th February, 1859.)

40,815. Keller and Rouy, of 29, Rue Phélippeaux, Paris, for "A system of clasps."—Dated 30th April, 1859.

40,816. Latrille, of Pau, for "A system of impervious tents and cloaks for soldiers."—Dated 7th May, 1859.

40,817. Lecointe, of Saint Quentin, for "A tubular generator with circulating fire for fixed and moveable engines."—Dated 7th May, 1859.

40,818. Lobstein, of 11, Quai des Bateliers, Strasbourg, for "A rocking plane with a double action."—Dated 2nd May, 1859.

40,819. Macintosch and Rhodes, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in tents and other similar covers for protecting persons from bad weather."—Dated 29th April, 1859.

40,820. Magois, domiciled of Rue Notre Dame des Victoires, Paris, for "A system of aerial vessels worked by means of a screw."—Dated 30th April, 1859.

40,821. Meillard, domiciled of Lyon, for "A mechanism applicable to organs and harmoniums, called 'Melophoniums.'"—Dated 2nd May, 1859.

40,822. Oppermann, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Studs with a moveable under-plate for ruffles and other purposes."

40,823. Peyret, Gerin, and Co., of 9, Rue Brossard St. Etienne, département de la Loire, for "Using printed wefts in ribbons or stuffs for the purpose of obtaining designs, &c."—Dated 7th May, 1859.

40,824. Randu and Fillion, of Rue des Martyrs, Lyon, for "A distilling apparatus."—Dated 6th May, 1859.

40,825. Repelin, of Saint Marcellin, département de l'Isère, for "An expeditious mode of tanning."—Dated 6th May, 1859.

40,826. Rivoire and Guelin, of Brignais, département du Rhône, for "Felt hats with seamless rims and hat-bands."—Dated 6th May, 1859.

40,827. Roussat, of Ludesse, département du Puy-de-Dôme, for "A system of tumbrels."—Dated 19th April, 1859.

40,828. Russery and Lacombe, of Rive de Gier, département de la Loire, for "Cranked axles for the navy and railways."—Dated 11th May, 1859.

40,829. Schiettinger, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for bruising and crushing oats for obtaining malt for brewing."—Dated 30th April, 1859.

40,830. Tavelet, sen., of Montivilliers, département de la Seine Inférieure, for "A mechanism or system of journals with pivots of revolving axles used for transmitting the power of hydraulic motors."—Dated 10th May, 1859.

40,831. Tourenc, domiciled of 75, Rue de Paris, Clichy la Garenne, for "Ventilating shafts of mines."—Dated 30th April, 1859.

40,832. Vincent, of Senlis, département de l'Oise, for "A pump."—Dated 6th May, 1859.

40,833. Aubenas, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Vegetable tooth powder."—Dated 16th April, 1859.

40,834. Bailey, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Apparatus for heating razors."—Dated 30th April, 1859.—(English Patent, 19th November, 1859.)

40,835. Bès, represented by Amouroux, of 333, Rue Saint Martin, Paris, for "A means of skidding carriages."—Dated 4th May, 1859.

40,836. Bourdin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A rational method of applying steam to cooking and preserving food."—Dated 30th April, 1859.

40,837. Chaumont, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A mode of fastening Venetian blinds, being applicable to various objects."—Dated 5th May, 1859.

40,838. Chéradame, of 47, Rue Rochechouart, Paris, for "A salvage log."—Dated 4th May, 1859.

40,839. Choiselle, of 201, Rue du Faubourg Saint Martin, Paris, for "Ribbed pots for obtaining animal charcoal."—Dated 5th May, 1859.

40,840. Collaze and Leroux, the former of 125, Faubourg du Temple, the latter of 35, Rue des Bons Enfants, Paris, for "An entry book for keeping commercial accounts."—Dated 28th April, 1859.

40,841. Gusinberche jun., of 6, Rue Barbette, Paris, for "Ornamenting candles."—Dated 2nd May, 1859.

40,842. Delavier, of 19, Rue de Dunkerque, Paris, for "A combined coffee and tea-pot."—Dated 2nd May, 1859.

40,843. Dufay, of cité Bergère, Paris, for "A system of traps."—Dated 4th May, 1859.

40,844. Dusterwald, represented by d'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Economical washing troughs."—Dated 3rd May, 1859.

40,845. Duval and Joviaux, of Saint Denis, for "Manufacturing and purifying gas."—Dated 4th May, 1859.

40,846. Duvergier, of St. Jullien-en-Jarret, département de la Loire, for "A peculiar arrangement of slides and steam pipes for horizontal cylinders of steam engines."—Dated 12th May, 1859.

40,847. Garin, father and his two sons, of la Vallée-aux-Blés, département de l'Aisne, for "A screw sieve."—Dated 11th May, 1859.

40,848. Gauthier, of 31, Rue Basse, Passy, for "A system of towing."—Dated 2nd May, 1859.

40,849. Hammar, represented by Le Blanc, of 2, Rue Sainte Appoline, Paris, for "A kind of gas burners."—Dated 30th April, 1859.

40,850. Jonas, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A multiple or moveable petticoat."—Dated 4th May, 1859.

40,851. Juge, of Crest, département du Drôme, for "A mode of conveying single persons."—Dated 10th May, 1859.

40,852. Laboureix, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A lever railway break for preventing railway accidents."—Dated 4th May, 1859.

40,853. Lamy, of Clermont Ferrand, département du Puy de Dôme, for "A rotary and differential steam pump."—Dated 2nd May, 1859.

40,854. Liézard, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A rolling-mill for drawing lead for windows."—Dated 30th April, 1859.

40,855. Marcoux, of 71, Rue du Ruisseau, Montmartre, for "A motor worked by means of the weight of water."—Dated 30th April, 1859.

40,856. Merlat, of St. Etienne, section of Valbenoîte, département de la Loire, for "An apparatus for softening silk and other textile substances."—Dated 12th May, 1859.

40,857. Meunier, represented by d'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "A system of typographic and lithographic composition."—Dated 3rd May, 1859.

40,858. Mollard and Bouissou, of 96, Rue de Clichy, Paris, for "Cocks with sectors."—Dated 4th May, 1859.

40,859. Ogier, of 8, Rue de Valois Palais Royal, Paris, for "Trowsers."—Dated 2nd May, 1859.

40,861. Pelissier, domiciled at Blois, département de Loir et Cher, for "A mode of acierating cranked rails for crossings of railways."—Dated 7th May, 1859.

40,862. Penrice, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in machines for boring tunnels and shafts in rocks, &c."—Dated 4th May, 1859.—(English Patent, 6th November, 1858.)

40,863. Pissot, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Manufacture of church and fancy pictures."—Dated 30th April, 1859.

40,864. Rémond, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of steam engines."—Dated 4th May, 1859.

40,865. Rider, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of hats."—Dated 3rd May, 1859.—(English Patent, 18th November, 1858.)

40,866. Barré, of Gémozac, département de la Charente Inférieure, for "Improvements in tubular motors of steam engines."—Dated 12th May, 1859.

40,867. Baudit, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of braces."—Dated 5th May, 1859.

40,868. Belleville, of 9, Rue Villedo, Paris, for "An inexplosive generator with an equipoised evaporation."—Dated 6th May, 1859.

40,869. Blake, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "A machine for stitching soles on the vamps of shoes and boots."—Dated 5th May, 1859.

40,870. Bourgeois, of Bapaume, département de la Seine Inférieure, for "A machine for printing shawls."—Dated 13th May, 1859.

40,871. Daroles, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of crinoline petticoats, called, 'Crinolines marquises.'"—Dated 7th May, 1859.

40,872. Desgenétais and Vatinet, of Bolbec, département de la Seine Inférieure, for "An apparatus for stopping looms."—Dated 13th May, 1859.

40,873. Dupé, of Suié, département de la Loire Inférieure, for "An instrument for raking and weeding corn."—Dated 12th May, 1859.

40,874. Fayet, of 32, Rue de la Badouillère, Saint Etienne, département de la Loire, for "An apparatus for folding skeins into metrical measures, and which may be stopped at any given number, and at the breakage of threads."—Dated 16th May, 1859.

40,875. Fontaine, of 18, Rue des Capucines, Lyon, for "Applying velvet and plush to fabrics without wrong sides."—Dated 14th May, 1859.

40,876. Furiet, of Charleville, département des Ardennes, for "Manufacture of nails and rivets by a hot and cold process and by using successively the apparatus of forges."—Dated 16th May, 1859.

40,877. Gaussinel, of Rue des Trois Couleurs, Alger, for "A system of submarine boats."—Dated 9th March, 1859.

40,878. Gossage, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the treatment of certain copper ores."—Dated 7th May, 1859.—(English Patent, 7th March, 1859.)

40,879. Grandin and Gallet, the former of 24, Rue de Lancry, the latter of 102, Rue du Faubourg St. Denis, Paris, for "A clyster."—Dated 6th May, 1859.

40,880. Grandin and Gallet, the former of 24, Rue de Lancry, the latter of 102, Rue du Faubourg St. Denis, Paris, for "Syphons for mixing absinthe, &c."—Dated 6th May, 1859.

40,881. Grégoire, of 66, Rue Terre de Bordes, Bordeaux, for "An hermetic box with a rational friction."—Dated 14th May, 1859.

40,882. Gruyer, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of umbrellas, parasols, &c."—Dated 5th May, 1859.

40,883. Helant and Poulet (Victor), of 17, Rue de l'Echiquier, Paris, for "A case for cigaret-paper."—Dated 21st April, 1859.

40,884. Herbé and Benoit, domiciled Rue de Cernay, Reims, for "An apparatus for raising water."—Dated 11th May, 1859.

40,885. Jean, alias Brunot, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in spinning machines for the manufacture of cords and cables."—Dated 7th May, 1859.

40,886. Lecour and Co., of 19, Rue du Mont Riboudet, Rouen, for "Cravat rollers of copper stretched by the cold process."—Dated 14th May, 1859.

40,887. Liabé, of 40, Rue du Rocher, Paris, for "Hygienic juice for horses."—Dated 6th May, 1859.

40,888. Michaux, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of garden-seats, &c."—Dated 5th May, 1859.

40,889. Ozenne, of Gamaches, département de la Somme, for "A thrashing machine."—Dated 12th May, 1859.

40,890. Pernet and Cau, of 36, Quai d'Albret, Lyon, for "Stoppers of glass or clay with or without syphons for any liquid or substance."—Dated 12th May, 1859.

40,891. Romanet, of Morez, département du Jura, "A clock-signal with one or several strokes."—Dated 12th May, 1859.

40,892. Rosnay, of 4, Rue Ste. Geneviève, Belleville, for "A smoke-consuming apparatus."—Dated 7th May, 1859.

40,893. Rossignol, of 43, Rue de la Reine, Lyon, for "Awnings."—Dated 11th May, 1859.

40,894. Rouart, of Arras, for "A crotchet for removing cartridges from Lefaucheux' guns."—Dated 14th May, 1859.

40,895. Rousseau, of Port St. Père, département de la Loire, for "A machine for grinding and crushing corn."—Dated 14th May, 1859.

40,896. Scott, represented by Fringant, at Masse, of 10, Rue de Provence, Paris, for "Improvements in the construction of carriages and their various parts."—Dated 7th May, 1859.—(English Patent, 23rd February, 1859.)

40,897. Tourret-Banquart, of Calais, for "A process for coppering metals."—Dated 16th May, 1859.

40,898. Villemez and Lorinet, represented by Caubet, of Constantine, département de l'Algerie, for "A machine for watering gardens and meadows."—Dated 30th April, 1859.

40,899. Allen, represented by Gardissal, of 29, Boulevard St. Martin, Paris, for "A machine for making rivets, balls, buttons, &c."—Dated 7th May, 1859.—(American Patent, 8th February, 1859.)

40,900. André, of 11, Rue des Juifs, Strasbourg, for "A filter worked by pressure for preparing timber."—Dated 11th May, 1859.

40,901. Brunel, represented by Lardenois, of 61, Rue du Faubourg St. Martin, Paris, for "Manufacture of paper-pulp."—Dated 29th April, 1859.—(English Patent 26th April, 1859.)

40,902. Chagot and Co., represented by Vannaisse, of 112, Rue de Richelieu, Paris, for "An apparatus for drying coals after having been washed."—Dated 30th April, 1859.

40,903. Chamboredon, of 12, Rue Gondillac, Bordeaux, for "A cock with a compressible tube."—Dated 18th May, 1859.

40,904. Chanoit and Catelineau, represented by Le Blanc, of 4, Rue Ste. Appoline, Paris, for "A sounding apparatus."—Dated 9th May, 1859.

40,905. Courau and Lemoine, the former of 52, Allées d'Amour, the latter of 3, Rue Michel-Montaigne, Bordeaux, for "Wheels of railway carriages and rails."—Dated 17th May, 1859.

40,906. Dabancourt and Damoisy, of Pommier, département de l'Aisne, for "A system of reviving animal charcoal by means of continuous furnaces."—Dated 17th May, 1859.

40,907. Dorn, domiciled with Dierrich, of 8, Rue St. Joseph, Paris, for "Improvements in furnaces for baking porcelain and other ceramic articles."—Dated 7th May, 1859.—(Wurtemberg Patent, 20th April, 1859.)

40,908. Fielding, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in preserving the form of thread-spindles by using adhesive substances."—Dated 18th March, 1859.—(English Patent, 4th November, 1858.)

40,909. Freppel, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Applying a substance to dyeing cotton, woollen, or silk yarns, &c."—Dated 7th May, 1859.

40,910. Hurez, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Smoke-consuming economical furnaces for domestic and industrial purposes."—Dated 9th May, 1859.

40,911. Jacobson, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "So-called 'Amazone collars.'"—Dated 9th May, 1859.

40,912. Jacquemin, of 75, Rue de Metz, Nancy, for "Moveable windows for hot-beds, hot-houses, awnings, &c."—Dated 19th May, 1859.

40,913. Jouan, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An apparatus for the manufacture of sugar, and for other chemical operations."—Dated 28th February, 1859.—American Patent, 25th January, 1859.

40,914. Larchevêque, of 10, Passage Saucède, Paris, for "Hooks for crinolines."—Dated 7th May, 1859.

40,915. Lecoat de Ker-Véguen and Viéville, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Applying lace looms to the manufacture of tissues for various purposes."—Dated 9th May, 1859.

40,916. Leroux, of 44, Rue Volta, Paris, for "Improvements in muzzles for horses."—Dated 9th May, 1859.

40,917. Loiseau, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A machanism for ribbon looms."—Dated 7th May, 1859.

40,918. Mariolle-Pinquet, of St. Quentin, département de l'Aisne, for "Utilizing gas and smoke for heating tubular generators from the outside."—Dated 14th May, 1859.

40,919. F. Marty and Company, of 1 and 3, Passage Ste. Croix de la Bretonnerie, Paris, for "Improvements in the manufacture of military and civil equipments and saddlery."—Dated 7th May, 1859.

40,920. Michaux and Company, of Anzin, for "A kind of slides of steam engines."—Dated 19th May, 1859.

40,921. Moret, of Saint Quentin, département de l'Aisne, for "An apparatus for controlling steam engines as to their working and condition."—Dated 16th May, 1859.

40,922. Morot, of 7, Vallée de Boudonville, Nancy, for "A safety system, applicable to all locks."—Dated 13th May, 1859.

40,923. Oxley, represented by d'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Improvements in the construction of carriages."—Dated 9th May, 1859.

40,924. Persoz, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in oxydating substances, and especially in roasting sulphur ores."—Dated 9th May, 1859.

40,925. Plagne, represented by Sébillot and Ramspacher, of 35, Boulevart du Temple, Paris, for "Improvements in extracting products from varec, by the wet process."—Dated 9th May, 1859.

40,926. Possoz and Périer, domiciled 9, Rue Neuve, St. Augustin, Paris, for "Improvements in refining sugar."—Dated 9th May, 1859.

40,927. Semain, of Blois, département de Loir et Cher, for "An apparatus superseding drills, eccentrics, racks, and other mades of transforming motion in steam and other engines."—Dated 18th May, 1859.

40,928. Serbat, of Saint Sauloe, département du Nord, for "Using old leather."—Dated 17th May, 1859.

40,929. Sylvestre Brothers, of Ranconnières and Bonjeux, département de la Haute Marne, for "A crushing mill."—Dated 17th May, 1859.

40,930. Tastevin, of 79, Quai de Bondy, Lyons, for "So-called 'American brooms.'"—Dated 17th May, 1859.

40,931. Vallin, domiciled at 5, Rue du Petit Hurleur, Paris, for "Mattresses with bellows."—Dated 9th May, 1859.

40,932. Aigner, of Avenue de Saint Cloud, Commune de Passy, département de la Seine, for "A system of suspension for two-wheeled carriages."—Dated 11th May, 1859.

40,933. Baudet, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Musical instruments with repeated and prolonged sounds."—Dated 11th May, 1859.

40,934. Besquet, domiciled with Darnis, of 36, Rue de l'Echiquier, Paris, for "Moulding articles of cast iron."—Dated 10th May, 1859.

40,935. Bodin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of bellows for blowing powder for destroying insects."—Dated 10th May, 1859.

40,936. Bona and Dicktus-Lejuene, represented by Michel, of 5, Passage Lafoyette, Paris, for "A weaving machine."—Dated 11th May, 1859.

40,937. Bossuot, of 24, Rue Notre Dame, Troyes, département de l'Aube, for "A kind of manometer."—Dated 19th May, 1859.

40,938. Catenot, of 39, Cours Morand, Lyons, départment du Rhône, for "Improvements in the construction of metal or semi-metal Roman balances."—Dated 19th May, 1859.

40,939. Charrière and Co., of Allevard, département de l'Isère, for "Modifications in small heating furnaces with a forced blast, for the purpose of adapting the same to the manufacture of large pieces of iron,"—Dated 16th May, 1859.

40,940. Chatonet, of La Rochelle, département de la Charente Inférieure, for "Improvements in the manufacture of boxes for preserved food, with an horizontal and easy opening."—Dated 20th May, 1859.

40,941. Coullon, of Auxerre, département de l'Yonne, for "A screw-wheel applied to horsegins, and to other machines."—Dated 23rd May, 1859.

40,942. Debraine, of 11, Rue Carnot, Paris, for "Improvements in parachutes, or so-called 'Zephyrine box.'"—Dated 11th May, 1859.

40,943. Desmet-Séant, of 10, Rue de Provence, Paris, for "A system of cylinders for musical instruments of brass or any other metal."—Dated 10th May, 1859.

40,944. Escousse, of 235, Rue Ste. Catherine, Bordeaux, département de la Gironde, for "A system of kneading dough for bread."—Dated 21st May, 1859.

40,945. Gain, represented by Thiéry, of 54, Rue du Faubourg Saint Denis, Paris, for "An apparatus for washing coals, ores, &c."—Dated 11th May, 1859.

40,946. Gatte, of 52, Rue de Bondy, Paris, for "A system of advertizing, called 'The traveller's friend.'"—Dated 11th May, 1859.

40,947. Geyelin, represented by Teyssier, of 43, Rue de Trévise, Paris, for "A gas-regulator."—Dated 11th May, 1859.—(English Patent, 7th January, 1859.)

40,948. Gibert, of Elbeuf, département de la Seine Inférieure, for "Manufacture of so-called 'Phosphate manure.'"—Dated 19th May, 1859.

40,949. Golding-Bunting, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "An apparatus for taming horses, or mechanical bit."—Dated 10th May, 1859.—(English Patent, 25th November, 1858.)

40,950. Jullion, represented by Brade, of 29, Rue Ste. Anne, Paris, for "Improvements in the manufacture of paper."—Dated 9th May, 1859.—(American Patent, 9th November, 1858.)

40,951. LANNEBIT and BERRÈRE, sen., represented by Dujardin d'Hardivilliers, of 166, Rue du Faubourg St. Martin, Paris, for "Improvements in regulators of twyers."—Dated 18th May, 1859.

40,952. C. LEFEBVRE and Co., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Fastening frames, framework, &c."—Dated 11th May, 1859.

40,953. LEVY-ALBERT, of 55, Rue Notre Dame de Nazareth, Paris, for "A kind of stereoscopes."—Dated 11th May, 1859.

40,954. LONG, of 12, Rue de Nemours, Paris, for "Improvements in locks of night-bags."—Dated 10th May, 1859.

40,955. LONVERT, of 37, Rue Tastet, of Bordeaux, for "An economical puncheon."—Dated 19th May, 1859.

40,956. LOOSVELT, of Turcoing, département du Nord, for "A kind of spools."—Dated 23rd May, 1859.

40,957. MARTIN, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in fire-arms."—Dated 10th May, 1859.

40,958. NICOLAS, of 87, Rue Montmartre, Paris, for "A kind of strop for razors."—Dated 11th May, 1859.

40,959. PATTE, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A toy called 'Paris arrow-gun."—Dated 10th May, 1859.

40,960. PECCADEAU, of Montauban, departement de Tarn et Garonne, for "A continuous beating machine for the manufacture of paper."—Dated 18th May, 1859.

40,961. PORTRAIT, of Saint Quentin, département de l'Aisne, for "Improvements in Leig-Evan's Patent pressure cylinder for spinning machines."—Dated 21st May, 1859.

40,962. REYNAUD DE TRETS, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An explosive composition, called 'pyronome,' for blasting mines, &c."—Dated 10th May, 1859.

40,963. VANGINDERTAELEN, represented by Denimal, of 229, Rue de Paris, Lille, for "Improvements in his force and lift pump with an intermittent jet, as patented 24th March, 1858."—Dated 21st May, 1859.

40,964. AIKEN, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in knitting frames."—Dated 12th May, 1859.

40,965. AMADE, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A machine for making up sums."—Dated 12th May, 1859.

40,966. BONHEY, of 3, Rue des Francs-Bourgeois, Paris for "Shears worked by a machine."—Dated 12th May, 1859.

40,967, BOULART, represented by Delhomme, of Grande Rue, La Chapelle St. Denis, département de la Seine, for "A system of pumps."—Dated 12th May, 1859.

40,968. CABARET, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A mechanical guide-rod applicable to all looms."—Dated 12th May, 1859.

40,969. DAVID, domiciled at 20, Rue St. Fiacre, Paris, for "A gas-carburator with an ascending action."—Dated 12th May, 1859.

40,970. DAVID, domiciled at 20, Rue St. Fiacre, Paris, for "A gas-carburator with a compensating action."—Dated 12th May, 1859.

40,972. DUPAS, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "An indicator of pressure."—Dated 11th May, 1859.

40,973. DUSART and GÉLIS, the former of 6, Passage Neveux, the latter of 47, Rue Meslay, Paris, for "Applying naphthaline to the manufacture of colouring substances for painting and dyeing."—Dated 13th May, 1859.

40,974. FONTANT, of Melle, département des Deux Sèvres, for "Improvements in his corograph or liquid for removing fresh stains or marks from paper, as patented 20th May, 1858."—Dated 19th May, 1859.

40,975. GAUDIER and MARCHAND, the former of 23, Rue Thévenot, the latter of 286, Rue St. Martin, Paris, for "An apparatus for registering distances travelled over by carriages."—Dated 13th May, 1859.

40,976. HEIM, of Colmar, for "A clack-valve stopper for casks."—Dated 20th May, 1859.

40,977. ISOARD, jun., of 60, Rue Fontaine au Roi, Paris, for "Decomposing water by means of the expansion of heat and of the affinity existing between both oxygen and hydrogen and carbon gas."—Dated 12th May, 1859.

40,978, LAC DE BOSREDON, domiciled with Beluze, of 3, Rue Corneille, Paris, for "A calculating machine."—Dated 14th May, 1859.

40,979. LEGENDRE, jun., of Poncet, Commune de Saint James, département de la Manche, for "A churn."—Dated 18th May, 1859.

40,980. LEMOINE, of 3, Rue Michel-Montaigne, Bordeaux, for "A pressure-cylinder, worked by steam."—Dated 24th May, 1859.

40,981. LESLIE, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of gas."—Dated 14th May, 1859.—(English Patent, 18 November, 1858.)

40,982. MARIGNAN, jun., and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the arrangement of hydraulic turbines."—Dated 12th May, 1859.

40,983. MAUDOY, of 59, Rue de Charenton, Paris, for "A machine for moulding cast-iron, and other metals."—Dated 14th May, 1859.

40,984. MAYET, of 3, Rue Saint Marie des Terreaux, Lyons, for "Distilling bituminous schist."—Dated 19th May, 1859.

40,985. MAZELINE and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Applying the so-called 'Feed-injector to the navy.'"—Dated 12th May, 1859.

40,986. MONILLERON, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An electric apparatus for showing the progress of railway trains."—Dated 14th May, 1859.

40,987. PAINE, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the treatment of air and gas, and in

using the former for obtaining motive power."—Dated 11th May, 1859.—(English Patent, 4th November, 1858.

40,988. Pignière, of 20, Rue du Port-du-Temple, Lyons, for "A hydro-pneumatic engine."—Dated 21st May, 1859.

40,989. Premillieu, domiciled at the Prefecture, Lyons, for "A crinoline stay, called 'Rosmeli-Ria.'"—Dated 20th May, 1859.

40,990. Renon, of 68, Rue de Rivoli, Paris, for "A projecting apparatus."—Dated 25th March, 1859.

40,991. Risler, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the card, cleaners, &c. of spinning machines."—Dated 12th May, 1859.

40,992. Robert, of 37, Rue du Petit-Mase, for "A system of stereoscopes."—Dated 12th May, 1859.

40,993. Ruvin, of Chartres, département d'Eure and Loire, for "A machine for cleaning and sorting corn."—Dated 24th May, 1859.

40,994. Schroder, domiciled with Libert, of 53, Rue Vivienne, Paris, for "An apparatus for extracting sugar from molasses."—Dated 14th May, 1859.

40,995. Vaillant, sen., of Algiers, for "Trusses with a gradual pressure."—Dated 19th January, 1859.

40,996. Weil, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in fish hooks."—Dated 11th May, 1859.

40,997. Aubry, domiciled with Sissier, of 71, Rue du Faubourg St. Antoine, Paris, for "A machine for spinning cane."—Dated 16th May, 1859.

40,998. Baudet, jun., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of buckles."—Dated 14th May, 1859.

40,999. Blanquet, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for finishing tissues."—Dated 14th May, 1859.

41,000. Bohmé, of St. Quentin, département de l'Aisne, for "A rotary pump with a moveable closing apparatus."—Dated 25th May, 1859.

41,001. Boullian and Saltet, brothers, of Nîmes, département du Gard, for "Gold paper pulp."—Dated 23rd May, 1859.

41,002. Chevassu, of 11, Rue du Port-Mahon, Paris, for "Using magnetic attraction for rendering locks safer.—Dated 17th May, 1859.

41,003. Dezaux-Lacour, of Guise, département de l'Aisne, for "Using gutta percha and isinglass for the manufacture of jointed straps without seams or rivets."—Dated 25th May, 1859.

41,004. Eckhorn, represented by Brade, of 29, Rue Ste. Anne, Paris, for "A so-called 'Universal lamp-regulator.'"—Dated 17th May, 1859.——(English Patent, 13th April, 1859.)

41,005, Fercot, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in patent oil axles."—Dated 14th May, 1859.

41,006. Fernandez, of 14, Rue Neuve St. Eustache, Paris, for "An essence for removing grease."—Dated 17th May, 1859,

41,007. Floire, of 52, Rue des Ayres, Bordeaux, for "Electric breaks."—Dated 26th May, 1859.

41,008. Fortin, of 40, Rue Marengo, St. Etienne, département de la Loire, for "Cement painting, called 'Philolithe-pictura.'"—Dated 24th May, 1859.

41,009. Grébel, of Denain, département du Nord, for "Cast-iron tubular beams."—Dated 27th May, 1859.

41,010. Grunler, of 56, Rue Notre Dame de Nazareth, Paris, for "Applying skins, leather, oiled, varnished, or caoutchouc stuffs to cravats, ladies' belts, and to other similar articles."—Dated 16th May, 1859.

41,011. Houget, of Denain, département du Nord, for "A system of air-holes for ventilation."—Dated 27th May, 1859.

41,012. Johns, represented by Girard, of 85, Rue de Sèvres, Paris, for "An article of military equipment."—Dated 17th May, 1859.—(American Patent, 12th April, 1859.)

41,013. Jully-Degrond, of Chatillon-sur-Seine, département de la Côte d'Or, for "A press for squeezing."—Dated 23rd May, 1859.

41,014. Krafft, of 9, Rue de Paradis Poissonnière, Paris, for "Various modes of applying india-rubber."—Dated 17th May, 1859.

41,015. Lagoutte, of Chausée Ménilmontant, Belleville, département de la Seine, for "A sewing machine,"—Dated 16th May, 1859.

41,016. Lauranson, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Applying the galvano-plastic process to gold articles and jewelry."—Dated 17th May, 1859.

41,017. Levêque, of 19, Quai d'Orléans, Nantes, for "A suspensory."—Dated 20th May, 1859.

41,018. Magalon, of 50, Rue des Trois Mages, Marseilles, for "Oil bags with rounded-off corners."—Dated 23rd May, 1859.

41,019. Marin, of 299, Grande Rue, La Chapelle St. Denis, département de la Seine, for "Soldiers' haversacks."—Dated 18th May, 1859.

41,020. Martin, of 43, Rue St. Nicholas d'Antin, Paris, for "Removing incrustations from boilers."—Dated 17th May, 1859.

41,021. Peltier, junr., of 45, Rue des Marais St. Martin, Paris, for "A cooking apparatus with a motor."—Dated 16th May, 1859.

41,022. Prodon-Bonneton, Farge, and Boyer-Farge, of Thiers, département du Puy de Dôme, for "Manufacture of blades, lining-plates, and springs for cutlery."—Dated 10th May, 1859

41,023. Prudent, of 20, Rue de Chabrol, Paris, for "Opera-glasses."—Dated 16th May, 1859.

41,024. Rigault, of 71, Avenue de St. Cloud, Versailles, for "A wallachian or molda-wallachian system for umbrellas."—Dated 23rd May, 1859.

41,025. Robson, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Compositions for joints, coatings, and other purposes."—Dated 16th May, 1859.

41,026. De Rose and Gin, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A system of repairing or assembling pipes of india rubber or

other similar substances." — Dated 17th May, 1859.

41,027. Rougier, of Nanterre, département de la Seine, for "An apparatus for distilling fat substances."—Dated 18th May, 1859.

41,028. Van Den Bergh, of 8, Rue St. Pierre, Passy, pépartement de la Seine, for "A double-action ventilator for heating and airing."—Dated 17th May, 1859.

Certificates of Addition.

37,738. Durand and Trozet, for "Velvet."—Dated 14th April, 1859.

37,993. Barroux, for a "Railway."—Dated 20th April, 1859.

38,653. Béjot-Gandel and Guérin, for a "Pump."—Dated 8th April, 1859.

36,414. Déveille, for a "Break."—Dated 4th May, 1859.

33,917. Jumelais, for a "Motor."—Dated 26th April, 1859.

34,544. Laborey, for "Decortication."—Dated 30th April. 1859.

38,103. Libotte, for a "Parachute of mines."—Dated 23rd April, 1859.

39,433. Mongin, for a "Saw."—Dated 27th April, 1859.

38,211. Neustadt, for a "Carriage."—Dated 28th April, 1859.

37,886. Pape, for a "Musical instrument."—Dated 29th April, 1859.

32,254. Pernet, for a "Conveyance."—Dated 2nd May. 1859.

39,950. Pesier, for "Sugar."—Dated 7th May, 1859.

33,925. Platel, for a "Fire-arm."—Dated 26th April, 1859.

37,302. Queval, for a "Telegraph."—Dated 22nd April, 1859.

38,051. Rama, for "Metallurgy."—Dated 23rd April, 1859.

25,821. Rapp, for "Sewing."—Dated 23rd April, 1859.

37,399. Robert, for a "Motor."—Dated 26th April, 1859.

36,202. Sonnet, for "Grain."—Dated 27th April, 1859.

36,431. Thompson, for a "Telegraph."—Dated 28th April, 1859.

39,187. Varenne, for a "Smoking pipe."—Dated 26th April, 1859.

36,788. Vaudoré, for "Gas."—Dated 26th April, 1859.

40,412. Villard, for a "Garden seat."—Dated 30th April, 1859.

33,210. Alleau, for "Brandy."—Dated 14th May, 1859.

38,639. Babonneau, for a "Motor."—Dated 9th May, 1859.

32,690. Bandonneau, for "Foot coverings."—Dated 7th May, 1859.

38,835. Bastable, for "Lighting."—Dated 5th May, 1859.

40,836. Bourdin, for "Cooking."—Dated 11th May, 1859.

30,227. Bourgouin, for an "Inlaid floor."—Dated 7th May, 1859.

37,703. Bréchon and Robin, for "Husking."—Dated 10th May, 1859.

36,895. Brinkman, for a "Syringe."—Dated 4th May, 1859.

36,643. Callaud, for "Electricity."—Dated 18th May, 1859.

21,282. Claudon and Co., for a "Pump."—Dated 23rd April, 1859.

25,371. Constant, for "Skidding."—Dated 18th May, 1859.

36,280. Daniel, for a "Piston."—Dated 15th April, 1859.

23,227. Deger, for a "Tap."—Dated 6th May, 1859.

39,646. Dehaynin, for "Fuel."—Dated 7th May, 1859.

33,815. Delamare, for "Weaving."—Dated 16th May, 1859.

33,220. Deparis, for a "Sowing machine."—Dated 9th May, 1859.

39,671. Duchesne, for a "Shirt."—Dated 9th May, 1859.

36,313, Engles, for "Enamelling."—Dated 2nd May, 1859.

25,743. Fleur, for "Plough."—Dated 9th May, 1859.

34,502. Galvaire and Lerdier, for "Weaving."—Dated 29th April, 1859.

36,512. Giffard, for a "Steam boiler."—Dated 7th May, 1859.

29,414. Hofer, for a "Regulator."—Dated 2nd May, 1859.

36,133. Houssier, for a "Shelter."—Dated 17th May, 1859.

35,648. Miss Jack, for an "Artificial flower."—Dated 4th May, 1859.

37,041. Karst, for "Embroidery."—Dated 19th May, 1859.

36,419. Lamy, for "Impressions on crystal."—Dated 2nd May, 1859.

28,532. Lefebvre and Co., for a "Frame."—Dated 10th May, 1859.

39,779. Lingée, for "Cement."—Dated 7th May, 1859.

36,585. Marin, for "Mastic."—Dated 18th May, 1859.

36,555. Massé, for "Heating."—Dated 9th May, 1859.

40,504. Mondon, Milland, and Co., for "Weaving."—Dated 11th May, 1859.

39,084. Mongelard, for a "Puzzle box."—Dated 9th May, 1859.

36,627. PINAULT, for "Building."—Dated 5th May, 1859.

34,712. REISLER, for "Starch."—Dated 7th May, 1859.

39,403. ROQUIN-EVRARD, for a "Crushing-mill."—Dated 2nd May, 1859.

39,371. SAX, for a "Musical instrument."—Dated 30th April, 1859.

38,538. SEHEU, for a "Dutch-oven."—Dated 9th May, 1859.

35,233. THIERRY, for "Smoke-consumption."—Dated 11th May, 1859.

36,889. VENOT, for an "Axle."—Dated 17th May, 1859.

37,435. WANSON, for a "Tap."—Dated 10th May, 1859.

23,719. WHITWORTH, for "Artillery."—Dated 5th May, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 22nd November, 1859, and each bearing that date.

No. 26,150. CHARLES J. ADDY, of Roxbury, Mass., for an "Improved clock escapement."

"I claim the independent gravity pallet *f*, provided to a fixed bearing, in combination with a recoil pallet, swinging with the pendulum, in the manner substantially as set forth."

No. 26,151. MOSES ALLAN, of Utica, N.Y., for an "Improvement in metal planing machines."

"I claim, first, the construction of the apparatus F, E, *g*, shewn in Fig. 2, and its adaptation to the use of the ordinary planing machine, and its combination therewith, and for the purposes described. Second, the combination of the bearing stands H, I, and the disc M, with the carriage of the machine, connected and arranged substantially as described and for the purposes described, the whole being constructed, combined, and operating, substantially in the manner herein set forth."

No. 26,152. E. G. ALLEN, of Boston, Mass., for a "Combination steam gauge."

"I claim the combination and arrangement of the several instruments requisite to enable the engineer to regulate the proper working of steam machinery, substantially as herein set forth, the said instruments being inserted in one case, and having the hands or other indicators upon one face or dial plate, in the manner and for the purposes specified."

No. 26,153. SAMUEL BARBER, of South Brunswick, N.J., for an "Improved washing machine."

"I claim the combination with lever N, for operating the frame D, of a curved extension guide R, for adjusting the frame, in the manner above set forth; and 2nd, the arrangement with the above of the serrated arc J, on top of the dash board G, for adjusting the inclination of said board, for the purposes and in the manner specified."

No. 26,154. ELI BARTHOLOMEW, of Cleveland, Ohio, for an "Improvement in bee hives."

"I claim the arrangement of the outer casing A, and the inner casing B, in relation to each other, and the ventilating openings H, in cover G, which cover is furnished with top K, and boxes L, L, in the manner and for the purposes herein specified."

No. 26,155. JERRED BEACH, of Freeport, Pa., for an "Improved saw-set."

"I claim the arrangement of the guide (*c*), with slot (*g*), levers (*f* and *m*), connecting link (*o*), set screws (1, 2, 3, 4, and 5), when used in connection with the gauge (*a*), graduating rest plate (*d*), regulating screw (*e*), anvil (*i*), and set (*j*), the whole being arranged and constructed substantially as herein described for the purpose set forth."

No. 26,156. D. BERRY, of Huntingdon, Ind., for an "Improvement in automatic canal bridge."

"I claim the bridge I, arranged to work on inclined ways F, H, and connected by a chain and wheel M, N, or their equivalents to a shaft O, which is connected by gearing to segments Q, in line with the bridge and the boat, so that the former can be actuated by the movement of the latter, substantially as described."

No. 26,157. MILTON B. BISHOP, of Whitingham, Vt., for an "Improvement in washing machines."

"I claim the means of operating the two wash boards, viz., the arrangement and application of the two sets of levers or brakes F, H, together and with respect to the wash boards B, C, disposed one over the other, and in the tub, as described. I also claim, in combination with the upper wash board B and its brake H, the rocker shaft K, the slide bar L, and the springs M, M, the same being for the purpose or objects as specified, meaning also to claim the combination of the said rocker shaft, the slide, and springs."

No. 26,158. WENDLIN BLESER, of New York, N.Y., for a "Composition cement or mortar."

"I claim the mortar above described, made and employed, substantially as set forth."

No. 26,159. JOSEPH W. BRADLEY, of New York, N.Y., for an "Improvement in ladies' bustles."

"I claim a bustle, consisting of a waist band, composed in part of strips *a*, *a*, of metal or other elastic material, and a spiral spring A, tapered from the middle towards each end, applied to and combined with such waist band, substantially as herein described."

No. 26,160. LOCKWOOD B. BROOKS, of New York, N. Y., for an "Improvement in steam valves."

"I claim rendering the two parts B and C of the balanced puppet valve adjustable, relatively to each other, by connecting the stem B^1 to the sleeve C^1, by the yoke D, or its equivalent, arranged and operated substantially in the manner and for the purposes herein set forth."

No. 26,161. GEORGE CAWARD and DAVID C. CAWARD, of Prattsburgh, N.Y., for an "Improvement in road scraper."

"We claim the reversible revolving and adjustable blade B with the adjusting boxes C, when made and operated as and for the purpose specified. Also the circular arms D with the wheels E, when made and used as specified, and for the purpose set forth."

No. 26,162. A. J. CHAPMAN, of Bayon Goula, La., for an "Improvement in bagasse furnaces."

"I claim, 1st, the employment of the central air-heating chamber *n*, having discharge passages n^2 leading into the furnace in its sides, and a central descending flue *i*, in combination with a double-walled furnace F, having an air-heating chamber *f* between its walls and discharge passages *z* through its inner wall leading into the fire chamber, substantially as and for the purposes set forth. 2nd, the combination of the partition and valved air-heating chamber *f*, V, X, between the walls of the furnace, with the upper

and lower hot air passages *a*, *b*, and mixing chamber *c*, substantially as and for the purposes set forth. 3rd, the combination of the auxiliary valved flue Y, *e*[1], leading directly to the chimney, with the valve *d*, boiler flue B[1], *e*, and the furnace F, substantially as and for the purposes set forth. 4th, the combination of the valve O[1] in the hopper, with the cylinder feeder S, carrier drum *h*[3], cam *l*[1], and lever O, substantially as and for the purposes set forth."

No. 26,163. MATTHIAS P. COONS, of Brooklyn, N. Y., for an "Improvement in apparatus for generating illuminating gas."

"I claim, 1st, the particular form and manner of constructing and combining a gas-generating retort, consisting of a fusion chamber and barrel, as represented by Fig. 1, A, Nos. 1 and 3, as combined for the purpose specified. 2d, I also claim the diaphragm J, in combination with the chamber F and D, and diaphragm N, as represented in Fig. 4, in the manner and for the purpose specified. 3d, I also claim the chamber H, Fig. 7, constructed as and in combination with the other apparatus specified. 4th, I also claim the chamber K, Fig. 9, as attached to the cover M, in connection with the escape pipe L, with a stopcock, or its equivalent, attached in the manner and for the purpose specified. 5th, I also claim, in combination with the apparatus specified, the projecting ridge on facing rim or flange O, and the corresponding groove P in the door N; and also I claim, in combination, the yoke or bar R, and crank screw S, as combined, and also the hook hinges X, all of which is represented by Fig. 10, all of which as herein set forth and specified."

No. 26,164. BENJAMIN P. CRANDALL, of New York, N. Y., for an "Improvement in children's sleds."

"I claim connecting the head and neck (A) of the horse to the bottom, or in front thereof, of a child's sled, having spring or other runners in such a manner that the pole may be secured under the bottom (B) of the sled, substantially as shown in the drawings at Fig. 1, and for the purpose set forth."

No. 26,165. EDWARD CRANE, of Dorchester, Mass., for an "Improvement in locomotive engines."

"I claim the combination, in a locomotive, of a boiler and engine with a water tank, coal box, blower, and baggage department, on one long truck frame, suspended underneath the axles of the wheels, arranged substantially as herein described."

No. 26,166. EDWARD CRANE, of Dorchester, Mass., for an "Improvement in railroad cars."

"I claim the use of a single long truck for the support of a railroad car, when the frame of said truck is constructed and suspended, substantially as herein described. I claim the use of cylindrical bars of iron passing across under the frame of the truck, and nearly in contact with the rails, for the purpose of keeping the truck frame from striking the rails or ground, in case the car leaves the track."

No. 26,167. D. M. CUMMINGS, of Endfield, N.H. for an "Improvement in harrow teeth."

"I claim, first, constructing the tooth A of a harrow with prongs B, sharp pointed shields C, substantially as and for the purpose specified. Second, in combination with the above, the wedge-shaped plate D, substantially in the manner and for the purpose described."

No. 26,168. JOHN DAVIS and EBENEZER DATVIS of Matildaville, Pa., for an "Improvemen in launching flat boats."

"We claim the combination of the hinged projection beams C, with the shoulders *a*, pulleys *p*, and ropes *d*, substantially as and for the purpose herein set forth, when used in connection with the permanent staging S."

No. 26,169. HARRISON DOTY, of Cardington, Ohio, for an "Apparatus for supplying saw dust to furnaces."

"I claim the employment of the latch D, when the same is constructed and arranged to operate, substantially as in the manner and for the purpose herein set forth. I also claim the arrangement of the hinged bottom B, provided with the adjustable weight *d*, with the latch D, provided with adjustable weight *a*, and with the stationary box A, for the purpose set forth."

No. 26,170. CHARLES DOUGLAS, of Hebron, Conn., for an "Improvement in wagon jacks."

"I claim, 1st, the combination and arrangement of the lever (E), pawl (F), ratchet plate (D), rod (C), and stock (A), substantially as described, for the purpose set forth. Second, the pawl (F), when used for the double purpose of a pawl on the ratchet plate (D), and a fulcrum for the lever (E), as and for the purposes herein described."

No. 26,171. C. W. DURKEE, of Hartford, Wis., for an "Improvement in grain binders."

"I claim, first, the combination of the travelling segment D, jointed arm G, its rod G[1], connecting rod I, and rack H, operated by pinion J, rack J[1], when the same are arranged and operate as herein set forth. Second, I claim the swinging rack K, in combination with the travelling segment D, for receiving and holding the pinion J, while the end of the arm G, is being passed through the loop, in the manner set forth. Third, I claim the loop holder *c*, trip block *d*, and block *e*, arranged and operating substantially as and for the purpose herein set forth."

No. 26,172. ASAHEL K. EATON, of New York, N.Y., for an "Improvement in vulcanizing rubber compounds."

"I claim the use of a metallic bath, substantially as herein described, for the purpose of vulcanization."

No. 26,173. GUSTAVUS G. ELIAS, of Lancaster, Pa., for an "Improved cabbage cutting machine."

"I claim the specific arrangement and combination of the sliding box C, with its notches P, flat spring N, and retaining plates I, the double-coned spiral spring K, with its square bottom L, and armed top H, the counter cutting knives 1, 2, and central division 3, on the table A, provided with legs, fly wheel E, crank or connecting rods F, when these several parts are made, substantially as and for the purpose specified."

No. 26,174. E. N. ELLIOT, of Port Gibson, Miss., for an "Improvement in cotton presses."

"I claim, first, the employment of the hinged forms (B) (forming part of the box (A), in combination with the follower (R), said forms being so arranged as to receive the cotton and to act as guides for the follower, substantially as described. 2d, I claim the employment of the weighted follower R in connection with the spring bolts *g*, or their equivalent, whereby the loose cotton is instantly, at the proper time, brought down and held in the proper space, to be acted upon by the followers F, substantially as deseribed. 3d, I claim the arrangement of the doors S, S, and T, with reference to the box A and the position of the bale therein, when fully compressed, by means of which I am enabled to apply and secure the covering without sewing, substantially as described. 4th, I claim the arrangement of the rod M and stops N, N[1], with reference to nut H, and its movement, whereby the clutch L is not only disconnected from the pullies J and K at the proper times, but also prevented from connecting, by accident, or otherwise, as described."

No. 26,175. GEORGE AUGUST ENGELHARD, of New York, N. Y., and RUDOLPH FRANZ HEINRICH HAVEMANN, of New Brunswick, N. J., for an "Improvement in compounds of caoutchouc and allied gums."

"We claim the within-described product obtained by the action of chlorine on gums, such as india rubber or gutta percha, whether in solution or substance, in either of the modes above pointed out, or in any other that is substantially the same, and which will produce a like effect."

No. 26,176. A. J. EMLAW, of Grand Haven, Mich., and ELLIOT RICHMOND, of Kelloggsville, Mich., for an "Improvement in saw-mills."

"We claim, first, the arrangement of the friction wheel M and pulleys I, J, in connection with the shafting E, H, K, for the purpose of giving the feed and gigging back movement to the carriage M[1], as set forth. Second, the arrangement of the adjustable bars O on the carriage M, screw rods P, and adjustable wheels Q, on shaft R, whereby the bars O may be adjusted nearer to or farther from each other to suit the length of the stuff to be sawed."

No. 26,177. DENNIS C. GATELY, of Newtown, Conn., for an "Improvement in rubber belting."

"I claim, as a new article of manufacture, machine belting or banding manufactured with surfaces of india rubber

or gutta percha, and having surfaces which are as nearly as is practically possible perfectly smooth, as described."

No. 26,178. Dennis C. Gately, of Newtown, Conn., for an "Improvement in making rubber belting."

"I claim the method above described for manufacturing machine belts or bands of india rubber or gutta percha by rolling them in thin sheets of flexible metal and then heating them, substantially in the manner and for the purposes above described."

No. 26,179. Oliver C. Green, of Dublin, Ind., for an "Improvement in harrows."

"I claim the described arrangement of the harrow teeth *a*, beams *b*, wheels *c*, arms *d*, lever *e*, rods *g*, and rack *h*, the whole being constructed and operating together in the manner and for the purposes set forth."

No. 26,180. John Griffin, of Louisville, Ky., for an "Improvement in cotton harvesters."

"I claim the employment or use of annular chambers E, communicating with the cups D of the suction tube or tubes A, C, by means of perforations *b*, and communicating with a steam or air chamber by means of flexible tubes G, substantially as and for the purpose set forth."

No. 26,181. P. Griswold and H. H. Seeley, of Hudson, Mich., for an "Improvement in grain separators."

"We claim the combination with the screen D of the rocking bar L and vibrating bar E, as shown and described, for the purpose set forth."

No. 26,182. John P. Hale, of Kanawha, C. H. Va., for an "Improvement in evaporating vessels."

"I claim the superheating of the steam or vapor arising from the evaporation of the brine, substantially as and for the purpose herein shown and described."

No. 26,183. A. J. Hall and Russell Patten, of Morristown, Vt., for an "Improvement in carriage tops."

"We claim the construction of bows for folding carriage tops with joints, substantially as and for the purposes set forth."

No. 26,184. Louis Harper, of Riceville, N. Y., for an "Improvement in fertilizers."

"I claim, 1, the preparation of the peat or muck or lignite, and their mixture with sulphate of lime, soda, potash, and magnesia, where required to form the bases of the preparation intended for composition of the fertilizer. 2, the addition of phosphate and bi-phosphate of lime to the above basis, and the impregnation of the above mixture with ammonia, in the manner described, so as to be converted into simple and double salts, as above stated. 3, the combination of peat or muck or lignite, prepared as described, with green sand marl."

No. 26,185. Lewis G. Hoffman, of Waterford, N. Y., for an "Improved door fastening."

"I claim the above-described button, as a new article of manufacture."

No. 26,186. Julius Hornig, of Newark, N. J., for an "Improved cut-off arrangement for steam valves."

"I claim the employment for opening and controlling the closing of the cut-off valve of a revolving and swinging cam C applied in combination with and operated by a revolving wrist plate D, or its equivalent, and a grooved disk E, substantially as herein described."

No. 26,187. Joshua L. Husband, of Philadelphia, Pa., for an "Improved propelling wheel."

"I claim the combination of the guides E and F, the arms A and A^1, the connecting rods D and D', the double cranks L and M, and the sectional paddles H, operating together, in the manner and so as to produce the effects above described."

No. 26,188. R. W. Houston, of Calais, Me., for an "Improvement in coal hods."

"I claim the arrangement of the bucket C with the external casing A, when the bucket is provided with a rim or flanch *c* around its top and with a pin on its bottom upon which it revolves, and when the external casing is provided with a top which fits snugly around the bucket and over the rim or flanch, with a channel D and with a door to said channel, the whole being used substantially as and for the purpose specified."

No. 26,189. George E. Inman, of Buffalo, N. Y., for an "Improvement in ditching machine."

"First, I claim the cutter M, arranged and operating substantially as set forth. Second, I claim the arrangement of the adjustable roller (L) under the elevated part of the share C, substantially as set forth. Third, I claim the arrangement of the caster wheel (I), plow (G), cutter M, adjustable roller (L), and plowshare (*c*, c^1,) and side pieces (D), relatively to each other, substantially as described. Fourth, I claim the arrangement of the two driving wheels B, B, on the same shaft, when placed so near together as to track within the ditch cut by the horizontal share *c*, substantially as described."

No. 26,190. Luther Johnson, of Grand Ledge, Mich., for an "Improvement in rotary steam engines."

"I claim, first, the employment, in combination with a sliding abutment fitted to the outer stationary cylinder, of an inner revolving cylinder, having a concentric groove or channel closed permanently in one place by a piston extending all across it, substantially as herein described. Second, operating the abutments E, E^1, and the cut-off valves G, G^1, by means of the same cams F, F, through the agency of rollers *g*, *h*, g^1, h^1, or their equivalents, applied to the abutments and yokes *k*, k^1, rods L, L^1, and levers M, M^1, and arms *n*, n^1, applied to the cut-off valves, the whole arranged and operating substantially as herein described. Third, the two sliding reversing valves, applied in combination with the two sets of steam pipes in relation to the abutments, and operated simultaneously by a single lever, substantially as herein described."

No. 26,191. H. P. Judson, of Bethlehem, Conn., for an "Improvement in ox yokes."

"I claim the arrangement of the peculiar rotary spring disc D, curved rods F, G^1, and horizontally moving locking bolts B, B^1, as and for the purpose herein shown and described."

No. 26,192. Cheney Kilburn, of Burlington, Vt., for an "Improved lathe attachment."

"I claim the rotating reciprocating knife (D), in combination with the carriage (B), provided with the gouging tool (F) and V-shaped cutter (G), pattern (L), recess (H), and support (L), when arranged and operated as herein set forth, and for the purpose specified."

No. 26,193. Elisha C. Leonard, of New Bedford, Mass., for an "Improvement in manufacture of paraffine candles."

"I claim my improvement or improved process of treating paraffine in the manufacture of candles therefrom, whereby I am enabled to dispense with a refrigerating air bath cooled by artificial means, my improvement or invention consisting in the employment, in manner described, of the atmospheric temperature and the refrigerating water bath after the first cooling of the candle in the water bath."

No. 24,194. Edward J. Mallett, of New York, N. Y., for an "Improvement in railroad car axles."

"I claim the combination and arrangement of the parts as represented, for the purpose of forming an axle, on which the wheels shall have an independent motion, the whole constructed substantially as described for the purpose set forth."

No. 26,195. Charles F. Mann, of Troy, N. Y., for an "Improvement in traction locomotives carrying their own railway."

"I claim so applying the endless chains A, as to make them not only the track for the supporting wheels B, of the locomotive to run on, but also the means by which the engine propels the locomotive along the ground, substantially as herein described."

No. 26,196. James J. Mapes, of Newark, N.J., for an "Improvement in fertilizers."

"I claim the production of a fertilizer, by combining guano and sulphate of ammonia, or its equivalent, with burnt bones, or their equivalent, when the said bones, or equivalent, have been treated by sulphuric acid, as specified, the whole being prepared substantially in the manner and for the purpose set forth."

No. 26,197. Thos. J. Mayall, of Roxburg, Mass., for an "Improvement in scythe rifles."

"I claim, as a new article of manufacture, 'rifle' for sharpening scythes, &c., formed of india rubber or gutta percha, with which emery, sand, or other suitable gritty substances are incorporated, substantially as set forth."

No. 26,198. Wm. Morrison, of Carlisle, Pa., for an "Improvement in harvesters."

"I claim providing the rear end of the finger with the open slot *d*, whereby I am enabled to readily remove the stationary cutters and fingers, and to replace them without detaching the bolts or nuts which secure the fingers to the finger bar, in the manner and for the purpose specified."

No. 26,199. Martin Nixon, of Philadelphia, Pa., for an "Improvement in boilers for treating paper stock."

"I claim the close spherical kier or boiler A, journaled on hollow trunnions B, and provided with a perforated floor F, G, steam pipes D and E, and elevating and distributing pipes I and J, the whole being constructed and arranged and operating, substantially in the manner set forth, to boil paper stock under a heavy pressure, by the combined action of an upward current of steam and a downward current of hot alkaline solution, and admitting of the ready inversion of the said boiler, for the discharge of its contents, when cooked."

No. 26,200. John K. O'Neil, of Kingston, N.Y. for an "Improvement in vapor lamps."

"I claim the arrangement of the auxiliary burner G, in connection with the gas generating chamber E, in such manner that a cessation of its action on said chamber may at any time be effected without extinguishing its light by the separation of said burner from its influence on said chamber, as described and for the purpose specified. I also claim the spiral revolving shade, in combination with the auxiliary burner, as described and for the purpose set forth. I also claim the construction and arrangement of the burner G, and graduating tube *g*, in combination as described, and for the purpose specified."

No. 26,201. Wm. Pearson, of Windsor Locks, Conn., for an "Improvement in sewing machines."

"I claim the combination of the vibrating looper, the cam flange, which operates it, and the vibrating bar J, carrying the friction rollers *j*, *j*, the parts being constructed, combined, and arranged, substantially as and for the purposes set forth."

No. 26,202. J. B. Palmer and G. Howland, of Fort Edward, N.Y., for an "Improvement in manufacture of paper pulp."

"We claim the boiling of the straw or other 'stock,' for about four hours, under a pressure of from 110 lbs. to 130 lbs., in a solution of caustic alkali, of a strength indicating from 3½° to 3¾° Beaumé, substantially in the manner and for the purpose herein set forth."

No. 26,203. Wm. Phelps and W. H. Hanford, of Sycamore, Ill., for an "Improvement in horse power machines."

"We claim the combination and arrangement of the wheels and rollers C, C, C, and D, D, D, on track B, and wheel H, and friction rollers I, I, I, and J, J, J, on track H, and friction rollers R, R, R, on rotary track O, with rotary drive wheel N and friction rollers U, constructed and operated substantially as described."

No. 26,204. Francis B. Richardson, of Boston, Mass., for an "Improvement in elastic enema syringes."

"I claim the improvement in india-rubber syringes as an article of manufacture, which consists in combining the india rubber or gutta percha, or other waterproof bag, with the suction end of the syringe, in the manner substantially as described."

No. 26,205. T. J. W. Robertson, of New York N.Y., for an "Improvement in sewing machines."

"I claim, first, the employment in combination with the needle of a sewing machine of a plate K, constructed and operating substantially as herein shown and described for the purpose of laying and holding braid gimp, or other material, upon the surface of the fabric as set forth. Second, the arrangement of the guides *e*, *e*, *e*, to extend past the centre, and on each side of the needle hole, as and for the purpose herein set forth. Third, the employment, in combination with a braid holder M, of the adjustable slide N, for the purpose of flattening and opening the braid, and preventing its kinking, as herein shown and described."

No. 26,206. John A. Seaman, of St. Louis, Md., for an "Improved machine for chamfering and crozing kegs or casks."

"I claim the rotating arms *a*, provided with the adjustable jaws *b*, the adjustable rotating ring G, fitted to the annular plate D by the screws and guides E, F, the plate D being provided with the tool-holding levers I, J, attached to the guide shafts C, and supported by the springs E and the shafts C connected to a treadle frame H, the whole being combined and arranged to operate substantially as and for the purpose set forth."

No. 26,207. Lemuel W. Serrell, of Brooklyn, N.Y., for an "Improvement in guides for sewing machines."

"First, I claim a spring tucker acting to fold the edge of the hem against the plate of the hammer, when combined with the adjusting screw 4, or its equivalent, whereby the pressure of the tucker on the goods, and the opening or mouth left for their passage, are regulated as set forth. 2d, I claim the horn 5, in combination with the tongue *c*, for the purposes and as specified. 3d, I claim the arrangement of the hem spreader stock *h*, and gauged for the purposes and as specified. 4th, I claim attaching the guide or hemmer to the sewing machine by a cylindrical pin or hinge to permit the said guide or hemmer to be turned up or inverted so that the edge of the cloth at the beginning of hem can be properly entered and folded while in this position as set forth."

No. 26,208. Daniel Spencer, of Cortlandt, N.Y., for an "Improvement in grain separators."

"I claim the combination with a grain separator between the fan shaft and the separating screens of a shaft H, and a series of sliding wheels I, substantially as shown for the purpose set forth."

No. 26,209. John F. Stark, of Greensburgh, Pa., for a "Composition for protecting and ornamenting the surface of wood."

"I claim the employment of a compound composed of sulphur and alcohol, or sulpher and the alcoholic varnish herein described, in the proportions and manner herein shown and described for the purpose set forth."

No. 26,210. James Stratton, of Brooklyn, N.Y., for an "Improved apparatus for regulating the pressure of water in pipes."

"I claim the employment or use of the air chamber E, diaphragm D, or its equivalent, with valve C attached, the pipe B containing valve C, and communicating with the air chamber by pipe F, provided with the cocks H, I, and the pipe G, communicating with the pipe F and B, the above parts being arranged in relation with each other and the supply pipe A, to operate as and for the purpose set forth."

No. 26,211. L. Taylor, of Jordan, Wis., for an "Improvement in apparatus for elevating water from wells, &c."

"I claim, first, the employment or use of the springs D, arranged in connection with traveling jackets G, I, and receivers B, B^1, to operate as and for the purpose set forth. 2nd, the means substantially as shown, of connecting the bucket I to the carriage J, to wit, the lever *x*, on the carriage provided with the loop *w*, and the bail w^1 of the bucket, with its pulley *v*, in connection with the pulleys e^1, e^1, on the carriage, and the taper rod g^1, and catch h^1, in the well house L, whereby the bucket is drawn up the wire or way, and dropped and raised from the well."

No. 26,214. David Walling, of Garrettsville, N.Y., for an "Improvement in washing machines."

"I claim the combination of weighted arms D, D, jointed connecting rod H, angular lever G, rod *a*, vibrating dash-board K, and dash-board M, when the same are all arranged and operate as set forth."

No. 26,213. Thos. Tripp, of Buffalo, N.Y., for an "Improved propeller wheel."

"I claim a propeller wheel, having blades formed, in respect to their main propelling surfaces, and also in respect to their outward arcs, substantially as herein described."

No. 26,212. Samuel Thomas and John Thomas, of Cattasauqua, Pa., for an "Improvement in air heating pipes for blast purposes."

"We claim supporting both of the legs of the arched pipes G upon one bottom tube, constructed substantially as described, so that injury to said pipes by the displacement of the bottom tubes will be prevented, and so that each bottom tube, with its connected arched pipes, may be removed and replaced without disturbing any of the remaining arched pipes or bottom tubes, all as set forth."

No. 26,215. Moses D. Wells, of Morgantown, Va, for an "Improved washing machine."

"I claim the reciprocating plunger, operated as described, in combination with the rack piece D, moved by the plunger in its backward motion, and springs *d*, *d*, throwing said rack in place, the whole operated as specified."

No. 26,216. J. Whiteside and H. F. Crabill, of Fuller's Corners, Ind., for an "Improvement in cultivators."

"We claim, first, the arrangement and combination of the hinged curved shovel beams A, A, cross bar D, and gauging wheel F, substantially as and for the purpose set forth. Second, the curved draught beam B, arranged as described, in combination with the cross-bar D, handles G, and rod *h*, substantially in the manner and for the purpose specified."

No. 26,217. R. G. Wilkins, of Burns, N.Y., for an "Improved washing machine."

"I claim, first, the combination of an upper rotary rubber, with revolving slats, with two or more lower rotating rubbers with revolving slats, arranged substantially as described, for the purpose set forth. I also claim arranging the undulating surface of the slats in the upper rubber, so the projections come opposite to each other throughout when the same is combined with a lower rotating rubber, in which the projections of one slat are arranged opposite the depressions in the adjacent slats, and also, when the slats of the upper rubber are arranged, in relation to the slats of the lower rubber, as described, for the purpose herein set forth."

No. 26,218. John Williams, of Ashfield, Mass., for an "Improved washing machine."

"I claim the combination of straight fluted rollers, placed in the box of the machine in the form seen in the model, and two arms connected by a handle at one end, and attached by the other to the extremities of the frame, which holds the four rollers."

No. 26,219. Epenetus A. Willis, of Cold Spring, N.Y., for an "Improvement in floating batteries."

"I claim the combination of the central upright shaft, so applied that it may serve to anchor the battery, and that the battery may revolve around it, and a system of propellers, by which the battery may be either caused to revolve around the said central shaft while at anchor, or propelled from place to place when the said central shaft is elevated, substantially as herein described."

No. 26,220. Thos. W. Wilson and Lewis Raymond, of New York, N.Y., for an "Improved disengaging hook for liberating ship's boats."

"We claim the combination of a detachable hook (consisting of an open eye and pin combined with each other, substantially as herein set forth), with a pulley block for lowering a boat. We also claim the combination of a detachable hook with the davit, or object from which a boat is lowered, by means of a lanyard that is independent of the lowering tackle, in such manner that the combination, as a whole, operates to free the boat from the tackle, by the taughtening of the lanyard."

No. 26,221. Michael Werk, of Cincinnati, Ohio, for an "Improvement in lining tanks for fatty acids."

"I claim the lining of the tank or metal vessel used with wood and cement, in the manner set forth."

No. 26,222. C. M. Wilkins, of Madison, O., for "Improved cheese vats."

"I claim the arrangement of the valves N and O within the water chamber and vat, substantially as described."

No. 26,223. Sylvester P. Wheeler, of Bridgeport, Conn., assignor to Moses H. Wheeler and Co., of same place, for an "Improvement in manufacture of nitrate of silver crayons."

"I claim the manufacturing or forming of sticks of nitrate of silver or lunar caustic with one or more wires or ribbon of metal running through the same, to which the nitrate of silver or lunar caustic adheres, and still holds to the wire, wires, or ribbon (when used or otherwise) when broken."

No. 26,224. Harry Abbott, of North Huron, Ind., assignor to himself and Emerson Abbott, of same place, for an "Improvement in centrifugal water wheels."

"I claim the combination with a centrifugal water wheel A of a valve E, located and arranged within said wheel, so as to turn with it, and at the same time be adjustable while the wheel is in motion by means of the bail *c*, concentric rod H, and adjusting lever I, substantially as herein set forth."

No. 26,225. J. A. Althouse, of Philipstown, Ill., assignor to himself and F. W. Lechtenberger, of New Harmony, Ind., for an "Improvement in machines for raking and loading hay."

"I claim the combination of the stationary rack C, revolving rake I, and vibrating rake K, placed on a mounted frame, and arranged for joint operation, substantially as and for the purpose set forth."

No. 26,226. Gillett Bunting, of Liberty, Ind., assignor to himself and W. M. Jarrell, of same place, for an "Improved churn dasher."

"I claim producing the vibratory movement in the cylindrical churn dasher, by means of the combination of said arms with the crank motion of the driving wheel and intermediate connecting rod, when these are used in combination with the current breaker *k*, as set forth."

No. 26,227. James T. Coxell, of Brooklyn, N. Y., assignor to himself and Edward Jones, of same place, for an "Improved mangle."

"I claim, 1st, the arrangement of the rollers A, B, B, above the table, so that the fabric will be folded by the machine, substantially as herein shown and described. 2nd, the combination with the weighted levers L, of the lifting ropes F, or their equivalents, so that the downward pressure of the roller A may be released, and the roller lifted at the will of the operator, to allow such portions of the linen that have buttons, or other elevations, to pass through the machine uninjured, all as herein shown and described."

No. 26,228. H. E. Fickett and John W. Summers, of Glenn's Falls, N. Y., assignors to H. E. Fickett aforesaid, for an "Improved bed bottom."

"We claim the arrangement of the slats (B, B, B, B), with the springs (C, C, C, C), wires (D, D), central supports (E, E, E, E,) and cross brace F, arranged and operated in the manner described, and for the purpose specified."

No. 26,229. Horatio P. Gatchell, of Ravenna, O., assignor to E. J. Bates, of Bedford, O., for an "Improvement in coffee pots."

"I claim the forming of the walls of the cups B, C, and F, with male and female screws, as described, in combination with the perforated bottoms E and E^1, for the purpose of compressing the ground coffee, and extracting the strength of the drug, by displacement, in the manner specified."

No. 26,230. Wm. Darker, jr., of Philadelphia, Pa., assignor to himself and J. B. Thompson, of same place, for an "Improved mode of applying steam as a motor to city railroad cars."

"I claim, 1st, placing a steam engine and steam generator on the top of a city railroad car, when the engine, by suitable driving mechanism, is connected with the wheels of the car, to propel the same. 2nd, connecting the governor N, a throttle valve and brake, arranged substantially as shown, to operate as set forth. 3rd, the particular arrangement of the brake, formed of the strip Z, on wheel K, and actuated by the movement of the yoke Y, on its bent ends *e*, *e*, connected with the hand lever rod V, substantially as shown, so as to allow of the adjustment of the throttle valve by hand, independently of the automatic connection. 4th, the arrangement of the bar A^1, cam N, lever B^1, and rod *h*, connected with bar A^1, by the arm *g*, whereby the brake is operated automatically as set forth."

No. 26,231. Augustus J. Goffe and Demus Goffe, of Cohoes, N. Y., assignors to Downs and Company, of Seneca Falls, N. Y., for an "Improvement in knitting machines."

"We claim the rotary burr-presser M, having inclined planes *a* between the teeth, in combination with sliding needles, arranged and operating substantially in the manner and for the purpose shown and described. We also claim varying the eccentricity of the groove *f*, by means of the movable pulley *g*, spring *k*, adjusting screw *h*, and friction pulley *l*, substantially in the manner and for the purposes herein described."

No. 26,232. Liveras Hull, of Charlestown, Mass., assignor to himself and A. Wheeler, of Boston, Mass., for an "Improved method of making copal varnish."

"I claim my new manufacture of varnish, as composed of gum, copal, camphene, and alcohol, united in the proportions in a cool state, in a closed or air-tight vessel, substantially as specified."

No. 26,233. Henry W. Joslin, of Trenton, N. J., and A. K. Eaton, of New York, N. Y., assignors to the Joslin India Rubber Company, of New York, for an "Improvement in treatment of india rubber."

"We claim the treatment of the argilaceons red shale of New Jersey, or other similar geological localities, in combination with sulphur and caoutchouc, substantially in the manner and for the purpose herein described, for the manufacture of india rubber fabrics."

No. 26,234. James S. McCurdy, of Brooklyn, N.Y., assignor to J. M. Myers, of New York, N. Y., for an "Improvement in sewing machines."

"I claim the vibrating lever *g*, carrying the shuttle driver *h*, and provided with the spring *k*, to keep the shuttle driver to the raceway, the whole constructed and operating as and for the purposes specified."

No. 26,235. Henry M. Scott, of Portland, Me., assignor to himself and Saml. Adlam, of same place, for an "Improved bed bottom spring."

"I claim the employment of spring hooks A, and clamps D, substantially as described, for the purpose of attaching strips of webbing to the frame of a bedstead."

No. 26,236. Parmenus P. Parkhurst, of Princeton, Mass., for an "Improved ore separator."

"I claim the washing box or chamber *a*, constructed with the pipe *b*, entering near the bottom, to cause a whirl and circulation, as specified, and with the gate or overflow *c*, for the purposes, and as described and shown, and in combination with such washing box (*a*), I claim the receptacle or box *e*, and chamber *f*, to receive the metallic particles, when the gate *d* is raised, as set forth."

No. 26,237. John Thomas, of Indianapolis, Ind., assignor to himself and John M. Lord, of same place, for an "Improvement in piling railroad bars for re-rolling."

"I claim the tie No. 7, or its equivalent, when used for interlocking T-rail, or other old iron, and forming the pile of six rails shown in Figure 1, when constructed and arranged substantially as and for the purposes set forth."

No. 26,238. E. T. Weeks, of Franconia, N. H., assignor to S. H. Badcock, of same place, for an "Improved shoe peg machine."

"I claim the feeding device formed of bar L, to which the jaws are connected, operated by the screw K, ratchet S, and pawl T, lever U, and pitman V, substantially as and for the purpose set forth. I also claim, in connection with the riving or splitting knife, the gauge I, arranged as and for the purpose specified. I further claim the elastic or yielding bar Q, when attached to the arbor M, provided with cam *d*, and used in connection with the segment rack P, curved bars N, O, and jaws *k*, *l*, for the purpose set forth."

Re-issues.

Berresford Maria King, of New York, N. Y., executrix of Valentine Hall, deceased, late of said New York, for an "Improvement in apparatus for cooling liquids."—Patented 20th September, 1859.—Re-issued 22nd November, 1859.

"I claim, first, the employment or use of one or more receivers A, B, with or without the pump E, placed on a tank F, containing ice water, or water at a low temperature, and connected together and to the liquid supply pipe, substantially as and for the purpose set forth. Second, the employment or use of one or more receivers A, B, placed within a tank F, and connected with the barrel or cask H, by means of a siphon I, and with a pump E, within or at the outer side of the tank, for the purpose set forth. Third, the combining of a pump E with one or more receivers A, B, connected together and made to communicate with each other by siphons C, D, when said parts are submerged within a tank F, and made to communicate with the cask or barrel H by means of a siphon I, extending over the top of the tank, substantially as and for the purpose set forth."

Joseph W. Fawkes, of Christiana, Pa., for an "Improvement in machine for plowing."—Patented 26th January, 1858.—Re-issued 22nd November, 1859.

"I claim, 1st, the employment, in combination with the locomotive of a bilge-shaped driving wheel, substantially as set forth. 2d, I do not claim broadly the invention of movable spurs, but I claim the combination of the sliding spurs *k*, *k*, with the bilge-shaped driving wheel E, as herein shown and described. 3rd, the arrangement of the adjustable frame, plows, guage wheel, driving wheel engine, boiler and guiding wheels, as herein shown and described."

Septimus Norris, of Philadelphia, Pa., for an "Improvement in running gear of locomotive engines."—Patented 26th September, 1854.—Re-issued 2nd March, 1858.—Again re-issued 22nd November, 1859.

"I claim the combination of a free vibrating truck, with six or more driving wheels, when the front pair of drivers is placed in advance of the center of gravity of the entire engine, substantially as and for the purposes herein set forth."

William Oldman, of Buffalo, N. Y., for an "Improvement in steam boilers."—Patented 7th June, 1859.—Re-issued 22nd November, 1859.

"I claim, first, the central water space (F^{11}) in the combustion chamber (F), arranged in relation to the annular water space (F^{11}) and to the tubes (D), or their respective equivalents, substantially as within set forth. Second, placing the annular sheet G and horizontal plate I (which with the jacket form the smoke box M) outside of the water space W, and sufficiently above the bottom of the water space to allow the sediment to be conveniently removed from the water space, in communication with the described arrangement of the return tubes D, substantially as set forth."

Designs.

Elemir J. Ney, of Lowell, Mass., assignor to the Lowell Manufacturing Company, for a "Design for carpet patterns."

"I claim the design or pattern for carpets, herein set forth."

ELEMIR J. NEY, of Lowell, Mass., assignor to the Lowell Manufacturing Company, for a "Design for carpet patterns."

"I claim the design or pattern for carpets, herein set forth."

ADDITIONAL IMPROVEMENT.

BENJAMIN F. WELLS, of Georgetown, D. C., for an "Improvement in naval architecture."—Patented 18th October, 1859.—Additional Improvement dated 22nd November, 1859.

"I claim making the lines of every section of a vessel, from the keel to the water line, arcs of circles, when said arcs have separate and independent centres determined, substantially in the manner described."

EXTENSIONS.

CHRISTIAN V. QUEEN, of Peeksville, N. Y., for an "Improvement in forges."—Patented 18th November, 1845.

"I claim the combination of the curved sliding shutters for enclosing the space over the fire, and the device for admitting a draught of air to keep up the combustion during the intervals in which the bellows are not employed, the same being effected for the purpose, and substantially in the manner made known."

JOSEPH E. ANDERSON, of Boston, Mass., for an "Improvement in planing machines."—Patented 21st November, 1859.

"I claim the manner herein set forth of forming, arranging, and combining with the revolving cutter wheel the revolving platform and the endless aprons between which the board to be planed is to be passed, by means of which arrangement and combination it is firmly held along the whole length of such apron, and carried regularly forward without duration."

GEORGE FABER, of Canton, Ohio, for a "Magnetic water gauge for boilers."—Patented 26th November, 1845.

"I claim the method herein described, or any other substantially the same, of indicating the rise and fall of water in a steam boiler or generator by means of an indicator outside thereof actuated by a magnet connected with a float or any other body within the boiler that rises and falls with the water and connected with the magnet, substantially as herein described."

LIST of SPECIFICATIONS published during the week ending 2nd December, 1859.

No.	Price.	SUBJECT-MATTER.
830	9*d.*	Machinery for the manufacture of looped fabrics.
960	3*d.*	Smelting copper.
1028	7*d.*	Spinning and doubling cotton, &c.
1029	3*d.*	Manufacture of sweet figged soft soap.
1030	4*d.*	Treatment of madder, &c.
1031	10*d.*	Machinery for the manufacture of healds.
1032	3*d.*	Leasing yarns.
1033	7*d.*	Pulley.
1034	3*d.*	Railway switches.
1035	6*d.*	Application of eyelet holes to boots and shoes.
1036	3*d.*	Producing solutions of sugar.
1037	1*s.* 3*d.*	Steering apparatus.
1038	8*d.*	Sewing machines.
1039	10*d.*	Obtaining motive power.
1040	4*d.*	Compounds for packing steam pipes and machinery.
1041	3*d.*	Agricultural implements, &c.
1042	7*d.*	Apparatus for heating water for the supply of steam boilers, &c.
1043	10*d.*	Window blind mountings, &c.
1044	4*d.*	Printing.
1045	7*d.*	Manufacture of nitric acid, &c.
1047	3*d.*	Steam engines.
1048	4*d.*	Vulcanizing and colouring caoutchouc, &c.
1049	3*d.*	Steam boilers.
1050	1*s.* 4*d.*	Machinery for combing wool, &c
1051	9*d.*	Machinery for grinding and polishing knives.
1052	3*d.*	Lamp glasses and shades.
1053	8*d.*	Apparatus for cutting and shaping trenails.
1054	3*d.*	Steam boilers.
1055	4*d.*	Apparatus for drawing off, filtering, and gauging liquids.
1056	1*s.* 3*d.*	Machinery for the manufacture of fishing nets, &c.
1057	3*d.*	Obtaining motive power.
1058	11*d.*	Wet gas meters.
1059	3*d.*	Locks.
1060	10*d.*	Machinery for finishing woollen and other cloths.
1061	7*d.*	Gas regulators.
1062	1*s.* 10*d.*	Ships' cooking apparatus.
1063	3*d.*	Manufacture of fringes.
1064	3*d.*	Sewing machines.
1065	2*s.* 6*d.*	Steam engines and boilers.
1066	3*d.*	Safety lamp.
1067	7*d.*	Umbrellas and parasols.
1068	7*d.*	Mine rake.
1069	7*d.*	Electric telegraphs, &c.
1070	4*d.*	Manufacture of pulp for paper, &c.
1071	9*d.*	Sheaves or pulleys.
1072	6*d.*	Agricultural drilling machines.
1073	6*d.*	Apparatus for applying liquids to the throat and air passages.
1074	10*d.*	Manufacture of umbrellas and parasols.
1075	1*s.*	Grass-cutting machine.
1076	6*d.*	Furnaces for the manufacture of iron and steel, &c.
1077	3*d.*	Sizing or dressing yarns or threads for weaving.
1078	3*d.*	Motive power.
1079	10*d.*	Printing presses, &c.
1080	3*d.*	Lubricating compound.
1081	10*d.*	Cultivating implements.
1082	10*d.*	Pumps, &c.
1083	4*d.*	Galvano-plastic models and moulds.
1084	6*d.*	Zinc retort furnaces.
1085	7*d.*	Apparatus for the treatment or disintegration of tea, seeds, &c.
1086	3*d.*	Looms, &c.
1087	3*d.*	Ventilating diving bells, &c.
1088	3*d.*	Hammers, &c.
1089	3*d.*	Apparatus for securing bales of cotton, &c.
1090	4*d.*	Manufacture of colouring matters, &c.
1091	4*d.*	Distillation of coal.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin..
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated* 16*th March* 1744.) Price

---

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in he Colonies; contained in Communications from he Governors, &c. of the different British Colonies n answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*
15. Electricity and Magnetism: their Generation and Applications, price 8*s.* 6*d.*
16. Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing, price 10*s.*

The following are in the press:—

Preparation of Fuel, and Apparatus for its Combustion.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

Museum of Patents, South Kensington.

Number of Visitors for the Week ending 3rd December, 1859.

Mornings - - - -	584
Evenings - - - -	851
Total - - -	1435

Since the opening of the Museum Free Daily (May 12, 1858,)—164,280.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. Woodcroft.

Great Seal Patent Office,
Southampton Buildings.

Gallery of Portraits of Inventors, Discoverers, and Introducers of Useful Arts.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 619. FRIDAY, DECEMBER 9, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2376. To JOHN DARLINGTON, of No. 36, Cannon Street, city of London, Mining Engineer, for the invention of "Improvements in glass furnaces."

On his petition, recorded in the Office of the Commissioners on the 18th day of October, 1859.

2486. To JOHN TALBOT PITMAN, of the American and European Patent Offices, No. 67, Gracechurch Street, London, for the invention of "Improvements in the construction of forges."—A communication from abroad by Joseph H. Hyatt, of Peekskill, state of New York, United States of America.

On his petition, recorded in the office of the Commissioners on the 31st day of October, 1859.

2534. To HENRY GRAFTON, of Chancery Lane, in the county of Middlesex, Engineer, for the invention of "Improvements in bell and other signal apparatus to dwelling houses and other places, which improvements are also applicable to knobs or handles and fastenings of doors, and the like."

On his petition, recorded in the Office of the Commissioners on the 7th day of November, 1859.

2572. To RICHARD HOWSON, of the city of York, Engineer, for the invention of "Improvements in bells and gongs, and in their manufacture."

On his petition, recorded in the Office of the Commissioners on the 12th day of November, 1859.

2629. To JAMES WEBSTER, of Birmingham, in the county of Warwick, Engineer, for the invention of "An improvement or improvements in pressure and vacuum gauges."

2631. To WILLIAM WHITTLE, of Smethwick, near Birmingham, in the county of Warwick, Mechanical Engineer, for the invention of "Improvements in the manufacture of nails, and in machinery to be used in the said manufacture."

2633. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "An improved machine for moulding and pressing bricks."—A communication from abroad by John Williamson Crary, of Pensacola, county of Escambia, and state of Florida, United States of America.

2635. And to GEORGE WILLIAM LENOX, of Billiter Square, in the city of London, for the invention of "Improvements in the manufacture of ships blocks."

On their several petitions, recorded in the Office of the Commissioners on the 21st day of November, 1859.

2639. To BENJAMIN AMSDEN, of St. Alban's, in the county of Hertfordshire, Straw Hat Manufacturer, for the invention of "Improvements in the manufacture of straw and other descriptions of hats and bonnets."

2641. To GEORGE WHITE, of 34, Dowgate Hill, Cannon Street, in the city of London, for the invention of "Improvements in gloves."—A communication from abroad by Mr. Emmanuel Escoubé, of Toulouse, France.

2643. To THOMAS BARNABAS DAFT, of Tottenham, in the county of Middlesex, Civil Engineer, for the invention of "An improvement in coating sheathing metal."

2645. And to CHARLES GREY HILL, of Commerce Square, High Pavement, in the town and county of the town of Nottingham, Lace Manufacturer, for the invention of "An improved goffering machine, together with the apparatus connected therewith."

On their several petitions, recorded in the Office of the Commissioners on the 22nd day of November, 1859.

2647. To WILLIAM HENRY WARD, of the city of Auburn, in the county of Cayuga, and state of New York, one of the United States of North America, for the invention of "A system of signal flags."

2649. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "Improvements in the manufacture of a certain substance to supersede blasting powder."—A communication from abroad by Nicholas Rave the elder, of Curegham, near Brussels, in the kingdom of Belgium.

2651. To EDWARD THOMAS HUGHES, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for the invention of "An improved chemical combination to supersede blasting powder."—A communication from abroad by Nicholas Rave the elder, of Curegham, near Brussels, in the kingdom of Belgium.

2652. To JOSIAH TIMMIS SMITH, of Birmingham, in the county of Warwick, Engineer, for the invention of "An improvement or improvements in heating, puddling, and other reverberatory furnaces used in the manufacture of iron."

2653. To BENJAMIN BAGSTER, of King's Road, Gray's Inn, London, in the county of Middlesex, Printer and Publisher, for the invention of "Improvements in means or apparatus for giving surface finish to paper, which improvements are applicable to copper-plate and other printing, as also to embossing."

2654. To THOMAS EASTMAN, of Southsea, in the county of Hants, Naval Instructor, for the invention of "Improved means of raising the blades of screws employed to propel ships, and apparatus for getting at such screws, and for performing other operations under water."

2655. To THOMAS LISTER, of Sheepbridge Iron Works, Chesterfield, in the county of Derby, Engineer, for the invention of "Improvements in the construction of sanatory privies and water-closets, part of which improvements is applicable as a tap for drawing off liquids."

2656. And to JOHN KNOWLES, junior, of Saint Helen's, in the county of Lancaster, Mining Engineer, for the invention of "An improved apparatus for the prevention of accidents in winding from mines, which apparatus is also applicable for other similar purposes."

On their several petitions, recorded in the office of the Commissioners on the 23rd day of November, 1859.

2657. To FRANCIS PRESTON, of the city of Manchester, Mechanical Engineer, and HENRY WILLIAM GARRETT, of Salford, in the county of Lancaster, Civil Engineer, for the invention of "Improvements in the construction of cartridges."

2658. To JOHN LANGFORD, of Birmingham, in the county of Warwick, Manufacturer, for the invention of "Improvements in inkstands, and in combining with inkstands instruments for holding and damping stamps, labels, and other articles."

2659. To WILLIAM CHRISTOPHER MANIECE, of the city of Manchester, in the county of Lancaster, Salesman, for the invention of "Improvements in cop tubes used in machinery for spinning fibrous substances."

2660. To FREDERIC PRINCE, of Hove, in the county of Sussex, for the invention of "Improved apparatus for reducing the resistance of the atmosphere to the progress of railway trains."

2661. To JAMES FYFE, of Greenock, in the county of Renfrew, North Britain, Brass Founder, for the invention of "Improvements in apparatus for regulating and adjusting the flow and pressure of liquids."

2662. To WILLIAM EASSIE, of the firm of William Eassie and Sons, of High Orchard, in the city of Gloucester, Timber Merchants and Contractors, for the invention of "An improved joint for boarding and planking of all kinds."

2663. To ALFRED HUBART and VICTOR CANTILLON, of Liege, Belgium, Gentleman, for the invention of "Improvements in the manufacture of casks, barrels, and other like vessels of glass, and in machinery or apparatus employed therein."

2664. To WILLIAM SEPTIMUS LOSH, of Wreay Syke, in the county of Cumberland, Esquire, for the invention of "Improvements in the manufacture of paper, and in the preparation of a substance to be employed therein."

2665. And to WILLIAM SANGER COLLINS, junr., of Bristol, in the county of Somerset, and FREDERICK JAMES CHARD, of Warwick Street, Pimlico, in the county of Middlesex, for the invention of of "Improvements in apparatus for propelling vessels."

On their several petitions, recorded in the Office of the Commissioners on the 24th day of November, 1859.

2667. To CHARLES SMITH, ISAAC SMITH, and JOHN SMITH, all of Hopwood, near Heywood, in the county of Lancaster, Manufacturers, for the invention of "Certain improvements in looms for weaving, and in apparatus for cutting the loops to form pile fabrics."

2668. To THOMAS CARR, of Bebington, in the county of Chester, Artificial Manure Manufacturer and Glue Boiler, for the invention of "Improvements in arrangements and mechanism for drying glue, moulded clay, sugar, white lead, and various other substances and articles of manufacture."

2669. To JAMES SIM, of the city and county of Aberdeen, North Britain, Manufacturing Chemist, for the invention of "Improvements in measuring and registering the flow or discharge of liquids."

2670. To ISAAC ALFRED READ, of Smethwick, near Birmingham, in the county of Warwick, Draughtsman, and WILLIAM RENNIE, of Birmingham aforesaid, Manufacturer, for the invention of "An improvement or improvements in connecting brooms with their sticks or handles."

2671. To HINGSTON LINDON, of Plymouth, in the county of Devon, for the invention of "Machinery or apparatus for raising and forcing fluids, which is also applicable for other useful purposes."

2672. To MATTHEW TILDESLEY, of Willenhall, in the county of Stafford, Lock Manufacturer, for the invention of "Improvements in locks and latches."—Partly a communication from abroad by John Bisset, a citizen of the United States of America, residing in New York.

2673. And to GEORGE EDMOND DONISTHORPE, of Leeds, for the invention of "Improvements in apparatus for hackling, dressing, and combing silk waste, and other fibres."

On their several petitions, recorded in the Office of the Commissioners on the 25th day of November, 1859.

2674. To AUGUSTUS STEPHEN LUKIN, of Swansea, in the county of Glamorgan, Civil Engineer, for the invention of "Improvements in apparatus for drawing window blinds."

2675. To FERDINAND SCHEITHAUER, of Pensing, in the empire of Austria, and No. 4, South Street, Finsbury, London, Gentleman, for the invention of "An improved machine for printing woollen and other fabrics."

2677. To CALEB BEDELLS, of Leicester, for the invention of "Improvements in the manufacture of shoes and boots, and in fabrics suitable for use in this manufacture."

2678. To WALKER MOSELEY, of 17 and 18, New Street, Covent Garden, in the county of Middlesex, for the invention of "Improvements in fountain pens."

2679. To MORITZ AUERBACH, of the city of London, Commission Merchant and Agent, for the invention of "Improved apparatus to be applied to omnibuses, stage-coaches, and other similar vehicles, to indicate the distance each passenger travels and the amount of his fare."—A communication from abroad by Eduard Schroder and Julius Amuel, both of Berlin, in the kingdom of Prussia.

2680. To THOMAS WATSON and GEORGE HEALEY, both of Rochdale, in the county of Lancaster, Silk Manufacturers, for the invention of "Certain improvements in the manufacture of silk velvets."

2681. To MORITZ AUERBACH, of the city of London, Commission Merchant and Agent, for the invention of "Improved apparatus, to be applied to cabs, hackney-carriages, and other similar vehicles, to indicate the number of persons carried, the distance travelled, and the amount of fares."—A communication from abroad by Eduard Schroder and Julius Amuel, both of Berlin, in the kingdom of Prussia.

2682. And to WILLIAM MACNAUGHT, of Manchester, in the county of Lancaster, Engineer, and JOHN LEIGH TAYLOR, of Bolton, in the same county, Cotton Spinner, for the invention of "An improved method of increasing the temperature of water for feeding steam-boilers or vessels for generating steam, and in apparatus connected therewith."

On their several petitions, recorded in the Office of the Commissioners on the 26th day of November, 1859.

2683. To JAMES EASTWOOD, of the Railway Iron Works, Litchurch, in the county of Derby, Engineer, for the invention of "Improvements in steam hammers, and in valves to be used therewith."

2684. To JAMES EASTWOOD, of the Railway Iron Works, Litchurch, in the county of Derby, Engineer, for the invention of "Improvements in lathes."

2685. To ENOCH TONEY, of the city and county of Perth, North Britain, Glass Manufacturer, for the invention of "Improvements in apparatus for insulating telegraphic wires or conductors."

2686. To ALEXANDER WILLIAM WILLIAMSON, of University College, and LOFTUS PERKINS, of Francis Street, Gray's Inn Road, Civil Engineer, for the invention of "Improvements in machinery for propelling vessels."

2687. To THOMAS LUCK, of Spalding, in the county of Lincoln, for the invention of "Improvements in apparatus for removing straw from thrashing machines."

2688. To PAUL RAPSEY HODGE, of No. 16, Chalcot Crescent, Primrose Hill, in the county of Middlesex, Civil Engineer, for the invention of "The treatment and use of a new material in making of paper or other compounds of vegetable pulp."

2689. To EDWARD HAMMOND BENTALL, of Heybridge, near Maldon, in the county of Essex, Agricultural Implement Maker, for the invention of "Improvements in machinery for cutting vegetable substances."

2690. To EDWARD HAMMOND BENTALL, of Heybridge, near Maldon, in the county of Essex, Agricultural Implement Maker, for the invention of "Improvements in apparatus for crushing or grinding grain or seeds."

2691. To JOSEPH BOWER, of Hunslet, in the county of York, Chemist, for the invention of "An improved method of preparing clay for the manufacture of crucibles, pots, and earthenware."

2692. To CHARLES SELLS, of Stockwell, in the county of Surrey, Engineer, for the invention of "Improvements in steam engines."

2693. To RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "An improved poultry wagon."—A communication from abroad by Parfait Giot, of Paris.

2694. And to RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in the preparation of red coloring matters or dyes."—A communication from abroad by Messrs. Renard Frères, of Lyons.

On their several petitions, recorded in the Office of the Commissioners on the 28th day of November, 1859.

2695. To FRANCIS HERBERT WENHAM, of Brixton, in the county of Surrey, Engineer, for the invention of "Certain improvements in steam engines."

2696. To HENRY SHARPE, of No. 26, Broad Street Buildings, in the city of London, Merchant, for the invention of "Improvement in the mode of preparing wool for the purpose of carding or combing it with a view to it's being afterwards wove into thread."—A communication from abroad by Hyppolite Dubeux, residing at Lisbon, in Portugal, Merchant.

2697. To James King, of Rochdale, in the county of Lancaster, Cotton Spinner, and John Sutcliffe, of the same place, Overlooker, for the invention of "Certain improvements in and applicable to mules for spinning."

2698. To Henry Oliver Robinson, of 16, Park Street, in the city of Westminster, Civil and Mechanical Engineer, for the invention of "Improvements in Machinery and apparatus for the manufacture of sugar."

2699. To John Barker Berger, of Upper John Street, Fitzroy Square, in the county of Middlesex, Master Mariner, for the invention of "An improved mode of and apparatus for facilitating the calculations required for navigating ships or vessels."

2700. To Leon Numa Dejean, of Paris, in the French empire, Civil Engineer, for the invention of "Improvements in hydraulic motive power."

2701. To Charles Colwell, of Belvidere Place, Southwark, London, Gentleman, for the invention of "An improved means of propelling sea going vessels without the use of either paddle wheel or screw propeller now adopted."

2702. To Thomas Richardson, of Newcastle-on-Tyne, for the invention of "Improvements in the manufacture of certain compounds of soda and potash."

2703. And to Manuel Leopold Jonas Lavater, of the Strand, India Rubber Manufacturer, for the invention of "Improvements in vulcanized india rubber bands."

On their several petitions, recorded in the Office of the Commissioners on the 29th day of November, 1859.

2705. To Thomas Fitton, of the city of Manchester, in the county of Lancaster, Engineer, for the invention of "Improvements in the slide valves of steam engines."

2707. To Samuel Mortimer, of Bradford, in the county of York, Machine Maker, and George Swaine, of the same place, Overlooker, for the invention of "Improvements in machinery or apparatus for spinning and doubling wool or other fibrous substances."

2709. To Joseph Michael Wilson, of the city of Manchester, in the county of Lancaster, Manufacturer, for the invention of "Improvements in finishing woven fabrics, called Arabian stripes or scarfs."

2711. To Jean Baptiste Teil, of Bordeaux, France, Umbrella Maker, for the invention of "Improvements in the construction of umbrellas and parasols."

2713. And to George Jordan Firmin, of the Atlas Chemical Works, Borough Road, Southwark, in the county of Surrey, for the invention of "Improvements in the manufacture of tartaric and citric acids, and certain salts in connection therewith."

On their several petitions, recorded in the Office of the Commissioners on the 30th day of November, 1859.

2717. To Charles Antoine Fournier, of No. 60, Boulevart de Strasbourg, Paris, in the empire of France, Treasurer Agent to the Ministery of War, for the invention of "A process and apparatuses intended to find out the escapes of lighting gas from the conveying pipes, and to determine the precise leaking places of the said pipes."

2719. To Thomas Silver, of Philadelphia, in the state of Pennsylvania, United States of North America, Gentleman, for the invention of "Improvements in apparatus for governing or regulating the speed of steam and other engines."

2721. To Thomas Till, of Birmingham Heath, in the county of Warwick, Engineer and Machinist, for the invention of "Improvements in machinery for the manufacture of horse-nails and other wrought-nails."

2723. To John Paton, of Glasgow, in the county of Lanark, North Britain, Engineer, for the invention of "Improvements in valves."

2725. And to John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for the invention of "Improvements in apparatus for preserving and cooking food."—A communication from abroad by John McCormick, of Madison, Indiana, and Edward Pincus, of Philadelphia, both in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 1st day of December, 1859.

Inventions protected for Six Months by the Deposit of a Complete Specification.

Notice is hereby given that the petition of

2731. George Frederick Smith, of No. 15, Golden Square, in the county of Middlesex, Gentleman, praying for Letters Patent for the invention of "Improvements in smelting and purifying iron and other ores,"—a communication from abroad by Robert William Sievier, late of Upper Holloway, in the county of Middlesex, but now residing at Hamburgh,—was deposited and recorded in the Office of the Commissioners on the 2nd day of December, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

And notice is also further given that the petition of

2740. James Anderson and James Bradshaw, Bakers, Liverpool, Lancashire, praying for Letters Patent for the invention of "Improvements in the construction of the furnaces of bakers' ovens for the purpose of consuming smoke, which improvements are also applicable to the consumption of smoke in other furnaces," was deposited and recorded in the Office of the Commissioners on the 3rd day of December, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

9th December, 1859.

1414. William Donbavand, of the city of Manchester, in the county of Lancaster, Scale Beam and Weighing Machine Manufacturer, and David Crichton, of the same place, Machinist, for an invention of "Improvements in looms for weaving."—Dated 11th June, 1859.

1417. Thomas Frederick Henley, of Denbigh Street, Pimlico, in the county of Middlesex, for an invention of "Improvements in obtaining alcohol or spirit from rice and other grain, and in apparatus for that purpose."—Dated 11th June, 1859.

1433. John Cowan, of the firm of L. Cowan and Sons, of Barnes, in the county of Surrey, Soap Manufacturers, for an invention of "An improved soap."—Dated 14th June, 1859.

1442. Jozé Luis, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "A new siphon meter for liquids."—A communication from abroad by A. Grenet, of No. 10, Rue Mogador, Paris, in the empire of France.—Dated 16th June, 1859.

1444. Leon Barroux, of No. 10, Rue Mogador Paris, in the empire of France, for an invention of "A new system of rail-road, supported on iron soles, with or without wood being used."—Dated 16th June, 1859.

1458. Henri Evette, of Lisieux, department of the Calvados, in the empire of France, Manufacturer, for an invention of "A new system of bedding."—Dated 17th June, 1859.

1534. Daniel Joseph Fleetwood, of Birmingham, in the county of Warwick, Copper Agent, for an invention of "An improvement or improvements in shaping metals."—Dated 27th June, 1859.

2015. Walter Neilson, of Glasgow, in the county of Lanark, North Britain, Engineer, for an invention of "Improvements in steam hammers."—Dated 3rd September, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 7th December*, 1859, *inclusive.*)

5th December.

2892. Heth Ogden, of Salford, in the county of Lancaster, Engineer, and Henry Hibbert, of the same place, Engineer, for an invention of "Improvements applicable to colliery and locomotive engines, for the purpose of arresting or retarding their motion at required intervals, and of indicating the amount of work done in relation to such intervals."—Dated 5th December, 1856.

2902. John Leslie, of Conduit Street, Regent Street, in the county of Middlesex, for an invention of "An improvement in stoves and fireplaces."—Dated 6th December, 1856.

7th December.

2905. Richard Eaton, of 2, Sussex Terrace, New Road, Battersea, Engineer, for an invention of "An improvement in the manufacture of springs when india rubber is used."—Dated 8th December, 1856.

2950. John Turner Wright, of Birmingham, in the county of Warwick, Manufacturer, and Edwin Payton Wright, of Birmingham aforesaid, Manufacturer, for an invention of "A new or improved manufacture of ropes, cords, lines, twines, and mill bandings."—Dated 12th December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 5th December*, 1859.)

1013. George Collier, of Halifax, in the county of York, for an invention of "Improvements in the manufacture of carpets and other fabrics."—Dated 9th December, 1852.

Erratum in Journal of 6th December.

Page 1392. In List of Specifications, &c., after No. 830, for "960" read "962."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

FOREIGN PATENTS.

AUSTRIA.*

LIST of PATENTS which were Delivered, Prolonged, or became Void during the Month of September, 1859.†

(*Communicated by the Austrian Government.*)

1. PATENTS DELIVERED.

1. LOUIS WELLS BROADWELL, of New Orleans, represented by Friedrich Häffner, of Vienna, for "Breech-loading fire-arms."—1 year.—(Secret.)—Dated 8th September, 1859.

2. JOHANN CZERMAK, of Währing, near Vienna, for "Machines for making his Patent wicks for torches.—1 year.—(Secret.)—Dated 14th September, 1859.

3. FRANZ MAYR, of Leoben, for "Improvements in the manufacture of grooved horse shoes from a peculiar kind of rod-iron, without heating."—5 years.—(Public.)—Dated 15th September, 1859.

4. JOHANN FINSTER, of Vienna, for "A composition of caoutchouc, ether and spirit of turpentine, for rendering felt and silk hats elastic."—2nd year.—(Secret.)—Dated 16th September, 1859.

5. SIGISMUND LEONI, of London, represented by Georg Märkl, Vienna, for "A peculiar process for the manufacture of various objects from tallow and other silicates."—1 year.—(Secret.)—Dated 16th September, 1859.—(English Patent, 24th November, 1858.)

6. NATHAN PINKERFELD and SAMUEL FARKAS, of Pesth, for "Rendering foot coverings waterproof without altering their shape."—1 year.—(Secret.)—Dated 16th September, 1859.

7. JOHN HENRY JOHNSON, of London, represented by Eduard Schmidt, of Vienna, for "Improvements in the manufacture of boots and shoes, and in machines employed thereat."—3 years.—(Secret.)—Dated 16th September, 1859.

8. ALFRED LENZ, of Vienna, for "Improvements in thrashing machines, whereby the corn is cleaned by means of a ventilator."—2 years.—(Public.)—Dated 16th September, 1859.

9. WENZEL WORECHOWSKY, of Carolinenthal, near Prague, for "An economical kitchen range, closed hermetically."—1 year.—(Secret.)—Dated 16th September, 1859.

10. NATHAN PINKERFELD and SAMUEL FARKAS, of Pesth, for "Improvements in fitting ladies' dresses."—1 year.—(Secret.)—Dated 16th September, 1859.

11. ROSTHORN, Brothers, of Oed, Lower Austria, for "A peculiar self-acting machine for polishing sheet-iron in a transversal direction."—5 years.—(Secret.)—Dated 16th September, 1859.

12. NATHAN ZILZER, of Waitzen, Hungary, for "A peculiar composition for improving and strengthening sewing materials."—1 year.—(Secret.)—Dated 16th September, 1859.

13. WILHELM REISER, of Constantinople, represented by Joseph Hatos, of Vienna, for "Superseding one of the two Morse's telegraphs used at each station of translation."—5 years.—(Secret.)—Dated 16th September, 1859.

14. AUGUST PETRI and JULIUS SCHAB, of Vienna, for "A peculiar construction of garret windows."—1 year.—(Secret.)—Dated 16th September, 1859.

15. CARL LÖWINGER, of Pesth, for "Improvements in obtaining upholsterers' work by means of peculiar nets."—1 year.—(Secret.)—Dated 16th September, 1859.

16. S. BRANDEIS-WEIKERSHEIM, of Vienna, for "Manufacture of a substance from oxydated carbon of hydrogen for lubricating railway carriages, machines, &c."—1 year.—(Secret.)—Dated 16th September, 1859.

17. MORIZ WEBER, of Vienna, for "A reduction valve with a variable piston valve for reducing the normal expansion of steam to any per-centage, and for obtaining a considerable outlet of steam by the least lift of the valve piston."—1 year.—(Public.)—Dated 16th September, 1859.

18. DESIDERIUS MARCHAL, of Brussels, represented by Georg Märkl, Vienna, for "A peculiar apparatus for washing ores, clay, earth, and solid substances in general."—3 years.—(Public.)—Dated 18th September, 1859.

19. JOHANN ZEIDLER, jun., of Schönlinde, Bohemia, for "A peculiar means of manufacturing wooden pegs for shoes."—5 years.—(Secret.)—Dated 18th September, 1859,

20. ALPHONS GUEYTON, of Paris, represented by Georg Märkl, Vienna, for "A peculiar process for enamelling and ornamenting articles of jewellery, fancy articles, and artistic and other objects."—1 year.—(Public.)—Dated 18th September, 1859.

21. SCHÄFFER and BUDENBERG, of Buckan, near Magdeburg, represented by O. E. Hörmer, of Vienna, for "An alarum of steam boilers."—2 years.—(Public.)—Dated 18th September, 1859.—(Saxon Patent, 7th July, 1859.)

22. SCHÄFFER and BUDENBERG, of Buckau, near Magdeburg, represented by O. E. Hörmer, Vienna, for "A peculiar water-gauge of steam boilers whereby only one opening for steam and water is required, and which may be worked by means of a single cock."—2 years.—(Public.)—Dated 18th September, 1859.—(Saxon Patent, 7th July, 1859.)

* For the Austrian Patent Law, see No. 291 of this Journal.

† In the case of inventions patented in other states as well as in Austria, the Specifications (whether described as "public" or not) may in most cases be consulted, or translations of them be had at the Library of the Commissioners' Office.

23. Schäffer and Budenberg, of Buchan, near Magdeburg, represented by O. E. Hörmer, Vienna, for "A peculiar water-gauge of steam boilers for feeding the same steadily."—2 years.—(Public.)—Dated 18th September, 1859.—(Saxon Patent, 7th July, 1859.)

24. Friedrich Paget, of Vienna, for "Improvements in tents and similar shelters."—1 year.—(Secret.)—Dated 18th September, 1859.

25. Andreas Mattyasovszky, of Vienna, for "A peculiar construction of folding camp-beds."—1 year.—(Public.)—Dated 21st September, 1859.

26. Johann Aich, of Venice, for "A metal composition being a substitute for brass, and in many cases for copper and bronze."—1 year.—(Secret.)—Dated 21st September, 1859.

27. Friedrich Paget, of Vienna, for "Obtaining a mechanical power."—2 years.—(Secret.)—Dated 21st September, 1859.

28. Bernhard Dietsch, of Vienna, for "Improvements in cutting and making gloves without lateral seams."—1 year.—(Public.)—Dated 21st September, 1859.

29. Friedrich Hermann Wilke, of Chemnitz, Saxony, represented by Jacob Fechter, Vienna, for "A peculiar weaving machine."—1 year.—(Public.)—Dated 21st September, 1859.

30. Carl Fink, Johann Heiss, and Daniel Ludosski, of Vienna, for "Improvements in vertical mills, whereby the friction and grinding surfaces are made to revolve with a unifom speed, the grinding beginning from the centre."—1 year.—(Secret.)—Dated 21st September, 1859.

31. Johann Kuhlmann, of Vienna, for "Improvments in the manufacture of silk and felt hats."—1 year.—(Public.)—Dated 18th September, 1859.

32. Carl August Specker, of Vienna, for "A machine for cutting, forging, punching, and holing nuts of iron, or any other metal."—3 years.—(Secret.)—Dated 21st September, 1859.

33. Gabriel J. J. Laury, of Paris, represented by Cornelius Kasper, Vienna, for "A case for spectacles and other similar objects applicable to dresses."—1 year.—(Secret)—Dated 21st September, 1859.

34. Anton Weisse and Arnold Niederer, of Prague, for "A centrifugal bolter and corn mill."—1 year.—(Secret.)—Dated 25th September, 1859.

35. Jacob Mellinger and Joseph Engel, of Pesth, for "Improvements in the manufacture of flaps and collars of men's dresses."—1 year.—(Secret.)—Dated 25th September, 1859.

36. Barbara Minich, of Rohr, Lower Austria, for "An apparatus which may be used as a water and steam motor."—1 year.—(Secret.)—Dated 27th September, 1859.

37. Hirsch Labin, of Jassy, represented by Lipa Heller, Vienna, for "A mechanical apparatus for musical instruments and telegraphs."—1 year.—(Secret.)—Dated 27th September, 1859.

38. Ignaz Stöber, of Vienna, for "Covers of sheet iron with grates, or of tinned copper, for protecting food from insects, and from running over whilst boiling."—1 year.—(Secret.)—Dated 27th September, 1859.

39. Johann Mathias Forster, of Dresden, represented by Dr. Max von Schickh, Vienna, for "Improvements in his patent mechanical writing desk."—1 year.—(Public.)—Dated 29th September, 1859.

40. Jacob Löwy, of Pesth, for "Improvements in renovating old and damaged furniture by means of insoluble glue."—2 years.—(Secret.)—Dated 29th September, 1859.

41. Heinrich Seifert, of Vienna, for "Improvements in the cushions of billiard tables."—1 year.—(Secret.)—Dated 29th September, 1859.

42. Franz Heine, of Prague, for "Manufacture of so-called 'Schemnitz clay smoking-pipes from porcelain."—1 year.—(Public.)—Dated 29th September, 1859.

43. Alois Quenzer, sen. and jun., for "Manufacture of foot-coverings for invalids from woollen felt."—1 year.—(Public.)—Dated 29th September, 1859.

44. Jacob Waldstein, of Vienna, for "A double telescope, which may be converted into a field-telescope and microscope."—1 year.—(Public.)—Dated 30th September, 1859.

45. Wilhelm Pollak, of Vienna, for "Rectifying common olive oil so as to be employed for technical purposes."—1 year.—(Secret.)—Dated 30th September, 1859.

---

2. Patents Prolonged.

1. Thomas James Sloan and Jopy, brothers, and Co., for "Improvements in the manufacture of wooden and other screws."—2nd year.—(Scret.)—Dated 18th August, 1858.

2. Johann Georg Popp, for "So-called anatherin tooth paste."—2nd year.—(Secret.)—Dated 9th August, 1858.

3. Anton Heinz, for "Obtaining enamelled kitchen vessels from single pieces of sheet iron without rivets and hammered down edges."—3rd year.—(Secret.)—Dated 19th July, 1857.

4. Friedrich Hilbert, for "Improvements in double action force and lift pumps."—2nd year.—(Secret.)—Dated 20th October, 1858.

5. James M. Ross, for "Improvements in the construction of cast-iron wheels of railway carriages."—2nd year.—(Public.)—Dated 23rd August, 1858.

6. Michael Winkler, for "Improvements in oil-prints of sign boards."—7th year.—(Secret.)—Dated 22nd September, 1853.

7. Laurenz Mayer, for "Improvements in his Patent inodorous closets."—6th year.—(Public.)—Dated 29th August, 1854.

8. Franz Bürckholdt, for "An apparatus for distillation."—2nd year.—(Public.)—Dated 13th September, 1858.

9. Johann Baptist Aklin, for "A mechanical apparatus for substituting paper for pasteboard in jacquard looms."—5th year.—(Public.)—Dated 18th September, 1855.

10. Anton Pius de Rigl, (Stephan Szabo, assignee), for "Peculiar double windows with double panes of glass."—3rd year.—(Public.)—Dated 25th August, 1857.

11. Carl Schuh (Ludwig Faber, assignee), for "Apparatus for obtaining hand reliefs and plastic works, by means of gutta percha forms."—8th year.—(Secret.)—Dated 30th August, 1852.

12. Ferdinand Schwenk, for "A rolling screw and spiral."—2nd year.—(Public.)—Dated 23rd August, 1858.

13. Carl Engelbrecht (Gustav Hoyer, assignee), for "A mechanical salt-licking stone for animals."—2nd year.—(Secret.)—Dated 30th August, 1858.

14. Meier Rotmüller, for "Improvements in the manufacture of men's dresses."—2nd and 3rd year.—(Secret.)—Dated 23rd September, 1858.

15. Wilhelm Schmid and Franz Arend, for "A corn-cutting machine."—3rd year.—(Secret.)—Dated 1st August, 1858.

16. Anton Olbrich and Florian Bienert, for "A machine for the manufacture of iron nails by the cold process."—8th year.—(Secret.)—Dated 30th August, 1852.

17. Ignaz Steinreich and Ignaz Steinberger, for "Improvements in ladies garments."—2nd year.—(Secret.)—Dated 15th September, 1858.

18. Johann Sherer and Joh. Lorenz, for "Improvements in the construction of looms for making velvet ribbons."—6th and 7th years.—(Secret.)—Dated 14th September, 1854.

19. Lorenz Beer, for "Improvements in moveable economical kitchen ranges."—5th year.—(Secret.)—Dated 5th September, 1855.

20. Gabriel Franz Ianauscheck, for "Improvements in steam-saws for sawing boards."—4th year.—(Secret.)—Dated 13th October, 1856.

21. Eduard Schmidt and Friedrich Paget, for "Improvements in railway-crossings."—3rd year.—(Secret.)—Dated 3rd September, 1857.

22. Elias Weiszkoph (Ignaz Schuck, assignee), for "Improvements in the manufacture of lighting stones."—6th year.—(Secret.)—Dated 9th December, 1854.

23. Michael Holzer and Helene Zörrer, for "A metalline cleaning powder."—3rd year.—(Secret.)—Dated 1st September, 1857.

24. Friedrich Schäfer, for "A peculiar means of propelling vessels."—2nd year.—(Secret.)—Dated 11th September, 1858.

25. Max Krauss, for "Improvements in the manufacture of cloaks and mantlets of ladies."—2nd year.—(Public.)—Dated 11th September, 1858.

26. Friedrich Paget, for "Improvements in axle boxes of railway carriages, locomotives, and tenders."—8th year.—(Public.)—Dated 16th September, 1852.

27. Johann Peter Klein and Wilhelm Zipser, for "A machine for teaseling cloth."—4th year.—(Secret.)—Dated 18th October, 1856.

28. Eduard Beckmann-Olofson, for "A diamond colour for protecting articles from rust."—3rd year.—(Secret.)—Dated 19th September, 1857.

29. Alois Baumann, for "A powder for destroying flies."—3rd year.—(Secret.)—Dated 19th September, 1857.

30. Johann Peter Klein and Wilhelm Zipser, for "Improvements in machines for teaseling cloth."—3rd year.—(Secret.)—Dated 3rd October, 1857.

31. Salomon Wallerstein, for "A machine for cutting cloth."—2nd year.—(Secret.)—Dated 21st September, 1858.

32. Robert Wilhelm Thode, for "Machines for reducing fibrous substances into paper pulp."—3rd year.—(Public.)—Dated 9th October, 1858.

33. Bontin, Poinsot, and Company, and Eduard Victor Fresson, for "A moveable furnace for charring wood and other fuel."—2nd year.—(Public.)—Dated 13th November, 1858.

34. Arnauld Banco, for "Improvements in machines for reducing beetroot for sugar works."—2nd year.—(Secret.)—Dated 11th December, 1858.

35. Nathan Schönwald (Samuel Weiss, assignee), for "Improvements in the manufacture of tallow candles."—2nd year.—(Secret.)—Dated 17th September, 1858.

36. Ignaz Michael Firnstahl, for "An eccentric double printing machine for neck kerchiefs."—4th year.—(Secret.)—Dated 18th September, 1856.

37. Carl and Caroline Reisser, for "Improvements in paper for destroying flies and insects without using arsenic."—2nd year.—(Secret.)—Dated 22nd September, 1858.

---

3. Patents which have become Void.*

1. Ignaz Sturm and Carl Toot, for "A mode of fastening orders, buttons, clasps, &c."—Dated 24th September, 1857; disclaimed 6th May, 1859.

2. Jacob Franz Heinrich Hemberger, for "Improvements in revolving fire-arms."—Dated 3rd July, 1854; expired 3rd July, 1859.

3. Jacob Franz Heinrich Hemberger, for "Improvements in machines for heckling flax, hemp, china-grass, and other fibrous substances."—Dated 22nd July, 1854; expired 22nd July, 1859.

4. Jacob Franz Heinrich Hemberger, for "Improvements in applying caoutchouc and gutta-percha."—Dated 3rd September, 1852; annulled 5th November, 1852, because of its not having been worked.

5. Jacob Franz Heinrich Hemberger, for "Improvements in machines for combing flax, wool, and other fibrous substances."—Dated 31st October, 1854; annulled 3rd September, 1859, because of its not having been worked.

6. Jacob Franz Heinrich Hemberger, for "Improvements in machines for spinning flax, hemp, &c."—Dated 30th November, 1854; annulled 3rd September, 1859, because of its not having been worked.

---

* The Specifications of these Patents may be consulted in the original language, or translations be had at the Public Free Library.

7. Jacob Franz Heinrich Hemberger, for "Improvements in the construction of fire-arms."—Dated 6th August, 1855; annulled 3rd September, 1859, because of its not having been worked.

8. Jacob Franz Heinrich Hemberger, for "Improvements in machines for combing fibrous substances."—Dated 4th September, 1855; annulled 3rd September, 1859, because of its not having been worked.

9. Carl Kauffmann, for "A peculiar construction of cylinders of solar-oil gas lamps."—Dated 7th November, 1851; disclaimed 9th August, 1859.

10. Ciprien Marie Jessié du Motay and Jean Jacques Fontaine, for "A process for "Refining iron in refining and puddling furnaces."—Dated 29th April, 1856; expired 29th April, 1859.

11. Laurenz Schuler, for "An apparatus for preventing the heating of the wheels of locomotives, and for superseding lubrication, if required."—Dated 14th March, 1857; expired 14th March, 1859.

12. Jean Fabien Magnin, for "Apparatus for boring the soil."—Dated 14th March, 1857; expired 14th March, 1859.

13. Anton Adrian Paillete, for "Improvements in the manufacture of iron and steel."—Dated 19th July, 1857; expired 19th July, 1859.

14. Anton Adrian Paillete, for "Improvements in the manufacture of iron according to the Catalonian method."—Dated 19th July, 1857; expired 19th July, 1859.

15. Saurenz Cordier, for "A safety apparatus for closing boxes, chests, &c."—Dated 13th March, 1858; expired 13th March, 1859.

16. Peter Alphons de Brussant, for "A peculiar rotary apparatus, called 'Circonvertor.'"—Dated 16th March, 1858; expired 16th March, 1859.

17. Peter Alphons de Brussant, for "A weighing machine with a dial for weighing-bridges and steelyards, manometers, &c."—Dated 23rd May, 1858; expired 23rd May, 1859.

18. Alphons Prestrel, for "An apparatus for washing sand mixed with precious metals."—Dated 26th June, 1858; expired 26th June, 1859.

19. Heinrich Adolph Joly and Peter Hieronymus Desiderius Petit, for "An apparatus for stopping fiery horses."—Dated 8th July, 1858; expired 8th July, 1859.

20. Louis Durand, for "A steam generator with a continuous circulation of water and a large heating surface for locomotives, steam-boats, and industrial purposes."—Dated 8th July, 1858; expired 8th July, 1859.

21. Carl Paul Gabriel Sagey, for "Improvements in the treatment of turf, and in the carbon of hydrogen contained therein."—Dated 18th July, 1858; expired 18th July, 1859.

22. Friedrich Paget, for "Improvements in steam engines."—Dated 31st July, 1856; expired 31st July, 1859.

23. Friedrich Paget, for "Obtaining alum and clay cakes from certain aluminites (oxide of aluminium)."—Dated 11th August, 1856; expired 11th August, 1859.

24. Heinrich Knöster, for "Improvements in xylographic colour-printing."—Dated 26th June, 1858; expired 26th June, 1859.

25. Dr. Rudolph Böttger, for "Indelible ink."—Dated 29th November, 1856; disclaimed 16th August, 1859.

26. Leopold Alexander Griff, for "Tooth-powder."—Dated 30th April, 1849; expired 30th April, 1859.

27. Joseph Heinzen, for "Liquid orchal for printing and dyeing."—Dated 18th April, 1851; expired 18th April, 1859.

28. Nathan Ignaz Szmik, for "A continuous apparatus for purifying water."—Dated 15th March, 1853; expired 15th March, 1859.

29. Anton Ehmann, for "Improvements in the construction of stoves and kitchen-ranges."—Dated 7th March, 1854; expired 7th March, 1859.

30. Wilhelm Schulze, for "Manufacture of hydraulic cement from substances not used thereto till now."—Dated 7th March, 1854; expired 7th March, 1859.

31. Joseph Homolatsch, for "Manufacture of a steady liquid for photographic glass-matrices, and tincture belonging thereto."—Dated 9th March, 1854; expired 9th March, 1859.

32. Franz Flurschütz, for "So-called 'Zephir-carriages."—Dated 11th March, 1854; expired 11th March, 1859.

33. Carl and Emil Preller, for "A complete machine for combing wool, silk, cotton, or other fibrous substances."—Dated 16th March, 1854; expired 16th March, 1859.

34. Franz Leeb, for "Improvements in stoves."—Dated 24th March, 1854; expired 24th March, 1859.

35. Sellier and Bellot, for "Applying zinc to the manufacture of capsules."—Dated 2nd March, 1855; expired, 2nd March, 1859.

36. Carl Ferdinand Mally, for "Manufacture of manure."—Dated 5th March, 1855; expired 5th March, 1859.

37. Gotthold Reich, for "A process for cooling the spodium employed in filtering the juice of sugar."—Dated 5th March, 1855; expired 5th March, 1859.

38. Friedrich Loeeffler, for "Improvements in saddles."—Dated 9th March, 1855; expired 9th March, 1859.

39. Johann George Popp, for "Improvements in iron fire-proof and safety chests."—Dated 16th March, 1855; expired 16th March, 1859.

40. Emanuel Feigl and David Winternitz, for "Improvements in the manufacture of washing soap."—Dated 14th March, 1855; expired 14th March, 1859.

41. Wilhelm Smyers-Viliquet, for "A new system of gas lighting, applicable to railways, vessels, carriages, houses, &c."—Dated 27th March, 1855; expired 27th March, 1859.

42. Gabriel Barthe, for "Improvements in force and lift pumps."—Dated 29th March, 1855; expired 29th March, 1859.

43. Franziska Richard, for "Improvements in playing cards."—Dated 4th March, 1856; expired 4th March, 1859.

44. Eduard Skallitzky, for "Obtaining letters for inscriptions by means of cut out patterns."—Dated 5th March, 1856; expired 5th March, 1859.

45. Etienne Abram Maccaud, for "An apparatus for finding out gas escapes."—Dated 27th March, 1856; expired 27th March, 1859.

46. Gustav Fehr, for "A vacuum apparatus for obtaining a thick corn extract, applicable to various technical purposes."—Dated 4th March, 1857; expired 4th March, 1859.

47. Ferdinand Machts, for "Improvements in J. Snidar's machine for cutting wood screws."—Dated 9th March, 1857; expired 9th March, 1859.

48. Andreas Gyürky, for "Improvements in his apparatus for propelling and steering vessels, as patented 28th August, 1855."—Dated 9th March, 1857; expired 9th March, 1859.

49. Wenzel Seykora, for "A dyeing apparatus."—Dated 10th March, 1857; expired 10th March, 1859.

50. Joseph Nicora, for "Improvements in stoves."—Dated 14th March, 1857; expired 14th March, 1859.

51. Carl Lauth, for "Improvements in dyeing and printing fibrous substances, tissues, and fabrics."—Dated 14th March, 1857; expired 14th March, 1859.

52. Valerian Kotodziejsky, for "Improvements in the construction of double cylinder expansion and condensing steam engines."—Dated 15th March, 1857; expired 15th March, 1859.

53. Franz Schreder, for "Improvements in tiles."—Dated 25th March, 1857; expired 25th March, 1859.

54. Franz Schuler, for "Chemical apparatus for obtaining lighting gas."—Dated 11th March, 1858; expired 11th March, 1859.

55. Sante Meloncini Fevela, for "Improvements in double-action force and lift pumps."—Dated 13th March, 1858; expired 13th March, 1859.

56. Thomas Holt, for "Improvements in cocks for liquids."—Dated 15th March, 1858; expired 15th March, 1859.

57. Leopold Knopp and Leopold Veith, for "Improvements in casting inscription plates of a composition of zinc."—Dated 15th March, 1858; expired 15th March, 1859.

58. Carl Eugen Lecointe, for "Using envelopes letter paper for advertizing."—Dated 15th March, 1858; expired 15th March, 1859.

59. Friedrich Max Bode, for "A peculiar mode of coupling the axles of revolving frames of locomotives or the axles of tenders with the driving axle of engines."—Dated 17th March, 1858; expired 17th March, 1859.

60. Rudolph Scheller, for "Manufacture of coal bricks from coal dust."—Dated 18th March, 1858; expired 18th March, 1859.

61. Joseph Ferstl, for "Manufacture of chemically pure acetic acid from pure wood vinegar, applicable to all technical and scientific purposes, and also to the manufacture of vinegar'"—Dated 29th March, 1858; expired 29th March, 1859.

62. Samuel Roth, for "A peculiar machine for obtaining wooden pegs for shoes."—Dated 29th March, 1858; expired 29th March, 1859.

63. Johann Rattich, for "Machines for making wooden pegs of any size for shoes."—Dated 29th March, 1858; expired 29th March, 1859.

64. Mendl, Brothers, for "Improvements in the manufacture of gas burners of wrought iron with a double screw."—Dated 29th March, 1858; expired 29th March, 1859.

65. Joseph Schediwy, for "Improvements in the manufacture of torches."—Dated 1st May, 1858; expired 1st May, 1859.

66. Franz Dollinger, for "Improvements in planes."—Dated 9th August, 1858; expired 9th August, 1859.

67. Michael Kohl, for "A coffee machine."—Dated 2nd August, 1858; disclaimed 30th June, 1859.

68. Robert Mushet, for "Improvements in the manufacture of wrought iron and steel from refined and uncarbonized pig iron."—Dated 29th May, 1857; expired 29th May, 1859.

69. Carl Waltjen and Company, for "A machine for obtaining sand moulds for castings, especially for pipes."—Dated 22nd August, 1858; expired 22nd August, 1859.

BELGIUM.*

List of Patents Delivered on the 1st December, 1859.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 614 of this Journal.)

7758. L. Duparcq, of Ghent, for "Manufacture of cylinders of rolling mills."—Dated 13th July, 1859.

8187. J. Erwood, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in the manufacture of glass, sand or

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office where also translated Indexes may be consulted.

emery paper."—Dated 4th November, 1859.—(English Patent,

8188. J. B. Falguière, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A steam fire-engine."—Dated 4th November, 1859.—(Original Patent, 10th October, 1857.)

8189. G. F. Lombard, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A steam-engine."—Dated 4th November, 1859.—(Original Patent, 3rd October, 1857.)

8190. C. R. Neustadt, represented by H. Biebuyck, of Brussels, for "Improvements in cranes and other apparatus for raising weights without using drums, and by means of Welsh chains."—Dated 4th November, 1859.

8191. J. de Barry, represented by H. Biebuyck, of Brussels, for an imported invention of "A machine for making cigars."—Dated 4th November, 1859.—(French Patent, 27th October, 1859.)

8192. F. V. Mouilleron, represented by H. Biebuyck, of Brussels, for an imported invention of "A cryptographic machine for diplomatic and other correspondence."—Dated 4th November, 1859.—(French Patent, 15th October, 1859.)

8193. A. Mosselman, represented by X. Raclot, of Brussels, for "An aromat-electric belt."—Dated 4th November, 1859.

8194. J. Brunfaut, Brothers, and Co., represented by L. Haut, of Namur, for "A process for completely removing the sulphur from metallic sulphides, and manufacture of sulphur."—Dated 5th November, 1859.

8195. F. de Lannoy, of Schaerbeck, a Patent of Improvement for "An apparatus for mincing meat."—Dated 5th November, 1859.

8196. J. Plantier, represented by A. Picard, of Brussels, for an imported invention of "Jointed brushes."—Dated 5th November, 1859.—(French Patent, 12th March, 1859.)

8197. W. Avery, represented by X. Raclot, of Brussels, for an imported invention of "Improvements in the manufacture of wooden screws."—Dated 5th November, 1859.—(English Patent, 16th March, 1859.)

8198. V. Corne, represented by O. Daillencourt, of Brussels, for an imported invention of "A solidifying and disinfecting compound for the manufacture of manure and embalming."—Dated 5th November, 1859.—(French Patent, 9th November, 1859.)

8199. J. L. Langlois, represented by O. Daillencourt, of Brussels, for "Metal railway sleepers."—Dated 5th November, 1859.—(French Patent, 25th October, 1859.)

8200. E. Juzet, represented by Daillencourt, of Brussels, for an imported invention of "Improvements in the rolling stock of railways."—Dated 5th November, 1859.—(French Patent, 15th January, 1859.)

8201. J. Engelmann, of Charleroi, for "An apparatus with a variable expansion, and without slides, for distributing steam, worked by means of a single eccentric."—Dated 7th November, 1859.

8202. A. Coquilhat, of Liége, for "A machine for rifling guns."—Dated 5th November, 1859.

8203. H. Coste, represented by X. Raclot, of Brussels, for an imported invention of "An apparatus for filtering water, applicable to all branches of industry."—Dated 7th November, 1859.

8204. C. J. L. Maire and J. B. F. J. Vallié, represented by H. Biebuyck, of Brussels, for an imported invention of "Using water or water-steam as auxiliary fuel in metallurgic processes."—Dated 7th November, 1859.—(French Patent, 20th September, 1859.

8205. J. Mac Cormick and Ed. Pincus, represented by H. Biebuyck, of Brussels, for an imported invention of "An apparatus for cooking food and fruit."—Dated 7th November, 1859.—(French Patent, 15th October, 1859.)

8206. J. Sidebottom, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the manufacture of tubes or cops, and in apparatus for placing the same on spindles."—Dated 7th November, 1859.—(French Patent, 26th October, 1859.

8207. J, F, Willans, represented by J. Piddington, of Brussels, for an imported invention of "Utilizing peat for the treatment of metals and mineral and alkaline substances."—Dated 7th November, 1859.—(English Patent, 4th May, 1859.)

8208. E. A. Cuche, represented by M, Gloesener, of Liége, for an imported invention of "Improvements in galvanizing metallic wire."—Dated 7th November, 1859.—(French Patent, 24th August, 1859.)

8209. H. Z. Parent, represented by L. J. Coqu, of Tournay, for an imported invention of "Manufacture of figured stuffs on power-looms,"—Dated 8th November, 1859.

8210. L. J. Counet, of Feneur, for "Revolvers."—Dated 8th November, 1859.

8211. G. Laport, of Liége, for "Breech-loading fire-arms, with Lefaucheux cartridges."—Dated 9th November, 1859.

8212. J. Pauchenne, of St. Remy, a Patent of Improvement for "Lever and hinged revolvers."—Dated 7th November, 1859.—(Original Patent, 26th May, 1859.)

8213. E. Dormoy, of Mons, for "A feeding float with a steady level."—Dated 8th November, 1859.

8214. C. F. Bailly, represented by X. Raclot, of Brussels, a Patent of Improvement for "A complete system of washing, bleaching, and drying linen."—Dated 8th November, 1859.—(Original Patent, 29th December, 1858.)

8215. F. Deppe, of Brussels, for "Elastic belts of trousers, drawers, &c."—Dated 9th November, 1859.

8216. A. Reper, of Brussels, for "Safety pockets of dresses."—Dated 10th November, 1859.

8217. E. Taylor, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in the construction of railways."—Dated 10th November, 1859.—(English Patent, 12th October, 1859.)

8218. Ch. Bacon, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in glass globes and shades of lamps and gas

burners."—Dated 10th November, 1859.—(English Patent, 3rd November, 1859.)

8219. A. PINARD, represented by J. Piddington, of Brussels, for an imported invention of "A kind of passe-partout of frames."—Dated 10th November, 1859.—(French Patent, 20th October, 1859.)

8220. P. MARCOTTY of Montegnée, for "A system of parachutes for mines."—Dated 10th November, 1859.

8221. J. H. J. DELCHEF, of Liége, for "Improvements in breech-loading shooting guns."—Dated 10th November, 1859.

8222. N. H. J. THION, of Liége, for an "Apparatus for loading, compressing, and priming Lefaucheux' cartridges."—Dated 11th November, 1859.

8223. A. SOUHEUR-FOSSOUL, of Seraing, for "A machine for working coal-pits, mines, quarries, &c."—Dated 12th November, 1859.

8224. F. VAN HECKE, of Bruges, for "A thrashing machine."—Dated 12th November, 1859.

8225. GREENWOOD, BATLEY, and DOCKRAY, represented by R. Busk, of Ghent, for an imported invention of "Improvements in machines for spinning flax, hemp, and other filamentous substances."—Dated 10th November, 1859.—(English Patent, 20th January, 1859.

8226. J. M. S. MELOTTE and C. J. THIESSET, represented by J. Sainthill, of Brussels, for an imported invention of "A so-called 'Melochromographic process for printing fabrics."—Dated 10th November, 1859.—(French Patent, 4th November, 1859.)

8227. EUG. GRENET, represented by J. Piddington, of Brussels, for "An electric regulator."—Dated 11th November, 1859.

8228. G. F. BRADBURY, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in certain apparatus for sewing machines."—Dated 11th November, 1859.—(English Patent, 27th January, 1859.)

8229. AUG. GODCHAUX, represented by X. Raclot, of Brussels, for an imported invention of "Improvements in obtaining models of calligraphy, drawings, and ruled paper by means of printing."—Dated 11th November, 1859.—(French Patent, 8th September, 1859.)

8230. EUG. VIEUXTEMS, of Limbourg, for "A gas furnace for heating generators of steam engines."—Dated 12th November, 1859.

8231. EUG. VIEUXTEMS, of Limbourg, for "A machine for scutching cotton."—Dated 12th November, 1859.

8232. D. MULKAY, of Brussels, for "Manufacture of springs of tempered steel for crinoline petticoats."—Dated 12th November, 1859.

8233. J. L. ENGLER and E. F. KRAUSS, represented by O. Daillencourt, of Brussels, for an imported invention of "Improvements in the manufacture of sugar-moulds of varnished or enamelled sheet-iron."—Dated 12th November, 1859.

8234. P. E. BRISSON, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A system of mills."—Dated 15th November, 1859.—(Original Patent, 11th May, 1859.)

8236. J. F. BELLEVILLE, represented by H. Biebuyck, of Brussels, for an imported invention of "An inexplosive generator with equipoised vaporization."—Dated 15th November, 1859.—(French Patent, 8th November, 1859.)

8237. H. A. D'ARBEL, senr., represented by A. Hernelle, of St. Josse-ten-Noode, for an imported invention of "A complete portable lighting and heating apparatus,"—Dated 15th November, 1859.—(French Patent, 26th October, 1859.)

8238. A. LIERNEUX, of Verviers, for "An economical stove."—Dated 15th November, 1859.

8239. P. FAURE and J. PERNOD, represented by J. Lantheere, of Ghent, for an imported invention of "Utilizing the residue of the manufacture of garancine."—Dated 15th November, 1859.—(French Patent, 3rd June, 1859.)

8241. A. L. BILLIET-GODEFROID, represented by F. Boulogne-Bochard, of Tournai, for an imported invention of "Applying various kinds of plain tissues, plaited and twilled dimity, to the manufacture of so-called 'Isabelle bands on common looms."—Dated 18th November, 1859.—(French Patent, 29th January, 1859.)

8242. E. BOUCQUEAU, of St. Josse-ten-Noode, for "Manufacture of rafters of rolled iron, by means of old rails of railways."—Dated 18th November, 1859.

8243. ED. VANCOPPENOLLE, of Berchem-lez-Audenarde, for "An apparatus for cutting roots."—Dated 17th November, 1859.

8244. H. PHILLIPS and J. BANNEHR, represented by A. Anoul, of Ixelles, for an imported invention of "Manufacture of manure."—Dated 18th November, 1859.—(English Patent, 27th October, 1859.)

8245. C. C. CAIQUE, represented by X. Raclot, of Brussels, a Patent of Improvement for "An air reservoir of corn mills."—Dated 18th November, 1159.—(Original Patent, 10th May, 1859.)

8246. P. MARCOTTY, of Montegnée, for "A system of tubular bridges with moveable abutments."—Dated 16th November, 1859.

8247. C. DANDOY and D. D. RENNOTTE, of Liége, a Patent of Improvement for "Fastening revolving fire-arms."—Dated 18th November, 1859.—(Original Patent, 17th November, 1856.)

8248. CH. SETON, represented by J. Piddington, of Brussels, for an imported invention of "Improvements in the manufacture of carriage-wheels."—Dated 14th November, 1859.—(English Patent, 19th October, 1859.)

8249. F. LESPADIN, represented by C. Wenseleers, of Brussels, for an imported invention of "A mould for making bottles and other glass articles."—Dated 19th November, 1859.

8250. V. Marie, represented by A. Hennelle, of Brussels, for "A system of valves for water-pipes." —Dated 19th November, 1859.

8251. W. H. Ward, represented by F. Anthoine, of Brussels, for an imported invention of "Tanning by means of electricity."—Dated 19th November, 1859.—(French Patent, 5th November, 1859.)

8252. G. M. Jacob, of Liége, for "A fireplace and furnace for steam-boilers."—Dated 21st November, 1859.

8253. J. Kirsch, of Liége, for "Improvements in lamps."—Dated 21st November, 1859.

8256. F. Marchal, represented by C. Garcin, of Brussels, for an imported invention of "An apparatus for indicating the excess of steam-pressure in generators." — Dated 21st November, 1859. — (French Patent, 25th October, 1859.)

8255. F. Coignet, represented by J. Piddington, of Brussels, for an imported invention of "Preparing and using plastic beton."—Dated 1st November, 1859.—(French Patent, 10th November, 1859.)

8257. P. Bazin and Co., of Mons, for "An apparatus for instantaneously lighting lamps."—Dated 22nd November, 1859.

8258. J. Rothenheisler, of Antwerp, for "A rocking balance."—Dated 23rd November, 1859.

8260. Goudenove and Féret, represented by D. De Vos-Verraert, of Brussels, for an imported invention of "A system of closing and regulating boxes for gas-lighting apparatus."—Dated 22nd November, 1859.—(French Patent, 8th August, 1858.)

8261. N. Rave and his Brother, of Cureghem, for "A chemical product, being a substitute for gunpowder in blasting."—Dated 22nd November, 1859.

8263. N. L. Dejean, represented by H. Biebuyck, of Brussels, for an imported invention of "An hydraulic engine."—Dated 22nd November, 1859. —(French Patent, 23rd February, 1858.)

8264. E. Rettig, represented by P. Bals, of Brussels, for an imported invention of "Anchors."—Dated 22nd November, 1859. — (English Patent, 27th August, 1859.)

8265. P. Jochem, represented by P. Bals, of Brussels, for an imported invention of "Improvements in breaks of railway and other carriages."—Dated 22nd November, 1859.—(French Patent, 8th November, 1859.)

8266. P. A. Viette, of Saint Josse-ten-Noode, a Patent of Improvement for "Processes for relief or intaglio engravings on stone, glass, and metals." —Dated 22nd November, 1859.—(Original Patent, 10th January, 1859.)

FRANCE.

Current List of Patents of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

Note.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

41,029. Ahsbahs, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in machines for cutting veneers."— Dated 19th May, 1859.

41,030. Bérard, of 323, Rue St. Denis, Paris, for "Applying collodion tissues to the manufacture of ribbons."—Dated 19th May, 1859.

41,031. Boigues, Rambourg and Co., of 16, Place Vendôme, Paris, for "Manufacture of hollow pieces of cast metal."—Dated 20th May, 1859.

41,032. Bonleau, brothers, of Parthenay, département des Deux-Sèvres, for "Hygienic shirts."— Dated 28th May, 1859.

41,033. Carpentier, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "So-called salubrious gutters."—Dated 18th May, 1859.

41,034. Cart, of 13, Rue de Reuilly, Paris, for "Improvements in machines for cutting veneers."— Dated 18th May, 1859.

41,035. Chaigneau, brothers, of Lormont, département de la Gironde, for "A mixed system of building vessels of wood and iron."—Dated 25th May, 1859.

41,036. Champonnois, of 8, Rue de la Jussienne, Paris, for "A chaff-cutter."—Dated 20th May, 1859.

41,037. Coopman, domiciled at 12, Rue Geoffroy-Marie, Paris, for "Improvements in tanning."— Dated 3rd June, 1859.

41,038. Cosne, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in mounting chains of jewels or trinkets."— Dated 18th May, 1859.

* For the French Patent Law see No. 228 of this Journal.

41,039. Damon, of 21, Rue de la Croix, Saint-Etienne, département de la Loire, for "Improvements in reeds of velvet and other looms."—Dated 27th May, 1859.

41,040. Daublaine, of Hôtel Montesquieu, Bordeaux, for "Substituting turf for coals and charcoal in smelting and treating iron and other ores."—Dated 28th May, 1859.

41,041. Desvernois, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "A continuous rotary rasp."—Dated 19th May, 1859.

41,042. Dizy, domiciled at 37, Rue de Charonne, Paris, for "A system of crown bricks, and applying the same to building in general."—Dated 19th May, 1859.

41,043. Drivon, of la Mure, département du Rhône, for "A band composed of various strings, especially for hoops of petticoats."—Dated 25th May, 1859.

41,044. Farjon, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in his system of joining."—Dated 19th May, 1859.

41,045. Farjon, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Closing vessels and bowls containing gaseous liquids, preserved food, &c."—Dated 19th May, 1859.

41,046. Gailly, of 67, Rue Lafayette, Paris, for "Composition of economical taps and cocks."—Dated 20th May, 1859.

41,047. Grivel, jun. and Decombes, of 4, Avenue du Chateau d'Eau, Romainville, département de la Seine, for "A signal apparatus for railways."—Dated 18th May, 1859.

41,048. Hirsch, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A centrifugal screw."—Dated 19th May, 1859.

41,049. Hirsch, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A normal boat."—Dated 19th May, 1859.

41,050. Jacob, of 70, Rue Boileau, Lyon, for "Iron framings for supporting dye vats."—Dated 26th May, 1859.

41,051. Laury, of 31, Rue Tronchet, Paris, for "Improvements in dresses."—Dated 19th May, 1859.

41,052. Leblanc, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Manufacture of hollow rings."—Dated 19th May, 1859.

41,053. Le Breton, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Treatment of clayish earths and other ores."—Dated 18th May, 1859.

41,054. Lenot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Unspun wefts of various textile and filamentous substances for blankets, &c."—Dated 19th May, 1859.

41,055. Lieber, represented by Rebecq, of Ste. Susanne, Ile de la Réunion, for "A rectifying apparatus applied to distilling rum."—Dated 18th December, 1858.—(English Patent, 9th March, 1857.)

41,056. Michel, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of foot coverings."—Dated 20th May, 1859.

41,057. Moreau, of 4, Rue du Parc Royal, Paris, for "Improvements in Congreve rockets."—Dated 16th May, 1859.

41,058. Pierce, represented by Fleischmann, of 27, Boulevart des Italiens, Paris, for "Improvements in steam boilers."—Dated 19th May, 1859.—(American Patent, 5th April, 1859.)

41,059. Reymond, Caluire, and Cuire, of 14, Chemin de Montessuy, Lyon, for "Improvements in jacquart machines."—Dated 25th May, 1859.

41,060. Rives jun., of Talence, Banliene de Bordeaux, for "A double action truck."—Dated 26th May, 1859.

41,061. Tritschler, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in horse-gins, chiefly applicable to agricultural machines."—Dated 18th May, 1859.

41,062. Tussaud, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in machines for mincing meat and other substances."—Dated 18th May, 1859.

41,063. Armengaud, sen., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Machines for treating turf."—Dated 21th May, 1859.

41,064. Bernier-Degorgue, of Lille, for "A jack for closing frames and Venetian blinds at the same time."—Dated 1st June, 1859.

41,065. Botté, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in spindles for spinning, &c."—Dated 23rd May, 1859.

41,066. Carrère, of 23, Rue St. Leonard, Nantes, for "An instrument for decanting liquids."—Dated 1st June, 1859.

41,067. Charpentier Brothers, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Spring crotchets for iron bedsteads."—Dated 23rd May, 1859.

41,068. Colantier, au Cateau, département du Nord, for "A substance for repairing holes of steam engines without stopping the same."—Dated 1st June, 1859.

41,069. Couillard, of 15, Rue St. Etienne Bonne, Nouvelle, Paris, for "Mechanism for making flaps of dresses."—Dated 21st May, 1859.

41,070. Crémieux, of 29, Boulevart des Italiens, Paris, for "Improvements in tailoring."—Dated 21st May, 1859.

41,071. Dubois, of 4, Place Neuve des Garmes, Lyon, for "A sowing machine."—Dated 31st May, 1859.

41,072. Emery and Seuffert, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A syphon apparatus for obtaining seltzer water on the spot."—Dated 20th May, 1859.

41,073. Garnier, of 32, Rue de Malte, Paris, for "Improvements in the manufacture of smoking pipes."—Dated 21st May, 1859.

41,074. Girouard, of 12, Place de la Bourse, Paris, for "Using bituminous substances."—Dated 23rd May, 1859.

41,075. Grenet, of Barbezieux, département de la Charente, for "An instrument called 'Registering syphon.'"—Dated 30th May, 1859.

41,076. Guillemot-Vollet, of Savigny-sous-Beaume, département de la Côte d'Or, for "An apparatus for heating water in baths."—Dated 31st May, 1859.

41,077. Jamin, represented by Le Blanc, of 2, Rue Sainte Appoline, Paris, for "Improvements in the camera obscura."—Dated 21st May, 1859.

41,078. Jolivet, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A portable press for wine and other beverages."—Dated 23rd May, 1859.

41,079. Journet and Convers, of 24, Route d'Asnières, Batignolles, département de la Seine, for "A machine for making earth works."—Dated 23rd May, 1859.

41,080. Laffitte, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in machines and processes for preparing and dressing silk which has been dyed a second time."—Dated 20th May, 1859.

41,081. Lauwick, of Comines, département du Nord, for "Improvements in looms for weaving borders of terry velvet."—Dated 31st May, 1859.

41,082. Loche, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in lime kilns."—Dated 21st May, 1859.

41,083. Marais and De Reiset, represented by Oscar Oraison, of Basse Terre, Guadeloupe, for "Improvements in the manufacture of sugar."—Dated 25th January, 1859.

41,084. Marc, of Nantes, département de Seine et Oise, for "Improvements in his instrument for regulating and dressing cuttings for drainage, as patented 2nd June, 1858."—Dated 30th May, 1859.

41,085. Newton, Smith, and Brown, represented by D'Aubreville, of 60, Boulevart de Strasbourg, Paris, for "Improvements in machines and apparatus for raising or moving heavy weights."—Dated 23rd May, 1859.—(English Patent, 24th December, 1858.)

41,086. Paillard, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "An apparatus with triple gearings."—Dated 23rd May, 1859.

41,087. Pascal, represented by Gardissal, of 29, Boulevard St. Martin, Paris, for "Improvements in generators and hot-air engines."—Dated 20th May, 1859.

41,088. Pelissier, of Grand Chemin d'Aix, Marseille, for "A tissue for the manufacture of oil."—Dated 25th May, 1859.

41,089. Pelissier, of 4, Rue des Ayres, Bordeaux, for "A system of crotchets for removing and conveying weights."—Dated 1st June, 1859.

41,093. Piver, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A process for extracting the scent and aroma from flowers, leaves, vegetables, fruit, &c."—Dated 23rd May, 1859.

41,091. Pommeraux, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for packing hay, straw, &c."—Dated 21st May, 1859.

41,092. Guilllon, of 14, Rue Tupin, Lyon, for "Improvements in regulating hydraulic receivers."—Dated 30th May, 1859.

41,093. Rivière, of Vannes, département du Morbihan, for "A machine for crushing materials used for repairing roads."—Dated 25th May, 1859.

41,094. Leyvon, jun., of 61, Cours Lafayette, Lyon, for "A twyer, with circulating air."—Dated 29th May, 1859.

41,095. Simonin, of Angoulême, for "Transmission of elasticity in spring mattresses."—Dated 1st June, 1859.

41,096. Alesmonières and Frédiére, of 28, Quai St. Vincent, Lyon, for "A colouring substance called 'Malvine.'"—Dated 7th June, 1859.

41,097. Barré, of 15, Rue des Alouttes, Belleville, for "A day and night telegraph of tides, with a gun and bell."—Dated 25th May, 1859.

41,098. Bérard, of 323, Rue St. Denis, Paris, for "Rendering hats impervious by means of collodion."—Dated 25th May, 1859.

41,099. Bruant, of 67, Rue St. Louis-au-Marais, Paris, for "A system of air-navigation."—Dated 24th May, 1859.

41,100. Chaudet, of 42, Rue de la Santé, Paris, for "Manufacture of leather buttons."—Dated 25th May, 1859.

41,101. Colon, with Thierry, jun., of 91, Rue des Marais St. Martin, Paris, for "Relief embroideries, imitating varieties of nature."—Dated 25th May, 1859.

41,102. Conradson, of Schelestadt, département du Bas Rhône, for "A machine for cutting glue and gelatine into sheets."—Dated 1st June, 1859.

41,103. Cornevin, of 6, Rue St. Nicolas du Chardonnet, Paris, for "A cask with a moveable bottom."—Dated 25th May, 1859.

41,104. Dandville, of Mouy, département de l'Oise, for "Spinning."—Dated 1st June, 1859.

41,105. Dessales, of 13, Rue des Enfants-Rouges, Paris, for "A suspension rod, with a stop for lamps."—Dated 24th May, 1859.

41,106. Ferrand, of 25, Rue St. Bernard, Paris, for "Improvements in the manufacture of castors of bedsteads."—Dated 25th May, 1859.

41,107. Foucquier, of Onnaing, département du Nord, for "A machine for making toothed steel blades for sugar and fecula works."—Dated 6th June, 1859.

41,108. Gallais and The Compagnie Parisienne for making Billiards, of 62, Rue de Poissonniers, La Chapelle St. Denis, for "A system of billiard tables."—Dated 24th May, 1859.

41,109. Ganeval, Bondier, and Company, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mode of joining tubes of smoking-pipes and cigar mouth-pieces."—Dated 24th May, 1859.

41,110. Kessler, of 21, Rue Jurue, Metz, for "Processes for the manufacture of aluminium and its compounds."—Dated 6th June, 1859.

41,111. De La Peyrouse, of 42, Rue Notre Dame de Lorette, Paris, for "Improvements in dyeing."—Dated 24th May, 1859.

41,112. Lefin and Bailly, of Saint Nicoles, Arras, for "A click-instrument for taking soundings of coal fields."—Dated 18th May, 1859.

41,113. Lisbet, of Bully Grenay, département du Pas-de-Calais, for "An apparatus for boring holes in rocks for blasting."—Dated 7th June, 1859.

41,114. Lorier, at Thil, département de l'Eure, for "A moveable suspension apparatus for thrashing and cleaning colza in the open field."—Dated 4th June, 1859.

41,115. Macé, of Rue de Tours, Laval, département de la Mayenne, for "A carriage suspended on journals with cranked axles and iron cross-bar."—Dated 6th June, 1859.

41,116. Mitifiot, of Loriol, département du Drôme, for "An apparatus for regenerating and preserving silk worms."—Dated 31st May, 1859.

41,117. Moissard, of 40, Rue de Fontenelle, Rouen, for "A kind of shirts without buttons, with elastics and india rubber."—Dated 4th June, 1859.

41,118. Nelson, represented by Zacharie, of 40, Rue de Bourbon, Lyon, for "Improvements in apparatus for raising water and other liquids."—Dated 6th June, 1859.—(English Patent, 22nd November, 1858.)

41,119. Noetinger, of 25, Rue des Serruriers, Strasbourg, for "Manufacture of cubes for marbles, and colouring, gilding and silvering said marbles."—Dated 31st May, 1859.

41,120. Perkin and Gray, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in mordants and dyes for tissues of cotton and other vegetable fibres."—Dated 25th May, 1859.—(English Patent, 21st May, 1859.

41,121. Potaux, of Vendin-les-Béthumes, département du Pas-de-Calais, for "Patent axles of trucks for mines."—Dated 4th June, 1859.

41,122. Poussart, of Arnicourt, département des Ardennes, for "A brush for cleaning the inside of teeth."—Dated 9th June, 1859.

41,123. Protte, of Vandeuvre, département de l'Aube, for "A portable thrashing machine."—Dated 4th June, 1859.

41,124. Renaux, jun., of 32, Rue Martainville, Rouen, for "Apparatus for previously distilling feed water of boilers."—Dated 3rd June, 1859.

41,125. Ruffier and Guinet, of Rive-de-Gier, département de la Loire, for "Pipes of compressed asphalt for the conveyance of water, gas, and even for drainage."—Dated 6th June, 1859.

41,126. Védy, represented by Amouroux, of 333, Rue St. Martin, Paris, for "Improvements in mathematical instruments for the navy."—Dated 25th May, 1859.

41,127. Warendeuf and Guignault, of Rue, département de la Somme, for "A machine for moulding and compressing turf, with a horse-gin belonging thereto."—Dated 4th June, 1859.

41,128. Andrieux, senr., of Glennes, département de l'Aisne, for "A perpetual motor."—Dated 8th June, 1859.

41,129. Batty, represented by Perpigna, of 42, Rue Neuve St. Augustine, Paris, for "A process or apparatus for establishing instantaneously a communication between railway travellers and the engine driver or guards."—Dated 28th May, 1859.—(English Patent, 19th April, 1859.

41,130. Bretonnière with Dubois, of 60, Rue de Chaillot, Paris, for "Using a costless motive power."—Dated 26th May, 1859.

41,131. Chantrel, of 43, Rue de Clichy, Paris, for "Extracting beetroot juice."—Dated 28th May, 1859.

41,132. Clegg, represented by Sautter, of 14, Boulevart Montmarte, Paris, for "Improvements in lubricating valves and pistons in steam-engines."—Dated 28th May, 1859.—(English Patent, 17th December, 1858.)

41,133. Corfield, junr., represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in chains for coupling cranes, cables, mining purposes, hoisting, and all other purposes where chains are used."—Dated 20th May, 1859.—(English Patent, 5th January, 1859.)

41,134. Dagand, of 23, Rue Neuve St. Denis, Paris, for "A friction-grate for lighting matches."—Dated 26th May, 1859.

41,135. Dale, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of soda, salts, and other alkalis."—Dated 27th May, 1859.—(English Patent, 8th October, 1858.)

41,136. Dupuy, Simon, and Gauny, of Maison Jacussiaux, Lyon, for "Extracting and using the fat substances contained in the waste suds of dye-works."—Dated 7th June, 1859.

41,137. Egasse, of 10, Rue Mogador, Paris, for "A metallic varnish for protecting metals from oxidation, and for preserving wood in general."—Dated 28th May, 1859.

41,138. Féramus, domiciled with Dreyfous, of 54, Rue de Bondy, Paris, for "Naves of wheels."—Dated 28th May, 1859.

41,139. Frost-Nuthall, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in cannons and fire-arms and in their projectiles."—Dated 26th May, 1859.—(English Patent, 10th May, 1859.)

41,140. Godard-Desmarest, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A peculiar arrangement of the necks of vessels containing gaseous liquids."—Dated 27th May, 1859.

41,141. Jouanet, of 6, Rue St. Gilles, Paris, for "Gallery of baked clay for the subterraneous laying of sewers, gas and water pipes."—Dated 28th May, 1859.

41,142. Jung, of 24, Rue des Menus, Boulogne, département de la Seine, for "Bottles of filtering stone with glass collars, &c."—Dated 26th May, 1859.

41,143. Lalonel De Sourdeval, of 22, Rue Bergère, Paris, for "Extracting quinine and other organic alkalis."—Dated 23rd April, 1859.

41,144. LAMIRAL, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Fastenings of doors of kitchen-ranges."—Dated 26th May, 1859.

41,145. LEGRAND, of 12, Rue des Hautes-Gatines, Charonne, département de la Seine, for "A kind of enamelled tiles."—Dated 27th May, 1859.

41,146. LEMAIRE, of 104, Route d'Orléans, Montrouge, département de la Seine, for "A spinning spindle."—Dated 26th May, 1859.

41,147. MARCHAND, of 26, Rue de la Fabrique, Clichy la Garenne, département de la Seine, for "Means of taking vapour baths."—Dated 28th May, 1859.

41,148. MERLATEAU, with Maldant, of 25, Quai des Chartrons, Bordeaux, for "An apparatus called 'Differential silometer.'"—Dated 9th June, 1859.

41,149. MILLE, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Manufacture of portable economical gas" — Dated 26th May, 1859.

41,150. MIQUEL, represented by Brade, of 22, Rue Ste. Anne, Paris, for "A truss."—Dated 28th May, 1859.

41,151. ORDISH, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the construction of rails for railways."—Dated 28th May, 1859. — (English Patent, 9th November, 1858.)

41,152. PETERSON, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of impervious paper for cartridges, being also applicable to other purposes where impervious paper is employed."—Dated 25th May, 1859.—(English Patent, 24th November, 1858.)

41,153. PINONDEL DE LA BERTOCHE and Le Comte de MASSON D'AUTUME, represented by Brade, of 22, Rue Ste. Anne, Paris, for "Means of drying and torrefying combustible substances."—Dated 27th May, 1859.

41,154. SCHRODER, with Geber, of 53, Rue Vivienne, Paris, for "A distilling apparatus."—Dated 26th May, 1859.

41,155. SELLERS, domiciled Lillo and Co., of 9, Square Clary Chaussée d'Antin, Paris, for "Improvements in machines for screw-cutting bolts."—Dated 27th May, 1859.—(American Patent, 1st December, 1857.)

41,156. SIMON, of 6, Chaussée des Minimes, Paris, for "Improvements in the manufacture of iron pipes.'"—Dated 26th May, 1859.

41,157. STEGER, of 40, Boulevart de Sébastopol, Paris, for "A machine and processes for the manufacture of nuts."—Dated 26th May, 1859.

1,158. VIAL and GONNON, of 48, Rue St. Joseph, Lyon, for "Conglomerating fuel."— Dated 8th June, 1859.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. I.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pitcoale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Eugine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET. Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated* 16*th March* 1744.) Price

---

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).

Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.

The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

COLONIAL PATENTS.—Information as to the Mode of obtaining Protection for Inventions in he Colonies; contained in Communications from he Governors, &c. of the different British Colonies n answer to the Application of Mr. W. J. CURTIS for a Patent. Price 1*s.*

PATENT RIGHTS in the COLONIES.—Abstract of Replies to the Secretary of State's Circular Despatch of July 11, 1856, calling for Information as to the Form of the Application to be made by Persons desirous of obtaining Patent Rights in the Colonies, and the Expenses attendant on the Grant of such Patent Rights. Price 2*s.* 6*d.*

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.
Canada, No. 279.
Cuba, No. 498.
Dutch West Indies, No. 322.
France, No. 228.
Greece, No. 325.
Germany, No. 435.
Hanover, No. 231.
India, Nos. 240, 348, and 552.
Mexico, No. 496.
Netherlands, No. 289.
New South Wales, No. 386.
Prussia, Nos. 313 and 329.
Parma, Piacenza, and Guastalla, No. 321.
Portugal, No. 325.
Poland, No. 335.
Roman States, No. 319.
Russia, Nos. 334 and 508.
Sardinia, Nos. 233 and 235.
Saxony, No. 236.
Sicilies (the Two), No. 316.
Spain, No. 323.
Sweden, Nos. 327 and 354.
Victoria, Nos. 186 and 359.
Wurtemberg, No. 314.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 620. TUESDAY, DECEMBER 13, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given that

1719. JOSEPH G. ISHAM and STEPHEN D. ALBERTSON, of the city and state of New York, United States of America, have given notice at the Office of the Commissioners of their intention to proceed with their application for Letters Patent for the invention of "An improved machine for cutting and shaping bottle and other corks."—A communication from Albert Albertson, a person residing abroad.

As set forth in their petition, recorded in the said office on the 22nd day of July, 1859.

1779. And JAMES ROWLAND, of Salisbury, has given the like notice in respect of the invention of "An improved apparatus for mashing and mixing."

As set forth in his petition, recorded in the said office on the 1st day of August, 1859.

1783. And JAMES CHARLES ASHWELL, of Dorchester Street, New North Road, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in wheels for railway and other carriages."

As set forth in his petition, recorded in the said office on the 2nd day of August, 1859.

1789. And WILLIAM KIRKBY PEACE, of the firm of W. K. and C. Peace, of Eagle Works, Sheffield, in the county of York, Manufacturer, has given the like notice in respect of the invention of "An improvement in canisters for hermetically sealing paints and other substances."—A communication from abroad by Frederick L. Whiton and John W. Musary, of New York, in the United States of America.

1791. And WILLIAM HENRY TOOTH, of 3, Spring Terrace, Wandsworth Road, in the county of Surry, Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for the manufacture of iron or steel."

1793. And JOHN PETRIE the younger, of Rochdale, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for washing wool."

As set forth in their respective petitions, all recorded in the said office on the 3rd day of August, 1859.

1801. And FREDERICK WALTON, of Haughton Dale, Denton, near Manchester, has given the like notice in respect of the invention of "Improvements in the manufacture of ornamental fabrics suitable for bookbinding and other uses, and in machines employed in such manufacture."

As set forth in his petition, recorded in the said office on the 4th day of August, 1859.

1805. And NICHOLAS DORAN MAILLARD, of No. 18, York Street, Dublin, in Ireland, Gentleman, has given the like notice in respect of the invention of "Improvements in compasses for indicating the course and time of ships at sea, without the use of needles or magnets."

1806. And MARC ANTOINE FRANÇOIS MENNONS, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, has given the like notice in respect of the invention of "A system of columns or monuments to be employed as sentry boxes, branch post and other offices, telegraph and fire engine stations."—A communication from Trénée Leÿs, residing at Amsterdam, Holland.

1810. And FRANCIS WILLIAM BEAUMONT, of Clapham, in the county of Surrey, Civil, Mechanical, Mining, and Gas Engineer and Surveyor, has given the like notice in respect of the invention of "A hydraulic apparatus applicable to transmitting, regulating, and measuring the supply or flow of liquids."

1811. And WARREN THOMPSON, of 45, Essex Street, Strand, London, has given the like notice in respect of the invention of "An improved printing telegraph."

As set forth in their respective petitions, all recorded in the said office on the 5th day of August, 1859.

1815. And AUGUSTUS BRYANT CHILDS and LEMUEL DOW OWEN, of 192, Tottenham Court Road, London, county of Middlesex, Engineers, have given the like notice in respect of the invention of "Improvements in machinery for cleaning grain and seeds from smut and other extraneous matter."

1816. And ALFRED THEODORE DE LISLE, of 14, Addison Road, Kensington, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Improvements in clarifying and decolorizing solutions of sugar and other liquids."

As set forth in their respective petitions, both recor ed in the said office on the 6th day of August, 1859.

1827. And BENJAMIN BAUGH, Manager of Salt's Patent Enamel Works, Bradford Street, Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "Certain improvements in the mode and apparatus for partially forming and finishing the edges of certain descriptions of vessels formed or raised from sheet iron or other metal."

As set forth in his petition, recorded in the said office on the 8th day of August, 1859.

1837. And PIERRE FRANÇOIS ROLLAND, of Hensies, in the province of the Hainaut, Belgium, Mechanic, has given the like notice in respect of the invention of "A new electric telegraph."

1838. And CHARLES LOUIS JOSEPH DIERICKX, Director of the Mint, residing at the Mint, in the city of Paris, has given the like notice in respect of the invention of "A new system of scales to be used principally in the fabrication of coins."

1844. And WELBURN WILLIAMSON, of High Holborn, in the county of Middlesex, Engineer and Machinist, has given the like notice in respect of the invention of "An improved machine or tool for drilling holes."

As set forth in their respective petitions, all recorded in the said office on the 9th day of August, 1859.

1849. And WILLIAM MUIR, of the Britannia Works, in the city of Manchester, Engineer, has given the like notice in respect of the invention of "Improvements in machinery for communicating motion to foot lathes and other machines to be worked by treadles."

As set forth in his petition, recorded in the said office on the 10th day of August, 1859.

1855. And RALPH HEATON the younger, of Birmingham, in the county of Warwick, Manufacturer, and GEORGE HEATON, of Birmingham aforesaid, Manufacturer, have given the like notice in respect of the invention of "Improvements in coining machinery."

As set forth in their petition, recorded in the said office on the 11th day of August, 1859.

1861. And LOUIS ANTOINE POSSOZ, of No. 37, Rue de Rivoli, in the city of Paris, in the empire of France, Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture and baking of sugars."

As set forth in his petition, recorded in the said office on the 12th day of August, 1859.

1874. And RICHARD IRELAND WATTS, of Plymouth, in the county of Devon, Merchant, JOHN OFFORD, of the same place, Gentleman, and JOHN ROBERTS THOMAS, also of the same place, Engineer, have given the like notice in respect of the invention of "A method of condensing and consuming smoke and other products of coals, ores, and similar substances, and reducing them to useful materials."

1875. And HENRY THOMAS LAMBERT, of America Square, in the city of London, Ship Chandler, has given the like notice in respect of the invention of "Improved apparatus to be adapted to ship's tackle or boats, for the purpose of facilitating the disengaging of ships' boats when lowered into the water." — A communication from abroad by Captain George Hall Carleton, of Camden, in the state of Maine, United States of America.

As set forth in their respective petitions, both recorded in the said office on the 13th day of August, 1859.

1991. And JOHN CHATTERTON, of Devonshire Street, Islington, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the manufacture of tubes of gutta percha and other substances capable of being moulded in a similar manner when in plastic state, and also in coating wire and other cores with such substances."

As set forth in his petition, recorded in the said Office on the 31st day of August, 1859.

2149. And JOHN BLAIR, of Manchester, in the county of Lancaster, Cotton Dealer, has given the like notice in respect of the invention of "Certain improvements in the treatment of yarns during the operation of spinning, which treatment is also applicable in roving, slubbing, or doubling machines."

As set forth in his petition, recorded in the said office on the 21st day of September, 1859.

2174. And JAMES FERNIHOUGH, of Dukinfield, in the county of Chester, Engineer, has given the like notice in respect of the invention of "Improvements in pistons, plungers, and buckets."

As set forth in his petition, recorded in the said office on the 26th day of September, 1859.

2268. And JAMES TURPIE, of North Shields, has given the like notice in respect of the invention of "Improvements in the fore and aft gaff and boom sails of ships."

As set forth in his petition, recorded in the said office on the 5th day of October, 1859.

2302. And GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, has given the like notice in respect of the invention of "Improvements in the manufacture of paper, pasteboard, and cardboard."—A communication from

abroad by Messrs. Jules Lagosse and Sons, Manufacturers, and Frederic Quentin, Merchant, all of Paris, France.

As set forth in his petition, recorded in the said office on the 10th day of October, 1859.

2319. And Alfred Augustus De Reginald Hely, of 2, Park Village West, Regent's Park, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "Certain improvements in the manufacture of tobacco for smoking purposes."

As set forth in his petition, recorded in the said office on the 12th day of October, 1859.

2460. And Henry Phillips, of Penhoe, in the county of Devon, Chemist, and James Bannehr, of Exeter, in the same county, have given the like notice in respect of the invention of "Improvements in the manufacture of manure."

As set forth in their petition, recorded in the said office on the 27th day of October, 1859.

2532. And Henry Barker, of Hastings, in the county of Sussex, Tobacco and Cigar Dealer, has given the like notice in respect of the invention of "An improvement in clay, meerschaum, and other pipes."

As set forth in his petition, recorded in the said office on the 7th day of November, 1859.

2604. And Jerome André Drieu and Auguste Legeay, of No. 18, Welbeck Street, Cavendish Square, London, in the county of Middlesex, have given the like notice in respect of the invention of "A tissue, being a substitute for leather, millboard, and papier-maché.

2610. And James McKenzie, of No. 16, St. Martin's-le-Grand, in the city of London, and Stephen Thomas Wentworth, of the same place, Gas Engineers, have given the like notice in respect of the invention of "Improvements in breech-loading fire-arms."

As set forth in their respective petitions, both recorded in the said office on the 17th day of November, 1859.

2617. And William Blinkhorn, of Sutton, near St. Helen's, in the county of Lancaster, Manager of the London and Manchester Glass Company, has given the like notice in respect of the invention of "The novel application of certain materials to the manufacture of bricks, quarries, or tiles to be employed principally in the construction of furnaces 'as fire-bricks.'"

As set forth in his petition, recorded in the said office on the 19th day of November, 1859.

2645. And Charles Grey Hill, of Commerce Square, High Pavement, in the town and county of the town of Nottingham, Lace Manufacturer, has given the like notice in respect of the invention of "An improved goffering machine together with the apparatus connected therewith."

As set forth in his petition, recorded in the said office on the 22nd day of November, 1859.

2669. And James Sim, of the city and county of Aberdeen, North Britain, Manufacturing Chemist, has given the like notice in respect of the invention of "Improvements in measuring and registering the flow or discharge of liquids."

2673. And George Edmond Donisthorpe, of Leeds, has given the like notice in respect of the invention of "Improvements in apparatus for hackling, dressing, and combing silk waste, and other fibres."

As set forth in their respective petitions, both recorded in the said office on the 25th day of November, 1859.

2685. And Enoch Tomey, of the city and county of Perth, North Britain, Glass Manufacturer, has given the like notice in respect of the invention of "Improvements in apparatus for insulating telegraphic wires or conductors."

As set forth in his petition, recorded in the said office on the 28th day of November, 1859.

2713. And George Jordan Firmin, of the Atlas Chemical Works, Borough Road, Southwark, in the county of Surrey, has given the like notice in respect of the invention of "Improvements in the manufacture of tartaric and citric acids, and certain salts in connection therewith."

As set forth in his petition, recorded in the said office on the 30th day of November, 1859.

2723. And John Paton, of Glasgow, in the county of Lanark, North Britain, Engineer, has given the like notice in respect of the invention of "Improvements in valves."

As set forth in his petition, recorded in the said office on the 1st day of December, 1859.

2740. And James Anderson and James Bradshaw, Bakers, Liverpool, Lancashire, have given the like notice in respect of the invention of "Improvements in the construction of the furnaces of bakers' ovens for the purpose of consuming smoke, which improvements are also applicable to the consumption of smoke in other furnaces."

As set forth in their petition, recorded in the said office on the 3rd day of December, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

List of Letters Patent which passed the Great Seal on the

13th December, 1859.

1422. Benjamin Baugh, Manager of Salt's Patent Enamel Works, Bradford Street, Birmingham, in the county of Warwick, for an invention of "Certain improvements in apparatus or machinery for raising metals."—Dated 13th June, 1859.

1426. Constantine Nicolaus Kottula, of Liverpool, in the county of Lancaster, Soap Manufacturer, for an invention of "A means of cleansing or purifying the 'Thames.'"—Dated 13th June, 1859.

1435. Alexander MacDonald, of Manchester, in the county of Lancaster, Engineer, for an invention of "Certain improvements in machinery or apparatus for punching patterns or devices upon metallic printing rollers or cylinders."—Dated 14th June, 1859.

1436. Edme Jules Maumené, Professor of Chymistry, and Victor Rogelet, Merchant, both residing in Reims, a town of France, for an invention of "Using the 'suint' or the portion soluble in water of the greasy substance found on the skin and hair of sheep for the purpose of manufacturing potash and other products."—Dated 15th June, 1859.

1441. Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W. C., for an invention of "An improved night lamp clock."—A communication from abroad by Louis Montanari, of Paris, in the empire of France.—Dated 16th June, 1859.

1443. Jozé Luis, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "An apparatus for regulating individually the pressure, expenditure, and light in gas burners."—A communication from abroad by Edward Ferguson, No. 10, Rue Mogador, Paris, in the empire of France. — Dated 16th June, 1859.

1449. Thomas Edward Tallent, of the Southwark Bridge Road, Southwark, county of Surrey, Engineer, for an invention of "Improvements in the manufacture of leather, and in machinery for that purpose."—Dated 16th June, 1859.

1451. Marc Antoine François Mennons, of the British and Foreign Patent Offices, 39, Rue de l'Echiquier, Paris, in the empire of France, for an invention of "An improved kiln for brick and plaster burning."—A communication from Mr. A. Mombrun, residing in Paris.—Dated 16th June, 1859.

1459. Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, 123, Chancery Lane, London, W.C., for an invention of "Improvements in treating and decomposing fatty substances."—A communication from abroad by Charles Leroy and Joseph Jean Marie Durand, both residing at No. 25, Route de Fontainebleau, at Chantilly, near Paris, in the empire of France. —Dated 17th June, 1859.

1463. Charles Fréderic Vasserot, of 45, Essex Street, Strand, London, Patent Agent, for an invention of "Improvements in the construction of stereoscopes." — A communication from Henry Adolphe Corbin, residing in Paris, in the empire of France.—Dated 17th June, 1859.

1466. John Combe, of Leeds, in the county of York, Engineer, and Robert Smalpage, of the same place, Woollen Draper, for an invention of "Improvements in winding and spinning machinery, and in arranging and securing a uniform delivery from cops to be used as weft or warp, or for other purposes."—Dated 17th June, 1859.

1467. Jozé Luis, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "A new system of windmill."— A communication from abroad by Bernard Zacharie Lethiers, No. 10, Rue Mogador, Paris, in the empire of France.—Dated 18th June, 1859.

1468. James Cox, of Wenlock Road, City Road, in the county of Middlesex, Printing Press Manufacturer and Engineer, for an invention of "Improvements in machinery or apparatus for cutting rags for paper makers."—Dated 18th June, 1859.

1480. Richard Laming, of Hampstead, in the county of Middlesex, for an invention of "Improvements in purifying gas, and in obtaining and reproducing materials useful for that purpose."—Dated 20th June, 1859.

1509. Cromwell Fleetwood Varley, of No. 4, Fortess Terrace, Kentish Town, and Cornelius John Varley, No. 7, York Place, Kentish Town, St. Pancras, Middlesex, for an invention of "Improvements in proving electric conductors, and in the apparatus connected therewith."—Dated 23rd June, 1859.

1543. George Hall, jr., of Montrose, in the county of Forfar, North Britain, Farmer, for an invention of "Improvements in reaping machines." —Dated 29th June, 1859.

1548. Isaac Tirebuck, of Windsor Court, in the city of London, Printer, for an invention of "Improved machinery for printing from engraved plates."—Dated 29th June, 1859.

1596. Arsène Beaulieu, of 25, Rue du Chemin de Fer, Porte de Cologne, Brussels, in the kingdom of Belgium, Mechanical Engineer, for an invention of "Improvements in crinolines, and in machinery for manufacturing springs for such and other purposes."—A communication from abroad by Henri Theodore Van Eycken, a person resident at Rue Terre-neuve, No. 25, Brussels.—Dated 5th July, 1859.

1607. Louis Schwartzkopff, of Berlin, and Ferdinand Carl Philippson, of Dusseldorf, for an invention of "Improvements in steam hammers, and in machines for cutting files, and for planing and grooving iron, stone, and other substances."—Dated 6th July, 1859.

1618. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in knitting frames."—A communication from abroad by Jules Nicholas Poirret, of Troyes, France, Mechanician.—Dated 7th July, 1859.

1664. Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "Improvements in the manufacture of shot and shell and other projectiles."— Dated 14th July, 1859.

1665. Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "A new or improved manufacture of certain metallic compounds or alloys."—Dated 14th July, 1859.

1674. Robert Mushet, of Coleford, in the county of Gloucester, Metallurgist, for an invention of "New or improved methods of manufacturing a certain metallic compound or alloy."—Dated 15th July, 1859.

1707. The Right Honorable James Earl of Caithness, of Hill Street, in the county of Middlesex, for an invention of "Improvements in the permanent way of railways."—Dated 20th July, 1859.

2069. Edward Jones Mallett, of the city of New York, but now Commercial Agent of the United States at Florence, in Italy, for an invention of "Improvements in axles."—Dated 10th September, 1859.

2251. John Thompson, of Witton, near Northwich, Cheshire, and John Thompson, the younger, of Castle Northwich aforesaid, for an invention of "The manufacture of salt by an improved and more economical mode."—Dated 5th October, 1859.

2411. Thomas Symes Prideaux, of Willow House, Hampstead, and 32, Charing Cross, Civil Engineer, for an invention of "Improvements in the construction of ships and rafts."—Dated 21st October, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 10th December*, 1859, *inclusive.*)

8th December.

2915. Thomas Vicars, senior, Thomas Vicars, junior, and Thomas Ashmore, all of Liverpool, in the county Palatine of Lancaster, Engineers, and James Smith, of the same place, Baker, for an invention of "Improvements in the manufacture of biscuits, lozenges, and other like articles of confectionary."—Dated 9th December, 1856.

2916. Thomas Peake, of Abbey Street Mill, Derby, in the county of Derby, for an invention of "Certain improvements in the manufacture of chenille and other piled fabrics."—Dated 9th December, 1856.

2936. Thomas Wheatley, of Openshaw, near Manchester, in the county of Lancaster, Engineer, and William Wheatley, of the same place, Pattern Maker, for an invention of "Improvements in fog signals, and in the means of working the same."—Dated 11th December, 1856.

9th December.

2926. William Storey, and Thomas Storey, of the town and county of Lancaster, Manufacturers of Oil Cloth and Table Covers, for an invention of "Improvements in forming ornamenta devices on the surface of paper and certain prepared woven fabrics."—Dated 10th December, 1856.

2977. Edwin Heywood, of Sutton Cross Hills, near Leeds, Designer, for an invention of "Improvements in machinery or apparatus used in weaving."—Dated 16th December, 1856.

10th December.

2957. Henry Pease, of Pierremont, near Darlington, Esquire, and Thomas Richardson, of Newcastle-on-Tyne, Chemist, for an invention of "Improvements in the manufacture of compounds of alumina."—Dated 12th December, 1856.

3004. François Donny, Professor of Chemistry, of the city of Ghent, in the kingdom of Belgium, for an invention of "Improvements in the manufacture of lamps."—Dated 18th December, 1856.

3059. Cromwell Fleetwood Varley, of 2, Gloucester Terrace, St. Paul's Road, Islington, in the county of Middlesex, Telegraphic Engineer, for an invention of "Improvements in electric telegraphs."—Dated 24th December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 10th December*, 1859.)

219. John Scott Russell, of Great George Street, Westminster, in the county of Middlesex, for an invention of "Improvements in constructing ships and vessels propelled by screw or such like propeller."—Dated 28th January, 1853.

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

41,159. WARNE, FANSHAWE, JAQUES and GALPIN, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improved compounds applicable for packing the joints of steam or other pipes, which compounds are also applicable for packing or lining parts of machinery in general, or parts of ships, bridges, tanks, or railways."—Dated 27th May, 1859.—(English Patent, 25th April, 1859.)

41,160. WITASSE, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A system of folding tables."—Dated 28th May, 1859.

41,161. ARNAUD-RIBAUD, of Grenoble, département de l'Isère, for "A sewing machine for obtaining whip-stitches, or helicoidal stitches."—Dated 11th June, 1859.

41,162. AUGÉ, of Auxerre, département de l'Yonne, for "An apparatus for making trellis work."—Dated 10th June, 1859.

41,163. BENOIT, of Luneray, département de la Seine Inférieure, Paris, for "Common seamless sacks."—Dated 9th June, 1859.

41,164. BICHET and MILLERAND, domiciled with the former, of 17, Rue du Mont-Ste.-Marie, Besançon, for "A portable horizontal machine with a double action, for pressing hay and straw."—Dated 14th June, 1859.

41,165. BLESSING, of 15, Rue de la Croix-de-Fer, Rouen, for "A railway break."—Dated 14th June, 1859.

41,166. BOREL, of 10, Quai de l'Ecole, Paris, for "Applying processes for preserving wood to garden seats, &c."—Dated 31st May, 1859.

* For the French Patent Law see No. 228 of this Journal.

41,167. BOUDIN, of Aix-en-Othe, département de l'Aube, for "A loom for making ribbed fabrics."—Dated 11th June, 1859.

41,168. BOYER, of Grenoble, département de l'Isère, for "A bracelet with goffered foldings applicable to all kinds of skin gloves."—Dated 9th June, 1859.

41,169. CHARBONNIER, of 38, Rue St. Laurent, Epernay, département de la Marne, for "A machine for working sparkling wines."—Dated 14th June, 1859.

41,170. CLAUDIN, of 1, Rue Joquelet, Paris, for "Improvements in safety pin-covers of revolvers."—Dated 28th May, 1859.

41,171. CUSSET, of Givors, département du Rhône, for "A system of paddles for steam boats."—Dated 11th June, 1859.

41,172. DREYSSÉ, of Saverne, département du Bas-Rhin, for "Converting guns with ramrods into Lefaucheux' guns."—Dated 6th June, 1859.

41,173. DUCROT, of 9, Boulevart de Strasbourg, Paris, for "Bird fans."—Dated 30th May, 1859.

41,174. DUFOUR, of 6, Rue Sala, Lyon, for "A harvesting and mowing machine."—Dated 11th June, 1859.

41,175. DUMONTIER, of Place Lécalier, Elbeuf, département de la Seine Inférieure, for "An apparatus for rescuing persons from apparent death." Dated 15th June, 1859.

41,176. FAURE and QUINART, of Revin, département des Ardennes, for "Manufacture of convex nails, &c."—Dated 14th June, 1859.

41,177. GRIEUX, of 7, Rue du Champs-des-Oiseaux, Rouen, for "A force and lift pump worked by means of compressed air."—Dated 11th June, 1859.

41,178. GROSS, of 41, Rue Planche-Clément, Troyes, département de l'Aube, for "Improvements in chaff-cutting machines."—Dated 11th June, 1859.

41,179. GRUBERT, of 49, Rue Grande-Tannerie, Troyes, département de l'Aube, for "A machine for boring boxes of carriage-wheels."—Dated 11th June, 1859.

41,180. GUIGUES, of 27, Rue Cerrusse, Marseille, for "A machine for raising water by means of an hydraulic motor with a continuous movement."—Dated 4th June, 1859.

41,181. HAREL, of 80, Rue Lafayette, Rouen, for "An endless double screw movement of rudders."—Dated 9th June, 1859.

41,182. LEMESRE, of Roubaix, département du Nord, for "A copping and winding frame."—Dated 11th June, 1859.

41,183. MALLARD, of 29, Rue Belon au Mans, département de la Sarthe, for "Means of facilitating the opening of boxes containing preserved food by means of common knives."—Dated 14th June, 1859.

41,184. MARCHAND, of La Chappelle, St. Ursin, département du Cher, for "Invariable registering levels without telescopes or sights."—Dated 8th June, 1859.

41,185. MARTEL-DELESPIERRE and DE CAPOL, jun., the former of Roubaix, the latter at Haze-

brouck, département du Nord, for "Spinning waste of flax, &c."—Dated 11th June, 1859.

41,186. De Mollinedo-y-Garratala, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of clocks, &c."—Dated 30th May, 1859.

41,187. Mourot, of 112, Rue de Paris, Belleville, département de la Seine, for "An apparatus for charging fuel from below in baking ceramic pastes."—Dated 30th May, 1859.

41,188. Roche, represented by Protat, of Mâcon, for "Means of utilizing the residue of lime obtained by neutralizing schist-oil, petroleum, bog-head, &c."—Dated 13th June, 1859.

41,189. Rolin, Attignéville, département des Vosges, for "A system for protecting apartments from smoke."—Dated 10th June, 1859.

41,190. Salomon-Cohen, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A machine for moulding earth and other plastic substances."—Dated 30th May, 1859.

41,191. Samier and Frantz, the former of 28, Quai d'Orléans, the latter of 27, Rue St. Louis-en-l'Ile, Paris, for "Applying mineral schist to candles."—Dated 30th May, 1859.

41,192. Schinz, domiciled with Woehrlin, of Rue de la Nuée-Bleue, Strasbourg, for "A system of furnaces for smelting glass."—Dated 7th June, 1859.

41,193. Thompson, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "A so-called 'Indestructible frame of petticoats with double expansion.'"—Dated 30th May, 1859.—(English Patent, 21st September, 1858.)

41,194. Ansot and Malezieux, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Regulators of marine engines for screw and other vessels."—Dated 4th June, 1859.

41,195. Ayraud, represented by Collevlle, of 28, Rue Bergère, Paris, for "A distilling apparatus."—Dated 31st May, 1859.

41,196. Billon, of 9, Rue Louis-le-Grand, Paris, for "A boat provided with a propeller, having rectilinear jointed paddles."—Dated 4th June, 1859.

41,197. Billon, of 9, Rue Louis-le-Grand, Paris, for "A generator with a concentric fire."—Dated 4th June, 1859.

41,198. Blethyn, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the manufacture of fuel."—Dated 1st June, 1859.—(English Patent, 11th November, 1858.)

41,199. Boutet, with Borgal, of 15, Rue Cardinal-Lemoine, Paris, for "A mechanical mill."—Dated 31st May, 1859.

41,200. Carpentier, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in buttons for fastening collars, cravats, &c."—Dated 6th June, 1859.

41,201. Charles Pirotte and Co., represented by Sautter, of 14, Boulevart Montmartre, Paris, for "A system of smoke-consuming grates, with longitudinal gradients."—Dated 4th June, 1859.

41,202. Chauvin and Bahic, domiciled 3, Rue de Grenelle St. Honoré, Paris, for "Filigrane paper."—Dated 31st May, 1859.

41,203. Cocker and Fox, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of steel and iron wire and steel sheets and bands."—Dated 31st May, 1859.—(English Patent, 12th November, 1858.

41,204. The Blanzy Coal Company, represented by Vannaisse, of 10, Rue de la Chaussée d'Antin, Paris, for "Manufacture of conglomerated coal from coal dust and common resin."—Dated 6th June, 1859.

41,205. D'Argy, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A self-acting apparatus for opening and closing curtains."—Dated 1st June, 1859.

41,206. Delabarre, of 1, Rue des Huissiers-Neuilly, for "Improvements in manufacturing and preserving food."—Dated 1st June, 1859.

41,207. Gibson, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of working rudders of vessels."—Dated 4th June, 1859.—(English Patent, 23rd April, 1859.)

41,208. Glover, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A machine for cutting files."—Dated 4th June, 1859.

41,209. Gontier, of 16, Rue de Charonne, Belleville, for "Tournure petticoats, with jointed hoops."—Dated 3rd June, 1859.

41,210. Harfield, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in capstans."—Dated 31st May, 1859.—(English Patent, 23rd August, 1858.)

41,211. Jardin, of 46, Rue de la Victoire, Paris, for "Improved shirts."—Dated 3rd June, 1859.

41,212. Langlois, jun., of 20, Grande Rue, Passy, for "A kind of chimney."—Dated 3rd June, 1859.

41,213. Lavigne, of 14, Impasse St. Laurent, Belleville, for "A clyster."—Dated 4th June, 1859.

41,214. Nepven, of 15, Rue de La Bruyère, Paris, for "A crane, with a lattice beam."—Dated 4th June, 1859.

41,215. Pains, of 2, Rue d'Amsterdam, Paris, for "A process for rendering tissues, paper, &c., and textile and woody substances in general, fire and waterproof."—Dated 4th June, 1859.

41,216. Paquet, of Cité des Fleurs, Batignolles, for "Manufacture of artificial flowers, &c."—Dated 4th June, 1859.

41,217. Pasquay, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in manometers."—Dated 4th June, 1859.

41,218. Peltereau, jun., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An apparatus for drawing and smoothing leather."—Dated 6th June, 1859.

41,219. Polton, of Courbevoie, for "A kind of manure."—Dated 31st May, 1859.

41,220. Pradaut and Renon, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Oxalolygraphy on porcelain and other ceramic

substances, and using the same for imitating gold articles."—Dated 1st June, 1859.

41,221. PRÉVOST, of 27, Rue du Faubourg du Temple, Paris, for "A kind of cartridges."—Dated 6th June, 1859.

41,222. SAMPSON, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the means of propelling vessels."—Dated 3rd June, 1859.

41,223. SEEGERS, of 83, Rue du Temple, Paris, for "An American mode of printing leather canvass."—Dated 4th June, 1859.

41,224. TRENLAY, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Manufacture of shovels for bakers."—Dated 4th June, 1859.

41,225. TURCK, of 73, Batignolles, for "A self-acting compensating break applicable to all carriages."—Dated 3rd June, 1859.

41,226. APPIETTO, jun., domiciled with Multedo, of Ajaccio, Corsica, for "An expeditious lithographic press."—Dated 15th June, 1859.

41,227. BOTTA, of 122, Boulevart Mont Parnasse, Paris, for "A direct mode of returning steam to generators."—Dated 4th June, 1859.

41,228. BOUTEGNOY, of 23, Quai St. Michel, Paris, for "Improvements in apparatus for cleaning corn."—Dated 8th June, 1859.

41,229. BROUTIN, of 35, Rue du Curé St. Sauveur, Lille, for "A machine for making balls of thread."—Dated 20th June, 1859.

41,230. COQUENHEM and Co., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in fastening hoops of petticoats, &c."—Dated 6th June, 1859.

41,231. COURTEAUX and DENEUCHATELLE, of 32, Rue des Vinaigriers, Paris, for "Fastenings of game pouches and other articles."—Dated 25th May, 1859.

41,232. CRABATHI and FEUGEAS, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Renaissance portemonnaies."—Dated 8th June, 1859.

41,233. DESBIEF, of 34, Saint Etienne, département de la Loire, for "Modifications in puddling pig-iron for obtaining iron or steel."—Dated 18th June, 1859.

41,234. DUMAS, of l'Isle-Jourdain, département du Gers, for "A hand pump."—Dated 15th June, 1859.

41,235. FAURE, of 10, Rue Maître-Albert, Paris, for "A case called 'Roller.'"—Dated 8th June, 1859.

41,236. FLORY, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in mechanical suspension."—Dated 8th June, 1859.

41,237. FORRETTE, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A machine for finishing paper and cards, and for various other purposes."—Dated 7th June, 1859.

41,238. GAUCHER, represented by Ozi, of 150, Rue de Rivoli, Paris, for "An apparatus for preventing fires in fodder."—Dated 17th June, 1859.

41,239. GÉRARD, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Apparatus and means of projecting light."—Dated 7th June, 1859.

41,240. GÉRARD and CARDINET, of 24, Rue du Grand St. Michel, Paris, for "Improvements in sewing machines."—Dated 6th June, 1859.

41,241. GIRAUD, of Bourg, département de l'Ain, for "A system of agricultural weighing machine."—Dated 18th June, 1859.

41,242. INCQUEAU, domiciled with Desgoffe, of 16, Rue de Port-Royal, Paris, for "A self-acting signal mast."—Dated 8th June, 1859.

41,243. LAURA, of 8, Rue Montée de Notre Dame, Marseilles, for "A so-called 'Franco-italica lamp.'"—Dated 6th June, 1859.

41,244. LEROY, of Douai, département du Nord, for "A taking-up rake worked by horse power."—Dated 18th June, 1859.

41,245. MARIÉ, of 52, Cité des Fleurs, Batignolles, for "A battery worked by means of salt of mercury."—Dated 7th June, 1859.

41,246. MOLOZAY, of 68, Rue d'Angoulême du Temple, Paris, for "Terry velvet with empty ribs."—Dated 7th June, 1859.

41,247. MONIER, of Aubagne, département des Bouches du Rhône, for "Oriental vases of baked earth."—Dated 11th June, 1859.

41,248. PERRIER and PENDARIÈS, of 88, Boulevart Mérentié, Marseilles, for "A machine for cutting matches and putting them into presses."—Dated 11th June, 1859.

41,249. PICARD, domiciled with Maillard, of 150, Rue de Rivoli, Paris, for "Substituting metallic soles for leather soles."—Dated 8th June, 1859.

41,250. PLANÇON, of 30, Rue Moret, Paris, for "A kind of buttons."—Dated 7th June, 1859.

41,251. RONNA, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in extracting salt from sea-water and salt springs."—Dated 6th June, 1859.

41,252. ROUSSEAU, BITTERLIN, jun., and MUSSON, the former of 9, Rue de l'Ecole de Médecine, the second of 56, Rue de l'Ouest, and the latter of 36, Rue de Chaillot, Paris, for "A mode of engraving silicate for obtaining such designs, engravings on paper, tissues, leather, &c., as were hitherto obtained by engravings on wood, steel, copper, bronze, zinc, &c."—Dated 7th June, 1859.

41,253. ROUSSELOT, of 2, Rue de l'Etape, Reims, for "A filter coffee pot."—Dated 18th June, 1859.

41,254. SCHMITT, of Romanswiller, département du Bas-Rhin, for "Manufacture of porcelain marbles."—Dated 3rd June, 1859.

41,255. THIÉBAUT, of Saint Quentin, département de l'Aisne, for "A cast-iron twyer with a reservoir of air."—Dated 16th June, 1859.

41,256. VIAN, of 2, Rue de Breteuil, Marseilles, for "A paint for protecting sheet-iron and other vessels from oxidation."—Dated 14th June, 1859.

41,257. BARRE, of 27, Rue de Penthièvre, Paris, for "Manufacture of inlaid veneers."—Dated 11th June, 1859.

41,258. Berendorf, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for working leather against the hair."—Dated 11th June, 1859.

41,259. Billard, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in stays and belts, with or without seams."—Dated 9th June, 1859.

41,260. Boigeol, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of twisting and continuously winding filamentous substances."—Dated 9th June, 1859.

41,261. Bonju, of 13, Rue Grenier St. Lazare, Paris, for "Improvements in pocket inkstands."—Dated 9th June, 1859.

41,262. Brasseur-Thuillier, of Amiens, for "Rolled iron for locksmiths' works."—Dated 16th June, 1859.

41,263. Chéron and Sole, the former of 34, Rue du Centre, Charonne, the latter of La Villette, for "A process for increasing the power of engines."—Dated 10th June, 1859.

41,264. Cloet, of 7, Chemin de Lalage, Courbevoie, for "An apparatus for treating rice, pearl-barley, and other grains."—Dated 8th June, 1859.

41,265. Corboran, of Rue de Flandre, La Villette, for "A machine for moulding and pressing coal."—Dated 11th June, 1859.

41,266. Forbras, of 35, Rue de Rambuteau, Paris, for "Applying a kind of inlaid work to brushes."—Dated 9th June, 1859.

41,267. Tournier, of 84, Rue Rochechouart, Paris, for "A submarine mode of propelling steam-boats."—Dated 10th June, 1859.

41,268. Gallé, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of advertizing."—Dated 10th June, 1859.

41,269. Hirsch-Labin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mechanism applicable to various musical instruments."—Dated 9th June, 1859.

41,270. Janton, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of heels of foot coverings."—Dated 11th June, 1859.

41,271. Lechien, domiciled at 15, Rue des Marais St. Germain, Paris, for "An oleo-pneumatic moderator lamp,"—Dated 11th June, 1859.

41,272. Marchal, represented by Mathieu, of 45 Rue St. Sébastien, Paris, for "A process and apparatus for classifying solid substances, such as ores, sand, clay, earth, grain, &c., according to their specific weight, by means of an air-current from below."—Dated 11th June, 1859.

41,273. Miane, of 4, Rue Beausire, Paris, for "A kind of stirrup."—Dated 10th June, 1859.

41,274. Negrel and Trouvé, of 4, Quai des Orfèvres, Paris, for "A lady's companion."—Dated 9th June, 1859.

41,275. Nevill, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of steel and iron."—Dated 8th June, 1859.—(English Patent, 26th May, 1859.)

41,276. Papelard, of 1, Avenue des Tilleuls, Montmartre, for "A mode of paving streets."—Dated 11th June, 1859.

41,277. Parant, of 39, Cité Veron, Montmartre, for "An inodorous mode of emptying cesspools."—Dated 11th June, 1859.

41,278. Peltereau, jun., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for working hides against the hair."—Dated 11th June, 1859.

41,279. Richards, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of gas-meters."—Dated 9th June, 1859.—(English Patent, 26th November, 1858.)

41,280. Schroder, of 53, Rue Vivienne, Paris, for "Reviving animal charcoal."—Dated 10th June, 1859.

41,281. Scriba, jun., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A game pouch and purse."—Dated 9th June, 1859.

41,282. Sibbald, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in steam boilers and other vessels."—Dated 9th June, 1859.

41,283. Spencer, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A self-acting railway switch."—Dated 11th June, 1859.

41,284. Vangeneberg, of 12, Passage Fauvel, La Chapelle St. Denis, for "A moveable sawing machine."—Dated 9th June, 1859.

41,285 Verdier, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in ploughs."—Dated 9th June, 1859.

41,286. Viard, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction of stereoscopes."—Dated 11th June, 1859.

41,289. Wilbien, jun., and Co., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Keeping sparkling champagne wines in syphon bottles."—Dated 9th June, 1859.

41,288. Wulveryck and Conturié, of 13, Rue du Mail, Paris, for "Improvements in machines for printing woollen fabrics."—Dated 11th June, 1859.

41,289. Alfraise, of Grenoble, for "A machine for breaking hemp, flax, and bark of lime trees."—Dated 22nd June, 1859.

41,293. Basset, of Denain, département du Nord, for "Anti-heat coatings."—Dated 23rd June, 1859.

41,291. Berger, of Saint Laurent de Chamousset, département du Rhône, for "A mechanical spring motor."—Dated 21st June, 1859.

41,292. Bohmé and Allart-Dacheux, of St. Quentin, département de l'Aisne, for "A chemical product called 'Anti-calcareous strum.'"—Dated 25th June, 1859.

41,293. Boudou, of Mazamet, département du Tarn, for "Shamoy cloth."—Dated 24th June, 1859.

41,294. Boudou, of Mazamet, département du Tarn, for "A machine for Shamoy dressing."—Dated 24th June, 1859.

41,295. Chambeyron, of La Rochelle, for "A farming compendium."—Dated 18th June, 1859.

41,296. Charin, Brothers, of Valencia, département de la Drôme, for "Improvements in machines for making wedges for rails of railways."—Dated 18th June, 1859.

41,297. Deboves, of Charmes, département de l'Aisne, for "A machine for facing bricks."—Dated 24th June, 1859.

41,298. Delaharpe, jun., of Tarare, département du Rhône, for "A machine for drawing tissues, for unstiffening them, &c."—Dated 24th June, 1859.

41,299. Duplay and Lachaise, of 23, Rue de Roanne, St. Etienne, département de la Loire, for "A system of rolling mills, tyres of railway carriages and locomotives worked by hydraulic pressure."—Dated 20th June, 1859.

41,300. Fessol, of Châlons-sur-Saône, for "A system of twyers of forges."— Dated 22nd June, 1859.

41,301. Gardner, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in machines for bending out or shaping vamps of boots." — Dated 11th June, 1859.— (English Patent, 9th April, 1859.)

41,302. Godard, of 98, Quai de la Fosse, Nantes, for "A churn."—Dated 17th June, 1859.

41,303. Hamelle, of Sains, département de l'Aisne, for "A cleaning apparatus."—Dated 21st June, 1859.

41,304. Hartmann, of Mulhouse, for "Colours for printing cotton, silk, &c." — Dated 21st June, 1859.

41,305. Hernandez, of 177, Rue Fondaudège, Bordeaux, for "Manufacture of bricks."—Dated 18th June, 1859.

41,306. Imbs, of the 6th Regiment of Pontoon Artillery, Strasbourg, for "A kind of spurs for cavalry."—Dated 10th June, 1859.

41,307. Jannesse and Castillon, of 5, Rue Tour de Gassies, Bordeaux, for "A railway break."—Dated 23rd June, 1859.

41,308. De La Salle de Rochemaure, of Rue du Belvéder, Tours, for "Fastenings of despatch-bags."—Dated 21st June, 1859.

41,309. Laurent, of 50, Rue du Chemin Saint Genès, Bordeaux, for "A smoke-consuming apparatus of locomotives."—Dated 22nd June, 1859.

41,310. Leclercq, of Trith St. Léger, département du Nord, for "Iron cross railway chairs."—Dated 24th June, 1859.

41,311. Levent, Silver, and Co., of Bavai, for "A system of matrices."—Dated 27th June, 1859.

41,312. Lombard, of Route de St. Chamond, St. Etienne, département de la Loire, for "Applying registering apparatus to machines employed in purifying mineral food."—Dated 21st June, 1859.

41,313. Lombard, of Route de St. Chamond, St. Etienne, département de la Loire, for "A process for conglomerating small fuel."—Dated 21st June, 1859.

41,314. Macé, of 5, Rue Neuve St. Augustin, Paris, for "A kind of stay."—Dated 11th June, 1859.

41,315. Micaud, of Teil, département de l'Ardèche, for "A machine for crushing refractory earth and rendering sand impalpable."—Dated 21st June, 1859.

41,316. Plouchart, of Vertain, département du Nord, for "A ploughing implement."—Dated 27th June, 1859.

41,317. Regonard, of Albi, département du Tarn, for "An hydraulic apparatus."—Dated 24th June, 1859.

41,318. Roman, of 7, Rue Laurencin, Lyons, for "An hydraulic machine." — Dated 20th June, 1859.

41,319. Sagett, of Joigny, département de l'Yonne, for "A so-called 'Urbimètre chemin de fer' for making surveys in laying out towns and villages." —Dated 17th June, 1859.

41,320. Secrétan and Still, of Medeah, Algeria, for "An hydraulic wheel worked by means of compressed air."—Dated 8th June, 1859.

41,321. Selckinghaus, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Frames of spring petticoats."—Dated 11th June, 1859.

41,322. Abate, of 7, Avenue St. Ouen, Batignolles, for "Improvements in the manufacture of artificial stones."—Dated 18th June, 1859.

41,323. Bérard, of 323, Rue St. Denis, Paris, for "Applying colours on tissues and paper coated by means of collodion."—Dated 16th June, 1859.

41,324. Berton, of 41, Rue Dauphine, Paris, for "A motive-wheel with jointed paddles."— Dated 16th June, 1859.

41,325. Borel, of 76, Rue Vieille du Temple, Paris, for "A machine for preparing steel for the manufacture of springs."—Dated 18th June, 1859.

41,326. Cart, of 3, Rue de Reuilly, Paris, for "A vertical sawing machine for cutting straight and bent wood."—Dated 17th June, 1859.

41,327. Cavoret, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Furniture made of bamboo or imitation of bamboo."—Dated 16th June, 1859.

41,328. Chevolot, jun., of 13, Rue de Ménilmontant, Paris, for "An oil-can for lubricating machines."—Dated 14th June, 1859.

41,329. Coen, alias Albitès-Coen, of 34, Rue Vivienne, Paris, for "Improvements in photography."—Dated 4th June, 1859.

41,330. Conseil, represented by Petyt, of 6, Rue d'Angoulême du Temple, Paris, for "Insubmersive apparatus."—Dated 14th June, 1859.

41,331. Demarche, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Artificial incrustations of furniture."—Dated 16th June, 1859.

41,332. Drechou, of Montbron, département de la Charente, for "A machine for holding and piercing pieces of leather to be stitched without using awls, chisels, or punches."—Dated 23rd June, 1859.

41,333. Fletcher and Williamson, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Feeding furnaces with hot-air."—Dated 16th May, 1859.

41,334. Foster, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in machinery or apparatus, called 'Spinning frames' and 'Roving frames,' employed for spinning and roving flax, tow, hemp, jute, and other fibrous substances."—Dated 14th June, 1859.—(English Patent, 18th January, 1859.)

41,335. Gambardella, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Obtaining and applying a motive power produced without fuel."—Dated 17th June, 1859.—(English Patent, 31st May, 1859.)

41,336. Girard, of 2, Rue de la Ville l'Evêque, Paris, for "A stamping apparatus with an air-current."—Dated 18th June, 1859.

41,337. Gourmont, Brothers, domiciled with Cousin-Buchet, of 307, Rue St. Denis, Paris, for "A boiler for brewing beer."—Dated 17th June, 1859.

41,338. Hurel, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Dyeing waste wool of cloth, carpets, &c."—Dated 17th June, 1859.

41,339. Jiudissé, of 180, Rue St. Dominique, Paris, for "Manufacture of artificial marble."—Dated 14th June, 1859.

41,340. Kaufmann, represented by Amouroux, of 333, Rue St. Martin, Paris, for "An American porte-monnaie with an interior purse."—Dated 17th June, 1859.

41,341. Lahaut, of 90, Chaussée de Ménilmontant, Belleville, for "A centrifugal apparatus for the manufacture of vinegar."—Dated 16th June, 1859.

41,342. Eugène Lebée and Rousseau, represented by Mérienne, of 3, Rue St. Fiacre, Paris, for "A model clasp."—Dated 17th June, 1859.

41,343. Leven, sen. and jun., of 10, Rue St. Hippolyte, Paris, for "Manufacture of legs, vamps, &c., of patent leather."—Dated 15th June, 1859.

41,344. Madray, of 5, Rue du Dragon, Paris, for "A sewing machine."—Dated 15th June, 1859.

41,345. Manby, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in furnaces and apparatus for annealing metal wire."—Dated 14th June, 1859.

41,346. Mary and Ducreux, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in closing and opening shops, doors, windows, &c."—Dated 14th June, 1859.

41,347. Motte, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Manufacturing and refining sugar without using animal charcoal or animal blood."—Dated 14th June, 1859.

41,348. Mousseron, of 9, Rue du Faubourg St. Denis, Paris, for "A kind of glasses for gas-burners and lamps."—Dated 14th June, 1859.

41,349. Ollion, of 33, Rue Neuve St. Eustache, Paris, for "A kind of transparent paper, called 'Crystal paper.'"—Dated 17th June, 1859.

41,350. Pellerin, represented by Marcillac, of 31, Rue St. Louis, Paris, for "An engine for vessels with two screws, provided with couplings whereby the two arbors may obtain an identically equal angular speed and a continuous circular movement in an opposite direction."—Dated 14th June, 1859.

41,351. Ringuet, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An improved head, with an eccentric telescope for astronomical, optical, and other instruments."—Dated 15th June, 1859.

41,352. Wadsworth, represented by Rowland, of 224, Rue de Rivoli, Paris, for "Moveable or adjustable heels of boots or shoes and spurs belonging thereto."—Dated 14th June, 1859.—(English Patent, 13th November, 1858.)

41,353. Wiart, of 4, Rue des Quartre Fils, Paris, for "A continuous wick in burners, having a double air-current."—Dated 18th June, 1859.

41,354. Aubrée and Guillemain, of Burie, département de la Charente Inférieure, for "A fire-escape."—Dated 15th June, 1859.

41,355. Bérard, of 16, Passage des Petites Ecuries, Paris, for "Cannons."—Dated 20th June, 1859.

41,356. Bonnet, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Fumigating apparatus."—Dated 21st June, 1859.

41,357. Boubès, jun., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in roman pavements."—Dated 18th June, 1859.

41,358. Bourgneil, of 11, Rue des Filles du Calvaire, Paris, for "A cork screw and fashionable wimble."—Dated 20th June, 1859.

41,359. Chemallié sen., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Compressing timber for the manufacture of wheels of carriages, &c."—Dated 18th June, 1859.

41,360. Chenaillier, Cherpitel, and Ménage, the former of 16, Rue des Petites Ecuries, Paris, and the latter two of Belleville, for "A kind of photographic diorama."—Dated 18th June, 1859.

41,361. Dagron, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A small microscope with stereoscopic effects for examining pictures, insects, flowers."—Dated 21st June, 1859.

41,362. Dallas, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in horses' collars."—Dated 18th June, 1859.

41,363. Deschamps, of 49, Rue de Montmorency, Paris, for "Improvements in buckles."—Dated 18th June, 1859.

41,364. Dierickx, of Hôtel des Monnaies, Paris, for "Improvements in the manufacture of coin, and especially in adjusting planchets of gold and silver of all modules."—Dated 18th June, 1859.

41,365. Duplay and Vidal, the former of 23, Rue du Roanne, the latter of Lieu de la Chaléassière, St. Etienne, for "Manufacture of tyres of steel and iron, of steel, and of iron."—Dated 9th May, 1859.

41,366. Figuière, of 98, Route d'Italie, Commune de Gentilly, département de la Seine, for "A means of preventing collisions on railways."—Dated 21st June, 1859.

41,367. Follian, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the suspension of lamps, &c."—Dated 19th June, 1859.

41,368. Gueyton, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Enamelling articles of jewelry, furniture, &c."—Dated 18th June, 1859.

41,369. Mallat, of 7, Rue Charlotte, Paris, for "Improvements in the manufacture of letter scales."—Dated 18th June, 1859.

41,370. Martin, of 10, Place de la Cité Napoléon, Lyon, for "A machine for making wires coated with silk and cotton for modes."—Dated 28th June, 1859.

41,371. Marulaz, of 58, Rue de la Ferme des Mathurins, Paris, for "A system of combs."—Dated 21st June, 1859.

41,372. Meurisse and Comber, of Lille, for "A machine for ironing linen."—Dated 30th June, 1859.

41,373. Mushet, represented by Regnaud, of Villa Montmorency, Anteuil, for "Manufacture of cast steel."—Dated 20th June, 1859.—(English Patent, 16th December, 1858.

41,374. Mushet, represented by Regnaud, of Villa Montmorency, Anteuil, for "Improvements in the manufacture of cast steel."—Dated 30th June, 1859.—(English Patent, 22nd December, 1858.)

41,375. Newberry, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A machine for screw-cutting nuts, screws, and bolts."—Dated 20th June, 1859.—(English Patent, 9th September, 1858.)

41,376. Perot and Wilbien, the former of 76, Rue de Sèvres, Vaugirard, the latter of 83, Rue de Grenelle St. Germain, Paris, for "Purifying and filtering oil and other fat substances."—Dated 20th June, 1859.

41,377. Pierre, of 43, Rue de Montmorency, Paris, for "Slides with facets for bedsteads."—Dated 18th June, 1859.

41,378. Pim, of 32, Rue Sedaine, Paris, for "So-called 'Parisian folding chairs.'"—Dated 20th June, 1859.

41,379. Poullain, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Buckles with fixed thongs."—Dated 18th June, 1859.

41,380. Simon, domiciled with Castelbon, of 15, Passage des Petites Ecuries, Paris, for "An artificial stone called 'Zeio-delite,' for superseding lead, lime, &c."—Dated 21st June, 1859.

41,381. Theaux and Vignolle, the former of 12, Rue de la Boucherie des Invalides, the latter of 65, Rue du Faubourg St. Honoré, Paris, for "A kind of liqueur."—Dated 20th June, 1859.

41,382. Viarnaud, of 12, Cour du 30 Juillet, Bordeaux, for "Portable baths."—Dated 25th June, 1859.

41,383. Wild, of 41, Rue St. Nicolas, Nancy, for "Palm-tree brushes."—Dated 27th June, 1859.

41,384. Armengaud, jun., represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A process for superseding in many cases the distillation and rectification of fat substances, essences, or oils."—Dated 22nd June, 1859.

41,385. Bacot, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Castors for furniture."—Dated 25th June, 1859.

41,386. Barre, Brothers, of 27, Rue de Penthièvre, Paris, for "A mode of embossing metals by means of impressions."—Dated 24th June, 1859.

41,387. Barre, Brothers, of 27, Rue de Penthièvre, Paris, for "A mode of punching metals by means of impressions."—Dated 24th June, 1859.

41,388. Batier, of 10, Rue de Chastillon, Paris, for "A process for gilding porcelain."—Dated 23rd June, 1859.

41,389. Berthelemy, of 89, Rue Neuve des Petits Champs, Paris, for "A railway break."—Dated 23rd June, 1859.

41,390. Bouasse, sen., of 29, Rue St. Sulpice, Paris, for "Copybooks containing models of writing and drawing."—Dated 25th June, 1859.

41,391. Caminade and Lemasson, the former of Rue aux Chiens, the latter of Rue d'Elbeuf, Rouen, for "A self-acting system of feeding steam boilers."—Dated 27th June, 1859.

41,392. Chesneau, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in paddle propellers and water wheels."—Dated 23rd June, 1859.

41,393. Choquet, of 12, Rond Point de l'Etoile, aux Thernes, département de la Seine, for "A process for cleaning metal."—Dated 27th June, 1859.

41,394. Cimeg, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A process for silvering glass, mirrors, ceramic products, tissues, paper, leather, and all substances in general."—Dated 28th April, 1859.—(Austrian Patent, 28th April, 1858.)

41,395. Clark, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in safety blocks for lowering boats from vessels, or for similar purposes."—Dated 23rd June, 1859.—(English Patent, 12th April, 1859.)

41,396. Delcoigne, represented by Fringant, of 10, Rue de Provence, Paris, for "A kind of canvass, being a substitute for woollen bags in pressing sugar."—Dated 27th June, 1859.

41,397. Delhomme, of 3, Rue Boutarel, Paris, for "Improvements in hoops of spring petticoats."—Dated 22nd June, 1859.

41,398. Delpech, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A mechanical process for oiling leather."—Dated 23rd June, 1859.

41,399. Dupont and Dreyfus, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Moulding projectiles and other hollow articles."—Dated 23rd June, 1859.

41,400. Garret, jun., and Kerridge, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for thrashing and cleaning corn."—Dated 23rd June, 1859.—(English Patent, 18th January, 1859.)

41,401. Gentil and Gateau, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A kind of cases, card-cases, cigar-cases, &c."—Dated 25th June, 1859.

41,402. Jolicoeur, of 38, Rue Dauphine, Paris, for "Ink for marking linen."—Dated 24th June, 1859.

41,403. Langlois, represented by Amouroux of 333, Rue St. Martin, Paris, for "An almanac medallion."—Dated 22nd June, 1859.

41,404. Laurent, of 10, Rue des Cinq-Moulins, La Chapelle St. Denis, département de la Seine, for "A product for making fermented beverage."—Dated 25th June, 1859.

41,405. Léonard, of 47, Rue de Malte, Paris, for "An electric indicator for cesspools and reservoirs."—Dated 2nd June, 1859.

41,406. Manceaux, represented by Maillard, of 25, Rue Montorgeuil, Paris, for "A system of cartridges."—Dated 25th June, 1859.

41,407. Pacot, of 6, Rue de la Fidélité, Paris, for "A toy."—Dated 25th June, 1859.

41,408. Parisod, domiciled with Gaulay, of 3, Rue des Fossés, St. Jacques, Paris, for "Improvements in the manufacture of fuel."—Dated 22nd June, 1859.

41,409. Parkes, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of pipes and cylinders of copper and copper alloys."—Dated 25th June, 1859.—(English Patent, 21st June, 1859.)

41,410. Pecaut, of 11, Rue de la Cerisaie, Paris, for "Applying photophors."—Dated 23rd June, 1859.

41,411. Riottot and Luquet, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A trinket-watch key combined with a pencil-case, tooth or nail pick, &c."—Dated 25th June, 1859.

41,412. Schlesinger, of 4, Rue Moret, Paris, for "An apparatus for making a light."—Dated 27th June, 1859.

41,413. Sturm, of 4, Rue Claude-Vellefaux, Paris, for "Improvements in the construction of kaleidoscopes."—Dated 22nd June, 1859.

41,414. Vacquerie, of Beauvais, for "Bleaching cotton for spinning."—Dated 29th June, 1859.

41,415. Vallois, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in clasps and mountings of books."—Dated 21st June, 1859.

41,416. Wadsworth, represented by Rowland, of 224, Rue de Rivoli, Paris, for "Improvements in gas burners and means and apparatus for lessening or regulating the outlet and pressure of gas, and improvements in street lamps, whereby they are protected from the action of wind or rain."—Dated 25th June, 1859.—(English Patent, 20th November, 1858.)

41,417. Baroulier and Micol, of 2, Rue Chantegrillet, St. Etienne, département de la Loire, for "A machine for compressing by means of a direct and steady pressure."—Dated 2nd June, 1859.

41,418. Bertin, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "A husking machine, being a substitute for thrashing machines."—Dated 27th June, 1859.

41,419. Bouillon, Muller, and Company, of 33, Rue de Chabrol, Paris, for "A washing apparatus."—Dated 28th June, 1859.

41,420. Bouillon, Muller, and Company, of 33, Rue des Chabrol, Paris, for "Portable and fixed boilers for economical, domestic, or industrial purposes."—Dated 28th June, 1859.

41,421. Boulanger, of 142, Faubourg St. Denis, Paris, for "A system of lamps."—Dated 29th purposes."—Dated 28th June, 1859.

41,422. Defond, of Cinq-Mars-la-Pile, département de l'Indre-et-Loire, for "An apparatus of baked earth for protecting vines from frost."—Dated 28th June, 1859.

41,423. Delperdange, domiciled of 55, Rue de Roubaix, Lille, for "Lamp with upper reservoirs."—Dated 4th July, 1859.

41,424. Denniee and Eybord, domiciled with the former, of 17, Rue du Chemin-de-Versailles, Paris, for "A washing machine."—Dated 27th June, 1859.

41,425. Desgenétais and Vatinet, of Bolbec, département de la Seine Inférieure, for "Improvements in weaving machines."—Dated 1st June, 1859.

41,426. Dubois, jun., of La Bastide St. Pierre, département de Tarn-et-Garonne, for "A thrashing machine."—Dated 29th June, 1859.

41,427. Dutreilh, of 6, Rue Guy de la Brosse, Paris, for "An apparatus for the manufacture of horse shoes."—Dated 30th June, 1859.

41,428. Ferrère, of 92, Rue Notre Dame, aux-Chartrons, Bordeaux, for "Oil skin for foot coverings."—Dated 2nd June, 1859.

41,429. De Gemini, of 59, Rue des Ecuries d'Artois, Paris, for "Working spirits."—Dated 27th June, 1859.

41,430. Gentilhomme, represented by Jacoby, of 4, Rue de Marengo, Paris, for "Enamelling jewellery."—Dated 27th June, 1859.

41,431. Gergères, of 1, Rue Ste. Gemme, Bordeaux, for "A process for protecting vines and plants from the injury of animals."—Dated 30th June, 1859.

41,432. Johnson, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of boots, shoes, and other foot coverings, and in apparatus and means used thereat."—Dated 28th June, 1859.

41,433. Kingsford, domiciled with Trappes, of 12, Rue Godot-de-Mauroy, Paris, for "A propeller of vessels."—Dated 29th June, 1859.

41,434. Koehler, of Bitschwiller, département du Haut-Rhin, for "Cast-iron journals for grease boxes of axles of locomotives, tenders, and railway carriages."—Dated 28th June, 1859.

41,435. Lefebvre and Balard, of 279, Rue St. Honoré, Paris, for "Photographic prints on tissues."—Dated 28th June, 1859.

41,436. Lenoir, of 71, Rue du Château d'Eau, Paris, for "A needle-level, called 'Protractor.'"—Dated 30th June, 1859.

41,437. Letessier, of Boulevart St. Aignan, Nantes, for "A mowing and harvesting machine."—Dated 30th June, 1859.

41,438. Meissonier, of 19, Rue de Vendome, Paris, for "Colouring pure orchal."—Dated 28th June, 1859.

41,439. Membré, of 18 and 20, Rue Lamartine, Paris, for "Frames for mounting the canvass of paintings."—Dated 28th June, 1859.

41,440. Nicolle, of Rue du Cornet, Yvetot, département de la Seine Inférieure, for "A machine for making wefts, and, if required, bobbins for warps."—Dated 30th June, 1859.

41,441. Pelouze, of Quai Conti, Hôtel des Monnaies, Paris, for "Manufacture of chlorhydric acid."—Dated 15th June, 1859.

41,442. Planque, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of pasteboard."—Dated 28th June, 1859.

41,443. Petit, of Cour-des-Prés, Tours, for "A harvesting machine."—Dated 27th June, 1859.

41,444. Sagette, of Joigny, département de l'Yonne, for "A mowing apparatus."—Dated 1st July, 1859.

41,445. Schramm, represented by Robijns, of 79, Rue de Vaugirard, Vaugirard, département de la Seine, for "A machine, called 'Express extractor,' for sugar works, brewing, and distilling."—Dated 29th June, 1859.

41,446. Trit, of 12, Impasse Fessard, Belleville, département de la Seine, for "Treatment of madder."—Dated 28th June, 1859.

41,447. Ventouillac, domiciled with his brother, of 26, Cours de Vincennes, Commune de St. Mandé, for "A lever rotary motor."—Dated 28th June, 1859.

41,448. Ballard and Roche, of Mâcon, for "A screw apparatus for distilling continuously."—Dated 8th July, 1859.

41,449. Bassery, of Amiens, for "A hand-machine for working wood for joinery and making tenons."—Dated 2nd July, 1859.

41,450. Bertrand, of 40, Rue Méridienne, Lotteville-lès-Rouen, département de la Seine Inférieure, for "An alarum float."—Dated 4th July, 1859.

41,451. Bréviaire, of 7, Rue du Contrat-Social, Rouen, for "A spring mechanism for galleries of windows."—Dated 6th July, 1859.

41,452. Chavanne, of 52, Quai Pierre-Seize, Lyon, for "Using the extract of chestnut trees for disincrustating steam boilers."—Dated 4th July, 1859.

41,453. Delhaye, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in apparatus for making washers of cocks, &c."—Dated 30th June, 1859.

41,454. Delalain, of 28, Rue de l'Orangerie, Versailles, for "A process for disinfecting essence of turpentine and resin-oil."—Dated 11th July, 1859.

41,455. Delaporté, of 11, Place Royale, Nantes, for "An hydrostatic machine."—Dated 7th July, 1859.

41,456. D'Hennin, Ponceot, and Bloisbluche, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Manufacture of foot-coverings and clogs of gutta percha, or any other similar substance, by means of special moulds and special mechanical apparatus."—Dated 30th June, 1859.

41,457. Fargues, of Lodève, département de l'Hérault, for "An apparatus in Saxon or French weaving machines for using said looms for weaving twilled cloth."—Dated 5th July, 1859.

41,458. Franc, of 7, Rue Neuve, Lyon, for "A red-dyeing substance."—Dated 5th July, 1859.

41,459. Gache, of 49, Rue de Vertais, Nantes, for "A steam apparatus for navigation."—Dated 4th July, 1859.

41,460. Gairaud, of 1, Rue de l'Ecole de Droit, Montpellier, for "A system of drying waddings."—Dated 4th July, 1859.

41,461. Grisart, of 12, Rue de la Trinité, Troyes, département de l'Aube, for "Improvements in sewing apparatus."—Dated 5th July, 1859.

41,462. Guary, of Falck, département de la Moselle, for "A counter-weight balance with compressed air."—Dated 2nd July, 1859.

41,463. Hardouin-Thirouin, represented by Lafon, of 292, Rue St. Martin, Paris, for "A machine for boiling seeds, vegetables, and roots by means of hot air."—Dated 30th June, 1859.

41,464. Javelle, of 54, St. Etienne, département de la Loire, for "Improvements in revolving fire-arms."—Dated 5th July, 1859.

41,465. Jeunehomme, Brothers, of Mouzon, département des Ardennes, for "Rolled iron for fastenings of windows and Venetian blinds."—Dated 11th July, 1859.

41,466. Martin, of 12, Rue Chaptal, Paris, for "Improvements in the manufacture of rails and wheel tyres."—Dated 30th June, 1859.

41,467. Martin and Bertholon, of St. Etienne, département de la Loire, for "A coke-kiln with an apparatus for distilling tar."—Dated 7th July, 1859.

41,468. Maurice, of Blois, département de Loir-et-Cher, for "A levelling instrument, called 'Speaking sight.'"—Dated 11th July, 1859.

41,469. Mauvage, of Héry, département de l'Yonne, for "A system of gauges and accessory instruments for making tiles, bricks, paving-tiles and pipes."—Dated 11th July, 1859.

41,470. Moustié, of 14, Rue Bouquière, Bordeaux, for "Clog-sabots for foot-coverings."—Dated 11th July, 1859.

41,471. Pascal, of 82, Rue Longue des Capucins, Marseille, for "Manufacture of stearine acid or stearine candles."—Dated 29th June, 1859.

41,472. Pimont, of 55, Rue Impériale, Rouen, for "A heating apparatus fed alternately by water and steam circulating in groups of pipes with simultaneous condensation and feeding."—Dated 6th July, 1859.

41,473. Prevost and Arnaud, represented by Génaud, of 52, Rue de l'Abbaye, Montmartre, département de la Seine, for "A submarine propellor."—Dated 21st June, 1859.

41,474. Rancoulet, of 155, Rue St. Denis, Paris, for "Improvements in buttons."—Dated 30th June, 1859.

41,475. Roy, of Ste. Austreberthe, département de la Seine Inférieure, for "An independent escapement of clocks with a constant power."—Dated 9th July, 1859.

41,476. Tron, of St. Louis, Banlieue de Marseille, for "A machine for planing screws."—Dated 7th July, 1859.

41,477. Varenne, of 2, Rue Vivienne, Paris, for "Improvements in ladies' bonnets."—Dated 14th June, 1859.

41,478. Villaret, of Clermont l'Hérault, département de l'Hérault, for "A composition for removing the bitter taste from smoking pipes and for giving them a pleasant smell."—Dated 5th July, 1859.

41,479. Voruz, senr., of Rue Linné, Nantes, for "Apparatus for moulding projectiles of guns, &c."—Dated 8th July, 1859.

41,480. Wanoff, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Manufacture of combs."—Dated 30th June, 1859.

41,481. Armagnac, jun., of 145, Rue de l'Université, Paris, for "A freezing apparatus."—Dated 1st July, 1859.

41,482. Aumond and Vitou, the former of 2, the latter of 9, Rue Albouy, Paris, for "A system of iron framings."—Dated 2nd July, 1859.

41,483. Bayer, of 13, Rue de Sèze, Paris, for "Improvements in the construction of carriages."—Dated 2nd July, 1859.

41,484. De Behr, of 66, Rue de Bondy, Paris, for "A composition of marble."—Dated 1st July, 1859.

41,485. Binant, of 70, Rue Rochechouart, Paris, for "Improvements in perfumery."—Dated 1st July, 1859.

41,486. Bouyon, of 24, Rue St. Honoré, Paris, for "A system of gas burners."—Dated 4th July, 1859.

41,487. Clegg, represented by Valerio, of 4, Rue Basse du Rempart, Paris, for "A kind of screw."—Dated 5th July, 1859.—(English Patent, 22nd October, 1858.)

41,488. Cusson-Saint-Joanis, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Applying photography."—Dated 1st July, 1859.

41,489. Delagrange, domiciled with Réal, of 17, Rue des Jeûneurs, Paris, for "Using the waste of silk, &c."—Dated 2nd July, 1859.

41,490. Delangle, of 189, Rue St. Martin, Paris, for "A kind of stump (for artists), called 'Nigrivore.'"—Dated 4th July, 1859.

41,491. Duval and Joviaux, of l'Hermitage, St. Denis, département de la Seine, for "A purifying gasmeter, indicating the lighting power."—Dated 2nd July, 1859.

41,492. Emery, domiciled with Aubin, of 46, Rue Basse, Passy, département de la Seine, for "A system of keyboards for organs."—Dated 15th June, 1859.

41,493. Francon, represented by Tardieu, of 6, Rue du Parc Royal, Paris, for "Improvements in the construction and the movement given to the stirring apparatus of machines for obtaining gaseous liquids."—Dated 1st July, 1859.

41,494. Gregg, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in currying or manufacturing leather."—Dated 21st March, 1859.

41,495. Henry and Bompard, the former of Savonnières devant Bar, the latter of Bar-le-Duc, département de la Meuse, for "A system applicable to all reels, and especially to twisting."—Dated 27th June, 1859.

41,496. Holden, represented by Brandon, of 7, Rue des Moulins, Paris, for "Improvements in machines for preparing and combing wool and other filamentous substances."—Dated 2nd July, 1859.—(English Patent, 7th January, 1859.)

41,497. Juillard, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "A system of variable escape of steam for regulating the draught of furnaces of locomotives."—Dated 4th July, 1859.

41,498. Klein and Wiel, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction of locks, fastenings of bags, &c."—Dated 1st July, 1859.

41,499. Lonca and Dubrulle, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Arrangement of spiral springs."—Dated 1st July, 1859.

41,500. Maisonneuve, repsesented by Louis Maisonneuve, of 13, Rue d'Orléans, Batignolles, département de la Seine, for "Improvements in telegraphic apparatus."—Dated 1st July, 1859.

41,501. Malard, of 61, Rue de Sèvres, Paris, for "Unalterable waterproof coating for brick walls." Dated 1st July, 1859.

41,502. Marguerittte and Worms de Romilly, the former of 30, Rue de Boulogne, the latter of 22, Rue Bergère, Paris, for "A mode of defecating juice of sugar."—Dated 4th July, 1859.

41,503. Maurel Fenaille and Ghatillon, represented D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Improvements in gas burners for burning hydrocarburets in general, and especially oil or essence of resin."—Dated 2nd July, 1859.

41,504. Mouillard and Gunther, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Arrangements in reflectors."—Dated 2nd July, 1859.

41,505. Pagliari, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A vessel for mixing gaseous and other liquids."—Dated 4th July, 1859.

41,506. Parkes, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of metal compounds, some of which may be rolled into sheets for sheathing vessels, and into pipes, rods, bolts, and nails, and manufacture of pipes of aluminium."—Dated 5th July, 1859.

41,507. Pasquier de la Gressière, domiciled with Brade, of 29, Rue Ste. Anne, Paris, for "Using torrefied wood in blast furnaces."—Dated 5th July, 1859.

41,508. Petin, Gaudet, and Company, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An apparatus for sawing large plates of iron, fenders, &c."—Dated 5th July, 1859.

41,509. Reid and Milner, represented by Perpigna of 42, Rue Neuve St. Augustin, Paris, for "Improvements in the construction of vessels and ships."—Dated 2nd July, 1859.—(English Patent, 20th January, 1859.)

41,510. Rousseau, represented by Ricordeau, of 23 Boulevart de Strasbourg, Paris, for "An organiphone or diminutive organ."—Dated 4th July, 1859.

41,511. Sellers, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in ovens for baking bread and other alimentary substances, being applicable to other purposes."—Dated 2nd July, 1859.—(English Patent, 10th June, 1859.)

41,512. Taylor, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in using india rubber."—Dated 30th June, 1859.

41,513. Appietto, Son, domiciled with Multedo, of Ajaccio, Corsica, for "A machine for multiplying lithographic transfers."—Dated 12th July, 1859.

41,514. Boulanger, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the treatment of white wine in general, and champagne in particular."—Dated 5th July, 1859.

41,515. Champenois, of Denain, département du Nord, for "A system of iron wheels."—Dated 16th July, 1859.

41,516. De Baecker, domiciled with Lannoy-Lefebvre, of 55, Rue Basse, Lille, for "A machine for harvesting corn and binding the same up in to sheaves."—Dated 14th July, 1859.

41,517. Ferron, sen., of Dinan, département des Côtes-du-Nord, for "Blouses with elastic collars and facings."—Dated 11th July, 1859.

41,518. Fleury, of 17, Rue de Puteaux, Batignolles, département de la Seine, for "Improvements in wheels of railway carriages."—Dated 6th July, 1859.

41,519. Fournier and Charin, Brothers, of Valence, département du Drôme, for "A system of cylinders of steam engines."—Dated 7th July, 1859.

41,520. Fuzellier-Cury, of Nouzon, département des Ardennes, for "Manufacture of handles of window bolts."—Dated 14th July, 1859.

41,521. Giraud and Pallu, of 94, Rue Duguesclin, Lyon, for "A stop, applicable to dynamic balances and other oscillating weighing instruments."—Dated 16th July, 1859.

41,522. Habert, of Troyes, département de l'Aube, for "Moveable independent seats for public closets."—Dated 13th July, 1859.

41,523. Halouchery, of Merville, département du Nord, for "A system of crushing."—Dated 19th July, 1859.

41,524. Keim, Father, of Thann, département du Haut-Rhin, for "A weaving loom."—Dated 6th July, 1859.

41,525. Lambert, domiciled with Duguet, of 42, Rue Grenette, Lyon, for "A case for smoking-pipes."—Dated 9th July, 1859.

41,526. Lefebvre, represesented by Bresson, of 57, Rue de Bretagne, Paris, for "A mode of stoppering bottles."—Dated 6th July, 1859.

41,527. Leygonie, of 5, Rue des Quartre-Chemins, Limoges, for "A universal motor based on the hydrostatic paradox."—Dated 18th July, 1859.

41,528. Luizet, of 5, Place Henri IV., Lyon, for "A machine with wet stamps."—Dated 15th July, 1859.

41,529. Mansoy, of 99, Rue de la Paix, Batignolles, département de la Seine, for "A system of iron naves for wheels of railway and other carriages."—Dated 6th July, 1859.

41,530. Maury, of 40, Rue d'Etretat, Havre, département de la Seine Inférieure, for "A means of pumping out the water from floating docks and from vessels."—Dated 16th July, 1859.

41,531. Ménard and Guérin, of Ay, département de la Marne, for "A mode of closing bottles, by means of a press and clasp."—Dated 13th July, 1859.

41,532. Minary and Soudry, the former of Casamène Banlieue de Besançon, the latter of 48, Rue St. Vincent Besançon, for "Treatment of the slags of forges."—Dated 13th July, 1959,

41,533. Poitevin, Brothers, of 69, Rue Imperial, Rouen, for "Electric mattresses jointed in a transversal direction."—Dated 16th July, 1859.

41,534. Prévost, of Bessèges, département du Gard, for "Improvements in the treatment of iron ores."—Dated 13th July, 1859.

41,535. Raymondière, of 32, Chaussée de la Madeleine, and of 1, Rue Beauséjour, Nantes, for "A machine for cutting leather, and rendering the same level."—Dated 14th July, 1859.

41,536. Sarraut, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A preservative rod-valve for lamps."—Dated 5th July, 1859.

41,537. Sebille, of 4, Rue du Dudrezène, Nantes, for "A machine for manufacturing sheets of lead, and for tinning them at the same time."—Dated 13th July, 1859.

41,538. Senac, of Tarbes, for "Applying a syphon pump to Japy's pump."—Dated 9th July, 1859.

41,539. Sloan, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the mode of opening and closing Venetian blinds, doors, &c."—Dated 5th July, 1859.

41,540. Soumeillan, of l'Isle-en-Dodon, département de la Haute Garonne, for "Correct watches with escapements."—Dated 27th May, 1859.

41,541. Tardieu, of Valenciennes, département du Nord, for "Laying rails on sleepers of rolled iron."—Dated 16th July, 1859.

41,542. Tougard, of Bapaume, département de la Seine Inférieure, for "A machine for cutting off patterns of fabrics."—Dated 16th July, 1859.

41,543. Toulze, of Clermont-Ferrand, département du Puy-de-Dôme, for "A railway break."—Dated 18th June, 1859.

41,544. Waldstein, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An optical instrument, by means of which various effects are produced."—Dated 5th July, 1859.—(Austrian Patent, 5th May, 1859.

41,545. ARNOUX, of Rue Ferrari, Marseille, for "A steam engine, with a moveable slide-box."—Dated 16th July, 1959.

41,546. BADIN and CHEVREAU-LORRAIN, represented by Béranger, of 38, Rue Taitbout, Paris, for "A mode of closing bottles." — Dated 12th July, 1859.

41,547. BARRE, Brothers, Rue de Ponthièvre, Paris, for "A process for punching and engraving metal."—Datsd 9th July, 1859.

41,548. CHARNELET, of 98, Rue Ménilmontant, Paris, for "Using a kind of metal for the construction of pincers used in machines for finishing stuffs."—Dated 9th July, 1859.

41,549. CHEVALLARD, DESMONS, CAUSSE, CANU, and HOREAU, of 75, Rue Truffaut, Batignolles, département de la Seine, for "A machine for breaking hard substances." — Dated 9th July, 1859.

41,550. CREMER of 60, Rue St. Louis au Marais, Paris, for "Windows with water-tight joints."—Dated 9th July, 1859.

41,551. DAVIS, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of umbrellas, parasols, &c."—Dated 9th July, 1859.—(English Patent, 31st August, 1858.)

41,552. DUFEY, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Processes for cementing malleable cast iron, common cast iron, and iron."—Dated 6th July, 1859.

41,553. GAUDRY, of 105, Rue de Paris, St. Denis, département de la Seine, for "A kind of wick-bearers for illuminations."—Dated 7th July, 1859.

41,554. GEORGI, of 28, Rue de l'Echiquier, Paris, for "An instrument for raising rails of railways." —Dated 8th July, 1859.

41,555. GOSTEAU, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A system of advertizing."—Dated 11th July, 1859.

41,556. GRANJON-CHARDAINE, represented by Despeaux, of 3, Passage de l'Entrepôt des Marais, Paris, for "An hydraulic and aeolian wheel with a jointed axle."—Dated 12th July, 1859.

41,557. GUIGUET and LALLIÉ, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Point paper."—Dated 11th July, 1859.

41,558. GUILLON, of 11, Rue Monthyon, Paris, for "An apparatus for making sugar-plums."—Dated 9th July, 1859.

41,559. GWYN, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in fire-arms."—Dated 9th July, 1859.—(English Patent, 21st June, 1859.)

41,560. JACOB and BAUDRY, the former of 32, Boulevart Poissonnière, the latter of 11, Passage Saulnier, Paris, for "Cartridges for breech-loading fire-arms."—Dated 9th July, 1859.

41,561. JAUBERT and CHOMINOT, of Chemin Neuf de la Madeleine, Marseille, for "Manufacture of coffee."—Dated 16th July, 1859.

41,562. JULLIENNE, of 303, Rue St. Denis, Paris, for "A kind of belt for bathing."—Dated 11th July, 1859.

41,563. LEBIGRE and TELLIER, the former of 142, Rue de Rivoli, Paris, the latter of 11, Rue Lebouteux, Batignolles, département de la Seine, for "A night utensil (nécessaire de voyage) with an air-cushion for travellers."—Dated 9th July, 1859.

41,564. MARTIN, domiciled with Riant, of 38, Rue du Dragon, Paris, for "A machine for loading and unloading merchandize, and all kinds of articles." —Dated 12th July, 1859.

41,565. MARTIN, of 10, Place Napoléon, Villeurbanne, département du Rhône, for "A silk neck-cloth for ladies."—Dated 18th July, 1859.

41,566. METZGER, alias CHARLES, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Copying presses."—Dated 9th July, 1859.

41,567. MUSHET, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in metal alloys."—Dated 6th July, 1859.—(English Patent, 12th January, 1859.)

41,568. MUSHET, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast steel."—Dated 8th July, 1859. —(English Patent, 12th January, 1859.

41,569. MUSHET, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast steel."—Dated 9th July, 1859. —(English Patent, 15th January, 1859.)

41,570. PERPÈTE, represented by Amouroux, of 333. Rue St. Martin, Paris, for "Fixed and marine steam engines with wheels and paddles, having a rotula movement."—Dated 11th July, 1859.

41,571. RAVENEAU, of 210, Rue du Faubourg St Denis, Paris, for "A regulating float and self-moving cock."—Dated 12th July, 1859.

41,572, SCHNECKENBURGER, LIPPMAN, and CARRÉ, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A plastic composition, called 'Similimarbre,' for moulding, reproducing, and constructing all kinds of artistic and industrial articles."—Dated 7th July, 1859.

41,573. VALLANTIN, of 123, Rue Notre Dame des Champs, Paris, for "Improvements in mounting objectives for photography."—Dated 9th July, 1859.

41,574. WAAG, of 79, Rue de la Fidélité, Paris, for "Improvements in apparatus for wedging weighing bridges."—Dated 9th July, 1859.

41,575. WAASER, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in machines for working reeds for caning chairs, arm-chairs, &c."—Dated 11th July, 1859.

41,576. WALKER, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in mounting looking glasses or toilet mirrors.— Dated 6th July, 1859.—(English Patent, 20th May, 1859.)

41,577. WARORERY, of 14, Quai St. Clair, Lyon, for "Improvements in Heilmann's combing machines."—Dated 18th July, 1859.

41,578. ALEXANDRE, Father and Son, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Uniting the instruments called 'Polkas, Flutinas,' for being played together or separately in the same way."—Dated 12th July, 1859.

41,579. BRASSENS, of Quinsac, département de la Gironde, for "Vessels with two stern posts for two screws."—Dated 18th July, 1859.

41,580. Buhler, of 2, Rue Kleber, Mulhouse, département du Haut-Rhin, for "A mechanism called 'Motive plunger.'"—Dated 20th July, 1859.

41,581. Burton, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in fire-arms."—Dated 13th July, 1859.—(American Patent, 14th June, 1859.)

41,582. Cazes and Teissier, au Vigan, département du Gard, for "Third needle supports for stocking frames."—Dated 18th July, 1859.

41,583. Chenn, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An alimentary substance, called 'Galinea.'"—Dated 13th July, 1859.

41,584. Clavières, of 82, Rue Blanche, Paris, for "Arrangements of rails and sleepers on common roads, and in towns."—Dated 14th July, 1859.

41,585. Courtois and De Soulange, represented by Brade, of 29, Rue Ste. Anne, Paris, for "A lime-kiln."—Dated 13th July 1859.

41,586. Della-Janna, of 2, Rue de la Sous-Prefecture, Vienne, for "A machine for currying leather."—Dated 19th July, 1859.

41,587. Dupy, of 34, Rue Porte-Dijeaux, Bordeaux, for "Pocket-book waistcoats, called safety cash-box."—Dated 23rd July, 1859.

41,588. Foucault, of Alger, for "A process for stripping fibrous plants, and using them in the manufacture of paper."—Dated 27th June, 1859.

41,589. Foucault, of Alger, for "Arrangements of scenery and decorations of theatres."—Dated 5th July, 1859.

41,590. Frouin, Porchère, département de la Gironde, for "A machine with a continuous movement."—Dated 21st July, 1859.

41,591. Gentille, 63, Boulevart Napoléon, Toulouse, for "Crinoline that may be shut up in a box."—Dated 15th July, 1859.

41,592. Grand de Chateauneuf, of 30, Avenue de Claillot, aux Ternes, département de la Seine, for "Air beds."—Dated 12th July, 1859.

41,593. Grasset, of 24, Rue Bellefond, Paris, for "An apparatus for registering carriages."—Dated 12th July, 1859.

41,594. Herché, of Route d'Evreux, Louviers, département de l'Eure, for "Small hampers for conveying building materials, soil, manure, rubbish, and loose materials in general."—Dated 18th July, 1859.

41,595. Jean, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in Thierry's smoke-consuming apparatus."—Dated 12th July, 1859.

41,596. Kerr, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in revolving fire-arms."—Dated 12th July, 1859.—(English Patent, 17th December, 1858.)

41,597. Klotz, of 4, Passage Saulnier, Paris, for "Improvements in sewing machines."—Dated 13th July, 1859.

41,598. Lefebvre, domiciled with Burel, of 3, Rue d'Harcourt, Rouen, for "Improvements in turning, applicable especially to the manufacture of spindles for spinning and weaving."—Dated 20th July, 1859.

41,599. Livermore, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in the manufacture of liquids used for lighting and heating."—Dated 13th July, 1859.—(English Patent, 8th July. 1859.)

41,600. Mange, of 19, Rue St. Julien, Rouen, for "A machine for making paper tubes for spinning."—Dated 19th July, 1859.

1,601. Maury, of 37, Rue St. Remy, Bordeaux, for "Manufacture of sausages."—Dated 22nd July, 1859.

41,602. Pedroni and Besson, Brothers, the former of 84, Rue de la Croix-Blanche, the latter of 10, Rue du Réservoir, Bordeaux, for "A machine for fulling hats."—Dated 21st July, 1859.

41,603. Petit, of 63, Rue Fondary, Grenelle, département de la Seine, for "Lever locks."—Dated 13th July, 1859.

41,604. Schimmelbusch, represented by Hoechster, of 34, Rue des Petites-Ecuries, Paris, for "A mode of improving puddled steel and iron by alloying the same with tungsten."—Dated 13th July, 1859.

41,605. Simon, of Charleville, département des Ardennes, for "Manufacture of nails by the cold process."—Dated 25th July, 1859.

41,606. Smith, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in fire-arms."—Dated 13th July, 1859.—(English Patent, 27th June, 1859.)

41,607. Trébuchet, of 27, Rue Surson, Bordeaux, Bacalande, département de la Gironde, for "A rotary steam engine."—Dated 19th July, 1859.

41,608. Vandevoorde, domiciled with Royaerts, of 25, Rue de la Clef, Lille, for "A metrical measure."—Dated 23rd July, 1859.

41,609. Basset, of 4, Rue de la Vieille-Potterie, Orléans, for "An apparatus for turning over leaves."—Dated 23rd July, 1859.

41,610. Boubel and Co., of 1, Rue St. Savournin, Marseille, for "A pump for draining marshes."—Dated 22nd July, 1859.

41,611. Charvet and Franquin, of Route de Cremieux, Villeurbanne, département du Rhône, for "A motor."—Dated 23rd July, 1859.

41,612. Chauvel, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of caps and other similar head coverings."—Dated 16th July, 1859.

41,613. Constantin, of 7, Rue d'Antin, Paris, for "Artificial leaves."—Dated 15th July, 1859.

41,614. David, domiciled at Cognac, département de la Charente, for "A system of packing full and empty bottles, and other fragile objects."—Dated 23rd July, 1859.

41,615. Desnoulet, of 109, Grande Rue, Lille, for "Manufacture of beer."—Dated 27th July, 1859.

41,616. Dombret, Gugnolle, and Potez, sen., represented by Thibault, of 34, Rue du Rendez-vouz, St. Mandé, département de la Seine, for "A machine for preparing textile and filamentous substances, such as wool, flax, &c., for combing."—Dated 7th July, 1859.

41,617. Du Liége de Puychaumeix, of 14, Rue de Reuilly, Charenton-le-Pont, département de la Seine, for "Spring mattresses and seats."—Dated 15th July, 1859.

CERTIFICATES OF ADDITION.

36,635. ARTIGE, for a "Rod."—Dated 18th May, 1859.

39,190. BAILLET, CANMONT, and Co., for a "Fan."—Dated 17th May, 1859.

37,796. BELORGÉ, for "Braces."—Dated 12th May, 1859.

40,332. BOUQUINÉ, for a "Cross-beam.'—Dated 20th May, 1859.

32,134. BRAITEAN, for a "Cock."—Dated 19th May, 1859.

39,701. BREVEL, for a "Steam engine."—Dated 18th May, 1859.

15,185. CHAMPONNOIS, for "Sugar."—Dated 14th May, 1859.

37,347. CHATAING, for a "Pump."—Dated 14th May, 1859.

34,261. CONSEIL, for "Salvage."—Dated 13th May, 1859.

39,799. CORNELY, for "Raisiné."—Dated 17th May, 1859.

39,766. COUSIN (du Thil.), for "Cosmography."——Dated 12th May, 1859.

40,841. COUSINBERCHE, jun., for "Candles."—Dated 20th May, 1859.

25,374. DEISS, for "Tallow."—Dated 20th May, 1859.

36,838. DOMERCQ, for "Watering."—Dated 14th May, 1859.

39,103. DUROT, for a "Roller."—Dated 20th May, 1859.

39,204. GAUPILLAT and ILLIG, for a "Cartridge."—Dated 12th May, 1859.

38,493. GRENIÉ and LADEVÈZE, for a "Fire-arm."—Dated 12th May, 1859.

34,634. HENRIOT, for a "Syringe."—Dated 18th May, 1859.

38,719. HONEGGER, for "Weaving."—Dated 18th May, 1859.

36,708. JODON, for a "Motor."—Dated 20th May, 1859.

36,748. LABORDE, for a "Smut machine."—Dated 20th May, 1859.

38,852. LANNOY, for "Heating."—Dated 19th May, 1859.

40495. LE BLANC, for "Dyeing."—Dated 13th May, 1859.

37,682. LE CHATELIER, for "Alumina."—Dated 18th May, 1859.

36,654. L'ECLUSE, for "Sewing."—Dated 18th May, 1859.

40,011. MASSON, for "Cleaning bottles."—Dated 13th May, 1859.

31,693. MONNIER, for a "Break."—Dated 13th May, 1859.

38,404. PAVY, for "Paper pulp."—Dated 19th May, 1859.

35,516. PELLET, for "Printing leather canvass."—Dated 16th May, 1859.

38,861. POIVRET, for a "Tricot."—Dated 18th May, 1859.

38,504. POIVRET, for a "Tricot."—Dated 18th May, 1859.

39,884. PORLIER, for an "Earth nut."—Dated 23rd May, 1859.

39,400. PRENGRUEBER, for "Locomotion."—Dated 17th May, 1859.

40,729. RATEAU, for a "Floor."—Dated 16th May, 1859.

30,880. SAURET, for a "Furnace."—Dated 13th May, 1859.

30,283. SCHREIBER, for "Gas."—Dated 21st May, 1859.

40,511. SCHRODER, for "Sugar."—Dated 14th May 1859.

36,633. VASSEUR and HOUBIGANT, for "Dyeing.'—Dated 14th May, 1859.

37,372. VERSET, for a "Pump."—Dated 23rd May 1859.

33,499. WALCH, for "Printing fabrics."—Dated 18th May, 1859.

36,667. BEAURY, for "Wool silk."—Dated 20th May, 1859.

16,879. BELVALETTE, Brothers, for a "Carriage."—Dated 21st May, 1859.

34,592. BOUDIER, for a "Steam engine."—Dated 30th May, 1859.

38,418. BOUQUIÉ, for "Traction."—Dated 20th May, 1859.

39,001. CARMINE, for a "Calorifere stove."—Dated 21st May, 1859.

36,799. COLOMBIER, for "Steam."—Dated 28th May, 1859.

36,767. CUIT, for a "Railway break."—Dated 25th May, 1859.

36,278. DALMAS, for an "Inodorous basin for closets."—Dated 26th May, 1859.

36,410. DAVIS, for a "Musical instrument."—Dated 26th May, 1859.

32,701. DESAINT, for "Stoppering."—Dated 31st May, 1859.

36,937. DUNOYER, for a "Varnish."—Dated 3rd June, 1859.

39,672. ESCOUBÉ, for "Gloves."—Dated 4th June, 1859.

21,019. EVRARD, for a "Fulling stock."—Dated 4th June, 1859.

22,924. GACHE, for a "Steam apparatus."—Dated 3rd June, 1859.

15,570. GASTINNE, for a "Fire-arm."—Dated 24th May, 1859.

36,805. GAUTHIER, for a "Tool."—Dated 27th May, 1859.

36,876. HERAULT, for a "Conveyance."—Dated 4th June, 1859.

40,463. HOGA, PIGGOTT, and BEARDMORE, for a "Telegraph."—Dated 21st May, 1859.

36,712. KUGLER, for a "Spring."—Dated 21st May, 1859.

36,973. Lambert, for "Moulding."—Dated 26th May, 1859.

36,750. Lamblin, for a "Break."—Dated 27th May, 1859.

36,006. Lavergne, for a "Railway."—Dated 8th June, 1859.

24,655. Lebrun, for a "Window."— Dated 28th May, 1859.

36,878. Lemaire, for a "Chimney."—Dated 4th June, 1859.

35,352. Manuel, for "Sugar."—Dated 21st May 1859.

38,593. Millot, for a "Retractible truss."—Dated 24th May, 1859.

13,510. Moreau, for a "Furnace."— Dated 25th May, 1859.

38,137. Moussy-Teysset, for a "Lock."—Dated 3rd June, 1859.

28,607. Nouflard, for "Carding."— Dated 24th May, 1859.

34,250. Peltier jun., for "Crushing grain."—Dated 23rd May, 1859.

32,283. Perratone, for a "Railway train."—Dated 23rd May, 1859.

40,728. Pinay, for a "Textile substance."—Dated 8th June, 1859.

37,523. Poret, for "Mineral water."—Dated 21st May, 1859.

32,948. Saintard, for a "Break."— Dated 24th May, 1859.

40,210. Salot, alias Perpignan, for a "Fire-globe."—Dated 26th May, 1859.

32,290. Sénéchal and Potez, for "Screw cutting."—Dated 21st May, 1859.

32,028. The St. Georges Company of Engine and Iron Works, near St. Gall, for "Embroidery."—Dated 25th May, 1859.

35,168. Stevenaux, for a "Brewing vat."—Dated 25th May, 1859.

36,954. Victor, for a "Brick."—Dated 3rd June, 1859.

37,964. Berthiot and Co., for a "Manometer."—Dated 11th June, 1859.

36,992. Blaise, for "Animal charcoal."— Dated 11th June, 1859.

40,774. Bontel, for "Ladies' page."—Dated 30th May, 1859.

17,408. Brunet, for "Weaving."—Dated 27th May, 1859.

39,002. Caussade and Barrère, for "Sewing."—Dated 6th June, 1859.

38,220. Charlot, for a "Telescope."—Dated 1st June, 1859.

40,551. Chomette, for "Heating,"—Dated 6th June, 1859.

36,547. Coulard, for a "Tile."—Dated 16th May, 1859.

36,963. David, sen., for "Small shot."—Dated 10th June, 1859.

39,418. Dax, for a "Fire arm."—Dated 30th May, 1859.

36,801. Degrand, for a "Motor."—Dated 30th May, 1859.

40,326. Delarivière and Martin, for a "Pump."—Dated 27th May, 1859.

39,708. Frémentin, for a "Stopper."—Dated 15th June, 1859.

33,480. Gaiffe, for "Printing fabrics."—Dated 31st May, 1859,

15,706. Gras, for "Locomotion." — Dated 28th May, 1859.

40,230. Hayem, jun., for "Cravat."—Dated 31st May, 1859.

29,138, Hebert, for a "Spooling machine."—Dated 1st June, 1859.

37,415. Hossard, for a "Syphon."—Dated 15th June, 1859.

300,32. Knab and Co., and Clovis, Knab, and Co., for a "Lamp."—Dated 24th May, 1859.

40,951. Lannebit and Barrère, for a "Forge."—Dated 4th June, 1859.

39,306. Lévêque, for "Harness."—Dated 24th May, 1859.

26,136. Marchand, for a "Railway."—Dated 8th June, 1859.

38,728. Marque, for a "Lamp-burner."—Dated 15th June, 1859.

31,603. Mercier, for a "Mill."—Dated 27th May, 1859.

40,405. De Mirandol, for "Ornamenting mirrors."—Dated 11th June, 1859.

35,481. Molard, for "Tan."—Dated 11th June, 1859.

41,057. Moreau, for "Congreve rockets."—Dated 1st June, 1859.

37,718. Mourceau, for a "Tissue."—Dated 4th June, 1859.

36,851. Nallard, for a "Registering apparatus."—Dated 28th May, 1859.

38,921. Ouarnier, for a "Cartridge."—Dated 7th June, 1859.

23,907. Pirow, for a "Clasp."—Dated 26th May, 1859.

33,925. Platel, for a "Fire-arm."—Dated 7th June, 1859.

36,786. Puech, for a "Tricot."—Dated 26th May, 1859.

36,855. Ramade-Dourif, for "Alimentary paste."—Dated 1st June, 1859.

41,060. Rives, for a "Dray."—Dated 10th June, 1859.

37,304. Rivière, for "Lubricating carriages."—Dated 3rd June, 1859.

35,329. Schneider, for "Cartridge and fire-arms."—Dated 9th June, 1859.

27,941. Orézel, for "Yeast."—Dated 15th January, 1859.

37,113. Vigreux, for a "Design."—Dated 6th June, 1859.

PRUSSIA.*

List of Patents Delivered between the 1st and 30th November, 1859.

(*Communicated by the Minister of Commerce and Public Works.*)

1. H. Kohn, of Berlin, for an imported invention of "A sewing machine."—5 years.—Dated 8th November, 1859.

2. Emil Arnold, of Berlin, for an imported invention for "Self-acting apparatus for laying in paper and cutting the same, connected with fly-presses."—5 years.—Dated 15th November, 1859.

3. Kayser, of Gleiwitz, for "A self-registering apparatus for weighing beetroot and similar other substances.—5 years.—Dated 22nd November, 1859.

4. H. Baumeister, of Magdeburg, for "A self-acting apparatus for emptying scales."—5 years.—Dated 23rd November, 1859.

5. W. Wedding, of Berlin, for "A mangle."—5 years.—Dated 25th November, 1859.

List of Specifications published during the week ending 9th December, 1859.

No.	Price.	Subject-Matter.
1092	6*d.*	Carding engines.
1093	3*d.*	Apparatus for obtaining and applying atmospheric pressure.
1094	3*d.*	Fastenings for shutters, &c.
1095	7*d.*	Manufacture of iron hurdles and fencing.
1096	7*d.*	Electro-magnetic engines.
1097	5*d.*	Apparatus for expressing clay or brick earth through dies.
1098	3*d.*	Manufacture of night-light cases.
1099	3*d.*	Manufacture and application of alkaline silicates.
1100	11*d.*	Machinery for rubbing or dressing types.
1101	4*d.*	Manufacture of caustic, soda, and carbonate of soda.
1102	3*d.*	Machinery for grinding wire cards.
1103	5*d.*	Treating ores to obtain metallic oxides for dyeing, printing, and painting.
1104	3*d.*	Manufacture of crayons.
1105	3*d.*	Manufacture of mineral oil and grease.
1106	1*s.* 6*d.*	Boilers and furnaces for generating steam and economizing fuel, &c.
1107	4*d.*	Extraction of quinine.
1108	3*d.*	Couplings for shafting.
1109	10*d.*	Machinery for making screw bolts and nuts.
1110	10*d.*	Power printing presses.
1111	10*d.*	Machine for sewing boots and shoes.
1112	3*d.*	Camp cooking apparatus.
1113	3*d.*	Kettles.
1114	1*s.* 3*d.*	Railway signals.
1115	4*d.*	Manufacture of cast steel.
1116	1*s.* 2*d.*	Means of communications on railway trains.
1117	3*d.*	Tuyere for blast furnaces.
1118	3*d.*	Locks, bolts, and latches.
1119	7*d.*	Steam boilers.
1120	4*d.*	Utilization of peat for the treatment of metals, &c.
1121	3*d.*	Machinery for cleaning cotton.
1122	1*s.* 11*d.*	Steam engines, &c.
1123	2*s.* 10*d.*	Shears for cutting boiler plates, &c.
1124	6*d.*	Spinning machinery.
1125	3*d.*	Protecting ships against injury from projectiles.
1126	3*d.*	Construction of fortifications.
1127	3*d.*	Drills.
1128	3*d.*	Manufacture of sheet iron.
1129	7*d.*	Seed drills.
1130	3*d.*	Gas regulators.
1131	4*d.*	Refining sugar, &c.
1132	3*d.*	Cannon and other fire-arms, projectiles, wads, and cartridges.
1133	3*d.*	Scutching and carding machine.
1134	5*d.*	Steam gauge.
1135	5*d.*	Fish hooks.
1136	10*d.*	Pianofortes.
1137	9*d.*	Lubricating axle journals of locomotive engines, &c.
1138	9*d.*	Apparatus for obtaining motive power.
1139	3*d.*	Photographic apparatus.
1140	5*d.*	Gas governor or regulator.
1141	3*d.*	Machinery for staining paper.
1142	10*d.*	Apparatus and flues for heating and ventilating, &c.
1143	6*d.*	Washing machine.
1144	8*d.*	Fastenings for wearing apparel, &c.
1145	6*d.*	Apparatus for grinding grain and other substances.
1146	3*d.*	Apparatus for measuring the hoofs of horses.
1147	3*d.*	Spinning machinery.
1148	1*s.* 3*d.*	Reaping machines, &c.
1149	2*s.* 2*d.*	Locks and fastenings.
1150	4*d.*	Puddling iron and steel.
1151	4*d.*	Manufacture of iron.
1152	3*d.*	Electric telegraph cables.
1153	1*s.*	Manufacture of glass shades.
1154	9*d.*	Manufacture of steel.
1155	3*d.*	Preparation of colouring matters.
1156	1*s.*	Portable photographic tent and camera.

* For the Prussian Patent Law, see Nos. 313 and 329 of this Journal.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 10th December, 1859.

Mornings - - - -	768
Evenings - - - -	643
Total - - -	1411

Since the opening of the Museum Free Daily (May 12, 1858,)—165,691.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s*.

PATENTS BECOME VOID, &c.—The following are the numbers of this Journal in which have appeared the Quarterly Lists of Patents become Void by reason of non-payment of the Duty of £50 :—

No. of Journal.	Periods embraced by the Lists.
234 -	A.D. 1852—October to December inclusive.
247 -	A.D. 1853—January to March ,,
268 -	,, April to June ,,
291 -	,, July to September ,,
321 -	,, October to December ,,
345 -	A.D. 1854—January to March ,,
371 -	,, April to June ,,

553 -	A.D. 1856—January to March ,,
579 -	,, April to June ,,
605 -	,, July to September ,,

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d*.
2. SEWING AND EMBROIDERING, price 6*d*.
3. MANURE, price 6*d*.
4. PRESERVATION OF FOOD, price 6*d*.
5. MARINE PROPULSION, price 4*s*.
6. MANUFACTURE OF IRON AND STEEL, price 5*s*.
7. AIDS TO LOCOMOTION, price 1*s*.
8. STEAM CULTURE, price 2*s*.
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s*. 6*d*.
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s*. 6*d*.
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s*.
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s*.
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s*.
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s*. 6*d*.
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s*. 6*d*.
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s*.

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s*. per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 621. FRIDAY, DECEMBER 16, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1792. To TULLIUS PRIEST FAY, of Liverpool, in the county of Lancaster, for the invention of "Improvements in machinery or apparatus for obtaining and applying motive power."

On his petition, recorded in the Office of the Commissioners on the 3rd day of August, 1859.

2642. To PIERRE MARCHAND, EMILE MARCHAND, and JOSSE MARCHAND, of Dunkirk, France, trading under the firm of Pierre Marchand, Brothers, for the invention of "Improvements in refining lamp oil made from oleaginous seed."

On their petition, recorded in the Office of the Commissioners on the 22nd day of November, 1859.

2650. To WILLIAM KEATES, of Liverpool, in the county of Lancaster, Copper and Lead Smelter, for the invention of "An improved mode of manufacturing or forming the foundation or body of compound cylinders used for printing or embossing fabrics."

On his petition, recorded in the Office of the Commissioners on the 23rd day of November, 1859.

2727. To WILLIAM BETTS, of Wharf Road, City Road, in the county of Middlesex, Capsule Manufacturer, for the invention of "Improvements in the manufacture of capsules, and in the machinery or apparatus employed therein."

2729. To THOMAS FREDERICK BRADSON, of Birmingham, in the county of Warwick, Brassfounder, for the invention of "Improvements in door springs."

2733. And to ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "Certain improvements in the construction of coiled springs."—A communication from abroad by Carlos French, of Seymour New Haven, Connecticut, in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of December, 1859.

2735. To THOMAS ROBERT RUSSELL, of Liverpool, in the county of Lancaster, Watch Manufacturer, for the invention of "The application of a certain metal for the movements of watches and other time keepers."

2737. To JOSEPH WILLIAM WILSON, of Buckingham Street, Strand, London, county of Middlesex, Civil Engineer, for the invention of "Improvements in the mode of forming and constructing boxes or cases for postal and other purposes."

2739. To HENRY EDWIN DRAYSON, of Bridge Street, Westminster, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in the mode of extinguishing fires in ships, steam boats, vessels of every description, houses, warehouses, stores, or other buildings of whatever kind, and in the machinery connected therewith."

2741. To RICHARD BOND, of Burnley, in the county of Lancaster, "Temple" and "Roller" Maker, and WILLIAM HAYHURST, of the same place, Mechanic, for the invention of "Improved machinery or apparatus to be employed in the manufacture of a certain description of 'temples' used in power looms for weaving."

2743. To NATHANIEL CLAYTON and JOSEPH SHUTTLEWORTH, of the city of Lincoln, for the invention of "Improvements in steam boiler safety valves."

2745. And to EDWIN AUGUSTUS CURLEY, of Richmond Street, Saint George's Road, Southwark, in the county of Surrey, for the invention of "Improved mechanical arrangements or contrivances for measuring, registering, and regulating the flow

of liquids, and likewise for measuring and regulating the passage of fluids and vapours."

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of December, 1859.

2747. To EDWARD KELLY, of Erdington, near Birmingham, in the county of Warwick, Plumber, for the invention of "An improved washstand, part of which is also applicable for other useful purposes."

2749. To JULIUS BENN, of Tiffield, in the county of Northampton, Superintendent of the Tiffield Reformatory, for the invention of "Improvements in drills."

2751. To CHARLES SHORT, of Westwood, in the parish of Selston, in the county of Nottingham, Smith, THOMAS BOWES SMEETON, of Underwood, in the said county of Nottingham, Farmer, and WILLIAM BOWLER, of Butterley Park, in the parish of Pentrich, in the county of Derby, Farmer, for the invention of "The manufacture of bricks, tiles, drain pipes, or other articles from cinder or refuse slag."

2753. To ALFRED LANCASTER, of Kensington, in the county of Middlesex, Gun Maker, for the invention of "Improvements in breech-loading fire-arms, in projectiles, and in apparatus for charging cartridges for breech-loading and other arms."

2755. And to ENRICO ANGELO LUDOVICO NEGRETTI and JOSEPH WARREN ZAMBRA, of Hatton Garden, in the city of London, Meteorological Instrument Makers, for the invention of "Improvements in stereoscopes."

On their several petitions, recorded in the Office of the Commissioners on the 5th day of December, 1859.

2757. To FRANÇOIS COIGNET, of 33, Boulevard St. Martin, at Paris, in the empire of France, Manufacturer, for the invention of "Improvements in the manufacture of beton or composition applicable for purposes of covering, building, and construction, and for various uses as artificial stone."

2759. To JAMES SHAW, of the city of Manchester, in the county of Lancaster, Medical Practitioner, for the invention of "Improvements in the insulation and laying down conducting wires for the transmission of telegrams or telegraphic messages."

2761. To EDWIN ARCHER WOOD, of Victoria Terrace, Notting Hill, West, in the county of Middlesex, for the invention of "Certain improvements in anchors."

2763. And to ARCHIBALD TURNER, of Leicester, Elastic Web Manufacturer, for the invention of "Improvements in the manufacture of elastic fabrics."

On their several petitions, recorded in the Office of the Commissioners on the 6th day of December, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 14th December*, 1859, *inclusive.*)

12th December.

2968. GEORGE LITTLEWOOD, of 93, London Wall, in the city of London, for an invention of "Improvements in printing geometric patterns."—Dated 13th December, 1856.

3015. THOMAS WHITE, of Sleaford, in the county of Lincoln, Manufacturer, for an invention of "A new or improved manufacture of boots, shoes, and other coverings for the feet."—Dated 20th December, 1856.

13th December.

2974. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Improvements in machinery for boring, turning, tapping, and screwing fittings for gas, water, steam, and other pipes, and in vices for holding the same while they are operated upon."—A communication.—Dated 15th December, 1856.

2990. FREDERICK LEVICK, junior, Ironmaster, and JOHN JAMES, Furnace Manager, both of Cwm Celyn and Blaina Iron Works, in the county of Monmouth, for an invention of "Improvements in the mode of utilizing the waste gases of blast furnaces."—Dated 17th December, 1856.

14th December.

2976. CHARLES FRÉDÉRIC VASSEROT, of the firm Wells and Vasserot, of 45, Essex Street, Strand, London, Patent Agents, Mechanical Draughtsman, &c., for an invention of "Preserving salmon trout and other fish."—A communication.—Dated 16th December, 1856.

3084. ISAAC ATKIN, of the town and county of the town of Nottingham, Lace Manufacturer, and MARMADUKE MILLER, of the town and county of the town of Nottingham aforesaid, Steam Gauge Maker, for an invention of "Improvements in folding lace, paper, and other fabrics."—Dated 27th December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 14th December*, 1859.)

1070. CLEMENT DRESSER, of Basinghall Street, in the city of London, for an invention of "Improvements in combining materials to be used in substitution of whalebone and other flexible and elastic substances."—A communication.—Dated 15th December, 1852.

Notice of Application for Leave to enter a Disclaimer.

In the matter of Letters Patent granted to JONATHAN IRELAND, of the city of Manchester, in the county of Lancaster, Foundry Engineer, for "Improvements in cupola furnaces."—Dated the 28th day of August, 1858.

Notice is hereby given that the said JONATHAN IRELAND has applied by petition to the Commissioners of Patents for Inventions, according to the Statute in that case made and provided, for leave to enter a Disclaimer of certain parts of the specification of the said Letters Patent.

Dated this 12th day of December, 1859.

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

41,618. EBEL, of 3, Rue des Noyers, Belleville, département de la Seine, for "A tool for making cork stoppers."—Dated 15th July, 1859.

41,619. ENGEL, domiciled with Lecomte, of 70, Rue de Babylone, Paris, for "A continuous steam apparatus for extracting and evaporating."—Dated 18th July, 1859.

41,620. FEUILLET, of 103, Rue des Capucins, Lunéville, département de la Meurthe, for "A machine for husking corn, trefoil, &c."—Dated 26th July, 1859.

41,621. GERMAIN, of Lorgues, département du Var, for "Manufacture of mosaic pavements of baked clay."—Dated 23rd July, 1859.

41,622. HOLT, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the manufacture of silk tissues."—Dated 16th July, 1859.—(English Patent, 14th January, 1859.)

41,623. JAPY, Brothers, and Company, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A system of scapements."—Dated 13th July, 1859.

41,624. JAPY, Brothers, and Company, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in locks."—Dated 13th July, 1859.

41,625. MARIE, of 10, Rue St. Ferdinand aux Ternes, département de la Seine, for "Improvements in machines for tilling and clearing lands."—Dated 14th July, 1859.

41,626. MONGIN and GACHE, domiciled with the former, of 6, Rue Lafayette, Nantes, département de la Loire Inférieure, for "A machine for mowing and harvesting."—Dated 22nd July 1859.

41,627. MUSHET, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast steel."—Dated 13th July, 1859.—(English Patent, 15th January, 1859.)

41,628. NILLUS, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in journals."—Dated 16th July, 1859.

41,629. PULS, represented by Castaignet, of 28, Rue Louis-le-Grand, Paris, for "Improvements in the treatment of hydrocarburet"—Dated 16th July, 1859.—(English Patent, 10th June, 1859.)

41,630. QUILLACQ, of Anzin, département du Nord, for "A machine for extracting coals from pits."—Dated 23rd July, 1859.

41,631. QUILLACQ, of Anzin, département du Nord, for "A pneumatic propeller for ventilating coal pits, forges, and other works."—Dated 23rd July, 1859.

41,632. RAVE and DALTROFF, of 49, Rue du Faubourg St. Martin, Paris, for "A toy called 'Parachute-ball."—Dated 14th July, 1859.

41,633. ROMAINE, represented by Mathieu, of 45, Rue Saint Sébastien, Paris, for "Improvements in moveable railways."—Dated 13th July, 1859.—(English Patent, 14th January, 1859.)

41,634. SCHEURER-BOTT, of Thann, département du Haut-Rhin, for "A machine for washing filamentous substances."—Dated 22nd July, 1859.

41,635. SCHLICHTER and STROUP, the former of 64, Boulevart de la Butte Chaumont, à la Petite-Villette, the latter of 23, Rue de Meaux, à la Villette, département de la Seine, for "Brilliant black grease for harness."—Dated 16th July, 1859.

41,636. SHALER, represented by Laviale, of 17 Boulevart des Italiens, Paris, for "Improvements in brushes."—Dated 15th July, 1859.

41,637. SOULIER, of Nîmes, for "Manufacture of vinegar."—Dated 23rd July, 1859.

41,638. TALBOT, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Apparatus for providing smokers with lights."—Dated 15th July, 1859.

41,639. WOLLHEIM, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in scales."—Dated 13th July, 1859.

41,640. ALLEN, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An instrument for indicating pressure and vacuum."—Dated 18th July, 1859.—(American Patent, 27th September, 1857.)

41,641. ARCHAMBAUD, FONTENAUD, and MESNARD domiciled 46, Rue des Fossés St. Bernard, Paris, for "A chemical process for detecting all kinds of alcohol, except that of wine in brandy."—Dated 18th July, 1859.

41,642. BALLARD, of Mâcon, for "Manufacture of artificial puzzolana."—Dated 27th July, 1859.

41,643. BOIDIN and FAUCHER, of Amiens, for "A safety apparatus for obtaining lights."—Dated 26th July, 1859.

41,644. BRUNET, of 58, Rue Consolat, Marseille, for "A small tubular sypho-hydrostatical filter."—Dated 27th July, 1859.

* For the French Patent Law see No. 228 of this Journal.

41,645. Chenet, of Allée, St. Etienne, département de la Loire, for "A field haversack."—Dated 25th July, 1859.

41,646. Collet, of 3, Rue d'Harcourt, Bolbec, département de la Seine Inférieure, for "A machine for making double and single reeds for weaving machines."—Dated 27th July, 1859.

41,647. D'Argy and Marie, of Blois, for "A pump applicable to vessels, drainage, &c."—Dated 28th July, 1859.

41,648. Dumont, of 170, Rue St. Antoine, Paris, for "Preparing bones for finishing fabrics."—Dated 18th July, 1859.

41,649. Durand, of 22, Rue Beauveau, Paris, for "Poppy-paper."—Dated 19th July, 1859.

41,650. Férand, of Nyons, département de la Drôme, for "An apparatus for taking up the ends of cocoons."—Dated 30th July, 1859.

41,651. Fichot, of 43, Rue Dauphin, Paris, for "Improvements in trusses."—Dated 19th July, 1859.

41,652. Guibal, represented by Cabany, of Anzin, département du Nord, for "Spring suspension of pulleys for extracting ores, &c."—Dated 28th July, 1859.

41,653. Jacquot, of 22, Rue de Lafayette, Paris, for "Clock bells."—Dated 18th July, 1859.

41,654. Janisson, Son, represented by Bos-Darnis, of 36, Rue de l'Echiquier, Paris, for "Muslin and gauze of lace thread."—Dated 18th July, 1859.

41,655. Lefebvre, represented by Bresson, of 57, Rue de Bretagne, Paris, for "An apparatus for vapour baths, with or without fumigations."—Dated 19th July, 1859.

41,656. Le Marchand, of 18, Rue de Malte, Paris, for "Smoothing irons."—Dated 18th July, 1859.

41,657. Lucas, of Poitiers, département de la Vienne, for "Blue for blueing linen."—Dated 29th July, 1859.

41,658. Mareuse, of Anizy-le-Château, département de l'Aisne, for "Applying sugar apparatus with a threefold action to distilling."—Dated 27th July, 1859.

41,659. Marie, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "Improvements in assembling pipes of lead, caoutchouc, gutta percha, &c."—Dated 18th July, 1859.

41,660. De Marignan and Company, of Nîmes, for "A kneading machine."—Dated 26th July, 1859.

41,661. Mogtgomery, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the construction of the hulls of steam and other vessels, and in the feed-water heaters, boiler gauges, condensers, engines, and propelling machinery appertaining to the former, a portion of which improvements (with the exception of those on the hull) are applicable to various useful purposes."—Dated 18th July, 1859.—(English Patent, 17th January, 1859.

41,662. Pachez, of Villers-Allerand, département de la Marne, for "A shelter for vines."—Dated 27th July, 1859.

41,663. Roussillon, Burel, and Taylor, of 3, Rue d'Harcourt, Rouen, for "A moveable engine for towing and traction, and for various other purposes."—Dated 18th June, 1859.—(English Patent, 13th November, 1858.)

41,664. Roux, of 7, Rue St. Suffren, Marseille, for "A mill for grinding sulphur."—Dated 27th July, 1859.

41,665. Sauvage, of 11, Rue de Harlay, au Marais, Paris, for "A sculpturing machine."—Dated 19th July, 1859.

41,666. Schroeder, of 63, Rue de Chabrol, Paris, for "An apparatus for extracting beetroot juice."—Dated 18th July, 1859.

41,667. Teil, of 16, Rue du Loup, Bordeaux, for "A system of stretchers for regulating the action of whalebones of umbrellas, and for strengthening the same."—Dated 29th July, 1859.

41,668. Voxeur, of 8, Rue St. Honoré, Paris, for "Inlaid pins of buffalo horns."—Dated 18th July, 1859.

41,669. Weinberger and Dombret, of Valenciennes, département du Nord, for "Draining and working mines."—Dated 1st August, 1859.

41,670. Wolfel, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the construction of pianos."—Dated 18th July, 1859.

41,671. Avery, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in constructing, loading, and working electric batteries."—Dated 21st July, 1859.

41,672. Benezech, of 42, Rue de la Pépinière, Paris, for "A system of air tubes for water filters."—Dated 20th July, 1859.

41,673. Bosredon, of 6, Rue du Puits-qui-Parle, Paris, for "Portemonnaies, with indicators."—Dated 21st July, 1859.

41,674. Bresard, represented by Herps, of 39, Rue de l'Echiquier, Paris, for "Covers of smoking pipes."—Dated 20th July, 1859.

41,675. Camus, Giboire, and Petit, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "Improvements in railway chairs."—Dated 23rd July, 1859.

41,676. Cassi-Meloni, of 44, Rue Lamartine, Paris, for "A musical instrument, called 'Harp-piano.'"—Dated 22nd July, 1859.

41,677. Crichton, represented by Basset, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of clocks or chronometers."—Dated 23rd July, 1859.—(English Patent, 5th April, 1859.)

41,678. Daelen, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for rolling plates of boilers, and process for the manufacture of such plates without rivets."—Dated 20th July, 1859.

41,679. Denuelle, of 6, Rue Duphot, Lyon, for "A cutting machine."—Dated 1st August, 1859.

41,680. Divay, of 3, Rue Crébillon, Paris, for "A machine for sawing and cutting sugar."—Dated 19th July, 1859.

41,681. Dorsett and Blythe, represented by Tardieu, of 6, Rue du Parc-Royal, Paris, for "Apparatus for preserving timber and sleepers for railways."—Dated 25th July, 1859.

41,682. Dupré, of Château Gontier, département de la Mayenne, for "A system of pins."—Dated 30th June, 1859.

41,683. Durand and Pradel, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Endless canvass for conveying earth, dredging machines, &c."—Dated 23rd July, 1859.

41,684. Fillion, of Cours Lafayette, Lyon, for "Apparatus with threefold bottoms for heating by means of steam."—Dated 20th July, 1859.

41,685. Francfort, of 22, Rue Montholon, Paris, for "A brush for dry rubbing."—Dated 22nd July, 1859.

41,686. Gargan and Company, of 7, Rue de Valenciennes, Paris, for "A cistern-carriage for conveying liquids."—Dated 23rd July, 1859.

41,689. Hirsch-Labin, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mechanism for telegraphs."—Dated 22nd, July, 1859.

41,688. Homersham, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in docks for repairing vessels for sea and inland navigation."—Dated 23rd, July, 1859.

41,689. Labolle, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A process for coating or doubling metals."—Dated 22nd July, 1859.

41,690. Lafay and Auloge, of 10, Place des Petits-Pères, Lyon, for "Toilet pomatum."—Dated 1st August, 1859.

41,691. Laubereau, of 17, Rue Louis le Grand, Paris, for "A kind of motor."—Dated 20th July, 1859.

41,692. Lebeure, jun., represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "A so-called 'Carboniferous apparatus for throwing reducing substances into blast furnaces.'"—Dated 22nd July, 1859.

41,693. Le Mat, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in cannons."—Dated 20th July, 1859.

41,694. Le Mat, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in revolvers."—Dated 20th July, 1859.

41,695. Letestu, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A moveable roller."—Dated 21st July, 1859.

41,696. Meunier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of petticoats."—Dated 21st July, 1859.

41,697. Moreau, of Rue du Parc-Royal, Paris, for "A freezing apparatus."—Dated 21st July, 1859.

41,698. Mushet, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast steel, steel-iron, and iron."—Dated 21st July, 1859.—(English Patent, 24th January, 1859.)

41,699. Poncet, domiciled at 9, Rue Joubert, Paris, "Drying fecula."—Dated 23rd July, 1859.

41,700. Prapp, of 21, Rue Feydeau, Paris, for "A French sewing machine."—Dated 20th July, 1859.

41,701. Turck, of 1, Rue d'Amance, Malzéville, near Nancy, for "A process for crystallizing salt."—Dated 2nd August, 1859.

41,702. Wardill, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A break for stopping chains, ropes, and cables."—Dated 21st July, 1859.—(English Patent, 15th December, 1858.)

41,703. Aspinall, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in machines for making bolts, rivets, and nails."—Dated 27th July, 1859.—(English Patent, 6th January, 1859.)

41,704. Bergounioux and Richard, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Tissues of barege, chalys, gauze, &c., without wrong sides."—Dated 25th July, 1859.

41,705. De Bienville, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A mechanism for obtaining a continuous movement."—Dated 27th July, 1859.

41,706. Blondel, domiciled with Bresson, of 57, Rue de Bretagne, Paris, for "Frames of cast-iron."—Dated 27th July, 1859.

41,707. Bonneville, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "A system of monuments, called 'Useful columns' (urinals)."—Dated 25th July, 1859.

41,708. Borel, jun., represented by Bresson, of 57, Rue de Bretagne, Paris, for "Velvet designs on open worked tissues."—Dated 27th July, 1859.

41,709. Calvet, of 66, Boulevart Montparnasse, Paris, for "Modification of the colours of carthamus and murexide."—Dated 27th July, 1859.

41,710. Delarras, of 177, Rue de Vaugirard, Paris for "A system of iron bellows for forges."—Dated 25th July, 1859.

41,711. Destrat, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in using sealing wax."—Dated 27th July, 1859.

41,712. Drouin, of la Briche, near St. Denis, département de la Seine, for "A colouring substance."—Dated 25th July, 1859.

41,713. Dubois, of 3, Rue de Bretagne, Paris, for "Moveable hooks."—Dated 25th July, 1859.

41,714. Duncan, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in transmitting signals of electric telegraphs, in insulating substances of conductors, in electric cables, in using certain parts of said cables, in certain insulating compounds, and in certain apparatus relating thereto."—Dated 26th July, 1859.—(English Patent, 30th December, 1858.)

41,715. Glatigny, of 45, Rue de Grenelle, St. Honoré, Paris, for "A kind of register."—Dated 27th July, 1859.

41,716. Greffier, of 7, Avenue de St. Denis, Passy, département de la Seine, for "An apparatus for making gaseous liquids, and implements belonging thereto."—Dated 25th July, 1859.

41,717. Guérin, represented by Bresson, of 57, Rue de Bretagne, Paris, for "A system of balances with equal arms."—Dated 27th July, 1859.

41,718. Julien, domiciled with Bresson, of 57, Rue de Bretagne, Paris, for "Clasps of books."—Dated 27th July, 1859.

41,719. Kugler, Plaz, and Rexroth, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in sewing machines."—Dated 27th July, 1859.

41,720. Laviron, of 11, Rue Pigalle, Paris, for "A smoke-consuming reservoir."—Dated 27th July, 1859.

41,721. Mager and Aurean, of 11, Rue des Fossés Montmartre, Paris, for "Improvements in the construction of suspension springs of carriages in general."—Dated 25th July, 1859.

41,722. Mager and Aurean, of 11, Rue des Fossés Montmartre, Paris, for "Using rollers for lessening the action of passive resistance in the movement of carriage wheels in general."—Dated 25th July, 1859.

41,723. Paine, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of motor."—Dated 25th July, 1859.—(English Patent, 20th July, 1859.)

41,724. Rawson, represented by Basset, of 14, Boulevart Montmartre, Paris, for "Improvements in machines for preparing wool and other fibrous substances."—Dated 26th July, 1859.—(English Patent, 27th February, 1859.)

41,725. Réal, Brothers, of 17, Rue des Jeûneurs, Paris, for "Improvements in the manufacture of tiles."—Dated 26th July, 1859.

41,726. Reynaud, domiciled with Brun, of 36, Rue de l'Université, Paris, for "Improvements in towing boats by means of a fixed apparatus."—Dated 25th July, 1859.

41,727. Robertson, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in apparatus for propelling vessels on canals, rivers, and lakes of small depth."—Dated 25th July, 1859.—(English Patent, 28th January, 1859.)

41,728. Stuart Perry, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "An apparatus for exhibiting stereoscopic pictures."—Dated 27th July, 1859.—(American Patent, 7th June, 1859.)

41,729. Toussaint, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Travelling and other bags with secret pockets."—Dated 28th July, 1859.

41,730. Truelle, domiciled with Mirault, of 49, Rue Montorgueil, Paris, for "Billiard cues, and mode of making the same."—Dated 26th July, 1859.

41,731. Vernay, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "An apparatus for ranging casks upon each other."—Dated 27th July, 1859.

41,732. Vert, of 6, Rue de Lyon, Paris, for "An aerial machine."—Dated 25th July, 1859.

41,733. Vidal, of 66, Faubourg du Temple, Paris, for "An apparatus for destroying insects."—Dated 26th July, 1859.

41,734. Vollot, of 115, Rue des Dames, aux Batignolles, département de la Seine, for "A belt for petticoats."—Dated 26th July, 1859.

Certificates of Addition.

39,989. Achet, for "A break."—Dated 14th June, 1859.

37,847. Anger, for "Varnish."—Dated 14th June, 1859.

29,860. Anquetin, for "Watches."—Dated 16th June, 1859.

37,021. Barrat, for "A moveable engine."—Dated 15th June, 1859.

37,437. Beslay, for "Tinning."—Dated 22nd June, 1859.

38,024. Besson and Girardin, for "A musical instrument."—Dated 24th June, 1859.

34,286. Biron and Pongowski, for "Alcohol."—Dated 30th June, 1859.

39,347. Boche, sen., for "Cartridges."—Dated 16th June, 1859.

40,089. Bonière, jun., for "Lubricating."—Dated 16th June, 1859.

30,396. Bonnin, for "Pipes."—Dated 14th June, 1859.

30,029. Bret, for "A bobbin machine."—Dated 27th June, 1859.

37,187. Breton, for "A musical instrument."—Dated 11th June, 1859.

18,932. Callebaut, for "A sewing machine."—Dated 21st June, 1859.

41,232. Crabathi and Feugeas, for "A porte-monnaie."—Dated 28th June, 1859.

30,195. Darcet and Co., for "Distilling."—Dated 28th June, 1859.

23,196. Davoust, for "Cartridges."—Dated 21st June, 1859.

38,228. Donnet, for "A gauge."—Dated 28th June, 1859.

37,161. Gosteau, for "A gridiron."—Dated 22nd June, 1859.

41,368. Gueyton, for "Enamelling."—Dated 21st June, 1859.

41,368. Gueyton, for "Enamelling."—Dated 24th June, 1859.

1,368. Gueyton, for "Enamelling."—Dated 28th June, 1859.

40,396. Guichard, for "A screw plate."—Dated 27th June, 1859.

39,840. Hanon, jun., for "Glue."—Dated 22nd June, 1859.

38,463. Koehler for "Axles."—Dated 19th April, 1859.

40,563. Kugler, Plaz, and Rexroth, for "Sewing."—Dated 16th June, 1859.

35,976. Monroy, for "Hats."—Dated 28th June, 1859.

29,660. Morane, for "Candles."—Dated 18th June, 1859.

40,441. Papillon, for "Combustion."—Dated 16th June, 1859.

41,408. Parisod, for "Fuel."—Dated 28th June, 1859.

39,277. Pierrard and Bailly, for "Weighing."—Dated 24th June, 1859.

40,863. Pissot, for "Pictures."—Dated 17th June, 1859.

37,108. Pons, for "Clocks."—Dated 18th June, 1859.

40,892. Rosnay, for "A smoke-consuming apparatus."—Dated 18th June, 1859.

37,077. Rousserie, for "Smoothing irons."—Dated 21st June, 1859.

32,948. Saintard, for "A break."—Dated 24th June, 1859.

36,332. Scheibel, for "Corn."—Dated 17th June, 1859.

32,881. Thauvin, for "Mills."—Dated 18th June, 1859.

24,921. Thomas and Laurens, for "A boiler."—Dated 18th June, 1859.

37,141. Trottier, for "Wheels."—Dated 27th June, 1859.

40,020. Zammaretti, for "A stove."—Dated 11th June, 1859.

37,282. Bonchard, for "A ventilator of millstones."—Dated 6th July, 1859.

36,212. Bouillon, Muller, and Co., for "Washing."—Dated 28th June, 1859.

37,087. Callebaut, for "Sewing."—Dated 9th July, 1859.

41,169. Charbonnier, for "Sparkling wine."—Dated 18th July, 1859.

39,642. Claise, for "Sets of teeth."—Dated 30th June, 1859.

37,319. Denjean and Theodore, for "Cutting paper."—Dated 14th July, 1859.

40,711. Deschin, for "A pump."—Dated 11th July, 1859.

37,190. Dromart and Dussilol, for "Distilling."—Dated 29th June, 1859.

40,845. Duval and Joviaux, for "Gas."—Dated 2nd July, 1859.

41,004. Eckhorn, for "Gas burners."—Dated 11th July, 1859.

31,683. Ellie, sen., for "A mill."—Dated 30th June, 1859.

39,424. Evras, for "Ladies' pages."—Dated 2nd July, 1859.

39,969. Fontaine, for "Fabrics."—Dated 15th July, 1859.

18,746. Frezard, for "Locomotives."—Dated 30th June, 1859.

23,634. Fuselier, for "Projectiles."—Dated 14th July, 1859.

40,716. Grivotet, for "Hooks."—Dated 4th July, 1859.

31,398. Halter, for "Pipes."—Dated 1st July, 1859.

23,001. Herrmann, for "Hydraulics."—Dated 7th July, 1859.

36,191. Kessler, for "A chemical product."—Dated 2nd July, 1859.

19,704. La Mothe, for "A railway."—Dated 6th July, 1859.

37,293. Lançon, for "Watches."—Dated 2nd July, 1859.

39,879. Lenoir, for "A chemical product."—Dated 14th July, 1859.

40,235. Leoni, for "Silicate."—Dated 4th July, 1859.

36,007. Lerot, for "Watches."—Dated 4th July, 1859.

37,683. Loncq and Lecerf, for "Burling."—Dated 29th June, 1859.

39,848. Masbon, for "Clockwork."—Dated 28th June, 1859.

41,117. Moissard for "Shirts."—Dated 1st July, 1859.

40,922. Morot, for "Locks."—Dated 2nd July, 1859.

37,332. Onfroy and Co., for "Printing fabrics."—Dated 8th July, 1859.

39,819. Perrin, for "Revolvers."—Dated 9th July, 1859.

38,504. Poivret, for "Tricot."—Dated 8th July, 1859.

38,504. Poivret, for "Tricot."—Dated 18th July, 1859.

49,281. Reiss, for "A jack."—Dated 11th June, 1859.

37,369. Rondelet, for "Little parasols."—Dated 11th July, 1859.

34,938. Sebille, for "Pipes."—Dated 13th July, 1859.

32,098. Stenger and Niemann, for "A steam boiler."—Dated 15th June, 1859.

37,430. Tobie, for "Artillery."—Dated 6th July, 1859.

40,672. Vidal, for "Washing."—Dated 2nd July, 1859.

37,244. Villot, for "Cleaning."—Dated 30th June, 1859.

40,900. André, for "Preparing wood."—Dated 16th July, 1859.

38,609. Bailly, for "Washing."—Dated 12th July, 1859.

37,436. Barabé, for "Capsules for sockets."—Dated 21st July, 1859.

26,480. Baudelot, for "A freezing apparatus."—Dated 25th July, 1859.

39,991. Beau, for "A box for keeping thread."—Dated 12th July, 1859.

40,060. Boyer-Charles, for "A steam boiler."—Dated 14th July, 1859.

37,346. Camus, Giboire, and Petit, for "A railway."—Dated 16th July, 1859.

41,131. Chantrel, for "Beetroot juice"—Dated 16th July, 1859.

33,119. Compoint, for "A planting apparatus."—Dated 15th July, 1859.

28,295. Dandoy-Maillard, Lucq, and Co., for "A wrench."—Dated 12th July, 1859.

37,380. Delaurier, for "An expansion engine."—Dated 14th July, 1859.

37,473. Delormas and Terrel, for "A Railway."—Dated 26th July, 1859.

34,567. Delrue, Brothers, for "Holing iron."—Dated 29th July, 1859.

25,590. Desseaux, for "Oakum."—Dated 11th February, 1859.

33,191. Digney, Brothers, and Co., for "Telegraphs."—Dated 13th July, 1859.

31,526. Dulournel, for "Ores."—Dated 16th July, 1859.

41,268. Gallé, for "Advertizing."—Dated 13th July, 1859.

37,355. Galy-Cazalat, for "Metallurgy."—Dated 12th July, 1859.

24,708. Gibus and Son, for "Hats."—Dated 13th July, 1859.

37,878. Gitton-Lefranc, for "Fringes of shawls."—Dated 15th July, 1859.

37,609. Gondenove and Feret, for "Closing."—Dated 2nd July, 1859.

35,412. Hirtz, for "Chairs."—Dated 25th July, 1859.

40,072. Joret, for "A horse gin."—Dated 18th July, 1859.

28,270. Lacroix, jun, for "Weaving."—Dated 20th July, 1859.

39,811, Lacroix, and Laroche and Lacroix, for "Gauze wire."—Dated 5th May, 1859.

41,144. Lamiral, for "Iron fastenings."—Dated 13th July, 1859.

37,548. Léotard, for "A motor."—Dated 22nd July, 1859.

37,751. Leyer, for "Spinning."—Dated 18th July, 1859.

37,484. Madeline, for "Carding."—Dated 23rd July, 1859.

36,193. Martin, for "A steam engine."—Dated 16th July, 1859.

37,685. Mengarduque, for "Stoppering."—Dated 15th July, 1859.

38,986. Meslin, for "A press for liquids."—Dated 12th July, 1859.

34,740. Moufflet, for "Torrefying."—Dated 13th July, 1859.

37,718. Mourceau, for "Tissues."—Dated 19th July, 1859.

38,303. Pellissier, for "A railway-break."—Dated 28th July, 1859.

38,504. Poivret, for "Tricot."—Dated 25th July, 1859.

21,925. Raveneau, for "Hydraulics."—Dated 12th July, 1859.

39,921. Schneider, for "A travelling bag."—Dated 6th July, 1859.

39,692. Sloan, for "Doors."—Dated 13th July, 1859.

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Time-keepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*
15. Electricity and Magnetism: their Generation and Applications, price 8*s.* 6*d.*
16. Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing, price 10*s.*

The following are in the press:—

Preparation of Fuel, and Apparatus for its Combustion.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 622. TUESDAY, DECEMBER 20, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1792. TULLIUS PRIEST FAY, of Liverpool, in the county of Lancaster, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in machinery or apparatus for obtaining and applying motive power."

As set forth in his petition, recorded in the said office on the 3rd day of August, 1859.

1828. And JOHN HENRY JOHNSON, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, has given the like notice in respect of the invention of "An improved signal light and in the apparatus employed in the production thereof."—A communication from abroad by Messrs. Silas and Pegot Ogier, of Paris, in the empire of France.

1833. And THOMAS BLINKHORN and RICHARD BLINKHORN, both of the New Road, Spalding, in the county of Lincoln, Engineers, have given the like notice in respect of the invention of "An improved composition for removing scale or fur from the interior of boilers, and also for preventing the formation of scale or fur therein"

As set forth in their respective petitions, both recorded in the said office on the 8th day of August, 1859.

1835. And THOMAS DUNN, of the city of Manchester, Engineer, has given the like notice in respect of the invention of "Improvements in machinery and apparatus for elevating and regulating the level and flow of liquids, part of which is applicable for propelling vessels."

As set forth in his petition, recorded in the said office on the 9th day of August,, 1859.

1852. And GEORGE CAPPER, of Bidborough Street, New Road, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in the permanent way of railways."

1854. And JOHN JAMES SPEED, the younger, of the city of Detroit, in the United States of America, Telegraph Engineer, has given the like notice in respect of the invention of "Improvements in the manufacture of pipes, tubes, and hollow cylinders."

As set forth in their respective petitions, both recorded in the said office on the 10th day of August, 1859.

1859. And DAVID HULETT, of 55 and 56, High Holborn, London, Gas Engineer, and GEORGE PRUDDEN, of Shefford Beds, Gas Engineer, have given the like notice in respect of the invention of "Improvements in apparatus for the manufacture and distribution of gas, and in apparatus applicable for internal or external illumination."

As set forth in their petition, recorded in the said office on the 11th day of August, 1859.

1863. And AUGUSTE EVAUX, of 206, Regent Street, London, has given the like notice in respect of the invention of "Artificial marbles."

1865. And JAMES PHILP, of Camden Town, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "An improved hobby-horse or child's exerciser."

As set forth in their respective petitions, both recorded in the said office on the 12th day August, 1859.

1871. And ROBERT CLEGG, of Islington, in the county of Middlesex, and RICHARD FELL, of Saint Ann's Place, Limehouse, in the county of Middlesex, have given the like notice in respect of the invention of "Apparatus for obtaining aerated fresh water from salt water."

1876. And ELIAS SLOMAN, of Upper East Smithfield, in the county of Middlesex, has given the

like notice in respect of the invention of "An improved feed water and heating apparatus." — A communication from Gottfreyd May, resident at Magdeburch, in the kingdom of Prussia.

1878. And COLIN MATHER, of Salford, in the county of Lancaster, Mechanical Engineer, has given the like notice in respect of the invention of "Improvements in machinery for stretching, drying, and finishing fabrics."

As set forth in their respective petitions, all recorded in the said office on the 13th day of August, 1859.

1881. And CHARLES KISKY, of King Street, Camden Town, in the county of Middlesex, Cabinet Maker, and WILLIAM JONES, of Howland Street, Fitzroy Square, in the same county, Builder, have given the like notice in respect of the invention of "Improvements in the construction of sideboards."

1883. And JOHN CHANTER, of Bow Road, Proprietor of Patents, and DAVID ANNAN, Engineer, of Bow, both in the county of Middlesex, have given the like notice in respect of the invention of "Improvements in apparatus for supplying air to furnaces."

1884. And EDWARD STONE, of 46, Lime Street, in the city of London, Merchant, has given the like notice in respect of the invention of "Improvements in machinery for cutting veneers."—A communication from abroad by John Ahsbohs, residing at New York, United States of America.

As set forth in their respective petitions, all recorded in the said office on the 15th day of August, 1859.

1887. And HENRY BATCHELOR, of Newport, Monmouthshire, Engineer, has given the like notice in respect of the invention of "Improvements in steam and other motive power engines."

As set forth in his petition, recorded in the said office on the 16th day of August, 1859.

1892. And JAMES SIDEBOTTOM, of Waterside, in the county of Derby, Cotton Spinner, has given the like notice in respect of the invention of "Certain improvements in power looms for weaving."

As set forth in his petition, recorded in the said office on the 17th day of August, 1859.

1901. And HYAM JACOB HYAMS, of Holywell Street, in the city of Westminster, Gas Meter Maker, has given the like notice in respect of the invention of "Improvements in the construction of wet gas meters."

As set forth in his petition, recorded in the said office on the 18th day of August, 1859.

1905. And WILLIAM THOMAS HENLEY, Telegraph Engineer, of St. John Street Road, Clerkenwell, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in machinery for the manufacture of ropes and cables, and for paying out and picking up submarine telegraph cables."

1908. And JOHN FOWLER, junior, ROBERT BURTON, and DAVID GREIG, junior, all of Cornhill, in the city of London, EDWARD ELLIS ALLEN, of Park Side, Knightsbridge, and WILLIAM WORBY, of Ipswich, have given the like notice in respect of the invention of "Improvements in ploughs, cultivators, or tilling implements, and in machinery for giving motion to the same by steam power."

As set forth in their respective petitions, both recorded in the said office on the 19th day of August, 1859.

1918. And HENRY SPRATT, of the Royal Marine Barracks, Plymouth, in the county of Devon, Captain, Royal Marines, has given the like notice in respect of the invention of "Improvements in revolving pistols and other fire-arms."

As set forth in his petition, recorded in the said office on the 22nd day of August, 1859.

1936. And THOMAS BRIGGS, of Richmond Hill Works, Salford, in the county of Lancaster, Tarpauling and Oil Cloth Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of tarpauling."

As set forth in his petition, recorded in the said office on the 24th day of August, 1859.

1953. And WILLIAM HENRY BALMAIN, of Saint Helens, in the county of Lancaster, Manufacturing Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture of glass and other vitrified substances."

As set forth in his petition, recorded in the said office on the 27th day of August, 1859.

1986. And JAMES SAMUEL, of Great George Street, in the city of Westminster, Civil Engineer, has given the like notice in respect of the invention of "Improvements in railway sleepers."

As set forth in his petition, recorded in the said office on the 31st day of August, 1859.

1992. And JAMES BRINE, of Maidstone, in the county of Kent, Stationer and Printer, has given the like notice in respect of the invention of "Improvements in the mode of preparing, arranging, and combining the leaves of books to be used for producing simultaneously one or more fac-simile copies of letters, accounts, or other such similar documents or writings."

As set forth in his petition, recorded in the said office on the 1st day of September, 1859.

2075. And FLORIDE HEINDRYCKX, of Brussels, in the kingdom of Belgium, Engineer, has given the like notice in respect of the invention of "Improvements applicable to railways or tramways."

As set forth in his petition, recorded in the said office on the 12th day of September, 1859.

2114. And JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Improvements in mechanical hammers."—A communication from abroad by Jean Schmerber, of Haut Rhin, in the empire of France.

2115. And JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Further improvements in brakes for railway carriages."—A com-

munication from abroad by Laurent Rigolier, of Rhône, in the empire of France.

2118. And Jozé Luis, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "Improvements in cooling apparatus for liquids, especially beer."—A communication from abroad by Jean Louis Baudelot, Paris, in the empire of France.

2119. And Jozé Luis, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention of "An improved disc and lantern signal with double repeaters."—A communication from abroad by Jules Rousseau, of Paris, in the empire of France.

As set forth in his respective petitions, all recorded in the said office on the 17th day of September, 1859.

2151. And William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improved mode of, and apparatus for, condensing the waste steam of marine engines."—A communication from abroad by Messrs. Mazeline and Co., of Paris, in the empire of France.

As set forth in his petition, recorded in the said office on the 21st day of September, 1859.

2194. And Edmund Small Cathels and Samuel Splatt, both of Dover, in the county of Kent, have given the like notice in respect of the invention of "Improvements in gas meters."

As set forth in their petition, recorded in the said office on the 28th day of September, 1859.

2248. And John Mitchell Rose and Richard Carte, of the firm of Rudall, Rose, Carte, and Company, of Charing Cross, in the city of Westminster, Musical Instrument Makers, and William Pikesley, Mechanic, in the employ of Rudall, Rose, Carte, and Company aforesaid, have given the like notice in respect of the invention of "Improvements in drums."

As set forth in their petition, recorded in the said office on the 4th day of October, 1859.

2320. And James Carrick, Hotel Proprietor, Glasgow, has given the like notice in respect of the invention of "Improvements in commodes, waterclosets, and other sanitary appliances."

As set forth in his petition, recorded in the said office on the 12th day of October, 1859.

2462. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "Improved threads for weaving and a machine for making the same, which is also applicable to the winding or coating of one thread with another."—A communication from abroad by Alphonse Loiseau, of Bernay, France.

As set forth in his petition, recorded in the said office on the 27th day of October, 1859.

2496. And Richard Heinrich Hess, of Newton Street, Hoxton, in the county of Middlesex, Engineer, has given the like notice in respect of the invention of "Improvements in gas burners."

As set forth in his petition, recorded in the said office on the 2nd day of November, 1859.

2507. And Etienne Juzet, of 29, Boulevart St. Martin, Paris, in the empire of France, Mechanician, has given the like notice in respect of the invention of "Improvements in lubricating apparatus."

As set forth in his petition, recorded in the said office on the 4th day of November, 1859.

2577. And John Madin, of Fitzwilliam Street, Sheffield, in the county of York, Contractor, has given the like notice in respect of the invention of "Improvements in furnaces and appliances connected therewith, for hardening and tempering crinoline or sheet steel, and measuring the same."

As set forth in his petition, recorded in the said office on the 14th day of November, 1859.

2607. And Richard Laming, of Clifton Villas, Maida Hill West, in the county of Middlesex, has given the like notice in respect of the invention of "Improvements in obtaining alkalies and alkaline compounds."

As set forth in his petition, recorded in the said office on the 17th day of November, 1859.

2635. And George William Lenox, of Billiter Square, in the city of London, has given the like notice in respect of the invention of "Improvements in the manufacture of ships' blocks."

As set forth in his petition, recorded in the said office on the 21st day of November, 1859.

2672. And Matthew Tildesley, of Willenhall, in the county of Stafford, Lock Manufacturer, has given the like notice in respect of the invention of "Improvements in locks and latches."—Partly a communication from abroad by John Bisset, a citizen of the United States of America, residing in New York.

As set forth in his petition, recorded in the said office on the 25th day of November, 1859.

2699. And John Barker Berger, of Upper John Street, Fitzroy Square, in the county of Middlesex, Master Mariner, has given the like notice in respect of the invention of "An improved mode of and apparatus for facilitating the calculations required for navigating ships or vessels."

As set forth in his petition, recorded in the said office on the 29th day of November, 1859.

2729. And Thomas Frederick Brabson, of Birmingham, in the county of Warwick, Brassfounder, has given the like notice in respect of the invention of "Improvements in door springs."

As set forth in his petition, recorded in the said office on the 2nd day of December, 1859.

2741. And Richard Bond, of Burnley, in the county of Lancaster, "Temple" and "Roller" Maker, and William Hayhurst, of the same place, Mechanic, have given the like notice in respect of the invention of "Improved machinery or apparatus to be employed in the manufacture of a certain description of 'temples' used in power looms for weaving."

As set forth in their petition, recorded in the said office on the 3rd day of December, 1859.

2743. And NATHANIEL CLAYTON and JOSEPH SHUTTLEWORTH, of the city of Lincoln, have given the like notice in respect of the invention of "Improvements in steam boiler safety valves."

As set forth in their petition, recorded in the said office on the 3rd day of December, 1859.

2751. And CHARLES SHORT, of Westwood, in the parish of Selston, in the county of Nottingham, Smith, THOMAS BOWES SMEETON, of Underwood, in the said county of Nottingham, Farmer, and WILLIAM BOWLER, of Butterley Park, in the parish of Pentrich, in the county of Derby, Farmer, have given the like notice in respect of the invention of "The manufacture of bricks, tiles, drain-pipes, or other articles from cinder or refuse slag."

As set forth in their petition, recorded in the said office on the 5th day of December, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

17th December, 1859.

1461. DAVID DEAS, of Carneil, in the county of Fife, North Britain, Farmer, for an invention of "Improvements in reaping machines." — Dated 17th June, 1859.

1469. ALFRED JEFFERY, of the Commercial Road, in the parish of Limehouse, in the county of Middlesex, Manufacturer, for an invention of "An improved mode of giving rotary motion to projectiles fired from rifled fire-arms."—Dated 18th June, 1859.

1471. RICHARD HARPER, Lace Maker, and ROBERT STOKES, Lace Maker, and THOMAS WALKER, Clock Maker, each of Derby, in the county of Derby, for an invention of "An improvement in the manufacture of chenille bonnet wreaths and bonnet feathers."—Dated 18th June, 1859.

1475. PAUL FRANÇOIS AERTS, formerly of Brussels, in the kingdom of Belgium, but now residing in London, England, Civil Engineer, for an invention of "Improved apparatus for lubricating railway rolling stock and the moving parts of machinery."—Dated 18th June, 1859.

1481. CHARLES LOUIS JOSEPH DIERICKX, Director of the Paris Mint, of the Hotel des Monnaies, in the city of Paris, for an invention of "Improvements in coining."—Dated 20th June, 1859.

1495. WILLIAM COLES FULLER, of 2, Bucklersbury, Cheapside, London, Patent Spring Manufacturer, for an invention of "Improvements in india-rubber shackles and in springs for carriages, and the metal fittings connected therewith."—Dated 21st June, 1859.

1533. GEORGE WRIGLEY, of the firm of Messieurs Cryer, Lees, and Company, of Dukinfield, in the county of Chester, Machine Makers, and THOMAS HIRAM WRIGLEY, of Mossley, in the county of York, Overlooker, for an invention of "Improvements in self-acting mules for spinning and doubling."—Dated 27th June, 1859.

1593. JAMES MCINTOSH, of Glasgow, in the county of Lanark, North Britain, Tanner and Currier, for an invention of "Improvements in the manufacture of leather driving belts."—Dated 5th July, 1859.

1747. EDWARD HUNT and HENRY DAVIS POCHIN, both of Salford, in the county of Lancaster, Chemists, for an invention of "Improved resin and resinous substances."—Dated 28th July, 1859.

2181. WILLIAM AIREY, of Brighouse, in the county of York, and JAMES CLAYTON, of Golcar, in the same county, for an invention of "Improvements in machinery or apparatus for preparing silk, wool, cotton, flax, or other fibrous substances for spinning."—Dated 27th September, 1859.

20th December, 1859.

1479. JOHN COX, Saddlers' Ironmonger, of Birmingham, in the county of Warwick, and SAMUEL FRANKHAM and MOSES FRANKHAM, Bit, Stirrup, and Spur Manufacturers, of Walsall, in the county of Stafford, for an invention of "Certain improvements in spurs for military and general use."—Dated 20th June, 1859.

1485. WILLIAM ROWAN, of the firm of John Rowan and Sons, Engineers, of Belfast, in the county of Antrim, for an invention of "Improvements in the generation of steam."—Dated 20th June, 1859.

1489. EDWARD GWYN, of Islington, in the county of Middlesex, Gas Engineer, for an invention of "Improvements in breech-loading fire-arms."—A communication from abroad by Henry Gross, residing in Ohio, United States of America. — Dated 21st June, 1859.

1492. JAMES MEIKLE, of 79, Rumford Street, Glasgow, for an invention of "Improvements in coating iron ships with asphalte, which improvements are also applicable to coating other surfaces."—Dated 21st June, 1859.

1496. EBENEZER OLIVER, of King William Street, in the city of London, for an invention of "Improved medicinal mixtures for the cure of rheumatism, tic-doloreux, lumbago, cramp, sciatica, and such like complaints." — Dated 21st June, 1859.

1499. ANDREW BARCLAY, of Kilmarnock, in the county of Ayr, Engineer, for an invention of "Improvements in steam hammers and pile driving machines."—Dated 22nd June, 1859.

1506. JAMES APPERLY, Cloth Manufacturer, and WILLIAM CLISSOLD, Engineer, both of Dudbridge, in the county of Gloucester, for an invention of "Improvements in the manufacture of wheels for carriages and engines."—Dated 22nd June, 1859.

1510. ALEXIS JEAN DESSALES, of 13, Rue des Enfants Rouges, Paris, in the empire of France, for an invention of "An improvement in the working and securing of sliding tubes, applicable to gas chandeliers, lamps, and other purposes."—Dated 23rd June, 1859.

1512. George Charles Grimes, of Wandsworth, in the county of Surrey, for an invention of "Improvements in cigar or such like lights, and in the means of producing them."—Dated 23rd June, 1859.

1516. William Lister, junior, Master Mariner, and Thomas Gilbert Garrick, Agent, both of Sunderland, in the county of Durham, for an invention of "Improvements in ships' windlasses and other like apparatuses, applicable also to the steering of ships."—Dated 24th June, 1859.

1522. Prosper Faure and Jules Pernod, of Avignon, in the empire of France, for an invention of "An improved process for utilizing the residues of madder in the manufacture of garancine, and other preparations of madder."—Dated 24th June, 1859.

1524. Thomas Howard, of King and Queen Iron Works, Rotherhithe, in the county of Surrey, Engineer, for an invention of "Improvements in condensing steam in engines where superheated steam is used."—Dated 25th June, 1859.

1528. John Roberts, of Upnor, in the county of Kent, Terra Cotta Manufacturer, for an invention of "Improvements in filters."—Dated 25th June, 1859.

1537. Thomas Leigh, of St. Mary Cray, in the county of Kent, Millwright, and Job Line, of the same place, Paper Maker, for an invention of "An improvement in paper-making machinery."—Dated 27th June, 1859.

1542. James Nash, of Mill Wall, in the county of Middlesex, Smith, for an invention of "An improvement in the form and in the method of holding and releasing the tumbling hook of disengaging blocks."—Dated 29th June, 1859.

1546. Thomas Wight, of Middlesborough-on-Tees, in the county of York, Foundry Manager, for an invention of "Improvements in the apparatus used in the manufacture of cast-metal pipes and castings, termed corebars or spindles and chaplets."—Dated 29th June, 1859.

1562. Jeptha Avery Wilkinson, of Brooklyn, in the state of New York, United States of America, for an invention of "Improvements in printing presses and apparatus connected therewith."—Dated 30th June, 1859.

1577. Mark Bogg, of Duggleby, near Malton, in the county of York, Joiner, for an invention of "Improvements in washing machines."—Dated 1st July, 1859.

1604. Charles Hagan, Clerk of Works, Tower of London, for an invention of "Improvements in apparatus for curing smoky chimneys, and preventing down draught."—Dated 6th July, 1859.

1617. William Robinson, of Wembdon, Bridgewater, in the county of Somerset, Brewer, for an invention of "Improvements in cask washing machines."—Dated 7th July, 1859.

1629. William Horatio Harfield, of Fenchurch Street, in the city of London, for an invention of "Improvements in ships' capstans and riding bits."—Dated 8th July, 1859.

1631. John Taylor, of Roupell Park, Streatham Hill, in the county of Surrey, for an invention of "Improvements in the construction of walls to prevent damp from rising, and also in tiles to be used for this purpose in building walls."—Dated 8th July, 1859.

1636. Michael Henry, of 84, Fleet Street, in the city of London, Patent Agent, for an invention of "Improvements in the manufacture of overshoes, and other articles worn on the feet, and in the apparatus employed therein."—A communication from abroad by Louis Alfred d'Hennin, Mathilde Catherine Georgette Ponceot, and Caliste Bloisbluche, all of Paris, in the French empire.—Dated 9th July, 1859.

1653. Camille Joseph Proal, of No. 4, South Street, Finsbury, London, Gentleman, for an invention of "The application of photographic impressions or pictures upon fabrics or tissues for rendering such fabrics or tissues applicable to various useful purposes."—A communication from abroad by Jules Bernard, of Paris, France.—Dated 12th July, 1859.

1678. William Orme Carter, of 12, South John Street, Liverpool, in the county of Lancaster, for an invention of "Improvements in machinery for sawing slate."—Dated 15th July, 1859.

1681. Julian Bernard, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, for an invention of "Improvements in the construction and arrangement of hydraulic and other pumps for forcing liquids and for obtaining pressure."—Dated 16th July, 1859.

1683. Christopher Pottinger, of Anstruther, in the county of Fife, North Britain, Boat Builder, for an invention of "Improvements in machinery or apparatus for dredging or excavating, and for driving piles."—Dated 16th July, 1859.

1695. William Horatio Harfield, of Fenchurch Street, in the city of London, for an invention of "Improvements in apparatus employed in getting ships' anchors and in shackling chains."—Dated 18th July, 1859.

1712. George Welch, of Birmingham, in the county of Warwick, Manufacturer, for an invention of "An improvement or improvements in the manufacture of frames for mirrors, pictures, and other articles."—Dated 21st July, 1859.

1726. William Horatio Harfield, of Fenchurch Street, in the city of London, for an invention of "Improvements in capstans, riding bits, and stoppers, for working with chains."—Dated 23rd July, 1859.

2176. Richard Kay, of Busby, in the county of Renfrew, North Britain, Bleacher, for an invention of "Improvements in preparing and bleaching textile fabrics and materials, and in the machinery or apparatus employed therein."—Dated 26th September, 1859.

2214. Edward Sonneborn, of Lüdge, in Westphalia, kingdom of Prussia, and now residing at 39, Finsbury Square, London, for an invention of "An improvement in the manufacture of cement."—Dated 30th September, 1859.

2392. Charles Seton, of Edinburgh, in the county of Mid Lothian, Coach Builder, for an invention of "Improvements applicable to the wheels of carriages generally for the purpose of reducing the draught thereof."—Dated 19th October, 1859.

2439. Edwin Ellis, of St. Anns, Wells Road, Nottingham, for an invention of "Improvements in the manufacture of lace, and in apparatus employed therein."—Dated 25th October, 1859.

2477. James Alfred Turner, of the city of Manchester, in the county of Lancaster, Paper Manufacturer, for an invention of "Improvements in rendering paper waterproof."—Dated 31st October, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 17th December*, 1859, *inclusive.*)

16th December.

2993. Godwin Meade Pratt Swift, Viscount Carlingford, of Swiftseath, county Kilkenny, for an invention of "An aërial chariot or apparatus for navigating the air."—Dated 17th December, 1856.

2995. Francis Barber Howell, of Lebanon, Ohio, in the United States of America, and of No. 36, High Holborn, in the county of Middlesex, Farmer, for an invention of "Improvements in machinery for cutting or making corks."—A communication.—Dated 18th December, 1856.

17th December.

3002. Charles Fay, of Manchester, in the county of Lancaster, Railway Carriage Builder, for an invention of "Improvements in railway carriages and breaks."—Dated 18th December, 1856.

3003. John Brown, of Liverpool, in the county of Lancaster, Mast Maker, for an invention of "Improvements in the construction of ships' yards."—Dated 18th December, 1856.

3065. William Irlam, of the Gibraltar Iron Works, Newton Heath, near the city of Manchester, Engineer, for an invention of "Improvements in the construction of railway turntables and weighing cranes."—Dated 26th December, 1856.

Patent on which the Stamp Duty of £100 has been Paid.

(*To 16th December*, 1859.)

1094. Alfred Krupp, of Essen, in the kingdom of Prussia, cast steel mannfacturer, for an invention of "Improvements in cannons."—Dated 17th December, 1852.

FOREIGN PATENTS.

BELGIUM.*

List of Patents Delivered on the 15th December, 1859.†

(*Communicated by the Belgian Government.*)

(For previous List, see No. 619 of this Journal.)

8122. T. S. Truss, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in constructing and laying pipes."—Dated 19th October, 1859.—(English Patent, 21st April, 1859.)

8179. J. B. Fourmaux, represented by V. Blyckaerts, of Brussels, for "A kind of bags for extracting beetroot juice."—Dated 3rd November, 1859.

8185. P. Colle, of Rochefort, for "A stomachic liqueur."—Dated 7th November, 1859.

8240. A Fontaine, of Baudour, for "Manufacture of coal-cakes."—Dated 17th November, 1859.

8259. Goudenove and Féret, represented by D. De Vos-Verraert, of Brussels, for an imported invention of "A bougie-tube of enamelled metal."—Dated 22nd November, 1859.—(French Patent, 26th March, 1859.)

8267. J. Norris and T. Till, represented by J. Sainthill, of Brussels, for an imported invention of "Improvements in machines for making nails and similar articles."—Dated 22nd November, 1859.

8268. A. Mercier, represented by X. Raclot, of Brussels, for "A machine for felting slubs and thread of wool."—Dated 22nd November, 1859.

8269. F. Coignet, represented by J. Piddington, of Brussels, for an imported invention of "A mode of constructing dikes and maritime works."—Dated 23rd November, 1859.—(French Patent, 29th October, 1859.)

8270. L. J. Marie, represented by A. Hennelle, of St. Josse-ten-Noode, for an imported invention of "Assembling leaden and other pipes."—Dated 23rd November, 1859.)—(French Patent, 18th July, 1859.)

8271. L. Poret, represented by A. Hennelle, of St. Josse-ten-Noode, for an imported invention of "Means of preserving corn and other substances."—Dated 23rd November, 1859.—(French Patent, 16th August, 1859.)

* For the Belgian Patent Law, see Nos. 292 and 348 of this Journal.

† All Specifications of Patents which have been in force not less than six months, may be inspected or translations of them be had at the Library of the Great Seal Patent Office where also translated Indexes may be consulted.

8273. A. Leeveur, represented H. Biebuyck, of Brussels, for an imported invention of "A throstle-frame with a conical winding apparatus."—Dated 24th November, 1859.—(French Patent, 25th August, 1857.)

8274. H. De Matthys, represented by A. Crooy, of Brussels, for "Improvements in submarine telegraph-cables."—Dated 24th November, 1859.

8275. T. Wilson, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in breech-loading fire-arms and guns."—Dated 24th November, 1859.

8276. L. Jeslitska, represented by D. De Vos-Verraert, of Brussels, for an imported invention of "Stoves heated by means of air."—Dated 24th November, 1859.—(Austrian Patent, 21st August, 1859.)

8277. P. L. Vial, represented by H. Mangeot, of Brussels, for an imported invention of "Civil and military foot-coverings."—Dated 24th November, 1859.—(French Patent, 3rd November, 1859.)

8278. P. Germaux, of Brussels, for "A machine for turning lasts of foot-coverings."—Dated 25th November, 1859.

8279. A. Hédiard, represented by O. Daillencourt, of Brussels, for an imported invention of "A new mode of applying steam to the propulsion of vessels and boats."—Dated 25th November, 1859.—(French Patent, 19th November, 1859.)

8280. L. J. F. Margueritte, represented by O. Daillencourt, of Brussels, for an imported invention of "A process for preserving alimentary and organic substances."—Dated 25th November, 1859.—(French Patent, 14th September, 1859.)

8281. L. Baillon, of Termonde, for "A float with with an alarum whistle which cannot be reached." Dated 26th November, 1859.

8282. N. Vivario-Plomdeur, of Liége, for "Improvements in revolving fire-arms."—Dated 28th November, 1859.

8284. A. Perret, represented by X. Raclot, of Brussels, for "A circular calculating instrument based on the theory of logarithms."—Dated 26th November, 1859.—(French Patent, 22nd December, 1858.)

8285. A. Milch, represented by Ghys, for "An imported invention of "A brick machine."—Dated 28th November, 1859.—(French Patent, 14th July, 1858.)

8286. Lefèvre, née M. L. Roulleaux, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A mode of fastening hair."—Dated 28th November, 1859.—(Original Patent, 9th September, 1859.)

8287. E. Pavy, represented by H. Biebuyck, of Brussels, a Patent of Improvement for "A granary for preserving corn or seeds."—Dated 28th November, 1859.—(Original Patent, 22nd December, 1858.)

8288. A. Fabritius, represented by H. Biebuyck, of Brussels, for an imported invention of "Improvements in coach building."—Dated 28th November, 1859.—(French Patent, 18th March, 1859.)

8289. L. A. Hirtz, represented by H. Biebuyck, of Brussels, for an imported invention of "A system of Hygienic chairs."—Dated 28th November, 1859.

8290. P. Giot, represented by H. Biebuyck, of Brussels, for an imported invention of "A rolling poultry house."—Dated 28th November, 1859.—(French Patent, 21st November, 1859.)

8291. A. Halter, represented by X. Raclot, of Brussels, for an imported invention of "Manufacture of flexible pipes."—Dated 28th November, 1859.—(French Patent, 25th March, 1857.)

8292, V. Charlier, of Ixelles, a Patent of Improvement for "Manufacture of tissues of spun hair for making sacks."—Dated 29th November, 1859.—(Original Patent, 3rd October, 1859.)

8293. V. Carlier, of Ixelles, for "Manufacture of tissues of spun hair for making pulp bags."—Dated 29th November, 1859.)

8294. G. Mather, of Brussels, for "A gas regulator."—Dated 29th November, 1859.

8295. H. Lampert, of Saint Trond, for "A system of brushes for dry-rubbing."—Dated 29th November, 1859.

8296. F. Moussoux, of Falmignoul, for "An instrument for facilitating the working of mash-tubs in brewing."—Dated 30th November, 1859.

8297. J. C. Péan, represented by O. Dardienne, of Liége, for an imported invention of "An apparatus for cutting thistles and grass."—Dated 30th November, 1859.

8298. R. Mushet, represented by R. S. Kirkpatrick, of Ixelles, for an imported invention of "Improvements in the manufacture of iron and steel."—Dated 30th November, 1859.—(English Patent, 3rd June, 1959.)

8299. H. Jackson, represented by A. Anoul, of Ixelles, for an imported invention of "Improvements in bars of grates."—Dated 30th November, 1859.—(English Patent, 16th September, 1859.)

8300. J. J. Oury, of St. Rémy, for "Improvements in Lefaucheux's pistols."—Dated 29th November, 1859.

8301. F. P. and S. Baatard, Brothers, of Brussels, for "A machine for cutting hard and soft stones."—Dated 1st December, 1859.

8302. Th. Sutton, represented by J. Piddington of Brussels, for an imported invention of "A photographic lens."—Dated 1st December, 1859.—(English Patent, 28th September, 1859.)

8303. H. Biebuyck and Son, of Brussels, for "Means of stopping fiery horses."—Dated 1st December, 1859.

8304. A. Hubart and C. Cantillon, of Liége, a Patent of Improvement for "Manufacture of glass casks."—Dated 3rd December, 1859.—(Original Patent, 8th October, 1859.)

8305. J. B. Delrieux, of Liége, for "An alloy for the manufacture of wheel-tyres of railway carriages, locomotives, &c."—Dated 2nd December, 1859.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

41,735. BARRIÈRE, of 12, Rue Lafayette, Marseilles, for "Obtaining a saving in coal for heating steam boilers."—Dated 3rd August, 1859.

41,736. BATESON, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in generating steam and in apparatus used thereat." —Dated 29th July, 1859.

41,737. BAUDON-PORCHEZ and jun., of Lille, for "A moveable reflecting fire-place."—Dated 6th August, 1859.

41,738. BERTRAND, of 59, Boulevart Mont Parnasse, Paris, for "Applying lamp shades to teaching."—Dated 29th July, 1859.

41,739. BOUCHER and JOURDAIN, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A washing machine."—Dated 29th July, 1859.

41,740. BOUILLIANT and Co., of 62, Rue Ménilmontant, Paris, for "Improvements in benches for promenades and gardens."—Dated 29th July, 1859.

41,741. BRAMI-ANDREAC, represented by Leroux, of 48, Quai de Billy, Paris, for "An apparatus for backing condensed water of worms and double heating bottoms."—Dated 29th July, 1859.

41,742. CANIER and KUNKLER, the former of 25, Rue Corbeau, the latter of 20, Rue Lamartine, Paris, for "A press with a blank stamp."—Dated 28th July, 1859.

41,743. CHAUVY, of 12, Rue Corbeau, Paris, for "An apparatus for raising water."—Dated 28th July, 1859.

41,744. DELABARRE, sen., of 44, Rue Impériale, Rouen, for "A sky-light frame with a cranked shoulder."—Dated 3rd August, 1859,

41,745. DUBEDONT, of Dax, département des Landes, for "A safety apparatus for fire-arms."—Dated 4th August, 1859.

41,746. EDWARDS, represented by Chaumel-Duplanchat, of 150, Rue de Rivoli, Paris, for "Improvements in hydraulic engines and similar apparatus used as motors for all kinds of machines." —Dated 29th July, 1859.

41,747. FABRE, of Avignon, département de la Vaucluse, for "Powder of purified madder, called 'Paludine.'"—Dated 1st August, 1859.

41,748. FROIDURE, of 6, Rue de Paris, Saint Ouen, département de la Seine, for "A system of unloading boats and carts in making earth-works." —Dated 29th July, 1859.

41,749. GARCIN, of 59, Rue des Petites Ecuries, Paris, for "Railway switches."—Dated 29th July, 1859.

41,750. GUTTON, of Lyon, for "Joints of vulcanized india rubber for metal roofs and eaves of buildings." —Dated 4th August, 1859.

41,751. LAMAMY, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Improvements in the manufacture of inlaid work."—Dated 28th July, 1859.

41,752. MARSHALL, represented by Brade, of 29, Rue Ste. Anne, Paris, for "Improvements in breech-loading ordnance."—Dated 29th July, 1859.—(American Patent, 14th December, 1858.)

41,753. MATIGNON, of 42, Boulevart de Sébastopol, Paris, for "Improvements in petticoats."—Dated 28th July, 1859.

41,754. DE MONTGOLFIER, of Saint-Vallier, département de la Drôme, for "A machine for washing and triturating substances used in the manufacture of paper."—Dated 5th August, 1859.

41,755. MULLINER, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Means of working sails."—Dated 25th May, 1859.—(English Patent, 26th April, 1859.)

41,756. POTEM, domiciled with Loir, sen., of 64, Rue Lafayette, Paris, for "An apparatus for destroying flies."—Dated 28th July, 1859.

41,757. POULIN, DANIEL, and Co., represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Extracting beetroot-juice for distilling."—Dated 31st May, 1859.

41,758. PRON-GAILLARD, of 2, Rue Villeneuve, Marseilles, for "Preventing casks from leaking." —Dated 30th July, 1859.

41,759. QUÉTINEAU, represented by Bérenger, of 38, Rue Taitbout, Paris, for "An apparatus for rescuing sunken vessels."—Dated 29th July, 1859.

41,760. RABIER, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of paving bricks, bricks, tiles, and other ceramic articles."—Dated 28th July, 1859.

41,761. REY, of 20, Rue Cassette, Paris, for "An apparatus for cleaning combs."—Dated 15th July, 1859.

41,762. RIOLLET, sen., represented by Bresson, of 57, Rue de Bretagne, Paris, for "Improvements in continuous lime-kilns."—Dated 28th July, 1859.

41,763. ROLLAND, sen. and jun., domiciled with Bourrier, of Crespin, département du Nord, for

* For the French Patent Law see No. 228 of this Journal.

"Electro-magnetic printing telegraphs."—Dated 4th August, 1859.

41,764. Rousseaux, of Arras, for "Improvements in Lefaucheux' guns." — Dated 11th August, 1859.

41,765. Sporny, of 137, Faubourg du Temple, Paris, for "A levelling instrument."—Dated 28th July, 1859.

41,766. Tissieux, of 98, Rue Dugueselin, Lyon, for "A machine with a continuous movement, for cutting paper."—Dated 12th July, 1859.

41,767. Basset, of 13, Rue Fortin, Batignolles, for "Processes for the manufacture of ceruse and white zinc."—Dated 1st August 1859.

41,768. Biais, jun., of Cussoy-les-Forges, département de l'Yonne, for "A machine for beating scythes."—Dated 11th August, 1859.

41,769. Bouchard, of 13, Rue de la Douane, Paris, for "Distilling gas of a small lighting power or no lighting power at all, such as hydrogen, and especially peat gas."—Dated 2nd August, 1859.

41,770. Coste, of Rue Font-de-Maury, Béziers, département de l'Hérault, for "An apparatus for making vinegar."—Dated 5th August, 1859.

41,771. Debras, of 5, Rue Lelong, Grenelle, département de la Seine, for "Obtaining whip-stitches by means of a sewing machine."—Dated 1st August, 1859.

41,772. Degrand, of 53, Rue Laffitte, Paris, for "An air moderator lamp." — Dated 30th July, 1859.

41,773. Delvault, of 1, Rue de Normandie, Paris, for "A so-called 'Psychrofère-meuble ventilator." —Dated 30th July, 1859.

41,774. Epry, of 74, Rue de la Mare, Belleville, département de la Seine, for "An helicoidal apparatus, or small portable churn for obtaining ice, butter, and beating eggs."—Dated 2nd August, 1859.

41,775. Floire, of 52, Rue des Ayres, Bordeaux, for "Electric telegraphs."—Dated 9th August, 1859.

41,776. Guillemon, of 77, Rue de la Taupe, Bordeaux, for "Manufacture of hats."—Dated 8th August, 1859.

41,777. Guitet, of 3, Rue de la Barillerie, Mans, département de la Sarthe, for "An apparatus for making soap."—Dated 8th August, 1859.

41,778. Guye, domiciled 240, Hôtel de Normandie, Rue St. Honoré, Paris, for "A spring-anchor scapement for watches, clocks, &c."—Dated 2nd August, 1859.

41,779. Guyet, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A combined turbine with a threefold action, and which may be used as a counter and motor."—Dated 2nd August, 1859.

41,780. Henry, senr., of St. Dié, département des Vosges, for "Ploughs with double mould boards." —Dated 4th August, 1859.

41,781. Huin-Thervay, of 5, Chemin du Saurup, Nancy, for "A machine for smoothing paper-hangings."—Dated 10th August, 1859.

41,782. Keim, junr., of Thann, département du Haut Rhin, for "A flyer worked by means of centrifugal power."—Dated 10th August, 1859.

41,783. Leconte, of Pont-Salomon, parish of Aurec, département de la Haute-Loire, for "Treatment of metallic oxides for the purpose of obtaining therefrom metals in their various states."—Dated 8th August, 1859.

41,784. Lévêque, alias Léveque-Ménétrier, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A moveable target for shooting."—Dated 1st August, 1859.

41,785. Macaire, of 10, Rue Basse, Passy, for "Safety-casks for preserving liquids."—Dated 30th July, 1859.

41,786. Mulot, of Lisieux, département du Calvados, for "A loom."—Dated 6th August, 1859.

41,787. Ozanne, of 16, Rue des Filles Dieu, Paris, for "Gas burners for liquid gas."—Dated 2nd August, 1859.

41,788. Pic, of Valenciennes, département du Nord, for "Water gauges of steam boilers placed on the top of boilers."—Dated 12th August, 1859.

71,789. Radiguet, of Chartres, département d'Eure et Loir, for "Portable and rolling tents, with independent or connected compartments, composed of umbrella shelters, folded up without being unmounted."—Dated 8th August, 1859.

41,790. Rigolier, of 5, Place Groliér, Lyon, for "A railway break."—Dated 6th August, 1859.

41,791. Rogeau, of 16, Rue Grenier Saint Lazare, Paris, for "Improvements in plastic medallions." —Dated 2nd August, 1859.

41,792. Sazerat and Polletti, the former of 10, Boulevart St. Maurice, the latter of 21, Rue Descombes, Limoges, for "Baking porcelain by means of coal."—Dated 9th August, 1859.

41,793. Sievier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in smelting and refining iron ores and other metals."—Dated 30th July, 1859.

41,794. The Marseille Fishing-net Company, represented by Longin, of 81, Rue d'Enfer, Paris, for "Improvements in machines for making fishing and other nets."—Dated 2nd August, 1859.

41,795. Tricout, domiciled 16, Rue du Faubourg St. Martin, Paris, for "A clyster."—Dated 1st August, 1859.

41,796. Vedrine, of Avèze, département du Puy de Dôme, for "A system of carts for carriers."— Dated 5th August, 1859.

41,797. Voelkel-Boell, of Bischwiller, département du Bas Rhin, for "A spinning card." — Dated 9th August, 1859.

41,798. Wilkinson, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in lithographic presses."—Dated 10th June, 1859. —(American Patent, 10th June, 1859.)

41,799. Artige, domiciled with Bongarel, of 35, Boulevart du Temple, Paris, for "Improvements in the construction of tubular and other boilers." —Dated 6th August, 1859.

41,800. Berry, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improve-

ments in the manufacture of tricot,"—Dated 6th August, 1859. — (English Patent, 5th August, 1859.)

41,801. Biais and Petitpas, of Grenoble, département de l'Isère, for "Impervious thumbs of gloves."—Dated 11th August, 1859.

41,802. Bower, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the manufacture of lighting gas, and in apparatus belonging thereto."—Dated 6th August, 1859.

41,803. Brégeard, of 7, Rue St. Julien, Nancy, for "A process for dissolving silk."—Dated 12th August, 1859.

41,804. Bristol, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in slides of steam and other engines."—Dated 6th August, 1859. — (Americam Patent, 21st June, 1859.)

41,805. Bullier and Chartroule, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in apparatus for inhaling vapours or gas."—Dated 5th August, 1859.

41,806. Cuignet and Poilblans, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A mode of closing venetian blinds, windows, shutters, &c."—Dated 5th August, 1859.

41,807. Dierickx, of the Paris Mint, for "An assay balance."—Dated 5th August, 1859.

41,808. Doucet, of 25, Rue St. Laurent, of Belleville, département de la Seine, for "Improvements in the manufacture of artificial fuel."—Dated 5th August, 1859.

41,809. Dreley, of 4, Rue de Chalons, Passage Moulin, for "Applying horn to the manufacture of button busks."—Dated 3rd August, 1859.

41,810. Dubois, of Flines, département du Nord, for "A drum engine for crushing calcined bones by means of toothed balls."—Dated 16th August, 1859.

41,811. Dubois and Lelardeux, the former of 26, Rue du Four, St. Germain, Paris, the latter at the Gare d'Ivry, for "A kind of tobacco pot."—Dated 4th August, 1859.

41,812. Farcot, of 39, Rue des Trois Bornes, Paris, for "Improvements in watches and clocks."—Dated 11th August, 1859.

41,813. Farrar, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the manufacture of cast steel, malleable cast iron, and in purifying iron."—Dated 4th August, 1859.

41,814. Fiyant, of 2, Impasse St. Nicolas, Petite-Villette, département de la Seine, for "A machine for making wire tacks, pegs, &c."—Dated 4th August, 1859.

41,815. Gresland, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in machines for shaping and cutting wicks."—Dated 5th August, 1859.

41,816. Lecointe, of St. Quentin, département de l'Aisne, for "Manufacture of oil from oil seeds, and especially for presses and heaters belonging thereto."—Dated 13th August, 1859.

41,817. Lejeune and Brunessaux, of 41, Rue Notre Dame de Nazareth, Paris, for "Tops of india rubber."—Dated 4th August, 1859.

41,818. De Lucy Fossarieu, of 27, Rue des Moulins, Passy, département de la Seine, for "Electric lamps."—Dated 6th August, 1859.

41,819. Magnin, of 26, Quai de l'Archevêché, Lyon, for "Improvements in machines for sewing and embroidering, twisting, and gimps with chain stitches."—Dated 10th August, 1859.

41,820. Michel and Duparc, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the construction and use of reflectors."—Dated 6th August, 1859.

41,821. Moseley, represented by Brandon, of 7, Rue des Moulins, Paris, for "Fountain pens."—Dated 3rd August, 1859.

41,822. Mustel and Leprestre, of 35, Rue du Bac, Rouen, for "A reciprocating mechanism for preventing threads from lying on each other in reels."—Dated 11th August, 1859.

41,823. Rammell, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in atmospheric propulsion, and in constructions, pipes, machines, and apparatus applicable thereto." — Dated 3rd August, 1859.—(English Patent, 22nd January, 1859.)

41,824. Rollin, of 7, Rue des Dominicains, Nancy, for "Cartridges for breech-loading guns."—Dated 13th August, 1859.

41,825. Sears, represented by Gardissal. of 29, Boulevart St. Martin, Paris, for "Improvements in breech-loading arms."—Dated 4th August, 1859. —(English Patent, 5th February, 1859.)

41,826. Sorlot, of 98, Rue de Rambuteau, Paris, for "Zinc bills or boards."—Dated 6th August, 1859.

41,827. Tholomier, with Gire, of 25, Rue du Four, St. Germain, Paris, for "An hydraulic wheel."—Dated 3rd August, 1859.

41,828. Trotter and Williams, represented by Gardissal, of 29, Boulevart St. Martin, Paris, for "Improvements in caoutchouc tissues." — Dated 2nd August, 1859.

41,829. Vangorp, of 175, Rue du Temple, Paris, for "Mounting broaches."— Dated 4th August, 1859.

41,830. Bataille, sen., and Lardin, the former of 18, Rue des Vertus, Paris, the latter of Montreuil-sous-Bois, département de la Seine, for "An apparatus for cutting ashlar." — Dated 9th August, 1859.

41,831. Berthelemy, of 14, Rue de Sorbonne, Paris, for "A cart for unrooting and replanting trees."—Dated 9th August, 1859.

41,832. Bertin, represented by Bonneville, of 39, Rue de l'Echiquier, Paris, for "A machine for breaking flax or hemp, before or after retting, and for extracting fibres from plants in general, before or after being prepared, according to the nature of the plant, its dry or green state." — Dated 6th August, 1859.

41,833. Bouet, of la Rochelle, département de la Charente Inférieure, for "A moveable winch with a fulling apparatus and press." — Dated 18th August, 1859.

41,834. Cassano and Pichot, of 10, Rue de Chabrol, Lyon, for "A cane apparatus for regulating and putting silk on bobbins and reels."—Dated 16th August, 1859.

41,835. Chardemite, aux Moulins, commune de St. Georges de Didonné, département de la Charente Inférieure, for "A wind-motor with a vertical axle for working all kinds of machines."—Dated 13th August, 1859.

41,836. Cochaux, of 6, Rue du Havre, Batignolles, département de la Seine, for "A machine for dredging sea-channels on the highest sand-downs."—Dated 9th August, 1859.

41,837. Crova and Delhaumeau, of Perpignan, for "An electric battery, called 'Battery, with an inalterable communication and distributing coals.'"—Dated 13th August, 1859.

41,838. Dieudonné, represented by Bonneville, of 30, Rue de l'Echiquier, Paris, for "Improvements in the manufacture of heart's-ease violet colours."—Dated 8th August, 1859.

41,839. Drouville, of 40, Rue Ste. Anne, Paris, for "A portable ventilator."—Dated 29th July, 1859.

41,840. Fromage, of Darnetal, département de la Seine Inférieure, for "A circular jack for transmitting rotary movement to gearings."—Dated 16th August, 1859.

41,841. Guibert, of 50, Vieux Chemin de la Madeleine, Marseille, for "Varnish for preserving wood from worms and metals from oxidation."—Dated 10th August, 1859.

41,842. Flacq, of Antun, département de Saone-et-Loire, for "An inducto-magnetic motor."—Dated 17th August, 1859.

41,843. Krachpeltz, of 19, Rue des Granges, Besançon, for "Ornamenting cases of watches and other articles of jewellery."—Dated 18th August, 1859.

41,844. Lasserre, of 1, Rue Boutarel, Paris, for "A towing boat."—Dated 8th August, 1859.

41,845. Lavergne, of Cambes, département de la Gironde, for "Extracting stones from quarries."—Dated 19th August, 1859.

41,846. Maréchal, of Sentein, département de l'Ariége, for "Manufacture of artificial marble."—Dated 12th August, 1859.

41,847. Maumené and Rogelet, domiciled at 22, Rue Colbert, Reims, département de la Marne, for "Manufacture of a kind of potash."—Dated 20th April, 1859.

41,848. Millet, of 39, Rue de Bretagne, Paris, for "Handles for pails, milk vessels, &c."—Dated 8th August, 1859.

41,489. Mushet, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "A metallic compound or alloy."—Dated 8th August, 1859.—(English Patent, 8th August, 1859.)

41,850. Noel, of 16, Rue Ganterie, Rouen, for "Self-feeding penholders."—Dated 17th August, 1859.

41,851. Pavin de Lafarge, Brothers, of Vivier, département de l'Ardèche, for "A machine for triturating, grinding, and pulverizing clay, and refractory or aluminous earth."—Dated 16th August, 1859.

41,852. Poret, domiciled with Berthauld, of 1, Rue du Cornet, au Mans, for "Preserving corn."—Dated 16th August, 1859.

41,853. Rebstock, senr., of 52, Rue de Malte, Paris, for "A beverage called 'Bischoff and Marquise Rebstock.'"—Dated 16th August, 1859.

41,834. Richardson, represented by Basset, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of manure."—Dated 8th August, 1859.—(English Patent, 21st January, 1859.)

41,855. Serbat, domiciled with Favrin, of 26, Rue Caumartin, Paris, for "Improvements in grease."—Dated 8th August, 1859.

41,856. Soustron, alias Abel, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Manufacture of leather by recomposing waste-leather."—Dated 9th August, 1859.

41,857. Squanquerillo, represented by Sanguinetti, of 12, Rue Grignon, Marseille, for "Artificial marble."—Dated 10th August, 1859.

41,858. Tinturier, of Saumur, département de Maine et Loire, for "A stirrup-leather applicable to all kinds of saddles."—Dated 19th August, 1859.

41,859. Tixerant, of 4, Rue des Ponts, Nogent sur-Seine, département de l'Aube, for "A machine for crushing and for making flour."—Dated 20th August, 1859.

41,860. Tresch, of Thann, département du Haut-Rhin, for "A stop-axle of pressure cylinders of spinning frames."—Dated 5th August, 1859.

41,861. Wilmant, of 25, Avenue de St. Ouen, aux Batignolles, département de la Seine, for "Improvements in harness."—Dated 2nd August, 1859.

41,862. Adams, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in casting cylinders or pipes."—Dated 11th August, 1859.

41,863. Braun, of 4, Rue de Cotte, Faubourg St. Antoine, Paris, for "A kind of signal-lantern for railways."—Dated 10th August, 1859.

41,864. Brown and May, represented by Hasenfeld, of 12, Place de la Bourse, Paris, for "Improvements in clack-valves of sluices."—Dated 11th August, 1859.—(English Patent, 9th February, 1859.)

41,865. Chabert, Son, of 50, Rue de l'Arc de Triomphe aux Ternes, département de la Seine, for "A plastic substance for making paving stones."—Dated 11th August, 1859.

41,866. Chaleyer, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in cartridges of breech-loading guns."—Dated 11th August, 1859.

41,867. Crétal, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "A system of giving a pleasant aroma to new smoking-pipes."—Dated 10th August, 1859.

41,868. Deiss, of 63, Rue de Bretagne, Paris, for "Manufacture of nitrobenzine, called "Essence of mirbane.'"—Dated 13th August, 1859.

41,869. Faure and L'Huillier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of clockwork for toy-watches and for toys in general."—Dated 9th August, 1859.

41,870. Gérardin, domiciled at 35, Rue du Colisée, Paris, for "Mechanical carriages."—Dated 13th August, 1859.

41,871. Gibbs, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of brushes, brooms, covers of floors, straw mats, scrapers, and other cleaning surfaces."—Dated 11th August, 1859.—(English Patent, 8th July, 1859.)

41,872. Hardon, of 119, Avenue des Champs Elysées, Paris, for "Endless canvass for conveying rubbish."—Dated 12th August, 1859.

41,873. Hugot, of 62, Rue Amelot, Paris, for "Improvements in gumming wads."—Dated 12th August, 1859.

41,874. Jager, of 8, Rue Poulet, Montmartre, département de la Seine, for "Geographical tables."—Dated 16th August, 1859.

41,875. Jarriel, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A machine for transmitting movement."—Dated 11th August, 1859.

41,876. De La Bastida, of 4, Rue Louis-Philippe, Neuilly, département de la Seine, for "A system of hippic baths, called 'Baths of Neptune.'"—Dated 9th August, 1859.

41,877. Lebourgeois, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A purling machine."—Dated 11th August, 1859.

41,878. Lemaignen, son, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A double action gig."—Dated 10th August, 1859.

41,879. Malas and Houillon, the former of 45, Rue de Flandre à la Villette, the former of 23, Rue Manbuée, Paris, for "A kind of ladies' page."—Dated 11th August, 1859.

41,880. Mauger, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An hygrometer."—Dated 11th August, 1859.

41,881. Migeot De Baran, of 158, Rue de Vaugirard, Paris, for "A system of stoppering bottles containing gaseous liquids."—Dated 12th August, 1859.

41,882. Mushet, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast-steel."—Dated 11th August, 1859.—(English Patent, 24th February, 1859.)

41,883. Madot, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improve-in tinder-boxes and matches."—Dated 12th August, 1859.

41,884. Perdrix and Messager, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Applying gluten to industry."—Dated 9th August, 1859.

41,885. Roblin, of 9, Rue de la Ville l'Evêque, Paris, for "Improvements in fire-arms."—Dated 9th August, 1859.

41,886. Runkel, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in oscillating steam engines."—Dated 13th August, 1859.—(American Patent, 12th April, 1859.)

41,887. Savariaux, of 140, Rue du Faubourg St. Antoine, Paris, for "Slides of bedsteads."—Dated 13th August, 1859.

41,888. Serval, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Pocket cigar-cutters, applicable to cigar-cases."—Dated 9th August, 1859.

41,889. Toussaint, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Lamps for railway carriages."—Dated 12th August, 1859.

41,890. Vinet, of 12, Quai de la Mégisserie, Paris, for "A mowing and harvesting machine."—Dated 16th August, 1859.

41,891. Willard, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in extracting oil from coals and other substances producing pyrogenous oils."—Dated 11th August, 1859.

41,892. Yot, of 37, Rue Phélippeaux, Paris, for "A kind of penholder."—Dated 11th August, 1859.

41,893. Bequemie, of 30, Rue de la Douane, Paris for "An arrangement in force and lift pumps for forming directly a reservoir of air at their upper part."—Dated 17th August, 1859.

41,894. Besson-Chenevat, of Tarare, département du Rhône, for "Improvements in battens for weaving in the tambouring style."—Dated 19th August, 1859.

41,895. Bohin, of l'Aigle, département de l'Orne, for "Portable steam boiler and engine."—Dated 24th August, 1859.

41,896. Bonneau, of 43, Rue des Trois Couronnes du Temple, Paris, for "Artificial jointed arbors."—Dated 8th August, 1859.

41,897. Cher, fils, of Bapaume, département de la Seine Inférieure, for "Using compressed steam for extracting sugar from corn and rice."—Dated 23rd August, 1859.

41,898. Courlet, of Deluz, département du Doubs, for "A system of motors by means of an helicoidal wheel."—Dated 19th August, 1859.

41,899. Dequet, of 92, Rue du Bourg St. Denis, Reims, département de la Marne, for "A press for making billiard cues."—Dated 22nd August, 1859.

41,900. Duret, sen., of 27, Rue Saint Fiacre, Vaugirard, département de la Seine, for "Paper for writing by means of ink or any other liquid."—Dated 16th August, 1859.

41,901. Ferrier, of 33, Rue Buffon, Dijon, for "A spittoon for invalids."—Dated 18th August, 1859.

41,902. Fondu, with Gayffier, of 1, Rue Saint Georges, Paris, for "A machine for screw-cutting bolts and nuts."—Dated 17th August, 1859.

41,903. Fondu, domiciled with Gayffier, of 1, Rue St. Georges, Paris, for "A double action machine for the manufacture of bolts and rivets by a single operation, by means of a hot or cold process."—Dated 17th August, 1859.

41,904. Fondu, domiciled with Gayffier, of 1, Rue St. Georges, Paris, for "A double-action machine for conglomerating coal dust." — Dated 17th August, 1859.

41,905. Fragneau, of 56, Rue Sanbat, Bordeaux, for "Heating boilers of marine and other industrial engines."—Dated 20th August, 1859.

41,906. Gilles, domiciled with Alland, of 77, Rue de Paradis, Marseille, for "Manufacture of bombine from silkworms, to be used as manure."—Dated 23rd August, 1859.

41,907. Haseltine, represented by Tolhausen, of 35, Boulevart Bonne Nouvelle, Paris, for "A sewing machine."—Dated 5th April, 1859.

41,908. Jaumard, of 21, Rue Petit St. Jean, Marseille, for "A pressure motor." — Dated 17th August, 1859.

1,909. Jeandelyse-Ponçon, with Buddicom, of Sotteville-les-Rouen, département de la Seine Inférieure, for "Blinding goggles for stopping fiery horses instantaneously."—Dated 19th August, 1859.

41,910. Lambert-Grés, of Haybes, département des Ardennes, for "Applying slate props."—Dated 25th August, 1859.

41,911. Lionville and Nori, the former of 65, Route de St. Mandé, à St. Mandé, the latter of 76 Rue de Bercy, Bercy, département de la Seine, for "A kind of mustard pot." — Dated 17th August, 1859.

41,912. Loisy, of Arras, for "Baths with a direct heating apparatus, and with a moveable grate."—Dated 22nd August, 1859.

41,913. Meyer-Buhner, of Guebwiller, département du Haut Rhin, for "A wine press, with a double catch and stop, and caoutchouc box for preventing leakage."—Dated 19th August, 1859.

41,914. Nurdin, of Libourne, département de la Gironde, for "Drip-stones for preventing air and water from filtering into apartments." — Dated 25th August, 1859.

41,915. Paccallet and Sequin, Father and Son, of 49, Route de Vienne, Lyon, for "A railway break."—Dated 19th August, 1859.

41,916. Renand, of Nonson, département des Ardennes, for "Manufacture of nails by machinery."—Dated 25th August, 1859.

41,917. Robineau-Pineau, of 38, Rue des Carmes, Orléans, for "An apparatus for preserving vines from frosts."—Dated 23rd August, 1859.

41,918. Varlet, of Mer, département de Loir et Cher, for "Improvements in cartridges for breech-loading guns."—Dated 20th August, 1859.

41,919. Verzier and Co., of 22, Rue Pizay, Lyon, for "So-called 'Carmen tissue." — Dated 20th August, 1859.

41,920. Vial, of Grenoble, département de l'Isère, for "Means of putting seamless thumbs to all kinds of gloves."—Dated 3rd August, 1859.

41,921. Viau, of Quai Hoché, Nantes, for "A mechanical motor, being a substitute for steam-engines."—Dated 26th August, 1859.

41,922. Viney, Sommer, and Hamm, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in cigar mouth-pieces."—Dated 16th August, 1859.

41,923. Wilson and Power, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in using certain waste substances obtained in the manufacture of gas."—Dated 20th August, 1859. — (English Patent, 18th August, 1859.)

41,924. Allen, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in stereoscopes."—Dated 19th August, 1859.

41,925. Arson, of 40, Rue de Bourgogne, Paris, for "Treatment of fecal substances, and converting the same into manure." — Dated 22nd August, 1859.

41,926. Baron, domiciled with Grard, of 20, Rue Notre Dame de Nazareth, Paris, for "An instrument for cutting and closing cartridges."—Dated 18th August, 1859.

41,927. Bénard, of 72, Rue des Fossés du Temple, Paris, for "An hydraulic spit."—Dated 20th August, 1859.

41,928. Buissot, Brothers, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A mode of folding fans."—Dated 20th August, 1859.

41,929. Chanard, of 19, Rue Pradier, Belleville, département de la Seine, for "Lime and plaster kilns with great flames and with a continuous fire."—Dated 22nd August, 1859.

41,930. Conover, represented by Urquhart with Heideloff, of 153, Faubourg St. Martin, Paris, for "A machine for splitting wood."—Dated 18th August, 1859.

41,931. Critchley and Elston, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in metallic pistons."—Dated 18th August, 1859.

41,932. Dale, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in concentrating caustic alkali and in using its product for obtaining a motive power or for any other purpose."—Dated 22nd August, 1859.—(English Patent, 24th February, 1859.)

41,933. Doig, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the construction of gas lanterns."—Dated 20th August, 1859.—(English Patent, 11th April, 1859.)

41,934. Duplomb, of 21, Rue du Dragon, Paris, for "A double petticoat, called 'Foureauline.'"—Dated 22nd August, 1859.

41,935. Fossey, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in blowing engines."—Dated 20th August, 1859.

41,936. Ganzer, of 44, Rue Basfroi, Paris, for "A folding foot-stool."—Dated 19th August, 1859.

41,937. Gardiner, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in springs of railway and other carriages."—Dated 17th August, 1859.

41,938. Glassborow, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in pianofortes."—Dated 20th August, 1859.

41,939. Guzman, domiciled at 1, Rue des Batailles, Paris, for "Preserving natural flowers."—Dated 17th August, 1859.

14,940. Hamm, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in regulators of steam and other engines."—Dated 20th August, 1859.

41,941. Hardon, represented by David, of 8, Rue des Grands Degrés, Paris, for "A dredging machine for dry grounds rolling on a railway."—Dated 22nd August, 1859.

41,942. Herbelot, of 10, Rue du Dôme, Passy, département de la Seine, for "A rotary double action steam engine."—Dated 21st August, 1859.

41,943. Josse, of 12, Rue St. Bernard, Faubourg St. Antoine, Paris, for "Improvements in the manufacture of paper hangings."—Dated 17th August, 1859.

41,944. Lambard, of 9, Rue Mauconseil, Paris, for "A kind of silk buttons with holes and shanks." Dated 20th August, 1859.

41,945. Lignon and Desorbay, jun., of 62, Rue Montmartre, Paris, for "An albuminous machine for photographic paper."—Dated 18th August, 1859.

41,946. Moureaux, Brothers, of 13, Rue Quincampoix, Paris, for "A kind of liqueur."—Dated 22nd August, 1859.

41,947. Normandy, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Improvements in apparatus for obtaining drink-water from sea-water."—Dated 20th August, 1859.—(English Patent, 19th February, 1859.)

41,948. Pouig, of Perpignan, for "Manufacture of cigaret lace paper."—Dated 20th August, 1859.

41,949. Quoquiau and Holvoet, domiciled with Vandembroucke, of 14, Rue de Strasbourg, Paris, for "So called 'Magnetic carriage springs.'"—Dated 18th August, 1859.

41,950. Russell, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in apparatus for heating and welding the ends of metal plates used in the manufacture of cylinders and other similar objects."—Dated 17th August, 1859.—(English Patent, 16th February, 1858.)

41,951. Russell, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in the manufacture of handles of tea-pots, coffee-pots, pots, kettles, knives, daggers, forks, and other similar articles with handles."—Dated 22nd August, 1859.—(English Patent, 23rd February, 1859.)

41,952. Salomon, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of fastening steel springs for petticoats."—Dated 17th August, 1859.

41,953. Samuels, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in lace frames."—Dated 20th August, 1859.—(English Patent, 23rd February, 1859.)

41,954. Tronchon, son, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "An apparatus for controlling receipts."—Dated 18th August, 1859.

41,955. Vital De Tivoli, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "Improvements in the construction of omnibus and other carriages."—Dated 20th August, 1859.

41,955. Arrault, of 11, Rue de l'Empereur, Montmartre, département de la Seine, for "A surgical cartridge box."—Dated 25th May, 1859.

41,957. Boulanger, af 4, Rue des Moulins, Montmartre, département de la Seine, for "Opera-glasses, called 'Neo-jumelles.'"—Dated 24th August, 1859.

41,958. Carré, domiciled with Jacquemart, of 10, Rue St. Anastase, Paris, for "Apparatus and processes for obtaining cold air and ice."—Dated 24th August, 1859.

41,959. Chatelain, of 31, Rue du Four, Paris, for "Solid and liquid cosmetics."—Dated 24th August, 1859.

41,960. Chauve, of 16, Rue du Parlement St. Pierre, Bordeaux, for "Applying india rubber to belts or other elastics as a substitute for braces, buckles, &c., with trousers and waistcoats."—Dated 25th August, 1859.

41,961. Clara, of 21, Rue Rochechouart, Paris, for "Using steam combined with the gaseous products of combustion."—Dated 23rd August, 1859.

41,962. Clément, of 17, Rue Tronchet, Paris, for "A break for stopping the rotary movement of wheels and cylindrical bodies."—Dated 23rd August, 1859.

41,963. Colard, of 44, Boulevart Beaumarchais, Paris, for "An apparatus for boiling beef-tea and vegetables."—Dated 24th August, 1859.

41,964. Cuche, of 155, Rue de Sèvres, Paris, for "Galvanizing wire."—Dated 24th August, 1859.

41,965. Curé, of Avallon, département de Yonne, for "Preserving vines from frost."—Dated 26th August, 1859.

41,966. Delcourt, of Abbeville, département de la Somme, for "A machine for extracting peat."—Dated 25th August, 1859.

41,967. Duroule, au Plan de Vaise, Lyon, for "An apparatus for stretching out and throwing sweep nets."—Dated 24th August, 1859.

41,968. Gérard, of 8, Rue de Constantine, Belleville, département de la Seine, for "A machine for finishing fabrics and silks."—Dated 23rd August, 1859.

41,969. Gressard, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A piston pump."—Dated 22nd August, 1859.

41,970. Grivolas, of Avignon, for "Zoocalcareous manure."—Dated 23rd August, 1859.

41,901. Gueyton, domiciled at Valence, for "A dynomometer without gearings for spinning and throwing silk."—Dated 23rd August, 1859.

41,972. Hine, Mundella, and Tailbonis, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in machines for making tricot."—Dated 8th July, 1859.

41,973. Lefèvre, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Fastening hair."—Dated 22nd August, 1859.

41,974. Lehugeur, of 71, Rue de Paris, of St. Denis, département de la Seine, for "A kind of foot coverings."—Dated 23rd August, 1859.

41,975. Madeline, sen., of Condé-sur-Noireau, département du Calvados, for "An apparatus for working in the woof and winding off."—Dated 26th August, 1859.

41,976. Marillier, of Isches, département des Vosges, for "A system of presses applicable to all purposes."—Dated 27th August, 1859.

41,977. Personne, of 190, Rue St. Maur, Paris, for "A whet-stone for knives." — Dated 24th August, 1859.

41,978. Polonceau, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in locomotives for enabling the same to travel over curves of a small radius."—Dated 22nd August, 1859.

41,979. Prost-Boucle-Pernier, of Saint Claude, département du Jura, for "Metal covers of all kinds of smoking pipes."—Dated 24th August, 1859.

41,980. Quentin, of 91, Rue St. Jacques, Châlons-Sur-Marne, for "Improvements in the manufacture of paper."—Dated 7th August, 1859.

41,981. Secrestat, sen., of 28 and 30, Rue Notre Dame, Bordeaux, for "A supplement to distilling apparatus for preventing fires and explosions."—Dated 29th August, 1859.

41,982. Touttain, Doné, and Co., and Laborde, of 16, Rue Neuve, Bordeaux, for "A machine for making brooms."—Dated 26th August, 1859.

41,983. Verpilleux, Brothers, and Baldeyrou, of Rive-de-Gier, départment de la Loire, for "A machine for conglomerating coals."—Dated 29th August, 1859.

41,984. Verpilleux, Brothers, and Balveyrou, of Rive-de-Gier, département de la Loire, for "Steel cables."—Dated 29th August, 1859.

41,985. Vigne, represented by Amouroux, of 333, Rue St. Martin, Paris, for "A kind of toy."—Dated 22nd August, 1859.

41,986. Watson, represented by Lebrun, of 16, Rue de la Clef, Lille, for "An alarum whistle of steam boilers."—Dated 25th August, 1859.

41,987. Argentier, of 58, Rue de Malte, Paris, for "An apparatus for converting substances into steam."—Dated 26th August, 1859.

41,988. Bangert, domiciled with Hector Despretz, or Jeumont, département du Nord, for "Using small or granular pyrites for the manufacture of sulphuric acid."—Dated 1st September, 1859.

41,989. Barbezat and Co., represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in moulds for castings." — Dated 25th August, 1859.

41,990. Barre, of 27, Rue du Penthièvre, Paris, for "Obtaining intaglio or relief designs on all bodies." —Dated 29th August, 1859.

41,991. Beardslee, represented by Perpigna, of 421, Rue Neuve St. Augustin, Paris, for "Improvements in electro-magnetic machines."—Dated 26th August, 1859.—(English Patent, 11th July, 1859.)

41,992. Bernard, of 32, Rue Basse du Rempart, Paris, for "A mode of adzing horn."—Dated 25th August, 1859.

41,993. Boullay, of 89, Rue eu Palais-Gallien, Bordeaux, for "Trusses."—Dated 31st August, 1859.

41,994. Briet, sen., domiciled 34, Rue Amelot, Paris, for "Hygienic syphon-tubes."—Dated 25th August, 1859.

41,995. Chiousse, of 8, Rue Bernard-Dubois, Marseille, for "Steam boilers with horizontal chimneys, and with an apparatus for purifying smoke." Dated 29th August, 1859.

49,996. Clarck, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in shutters."—Dated 26th August, 1859.—(English Patent, 8th February, 1859.)

41,997. Demets, represented by Ricordeau of 23, Boulevart de Strasbourg, Paris, for "A process for applying impervious leather or tissues on impervious leather or tissues without sewing."—Dated 24th August, 1859.

41,998. Destrem, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Treatment of substances and ores of gold and silver."—Dated 27th August, 1859.

41,999. Dezelu and Guillot, of Batignolles, département de la Seine, for "A lighting apparatus, called 'Lamp injector.'"—Dated 27th August, 1859.

42,000. Duméry, of 26, Boulevart de Strasbourg Paris, for "Improvements in calorifere stoves with circulating steam and water."—Dated 27th August, 1859.

42,001. Frey, Mallet, and Co., of Alençon, département de l'Orne, for "Impervious and tanned ropes."—Dated 27th August, 1859.

42,002. Girardet, represented by Schwarz, of 21 Rue Laffitte, Paris, for "A regulator of harness for carriages with one or two horses."—Dated 25th August, 1859.

42,003. Hervy and Charles, of 13, Rue de la Courtine, Limoges, for "An instrument for indicating the relative elevation or depression of a given point, and its distance." — Dated 11th August, 1859.

42,004. Jacob, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A mechanism for multiplying motive power." — Dated 24th August, 1859.

42,005. Lebrun-Virloy, of 9, Rue Pigalle, Paris, for "An economical process for charring wood."—Dated 29th August, 1859.

42,006. Lee and Sherman, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in chess and draught boards."—Dated 26th August, 1859.

42,007. Lejeune-Chaumont and Co., domiciled with Papy, of Rue and Hôtel Laffitte, Paris, for "Improvements in breech-loading fire-arms."—Dated 29th August, 1859.

42,008. Lombard, of 22, Rue St. Etienne, département de la Loire, for "Conglomerating coal-dust." —Dated 1st September, 1859.

42,009. NACHTIÇALL, of 45, Rue du Rocher, Paris, for "A loom for obtaining lace in several regular pieces."—Dated 29th August, 1859.

42,010. NIAUX, of 15, Rue des Canettes, Paris, for "Improvements in safety-locks." — Dated 27th August, 1859.

42,011. O'HARA, represented by Fringant, of 10, Rue de Provence, Paris, for "Improvements in motors or propellers of steam and other vessels."—Dated 27th August, 1859. —(English Patent, 21st January, 1859.)

42,012. PAILLART, of 17, Rue du Grand St. Michel, Paris, for "A machine for splitting leather and for making joints therein."—Dated 24th August, 1859.

42,013. PIERRARD-PARPAITE, and HÉBERT, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kiln for burning plaster and lime."—Dated 26th August, 1859.

42,014. PROUVOST, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A loom for doubling or spooling thread."—Dated 25th August, 1859.

42,015. SCULFORT, MALLIAR, and MEURICE, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A system of axles and boxes for all kinds of vehicles."—Dated 24th August, 1859.

42,016. SIMON and COUCHE, of Clermont-Ferrand, département du Puy-de-Dôme, for "A stone, called 'Scoria,' for cutlery."—Dated 29th August, 1859.

42,017. STOLLE and SEIDLER, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Apparatus for heating boilers of steam engines, furnaces, and other firing apparatus."—Dated 24th August, 1859.

42,018. VAN-AERDE, of 73, Rue Menilmontant, Paris, for "Improvements in vices."—Dated 26th August, 1859.

42,019. WRIGHT, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in the permanent way and rolling stock of railways." — Dated 24th August, 1859. — (English Patent, 12th July, 1859.)

42,020. AUBRY, of Clermont-Ferrand, département du Puy-de-Dôme, for "Applying curves with a small radius to railways."—Dated 27th August, 1859.

42,021. AUER, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in printing presses."—Dated 29th August, 1859.

42,022. BERGÉS, of 21, Rue des Prêtres St. Germain-l'Auxerrois, Paris, for "Motive engines worked by means of atmospheric air, or superheated steam." —Dated 29th August, 1859.

42,023. BOURGUIGUON, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Manufacture of goffered circular tricot."—Dated 31st August, 1859.

42,024. BUSSIÈRES, domiciled with Penon, of 55, Rue de Clichy, Paris, for "Means of governing balloons."—Dated 20th August, 1859.

42,025. DHARVILLE, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in cases or covers of umbrellas, parasols, &c."—Dated 31st August, 1859.

42,026. FAGET, sen., of 12, Rue Dieu, Bordeaux, for "Manufacture of stoppers."—Dated 1st September, 1859.

42,927. FERAUD, LAUREAU, and RICHARD, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Preserving organic substances."—Dated 31st August, 1859.

42,028. FRIEDLEBEN, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in processes and apparatus for heating by means of gas."—Dated 31st August, 1859.

42,029. GACHE, sen., P. D. JOLLET, and L. BABIN, the former of 49, Rue des Vertais, and the latter of Prairie-au-Duc, Nantes, for "A steam boat for pumping out the mud from basins and harbours." Dated 3rd September, 1859.

42,030. GALAIS, of 4, Rue de Madam, Paris, for "A kind of paste."—Dated 30th August, 1859.

42,031. GEOFFROY, of 42, Rue Condé, Dijon, for "A stopping apparatus called 'Endless apparatus.' "—Dated 2nd September, 1859.

42,032. GUESNON and FLEURY, of Déville, département de la Seine Inférieure, for "Using animal bone in spinning machines."—Dated 31st August, 1859.

42,033. HARKER and FIELD, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in lining keels of iron and other vessels."—Dated 1st September, 1859.—(English Patent, 2nd March, 1859.)

42,034. HARTLEY, represented by Mathieu, 45, Rue St. Sébastien, Paris, for "Improvements in apparatus for regulating the speed of steam-engines and other motors."—Dated 29th August, 1859.—(English Patent, 21st July, 1859.)

42,035. HEURTEMATTE, of 1, Rue Neuve, St. Marc, Rouen, for "Clocks wound up every five weeks or forty days."—Dated 30th August, 1859.

42,036. LAURENS, of 13, Rue Tirelinceul, Rouen, for "Manufacture of chlorine for obtaining bichloride."—Dated 31st August, 1859.

42,037. LEGRAND, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "Frames of seamless petticoats." — Dated 31st August, 1859.

42,038. LEROUX, of 44, Rue Volta, Paris, for "An apparatus for taking up money."—Dated 30th August, 1859.

42,039. LOUAP, jun., of 48, Rue Sedaine, Paris, for "A furnace for steam boilers."—Dated 29th August, 1859.

42,040. MAILLARD, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in sea-compasses." — Dated 29th August, 1859. —(English Patent, 4th August, 1859.)

42,041. MARICOT, of 12, Rue de Louvois, Paris, for "Double elastic buttons."—Dated 30th August, 1859.

42,042. MILLAUG, represented by Le Blanc, of 2, Rue Ste. Appoline Paris, for "Opening and closing fans instantaneonsly."—Dated 31st August, 1859.

42,043. Moison, domiciled 47, Rue St. Denis, Paris, for "A regulator of motors."—Dated 30th August, 1859.

42,044. Moss-Defries, represented by Rowland, of 224, Rue de Rivoli, Paris, for "Improvements in regulating the pressure of gas in gas burners."—Dated 31st August, 1859.—(English Patent, 10th May, 1859.)

42,045. Naudin, of 27, Rue de la Savonneire, Rouen, for "A revision fathom."—Dated 2nd September, 1859.

42,046. Patrigeon and Legrand, of 96, Rue de Charenton, Paris, for "A kind of snuff boxes, called 'Rats' tails,' and similar boxes."—Dated 30th August, 1859.

42,047. Poivret, of Troyes, for "A detent spooling apparatus."—Dated 2nd September, 1859.

42,048. Rouchouse and Co., of 17, Rue du Grand Gounet, St. Etienne, for "Means of preventing railway accidents."—Dated 2nd September, 1859.

42,049. Savineau, domiciled 5, Rue Bellefonds, Paris, for "A machine for stoppering bottles."—Dated 1st September. 1859.

42,050. Valetty, of 56, Quai St. Vincent, Lyons, for "Circular or spiral looms for obtaining plain and figured fabrics."—Dated 31st August, 1859.

Certificates of Addition.

39,256. Aubert, for "A mathematical instrument."—Dated 19th July, 1859.

27,760. Baranowski, for "Signals."—Dated 30th July, 1859.

34,458. Barre, for "Glass engravings."—Dated 25th July, 1859.

37,437. Beslay, for "Tinning."—Dated 20th July, 1859.

40,089. Bonière, jun., for "Lubricating."—Dated 20th July, 1859.

20,353. Boucher and Muller, for "Tinning."—Dated 30th July, 1859.

37,500. Calais, for "A spit."—Dated 25th July, 1859.

37,503. Caussinus, for "Electricity."—Dated 29th July, 1859.

36,996. Claudet, for "Washing wool."—Dated 22nd July, 1859.

28,947. Desaint and Maurice, for "Stoppering." Dated 1st August, 1859.

35,543. Dierickx, for "Side weapons."—Dated 26th July, 1859.

33,191. Digney, Brothers, and Co., for "Telegraphs."—Dated 20th July, 1859.

39,746. Gapiand, for "Biscuit."—Dated 26th July, 1859.

30,005. Gautron, for "Hydraulic machines."—Dated 30th July, 1859.

40,266. Grumel, for "Dyeing."—Dated 21st July, 1859.

41,181. Harel, for "Rudders."—Dated 27th July, 1859.

34,894. Jaloureaux, Brothers, for "Pipes."—Dated 22nd July, 1859.

41,465. Jeunehomme, Brothers, for "Fastenings."—Dated 6th August, 1859.

37,810. Jolibois, for "Brewing."—Dated 19th July, 1859.

37,482. Laubereau, for "Lighting."—Dated 20th July, 1859.

40,793. Lebrun, for "Building."—Dated 27th July, 1859.

32,379. Leroy, for "Smoke-consuming apparatus." Dated 30th July, 1859.

39,527. Lindo, for "Soap."—Dated 28th July, 1859.

34,088. Loup, for "Registering apparatus,"—Dated 4th August, 1859.

37,716. Migeot de Baran, for "Stoppering."—Dated 26th July, 1859.

37,653. Nouveau, for "Stoppering."—Dated 21st July, 1859.

37,653. Mouveau, for "Stoppering."—Dated 27th July, 1859.

40,726. Péan, for a "A thistle-cutter."—Dated 2nd August, 1859.

40,014. Possoz, for "Sugar."—Dated 25th July, 1859.

14,604. Prudshomme, for "Telegraphs."—Dated 20th July, 1859.

37,689. Putnam, for "Caoutchouc."—Dated 26th July, 1859.

37,529. Sautou, for "Towing boats."—Dated 28th July, 1859.

31,470. Scott, for "Acoustic drawings."—Dated 29th July, 1859.

40,446. Tornier, for "Hydraulic machines."—Dated 27th July, 1859.

37,596. Tranchard, for "Mills."—Dated 1st August, 1859.

15,264. Vimont, for "Spinning."—Dated 29th July, 1859.

34,162. Woodward, for "Photographs."—Dated 28th July, 1859.

40,055. Abt, for "Iron-work."—Dated 13th August, 1859.

38,119. Artige, for "Steam-engines"—Dated 6th August, 1859.

34,458. Barre, for "Glass engravings."—Dated 8th August, 1859.

41,450. Bertrand, for "An alarum float."—Dated 17th August, 1859.

37,669. Bigard, for "Salvage."—Dated 10th August, 1859.

40,155. Bonnardot, Vasner, and Letrillard, for "Corn."—Dated 30th July, 1859.

41,099. Bruant, for "Balloons."—Dated 6th August, 1859.

40,548. Bureau, for "Heating."—Dated 12th August, 1859.

38,611. Cabanes, for "Mills."—Dated 6th August, 1859.

39,548. The Anzin Mining Company, for "Coke."—Dated 12th August, 1859.

41,683. Durand and Pradel, for "Endless canvas."—Dated 16th August, 1859.

37,876. Duvignau, for "A rule for the blind."—Dated 3rd August, 1859.

40,428. Gallois-Foucalt, for "Bells."—Dated 3rd August, 1859.

38,290. Gennari, for "Pipes."—Dated 16th August, 1859.

11,236. Grégoire, for "Drums."—Dated 12th August, 1859.

41,368. Gueyton, for "Enamelling."—Dated 9th August, 1859.

40,465. Jacquemin, for "Harvesting."—Dated 30th July, 1859.

41,562. Julienne, for "Belts for baths."—Dated 8th August, 1859.

37,682. Le Chatelier, for "Alumina."—Dated 11th August, 1859.

41,146. Lemaire, for "Spinning.'—Dated 9th August, 1859.

37,261. Lencauchez and Pouchet, for "Fecal matter."—Dated 4th August, 1859.

39,559. J. Lion, C. Levy, and Co., for "Foot coverings."—Dated 12th August, 1859.

39,494. Mainardi, for "A spinning wheel."—Dated 11th August, 1859.

39,082. Marçais, for "Electricity."—Dated 13th August, 1859.

39,848. Masbon, for "Clock-work."—Dated 1st August, 1859.

37,685. Mengarduque, for "Stoppering."—Dated 9th August, 1859.

41,150. Miquel, for "Trusses."—Dated 6th August 1859.

27,455. Muller, for "Tiles."—Dated 6th August, 1859.

37,556. Parmantier, for "Mowing."—Dated 1st August, 1859.

38,504. Poivret, for "Tricot."—Dated 16th August, 1859.

41,088. Pelissier, for "Manufacture of oil."—Dated 21st July, 1859.

40,797. Prat, for "A sowing machine."—Dated 17th August, 1859.

41,758. Prou-Gaillard, for "Casks."—Dated 6th August, 1859.

37,819. Reclus, for "An alarm."—Dated 11th Augst, 1859.

37,559. Ribail and Gosset, for "Steam."—Dated 1st August, 1859.

38,445. Sabatier, for "A match-case."—Dated 8th August, 1859.

40,277. Schlose and Brother, for "A clasp."—Dated 10th August, 1859.

37,893. Ziegler, for "Lubricating."—Dated 16th August, 1859.

UNITED STATES OF AMERICA.

(*Communicated by the Commissioner of Patents.*)

List of Patents, with Claims annexed, issued from the United States Patent Office, for the week ending 29th November, 1859, and each bearing that date.

No. 26,239. Reuben L. Allen, of Providence, R. I., for an "Improvement in sleeve fasteners."

"I claim the new article of manufacture herein described, namely, a sleeve fastening composed of the spring A, cylindrical arms B, C, hinge and catch *b*, *c*, and hooked bar D, arranged in the relations and so as to operate together, in the manner herein-before set forth."

No. 26,240. Seth A. Andrus, of Roscoe, Ill., for an "Improved washing machine."

"I claim, 1st, the combination of the circular plate or crank I with the rubber J, as before described, and so constructed and arranged that by operating the said crank I am enabled to communicate to the said rubber J two motions at the same time, that is, a vertical reciprocating motion and a lateral vibratory motion. 2nd, the combination of the caster rollers *m*, *m*^{1}, with the double spring K, constructed and arranged in connection with the rubber J, as herein-before more fully set forth, and for the purposes stated."

No. 26,241. Evens Backus, of Stuyvesant, N. Y., for an "Improvement in cooking ranges."

"I claim attaching to a stove or range the curved plate I and the movable plate (*n*), and the continuous flue F, when arranged in the manner and for the purposes herein set forth."

No. 26,242. G. W. Beers, of Bridgeport, Conn., for an "Improvement in making hub bands for wagon wheels."

"I claim casting slits or holes through the bands sufficiently large to allow the solder or other suitable metal used in connecting the cap to the band to flow through them and unite them, as above described, or in any other form or way equivalent thereto."

No. 26,243. Wm. Boch, senr., of Green Point, N. Y., for an "Improved watercloset basin."

"I claim, as an improved article of manfacture a watercloset basin having a covered annular water passage B at its upper edge, as herein shown and described."

No. 26,244. Henry F. Bond, of Hudson, Wis., for an "Machine for registering music."

"I claim, 1, the application of the bell-pull action with knees and wires to act upon the markers, substantially as described above. 2, the arrangement of the levers J, J, J, and K, K, K, by which the sharps are marked with double lines on the spaces or lines in music with their corresponding naturals, the levers or markers K, K, K, being made each of two pieces of tin or other metal and the levers or markers J, J, J, playing between those two pieces. 3, the arrangement of levers or markers of both kinds in a row with proper intervals to record the music or paper ruled, substantially as represented in Fig. VI., the staves of music being ruled of one color, with just leger lines enough of another color to write directly up or down from one staff to another, the leger lines between the two staves belonging alike to both of them, and the whole number of lines and spaces being equal to the compass of the instruments. 4, application of the ink or coloring matter to the cylinder A, as above described, and the producing of colored marks by pressing the paper against

the inked cylinder. 5, the action of the lever E upon the bar marker L, substantially after the manner set forth above. 6, the mode in which the loud pedal action is marked, substantially as set forth above."

No. 26,245. S. L. Bond, of Greenwood, So. Ca., for an "Improved hub-boring machine."

"I claim the V-shaped bars or jaws F, H, in combination with the bit arbor D, when the whole are arranged, substantially as shown to operate as and for the purpose set forth."

No. 26,246. James A. Boughton, of Pougkeepsie, N. Y., for an "Improvement in making hub bands for wagon wheels."

"I claim the combination of the flange C and projection D, on the leaf B, and the set screw E in the open band A, or their equivalent, for the purposes heretofore set forth."

No. 26,247. John Calvin Brown, of Providence, R. I., for an "Improvement in machines for making chain."

"I claim the circular disk I, provided with the wedged-form projections E, F, G, H, arranged as described, in combination with the bell crank levers D, D^1, which operate the several bending instruments, such combination operating in the manner substantially as described, for the purposes specified."

No. 26,248. Peter Brown, of Brooklyn, N. Y., for an "Improvement in paint cans."

"I claim, 1st, the employment of a strengthening wire within the bead (*a*), as and for the purpose herein shown and described. 2nd, the combination of the pivoted ears C with the cover B, lug (*b*), and can A, as and for the purpose herein shown and described."

No. 26,249. Thos. S. Brown, of New York, N. Y., for "An improvement in quartz crushers."

"I claim the employment or use of the tubular pestle C, having a reciprocating and rotating movement, in connection with the nipple or cone *c* in the box or mortar D, substantially as and for the purpose set forth."

No. 26,250. John Brubaker and Henry Brubaker, of Lancaster County, Pa., for an "Improvement in tools for handling tin."

"We claim the rod handled tong Fig. 2, with its sliding leg C, hooked end *a*, in combination with the ring E, Fig. 3, when made, substantially as described, for the purpose specified."

No. 26,251. John P. Burnham, of Rockford, Ill., for an "Improvement in harvesters."

"I claim the employment of a spring (*d*) in combination with the lever J and connecting rod L, substantially as and for the purpose herein shown and described."

No. 26,252. Ze Butt, of Lincolnton, N. C., for an "Improved harness yoke."

"I claim the manner herein described of constructing and arranging the yoke so that its weight, or the greater portion of it, may rest upon the back instead of the neck of the horses. I also claim, in combination with the yoke, giving a wide base to the line of draft, either by the bolt and clevis, or any other equivalent device, for the purpose and in the manner herein set forth and described."

No. 26,253. Andrew J. Chapman, of Scipio, N.Y., for an "Improvement in vegetable cutters,"

"I claim the arrangement and combination of the hinged guard or feed board, hinged follower, and stationary slatted cutting bed, when constructed and operating substantially in the manner and for the purposes set forth."

No. 26,254. Wm. B. Coates, of Philadelphia, Pa., for an "Improved potato parer."

"I claim the handle A, ferrules B and C, guard D, and blade G, the whole being arranged and constructed substantially in the manner and for the purposes herein set forth."

No. 26,255. Seth L. Cole, of Burlington, Vt., for an "Improvement in gas burners."

"I claim the construction from some good conducting material, as herein above set forth, of a gas burner, with an enlargement of the tube at the point where the gas is discharged and burned, in the form of a globe, or the like, furnished with a slot aperture, as above described, so that the gas shall be heated to the utmost at the point where it is consumed."

No. 26,256. John Webster Cochran, of New York, N. Y., for an "Improvement in breech-loading and other fire-arms."

"I claim, 1st, so constructing and applying one or more accelerating chambers, in combination with the plunger or elastic cushion, that the charge or charges in the accelerating chamber or chambers are fired by the driving back of the plunger or cushion, and that the plunger or cushion serves as a safety valve to the accelerating chambers, substantially as herein described. 2nd, combining the movable breech piece B, containing the plunger or elastic cushion, with a ring or circular frame E, hinged to a slide F, which works longitudinally to the gun, the whole operating substantially as described. 3rd, in combination with the breech piece B, secured in place by a screw, or its equivalent, I claim the adjustable screwed bushing G, applied to the gun, substantially as and for the purpose herein described. 4th, the combination of the plunger C, accelerating chamber *c*, *c*, volute spring D, movable breech piece B, ring or frame E, and slide F, the several parts constructed and applied to the gun, and operating substantially as herein described."

No. 26,257. George Cooper, of Concord, N.H., for an "Improved cooking range."

"I claim the combination and arrangement of the separate leading flues A, B, C, (each provided with a damper *a*, *b*, or *c*, arranged in it as explained,) with flues D, E, F, G, H, disposed around the ovens, as specified. And, in combination therewith, I claim the separate insulating flues I, K, arranged between the ovens and on opposite sides of the leading flue A, and made to open into the bottom flues D and G, and to communicate with the flue A, by openings provided with dampers, all as herein-before specified."

No. 26,258. P. Davey, of Ironton, Ohio, for an "Improvement in buttons."

"I claim the construction of the double flanged shank piece as the basis of the button, forming on one end thereof a button, and on the other a fastening, and in the middle two flange guards to receive the button hole, and protect it from too much abrasion and friction, substantially as set forth."

No. 26,259. A. A. Dickson, of Anderson, S.C., for an "Improvement in ploughs."

"I claim the arrangement of the peculiar shaped bar D, with the shares E, F, and G, beam A, and handles C, C, substantially as described for the purpose set forth."

No. 26,260. Patrick H. Duffy, of Somerset, Ohio, for an "Improved detective register for watchmen."

"I claim drooping the balls by which the action of the apparatus is indicated into the cells of a revolving wheel, by operating a rod O, and slide Q, substantially in the manner and for the purpose herein described. I also claim locking and releasing the rod *o*, by devices, substantially as herein described, whereby it can be pulled at certain times only, to drop a ball into the cells of a revolving wheel, when constructed and operated substantially in the manner and for the purpose herein set forth."

No. 26,261. Henry Ehrenfeld, of New York, N.Y., for an "Improvement in machine for converting reciprocating into intermittent rotary motion."

"I claim the plate B, or its equivalent, arranged with a socket *c*, and cut or split through its centre, as described, to operate in combination with the wheel A, and lever C, which latter is furnished with an oblong pin *d*, or its equivalent, substantially in the manner and for the purpose specified."

No. 26,262. Wm. M. Ferry, jr., of Ferrysburgh, Mich., for an "Improved journal box for saw mill carriages."

"I claim a new article of manufacture, to wit, a single casting A, moulded with an intermediate space B, and with off-setting boxes C, D, on each side of said space, substantially as and for the purposes set forth."

No. 26,263. HENRY FISHER, of Alliance, Ohio, for an "Improvement in railroad hand cars."

"I claim the manner, substantially as herein described, of combining the hand crank shaft F, with the axle of a railroad hand car, so that when the crank shaft F meets with any obstruction, it disconnects automatically from the axle, and ceases its revolution with the same, and thus prevents a sweeping off of the operators from the platform, as set forth."

No. 26,264. DENNIS C. GATELY, of Newtown, Conn., for an "Improvement in manufacture of rubber belting."

"I claim the method herein described of imparting a smooth and finished surface to belts or bands of india rubber or gutta percha, the same consisting in placing them in contact with sheets or strips of vulcanized india rubber or gutta percha, and then vulcanize them by applying heat, substantially in the manner and for the purposes set forth."

No. 26,265. DENNIS C. GATELY, of Newtown, Conn., for an "Improvement in the manufacture of rubber belting."

"I claim the manufacture of belting or banding, composed either wholly or in part of india rubber or gutta percha, which consists in vulcanizing the belt or band, and giving it a smooth friction surface at one operation, by feeding the belt or band, around or in contact with a series of smooth heated rollers, substantially as described."

No. 26,266. GEORGE A. GRAY, jr., of Cincinnati, Ohio., for an "Improved bench vise."

"I claim the described combination of the handle G, loose head F, and catch H, with the jaws, screws, and endless chain of a parallel bench vise."

No. 26,267. JONATHAN H. GREEN, of Christiansburg, Iowa, for a "Composition for covering metals."

"I claim the composition described."

No. 26,268. WM. J. HORTON, of La Grange, Ala., for an "Improved machine for riving basket splints, &c."

"I claim the employment or use of the rollers C, C, D, three or more, knife H placed in the gate G, and the guide plates E, E, arranged for joint operation, substantially as and for the purpose set forth."

No. 26,269. JOSEE JOHNSON, of New York, N.Y., for a "Toy gun."

"I claim, first, so arranging the spring D, relatively to the bore A, that D is by a single movement of the finger, used both as a trigger and a propelling force to discharge the projectile through A, substantially as above shown and described. Second, I claim in connection with the above, receiving the impact of the spring D, upon the single bearing *g*, so that the free portion of D moves by its momentum beyond its original position, for the purpose herein shown and described. Third, I claim the detaching surface *a*, arranged relatively to the spring lever D, and barrel A, substantially as herein shown and described."

No. 26,270. FRANCIS H. JOYNER, of Richmond, Vt., for an "Improvement in railroad switches."

"I claim a pair of switch rails, in connection with stationary bearing rails, the whole constructed and arranged as is described above."

No. 26,271. BERNHARD KOEGEL, of New York, N.Y., for an "Improvement in manufacture of vinegar."

"I claim converting wine or other alcoholic liquors rapidly into vinegar or acetic acid, by means of pumice stone (or its equivalent), substantially as described, and I also claim the tub or apparatus, substantially as described, when pumice stone is used in the same for the purpose as set forth."

No. 26,272. JOHN M. LAMER, of Eufaula, Ala., for an "Improvement in apparatus for taming horses."

"I claim the employment of the straps A, A, loop B, and straps D, C, and E, when the same are constructed, arranged, and used substantially as and for the purpose herein specified."

No. 26,273. OLIVER LINDSAY and ROBT. F. STREAM, of Washington, Pa., for an "Improvement in grain fans."

"But we claim the combination of division board A, with the inclined plane B, the screen board G, and the riddles C and F, when the same are united in the peculiar manner above described and arranged to operate in the relation to each other, and to the currents of wind thrown off by the fan as fully shown in figure 1, substantially as and for the purpose set forth and specified."

No. 26,274. WM. LINTON, of Baltimore, Md., for an "Improvement in filters."

"I claim arranging a clamping plate B of less diameter than the filtering cylinder on adjusting screws *g* of the removable head *c* of the cylinder A, substantially as and for the purpose set forth."

No. 26,275. PETER LOUIS, of New York, N.Y., for an "Improvement in valve gear of steam engines."

"I claim, 1st, the auxiliary cylinder D, having a partition *g* and arrangement of steam and exhaust passages, substantially as described, and fitted with a valve T or its equivalent and with two pistons F, F^1, on opposite sides of its partition, applied substantially as described, in combination with the induction and eduction valves and the shaft of the main engine, so that each of said pistons, acted upon by steam admitted to its compartment of the auxiliary cylinder by the valve T or its equivalent, serves to open one induction and the opposite eduction valve of the main engine at the proper time, substantially as herein described. 2d, in combination with the auxiliary cylinder D and its pistons, applied and operating as described, to open the induction and eduction valves of the main engine, I claim the employment of the rock shaft N and its toes O, O^1, so applied in combination with the said eduction valves that while they permit the said valves to be opened by the action of the steam on the pistons of the auxiliary cylinder they keep the said valves open as long as may be desired, substantially as herein described."

No. 26,276. THOS. J. MAYALL, of Roxbury, Mass., for an "Improvement in manufacture of waterproof hose."

"I claim my improvement in the manufacture of india rubber or gutta percha hose or tubing, which consists in impregnating the fibrous fabric which forms the basis thereof with protective or preservative substances, and subsequently coating with india rubber or gutta percha, and forming the same into hose or tubing, substantially as described."

No. 26,277. THOS. J. MAYALL, of Roxbury, Mass., for an "Improvement in steels."

"I claim, as a new article of manufacture, a 'steel,' or implement for sharpening table knives, &c., formed of india rubber or gutta percha, with which emery, sand, or other suitably gritty substances are incorporated, substantially as set forth."

No. 26,278. THOS. J. MAYALL, of Roxbury, Mass., for an "Improvement in manufacture of packing and tubing."

"I claim my new method of forming packing hose, or tubng, and other similar articles, the same consisting in rolling or wrapping the fabric to be used around the core mandril by rolling or passing said core or mandrel and the fabric or wrapper together between two surfaces, one of which exerts a self-adjusting yielding pressure upon the article to be formed, while the other surface has the necessary motion imparted to it to roll or wind the fabric used around the core or mandrel, substantially as set forth."

No. 26,279. ALBERT E. MCGAUGHEY and SAMUEL N. MCGAUGHEY, of Westedo, Minn., for an "Improvement in steam ploughs."

"We claim, 1st, the plows S attached to radical arms *m*, or oscillating shafts *k*, and arranged with the pinions *n*, racks T, ratchet toothed hubs *l*, and stop rods *r*, *s*, to operate substantially as and for the purpose set forth. 2nd, in connection with the plows S, arranged and operated as described, the rakes or harrows V, attached to the bars *i*, i^1, for the purpose specified."

No. 26,280. JAMES H. MCNEELY, of Indianapolis, Ind., for an "Improved means for climbing telegraph poles."

"I claim the combination and arrangement of the hooks B and C, with the loops D, E, and F, and set screw G, when constructed and operated substantially as set forth."

No. 26,281. Reuben Miller, of Pittsburgh, Pa., for an "Improvement in cut-off apparatus for steam engines."

"I claim the employment, in combination with the tappets F, F^1, for opening the valve to effect the induction of steam of the collars G, G^1, attached to the same valve rod, and the tappet levers H, H^1, with independent arms g, g^1, said collars and tappet levers being applied and operating, substantially as herein described, to effect the cutting off the steam at such point in the stroke of the piston as may be desired."

No. 26,282. John Miner and Silas Merrick, of New Brighton, Pa., for an "Improvement in railroad cars."

"What we claim, is, in the construction of railroad cars, inserting strips of wood between the angle iron which forms the framework of the car, in combination with panel plates formed of a single piece of iron struck up, whether plain or ornamented, substantially as described. We also claim constructing the ribs and framework of the car of two strips of L iron, with a bar of wood interposed, when these irons and the wood are united by rivets, substantially in the manner described."

No. 26,283. Joan R. Moffitt, of Piqua, O., for an "Improvement in grain separators."

"In the desired combination with a reversible spout adapted to discharge grain at either end of a threshing and separating machine, I claim the screen N, placed within or above the said spout, and operated by the motion of the shoe, for the purpose of screening grain after the action of the winnowing apparatus."

No. 26,284. F. I. Palmer, of Knoxville, Tenn., for an "Improvement in car trucks."

"I claim the arrangement and combination of the bars I, K, L, H, H, substantially as and for the purpose set forth."

No. 26,285. J. J. Parker, of Marietta, O., for an "Improvement in paper files."

"I claim the combination with the hinged book back of bars, springs, and rods, arranged for conjoint operation substantially in the manner described."

No. 26,286. Dubois D. Parmelee, of Salem, Mass., assignor to John A. Greene, of Beverly, Mass., for an "Improvement in manufacture of hollow moulded rubber goods."

"I claim the method herein described of shaping the said articles in moulds, preparatory to their being vulcanized or hermized, *i. e.*, treated in the cold way by any known process, by applying heat to bags made of india rubber, its equivalent, or their compound, free from sulphur, and inflated with air so as to snugly fit the moulds, in the manner substantially as set forth."

No. 26,287. Francis A. Parmelee, of New Haven, Conn., for an "Improvement in twine spools."

"I claim the combination of the double spool (C, C, C), with the spindle (D), when the whole is constructed substantially as herein described."

No. 26,288. G. H. Peabody, of Columbus, Geo., for an "Improvement in cotton pickers' wallets."

"I claim applying a sponge or other equivalent device to a cotton picker's wallet, for the purpose of enabling the picker to readily moisten his fingers, and thus facilitate his work, as herein described."

No. 26,289. Simeon F. Peek, of Penfield, Geo., for an "Improvement in ploughs."

"I claim, the manner of attaching the share E, the foot bar D, to wit, having the back part of the share notched and fitted in a rebate *a* in the foot bar, and receiving the shoulder *b*, formed by the rebate, while the ends *f* of the share fit underneath the projections *c*, *c*, and the lever E is pressed on the outer side of the share by means of the wedge G, substantially as shown."

No. 26,290. William Peters, of Baltimore, Md., for an "Improved propeller and paddle wheel shaft."

"I claim a propeller or paddle wheel shaft, constructed as herein set forth."

No. 26,291. S. M. Perkins, of Albany, Ill., for an "Improvement in whiffle tree hooks."

"I claim, first, the combination of the stud with a revolving spring button, arranged substantially as described for the purpose set forth. Second, in combination with a revolving spring button I claim a stationary stop (D), so arranged as to prevent the eye of the trace in all positions from passing over the button. Third, I claim the combination of the spiral spring, the projecting stud, and the inner stop, arranged substantially as described for the purpose set forth. And I also claim constructing the button with a hooked end, substantially as described, for the purpose set forth."

No. 26,292, Charles Perley, of New York, N.Y., for an "Improved chain cable stopper."

"I claim the bridge *k* over the chain, in combination with the cable stopper, for the purpose of forcing the chain into said stopper, in the manner and substantially as specified."

No. 26,293. Gideon Peirce, of Ercildown, Pa., for an "Improvement in horse rakes."

"I claim the arrangement of the cog wheel *b*, rack *c*, lever I, frame *d*, bar G, standard *g*, and teeth *f*, operating substantially as and for the purpose set forth."

No. 26,294. Mathias Reaser, of Reading, Pa., for an "Improvement in horse hay rakes."

"I claim the combination of the rock shafts N and O clearers P, teeth *c*, brace guides L, spring bar F. pins *e* and *f* springs *d* and *g*, with the draft bar I, when the several parts are arranged and operated in the manner and for the purpose described."

No. 26,295. Charles W. Richter, of Madison, Geo., for an "Improvement in lamps."

"I claim the employment or use of the wick adjuster formed of the bar *f*, provided with a toothed plate *r* at its inner end, and so arranged as to have a certain degree of longitudinal adjustment, in relation with the wick *u*, for the purpose set forth."

No. 26,296. Wm. Salisbury, of Wheeling, Va., for an "Improved catch bolt."

"I claim the employment or use of the lever C, combined and arranged with the catch bolt B, to operate substantially as and for the purpose set forth."

No. 26,297. Henry Sanders, of Utica, N. Y., for an "Improvement in cultivator teeth."

"I claim the flanches *a*, *a*, and a semi-circular projection B on the tooth, and the flanches *c*, *c*, and pin *e* on the chair, when constructed and arranged, in relation to each other, in the manner substantially as described and for the purposes set forth."

No. 26,298. Samuel Smith, of Philadelphia, Pa., for an "Improvement in cooking stoves."

"I claim, firstly, the grate G, having hollow bars, communicating with each other and arranged, in respect to the hollow back L and its zigzag passages, as set forth for the purpose specified. Secondly, the plates *r* and *s* of the grate G, when arranged as specified, so as to serve the double purpose of connecting the bars of the grate together, and forming a chamber for heating the air preparatory to the same being discharged in jets into the front of the fire."

No. 26,299. James Speers, of West Manchester, Pa., for an "Improved water heater for steam engines."

"I claim, first, the arrangement of the float (*h*), lever (*f*) valve (*o*), partition (*k*), and pipes (*b*, *c*, and *x*), when arranged substantially as herein described, for the purpose of constructing water heaters for supplying the force pump of steam engines with heated water. Second, the use of the branch pipe (*x*), when used in connection with pipe (*c*), and valve (*o*), as herein described, and for the purpose set forth."

No. 26,300. Henry Steinway, jr., of New York, N. Y., for an "Improvement in piano-fortes."

"I claim with the agraff *c*, *c*, of the projection *a* on the underside of the plate, lapping over and abutting against the edge of the turning block, substantially as herein described, for the purpose specified."

No. 26,301. David Stoddard, of San Francisco, Cal., for an "Improvement in valve gear for steam engines."

"I claim the use of the fixed cam A, in combination with the adjustable cam B, and the rocking bar E, which is connected to the cam rod, and also connected to and operated by the cam yokes, substantially in the manner described."

No. 26,302. J. E. Sturdy, of Augusta, Mr., for an "Improvement in shingle machines."

"I claim the employment or use, in connection with the shingle sawing machine described, of the guides I, I, attached to the bolt carriage E, and actuated alternately to perform their proper function to the planer L, the whole being arranged substantially as and for the purpose set forth."

No. 26,303. Joseph R. Swift, of New Orleans, La., for an "Improvement in railroad car couplings."

"I claim the combination of the peculiarly-constructed draw head A, B, *f*, *a*, *g*, *b*, *c*, with the peculiarly-constructed elbow-shaped gravitating lever hook C, *m*, *n*, in the manner and for the purpose herein described."

No. 26,304. I. B. Thompson, of Philadelphia, Pa., for an "Improvement in metal strings for pianos, &c."

"I claim the employment for the strings of piano-fortes, and other musical instruments, of hardened and tempered steel wire, as herein described."

No. 26,305. S. H. Tift, of Morrisville, Vt., for an "Improvement in apparatus for elevating water."

"I claim the buckets B, curved at the rear as described, in combination with the trunnions T, band *b*, notched flanged wheel W, roller R, and frame F, constructed and operating substantially in the manner and for the purpose set forth."

No. 26,306. George W. Tolhurst, of Liverpool, Ohio, for a "Composition for making soap."

"I claim, a soap compound, when prepared of the ingredients proportioned in the quantities hereafter mentioned, viz., five ounces common bar soap, four ounces sal soda, half ounce borax, half drachm of sugar burned, and one teaspoonful of linseed oil, add as much rain water as to make a soap of suitable consistency; after it is boiled it is ready for use."

No. 26,307. Alfred F. Toulmir, of Ellicotts Mills, Md., for an "Improvement in railroad car brakes."

"I claim the mode described of simultaneously applying or putting down brakes by means of the brake cord (E, *c*, *d*), the box spring (W), the crank lever (K), the trigger (P), the cross piece (*x*), the slide (*l*), and the swivel bar (*b*), with its springs S, S, and S, S, arranged as described. I also claim the mode described of instantaneously freeing, relieving, or raising the brakes, and of keeping them free when raised (until the engineer, conductor, or brakesman shall desire to apply them), by means of the forward or tractive movement of the train, in combination with the slide (*l*), the crosspiece (*x*), and the trigger with its shoulder (P), arranged and operating as described."

No. 26,308. John G. Treadwell, of Albany, N. Y., for an "Improvement in stoves."

"I claim the arrangement of the stove A, flue B, door F, flue D, and smoke pipe C, when the flue B is secured to, or made a part of the underside or bottom of the stove, the several parts being connected and constructed, substantially as and for the purpose specified."

No. 26,309. Henry George Tyer, of Andover, Mass., for "Composition for soles and heels of shoes and boots, veneers, packing, and other purposes."

"I claim a composition made of vulcanized india rubber, leather, and gutta percha, in the proportions and manner herein set forth."

No. 26,310. I. T. Vankirk, of Frankfort, Pa., and Wm. M. Fulton, of Granberry, N. J., for an "Improvement in lamps."

"We claim the spindle B, with its cog wheels D, the said spindle being confined to its place by and acted upon by a spring attached to the wick tube, and arranged in respect to the latter, as and for the purpose herein set forth."

No. 26,311. D. S. Wagener, of Penn., Tan., N. Y., for an "Improvement in grain separators."

"I claim the case *i*, with flanges or divisions *t* surrounding distributor or sheath *r*, or its equivalent, for distributing the grain in a circular form within said case, and separating the impurities from the grain at said point, by means of a suction and b ast fans, or by a suction or blast fan, operating as described, and for the purposes set forth."

No. 26,312. John H. Wells, of Brooklyn, N.Y., for an "Improved rocking chair."

"I claim the arrangement herein described, of the legs 1, 2, 3, 4, the hinge joint at 77, connecting the seat with the underwork, and the springs 8 and 9, substantially as and for the purpose set forth."

No. 26,313. Calvin D. Wheeler, of New York, N. Y., for an "Improvement in machines for cleaning animals."

"I claim arranging and combining with a portable case or frame a rotating comb and brush, substantially as set forth, and for the purposes specified."

No. 26,314. C. W. Williams, of Port Jervis, N. Y., for an "Improvement in canal locks."

"I claim, 1st, the arrangement of the sliding shaft R, gearing S, M, P, sliding rack N, rods O, *i*, *i*, *i*, wickets F, and gate E, applied to a canal lock, substantially as and for the purpose set forth. 2nd, the employment or use of the guard strip I applied to the gate E, and arranged substantially as and for the purpose set forth."

No. 26,315. Seth Wilmarth, of Charlestown, Mass., for an "Improved machine for drawing bolts."

"I claim the combination and arrangement of the several parts herein specified and illustrated, substantially as and for the purposes set forth."

No. 26,316. Wm. Wilmington, of Toledo, O., for an "Improvement in grain separators."

"I claim, 1st, the combination of the endless belt D, the dividing board H, and the rotary reciprocating bars G, the belt being separated from the bars by means of the board H, and used for delivering the straw and unseparated grain to the bars and its turning point, substantially as and for the purpose herein specified. Second, I claim the combination of the teeth on the underside and end of the bars with the fingers or comb, for the purpose herein-after described."

No. 26,317. Martin Winger, of Lancaster County, Pa., for an "Improved machine for shaving bark."

"I claim the combination of the convex traveling bed O, W, with the rotary knives V, and pressure rollers 1, 2, 4, and *h*, in the manner and for the purposes set forth."

No. 26,318. John E. Wootten, of Philadelphia, Pa., for an "Improvement in moving locomotive engines by hand power."

"I claim the application of the hydraulic piston D to the purpose of propelling a locomotive engine or rail road car upon the track by its direct action upon the periphery of the wheel, as herein described, combined with the peculiar arrangement of the plunger E, in reference to the piston D, whereby the latter is caused to advance and recede in concert with the plunger, by the aid of atmospheric pressure, and without the intervention of valves, in the manner and for the purpose substantially as herein set forth."

No. 26,319. Oscar M. Andrews, of Hecla Works, N. Y., assignor to A. K. Seymour, of same place, for an "Improved blind fastener."

"I claim arranging on the side of the frame B of a shutter or blind A, a rotary wedge-shaped cam D, in combination with a hook a^1, or its equivalent, fastened substantially in the manner and for the purpose specified."

No. 26,320. George Bradley, of Paterson, N. J., assignor to Jacob S. Rogers, of same place, for an "Improvement in can bottom for roving."

"I claim so mounting two or more ordinary can bottoms C, C^1, that the filled can may be removed from under the coiler, and an empty one substituted in its place by means simply of a partial rotation of the frame H, substantially as above described."

No. 26,321. JOHN P. BROADMEADOW, of Bridgeport, Conn., assignor to himself and Albert Eames, of same place, for an "Improvement in moulding for metal casting."

"I claim the combined use of a half flask of a sufficient size to hold the quantity of loose sand required to form a half mould, and of a follow board small enough to enter the said half flask and act as a piston to compress the sand therein, when pressure is applied, substantially as herein set forth. I also claim the combined use of a half flask, as above described, and of a strike, whose profile corresponds in form with the transverse section or profile of the pattern, substantially as herein set forth. I also claim the combined use of a half flask, as above described, constituting the cope of a ribbed cope plate, fitted to enter therein, and of sustaining pins in the said cope, the whole operating substantially as herein set forth. I also claim the combined use of the aforesaid cope plate of a bottom plate, fitted to enter the drag of the flask, and of clamps, substantially as herein set forth. I also claim combining the sprue pattern with the follow board, when this combination is used in connection with a match board, having an opening to permit the descent of the lower end of the sprue pattern, substantially as herein set forth. I also claim the combination of projections or indentations, or both, with the follow board, in contradistinction to constructing the flasks with projections and indentations."

No. 26,322. ALMON COOLEY, of Hartford, Conn., assignor to E. W. Sperry, J. H. Ashmead, E. Hurlbert, and Henry E. Robbins, of same place, for an "Improvement for holding knife handles for sol- for metal dering."

"I claim the above described device for holding knife blades, handles, &c., for soldering together, or their substantial equivalents, the rods C, cap D, bar E, springs I, operating in the manner substantially as set forth for the purpose specified."

No. 26,323. ALMON COOLEY, of Hartford, Conn., assignor to E. W. Sperry, J. H. Ashmead, E. Hurlbert, and Henry E. Robbins, of same place, for an "Improvement in holding knife handles for soldering."

"I claim the above described device for securing or holding handles (formed of two parts,) &c., and for soldering, or their substantial equivalents, the adjustable yielding clamps or brackets G, L, substantially in the manner and for the purpose described; the combination of the yielding clamps or brackets G, L, with a turn table D, or their substantial equivalents, substantially in the manner as and for the purpose described."

No. 26,324. THOS. HARVEY, of Worcester, Ohio, assignor to himself and David Kramer, of same place, for an "Improved washing machine."

"I claim the combination of the two vertical movable plates L, L^1, with the inclined planes D, D^1, and the fixed perforated corrugated partition N, the whole constructed, combined, arranged, and operated as herein-before described, and for the purposes set forth."

No. 26,325. WHEELER HEDGES, of Chicago, Ill., assignor to himself and P. W. Gates, of same place, for an "Improvement in pans for evaporating sugar juice."

"I claim, first, the arrangement of the pipes E, E, with the pipe F, in the pan B, so that the application of the steam to the pipes E, E, will cause the greatest ebullition, and the foam to raise highest longitudinally in the middle of the pan B, for the purpose of causing all impurities to be deposited upon the flaring sides P, P, of the pan B. Second, the construction and application of the flaring sides or beaches P and P, that, by their great obliqueness, retain all the scum thrown upon them, substantially as specified. Third, the construction and application of the defecator D, in combination with the evaporator, substantially as specified, and for the purpose herein set forth. Fourth, the stop boards Q, Q, in combination with the evaporator, as described and for the purpose set forth."

No. 26,326. MATTHEW HODKINSON, of Pittsburgh, assignor to Matthew Hodkinson, jr., of same place, for an "Improvement in retorts for distilling coal oil."

"I claim the stationary retort with a shaft armed with knives, whose edges are at right angles with the shaft passing through it, by which, when motion is given to the shaft, the coal is broken and pulverized more effectually and more economically than by any other method."

No. 26,327. FRANCIS J. LA FORME, of Boston, Mass., for an "Improvement in nursing bottles."

"I claim an improved nurse bottle, or one having an elastic tube, constructed and applied thereto, in manner and for the purpose set forth."

No. 26,328. DANIEL PENMAN and ELISHA FITZGERALD, of New York, N. Y., assignors to Wm. C. Walker and M. Penman, of same place, for an "Improved machine for manufacture ruches."

"I claim the pressing bar A, attached to the shaft L, by the arms M, (said shaft having a crank B) at its end, by the purpose described, in combination with the adjustable gauge bar I, hook rods D, and treadles H, the whole being constructed and operated substantially in the manner and for the purposes set forth."

No. 26,329. NEWMAN SILVERTHORN, of Prescott, Wis., assignor to James M. Allen, of Fredericktown, Ohio, for an "Improved boot and shoe tip."

"I claim as a new article of manufacture a boot or shoe tip, made of any of the known preparations of india rubber or gutta percha, and to be applied to the boot or shoe, in the manner substantially as herein described."

RE-ISSUES.

O. W. MINARD, of Waterbury, Conn., for an "Improvement in making brass kettles."—Patented 15th April, 1856.—Re-issued 29th November, 1859.

"I claim the employment of two rotating rollers for gripping, turning, and rolling the disc of metal, substantially as described, in combination with the clamps or holders for holding the disc of metal at any desired angle with the axis of the rollers, substantially as described, and for the purpose specified. And I also claim the concave and convex clamping plates, substantially as described, in combination with the rollers, or any equivalent mode of rolling the metal, substantially as described. And I also claim, in combination with the rollers for rolling, the disc of metal, the supporting rest for supporting the metal beyond the point of action of the griping rollers, substantially as set forth."

JEREMIAH W. MULLEY, of Amsterdam, N. Y., for an "Improvement in reaping and mowing machines."—Patented 10th February, 1857.—Re-issued 29th November, 1859.

"I claim so constructing and arranging the platform of a reaper as that it, or a portion of it, may be made to form a track clearer, when it is desired to convert the machine into a mower, substantially as herein specified."

JEREMIAH W. MULLEY, of Amsterdam, N. Y., for an "Improvement in reaping and mowing machines."—Patented 10th February, 1857.—Re-issued 29th November, 1859.

"I claim the hollow reel shaft made of sheet metal, or its equivalent, formed with boxes or bearings at or near each end, and made to revolve on an arm, supported at one end only, substantially as specified."

JEREMIAH W. MULLEY, of Amsterdam, N. Y., for an "Improvement in reaping and mowing machines."—Patented 10th February, 1857.—Re-issued 29th November, 1859.

I claim, first, the manner herein described of securing the detachable cutters or blades to or in their place on the cutter bar, and relatively to each other, by means of central holding screws, in combination with pins or studs on the bar to fit the recesses in the adjoining sides of the blades, substantially as set forth. Second, providing the fingers with the laterally projecting slips in front and rear of the slot in which the cutter bar plays, substantially in the manner and for the purposes specified. Third, the finger bar, arched as described, in combination with the fingers made with a swell or convex projection in their rear, substantially as herein set forth."

DESIGN.

J. B. VIROLET, of New York, N. Y., assignor to John W. Hoyt, of same place, for a "Design for floor cloths."

"I claim the combination of figures and devices herein described, and represented in the accompanying photographic impression, to form an ornamental pattern or design for a floor oil cloth."

Additional Improvement.

W. W. Hollman, of Eddyville, Ky., for an "Improvement in straw cutters." — Patented 30th March, 1858.— Additional Improvement, 29th November, 1859.

"I claim the combination and arrangement of the devices for operating the knife and feeding box, substantially as above described."

List of Specifications published during the week ending 16th December, 1859.

No.	Price.	Subject-Matter.
1157	8*d.*	Machinery for printing fabrics.
1158	9*d.*	Self-regulating horse machine.
1159	3*d.*	Obtaining power by the impulsion of water.
1160	3*d.*	Stamp for marking linen, &c.
1161	3*d.*	Cartridge holders.
1162	6*d.*	Lamps.
1163	1*s.* 6*d.*	Machinery for weaving figured fabrics.
1164	1*s.* 7*d.*	Obtaining motive power.
1165	10*d.*	Apparatus for preventing the explosion of steam boilers.
1166	3*d.*	Apparatus for lubricating the pistons of steam engines.
1167	6*d.*	Ordnance, fire-arms, and projectiles.
1168	3*d.*	Steam generators or boilers.
1169	5*d.*	Buttons and fastenings.
1170	5*d.*	Apparatus for regulating the pressure of gas.
1171	9*d.*	Furnaces.
1172	7*d.*	Shuttles.
1173	3*d.*	Matches or fusees.
1174	7*d.*	Furnace or heating apparatus, &c.
1175	3*d.*	Cartridges.
1176	7*d.*	Apparatus for separating substances of different specific gravities.
1177	3*d.*	Impregnating illuminating gas with hydro-carbon vapour.
1178	3*d.*	Extracting and purifying sugar.
1179	3*d.*	Manufacture of colouring matter.
1180	8*d.*	Carding engines.
1181	5*d.*	Burling and napping machine.
1182	9*d.*	Balancing millstones.
1183	5*d.*	Protecting the mariners' compass against local attraction.
1184	3*d.*	Bridles.
1185	7*d.*	Knapsacks, &c.
1186	3*d.*	Haymaking machines.
1187	10*d.*	Pumps.
1188	10*d.*	Omnibuses, &c.
1189	9*d.*	Sewing machines and apparatus, and apparatus connected therewith.
1190	9*d.*	Securing rails on railways.
1191	7*d.*	Machinery for solidifying, pressing, and moulding.
1192	3*d.*	Manufacture of soft soap.
1193	9*d.*	Building ships and other vessels.
1194	11*d.*	Insulation of telegraphic or electric conductors.
1195	3*d.*	Sawing machines.
1196	11*d.*	Surface condenser and refrigerator.
1197	2*s.* 10*d.*	Knitting machines.
1198	3*d.*	Puddling furnaces.
1199	3*d.*	Steam vessels.
1200	10*d.*	Manufacture of moulds for casting.
1201	2*s.* 6*d.*	Manufacture of bread, &c.
1202	3*d.*	Cooking, preserving, and drying animal and vegetable substances.
1203	10*d.*	Machinery for treating india-rubber, &c.
1204	10*d.*	Manufacture of hooped skirts.
1205	4*d.*	Preparation of colors for dyeing and printing.
1206	3*d.*	Ships' night signals.
1207	9*d.*	Chain harrows.
1208	10*d.*	Apparatus for facilitating the draught of carriages.
1209	3*d.*	Dyeing.
1210	3*d.*	Projectiles for fire-arms.
1211	3*d.*	Oven or stove for baking, drying, &c.
1212	3*d.*	Metallic buildings.
1213	3*d.*	Covering wires and other metal conductors for telegraphic purposes.
1222	6*d.*	Menstrual receiver or truss.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

Museum of Patents, South Kensington.

Number of Visitors for the Week ending 17th December, 1859.

Mornings - - - -	530
Evenings - - - -	872
Total - - -	1402

Since the opening of the Museum Free Daily (May 12, 1858,)—167,093.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. Woodcroft.

Great Seal Patent Office,
Southampton Buildings.

Gallery of Portraits of Inventors, Discoverers, and Introducers of Useful Arts. —This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

No. 623. **FRIDAY, DECEMBER 23, 1859.** **Price 2d.**

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

2478. To ISAAC BROWN, of the city of Carlisle, Merchant, for the invention of "Improvements in the treatment of growing crops."

2482. And to ANTOINE CHEVRIER, of No. 21, Rue du Faubourg St. Martin, in the city of Paris, in the empire of France, Apothecary, for the invention of "Neutralizing the smell and savour of all vegetable and animal substances without their being adulterated by the use of essences of spirits and aromatical products."

On both their petitions, recorded in the Office of the Commissioners on the 31st day of October, 1859.

2538. To ADOLPHE LEARCH, of Brussels, in the kingdom of Belgium, Journalist, for the invention of "An improved process of manufacturing embossed sheets or stuffs, called embossed fictitious leather for hangings and household furniture."——A communication from Henry Hendryckx, resident at St. Josse-Ten-Noode, near Brussels.

On his petition, recorded in the Office of the Commissioners on the 8th day of November, 1859.

2583. To HENRY JOHN DANIELL, of Donnington Park, in the county of Leicester, late Colonel in the Coldstream Guards, for the invention of "Improvements in the construction of breech-loading fire-arms."

On his petition, recorded in the Office of the Commissioners on the 14th day of November, 1859.

2622. To CHARLES BOSC, of 2, Rue St. Appoline, Paris, France, and of 45, Essex Street, Strand, London, Merchant, for the invention of "The manufacture of artificial marbles."

2626. And to JEHU HOLLINGSWORTH, of Cecil Street, Strand, in the city of Westminster, Gentleman, for the invention of "Improvements in the mode of and machinery for cutting irregular and other forms." — Partly a communication from abroad by Charles P. Bailey, of Zanesville, Ohio, United States of America.

On both their petitions, recorded in the Office of the Commissioners on the 19th day of November, 1859.

2648. To WILLIAM HENRY WARD, of the city of Auburn, in the county of Cayuga, and state of New York, one of the United States of North America, for the invention of "Improved signal lanterns."

On his petition, recorded in the Office of the Commissioners on the 23rd day of November, 1859.

2666. To WILLIAM SMITH, of No. 19, Salisbury Street, Adelphi, Civil Engineer, for the invention of "Improvements in applying and working propellers in boats or vessels."—A communication from abroad by M. Eugene Lacroix, fils, of Rouen, Engineer.

On his petition, recorded in the Office of the Commissioners on the 25th day of November, 1859.

2706. To BERNHARD SAMUELSON and WILLIAM MANWARING, both of the Britannia Works, Banbury, in the county of Oxford, for the invention of "Improvements in reaping and mowing machines."

2708. To EDWARD DORSETT, of No. 76, Old Broad Street, in the city of London, Tar Distiller, for the invention of "A new manufacture of heavy oil."

2710. To HIPPOLYTE DE MATTHYS, Civil Engineer, of Antwerp, in the kingdom of Belgium, for the invention of "Improvements in electric telegraph cables."

2712. To WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of

"Improvements in the construction of pianofortes."—A communication from abroad by Frederick Mathushek, of New York, in the United States of America.

2714. And to JOHN LAWSON and STEPHEN COTTON, both of Leeds, in the county of York, Machinists, for the invention of "Improvements in machinery for cutting and forming the teeth or cogs of wheels."

On their several petitions, recorded in the Office of the Commissioners on the 30th day of November, 1859.

2716. To GEORGE KENNEDY GEYELIN, Civil Engineer, of 462, Oxford Street, London, in the county of Middlesex, for the invention of "Making close folding metallic spring laths, mattresses, and bedsteads."

2718. To ALPHONSE MOSSELMAN, of Rue Saint Ghislain, No. 17, Gentleman, for the invention of "An aromal electrical girdle."

2720. To JAMES COCKS, of No. 25, Cornhill, in the city of London, Tailor, for the invention of "Improvements in the mode of manufacturing cloths or materials for trowserings."

2722. To WILLIAM EDWARD NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for the invention of "Improved apparatus applicable for beating eggs, or mixing substances or liquids."—A communication from abroad by Edwin Pear Monroe, of New York, in the United States of America.

2724. To GEORGE DAVIDSON, of Mugie Moss, in the county of Aberdeen, Paper Manufacturer, for the invention of "Improvements in the manufacture of paper bags, and in the machinery or apparatus used therein."

2726. And to NATHANIEL SHATTSWELL DODGE, of No. 44, St. Paul's Churchyard, in the city of London, Merchant and Manufacturer, for the invention of "Improvements in the construction of lamps."—A communication from abroad by William Fulton, of Cranberry, in the county of Middlesex, New Jersey, United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 1st day of December, 1859.

2728. To JOHN MOORE, of No. 46, New Road, Woolwich, in the county of Kent, Ironmonger, for the invention of "An improved damper of chimnies and flues."

2730. To DANIEL MAKINSON, of Bolton-le-Moors, in the county of Lancaster, Mechanic, and JAMES HOPE, of Harwood Lee, near Bolton-le-Moors aforesaid, Carder, for the invention of "Certain improvements in carding engines."

2732. To WILLIAM HENRY ALDRIDGE, of Kingsdown, in the city of Bristol, Iron Merchant, for the invention of "Certain improvements in paddle wheels or propellers of steam ships."

2734. And to ALFRED VINCENT NEWTON, of the Office for Patents, No. 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for the invention of "An improved mode of treating india rubber, gutta percha, and analogous gums."—A communication from abroad by George August Engelhard and Horace Hollister Day, of New York, in the United States of America.

On their several petitions, recorded in the Office of the Commissioners on the 2nd day of December, 1859.

2736. To THOMAS HALL, of Ancoats Grove, in the city of Manchester, Foreman, for the invention of "Certain improvements in the construction of cartridges."

2738. To FRANCIS PALLING, of Esher Street, Lambeth, county of Surrey, Clerk, for the invention of "Improvements in the construction of lamps for burning oils and tallow."

2742. To PERCEVAL MOSES PARSONS, of Arthur Street West, London Bridge, in the county of Middlesex, Engineer, for the invention of "Improvements in fire arms and projectiles."

2744. And to JOHN RUDKIN, of the Slate Works, Groby, near Leicester, for the invention of "Improvements in stoppers for bottles."

On their several petitions, recorded in the Office of the Commissioners on the 3rd day of December, 1859.

2748. To JOHN HAWKINS, of Lisle Street, London, in the county of Middlesex, and of Walsall, in the county of Stafford, Bit, Spur, and Stirrup Manufacturer, and CHARLES HAWKINS, of Walsall aforesaid, Manager of the works of the said John Hawkins, for the invention of "Certain improvements in the construction of furnaces for consuming smoke, applicable to stationary and marine boilers, and other closed fire-places."

2752. To GEORGE FELDWICK, of St. Martin's Court, in the city of Westminster, Ironmonger, for the invention of "An improvement in roller blinds."

2754. And to WILLIAM HUTTON, of West Hartlepool, in the county of Durham, Gentleman, for the invention of "Improvements in preventing the destruction of the timbers of piers, docks, and other structures by the action of sea worms or other marine animals."

On their several petitions, recorded in the Office of the Commissioners on the 5th day of December, 1859.

2758. To CHARLES SELLS, of Stockwell, in the county of Surrey, Engineer, for the invention of "Improvements in marine steam engines for driving screw and other propellers."

2760. To JAMES JONES, Assistant Manager, and JOHN HILTON, Millwright, both of Rhodes, near Middleton, in the county of Lancaster, for the invention of "Improvements in apparatus to be used in dyeing, dunging, soaping, and clearing fabrics."

2764. And to FERDINAND POTTS, of the firm of F. Potts and Co., Patent Tube Manufacturers, of Birmingham, in the county of Warwick, for the invention of "Improvements in the mode of manufacturing or finishing tubes for certain purposes."

On their several petitions, recorded in the Office of the Commissioners on the 6th day of December, 1859.

2765. To FREDERICK LEVICK, of Blaina Cwm Celyn and Coalbrook Vale Iron Works, in the county of Monmouth, Iron Master, for the invention of "A new or improved coke oven."

2767. To James Anderson, of Newton, in the county of Ayr, North Britain, for the invention of "Improvements in obtaining motive power."

2768. To Thomas Bradford, of Manchester, in the county of Lancaster, Machinist, for the invention of "Certain improvements in machinery or apparatus for wringing and mangling textile fabrics."

2769. To Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for the invention of "Improvements in marine steam engines for driving screw and other propellers, and in screw propellers."—A communication from abroad by Nicolas Hippolyte Labrouse, of Paris.

2770. To Frederick William Schäfer, of the firm of P. and F. Schäfer, of Brewer Street, in the county of Middlesex, Manufacturers, for the invention of "Improvements in cash, deed, jewel, and other boxes."

2771. To Robert Hanham Collyer, of 8, Alpha Road, Saint John's Wood, in the county of Middlesex, M.D. and Ph. D., for the invention of "A chemical ink-pencil or composition applicable as an instrument or means for writing, drawing, and marking."

2772. To Moritz Jacoby, of Nottingham, for the invention of "Improvements in the manufacture of twist lace."

2773. To Thomas Richards Harding, of Leeds, in the county of York, Hackle Pin Manufacturer, for the invention of "Improvements in combs or hackles for combing, carding, or hackling flax, cotton, silk, or other fibrous materials (which are also applicable to raising the nap or pile of woollen or other cloths), and in the making of pins or teeth for such combs or hackles."

2775. To Charles Constant Simonet de Changy, of Boulogne-sur-Mer, in the empire of France, for the invention of "Improvements in the manufacture of bread, which improvements are also applicable in the preparation of dough or paste for other purposes."

2776. To Joseph Mabbott, of No. 7, Sunbury Terrace, Liverpool Road, in the county of Middlesex, for the invention of "Improvements in windguards for chimnies."

2777. And to Robert Thomson Pattison, residing at Daldorch House, in the county of Ayr, in Scotland, for the invention of "Improvements in printing and dyeing certain woven fabrics and yarns."

On their several petitions, recorded in the Office of the Commissioners on the 7th day of December, 1859.

2778. To William Spence, of 50, Chancery Lane, in the county of Middlesex, Patent Agent, for the invention of "Improvements in rotating harrows."—A communication from abroad by Sidney S. Hogle, of Cleveland, in the county of Cuyahoga, and state of Ohio, United States.

2779. To John Gay Newton Alleyne, of Butterley Iron Works, Alfreton, in the county of Derby, for the invention of "Improvements in the manufacture of boilers, ships, tanks, and other hollow vessels of iron and steel."

2780. To John Arrowsmith, of Bilston, in the county of Stafford, Engineer, for the invention of "A new or improved method of constructing land batteries and gun boats."

2781. To John Arrowsmith, of Bilston, in the county of Stafford, Engineer, for the invention of "Improvements in the manufacture of beams or girders, and in machinery and furnaces used in the said manufacture."

2783. To Robert Gray, of Sheffield, in the county of York, Wire Drawer and Crinoline Steel Manufacturer, and Thomas Houghton Scholfield, of the same place, Manager, for the invention of "Improvements in flattening and tempering steel wire and sheet steel, and also in the tubes employed in the furnaces."

2784. To Thomas Crook, of Bolton-le-Moors, in the county of Lancaster, Jacquard Card Maker, for the invention of "Improvements in machinery or apparatus for making paper bags."

2785. To William Prosser and John Hogg, both of Witton Park, Darlington, in the county of Durham, for the invention of "An improved cooking apparatus particularly suitable for military purposes."

2786. To John Norris, junior, of Birmingham, in the county of Warwick, Manufacturer, and Thomas Till, of Birmingham Heath, in the same county, Engineer and Machinist, for the invention of "Improvements in machinery to be used in manufacturing horse-nails and other wrought nails."

2787. To Frederick Henry Elliott and Charles Alfred Elliott, of the Strand, in the city of Westminster, Mathematical Instrument Makers, for the invention of "An improved method of preventing drawing boards and other flat wooden surfaces from warping or twisting, and of adding to the strength thereof."

2788. To Augustus Rumpff, of the firm of Weintraud, Rumpff, and Company, of King Street, Cheapside, in the city of London, Manufacturers, for the invention of "An improved fastening for portemonnaies, portfolios, bags, and other like articles."—A communication from abroad by C. Weintraud the younger, of Offenbach.

2789. To John Macintosh, of 40, North Bank, Regent's Park, in the county of Middlesex, for the invention of "Improvements in the manufacture of waterproof and other fabrics, and of moulded or formed articles."

2790. To John Macintosh, of 40, North Bank, Regent's Park, in the county of Middlesex, for the invention of "Improvements in setting artificial teeth."

2791. And to John Macintosh, of 40, North Bank, Regent's Park, in the county of Middlesex, for the invention of "Improvements in cartridges and projectiles."

On their several petitions, recorded in the Office of the Commissioners on the 8th day of December, 1859.

2792. To William Boaler, of No. 76, Cedar Street, New York, in the United States of America, Merchant, for the invention of "An improved compound for washing purposes."

2793. To JOHN LAWSON, of Glasgow, in the county of Lanark, North Britain, Designer, and WILLIAM HAGO, of the same place, Clockmaker, for the invention of "Improvements in apparatus to be used in spinning or twisting."

2794. To JOEL SPILLER, of Cardiff, in the county of Glamorgan, Wales, Civil Engineer, for the invention of "Improvements in articles or bodies formed of plastic clay."

2795. To JOHN TENWICK, of Clarendon Street, (Albion Foundry,) Portsmouth, Hampshire, for the invention of "Improvements in the construction of steering apparatus adapted for ships and such like navigable vessels."

2796. To HESKETH HUGHES, of Homerton, in the county of Middlesex, Engineer, and JOHN MOORE, of Manchester, in the county of Lancaster, Manufacturer, for the invention of "Improvements in machinery for transferring and for transferring and engraving designs and figures on to cylindrical and flat surfaces."

2797. To JOHN DEARMAN DUNNICLIFF, of Nottingham, for the invention of "An improvement in the manufacture of bonnet fronts and ruches."

2798. To WILLIAM BETTS, of Wharf Road, City Road, in the county of Middlesex, Capsule Manufacturer, for the invention of "An improved manufacture of capsules."

2799. And to JAMES THOMSON, ROBERT THOMSON, and HENRY THOMSON, all of Buckden, in the county of Huntingdon, for the invention of "An improved agricultural implement."

On their several petitions, recorded in the Office of the Commissioners on the 9th day of December, 1859.

2800. To RUDOLPH HEILMAN, of the city of Manchester, in the county of Lancaster, Manufacturing Chemist, for the invention of "The preparation of a new colour, called Azaleine, and its applications to dyeing and printing."—A communication from Jean Gerber Keller, of Mullhouse, in the empire of France, a foreigner residing abroad.

2801. To FREDERICK CRACE CALVERT and CHARLES LOWE, both of the city of Manchester, in the county of Lancaster, Analytical Chemists, for the invention of "Improvements in dyeing and printing certain yarns and fabrics."

2802. To GEORGE DAVIES, of No. 1, Serle Street, Lincoln's Inn, in the county of Middlesex, and No. 28, St. Enoch Square, in the city of Glasgow, Civil Engineer and Patent Agent, for the invention of "An improvement in tobacco pipes, mouthpieces, and cigar or cigarette holders."—A communication from abroad by Messrs. Viney, Sommer, and Hamm, all of Paris, France.

2803. To WILLIAM HORTON, of Smethwick, in the county of Stafford, Boiler and Gas Holder Manufacturer, for the invention of "An improvement or improvements in steam boilers."

2804. To CHARLES GAMMON, of No. 9, Cloak Lane, in the city of London, Solicitor, for the invention of "An improved fastener for gloves and other articles."

2805. To JAMES FARQUHAR, of the city and county of Aberdeen, North Britain, Clerk, for the invention of "Improvements in gas meters."

2806. To WILLIAM WHITELEY, of Lockwood, near Huddersfield, in the county of York, Machinist, for the invention of "Improvements in looms for weaving."

2807. To JOHN CHATTERTON, of 19, Wharf Road, City Road, in the county of Middlesex, Lead Manufacturer, for the invention of "Improvements in the manufacture of projectiles."

2808. To ISAAC LOWTHIAN BELL, of the Washington Chemical Works, Newcastle-upon-Tyne, for the invention of "Improvements in the manufacture of the sulphate of magnesia."

2809. To. JOHN CHATTERTON, of Highbury Terrace, and WILLOUGHBY SMITH, of Pownall Road, Dalston, both in the county of Middlesex, for the invention of "Improvements in insulating telegraphic conductors, and in the treatment of gutta percha."

2810. To SAMUEL WILLIAM CAMPAIN, of Deeping Saint Nicholas, in the county of Lincoln, Farmer, for the invention of "Improved machinery for removing or elevating straw and other agricultural produce."

2811. To WILLIAM WINGFIELD BONNIN (British subject) and FRANCIS PONS (Sardinian subject), both of Genoa, Italy, for the invention of "A new system and improvements in locomotive engines."

2812. And to DAVID STICKLAND, of Hayle, in the county of Cornwall, Mine Agent, for the invention of "An apparatus for separating, sifting, sorting, and cleansing mineral ores."

On their several petitions, recorded in the Office of the Commissioners on the 10th day of December, 1859.

2813. To RICHARD EMERY, of No. 6, Kings Street, St. James' Square, in the city of Westminster and county of Middlesex, for the invention of "Improvements in carriages for common roads."

2814. To JOHN ROBERT BRECKON, of Darlington, in the county of Durham, Accountant and Colliery Manager, and ROBERT DIXON, of Crook, in the said county of Durham, Mechanical Engineer, for the invention of "Improvements in the construction of coke ovens."

2815. To PRINCE GUSTAVE GENNERICH, of Poland, at the British and Foreign Office for Patents, No 1B, Welbeck Street, Cavendish Square, in the county of Middlesex, for the invention of "A new system of motive power, applicable for working cranes and wheels."

2816. To THOMAS STATHER, of Kingston-upon-Hull, Engineer, for the invention of "Improvements in the ventilation of buildings, ships, and other enclosed places."

2817. To PATRICK STIRLING, of Kilmarnock, in the county of Ayr, North Britain, for the invention of "Improvements in traction engines."

2818. To GEORGE CHURCHILL WATSON, of the city of Chester, Physician, for the invention of "Novel and artistic bricks or 'lumps' for the reception, growth, and propagation of ferns, mosses, and other plants."

2819. To GEORGE LOUGH, of Flemington, North Melburn, Victoria, Australia, for the invention of "An improved compound motive power engine."

2820. To GEORGE HANDSON ROLLET, of Liverpool, in the county of Lancaster, Engineer, for the invention of "An improved machine for the manufacture of pressed bullets."

2821. To WILLIAM CLAY, of Liverpool, in the county of Lancaster, Iron and Steel Manufacturer, for the invention of "An improved mode of manufacturing cannon and other ordnance."

2822. To JOHN RAPHAEL ISAAC, of Liverpool, in the county of Lancaster, Draughtsman, for the invention of "Improvements in the construction of hand-boxes for travellers."

2823. To JOHN BAILEY, of Dunstable, for the invention of "Improvements in the manufacture of corsets and stays."

2824. And to WILLIAM TEALE, of Wakefield, in the county of York, Grease Manufacturer, for the invention of "Improvements in treating fatty and oily matters obtained from wash waters." — A communication from abroad by Mons. Kirsch, of Aix la Chapelle, in the kingdom of Prussia.

On their several petitions, all recorded in the office of the Commissioners on the 12*th day of December*, 1859.

2825. To CALEB VINALL, House Decorator, of 25, Walton Street, Brompton, in the county of Middlesex, for the invention of "Improvements in, and mechanism for, retaining the rollers of window blinds, maps, charts, and other articles requiring to be wound on rollers."

2826. To THEOPHILUS REDWOOD, of 19, Montague Street, Russell Square, in the county of Middlesex, for the invention of "Improvements in the manufacture of paper and of substances used in paper making, and for other purposes."

2827. To GEORGE WITHERS, Engineer and Machinist, of West Bromwich, in the county of Stafford, for the invention of "Certain improvements in blocks for moulding and shaping glass during the process of blowing or forming glass, for blowing sheet glass, glass shades, and such like articles."

2828. To JOHN ROBERT JOHNSON, of Hammersmith, and JOHN STAINES ATKINSON, of Red Lion Square, both in the county of Middlesex, for the invention of "Improvements in machinery for manufacturing printing types."

2829. To WILLIAM HARDING, of Rutland Terrace, Forest Hill, in the county of Kent, for the invention of "Improvements in breech loading fire-arms and in cartridge carriers."

2830. To JOHN BARLING, of Belle Grange, in the county of Lancaster, Gentleman, for the invention of "Improvements in propelling vessels."

2831. To WILLIAM ROBINSON, of Wembdow, Bridgewater, in the county of Somerset, Brewer, for the invention of "Improvements in cask washing machines."

2833. And to JAMES HILL DICKSON, of Commercial Street, Rotherhithe, in the county of Surrey, Machine Maker, for the invention of "Improvements in the manufacture of yarns and in the machinery to be employed in the preparation of certain fibres to be thus manufactured into yarns."

On their several petitions, recorded in the Office of the Commissioners on the 13*th day of December*, 1859.

2835. To WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "A heating apparatus for boots and shoes and other coverings for the feet." —A communication from abroad by Messrs. Bibet, Leger, and Faury, of 29, Boulevart St. Martin, Paris, Merchants.

2837. To JAMES CHAMPION, of the city of Manchester, in the county of Lancaster, Machine Maker, for the invention of "Certain improved arrangements of spindles, flyers, and bobbins, applicable to machinery or apparatus for preparing, spinning, and doubling fibrous materials."

2839. To GEORGE LEACH, of Britannia Mills, Leeds, in the county of York, Yarn Spinner and Cloth Manufacturer, for the invention of "An improved mode of and apparatus for oiling, preparing, and mixing wood."

2841. To RAMSEY LAWSON, of Manchester, in the county of Lancaster, Engineer, for the invention of "Certain improvements in machinery or apparatus for punching patterns or devices upon metallic printing rollers or cylinders."

2843. To JOSEPH RHODES, of Wakefield, in the county of York, Engineer, for the invention of "Improvements in steam hammers."

2845. To WILLIAM WATSON, of Leeds, in the county of York, Manufacturing Chemist, for the invention of "An improvement in preparing indigo for dyeing and other purposes."

2847. And to WILLIAM ROBINSON CROCKER, of Northumberland Street, Strand, in the county of Middlesex, for the invention of "Improvements in cutting corks and bungs, and in apparatus employed therein."

On their several petitions, recorded in the Office of the Commissioners on the 14*th day of December*, 1859.

2851. To BARTOLOMMEO PREDAVALLE, of Bloomsbury Street, Bloomsbury Square, in the county of Middlesex, Civil Engineer, for the invention of "Improvements in producing or obtaining motive power."

2853. To WILLIAM WESTWOOD, of No. 43, West Square, in the borough of Southwark, in the county of Surrey, Coal Merchant, for the invention of "Improvements in the manufacture and burning of Portland cement."

2855. To JAMES KELITA HARDY, of Fenchurch Street, in the city of London, Merchant, for the invention of "Improvements in the manufacture of bottle stands."

2857. To CHARLES HANCOCK, of West Street, West Smithfield, in the city of London, Gutta Percha Manufacturer, for the invention of "Improvements in insulating telegraphic conductors, and manufacturing cables for telegraphic purposes."

2859. And to DANIEL JOSEPH FLEETWOOD, of Birmingham, Copper Agent, for the invention of

"Improvements in machinery for raising and stamping metal."

On their several petitions, recorded in the Office of the Commissioners on the 15th day of December, 1859.

Inventions protected for Six Months by the Deposit of a Complete Specification.

Notice is hereby given, that the petition of

2873. THADDEUS FAIRBANKS, of St. Johnsbury, in the county of Caledonia, and state of Vermont, of the United States of America, praying for Letters Patent for the invention of "An improved scale for weighing letters," was deposited and recorded in the Office of the Commissioners on the 17th day of December, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

Notice is also hereby given, that the petition of

875. MATHEW WRIGHT, 17, Gracechurch Street, London, praying for Letters Patent for the invention of "Fastening packing cases by which they cannot be opened without such opening being detected, and termed by me 'detective fastening for packing cases,'" was deposited and recorded in the Office of the Commissioners on the 17th day of December, 1859, and a complete specification accompanying such petition was at the same time filed in the said office.

And Notice is also hereby given, that the petition of

2896. JOSEPH WILLCOCK, Mechanical Draughtsman, of 89, Chancery Lane, London, praying for Letters Patent for the invention of "A new and improved machine for cutting or mincing meat, vegetables, &c."—a communication from abroad by Albert W. Hale, of New Britain, state of Connecticut, United States of America—was deposited and recorded in the Office of the Commissioners on the 20th day of December, 1859, and a complete specification accompanying such petition was at the same time filed in the said Office.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

23rd December, 1859.

1520. GEORGE REDRUP, of the Loughborough Brewery, Loughborough, in the county of Leicester, Brewer, for an invention of "Machinery for the cutting of shives, bungs, corks, spiles, and vent or other pegs."—Dated 24th June, 1859.

1526. CHARLES WYE WILLIAMS, of Liverpool, in the county of Lancaster, for an invention of "Improvements in steam boilers."—Dated 25th June, 1859.

1532. ROBERT DICK, of the city of Toronto, in the county of York and province of Canada, for an invention of "Keeping accounts current in printed form, for addressing cards, circulars, papers, and periodicals of all kinds, with great rapidity, by the aid of a very simple machine, which is a constituent part of this invention."—Dated 27th June, 1859.

1541. JOHN MARIA JOSEPH BAILLIE, of No. 15, St. Mary Axe, in the city of London, for an invention of "A new process for tanning hides and skins."—A communication from Monsieur A. Paulmier, resident at Paris, in the empire of France.—Dated 28th June, 1859.

1545. WILLIAM WRAY snd JOHN WRAY, both of Leeming, near Bedale, Yorkshire, for an invention of "Certain improvements in reaping machines."—Dated 29th June, 1859.

1549. WILLIAM JOHN THOMPSON WILLIAMSON, of 37, Gerrard Street, Soho, in the county of Middlesex, for an invention of "Improvements in gas burners."—Dated 29th June, 1859.

1557. RICHARD ARCHIBALD BROOMAN, of 166, Fleet Street, in the city of London, E.C., Patent Agent, for an invention of "Improvements in lithographic and chromolithographic presses."—A communication from abroad by Jean Théodore Dupuy, of Paris.—Dated 30th June, 1859.

1567. BRIDGE STANDEN, of Salford, in the parish of Manchester and county of Lancaster, Chymist, for an invention of "Improvements in the deodorizing and separation of fecal and putrescent organic matters, in the preparation or manufacture therefrom of a portable artificial manure or fertilizing compound, and in apparatus to be employed in such preparation or manufacture."—Dated 1st July, 1859.

1579. ROBERT WHITESIDE MORVILLE, of Pendleton, Salford, in the county of Lancaster, late of the United States, Engraver, for an invention of "Improvements in mechanism, or arrangements for suspending and securing window sashes."—A communication from abroad by Porter A. Gladwin, of Pawtucket, Rhode Island, United States.—Dated 2nd July, 1859.

1601. JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "An apparatus for washing wool manufactured or not, and all other matters."—A communication from abroad by Eugène Pasquier, No. 10, Rue Mogador, Paris, in the empire of France,—Dated 6th July, 1859.

1656. WILLIAM AUGUSTUS MUNN, of Thrawley House, near Feversham, in the county of Kent (late a Major in the East Kent Militia), a Deputy Lieutenant and Justice of Peace for the said county of Kent, for an invention of "Improvements in reaping machines."—Dated 13th July, 1859.

1761. Christopher Kingsford, of Seaton, near Wingham, in the county of Kent, Civil Engineer, for an invention of "Improvements in the preparation of peat and charcoal for fuel, in the manufacture of coke therefrom, and in the machinery and apparatus employed for effecting the same."—Dated 15th July, 1859.

1735. John Henry Johnson, of 47, Lincoln's Inn Fields, in the county of Middlesex, and of 166, Buchanan Street, in the city of Glasgow, North Britain, Gentleman, for an invention of "Improvements in slide valves for steam engines."—A communication from abroad by Richard C. Bristol, of Chicago, United States of America.—Dated 26th July, 1859.

1781. William Edward Newton, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "An improvement applicable to salinometer cases for steam boilers."—A communication from abroad by Joseph Grice, of New York City, in the United States of America.—Dated 1st August, 1859.

2423. Francis North Clerk, of the firm of Peyton and Clerk, of Birmingham, in the county of Warwick, Edge Tool Manufacturers, and Charles Thomas, of Birmingham aforesaid, Foreman of Works, for an invention of "Improvements in cleavers or choppers." — Dated 22nd October, 1859.

2445. John Zuill Kay, of Dundee, in the county of Forfar, North Britain, Gas Engineer, for an invention of "Improvements in gas meters, and in apparatus for maintaining or preserving the levels of liquids."—Dated 26th October, 1859.

2511. Louis Koch, Engineer, of New York, in the United States of America, for an invention of "A moving tread power." — Dated 4th November, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 21st December*, 1859, *inclusive.*)

19th December.

3029. William Henry Stratton, of 179, Lambeth Walk, Lambeth, Tobacconist, for an invention of "Improvements in the fire door of furnaces."—Dated 22nd December, 1856.

3030. James Redgate, Edwin Ellis, and John Cropper, of Nottingham, for an invention of "Improvements in bobbin net or twist lace machinery."—Dated 22nd December, 1856.

3044. James Lark, of 5, Bridge Foot, Vauxhall Cross, in the county of Surrey, for an invention of "Improvements in kilns for burning materials in the manufacture of lime and cements."—Dated 23rd December, 1856.

3054. William Taylor, of Nottingham, Manufacturing Stationer, for an invention of "Improvements in producing various ornamental effects upon fabrics, paper, and other surfaces."—Dated 24th December, 1856.

21st December.

3023. William James Payne, Brass Founder, 119, Waterloo Road, Lambeth, in the county of Surrey, for an invention of "Certain improvements in casting and finishing cocks for general purposes."—Dated 22nd December, 1856.

3028. Thomas Lyon Thurlow, of Baynard's Park, in the county of Surrey, Esquire, for an invention of "Improvements in reaping-machines."—Dated 22nd December, 1856.

3034. William Beckett Johnson, of Altrincham, in the county of Chester, Manager for Messrs. Ormerod and Son, Engineers, Manchester, for an invention of "Improvements in steam engines and apparatus connected therewith." — Dated 22nd December, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 21st December*, 1859, *inclusive.*)

19th December.

1127. John Roydes, of Greengate, near Rochdale, in the county of Lancaster, Cotton Carder, for an invention of "Improvements in machinery or apparatus for drawing cotton and other fibrous substances."—Dated 21st December, 1852.

20th December.

1121. George Beadon, of Creechbarrow, near Taunton, in the county of Somerset, now of St. Mary's, Scilly, Commander in the Royal Navy, for an invention of "Improvements in constructing and propelling ships and vessels."—Dated 21st December, 1852.

21st December.

1180. William Busfield, of Bradford, in the county of York, Overlooker to Messrs. Waud and Company, of the same place, for an invention of "Improvements in apparatus for combing wool and other fibrous substances requiring like process."—Dated 28th December, 1852.

Erratum in Journal of 16th December.

2729. For "Bradson" read "Brabson."

FOREIGN PATENTS.

FRANCE.

CURRENT LIST of PATENTS of Invention and Certificates of Addition.

1859.

(Communicated by His Excellency the Minister of Agriculture, Commerce, and Public Works.)

NOTE.—The duration of a Patent is fifteen years, except where determined by that of a previously existing foreign Patent.*

42,051. BAJARD, son, of Rive de Gier, département de la Loire, for "Handles of shovels."—Dated 9th September, 1859.

42,052. BARON, of 16, Rue des Glandèves, Marseille, for "An apparatus for stoppering bottles."—Dated 3rd September, 1859.

42,053. BRESSANT, of 1, Rue des Clefs, Avignon, for "A product called 'Rhamnoxatnine garancine.'"—Dated 2nd September, 1859.

42,054. BURT, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A mechanism for facilitating the removal of railway carriages by hand."—Dated 2nd September, 1859.

42,055. CHEVILLARD and MARTIN, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for puncturing designs."—Dated 3rd September, 1859.

42,056. CLAUZEL, of 20, Rue du Petit Saint Jean, Marseille, for "Apparatus for the manufacture of oil."—Dated 3rd September, 1859.

42,057. COLLYER, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in preparing substances for the manufacture of paper."—Dated 2nd September, 1859.—(English, 2nd March, 1859.)

42,058. COPPÉE, represented by Picard, of 7, Rue St. Jean, Montmartre, département de la Seine, for "Washing coal."—Dated 1st September, 1859.

42,059. CROUTTE, of St. Aubin-le-Cauf, département de la Seine Inférieure, for "A chronodometer or instrument for measuring the speed attained and distance travelled over in a given time."—Dated 6th September, 1859.

42,060. DERENNE, of Marly, département du Nord, for "A machine for screw-cutting bolts, screw-rings, &c. by the hot process."—Dated 5th September, 1859.

42,061. DUBIED, of Mulhouse, département du Haut-Rhin, for "An arrangement for utilizing the waste gas of fire-places."—Dated 7th September, 1859.

42,062. DUFOUR, of 37, Rue de Sèvres, Vaugirard, département de la Seine, for "A machine for moulding bricks."—Dated 3rd September, 1859.

42,063. DUPONT, of Frossay, département de la Loire Inférieure, for "Making grits absorb steam."—Dated 9th September, 1859.

42,064. DUTRAIT, with Ginon, of Rue Bât d'Argent, Lyon, for "Conglomerating and unsulphuring coal, and facilitating its combustion."—Dated 3rd September, 1859.

42,065. FERRY, of 21, Trottoir Stanislas, Nancy, for "A machine for cutting out and stamping medicinal and other pastilles on both sides."—Dated 9th September, 1859.

42,066. FONTENAY, of 1, Rue des Récollets, Grenoble, département de l'Isère, for "A smoke-consuming fire-place with a reversed fire for locomotives, fixed steam engines, furnaces, &c."—Dated 3rd September, 1859.

42,067. GITTON-LEFRANC, of Carrefour Jouaust, Rennes, département d'Ille-et-Vilaine, for "Manufacture of woven merinos of dyed wool."—Dated 11th July, 1859.

42,068. GOSSOT, of Epinac, département de Saône-et-Loire, for "An alembic with compartments for distilling bituminous schist."—Dated 8th September, 1859.

42,069. GUIBAL, of 40, Rue Vivienne, Paris, for "Improvements in the manufacture of caoutchouc articles."—Dated 3rd September, 1859.

42,070. HARINKOUCK and CUVILLIER, of Roubaix, département du Nord, for "A kind of tissue."—Dated 8th September, 1859.

42,071. JOSEPH and MARÉ, of Bogny-sur-Meuse, département des Ardennes, for "Manufacture of bolts by means of presses and a turning machine."—Dated 8th September, 1859.

42,072. LAURENT, of 81, Quai d'Orléans, au Havre, département de la Seine Inférieure, for "A kind of eye-glasses applicable to magnifying instruments, called 'Platoscopic eye-glasses.'"—Dated 5th September, 1859.

42,073. MARTIN and COUTILLAC, of 33, Rue de Lormont, Bordeaux, for "An instantaneous railway break."—Dated 8th September, 1859.

42,074. MAYER, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in pincers for leading packages."—Dated 3rd September, 1859.

42,075. MOISELET, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in machines for making lace, twist, &c."—Dated 2nd September, 1859.

42,076. PAULIN and CHEVALIER, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in manufacturing and ornamenting

* For the French Patent Law see No. 228 of this Journal.

articles of jewellery."— Dated 3rd September, 1859.

42,077. De Préseau, of Ecuelin, département du Nord, for "An apparatus for distributing liquid manure."—Dated 5th September, 1859.

42,078. Prevosté, of Ham, département de la Somme, for "A cylinder-press for sugar works." —Dated 7th September, 1859.

42,079. Richard, of 18, Rue Petit-Paradis, Avignon, for "Protecting iron from oxidation by means of cement."—Dated 3rd September, 1859.

42,080. Salesse, of Oullins, département du Rhône, for "Rendering iron or metal elastic for all kinds of seats and mattresses."—Dated 8th September, 1859.

42,081. Schlenker and Dams, represented by Brandon, of 7, Rue des Moulins, Paris, for "A rotary forge hammer."— Dated 3rd September, 1859.—(American Patent, 29th March, 1859.)

42,082. Touzan, of 38, Avenue de Clichy, Batignolles, département de la Seine, for "Indicating signals for carriages, omnibuses, railway stations, and carriages."—Dated 3rd September, 1859.

42,083. Valla, of Dardilly, département du Rhône, for "Tower-clocks with pneumatic clock-work."— Dated 10th September, 1859.

42,084. Baudin, of 4, Rue des Barreaux, Troyes, département de l'Aube, for "A kind of gloves with widened ruffles."—Dated 12th September, 1859.

42,085. Brade, of 22, Rue Ste. Anne, Paris, for "Improvements in purifying oil and other fat substances."—Dated 5th September, 1859.

42,086, Chemery, of Sedan, département des Ardennes, for "Regulating the course of cloth in gin."—Dated 12th September, 1859.

42,087. Clavières, of 82, Rue Blanche, Paris, for "A steam locomotive with free direction for propelling railway-carriages on tramways on a level with common roads." — Dated 3rd September, 1859.

42,088. Delachaise, of 13, Rue d'Ossaris, Lyon, for "Manufacture of pipes from artificial substances, and apparatus belonging thereto." — Dated 9th September, 1859.

42,089. Doublet, of 172, Rue du Faubourg St. Martin, Paris, for "Applying iron to cast-iron and cast-iron to iron."—Dated 5th September, 1859.

42,090. Duchêne, of Vouziers, département des Ardennes, for "Two safety-bridles."—Dated 12th September, 1859.

42,091. Edwards, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in stacking or holding biscuit, fayence, porcelain and glossed ware for firing."—Dated 5th September, 1859.—(English Patent, 1st March, 1859.)

42,092. Fafeur, Brothers, of Carcassonne, département de l'Aube, for "A system of wine pump."— —Dated 14th September, 1859.

42,093. Gaillard, of St. Pierre-lès-Calais, département du Pas-de-Calais, for "A bar-loom for the manufacture of veils, shawls, &c., and embroidering those articles without seams." — Dated 10th September, 1859.

42,094. Goguelat, of Mestras, département de la Gironde, for "Preserving the pulp of raw tomatoes in tablets and powder, and syrup extracted from said pulp."—Dated 10th September, 1859.

42,095. Graham, represented by Darnis, of 36, Rue de l'Echiquier, Paris, for "A traction-engine."— Dated 5th September, 1859.

42,096. Hamoir, of Saultain, département du Nord, for "A metal nave-box for carriage wheels."— Dated 15th September, 1859.

42,097. Harmegnies, Dumont, and Company, of Anzin, département du Nord, for "Seams of flat cords of flax and aloes."—Dated 15th September, 1859.

42,098. Knowles, of Calais, for "Improvements in the manufacture of iron and steel, and in purifying or refining cast-iron for mouldings."—Dated 10th September, 1859.

42,099. Lamb, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in apparatus for superheating steam."—Dated 5th September, 1859.

42,100. Lebée and Rousseau, of 3, Rue St. Fiacre, Paris, for "A kind of tournure."—Dated 6th September, 1859.

42,101. Mahieu, of Cappelle, département du Nord, for "A machine for sowing seeds and distributing manure-powder."— Dated 15th September, 1859.

42,102. Marceille and Ferret, of Toulouse, département de la Haute-Garonne, for "An iron electric battery."—Dated 12th September, 1859.

42,103. Miramon, of 8, Rue St. Jean Baptiste, St. Etienne, département de la Loire, for "Manufacture of velvet in double pieces on Jacquard looms." —Dated 12th September, 1859.

42,104. Moyon, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A break for omnibuses, carriages, and carts."—Dated 6th September, 1859.

42,105. Nivelle, son, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in sewing machines."—Dated 3rd September, 1859.

42,106. Paulvé, domiciled with Laborde, of 24, Rue du Vieux Colombier, Paris, for "A kind of chaff-cutting machine."—Dated 5th September, 1859.

42,107. Perroncel, of 218, Rue du Faubourg St. Martin, Paris, for "Manufacture of dancing puppets or toys, and small rough models for painters and sculptors from caoutchouc and gutta percha."—Dated 5th September, 1859.

42,108. Pimont, of 55, Rue Impériale, Rouen, for "Means of removing and preventing incrustations of pipes, boilers, and other apparatus."—Dated 12th September, 1859.

42,109. Planche, of Champdieu, département de la Loire, for "A mechanism, called 'Alarum-tin-box."—Dated 12th September, 1859.

42,110. Plassin, of 110, Rue du Faubourg St. Martin, Paris, for "A rotary steam engine worked

by superheated steam."—Dated 5th September, 1859.

42,111. Roper and Need, of St. Pierre-lès-Calais, département du Pas-de-Calais, for "Manufacture of embroidered tulle without seams, by means of machinery."—Dated 3rd September, 1859.

42,112. Serve and Coulouvrat, of Rue des Servettes, Givors, département du Rhône, for "A tool, called 'French bit.'"—Dated 10th September, 1859.

42,113. Tonnier, represented by Bresson, of 57, Rue de Bretagne, Paris, for "A dynamometer for measuring the strength of cloth."—Dated 5th September, 1859.

42,114. Vaudaux, of 21, Rue de Hanovre, Paris, for "A rubbing surface with a base of metal sulphuret, for lighting matches."—Dated 6th September, 1859.

42,115. Vicars, Father and Son, Ashmore and Smith, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Improvements in the manufacture of bread, biscuit, ginger-bread, and other similar articles, and also in ovens, kneading-machines, and other apparatus used thereat."—Dated 6th September, 1859.—(English Patent, 13th May, 1859.)

42,116. Ward, represented by Tolhausen, of 35, Boulevart Bonne-Nouvelle, Paris, for "Day and night maritime signals for conveying all kinds of messages."—Dated 6th September, 1859.

42,117, Aubert, represented by Lenormand, of 24, Rue St. Pierre Amelot, Paris, for "A kind of shaving brush."—Dated 7th September, 1859.

42,118. Bassett and Bateman, represented by Yapp, of 6, Rue Montpensier, Paris, for "Improvements in machines for making bolts and rivets."—Dated 6th September, 1859.

42,119. Bauzemont, of 85, Rue du Faubourg St. Honoré, Paris, for "A moveable scouring washing-machine with free beaters."—Dated 8th September, 1859.

42,120. Billiet, sen., of Fruges, département du Pas-de-Calais, for "Applying soft substances to the ends of clay smoking-pipes for preventing them from being worn out."—Dated 14th September, 1859.

42,121. Bloch, of Metz, département de la Moselle, for "A substance being a substitute for fancy silk."

42,122. Brianchon, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Means of ornamenting metals, porcelain, and other surfaces."—Dated 8th September, 1859.

42,123. Collet, Brothers, of 40, Place Impériale, Lyon, for "Improvements in photography."—Dated 12th September, 1859.

42,124. Croutte, of St. Aubin-le-Cauf, département de la Seine Inférieure, for "Improvements in clock work."—Dated 14th September, 1859.

42,125. Daumézon and Deschamps, of Nîmes, for "A design for economizing stuff in the manufacture of poplin."—Dated 13th September, 1859.

42,126. Daux, of 27, Rue du Colisée, Paris, for "A process for manipulating plastic substances and peat."—Dated 8th September, 1859.

42,127. Delondre, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in the manufacture of orchal."—Dated 7th September, 1859.

42,128. Dugdale, of 100, Rue de Courcelles, Batignolles, département de la Seine, for "Improvements in the arrangement of fire-places for heating steam and other boilers."—Dated 9th September, 1859.

42,129. Duveaux, of 3, Rue Reymond, Lyon, for "A machine for embossing and embroidering fabrics."—Dated 13th September, 1859.

42,130. Godchaux, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in reproducing models for writing, &c."—Dated 8th September, 1859.

42,131. Laget, with Amédée Stafford, of 19, Rue St. Savournin, Marseille, for "An apparatus for irrigating by means of atmospheric air and steam."—Dated 10th September, 1859.

42,132. Larne, of 67, Rue St. Jacques, Paris, for "So-called 'Lithophene mastic' for steam and other joints,"—Dated 9th September, 1859.

42,133. Lavril, represented by Thirion, of 95, Boulevart Beaumarchais, Paris, for "A system of assembling pipes."—Dated 9th September, 1859.

42,134. Letillois, of 75, Rue du Temple, Paris, for "A ball-lamp with a pump."—Dated 6th September, 1859.

42,135. Luneau, of 21, Rue Palaprat, Toulouse, département de la Haute-Garonne, for "A copying press."—Dated 16th September, 1859.

42,136. Martin, of 80, Taitbout, Paris, for "A mechanical brush, called 'Clinocome' or 'Clinochete.'"—Dated 9th September, 1859.

42,137. Massenat, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Foot coverings with rivets and nuts."—Dated 9th September, 1859.

42,138. Massot, of 50, Cours Morand, Lyon, for "Spring-mattresses with a variable tension."—Dated 12th September, 1859.

42,139. Matignon, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in sewing machines."—Dated 7th September, 1859.

42,140. Moreau, of 4, Rue du Parc Royal, Paris, for "Special ornaments."—Dated 8th September, 1859.

42,141. Murphy, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of vulcanized compounds of vulcanizable gum."—Dated 9th September, 1859.—(English Patent, 9th August, 1855.)

42,142. Pellisier, of 4, Rue des Ayres, Bordeaux, for "A railway break."—Dated 15th September, 1859.

42,143. Rul, represented by Robyns, of 79, Rue de Vaugirard, Vaugirard, for "A steam apparatus, called 'Meischygene,' for preparing substances for steeping in distilleries, breweries, &c."—Dated 9th September, 1859.

42,144. Seynave, of Roubaix, département du Nord, for "Moveable metal reeds."—Dated 17th September, 1859.

42,145. Slawson, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Constructing cash-boxes."—Dated 7th September, 1859.

42,146. Strong and Ross, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in scales, balances, &c."—Dated 8th September, 1859.

42,147. Suc, of 8, Boulevart du Combat, Belleville, département de la Seine, for "A mixed balance."—Dated 9th September, 1859.

42,148. Tiget, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of large hollow materials of plastic or clay substances for all kinds of constructions, water-pipes, drains, &c."—Dated 7th September, 1859.

42,149. Wood, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in trusses."—Dated 8th September, 1859.—(English Patent, 30th July, 1859.)

42,150. Barret, of St. Bresson, département de la Haute Saône, for "A circular machine for making conical paper tubes for spinning."—Dated 17th September, 1859.

42,151. Bourdin and Serpette, the former of 2, Rue Bonne Louise, the latter of 13, Rue de l'Entrepôt, Nantes, département de la Loire Inférieure, for "Economical and simple casings of pistons in hydraulic presses."—Dated 12th August, 1859.

42,152. Canivet, of 50, Rue des Fossés-Neufs, Lille, for "A safety-lock, with combined eccentrics."—Dated 19th September, 1859.

42,153. Coulon, represented by Michaux. of Valenciennes, département du Nord, for "A steam engine."—Dated 21st September, 1859.

42,154. Donny, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Safety paper."—Dated 12th September, 1859.

42,155. Ermen, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Improvements in machines or apparatus for finishing thread."—Dated 13th September, 1859.

42,156. Fichet, represented by Perpigna, of 42, Rue Neuve St. Augustin, Paris, for "Rendering chests, &c. incombustible."—Dated 13th September, 1859.

42,157. Flécheelle, of 31, Rue Cadet, Paris, for "Hook horse-shoes."—Dated 10th September, 1859.

42,158. Fleming, represented by Courrouve, of 3, Rue de la Bourse, Paris, for "Improvements in candles for the purpose of indicating time."—Dated 12th September, 1859.—(English Patent, 31st August, 1859.)

42,159. Frezouls, of Souilhe, département de l'Aude, for "A plough."—Dated 20th September, 1859.

42,160. Hanon, of 49, Avenue de Clichy, Batignolles, département de la Seine, for "Applying gluten to the treatment of liquids, and especially beer."—Dated 12th September, 1859.

42,161. Harrison, represented by Mathieu, of 45 Rue St. Sébastien, Paris, for "Improvements in the construction of boilers."—Dated 13th September, 1859.—(English Patent, 30th April, 1859.)

42,162. Heindryckx, domiciled Hôtel l'Avocat, Place St. Martin, Lille, département du Nord, for "Railway chairs."—Dated 20th September, 1859.

42,163. Herguez, of 79, Rue de Vendôme, Lyon, for "A toy, called 'Puzzle.'"—Dated 15th September, 1859.

42,164. Herluison, of 61, Rue Malesherbes, Paris for "A match box."—Dated 13th September, 1859.

42,165. Jullion, represented by Brade, of 29, Rue Ste. Anne, Paris, for "Improvements in the manufacture of gelatine."—Dated 10th September, 1859.

42,166. Langlard and Hector, of Sarralbe, département de la Moselle, for "Trimming straw hats."—Dated 17th September, 1859.

42,167. Langlard and Hector, of Sarralbe, département de la Moselle, for "Improvements in the manufacture of cranked axles of steam-engines and other cranks."—Dated 12th September, 1859.—(English Patent, 7th February, 1859.)

42,168. Leterre, of St. Quentin, département de l'Aisne, for "An apparatus for preventing the effluvia of sewers."—Dated 20th September, 1859.

42,169. Marie, of 10, Rue St. Ferdinand, Ternes, département de la Seine, for "A machine for mowing or harvesting."—Dated 10th September, 1859.

42,170. Mennet, Possoz, David, and Troullier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A kind of petticoat."—Dated 10th September, 1859.

42,171. Meyrac, of Dax, département des Landes, for "Manufacture of bituminous mastic."—Dated 12th September, 1859.

42,172. Oulman, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Improvements in the manufacture of porte-monnaies, cigar-cases, and similar articles of leather."—Dated 12th September, 1859.

42,173. Parfitt, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "A machine for stamping the heads of bolts, rivets, screws, and other similar objects."—Dated 10th September, 1859.

42,174. Pelletier, Coulon, and Doulceron, represented by Michaux, of Valenciennes, département du Nord, for "A continuous lubricating cock."—Dated 21st September, 1859.

42,175. Périchon, jun., domiciled with Périchon, of 27, Rue de la Madeleine, Paris, for "A desk for pianofortes."—Dated 12th September, 1859.

42,176. Kay (Richard Dugdale), of Mulhouse, département du Haut-Rhin, for "Applying steam to tissues and thread of dyed cotton."—Dated 16th September, 1859.

42,177. Rondeau, of St. Jean-aux-Bois, département des Ardennes, for "A thrashing machine."—Dated 19th September, 1859.

42,178. Sonolet, of 46, Rue Jacob, Paris, for "A system of clack-valves, valves, shuttles, cocks, &c." —Dated 13th September, 1859.

42,179. Talbot, sen. and jun., of Caen, for "A machine for digging."—Dated 22nd September, 1859.

42,180. Thibaut de Ménonville, of Rambervillers, département des Vosges, for "A machine for drying fecula."—Dated 19th September, 1859.

42,181. Thibaut de Ménonville, of Rambervillers, département des Vosges, for "A machine for washing fecula."—Dated 19th September, 1859.

42,182. Berton, of Noisy-le-Sec, département de la Seine, for "A machine for utilizing centrifugal power."—Dated 13th September, 1859.

42,183. Cart, of 13, Rue de Reuilly, Paris, for "A moveable cylinder saw-mill."—Dated 14th September, 1859.

42,184. Casentini, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "A composition, called 'Hydroboron,' to be used in the manufacture of objects of plaster and other similar substances." —Dated 15th September, 1859.

42,185. Castell, represented by Yapp, of 6, Rue Montpensier, Paris, for "Improvements in purifying and treating gutta percha."—Dated 15th September, 1859.—(English Patent, 17th February, 1859.)

42,186. Chabert, jun., Carré, and Debourge, of 33, Rue des Jeûneurs, for "A kind of tissue."—Dated 15th September, 1859.

42,187. Chazelle, of 16, Rue Dauphine, Paris, for "A press for printing copper plates."—Dated 15th September, 1859.

42,188. Daniel, of 52, Rue Neuve St. Augustin Paris, for "A mode of guillosheeing and engraving colours, gilding, silvering, platinizing, and porcelain of enamelled crystal and baked clay."—Dated 15th September, 1859.

42,189. David, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "A machine for converting or conglomerating ores, pyrites, small coal or coke, into hollow or solid balls."—Dated 16th September, 1859.

42,190. Dupuy, represented by Ricordeau, of 23 Boulevart de Strasbourg, Paris, for "A chromolithographic press, with a double action."—Dated 15th September, 1859.

42,191. Engler and Krauss, represented by Guion, of 29, Boulevart St. Martin, Paris, for "A system of insulating telegraph wires."—Dated 15th September, 1859.

42,192. Evans, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in tubular steam-boilers, and in furnaces or fire-places applied thereto."—Dated 13th September, 1859.—(English Patent, 20th November, 1858.)

42,193. Gasné, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in shearing machines."—Dated 15th September, 1859.

42,194. Héroz, of 13, Rue St. Dominique, Paris, for "Manufacture of leather foot-coverings."—Dated 16th September, 1859.

42,195. Lhullier, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Manufacture of buttons with holes, &c."—Dated 15th September, 1859.

42,196. Litteau, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in the manufacture of buttons."—Dated 15th September, 1859.

42,197. Mallion, domiciled with Fillion, of 5, Rue Neuve, Lyon, for "A machine for making chenille."—Dated 28th July, 1859.

42,198. Marie, represented by Herpst, of 39, Rue de l'Echiquier, Paris, for "Improvements in apparatus for raising liquids by means of atmospheric pressure."—Dated 15th September, 1859.

42,199. Marly, of 43, Rue de Calais, Belleville, département de la Seine, for "Bleaching straw hats and all kinds of straw."—Dated 16th September, 1859.

42,200. Mézy, domiciled of Rue St. Honoré, Hôtel des Empereurs, Paris, for "Manufacture of leather, and applying the same to wigs."—Dated 13th September, 1859.

42,201. Mushet, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in metal alloys."—Dated 14th September, 1859.—(English Patent, 18th March, 1858.)

42,202. Mushet, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast steel."—Dated 14th September, 1859.—(English Patent, 18th March, 1859.)

42,203. Mushet, represented by Kirkpatrick, of 11, Rue Martel, Paris, for "Improvements in the manufacture of cast steel."—Dated 14th September, 1859.—(English Patent, 19th March, 1859.)

42,204. Nivière, of 40, Rue du Bac, Paris, for "Objects for encampments, bed-tents, kitchen-tents."—Dated 15th September, 1859.

42,205. Oppenheimer, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in metal pens and penholders."—Dated 14th September, 1859.

42,206. Ouvré, represented by Amouroux, of 333, Rue St. Martin, Paris, for "An apparatus for counting thread."—Dated 13th September, 1859.

42,207. Passedoit, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "An evaporating apparatus applicable as a smoke-box or back-fire in moveable engines."—Dated 13th September, 1859.

42,208. Pelletier, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in syphon inkstands."—Dated 13th September, 1859.

42,209. Renard, domiciled with Luet, of 8, Cour des Petites-Ecuries, Paris, for "A throstle frame." —Dated 13th September, 1859.

42,210. Roger and Lédion, domiciled of 9, Rue Rameau, Paris, for "Plastic straw of collodion."—Dated 15th September, 1859.

42,211. Rossignol, of 34, Rue Sedaine, Paris, for "A machine for drying fabrics."—Dated 14th September, 1859.

42,212. Sibon and Marie, represented by Barrault, of 53, Boulevart St. Martin, Paris, for "Means and apparatus for cooling substances, and especially liquids."—Dated 13th September, 1859.

42,213. Tisserant, of 53, Rue au Maire, Paris, for "A waterproof coating."—Dated 14th September, 1859.

42,214. Viney, Sommer, and Hamm, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in cigar-cases."— Dated 16th September, 1859.

42,215. Belvallette, Brothers, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "A mode of mounting carriages"— Dated 19th September, 1859.

42,216. Blatter, of 10, Rue de Faubourg St. Denis, Paris, for "A paper-weight with a calendar and meridian."—Dated 17th September, 1859.

42,217. Bocuze, of 20, Rue Tupin, Lyon, for "A direct mode of charging rods about to be gilded or silvered by means of electro-chemical processes."—Dated 20th September, 1859.

42,218. Chevrier and Autier, the former of 21, Rue du Faubourg Montmartre, Paris, the latter domiciled with Prilleux, of 24, Cité Trévise, Paris, for "Disinfecting natural and other smells or savour"—Dated 20th September, 1859.

42,219. Colombi, son, of 57, Quai des Grands-Augustins, Paris, for "A micrometer."—Dated 19th September, 1859.

42,220. Delisle, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Improvements in apparatus for preparing gaseous liquids."—Dated 17th September, 1859.

42,221. Dony, with Renoir and Co., of 15, Rue Vendôme, Paris, for "Improvements in the manufacture of chlorine."— Dated 20th September, 1859.

42,222. Durel, of 30, Rue des Vertus, La Villette, département de la Seine, for "Mounting wooden shoes."—Dated 17th September, 1859.

42,223. Gingembre and Damiron, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "Hooks sewn on ribbons by means of machines."—Dated 17th September, 1859.

42,224. Godefroy, of 5, Rue de Florence, Rouen, for "Converting the plant rameh into white textile filaments."—Dated 17th September, 1859.

42,225. Jouannin and Co., represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in locks."—Dated 16th September, 1859.

42,226. Laneuville, of 1, Rue de Constantine, Paris, for "A chemical product, called 'Carboazotine.'"—Dated 17th September, 1859.

42,227. Lucot, of 4, Rue de Lyon, Passage Moulin, Paris, for "A composition of a kind of stones."—Dated 19th September, 1859.

42,228. Macors and Coolen, of 10, Place Louis-Seize, Lyon, for "Preserving mustard-flour."—Dated 20th September, 1859.

42,229. Malligand, of 45, Avenue de Clichy, Batignolles, département de la Seine, for "So-called 'Semiramis spring-mattresses.'"— Dated 17th September, 1859.

42,230. Manchon, of 8, Rue des Enfants-Rouges, Paris, for "An inalterable rubbing surface for lighting matches."—Dated 17th September, 1859.

42,231. Morton and Howden, represented by Mathieu, of 45, Rue St. Sébastien, Paris, for "Improvements in apparatus for obtaining and regulating motive power."—Dated 19th September, 1859.—(English Patent, 19th March, 1859.)

42,232. Noblet and Thibouville, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Improvements in tools used in the manufacture of certain parts of wind instruments."—Dated 17th September, 1859.

42,233. Nottelet, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A metrical counter or regulator of spinning machines."—Dated 19th September, 1859.

42,234. Payerne, Godier, and Le Marquand, the two former, of 17, Rue Neuve-des-Mathurins, the latter, of 79, Rue de Seine, Paris, for "A so-called 'Hydrostatic apparatus.'"—Dated 17th September, 1859.

42,235. Philippe, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An alarum tinder-box."—Dated 17th September, 1859.

42,236. Pion, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "A clasp for portemonnaies, pocket-books, &c."— Dated 19th September, 1859.

42,237. Quennesson, of Monbreham, département de l'Aisne, for "Bands of gauze-dimity with satin plaits and bands of gauze-jaconet with common plaits."—Dated 22nd September, 1859.

42,238. Roger, of 31, Rue Neuve de la Pelouze, Passy, département de la Seine, for "A kind of toy balloons.—Dated 17th September, 1859.

42,239. Ruin, of 3, Rue St. Laurent, Belleville, département de la Seine, for "A machine for cutting wooden teeth of gearings."—Dated 19th September, 1859.

42,240. Sanglier, of 3, Rue Babille, Paris, for "Improvements in the manufacture of horses' collars."—Dated 16th September, 1859.

42,241. Henry Schlose and Brother, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in portemonnaies and other leather articles closed by means of an elastic thong."—Dated 19th September, 1859.

42,242. Tisserant, of St. Mihiel, département de la Meuse, for "A pneumatic motor with free pressure."—Dated 20th September, 1859.

42,243. Trémiot, of 16, Boulevart de Clichy, Montmartre, département de la Seine, for "Ornamental portraits."—Dated 19th September, 1859.

42,244. Truss, represented by Sautter, of 14, Boulevart Montmartre, Paris, for "Improvements in the manufacture of pipes, and in the mode of assembling the same."— Dated 17th September, 1859.—(English Patent, 21st April, 1859.)

42,245. Villet, of 133, Rue de Sèvres, Paris, for "Improvements in setting type."—Dated 19th September, 1859.

42,246. Wright, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Improvements in the manufacture of iron and steel wire, with

circular sections, and in metal wire with other sections, and of great length."—Dated 19th September 1859.—(English Patent, 14th February, 1859.)

42,247. ANGLADE, of Perpignan, for "A machine for extending the use of gravity in a solid shape." Dated 7th September, 1859.

42,248. BIRD, represented by Zacharie, of 40, Rue de Bourbon, Lyon, for "Improvements in castors."—Dated 21st September, 1859.—(English Patent, 26th August, 1859.)

42,249. BONNARD, of Sorgues, département du Vaucluse, for "A direct fire apparatus for boiling straw for the manufacture of paper."—Dated 24th September, 1859.

42,250. BORDAS, of Périgneux, département du Dordogne, for "A rustic garden pianoforte."—Dated 8th September, 1859.

42,251. CAVALERIE, of 23, Rue Constantine, Bordeaux, for "A motor applicable to all kinds of engines."—Dated 27th September, 1859.

42,252. DAVID, of 44, Rue des Pincettes, au Havre, département de la Seine Inférieure, for "A compressing machine."—Dated 24th September, 1859.

42,253. DERRIEY, of 21, Chemin de Ronde de Ménilmontant, Paris, for "A drill tool with a circular movement."—Dated 21st September, 1859.

42,254. DESCAMPS, of Anzin, département du Nord, for "Applying a fixed grate with moveable bars to all kinds of fire-places, and for simultaneously closing the flues by closing the door of the fire-place."—Dated 26th September, 1859.

42,255. DORBON-DELVAUX, of Thin-le-Montier, département des Ardennes, for "A semi-mechanical loom for obtaining merinos and other similar fabrics."—Dated 26th September, 1859.

42,256. DRAGUE, of 5, Rue Garnier, Neuilly, département de la Seine, for "A shape of tiles."—Dated 21st September, 1859.

42,257. DUCHAMP, jun., of 17, Rue du Commerce, Lyon, for "A syphon for gaseous liquids."—Dated 23rd September, 1859.

42,258. GANTILLON, represented by Tony Carret, of 60, Rue St. Louis, au Marais, Paris, for "A woollen felt roller for finishing and cylindering silk handkerchiefs."—Dated 19th September, 1859.

42,259. GARREL, of 58, Rue Charlemagne, Lyon, for "An apparatus for polishing silk fabrics."—Dated 26th September, 1859.

42,260. GIZON, of 21, Rue de la Poulaillerie, Lyon, for "A machine for making zephyr-gauze."—Dated 26th September, 1859.

42,261. GUESNON, of 8, Rue l'Ecu, St. Laurent, Orléans, for "An apparatus for mixing corn and flour."—Dated 26th September, 1859.

42,262. DE JOUFFROY, of Abbans-Dessous, département du Doubs, for "A breech-loading rocking musket,"—Dated 22nd September, 1859.

42,263. LACROIX, of Entre-Deux-Guiers, département de l'Isère, for "A system of bolts for French windows."—Dated 27th September, 1859.

42,264. LAGOSSE and QUENTIN, of Montgon, département des Ardennes, for "Improvements in the manufacture of paper, card-paper and pasteboard."—Dated 24th September, 1859.

42,265. LAMBERT, jun., of Argentan, département de l'Orne, for "A thrashing machine with a horse gin worked by one horse."—Dated 21st September, 1859.

42,266. LAVERGNE, of 5, Rue du Champ de Mars, Bordeaux, for "A machine for making paper bags with double bottoms."—Dated 28th September, 1859.

42,267. LIMAU, of 12, Rue Marengo, Bordeaux, for "Stoppering bottles, applicable to all kinds of vessels."—Dated 26th September, 1859.

42,268. MAIRE and WALLÉE, of 11, Terrasse des Carmélites, Tours, for "Using water and steam as auxiliary fuel."—Dated 20th September, 1859.

42,269. MANTRANT and CAHUG, of 28, Rue Bouquière, Bordeaux, for "A system of pidgeon-holes for bottles."—Dated 22nd September, 1859.

42,270. MIGON, of 267, Rue St. Honoré, Paris, for "Nutritious leguminous baths."—Dated 19th September, 1859.

42,271. MONTAGNE, of Section d'Esquermes, Lille, for "A machine for ironing linen."—Dated 29th September, 1859.

42,272. RONDEL, of 11, Rue de Provence, Paris, for "Torrefying coffee."—Dated 21st September, 1859.

42,273. THÉMÉ, of Villers-Vicomte, département de l'Oise, for "A tacheostrophe machine for twisting thread for tissues."—Dated 20th September, 1859.

42,274. WALLENTIN, of 25, Rue Thomassin, Lyon, for "Impervious seamless hats, covered with cloth or any other stuff."—Dated 21st September, 1859.

42,275. VANDENBERGH, of 33, Rue de l'Arsenal, Toulon, for "A chronometric clock."—Dated 23rd September, 1859.

42,276. VANDEN HIELAKKER, represented by Fringant, of 10, Rue de Provence, Paris, for "A system of marking points at billiard games."—Dated 21st September, 1859.

42,277. VANTER-SPEETEN and DECUESTER, represented by Frigant, of 10, Rue de Provence, Paris, for "Improvements in machines for reading cards in steam weaving."—Dated 21st September, 1859.

42,278. ARRAULT, of 11, Rue de l'Empereur, Montmartre, département de la Seine, for "Applying chemical products to the manufacture of rouge."—Dated 26th September, 1859.

42,279. BERGER, of 55, Rue Rambuteau, Paris, for "A system of chains."—Dated 22nd September, 1859.

42,280. CHEVILLARD, domiciled of 19, Rue Jessaint, La Chapelle St. Denis, département de la Seine, for "Improvement in railway-disks."—Dated 22nd September, 1859.

42,281. CHMIELOWSKI, of 24, Rue Lemercier, Batignolles, département de la Seine, for "Wheels with elastic springs applicable to all kinds of carriages, and revolving with the axle."—Dated 26th September, 1859.

42,282. COURTOIS, of Sauville, département des Vosges, for "A cylindrical system applicable to

the oscillating movement of bells."—Dated 28th September, 1859.

42,283. Dieulafait, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Manufacture of boxes or paper cases for keeping muffs."—Dated 21st September, 1859.

42,284. Dieulafait, represented by Le Blanc, of 2, Rue Ste. Appoline, Paris, for "Mounting muffs."—Dated 21st September, 1859.

42,285. Dreyfus-Werth, represented by Sautter, of 14, Boulevart de Strasbourg, Paris, for "Improvements in the manufacture of light tissues."—Dated 24th September, 1859.

42,286. Durand and Pradel, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "Improvements in Jacquart machines." — Dated 21st September, 1859.

42,287. Fields, represented by Brandon, of 7, Rue des Moulins, Paris, for "Improvements in railway buffers, applicable to other purposes."—Dated 21st September, 1859.—(English Patent, 22nd March, 1859.)

42,288. Fleury, represented by Ricordeau, of 23, Boulevart de Strasbourg, Paris, for "An expansive toy-pistol."—Dated 21st September, 1859.

42,289. James, represented by Brandon, of 7, Rue des Moulins, Paris, for "Improvements in projectiles of rifle-guns." — Dated 21st September, 1859.

42,290. Jesson, represented by Claës, of 23, Boulevart de Strasbourg, Paris, for "A little trinket flacon."—Dated 22nd September, 1859.

42,291. Lafont, of Alais, département du Gard, for "A shape of tiles."—Dated 28th September, 1859.

42,292. Lambert, of 9, Rue St. Louis, and 3, Impasse St. Louis, Batignolles, département de la Seine, for "An hygienic apparatus for ladies."—Dated 23rd September, 1859.

42,293. Lebel, represented by Claës, of 23, Boulevart de Strasbourg, Paris, for "Calorifere footcoverings."—Dated 24th September, 1859.

42,294. Lilliendahl, represented by Yapp, of 6, Rue Montpensier, Paris, for "Obtaining nightsignals by means of fire-works." — Dated 24th September, 1859.

42,295. Lorrain-Durafour, of 48, Rue de la Charité, Lyon, for "Applying any motor to machines for stamping and coining medals."—Dated 28th September, 1859.

42,296. De Malbec, of 34, Rue d'Angoulême du Temple, Paris, for "A continuous apparatus for lubricating."—Dated 22nd September, 1859.

42,297. Marceille and Ferret, of Pont-des-Demoiselles, Toulouse, for "A machine, called 'Electro-motive rack-clock.'"—Dated 27th September, 1859.

42,298. Martin-Saint-Martin, of 20, Cité Trévise, Paris, for "Improvements in fire-arms."—Dated 24th September, 1859.

42,299. Meuley, of 13, Rue Cadet, Paris, for "An apparatus for winding up clocks."—Dated 26th September, 1859.

42,300. Naylor, represented by Brade, of 29, Rue Ste. Anne, Paris, for "An apparatus for measuring and registering distances travelled over."— Dated 26th September, 1859. — (English Patent, 26th March, 1859.)

42,301. Parfitt, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "A maritime apparatus for registering the speed of vessels and currents."—Dated 22nd September, 1859.

42,302. Pinchbeck, represented by Brandon, of 7, Rue des Moulins, Paris, for "Improvements in gasmeters."—Dated 21st September, 1859.

42,303. Renard, represented by Guion, of 29, Boulevart St. Martin, Paris, for "Various modes of applying mica."—Dated 21st September, 1859.

42,304. Reysz, represented by D'Aubréville, of 60, Boulevart de Strasbourg, Paris, for "A mandrel with a concentric pressure for lathes, mortising machines, filing machines, &c." — Dated 22nd September, 1859.

42,304. Rochette and Léotar, represented by Bresson, of 57, Rue de Bretagne, Paris, for "Moderator gas-burners."—Dated 23rd September, 1859.

42,306. Smith, represented by Yapp, of 6, Rue Montpensier, Paris, for "Improvements in the manufacture of bungs, and in fitting the same into casks and other vessels containing liquids."—Dated 24th September, 1859.—(English Patent, 1st January, 1859.)

42,307. Van Ackère, represented by Dreyfous, of 54, Rue de Bondy, Paris, for "Preserving travellers in all kinds of carriages from accidents."—Dated 22nd September, 1859.

42,308. Winter, represented by Barrault, of 33, Boulevart St. Martin, Paris, for "An apparatus or machine for weighing or raising filled sacks and other powdery substances."—Dated 24th September, 1859. — (English Patent, 15th September, 1859.)

42,309. Yapp, of 6, Rue Montpensier, Paris, for "Improvements in mixing oil of tar, coal, &c., and rendering them odoriferous."—Dated 24th September, 1859.

Certificates of Addition.

40,249. Alexandre, for "A grate for fire-places." —Dated 24th August, 1859.

38,639. Babonneau, for "A motor." — Dated 20th August, 1859.

38,416. Bertinchamp, for "Sounding."—Dated 22nd August, 1859.

33,968. Boiret for "A stamp."—Dated 22nd August, 1859.

31,745. Bosredon, for "Ornaments."—Dated 20th August, 1859.

40,803. Boulanger, for "Petticoats."—Dated 26th August, 1859.

40,838. Chéradame, for "Salvage."—Dated 18th August, 1859.

38,426. Copcutt, for "Gas."—Dated 25th August, 1859.

40,195. Depoilly, for "A lock."—Dated 19th August, 1859.

28,920. Doelling, for "A wire-gauge" — Dated 26th August, 1859.

37,190. Dromart, for "Distilling."— Dated 26th August, 1859.

37,575. Figuera and Comp., for "Fecal matter."— Dated 20th August, 1859.

39,267. Gaussel, for "Wool."—Dated 17th August, 1859.

37,973. Gérard, for "A horse-gin."—Dated 24th August, 1859.

37,776. Giacobbi, for "A controlling apparatus."— Dated 18th August, 1859.

37,609. Gondenove and Féret, for "Closing."— Dated 19th August, 1859.

39,109. Grenier, for "Waterproofing." — Dated 25th August, 1859.

39,046. Jouannin and Comp., for "A machine for making fishing nets."—Dated 9th August, 1859.

41,242. Jucqueau, for "Signals." — Dated 25th August, 1859.

21,326. Labrosse, for "A coating."—Dated 23rd August, 1859.

41,341. Lahaut, for "Vinegar."—Dated 22nd August, 1859.

37,748. Lamblin, for "A clock." — Dated 20th August, 1859.

40,566. Lavergne, for "A press." — Dated 24th August, 1859.

33,359. Lecoeur, for "Spinning." — Dated 25th August, 1859.

35,252. Lemoine-Brabant, for "Spinning." — Dated 25th August, 1859.

36,910. Lhôte, for "Seltzer water."—Dated 19th August, 1859.

27,940. Liebermann, for "Fecula."— Dated 23rd August, 1859.

41,313. Lombard, for "Fuel." — Dated 1st September, 1859.

38,439. Mallet, for "Oil."— Dated 18th August, 1859.

41,847. Maumené, for "Potash." — Dated 31st August, 1859.

40,437. Monnet and Dury, for "A colouring substance."—Dated 23rd August, 1859.

38,079. Poitenin, for "Tricot." — Dated 22nd August, 1859.

40,989. Prénillieu, for "A stay." — Dated 17th August, 1859.

39,249. Royet jun., for "Fire-arms,"—Dated 26th August, 1859.

41,192. Schinz, for "A glass furnace."—Dated 22nd August, 1859.

34,157. Steinmetz, for "Closing."—Dated 20th August, 1859.

35,233. Thierry, jun., for "A smoke consuming apparatus."—Dated 22nd August, 1859.

39,696. Verière, for "A pump." — Dated 29th August, 1859.

41,890. Vinet, for "A mowing machine."—Dated 25th August, 1859.

39,989. Achet, for "A break."—Dated 9th September, 1859.

39,409. Barry, for "Oil."—Dated 30th August 1859.

39,477. Bierlein, for "A twyer."—Dated 5th September, 1859.

40,681. Caron, for "Fire-arms."—Dated 31st August, 1859.

41,169. Charbonnier, for "Sparkling wine." — Dated 9th September, 1859.

41,960. Chauve, for "Dresses."—Dated 7th September, 1859.

38,032. Cordier, for "A toy wind-instrument."— Dated 29th August, 1859.

38,582. Corne, for "Manure."—Dated 30th August, 1859.

38,582. Corne, for "Manure."— Dated 5th September, 1859.

39,799. Cornély, for "Resin."— Dated 1st September, 1859.

38,551. Cresson, for "Heating." — Dated 14th September, 1859.

40,426. Duinat, for "Plush."—Dated 3rd September, 1859.

39,672. Escourbé, for "Gloves." — Dated 30th August, 1859.

12,685. Favre, for "Weaving."—Dated 31st August, 1859.

40,975. Gaudier and Marchand, for "A registering apparatus."—Dated 1st September, 1859.

37,943. Gely, for "A Greek bonnet."—Dated 1st September, 1859.

38,202. Gire, for "Cocks." — Dated 31st August, 1859.

40,689. Gouzé, for "Destroying bugs." — Dated 8th September, 1859.

37,616. Hammond, for "Dolls"—Dated 2nd September, 1859.

31,295. Joy and Holt, for "An hydraulic machine."—Dated 10th September, 1859.

37,328. The Alliance Company, for "Electricity."—Dated 3rd September, 1859.

37,881. Lambert, for "Thrashing." — Dated 3rd September, 1859.

40,914. Larchevéque, for "A hook." — Dated 5th September, 1859.

41,052. Leblanc, for "Rings." — Dated 29th August, 1859.

40,755. Leterme, for "A flutina." — Dated 8th September, 1859.

25,046. Manceaux, for "Fire-arms."—Dated 3rd September, 1859.

41,601. Maury, for "Sausages." — Dated 6th September, 1859.

37,544. Michel, for "A break."—Dated 8th September, 1859.

32,507. Nogent and Motte, for "Selvage."— Dated 5th September, 1859.

35,418. Peltier, for "Boxes for preserved food."— Dated 2nd September, 1859.

29,033. PICHOT, for "Tissue-paper."—Dated 3rd September, 1859.

36,626. PIMONT, for "Anti-caloric envelopes."—Dated 9th September, 1859.

33,657. PROUVOST, for "A motor."—Dated 7th September, 1859.

39,248. RIVIÈRE, for "A spindle." — Dated 31st August, 1859.

37,985. ROBINOT, for "A mechanical toy."—Dated 3rd September, 1859.

39,024. SANDOZ, for "A stereoscope."—Dated 5th September, 1859.

40,412. VILLARD, for "Garden seats."—Dated 31st August, 1859.

37,957. VODOZ, for "Lamp-glasses."—Dated 3rd September, 1859.

33,499. WALCH, for "Printing fabrics." — Dated 7th September, 1859.

UNITED STATES OF AMERICA.

(Communicated by the Commissioner of Patents.)

LIST of PATENTS, with Claims annexed, issued from the United States Patent Office, for the week ending 6th December, 1859, and each bearing that date.

No. 26,330. G. M. ATHERTON, of Friendsville, Ill., for an "Improvement in hub-boring and mortising machines."

"What I claim is, the arrangement of two pawls S, S^1, with spring rods P, P^1, and arms V, V, projecting from the reciprocating gate L, for operating the same, in combination with lever M, for relieving either one or both pawls from racks T, T^1, the whole being arranged and combined for the purpose of moving the carriage with the hub up to the mortising tool, as set forth."

No. 26,331. WILSON AGER, of Rohrsburgh, Pa., assignor to Thomas J. Wolf and P. J. Jordan, of Philadelphia, Pa., for an "Improvement in machines for cleaning rice."

"I claim, 1st, giving the grain a positive outward motion from under the pressing wings by the clearer *k*, or its equivalent, situated and operating substantially as set forth. 2nd, the adjustable leaves *l* upon the wings for aiding the upward movement of the grain."

No. 26,332. C. P. BUCKINGHAM, of Mount Vernon, O., for an "Improvement in grinding mills."

"I claim, 1st, the improved method of securing the spindle to the runner stone of a grinding mill, by combining the flanch *m* at the end of the spindle I, and the ring N, attached to the metal cap *o* of the runner C^1, said ring being provided with projections *n*, which shall permit a rocking motion of the stone upon the spindle, and a key *p*, or its equivalent, substantially as and for the purposes set forth. 2d, the use in connection with the bedstone B, of the elastic bars *h*, for the purpose set forth."

No. 26,330. B. N. BURKE, of Buffalo, N. Y., for an "Improvement in steam boilers."

"I claim the employment in combination with flues arranged substantially as described of draft distributors E, E, applied and furnished with apertures of varying size, substantially as herein specified."

No. 26,334. B. F. CAMPBELL, of Roxbury, Mass., for an "Improvement in steam boilers."

"I claim in the within described boiler the combination of the exterior water chamber A and interior water chamber B, the interposed smoke flue C, and the basin F, the whole arranged to operate substantially as and for the purposes set forth."

No. 26,335. C. CARTER, of Franklin, Iowa, for an "Improved washing machine."

"I claim the inclined wash board C, fitted between ways or guides *b*, *b*, which have a sliding or reciprocating rubber frame F, fitted on them by being hinged to slides D, D, the above parts being fitted within a suitable box or suds receptacle A, and arranged to operate as and for the purpose set forth. I further claim the arrangement of the rubbers G, H, fitted within the hinged reciprocating frame F, and used in connection with the inclined wash board C, for the purpose specified."

No. 25,336. EDWIN CLARK, of Windsor, Vt., for an "Improvement in sewing machines."

"I claim the combination of a bar G, which has its front end or needle *a*, controlled by a double fulcrum guide *d*, so as to describe an ellipse, and its rear end attached to a rotating disk or crank pin, with a perforating needle *n*, as herein shown and described."

No. 26,337. JOHN W. COCHRAN, of New York, N. Y., for an "Improvement in projectiles for rifled ordnance."

"I claim fitting a projectile with a hollow case jacket or band containing gunpowder or other explosive material, which when ignited by the firing of the charge of the gun, will, by its explosion, cause the said case, jacket, or band to be expanded toward the bore of the gun, and to be compressed around the projectile, substantially as and for the purposes herein set forth. And, in combination with an expanding case, jacket, or band applied to a projectile, I claim the use of an outer covering of wire cloth, to constitute a packing, substantially as and for the purpose herein specified."

No. 26,338. WM. COGSWELL and IRA COGSWELL, jr., of Ottawa, Ill., for an "Improvement in harvesters."

"We claim the combination of the shifting pinion I, with the eccentric axle D, and adjusting frame E, substantially as herein shown, so that by turning the said axle, the pinion I will be thrown into gear with either of the concentric wheels C, H, or out of gear with both, as desired, and so that the hight or the main frame may be readily adjusted, to correspond with the adjustment given the axle D and pinion I, as set forth."

No. 26,339. JAMES P. COLLINS, of Troy, N. Y., for an "Improved water wheel."

"I claim, 1st, the arrangement of the lighter plate L, in the particular manner specified, and for the purpose set forth. 2nd, the arrangement in the particular manner specified, of the packing ring *i*, for the purpose set forth. 3rd, the arrangement in the particular manner specified of the lip or projecting piece *e*, of the buckets, for the purpose set forth. 4th, the arrangement in the particular manner specified, of the regulating plate J, in combination with the peculiar specified device for operating it, for the purpose set forth. 5th, the employment or use of the dividing strip or annular ring inserted in the buckets, substantially as and for the purpose set forth. 6th, the employment for united use in one wheel, of the lighter plate B, packing ring *i*, projecting lips or flanches *e*, gauge or regulating plate J, and annular dividing plate A, the whole being constructed, arranged, and operating in the manner and for the purpose set forth."

No. 26,340. JOHN COOPER, of Mount Vernon, O., for an "Improvement in oil boxes of vertical sugar mills."

"I claim the concentric cups H and I, upon the upper sides of the heads C, C^1, the same being furnished with the openings *e* and *o*, for the conveyance of the oil from the upper box to the stationary cup J, which surrounds the shaft upon the lower bed plate K, in combination with the cups J, substantially as described for the purpose herein set forth."

No. 26,341. Thos. P. Costello, of Buffalo, N. Y., for an "Improvement in skate fastenings."

"I claim a boot, with sockets sunk therein as described, and upright bolts welded to a steel blade or skate runner, both being made and arranged as shown and described, and attached to each other, for the purpose specified."

No. 26,342. E. G. Cushing, of Dryden, N. Y., for an "Improvement in horizontal water wheels."

"I claim the combination of the tubes (*b*), with the bolts (*c*), and buckets D, the whole being constructed and arranged, as and for the purpose herein shown and described."

No. 26,343. G. W. R. Bayley, of Brashear, La., for an "Improvement in hook-headed spikes."

"I claim the improved railroad spike, having the sides and front of its head beveled downwards and inwards, but convex, and having the peculiar projecting lip or hook behind, for facilitating its easy withdrawl, as a new article of manufacture."

No. 26,344. Charles G. Burke, of Utica, N. Y., for an "Improvement in melodeons."

"I claim fitting a melodeon, or other reed instrument of the same class, with a series of swell valves D, so applied as to be capable of being operated by the keys in playing, substantially as herein described, for the purpose of giving expression to any note, independently of the preceding or succeeding ones, or of the other notes of a chord. And I also claim the employment of a stop H, applied and operating, substantially as described, in combination with the keys and the swell valves, for the purpose herein set forth."

No. 26,345. Jacob Dickerson, of Sacramento, Cal., for an "Improvement in wind mills."

"I claim the arrangement of the curved iron sections E, sails B, arms D, slides E, hollow drum I, scroll spring H, flexible connecting rods J, and links G, in the manner and for the purpose described."

No. 26,346. Charles W. Dickinson, of Newark, N. J., for an "Improvement in sewing machines."

"I claim the construction of a pendantly swinging, gravitating, self-adjusting pressure pad or stripper X, X, formed with an adjustable slotted end X 2, suspended on an adjusting pin or stud B 3, the said pad having no feed pressure spring, but substantially as described, set forth, and shown."

No. 26,347. Jeptha Dyson, of Fulton, So. Ca., for an "Improvement in carding engines."

"I claim, first, the combination and arrangement of the feed regulating and working cylinder *a*, feeder A, worker *c*, and clearer *b*, substantially in the manner and for the purpose described. 2nd, the combination and arrangement of the feeder A, worker B, cleaning and delivering cylinder C, and main cylinder D, substantially as and for the purpose described. Third, the combination and arrangement of the feed regulating and working cylinder *a*, feeder A, worker *c*, clearer *b*, worker B, clearing and delivering cylinder C, and main cylinder D, substantially in the manner and for the purpose set forth. Fourth, the combination with the features included in the third claim of the stripper E, substantially in the manner and for the purposes set forth."

No. 26,348. A. B. Furbee, of Dresden, Ohio, for an "Improvement in corn cribs."

"I claim the arrangement of the inclined flooring C, with the trunks or boxes D, substantially as and for the purpose set forth. I also claim covering the posts A of the crib with sheet metal *d*, when said posts are used in connection with a crib provided with an inclined flooring C, and trunks or boxes D, as and for the purpose specified."

No. 26,349. Jackson Gorham, of Bairdstown, Geo., for an "Improvement in ploughs."

"I claim the arrangement of the vertical curved standard B, shovel C, curved handle straps D, hooked inclined brace E, and adjustable beam A, as herein shown and described."

No. 26,350. Caleb H. Griffin, of Lynn, Mass., assignor (through mediate assignor) to Walter D. Richards, of same place, for an "Improvement in machinery for cutting leather into soles for boots and shoes."—Ante-dated 6th June, 1859.

"I claim, first, vibrating the knife or knives (L) in the arc of a circle, or a curve approximating thereto, in the manner substantially as set forth. Secondly, I claim the arm (M), stud (*n*) and slot (N), or their equivalent, as combined with the knife or knives (L), for the purpose substantially as described."

No. 26,351. Daniel M. Hall, of Bridgeport, Conn., for an "Improvement in railroad car blinds."

"I claim the employment or use of the flexible blind C, arranged with the rollers *l*, *l*, fitted within the curved grooves *e*, *e*, and applied to the window of a car or other wheel vehicle, so that it may be raised above the sash B and drawn within the roof of the vehicle, substantially as described."

No. 26,352. Alex. Hay, of Philadelphia, Pa., for an "Improvement in the bearings of railroad and other machinery."

"I claim imbedding the bearings of journals, or surrounding the same with india rubber, or other suitable elastic material, so as to cause them to yield in every direction when subjected to strains and thrusts, and readjust themselves upon the pressure being removed, substantially as described."

No. 26,353. George G. Henry, of Mobile, Ala., for an "Improvement in drying wet seed cotton."

"I claim the application of artificial heat to the purpose of drying wet seed cotton, by means of mechanism, substantially as described."

No. 26,354. John Herald and C. B. Tompkins, of Trumansburg, N.Y., for an "Improvement in pitchforks."

"We claim the arrangement of the hollow head A, tines B, passing through the head socket (*b*), handle C, screw D, plugs (*c*) and screw tangs (*d*), as and for the purpose herein shown and described."

No. 26,355. F. E. Hinckley, of Galesburgh, Ill., for an "Improvement in mole plough."

"First, I claim the combination of the clearer or hanging coulter F, and the rotating coulter G, constructed and arranged as described, for conjoint operation. Second, I claim constructing the sword M, of a mole plough, with a hole or bore N through it, of sufficient size and suitable shape to admit at the same time a rod of metal, large enough to raise and lower the point of the mole, and also to admit the air to pass free into the drain through the sword and mole, as described. Third, I claim expanding and contracting the mole of a mole plough, substantially as and for the purpose described, or by any other mechanical means. Fourth, I claim constructing the mole of a mole plow in sections, consisting of two sides and a top hinged to a head block, and operated by a wedge, as described. Fifth, I am aware that packing wheels have been used to press the earth vertically, and also, that they have been made concave, for the purpose of closing the sword cut. I do not claim this construction, but I do claim two revolving cutters with plain outsides, and conoidal insides, which may be placed upon a common axle, and adjusted to the beam in such a manner as to be forced to cut into the ground and press the earth laterally into the sword cut, and firmly close it up, substantially as described."

No. 26,356. Truman J. Homer, of St. Louis, Mo., for a "Portable collection box."

"I claim the whole box as original as a portable collection box in the peculiar arrangement of its component parts of glass, wood, and metal, and desire to secure the same by Letters Patent. I particularly claim the money inlet as original, it being in the shape of a box without a bottom, through the top of which is inserted a narrow flat tube, and between it and the sides of the box are two ranges of disks, which disks close the aperture of the tube when the box is inverted."

No. 26,357. Sheldon A. Hotchkiss, of New Haven, Conn., for an "Improvement in machine for raising weights."

"I claim the zone J and the screw drum, pawl hook, knee, and sheeve, in combination, substantially and for the purposes set forth."

No. 26,358. E. E. Marcy, of New York, N. Y., for an "Improvement in india-rubber fabrics."

"I claim the improved india-rubber fabric made by the combination of india rubber with hyposulphite of zinc, and by the exposure of the said compound to steam or water at the temperature herein-before stated, substantially as described, without any admixture of free sulphur."

No. 26,359. E. E. Marcy, of New York, N. Y., for an "Improvement in india-rubber fabrics."

"I claim the improved india-rubber fabric made by the combination of india rubber with sulphuret of lead and carbonate of lead or the protoxide of lead, and by the exposure of said compound to steam or water at the temperature herein-before stated, substantially as described, without any admixture of free sulphur."

No. 26,360. E. E. Marcy, of New York, N. Y., for an "Improvement in india-rubber fabrics."

"I claim the improved india-rubber fabric made by the combination of india rubber with the sulphuret of zinc and hyposulphite of zinc, and by the exposure of said compound to steam or water at the temperature herein-before stated, substantially as described, without any admixture of free sulphur."

No. 26,361. Emanuel Marquis, of Bloomington, Ind., for an "Apparatus for setting and copying music for the blind."

"I claim the tablet A, or its equivalent, with raised staves and sockets, in combination with detached solid notes and other signs of musical notation, or their equivalents, capable of being transposed on and fixed in the table, substantially as and for the purpose described."

No. 26,362. Saml. W. Marsh, of Washington, D. C., for an "Improvement in breech-loading fire-arms."

"I claim the construction and application of a detachable-headed breech-pin *h*, *h*, I, J, K, Fig. 6, with a split female expanding ring or collar L, Fig. 7, and a non-expanding male collar or ring M, Fig. 8, and is detachable, adjusting screw-head O, Fig. 9, forming a compound expanding detachable-headed breech-pin, as shown complete at *h*, *h*, L, O, Fig. 4, substantially as described and set forth."

No. 26,363. Edwin May, of Indianapolis, Ind., for an "Apparatus for sanding painted surfaces."

"I claim the combination and arrangement of the blast fan F in cylinder A, conductor B, adjustable mouth piece D, with the elastic tube N, or its equivalent, when constructed and arranged substantially as set forth."

No. 26,364. Edward Maynard, of Washington, D.C., for an "Improvement in breech-loading fire-arm."

"I claim, first, the peculiar manner of connecting the barrel to the breech piece, viz.: the hook *e* on the underside of the barrel, taking hold of the pin *f*, (or the equivalent thereof), at the front end of the breech piece, whilst the link C, the lever D, and the joint pins of said link and lever, are arranged in such a manner with relation to the slot in the breech piece, and the ears on the underside of the but of the barrel as to form a treble jointed and compound leverage connection between the breech piece, and the but of the barrel, of such a character that the barrel can be instantly thrown from a firing position to a loading position, and vice versa, and also of such a character that the barrel can be easily and quickly detached from the breech piece, or be securely united thereto, substantially in the manner herein set forth. I also claim, the combination of the metallic block *b*, the screw *c*, and the screw *a* with each other, and with the front portion of the breech piece, in such a manner with relation to the shoulder *d*, on the underside of the barrel, that the joint between the but of the barrel and the abutment of the breech piece, can be tightened or loosened substantially in the manner herein set forth. I also claim the retaining of the pivot pin *w*, in its position within the breech piece by means of the overlapping head of the screw a^1; but this I only claim, when the longitudinal groove *z*, in one side of a portion of the length of said pivot pin is so located that when the pin is turned to the position shown in fig. 12, (or any other previously determined position), it may be drawn out far enough, and only far enough to detach the said pin from its hold upon the lever D, and thereby allow the barrel to be separated from the breech piece, substantially in the manner herein set forth. When the pivot pin *w* is retained in its position within the breech piece by the overlapping head of the screw a^1, in such a manner that it can be loosened by partially turning the same upon its axis, I also claim the arm b^1, upon the outer end of said pin, which enables it to be readily turned upon its axis, and partially withdrawn from its place without any mechanical assistance substantially as herein set forth. When the barrel is connected to the breech piece in the within described manner, I also claim the producing of a tight joint between the but of the barrel and the abutment of the breech piece, by combining therewith a flange bottomed metallic cup, substantially as herein set forth. I also claim giving the opposite faces *r*, *r*, of the but of the barrel, such a shape that the flange bottomed metallic cup (*r*) can be easily taken hold of by the thumb and finger of the free hand of the user, when the barrel is thrown into the loading position, substantially as herein set forth."

No. 26,365. G. W. Mitchell, of Jackson, Tenn., for an "Improvement in mode of operating car brakes."

"I claim the flanged or ratchet wheel, and its hooked pawl as described and shown in fig. 2, at F, G. I claim also, the spring platform and the pin attached, and stop pin L, fig. 2, as described and for the purpose set forth."

No. 26,366. G. W. Mitchell, of Jackson, Tenn., for an "Improvement in sewing machines."

"I claim, first, the combination of the crank I, on the driving shaft, the slotted arm H, forming a portion of the same lever, with the needlearm, and so extended as to operate the lever F^1, and the lever E^1, carrying the shuttle or looper, the whole arranged and operating substantially as herein described to drive the needle and shuttle. Second, the vertically and horizontally elastic arm L, having the presser attached, and constructed, and applied substantially as herein described, so as to be operated upon by an appendage of the needle to feed the material substantially as herein set forth. Third, the polygonal collar M, fitted to turn upon the needle arm, so that any one of its sides may be presented to act upon the presser arm, for the purpose of feeding the cloth more or less according to the wish of the operator, as herein set forth."

No. 26,367. Richd. Montgomery, of New York, N.Y., for an "Improvement in iron ships."

"I claim, first, forming the supports or frame, to which the side covering E is attached, of iron or other metal corrugated in the form and for the purposes substantially as above described. Second, I claim the combination and arrangement of the corrugated cross beams B, and corrugated bottom supports A, with the iron divisions D, substantially as and for the purpose set forth."

No. 26,368. Oscar F. Morrill, of Boston, Mass., for an "Improvement in broiling apparatus."

"I claim the improved steak broiler, as made with the deflector in its grid or grating, a flame and heat passage under the deflector, and with the gravy trough to surround or encompass the heat passage as specified."

No. 26,369. John Knickerbacker, of Stockport, N.Y., for an "Improvement in clutch for pulley coupling."

"I claim suspending the clutches or impellers A, A, A, in radial slots in the disc of the movable pulley E, so as to allow them to vibrate, substantially in the manner and for the purpose herein set forth."

No. 26,370. N. W. Langley, of East Cambridge, and Henry Jones and Aaron S. Drake, of Stoughton, Mass., for a "Mode of securing photographs, &c., to tombstones."

"We claim securing daguerreotypes, photographs, &c., upon tombstones, by inclosing them in a glass case, the opening to which is closed by a glass stopper, and affixing the same to the stone."

No. 26,371. Thos. J. Linton, of Providence, R.I., for an "Improvement in mounting precious stones, &c."

"I claim the improvement in making mountings for precious stones and other articles of jewelry which are to be mounted, by forming the border setting and beveled edge from a single sheet of metal at one operation, by the use of a die, in the manner described, the mountings being in an oval, round, square, or other form, as the article to be mounted may require."

No. 26,372. Charles A. Lowber, of Medina, N. Y., for an "Improvement in cotton seed hullers."

"I claim making the runner with the surface next to the shaft smooth, to receive the cotton seed from a suitable

hopper, and cause them to be properly distributed thereon, and to be carried toward the periphery, and with that part of the surface within the periphery and outside of the smooth part armed with teeth, in the form of long cutting edges, having continuous channels or furrows between them, of sufficient size to receive a cotton seed, and permit it to pass and roll therein, substantially as described, in combination with an upper plate surrounding the eye or aperture, for the passage of the cotton seed to the smooth part of the surface of the runner; the under surface of the said plate being parallel with the surface of the runner, and armed with a ring of teeth, in the form of long cutting edges, and formed with interposed channels or furrows, similar to those of the runner, but of reversed inclination, substantially as and for the purpose specified. I also claim making the said teeth of long cutting edges, and surrounding the smooth surface of the runner of varying lengths, as described, that is, having some of them approaching the shaft nearer than others, that the seeds, while travelling outward on the smooth surface of the runner, may arrange themselves, and properly enter the furrows or channels one by one, as described. And I also claim surrounding the periphery of the runner and upper plate with a trough which extends within the periphery of the runner, leaving an open space or air passage between, substantially as described, in combination with the vanes, or equivalent means, for blowing in a current of air, substantially as and for the purposes specified."

No. 26,373. Washington A. Peaslee and John O. D. Lilly, of Indianopolis, Ind., for an "Improvement in spark arresters and chimneys of locomotive engines."

"We claim the construction of a chimney or spark arrester, by the combination and arrangement of the various parts, substantially as they are described in the foregoing specification, and for the purposes mentioned."

No. 26,374. Nathan Pucket, of Deming, Ind., for an "Improved boiler feeding apparatus."

"I claim the arrangement of the chamber D, valve E, chest A, and openings B, C, as and for the purpose herein shown and described."

No. 26,375. Saml. M. Richardson, of New York, N.Y., for an "Improvement in hinges."

"I claim constructing hinges for blinds by the bent strap *f*, *g*, passing around the outer edges of the blind, and enclosing the angle thereof combined with the eye *d*, connected to said bent strap *f*, *g*, by the part *e*, the whole applied and acting in the manner and for the purposes specified."

No. 26,376. D. Sandford, of Taylor, Ill., for an "Improvement in harvesters."

"I claim, 1st, the sliding rake bar E, fitted within the bent arm D, and provided with a jointed rake head F, in connection with the guide strip *m*, and a gavel passage *n*, on the platform A, substantially as described. 2nd, the combination of the tilting gavel receiver H, with the tilting box J, when arranged to operate together automatically, as and for the purpose set forth."

No. 26,377. Henry Bohrer, of Strasburg Township, Lancaster Co., Pa., for an "Improved churn."

"I claim the application of the tubes I, K, to enter the rear head of the churn, the connecting pipes C and H, and its wide mouth *m*, partition *l*, and connecting tubes L, M, with the dashers D elevated on an open step F, when combined in the manner and for the purpose specified."

No. 26,378. Wm. Selpho and James Waller, of New York, N. Y., for an "Improvement in artificial hands."

"We claim, first, the arrangement of the cords or catguts *m* and *o*, and the pulley *n*, as set forth, for applying a double purchase in opening the hand, as described and shown. Second, we claim the arrangement of the wrist joint and hand spring *l*, whereby the said spring *l* can be adjusted by the rod *k* that passes through the pipe *h*, in the manner specified. Third, we claim the cord *p*, or its equivalent, passing from the elbow pad *r* and giving motion at the wrist *g*, for the purposes and as specified."

No. 26,379. Isaac C. Shuler, of Amsterdam, N. Y., for an "Improvement in sheet-metal coffins."

"I claim, first, the arrangement of stiffening the base of a sheet-metal coffin by locking together the surplus edges of the walls and bottom, forming a rim (*c*) surrounding the base also the frame (D). Second, the inside tray (E), whose bottom is in permanent contact with the exterior bottom (S), and whose sides may be soldered directly to the walls (A) or set away, leaving a chamber to be filled with molten metal, as described. Third, the arrangement of scrolling or double locking the walls at the corners, in order by making a voluminous joint to stiffen and brace the general structure, whether the body of the joint be formed on the inner or outside of the coffin. Fourth, I claim the slotted or double rim H, I, through which the walls protrude, as described, for the purpose of stiffening the upper edges of the walls and sustaining the lid or cover. Also, the arrangement of folding the surplus edges of the walls over the frame (I), for the purpose specified. Fifth, I claim stiffening the cover (J) with the frame (*r*) near its outer edge on the upper side, enclosing the surplus sheet metal over the same. 6th, I claim, for the purpose of stiffening their respective portions of the coffin, the frames of cast or wrought metal (P) for the blind (B), (K), for the cover (J), G, and F, for the walls in the vicinity of the handles (*t*), for the upper edge of the tray (E) and (*q*), for the exterior bottom (S). 7th, I disclaim hinging the sections of the concave sides of the cover to the body of the same. I claim hinging them to the body of the coffin."

No. 26,380. J. C. Stoddard, of Worcester, Mass., for an "Improvement in hay-making machines."

"I claim, 1st, the rake head shaft, furnished with friction wheels or rollers, which are arranged on pivoted lever bearings, in combination with driving wheels which are furnished with a plain flange for the friction rollers to act against, so that the necessary friction may be produced either by means of the specified lever arrangement or by the same in combination with the gravity of the rake head, substantially as and for the purpose set forth. I further claim the adjustable spurred ring P, set screws *p*, *p*, with the wheels *u* on the ends of the rake bars N, arranged and combined as set forth, and for the purposes specified."

No. 26,381. Saml. Tarver, of White County, Ark., for an "Improvement in saw-mills."

"I claim, first, the arrangement of the parts A, B, C, D, E, H, I, J, K, L, of Fig. 1; I say arrangement, because I cannot claim the invention of pulleys, saws, rollers, shafts, &c., these being in use everywhere, but simply claim the peculiar manner in which they are arranged. I claim the construction of the saw carriage, as described above and by drawing of Fig. 3."

No. 26,382. Thos. Thorp, of New York, N. Y., for a "Machine for making cigars."

"I claim, first, the arrangement of the drums or pulleys A, B, in connection with the rollers M and belt C, with or without the rollers N, substantially as and for the purpose herein set forth. Second, I claim, in connection with the above, the runged wheel D, or its equivalent, arranged and operated in the manner and for the purposes herein set forth. Third, I claim the means, substantially as described, of regulating the pressure on the segar. Fourth, I also claim as my invention the arrangement of the machine, substantially as herein set forth, as an arrangement not heretofore known, for the purpose herein-before mentioned. Fifth, I also claim the peculiar steady curves or bends given to the belt C, for the purposes herein mentioned."

No. 26,383. I. P. Tice, of Baltimore, Md., for an "Improved rotary cutter head."

"I claim the employment or use of a cylinder C, or any segment or section thereof, applied to rotary cutters, to operate substantially as and for the purpose set forth."

No. 26,384. Geo. W. Tolhurst, of Liverpool, O., for an "Improved washing machine."

"I claim constructing the round follower of washing machines of two sets of rings (or hoops), and furnishing each set of rings with a handle, so that the surface that comes in contact with the clothes can move in opposite directions at one time; and this I claim, when the same is arranged for operation in the manner and for the purpose as herein described and set forth for the purpose specified."

No. 26,385. A. P. Torrence, of Oxford, Geo., for an "Improved machine for girdling and felling trees."

"I claim the employment or use of the handle B, provided with a cutter A, and connected to a draught lever G by the bars C, D, E, or any equivalent means, so as to operate substantially as and for the purpose set forth."

No. 26,386. Hiram Van Deuson, of Phelps, N. Y., assignor to himself and Hiram Rockefeller, of

Clifton Springs, N.Y., for an "Improved clap board gauge."

"I claim a gauge for fitting clapboards for nailing, composed of the bar A, the arm B, the slide D, with the cam and lever by which it is actuated, the stop H and the straight edge *k*, or their equivalents, constructed and arranged substantially as herein set forth."

No. 26,387. Theodore Van Deventer, of New Brunswick, N. J., for an "Improvement in rollers for printing paper hangings."

"I claim the combination of the conically bored and grooved bushes B, the concentric feathered collars D, D, the feathered and screwed shaft C, and the nuts E, E, the whole applied and operating as herein described."

No. 26,388. Nahum Washburn, of Bridgewater, Mass., for an "Improvement in dental apparatuf for the relief of pain while operating."

"I claim the combination of dental forceps or instrument for operating upon teeth with electro-magnetic mechanism, substantially as described, or its equivalent, so that the electrical current or currents may be made to flow through the nerve or nerves of the tooth, or the jaw or flesh immediately contiguous thereto, in order to benumb the same, and render such more or less insensible to pain during the performance of the dental operation; and I also particularly claim the application of the electrical apparatus to the dental instrument, so that the latter may be in or form part of the circuit, as specified."

No. 26,389. D. A. Willbanks, of Harmony Grove, Geo., for an "Improvement in threshing machines."

"I claim the peculiar construction of the wrought iron ribs I, in combination with the peculiar construction and arrangement of the cylinder heads H, to wit, the ribs with angular hooks *e*, *e*, and the cylinder heads with key seats, and with slotted projections *c*, *c*, and radial slots *d*, as and for the purpose set forth."

No. 26,390. Wm. F. Yeager, of Starkville, Miss., for an "Improvement in ploughs."

"I claim the arrangement of the land side G, the shank S, bolt P, brace T, lug, V, beam F, brace X, handles E, D, share A, cutter K, and mould board B, the whole being constructed as described, for the purposes set forth."

No. 26,391. Geo. W. Atkins, of Milton, Del., and William B. Aitkens, of Philadelphia, Pa., assignors to Geo. W. Atkins, aforesaid, and I. B. Henry, of Delaware city, Del., for an "Improvement in registering machines."

"We claim, 1st, making the ratchet wheels (C and C^1,) in pans, secured together with their notches inclined in opposite directions, as described, in combination with both an actuating and a checking pawl operating together simultaneously, as described, the same being constructed and arranged together substantially in the manner and for the purpose set forth and described. 2nd, we claim the employment of a self-righting cover (G, G^1), operating in combination with a platform (A), or its equivalent, substantially in the manner and for the purpose set forth and described; and this we claim whether the said cover (G, G^1,) be applied either to a fixed platform or floor (A), or to the moving platform of a weighing scale, connected with a registering machine, as specified. 3rd, we also claim the belt striker (F), when the same is constructed with the arms 5, 6, 7, and operated by the notches of the ratchet wheel (C), as and for the purpose set forth and described."

No. 26,392. Charles H. Denison, of Guilford, Vt., assignor to A. Miller, of Brattleborough, Vt., for an "Improved tool for finishing felloes."

"I claim, first, the above described washer, and the above described iron gauge for trimming and shaping the internal surface of felloes, and second, the above-described collar gauges for squaring the external and internal curved surfaces of the felloe."

No. 26,393. Wm. B. Dunbar, of Waterbury, Conn., assignor to himself and George H. Seymour, of Plymouth, Conn., for an "Improved ladle and fork."

"I claim the combined ladle and fork, constructed in the manner described and represented, for the purposes set forth, as a new article of manufacture."

No. 26,394. Thos. Ellis, of Philadelphia, Pa., assignor to himself, W. A. Ellis, and A. D. Ellis, of same place, for an "Improvement in casting boxes for wheel hubs."

"I claim supporting the sand core E between two sand heads F, when the above parts are employed in connection with a sand mold C, in the manner herein shown and described."

No. 26,395. Richard Fitzgerald, of Newark, N.J., assignor to James Booth, of same place, for an "Improvement in machines for forming hat bodies."

"I claim, 1st, distributing the fur C, on the former L, by discharging the same through an annular opening b^1, over and co-centric, with the primer L, substantially as herein set forth. 2nd, the employment or use of the stationary shell O, provided with the recess *p*, cards or pickers *q*, *r*, and having within it the co-centric rotary wheels P, Q, one or more, also provided with cards or pickers *v*, *u*, and with or without fan blades *w*, when said parts are arranged relatively with the former L, to operate substantially as described. 3rd, the employment or use of the slide G, with the sliding tube or pipe H, fitted within therein, containing the former shaft J, the box F, and elastic belt *l*, or its equivalent, the above parts being arranged relatively with the suction fan C, and the shell O and wheels P, Q, substantially as and for the purpose specified."

No. 26,396. Geo. N. Hall, of Mamakating, N. Y., assignor to himself and S. Arthur and J. Pierce, of said Mamakating, and S. D. Arthur, of New York, N. Y., for an "Improvement in horse hay rakes."

"I claim the arrangement of the main lever H, intermediate link *h*, auxiliary lever *e*, connecting rod *d*, cam *k*, arm *c*, rake-head G, *b*, and slotted brace bar F, and driver's seat D, substantially as and for the purposes set forth."

No. 26,397. James W. McLean, of Indianapolis, Ind., assignor to himself and Edwin May, of same place, for an "Improvement in steam ploughs."

"The arrangement of the plows *h*, gearing V, W, X, cutters *b*, lever T, and connecting rod S, in combination with the universal jointed shaft U, M, M, when operated in connection with the steam engine, substantially as set forth."

No. 26,398. John P. Kemp, of Charlestown, Mass., assignor to N. F. Stevens, of Moultonboro', N. H., for an "Improvement in peg tubes and drivers."

"I claim constructing the interior peg guiding portion of the tube, of a form made up of corners, or angles and surfaces, substantially as described, and so that while the cross section or area thereof is materially greater than that of the peg, to admit of a driver of increased strength, and of materially greater cross section or area than that of the peg working therein, said tube, in its peg guiding portion, serves by its corners, or angles and surfaces, to restrain the peg from lateral skake or play."

No. 26,399. Warren Nichols, of Lima, O., assignor to himself and Thos. Ghormley, of Stokes, O., for an "Improvement in cattle pumps."

"I claim, the combination with the covers L, L^1, of stops, which will open the trough, when its corresponding platform rises to its highest position, and close it when the platform descends to its lowest position, as herein described, for the purpose set forth. Second, the arrangement described of the spout I, in combination with the arm *k*, or with some other part, operated by the descent of one of the platforms, by which the direction of the water is changed near the close of the descent of the platform, as set forth, for the purpose stated."

No. 26,400. Geo. H. Reynolds, of New York, N.Y., assignor to Caleb Barston, and D. D. Badger, of same place, for an "Improvement in cut-off valves of steam engines."

"I claim the arrangement within each steam chest of a rotary engine, of the starting and reversing valve, having the cut-off valve in combination therewith, the two being so coupled and operating that the starting or reversing may be effected without coupling or uncoupling any of the connecting parts, substantially in the manner set forth."

No. 26,401. NANCY P. BRASHEAR, of the parish of St. Mary, La., executrix of Robt. B. Brashear, late of Pattersonville, La., for an "Improved mode of applying sulphurous acid gas in the defecation of cane juice."

"I claim subjecting sugar cane juice, or other saccharine liquid, to the direct action of the fumes of burning sulphur, such liquid being employed in a diffused state, as set forth, so that every or nearly every portion of the whole body of liquid is brought in contact with the same, almost simultaneously, substantially as and for the purposes set forth."

No. 26,402. REBECCA H. WILLSON, of Washington, D. C., administratrix of the estate of John M. Willson, deceased, late of same place, for an "Improvement in fastening for cartridge boxes."

"I claim a cartridge-box fastening composed of hinged lever and spring, said spring serving to hold the lever open or closed, and said lever, by the aid of said spring, clamping the flap of the cartridge-box between itself and the side of said box, substantially as herein represented."

RE-ISSUES.

WILLIAM BUTCHER and WILLIAM A. BUTCHER, of Philadelphia, Pa., for an "Improvement in coating metallic surfaces."—Patented 29th June, 1858. —Re-issued 6th December, 1859.

"We claim the combined process, substantially as herein described, of coating metals with the composition made of india rubber or allied gum, dissolved in and combined with linseed oil in a heated state, in proportions substantially such as set forth, by first heating the metal to be coated to about 350 degrees, applying the composition to the metal surface while so heated, and then subjecting the metal so coated to about two hundred degrees of heat, substantially as described."

EXTENSIONS.

THOMAS D. BURRALL, of Geneva, N.Y., for an "Improvement in corn shellers."—Patented 6th December, 1845.

"I claim making the concave plate or disc with a concave face and circular opening, provided with a lower and upper lip for the discharge of the cobs, in combination with the sheller, and with the shell or bottom, and also with the door or valve in the side for the broken cobs, &c., and also the cylindrical hopper and spring in combination with the feeder, all as herein described."

JAMES HAMILTON, of New York, N.Y., for an "Improvement in dredging machines."—Antedated 16th December, 1845.—Dated 30th March, 1852.

"I claim the shovels or scoops *h*. forming the bottoms of compartments in a proper frame, and moving at one end on a hinge or similar contrivance, the other end being lowered to cause the scoop, as the frame is moved along, to collect the sand or mud, or other material operated on, and retain the same by suitable mechanical means, operating to lift the scoop and close the bottom, as described and shown."

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1720.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated 16th March* 1744.) Price

---

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).
Stirling (*Burgh Library, Town House, Broad Street*).
Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Königliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville. } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. Drain Tiles and Pipes, price 6*d.*
2. Sewing and Embroidering, price 6*d.*
3. Manure, price 6*d.*
4. Preservation of Food, price 6*d.*
5. Marine Propulsion, price 4*s.*
6. Manufacture of Iron and Steel, price 5*s.*
7. Aids to Locomotion, price 1*s.*
8. Steam Culture, price 2*s.*
9. Watches, Clocks, and other Timekeepers, price 1*s.* 6*d.*
10. Fire-arms and other Weapons, Ammunition, and Accoutrements, price 6*s.* 6*d.*
11. Paper.—Part I. Manufacture of Paper, Pasteboard, and Papier Mâché, price 3*s.*
12. Paper.—Part II. Cutting, Folding, and Ornamenting; including Envelopes, Cards, Paper-hangings, &c., price 2*s.*
13. Typographic, Lithographic, and Plate Printing, price 7*s.*
14. Bleaching, Dyeing, and Printing Yarns and Fabrics, price 9*s.* 6*d.*
15. Electricity and Magnetism: their Generation and Applications, price 8*s.* 6*d.*
16. Manufacture and Applications of India Rubber, Gutta Percha, &c.; including Air, Fire, and Water Proofing, price 10*s.*

The following are in the press:—

Preparation of Fuel, and Apparatus for its Combustion.
Production and Applications of Gas.
Steam Engines.
Metals and Alloys.

B. Woodcroft.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 624. TUESDAY, DECEMBER 27, 1859. Price 2d.

Notices to Proceed.

NOTICE is hereby given, that

1867. DUGALD CAMPBELL, of No. 7, Quality Court, Chancery Lane, in the county of Middlesex, Consulting Chemist, has given notice at the Office of the Commissioners of his intention to proceed with his application for Letters Patent for the invention of "Improvements in the preparation of oils for medicinal and other purposes."

1873. And CARL BÜHRING, of No. 45, St. Paul's Road, Camden Town, in the county of Middlesex, Gentleman, has given the like notice in respect of the invention of "An improvement in obtaining spring power, and in its application to various purposes."

As set forth in their respective petitions, both recorded in the said office on the 13*th day of August*, 1859.

1879. And SAMUEL HARRISON, of 52, Stanhope Street, Clare Market, in the parish of St. Clement Danes, county of Middlesex, has given the like notice in respect of the invention of "Broiling of chops or any other kind of meat."

1885. And JOHN POUPARD, of Stratford, in the county of Essex, has given the like notice in respect of the invention of "A certain plastic combination to be used for blackleading stoves and other iron-work."

As set forth in their respective petitions, both recorded in the said office on the 15*th day of August*, 1859.

1893. And HENRY MEDLOCK, of Nos. 15 and 20, Great Marlborough Street, in the city and liberty of Westminster, Analytical Chemist, has given the like notice in respect of the invention of "Improvements in Portland and Roman cement, lime, and other similar kilns or furnaces."

1897. And AUGUSTUS YOCKNEY, of Pockeredge, near Chippenham, in the county of Wilts, Gentleman, has given the like notice in respect of the invention of "Improvements in refining and compounding oils or fatty matters with other substances for lubricating and other purposes."

As set forth in their respective petitions, both recorded in the said office on the 17*th day of August*, 1859.

1898. And WESTON GRIMSHAW, of Lower Broughton, near the city of Manchester, Gentleman, and SAMUEL MASON, junr., of the city of Manchester, Machinist, have given the like notice in respect of the invention of "Improvements in machinery and apparatus employed in washing, bowking, bleaching, and preparing flax and other substances."

1900. And ADOLPHE JOSEPH CANU, of Paris, France, Civil Engineer, has given the like notice in respect of the invention of "Improvements in machines for breaking or crushing stones, minerals, or other similar materials."

As set forth in their respective petitions, both recorded in the said office on the 18*th day of August*, 1859.

1904. And PETER SALMON, of Glasgow, in the county of Lanark, Merchant, has given the like notice in respect of the invention of "Improvements in locomotives, and in apparatus for warming trains of carriages connected thereto."

As set forth in his petition, recorded in the said office on the 19*th day of August*, 1859.

1911. And EDWIN HARDON, of Stockport, in the county of Chester, Manufacturer, has given the like notice in respect of the invention of "Certain improvements in looms for weaving."

1912. And WILLIAM FINEGAN, of Belfast, in the county of Antrim, Ireland, Engineer, has given the like notice in respect of the invention of "Improvements in apparatus for lubricating machinery."

1914. And GEORGE WILLIAM PETTER and THOMAS DIXON GALPIN, both of Belle Sauvage Yard, Ludgate Hill, in the city of London, Printers

and Copartners, have given the like notice in respect of the invention of "Improvements in printing presses."

1917. And JOSEPH JEPSON ODDY TAYLOR, of Mark Lane, in the city of London, Naval Engineer, has given the like notice in respect of the invention of "An improvement in the separation of silex and silicious matter from iron."

1920. And HENRY PARKES, of Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "Improvements in the manufacture of cylinders and tubular or hollow bodies of copper and alloys of copper or other ductile metals."

1922. And OLIVER MAGGS, of Bourton, in the county of Dorset, has given the like notice in respect of the invention of "Improvements in taps, cocks, or valves."

As set forth in their respective petitions, all recorded in the said office on the 22nd day of August, 1859.

1931. And GEORGE PEARSON, of the city of Manchester, in the county of Lancaster, Machinist, has given the like notice in respect of the invention of "Improved machinery for manufacturing boot and shoes."

1933. And JOSEPH HENRY, of Bury, in the county of Lancaster, and JAMES EDWARD HYDE ANDREW, of Audenshaw, in the said county, Machinists, have given the like notice in respect of the invention of "Improvements in looms for weaving."

1934. And JOHN BLAKE, of Accrington, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Improvements in steam and vacuum gauges."

As set forth in their respective petitions, all recorded in the said office on the 24th day of August, 1859.

1941. And AMOS PIERCE CHAMBERLAIN, of New Orleans, in the United States of America, but at present residing in London, Engineer, has given the like notice in respect of the invention of "Improvements in machinery or apparatus for cutting cork, part of which improvements is also applicable to cutting paper, caoutchouc, and other substances."

As set forth in his petition, recorded in the said office on the 25th day of August, 1859.

1959. And JOSEPH WHITWORTH, of the city of Manchester, in the county of Lancaster, Engineer, has given the like notice in respect of the invention of "Improvements in ordnance, fire-arms, and ammunition.

1960. And THOMAS MERITON, of No. 39, Pinnasberg, St. Pauli, Hamburgh, Engineer, has given the like notice in respect of the invention of "Improvements in governors for regulating the speed of marine and other engines and machinery."

1963. And WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, has given the like notice in respect of the invention of "Certain improvements in sewing and stitching by machinery."—A communication from abroad by Kasimir Vogel, of Chelsea, in the county of Suffolk, state of Massachusetts.

As set forth in their respective petitions, all recorded in the said office on the 29th day of August, 1859.

1971. And JAMES HARE, of Hamstead Road, Handsworth, near Birmingham, Music Smith, has given the like notice in respect of the invention of "Improvements in pianofortes."

As set forth in his petition, recorded in the said office on the 30th day of August, 1859.

1995. And THOMAS AVELING, of Rochester, in the county of Kent, has given the like notice in respect of the invention of "Improvements in locomotive engines."

1997. And ROBERT HANHAM COLLYER, of 8, Alpha Road, Regent's Park, in the county of Middlesex, Doctor of Medicine and Philosophy, has given the like notice in respect of the invention of "Improvements in preparing materials for the manufacture of paper."

As set forth in their respective petitions, both recorded in the said office on the 1st day of September, 1859.

2008. And JEAN FRANÇOIS FELIX LEROUX, of 29, Boulevart St. Martin, Paris, in the empire of France, Merchant, has given the like notice in respect of the invention of "A new or improved apparatus to be employed for taking money on the counters."

As set forth in his petition, recorded in the said office on the 2nd day of September, 1859.

2028. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improvements in sewing machines."—A communication from abroad by Henry Washington Hayden, of Waterbury, in the state of Connecticut, United States of America.

2029. And ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, has given the like notice in respect of the invention of "Improvements in weighing machines."—A communication from abroad by John Howe, jun., and Frank E. Howe, both of New York, and Francis Miles Strong and Thomas Ross, both of Brandon, county of Rutland, and state of Vermont, United States.

As set forth in his respective petitions, both recorded in the said office on the 5th day of September, 1859.

2058. And MATTHEW MURRAY JACKSON, of Zurich, in the republic of Switzerland, Engineer, has given the like notice in respect of the invention of "Improvements in generating steam for condensing engines."

As set forth in his petition, recorded in the said office on the 9th day of September, 1859.

2135. And LOUIS ENGLER and ERNEST FRÉDÉRIC KRAUSS, Manufacturers, of No. 29, Boulevart St. Martin, Paris, in the empire of France, have given the like notice in respect of the invention of "A new or improved system of insulators for electric wires."

As set forth in their petition, recorded in the said office on the 19th day of September, 1859.

2179. And Joseph Villet-Collignon, Literary Man, and Louis George, Typographer, of Paris, 29, Boulevart St. Martin, in the empire of France, have given the like notice in respect of the invention of "Improvements in the typography."
As set forth in their petition, recorded in the said office on the 26th day of September, 1859.

2187. And Thomas Beards, of Stowe, in the county of Bucks, has given the like notice in respect of the invention of "Improvements in ploughing and cultivating land by steam power, and in machinery used for such purposes."
As set forth in his petition, recorded in the said office on the 27th day of September, 1859.

2206. And Edward Hammond Bentall, of Heybridge, near Maldon, in the county of Essex, Ironfounder, has given the like notice in respect of the invention of "Improvements in screw presses."
As set forth in his petition, recorded in the said office on the 29th day of September, 1859.

2244. And Samuel Robert English, Seal Engraver and General Die Sinker, of Birmingham, in the county of Warwick, has given the like notice in respect of the invention of "A machine or apparatus for taking copies of writing."
As set forth in his petition, recorded in the said office on the 4th day of October, 1859.

2417. And Richard Archibald Brooman, of 166, Fleet Street, in the city of London, E.C., Patent Agent, has given the like notice in respect of the invention of "A method of preparing inoxidizable oils and fats to be employed as lubricating substances."—A communication from abroad by Jules Roth, of Mulhouse, France.
As set forth in his petition, recorded in the said office on the 22nd day of October, 1859.

2566. And Augustin Jacquelain, of Paris, in the French empire, Chemist, has given the like notice in respect of the invention of "Improvements in the manufacture of carbon and in apparatus employed therein."
As set forth in his petition, recorded in the said office on the 11th day of November, 1859.

2632. And Joseph Cowan, of Liverpool, in the county of Lancaster, Cabinet Maker, has given the like notice in respect of the invention of "Improvements in 'bracing' or connecting the angles or corners of chairs, and other like articles of cabinet-furniture."
As set forth in his petition, recorded in the said office on the 21st day of November, 1859.

2638. And Edward Thomas Hughes, of the firm of Hughes and Son, Patent Agents, No. 123, Chancery Lane, London, W.C., has given the like notice in respect of the invention of "Improvements in weaving silk and other materials, and in the machinery or apparatus employed therein."—A communication from abroad by Horace Verzier, Manufacturer, residing at Lyon, in the empire of France.

2643. And Thomas Barbabas Daft, of Tottenham, in the county of Middlesex, Civil Engineer, has given the like notice in respect of the invention of "An improvement in coating sheathing metal."
As set forth in their respective petitions, both recorded in the said office on the 22nd day of November, 1859.

2675. And Ferdinand Scheithauer, of Pensing, in the empire of Austria, and No. 4, South Street, Finsbury, London, Gentleman, has given the like notice in respect of the invention of "An improved machine for printing woollen and other fabrics."
As set forth in his petition, recorded in the said office on the 26th day of November, 1859.

2692. And Charles Sells, of Stockwell, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in steam engines."
As set forth in his petition, recorded in the said office on the 28th day of November, 1859.

2720. And James Cocks, of No. 25, Cornhill, in the city of London, Tailor, has given the like notice in respect of the invention of "Improvements in the mode of manufacturing cloths or materials for trowserings."

2724. And George Davidson, of Mugie Moss, in the county of Aberdeen, Paper Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of paper bags, and in the machinery or apparatus used therein."
As set forth in their respective petitions, both recorded in the said office on the 1st day of December, 1859.

2727. And William Betts, of Wharf Road, City Road, in the county of Middlesex, Capsule Manufacturer, has given the like notice in respect of the invention of "Improvements in the manufacture of capsules, and in the machinery or apparatus employed therein."
As set forth in his petition, recorded in the said office on the 2nd day of December, 1859.

2754. And William Hutton, of West Hartlepool, im the county of Durham, Gentleman, has given the like notice in respect of the invention of "Improvements in preventing the destruction of the timbers of piers, docks, and other structures by the action of sea worms, or other marine animals."
As set forth in his petition, recorded in the said office on the 5th day of December, 1859.

2758. And Charles Sells, of Stockwell, in the county of Surrey, Engineer, has given the like notice in respect of the invention of "Improvements in marine steam engines for driving screw and other propellers."
As set forth in his petition, recorded in the said office on the 6th day of December, 1859.

2767. And James Anderson, of Newton, in the county of Ayr, North Britain, has given the like notice in respect of the invention of "Improvements in obtaining motive power."
As set forth in his petition, recorded in the said office on the 7th day of December, 1859.

2778. And William Spence, of 50, Chancery Lane, in the county of Middlesex, Patent Agent, has given the like notice in respect of the invention

of "Improvements in rotating harrows."—A communication from abroad by Sidney S. Hogle, of Cleveland, in the county of Cuyahoga, and state of Ohio, United States.

As set forth in his petition, recorded in the said office on the 8th day of December, 1859.

2794. And JOEL SPILLER, of Cardiff, in the county of Glamorgan, South Wales, Civil Engineer, has given the like notice in respect of the invention of "Improvements in drying articles or bodies formed of plastic clay."

2798. And WILLIAM BETTS, of Wharf Road, City Road, in the county of Middlesex, Capsule Manufacturer, has given the like notice in respect of the invention of "An improved manufacture of capsules."

As set forth in their respective petitions, both recorded in the said office on the 9th day of December, 1859.

2805. And JAMES FARQUHAR, of the city and county of Aberdeen, North Britain, Clerk, has given the like notice in respect of the invention of "Improvements in gas meters."

2806. And WILLIAM WHITELEY, of Lockwood, near Huddersfield, in the county of York, Machinist, has given the like notice in respect of the invention of "Improvements in looms for weaving."

As set forth in their respective petitions, both recorded in the said office on the 10th day of December, 1859.

2817. And PATRICK STIRLING, of Kilmarnock, in the county of Ayr, North Britain, has given the like notice in respect of the invention of "Improvements in traction engines."

As set forth in his petition, recorded in the said office on the 12th day of December, 1859.

2830. And JOHN BARLING, of Belle Grange, in the county of Lancaster, Gentleman, has given the like notice in respect of the invention of "Improvements in propelling vessels."

As set forth in his petition, recorded in the said office on the 13th day of December, 1859.

2873. And THADDEUS FAIRBANKS, of St. Johnsbury, in the county of Caledonia, and State of Vermont, of the United States of America, has given the like notice in respect of the invention of "An improved scale for weighing letters."

As set forth in his petition, recorded in the said office on the 17th day of December, 1859.

And notice is hereby further given, that all persons having an interest in opposing any one of such applications are at liberty to leave particulars in writing of their objections to such application, at the said Office of the Commissioners, within twenty-one days next after the date of the Gazette [and of the Journal] in which this notice is issued.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 24th December,* 1859, *inclusive.*)

22nd December.

3102. WILLIAM BRAY, of Folkestone, in the county of Kent, Engineer, for an invention of "Improvements in traction engines."—Dated 31st December, 1856.

23rd December.

3060. CHARLES SYLVESTER ROSTAING, of Dresden, in the kingdom of Saxony, for an invention of "Improvements in preparing and combining metallic substances for the production of colours, and in manufacturing the same."—Dated 26th December, 1856.

3079. JAMES PETRIE and WILLIAM MCNAUGHT, of Rochdale, in the county of Lancaster, Engineers, for an invention of "Improvements in steam-engines."—Dated 27th December, 1856.

3082. GEORGE RITCHIE, of Ponsonby Street, in the county of Middlesex, for an invention of "Improvements in the manufacture of beds and mattresses."—Dated 27th December, 1856.

24th December.

3055. JAMES SAMSON BARRACLOUGH, of Halifax, in the county of York, Dye-Ware Grinder, for an invention of "Improvements in the means, machinery, or apparatus used for grinding dye wares." Dated 24th December, 1856.

Patents on which the Stamp Duty of £100 has been Paid.

(*To 22nd December,* 1859.)

1161. GEORGE BOWER, of Saint Neots, in the county of Huntingdon, Ironmonger and Ironfounder, for an invention of "Improvements in the manufacture of gas for illumination."—Dated 24th December, 1852.

1192. ARCHIBALD DOUGLAS BROWN, of Glasgow, in the county of Lanark, North Britain, Cabinet Maker, for an invention of "Improvements in the construction of portable articles of furniture."——Dated 29th December, 1852.

21. JEAN BAPTISTE PASCAL, of Lyons, in the empire of France, and of 16, Castle Street, Holborn, in the county of Middlesex, for an invention of "Improvements in obtaining motive-power."—Dated 5th January, 1853.

List of Specifications published during the week ending 23rd December, 1859.

No.	Price.	Subject-Matter.
924	5*d.*	Fire-bars.
1214	10*d.*	Fire-bars.
1215	3*d.*	Blast furnaces.
1216	5*d.*	Smoothing iron.
1217	3*d.*	Musical instruments.
1218	3*d.*	Envelopes, &c.
1219	9*d.*	Pressure gauges.
1220	3*d.*	Manure.
1221	3*d.*	Manufacture of steel for sharpening knives.
1223	9*d.*	Buffers and springs.
1224	7*d.*	Distillation of schist, &c.
1225	3*d.*	Manufacture of hooped petticoats.
1226	3*d.*	Composition for splitting rock.
1227	10*d.*	Apparatus for obtaining and applying motive power.
1228	7*d.*	Locks.
1229	10*d.*	Steam cultivators.
1230	3*d.*	Apparatus for sawing and cutting up loaf sugar.
1231	7*d.*	Counteracting the recoil of small arms.
1232	7*d.*	Winding apparatus for mines.
1233	3*d.*	Dressing and weaving machines.
1234	3*d.*	Carriages, &c.
1235	3*d.*	Spinning machines.
1236	3*d.*	Portable corn mills.
1237	7*d.*	Lubricating machines.
1238	8*d.*	Heating.
1239	5*d.*	Hardening and vulcanizing compounds of sulphur with india-rubber and gutta percha.
1240	8*d.*	Stud fastenings, &c.
1241	10*d.*	Swing looking-glasses.
1242	10*d.*	Hydraulic machinery.
1243	6*d.*	Artificial teeth, &c.
1244	7*d.*	Gas burners.
1245	3*d.*	Manufacture of iron, &c.
1246	3*d.*	Manufacture of steel.
1247	4*d.*	Calcining ores, &c.
1248	3*d.*	Coffer-dams.
1249	5*d.*	Propelling vessels.
1250	1*s.* 1*d.*	Manufacture of tin and terne platês.
1251	10*d.*	Thrashing and winnowing machines.
1252	3*d.*	Harmonicon pianoforte.
1253	5*d.*	Lubricating and other cans.
1254	3*d.*	Manufacture of salt.
1255	3*d.*	Cartridges.
1256	3*d.*	Traction engines, &c.

*** Specifications will be forwarded by post on receipt of the amount of price and postage. Sums exceeding 5*s.* must be remitted by Post Office Order, made payable at the Post Office, High Holborn, to Mr. Bennet Woodcroft, Great Seal Patent Office.

DELIVERY OF LETTERS.—For the Great Seal Patent Office the initials are W. C., the District being the Western Central. In the direction of a Letter, these initials should be legibly written in a separate line, and should in all cases end the address, thus:—

The Commissioners of Patents,
Great Seal Patent Office,
25, Southampton Buildings,
London,
W.C.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by Bennet Woodcroft, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By Simon Sturtevant. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By John Rovinson (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether Nicholas Page or Sir Nicholas Halse was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated* 8*th April*, 1626, *and* 23*rd July*, 1635.) Price 2*d.*
4. Dud Dudley's Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated* 22*nd February*, 1620, *and* 2*nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by William Wheler, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated* 24*th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) Edward Somerset, Lord Marquis of Worcester, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By Thomas Savery. (*Letters Patent. No.* 347, *dated* 10*th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By Thomas Savery. (*Letters Patent, No.* 356, *dated* 25*th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By John Allen, M.D. (*Letters Patent, No.* 513, *dated* 7*th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By Jonathan Hulls. (*Letters Patent, No.* 556, *dated* 21*st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By Samuel Sutton, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated* 16*th March* 1744.) Price

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

A FREE LIBRARY and READING ROOM, in connection with the Office of the Commissioners of Patents, is open to the Public daily from 10 till 4 o'clock.

In addition to the Printed Specifications, Indexes, and other publications of the Commissioners, the Library includes a Collection of the leading British and Foreign Scientific Journals, and text-books in the various departments of science and art. A printed Catalogue of the Library is on sale.

NOTE.—The Commissioners' publications may be consulted daily in the Library of the British Museum; in the Library of the Society of Arts; and in the Free Libraries of the following Towns and Cities:—

Aberdeen (*Public Library Town House*).
Accrington (*Mechanics' Institution, Bank Street*).
Belfast (*Harbour Office, Corporation Square*).
Beverley (*Guildhall*).
Birmingham (*Birmingham and Midland Institute, Cannon Street*).
Bolton-le-Moors (*Public Library, Exchange Buildings*).
Bradford, Yorkshire (*Borough Accountant's Office, Corporation Buildings, Swain Street*).
Brighton (*Town Hall*).
Bristol (*City Library, King Street*).
Burnley (*Office of the Burnley Improvement Commissioners*).
Cambridge (*Free Library, Jesus Lane*).
Canterbury (*Municipal Museum, Guildhall Street*).
Carlisle (*Free Library, Police Office*).
Chester (*Town Hall, Northgate Street*).
Cork (*Royal Cork Institution, Nelson Place*).
Crewe (*Railway Station*).
Darlington (*Mechanics' Institute, Skinnergate*).
Dorchester.
Drogheda.
Dublin (*Royal Dublin Society, Kildare Street*).
Dundalk.
Falmouth (*Public Library, Church Street*).
Gateshead (*Mechanics' Institute*).
Gorton (*Railway Station*).
Glasgow (*Stirling's Library, Miller Street*).
Grimsby, Great (*Mechanics' Institution, Victoria Street*).
Hanley, Staffordshire Potteries (*Town Hall*).
Hartlepool, West (*Literary and Mechanics' Institution, Church Street*).
Hertford (*Public Library, Town Hall*).
Huddersfield (*Commissioners' Offices, No. 1, South Parade*).
Hull (*Mechanics' Institute, George Street*).
Ipswich (*Museum Library, Museum Street*).
Keighley (*Mechanics' Institute, North Street*).
Kidderminster (*Public Free Library, Public Buildings, Vicar Street*).
Kings' Lynn, Norfolk (*Stanley Library, Athenæum*).
Lancaster (*Mechanics' Institute, Market Street*).
Leamington Priors (*Public Library, Town Hall*).
Leeds (*Town Clerk's Office, Town Hall*).
Leicester (*Corporation Library, Town Hall*).
Limerick.
Liverpool (*Free Public Library, Duke Street*).
——— (*Royal Institution*).
London (*British Museum*).
——— (*Society of Arts, John Street, Adelphi*).
Macclesfield (*Useful Knowledge Society*).
Maidstone.
Manchester (*Chetham Hospital*).
——— (*Free Library, Camp Field*).
Montrose.
Newark, Nottingham (*Mechanics' Institute, Middle Gate*).
Newcastle-upon-Tyne (*Literary and Philosophical Society*).
Newport, Monmouth (*Commercial Room, Town Hall*)
Northampton.
Norwich (*Free Library, St. John's, Maddermarket*).
Nottingham (*Corporation Rooms, St. Peter's Church side*).
Oxford (*Public Free Library Town Hall*).
Paisley (*Government School of Designs, Gilmour Street*).
Plymouth (*Mechanics' Institute, Princess Square*).
Preston (*Dr. Shepherd's Library, the Institution, Avenham*).
Reading (*Literary, Scientific and Mechanics' Institution, London Street*).
Rochdale (*Commissioners Room, Smith Street*).
Rotherham (*Board of Health Offices, Howard Street*).
Salford (*Peel Park*).
Sheffield (*Free Library, Surrey Street*).
Shrewsbury (*The Public Museum, College Street*).
Southampton (*Corporation Library, Audit House*).

Stockport (*Court House, Vernon Street, Warren Street*).
Sunderland (*Corporation Museum, Athenæum, Fawcett Street*).
Tiverton.
Wakefield (*Mechanics' Institution, Barston Square*).
Warrington (*The Museum and Library*).
Waterford (*Town Hall, The Mall*).
Wednesbury (*Board of Health Offices*).
Wexford (*Mechanics' Institute, Crescent Quay*).
Wigan.
Wolverhampton (*School of Practical Art, Darlington Street*).
Wolverton (*Railway Station*).
Yarmouth, Norfolk (*Public Library, South Quay*).
York (*Lower Council Chamber, Guildhall*).

The Commissioners' publications have also been presented to the following Public Offices, Seats of Learning, British Colonies, and Foreign States:—

Public Offices, Institutions, &c.

Admiralty, Department of the Surveyor of the Navy.
——— Steam Branch.
——— Deptford Dockyard.
——— Woolwich ditto.
——— Chatham ditto.
——— Sheerness ditto.
——— Portsmouth ditto.
——— Devonport ditto.
——— Pembroke ditto.
Artillery Institute, Woolwich.
Board of Trade, Whitehall.
Ordnance Office, Pall Mall.
——— Small Arms Factory, Enfield.
War Office, Pall Mall.
Government School of Mines, &c., Jermyn St., Piccadilly.
Dublin Castle, Dublin.
Rolls Office, Chancery (Four Courts), Dublin.
Office of Chancery, Edinburgh.
East India House, Military Stores, Leadenhall Street.
Incorporated Law Society Chancery Lane, London.

Seats of Learning.

Cambridge University.
Trinity College, Dublin.
Queen's College, Galway.
University College, London.

British Colonies.

Malta.
Cape of Good Hope.
Mauritius.
India—Bengal.
North-West Provinces.
Madras.
Bombay.
Ceylon.
Victoria—Patent Office, Melbourne.
Parliamentary Library, Melbourne.
New South Wales.
South Australia.
Tasmania.
New Zealand.
Newfoundland.
Canada—Quebec.
Toronto.
New Brunswick.
Prince Edward Island.
Antigua.
Barbados.
Jamaica.
Trinidad.
British Guiana.

Foreign States.

Austria—Handels Ministerium, Vienna.
Bavaria—Konigliche Bibliothek, Munich.
Belgium—Ministère de l'Intérieur, Brussels.
France—Bibliothèque Impériale, Conservatoire des Arts et Métiers, Hôtel de Ville, } Paris.
Gotha—Ducal Friedenstein Collection.
Hanover—Ministerium des Innern, Hanover.
Netherlands—Ministère de l'Intérieur, The Hague.
Prussia—Handels Ministerium, Berlin.
Russia—Bibliothèque Impériale, St. Petersburg.
Sardinia—Ufficio delle Privative, Turin
Saxony—Polytechnische Schule, Dresden.
Sweden—Stockholm.
United States—The Patent Office, Washington.
The Astor Library, New York.
The State Library, Albany.
The Franklin Institute, Philadelphia.
The Free Library, Boston.
The Philadelphia Library Company.
Wurtemberg—Bibliothek des Musterlagers, Stuttgart.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period—*Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First-Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

Museum of Patents, South Kensington.

NUMBER of VISITORS for the Week ending 24th December, 1859.

Mornings - - - -	612
Evenings - - - -	521
Total - - -	1133

Since the opening of the Museum Free Daily (May 12, 1858,)—168,226.

THIS Museum is open to the public daily, free of charge. The hours of admission are from 10 A.M. to 6 P.M., and in the evenings of Monday, Tuesday, and Wednesday from 7 to 10 P.M.

All communications on the subject of the Museum to be addressed to the Superintendent,

B. WOODCROFT.

Great Seal Patent Office,
Southampton Buildings.

GALLERY OF PORTRAITS OF INVENTORS, DISCOVERERS, AND INTRODUCERS OF USEFUL ARTS.—This Collection, formed by Mr. Woodcroft, and first opened to public view in the Great Seal Patent Office in 1853, now constitutes a portion of the Patent Museum at South Kensington.

Presentations of original Portraits, Medallions, Busts, and Statues, in augmentation of the Collection, are hereby invited, and will on receipt be acknowledged in this Journal, and duly recorded in the next published Catalogue.

CATALOGUE of the LIBRARY of the GREAT SEAL PATENT OFFICE. Two vols. imp. 8vo. (Vol. I. Titles; Vol. II. Index.) Price 21*s.*

PATENTS BECOME VOID, &c.—The following are the numbers of this Journal in which have appeared the Quarterly Lists of Patents become Void by reason of non-payment of the Duty of £50 :—

No. of Journal.	Periods embraced by the Lists.
234 -	A.D. 1852—October to December inclusive.
247 -	A.D. 1853—January to March ,,
268 -	,, April to June ,,
291 -	,, July to September ,,
321 -	,, October to December ,,
345 -	A.D. 1854—January to March ,,
371 -	,, April to June ,,
399 -	,, July to September ,,
424 -	,, October to December ,,
451 -	A.D. 1855—January to March ,,
475 -	,, April to June ,,
505 -	,, July to September ,,
527 -	,, October to December ,,
553 -	A.D. 1856—January to March ,,
579 -	,, April to June ,,
605 -	,, July to September ,,

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIMEKEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers.—Terms, 30*s.* per annum.—Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

THE

COMMISSIONERS OF PATENTS' JOURNAL.

By Authority.

(*Registered for transmission abroad.*)

No. 625. FRIDAY, DECEMBER 30, 1859. Price 2d.

Grants of Provisional Protection for Six Months.

NOTICE is hereby given that Provisional Protection has been allowed

1924. To ASHFIELD CHURCH HOPE, of No. 60, Cornhill, in the city of London, Gentleman, for the invention of "The manufacture of a new material from Spanish moss, applicable as a substitute for horse-hair."—A communication from abroad by William Amos Scarbrough Westoby, of No. 45, Rue Taitbout, Paris, France.

On his petition, recorded in the Office of the Commissioners on the 23rd day of August, 1859.

2715. To ACHILLE MERCIER, of Louviers, in the department of the Eure, in the empire of France, Engineer, for the invention of "A machine for felting the rovings, stubs, and threads or yarns of wool and other fibrous materials."

On his petition, recorded in the office of the Commissioners on the 1st day of December, 1859.

2861. To JOHN LANGLEY KING, of 56, Well Street, Oxford Street, London, Lecturer at the Royal Polytechnic Institution, for the invention of "A submarine lamp and safety lamp for mines and other useful purposes."

2863. To WILLIAM MOSLEY, junior, of Salford, in the county of Lancaster, Manager, for the invention of "Certain improved machinery or apparatus for washing, scouring, or cleansing textile fabrics or materials."

2865. To JOSEPH JEFFREY BENNETT, of Homer Terrace, Victoria Park, in the county of Middlesex, Civil Engineer, for the invention of "An improved construction of fluid meter."

2867. And to ROBERT MORRISON, of the town and county of the town of Newcastle-upon-Tyne, Engineer, for the invention of "Improvements in double and single action steam hammers."

On their several petitions, recorded in the Office of the Commissioners on the 16th day of December, 1859.

2869. To FRIEDRICH HOCHSTAETTER and HEINRICH HOCHSTAETTER, of Gresham Street, City, for the invention of "The preparation of a substitute for gunpowder."

2871. To FRANK CLARKE HILLS, of Deptford, in the county of Kent, Manufacturing Chemist, for the invention of "Improvements in means and apparatus for purifying gas, and in the preparation and treatment of oxides of iron to be used in such purification, or for other purposes."

2877. To PETER SPENCE, of Pendleton, in the county of Lancaster, Manufacturing Chemist, for the invention of "Improvements in repairing bells injured by cracks or fractures."

2879. And to WILLIAM CLARK, of 53, Chancery Lane, in the county of Middlesex, Engineer and Patent Agent, for the invention of "Improvements in the supports or chairs of railway rails."—A communication from abroad by Messrs. Auguste Desgoffe and Leon Jucqueau, of Paris, Civil Engineers.

On their several petitions, recorded in the Office of the Commissioners on the 17th day of December, 1859.

Patents Sealed.

LIST of LETTERS PATENT which passed the Great Seal on the

30th December, 1859.

1553. LOUIS BOIGEOL, of Giromagny, near Belfors Town, in the French empire, Manufacturer, for an

invention of "Improved machinery for winding and twisting fibrous materials."—Dated 30th June, 1859.

1564. JULIAN BERNARD, of the Albany, Piccadilly, in the county of Middlesex, Gentleman, for an invention of "Improvements in uniting certain parts of boots and shoes and in the means employed therein."—Dated 30th June, 1859.

1574. ROBERT ROYDS and ANTHONY HARCOURT, both of Woolston, in the county of Hants, Engineers, for an invention of "An improved composition for protecting the bottoms of ships and other structures of iron."—Dated 1st July, 1859.

1584. HERMANN HIRSCH, of Berlin, in the kingdom of Prussia, for an invention of "Improvements in screw propellers."—Dated 2nd July, 1859.

1586. JOSEPH SIMON, residing in Paris, Passage des Petites Ecuries, No. 5, for an invention of "A composition named 'Zeiodelite,' a kind of paste which becomes as hard as stone, is unchangeable by the air, and being proof against the action of acids, may replace lead and other substances, for various uses."—Dated 4th July, 1859.

1602. JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "An improved mode of manufacture of wheel tires for railway carriages and engines by means of the herein described apparatus."—A communication from abroad by Duplay, Vidal, Lachaise, and Co., No. 10, Rue Mogador, Paris, in the empire of France."—Dated 6th July, 1859.

1608. BENJAMIN SEED, of Keighley, Grease Manufacturer, and THOMAS STEEL, of Bradford, Foreman, both in the county of York, for an invention of "Improvements in apparatus employed in the treatment of soap suds, or other saponaceous or oily matters."—Dated 6th July, 1859.

1620. WILLIAM HENRY DAWES, of Bromford Iron Works, West Bromwich, in the county of Stafford, Iron Master, for an invention of "An improvement or improvements in the manufacture of iron."—Dated 8th July, 1859.

1652. JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1 B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, Patent Agent, for an invention of "Improvements in railway car seats and arm chairs."—A communication from abroad by Bernard Joachim La Mothe, No. 10, Rue Mogador, Paris, in the empire of France.—Dated 12th July, 1859.

1662. JOHN TAYLOR, of Roupell Park, Streatham Hill, in the county of Surrey, for an invention of "Improvements in stoves and fireplaces, and in the arrangement of flues connected therewith."—Dated 13th July, 1859.

1698. JOZÉ LUIS, of the British and Foreign Office for Patents, No. 1B, Welbeck Street, Cavendish Square, London, in the county of Middlesex, (Patent Agent), for an invention of "A new system of eccentric socket adapted to axle trees."—A communication from abroad by Jean Baptiste Gaugand, No. 10, Rue Mogador, Paris, in the empire of France.—Dated 19th July, 1859.

1701. HENRI PARENT, of Roubaix, in the empire of France, Manufacturer, for an invention of "Improvements in or applicable to looms for weaving."—Dated 19th July, 1859.

1702. JOHN CHARLEY RIDDEL, of Belfast, in the county of Antrim, Ireland, for an invention of "Improvements in stalls, loose-boxes, and enclosures for horses, cows, pigs, or other animals,"—Dated 19th July, 1859.

1704. THOMAS CURTIS and JONATHAN HAIGH, both of Leeds, in the county of York, Cloth Finishers, for an invention of "Improvements in the finishing of cloths."—Dated 20th July, 1859.

1708. ZEPHIRIN GASPARD ALEXANDRE NATHAN PETRONE ORIOLI, of 29, Boulevart St. Martin, Paris, in the empire of France, Civil Engineer, for an invention of "New applications of hypochloride of alumina to bleaching and dyeing, and to the disinfection and preservation of organic matters."—Dated 20th July, 1859.

1764. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "Certain improvements in that class of fire-arms known as revolvers, and in bullets for the same."—A communication from abroad by John Walch, of New York, in the United States of America.—Dated 29th July, 1859.

2188. PASCHAL I. LEJEUNE-CHAUMONT, of Faubourg Vivegnies, 138, Liége, for an invention of "Improvements in fire arms and ordnance, and in projectiles and cartridges to be used therewith."—Dated 27th September, 1859.

2262. WILLIAM EDWARD NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Civil Engineer, for an invention of "Improvements in blankets used for printing calicoes and other fabrics, and in the mode of washing or cleaning the same."—A communication from abroad by Seth W. Baker, of Providence, Rhode Island, in the United States of America.—Dated 5th October, 1859.

2490. ALFRED VINCENT NEWTON, of the Office for Patents, 66, Chancery Lane, in the county of Middlesex, Mechanical Draughtsman, for an invention of "An improved mode of and apparatus for condensing and cooling vapour and fluids."—A communication from abroad by Aranias Smith, of Niagara Falls, in the United States of America.—Dated 1st November, 1859.

Patents on which the Stamp Duty of £50 has been Paid.

(*To 28th December, 1859, inclusive.*)

27th December.

3087. Horace Vaughn, of Providence, Rhode Island, in the United States of America, but now of the city of Manchester, Gentleman, for an invention of "An improved method of hardening and tempering steel, and of hardening cast and wrought iron."—Dated 29th December, 1856.

12. John Fowler, junior, of Havering, near Romford, in the county of Essex, for an invention of "Improvements in giving motion to ploughs and other agricultural implements."—Dated 1st January, 1857.

72. John James Russell, of Wednesbury, and Joseph Bennett Howell, of Sheffield, for an invention of "Improvements in the manufacture of steel tubes applicable to the flues of steam boilers, and other uses."—Dated 8th January, 1857.

28th December.

3089. Timothy Alden, of New York, in the United States of America, Mechanical Engineer, for an invention of "Setting and distributing printing types."—Dated 29th December, 1856.

COLONIAL PATENT LAW.

CANADA.

Extracts from "An Act to repeal a certain Act therein mentioned, and make better provision for the encouragement of agriculture, and also to provide for the promotion of Mechanical Science," (20 Vict. c. xxxii., assented to 10th June, 1857).

Minister of Agriculture and Bureau thereof.

II. The bureau of agriculture shall continue to be attached to one of the public departments, and the head of such department shall be charged with the direction of the said bureau, and shall in respect thereof be known as the Minister of Agriculture.

Minister to receive Applications for Patents for Inventions, &c.

IV. The said minister shall..... receive all applications, drawings, descriptions, specifications, and models for or relating to Patents for Inventions in this province, and shall keep the records thereof; and all Acts now in force relating to Patents for Inventions, and which direct anything to be done by or through the Provincial Secretary shall be held to have directed the same to be done by or through the said Minister.

Boards of Arts and Manufactures constituted for Upper and Lower Canada.

XVIII. There shall be, and there is hereby created and established, in and for Upper Canada, one corporation, a body corporate, to be composed as hereinafter provided, and to be and be called "The Board of Arts and Manufactures for Upper Canada."

XIX. There shall be, and there is hereby created and established, in and for Lower Canada, one corporation, a body corporate, to be composed as hereinafter provided, and to be and be called "The Board of Arts and Manufactures for Lower Canada."

XXVII. And it shall be the duty of the said Boards of Arts and Manufactures to take measures, with the approbation of the Minister of Agriculture, to collect and establish at Toronto and Montreal respectively, for the instruction of practical mechanics and artizans, museums of mineral and other material substances, and chemical compositions, &c., and..... the Minister of Agriculture may cause duplicates or copies of models, plans, specimens, drawings, and specifications, dsposited in the Patent Office, and upon which Patents of Invention have issued, to be made from time to time, and placed in the model rooms, museums, or libraries of the said Boards of Arts and Manufactures, respectively, &c.

ALL FOREIGN and COLONIAL PATENT LAWS and RULES, being translations or copies of Official Communications, may be found in the following Numbers of this Journal, published at 2*d.* each, or 3*d.* free by post:—

Austria, No. 291.
Bavaria, No. 262.
Belgium, Nos. 292 and 348.
Baden, and Petty States of Germany, No. 325.

PATENT LAW AMENDMENT ACT, 1852.—All Specifications, Indexes, &c., printed by order of the Commissioners of Patents, are sold at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

THE PATENT LAW AMENDMENT ACTS (15 & 16 Vict., cap. 83; 16 Vict., cap. 5; and 16 & 17 Vict., cap. 115); with the Rules and Regulations made by the Commissioners of Patents for Inventions, and by the Lord Chancellor and the Master of the Rolls, under the Acts 15 and 16 Vict., c. 83, and 16 & 17 Vict., c. 115, accompanied by Specimen Forms of the Provisional Documents printed on sheets of the prescribed size. Price 6*d*.

THE CHRONOLOGICAL INDEX of PATENTS of INVENTION, from March 2, 1617 (14 James I.), to September 30, 1852 (16 Vict.), 2 vols. Price 30*s.*

THE ALPHABETICAL INDEX of PATENTEES of Inventions for the above period. Price 20*s.*

THE SUBJECT-MATTER INDEX of PATENTS for the same period — *Second Edition*—to which is prefixed a Key of Terms and Phrases. 2 vols. Price 2*l.* 16*s.*

A Key to the *First Edition* of the above work is also published separately, and may be had on application.

THE CHRONOLOGICAL INDEXES of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st October to the 31st December, 1852, and from the 1st January to the 31st December, 1853, in one volume. Price 11*s.*

THE ALPHABETICAL INDEXES for the above periods, in one volume. Price 13*s.*

THE SUBJECT-MATTER INDEX, from 1st October to 31st December, 1852. Price 9*s.*

THE SUBJECT-MATTER INDEX, from 1st January to 31st December, 1853. Price 16*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1854. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 16*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1855. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 7*s.* 6*d.*

THE SUBJECT-MATTER INDEX for the above period. Price 17*s.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1856. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 18*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED from the 1st January to the 31st December, 1857. Price 6*s.* 6*d.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE CHRONOLOGICAL INDEX of APPLICATIONS for PATENTS and PATENTS GRANTED, from the 1st January to the 31st December, 1858. Price 6*s.*

THE ALPHABETICAL INDEX for the above period. Price 8*s.*

THE SUBJECT-MATTER INDEX for the above period. Price 19*s.* 6*d.*

THE REFERENCE INDEX of PATENTS, pointing out the Office in which each enrolled Specification of a Patent may be consulted; the Books in which Specifications, Law Proceedings, and other subjects connected with Inventions have been noticed; also such of the Specifications of Patents granted under the Act of 21 James I. as have been published by the authority of the Commissioners. Price 30*s.*

AN APPENDIX to the REFERENCE INDEX of PATENTS of INVENTION, containing Abstracts from such of the early Patents and Signet Bills as describe the nature of the invention, and which Patents have no enrolled Specifications. Price 4*s.*

AN INDEX to ALL INVENTIONS PATENTED in ENGLAND from 1617 to 1854 inclusive, arranged under the greatest number of heads, with parallel references to INVENTIONS and DISCOVERIES described in the scientific works of VARIOUS NATIONS, as classified by Professor Schubarth. By B. WOODCROFT.

The foreign works thus indexed form a portion of the Library of the Commissioners of Patents, where they may be consulted, or manuscript translations be had.

SOMMAIRE de toutes les INVENTIONS BREVETÉES en ANGLETERRE depuis 1617 jusqu'en 1854 inclusivement, arrangées d'après le plus grand nombre de rubriques, avec renvois aux INVENTIONS et DÉCOUVERTES décrites dans les ouvrages scientifiques de DIFFÉRENTES NATIONS, classés par le Professeur Schubarth. Par B. Woodcroft.

Les ouvrages étrangers ci-dessus font partie de la Bibliothèque de la Commission des Patentes, où l'on peut les consulter, et obtenir des traductions en manuscrit.

VERZEICHNISS aller in ENGLAND von 1617—1854 incl. PATENTIRTEN ERFINDUNGEN, unter vielfältige Titel gebracht, mit Hinweisungen auf ERFINDUNGEN und ENTDECKUNGEN die nach Prof. Schubarth's Klassificirung in den wissenschaftlichen Werken VERSCHIEDENER NATIONEN beschrieben sind. Von B. Woodcroft.

Die hier aufgeführten fremden Werke machen einen Theil der Bibliothek der Patent Commission aus, allwo sie nachgeschlagen oder schriftliche Uebersetzungen besorgt werden können.

REPERTORIO di tutte le INVENZIONI munite di LETTERE PATENTI in INGHILTERRA dal 1617—1854 inclusivo, poste in ordine sotto il piu gran numero di capi, con riferenze alle INVENZIONI e SCOPERTI descritti nelle opere scientifiche di DIVERSE NAZIONI, classate dal Professore Schubarth. Dal Sig. B. Woodcroft.

Le opere straniere quì indicate possono esser consultate nella Biblioteca dei Commissari delle Patenti, e traduzioni in manuscritto vi possono ottenersi.

B. WOODCROFT,
Superintendent of Specifications, &c.

SUPPLEMENT to the SERIES of LETTERS PATENT and SPECIFICATIONS of LETTERS PATENT for INVENTIONS recorded in the Great Seal Patent Office, and granted between the 1st March (14 Jac. 1.) A.D. 1617, and the 1st October (16 Vict.) A.D. 1852; consisting for the most part of Reprints of scarce Pamphlets, descriptive of the early patented Inventions comprised in that Series. Edited by BENNET WOODCROFT, Superintendent of Specifications, etc. In one vol., price 9*s.* 6*d.*, or each Tract separately at the price affixed.

CONTENTS OF VOL. I.

1. Metallica; or, the treatise of Metallica, briefly comprehending the doctrine of diverse new metallical inventions, &c. By SIMON STURTEVANT. (*Letters Patent, dated 29th February*, 1611.) Price 1*s.* 4*d.*
2. A Treatise of Metallica, but not that which was published by Mr. Simon Sturtevant, upon his Patent, &c. By JOHN ROVINSON (*Letters Patent, granted A.D.* 1612.) Price 4*d.*
3. A Commission directed to Sir Richard Wynne and others to inquire upon oath whether NICHOLAS PAGE or Sir NICHOLAS HALSE was the first inventor of certaine kilnes for the drying of malt, &c. &c. (*Letters Patent, Nos.* 33 *and* 85, *respectively dated 8th April*, 1626, *and 23rd July*, 1635.) Price 2*d.*
4. DUD DUDLEY'S Metallum Martis; or iron made with pit-coale, sea-coale, &c. (*Letters Patent, Nos.* 18 *and* 117, *respectively dated 22nd February*, 1620, *and 2nd May*, 1638.) Price 8*d.*
5. Description of the nature and working of the patent Water-scoop Wheels invented by WILLIAM WHELER, as compared with the raising wheels now in common use. By J. W. B. Translated from the Dutch by Dr. Tolhausen. (*Letters Patent, No.* 127, *dated 24th June*, 1642.) Price 2*s.*
6. An exact and true definition of the stupendous Water-commanding Engine, invented by the Right Honourable (and deservedly to be praised and admired) EDWARD SOMERSET, Lord Marquis of WORCESTER, &c. &c. (*Stat.* 15 *Car. II. c.* 12. *A.D.* 1663.) Price 4*d.*
7. Navigation Improved; or the art of rowing ships of all rates in calms, with a more easy, swift, and steady motion than oars can. By THOMAS SAVERY. (*Letters Patent. No.* 347, *dated 10th January*, 1696.) Price 1*s.*
8. The Miner's Friend; or an engine to raise water by fire described, &c. By THOMAS SAVERY. (*Letters Patent, No.* 356, *dated 25th July*, 1698, *and Stat.* 10 *&* 11 *Will. III. c.* 31, *A.D.* 1699.) Price 1*s.*
9. Specimina Ichnographica; or a brief narrative of several new inventions and experiments, particularly the navigating a ship in a calm, &c. By JOHN ALLEN, M.D. (*Letters Patent, No.* 513, *dated 7th August*, 1729.) Price 8*d.*
10. A description and draught of a new-invented Machine for carrying vessels or ships out of or into any harbour, port, or river, against wind and tide, or in a calm, &c. By JONATHAN HULLS. (*Letters Patent, No.* 556, *dated 21st December*, 1736.) Price 8*d.*
11. An historical account of a new method for extracting the foul air out of ships, &c., with the description and draught of the machines by which it is performed, &c. By SAMUEL SUTTON, the Inventor. To which are annexed two relations given thereof to the Royal Society by Dr. Mead and Mr. Watson, (*Letters Patent No.* 602, *dated 16th March* 1744.) Price

---

REAPING MACHINES.—The entire series of Specifications and Drawings on this subject to the end of 1853, together with an Appendix, prepared by B. Woodcroft, of the Patent Office, and published under the sanction of the Commissioners, may be obtained at the cost price of 2*l.* 3*s.* 11½*d.*

FIRE-ARMS, PROJECTILES, &c.—The series of Specifications and Drawings on this Subject, from 15th May, 1718, to 31st December, 1853, with Alphabetical and Subject-matter Indexes, may be obtained at the cost price of 9*l.* 18*s.* 6½*d.*

The Indexes, separately, price 3*s.*

In course of Publication, by Order of the Commissioners of Patents.

ABRIDGMENTS (in Classes, and Chronologically arranged) of all SPECIFICATIONS of PATENTED INVENTIONS, from the earliest enrolled to those published under the Act of 1852.

These books are of 12mo size, and as each is limited to inventions of one class only, they can be sold at prices sufficiently moderate to enable the humblest inventor to examine for himself whether his discovery has been previously patented or not.

At the foot of each abstract are given references to notices of the inventions in scientific and other works, and to the reports of law proceedings for infringements, &c. &c. &c.

The classes already published are,—

1. DRAIN TILES AND PIPES, price 6*d.*
2. SEWING AND EMBROIDERING, price 6*d.*
3. MANURE, price 6*d.*
4. PRESERVATION OF FOOD, price 6*d.*
5. MARINE PROPULSION, price 4*s.*
6. MANUFACTURE OF IRON AND STEEL, price 5*s.*
7. AIDS TO LOCOMOTION, price 1*s.*
8. STEAM CULTURE, price 2*s.*
9. WATCHES, CLOCKS, AND OTHER TIME-KEEPERS, price 1*s.* 6*d.*
10. FIRE-ARMS AND OTHER WEAPONS, AMMUNITION, AND ACCOUTREMENTS, price 6*s.* 6*d.*
11. PAPER.—PART I. MANUFACTURE OF PAPER, PASTEBOARD, AND PAPIER MÂCHÉ, price 3*s.*
12. PAPER.—PART II. CUTTING, FOLDING, AND ORNAMENTING; INCLUDING ENVELOPES, CARDS, PAPER-HANGINGS, &c., price 2*s.*
13. TYPOGRAPHIC, LITHOGRAPHIC, AND PLATE PRINTING, price 7*s.*
14. BLEACHING, DYEING, AND PRINTING YARNS AND FABRICS, price 9*s.* 6*d.*
15. ELECTRICITY AND MAGNETISM: THEIR GENERATION AND APPLICATIONS, price 8*s.* 6*d.*
16. MANUFACTURE AND APPLICATIONS OF INDIA RUBBER, GUTTA PERCHA, &c.; INCLUDING AIR, FIRE, AND WATER PROOFING, price 10*s.*

The following are in the press:—

PREPARATION OF FUEL, AND APPARATUS FOR ITS COMBUSTION.
PRODUCTION AND APPLICATIONS OF GAS.
STEAM ENGINES.
METALS AND ALLOYS.

B. WOODCROFT.

The above, and all other works published by the Commissioners of Patents, are now on sale at the Great Seal Patent Office, 25, Southampton Buildings, Holborn.

This Journal is published on the evenings of Tuesday and Friday, and will be forwarded, post free, to Subscribers. — Terms, 30*s.* per annum. — Subscriptions received at the Great Seal Patent Office, where also single copies, at twopence each, may be obtained.

INDEX.
